“ When we found ourſelves ſo deeply involved in Trouble on all Sides, that we were betrayed by our *Pangarans*, and our *Buggaſſes* had given us juſt Cauſe to ſuſpect their Honeſty, ſo that we had none but the *Engliſh*, *Blacks*, and *Chineſe* to truſt to; the former of which did not exceed one hundred and twenty-five Perſons in Number both civil and military, and moſt of them unexperienced or diſabled Men; and the latter had given us but ſmall Encouragement to depend on them by their deſerting Enſign *Adaire* at *Benterin*. With this ſmall Force, we thought ourſelves in ſome Danger of being overcome; wherefore a general Council was called of all the Company's Servants, and Inhabitants of the Place, to conſult about ſaving what we could of the Company's Effects, and making ſome Proviſion for our Paſſage, if we ſhould be put to flight; when every one gave their Opinion, that it was for the Company's Intereſt, as well as for our own Safety, to put on board the Ship *Matchlapatam* the Company's Treaſure and Books, with what Stores and Proviſions our Time would permit, with all the Expedition and Secreſy it could be poſſibly contrived: After which, if we were obliged to it, we might make our Eſcapes in the beſt Manner we could, by the Help of the Ship *Matchlapatam*, and what Boats we had by us. The Remainder of that Day was ſpent in Purſuit of that Reſolution, but no Boats could be got off that Evening: About Seven o'Clock the next Morning, being the 27th of *March*, the Company's Treaſure, *&c.* as *per* encloſed Bill of Lading, were ſent on board; about Eight, News was ſent that both the *Pangarans* with their Wives and Children, were eloped from *Bencoulen*, in the Night-time, and no Account could be given which Way they were gone. About Ten, Sultan *Cutcheel*, who was come from *Bentale* in the Ship *Matchlapatam*, undertook to accommodate Matters with the Country People, provided we would conſent to their chuſing new *Pangarans*, to which we agreed; but before we could come to a Bechar with them, the *Portugueze* Padre's Slave brought News from *Bencoulen*, that the *Buggaſſes* and *Malays* were riſen there, and had cut off the Padre and moſt of the *Portugueze*, Men, Women, and Children, in a moſt barbarous Manner. He had hardly done telling his Story, when a large Fire broke out at *Bencoulen*; another near the Fort behind *Canbury Paggar*; another towards *Sillebar*; and ſoon after, the Hernage-houſe was ſet on Fire: All this Time no Enemy appearing, but ſtill freſh Fires breaking out in different Places, which could not have been done otherwiſe than by our own *Buggaſes* or *Malays*, that are in our own Service: No Enemy yet appearing, we diſcharged what few great Guns we had mounted, at the thickeſt of theſe Fires, as we thought; in doing of which, one of the Wadds of our own Guns unfortunately fell upon the Tops of the Fort Buildings, which took Fire, and burnt ſo fierce, that there was no extinguiſhing of them: At which Time, we marched out of the Fort in one Body to meet the Enemy. We firſt paſſed the Lower Guard; from thence, round the Horſe Stable-Hill, to the Hermitage, and ſo by the China-Town and Brick-ſheds, which were all on Fire, but no Enemy to be ſeen.

"We then came to the Sea-ſide, where we ſaw ſome Thouſands of the *Malays*, headed by our Sultan and Buggaſſes; which Train reach'd from *Bencoulen* to *Marlbrough*: Moſt of the *Chineſe* had ſecured themſelves in Boats, and on board of their own Praw. We had then none left to ſtand by us but the Blacks; Under theſe Diſadvantages, we thought it in vain to hazard our Lives any longer, againſt ſo numerous an Enemy; our Fort and moſt of our Buildings being deſtroyed by Fire, which put every Man upon ſaving his Life by ſwimming, or getting on board the Boats in the beſt Manner he could: In which Attempt, near Half our People were either drown'd or kill'd by the Enemy, before they could make their Eſcape. The next Morning, we computed near Three Hundred and Fifty black and white Men, Women, and Children, were ſaved on board the Ship *Matchlapatam*, Mr. *Newcome*'s Barge, and three Tombongons, or Boats for going on board Ships; for which Number we had not Water for above five Days, at a Pint a Man each Day. Our firſt Deſign was to go to *Bantal*, but both the Wind and Current were ſo ſtrong againſt us, that we could not ſtir that Way, and ſo it continued 'till the 29th of *March*; till which Time, we remained in the Road, when we were obliged to alter our Reſolution, and make the beſt of our Way to *Batavia*; where, in all Probability, we might ſooner arrive, as the Wind and Current were then ſet; or at ſome Place where we might get ſome freſh Water, which we could not expect to be ſupplied with on the Coaſt of *Sumatra*, to the South of *Bantal*. After we had ſupplied each Boat with five Days Proviſions of Water and Rice we weighed Anchor and ſet ſail in Company for *Batavia*. On the Second of *April*, we loſt Sight of all our Boats: On the ninth, we anchored at *New-Iſland*, where we watered, and got ſome Proviſions: On the 11th, we weigh'd from thence, and arrived at *Batavia* on the Sixteenth.

"On the 18th and 19th, fifty out of our Military, who where ſent in Boats to guard the Blacks and Slaves, arrived at *Batavia* from *Lampoun*, where they had put in for Water: where the Blacks mutinied, and cut away the Rigging of their Boats, which occaſioned their driving on Shore: Then the Blacks left them, encouraged by one Serjeant *Thomas Wright*, who alſo went with them. The reſt of our *Europeans*, after being plundered of their very Shirts off their Backs, were at laſt kindly aſſiſted by them with two large Sampans; in which they ſaved their Lives, and arrived at *Batavia*. We met with kinder Uſage as to our Entertainment at *Batavia*, than indeed we expected; for they aſſiſted us in tranſporting one Hundred and Twenty of our People, on board their own Ships, to this Place: Seventy of which, had their Paſſage free, and the Ship's Proviſion, they working for the ſame; and for fifty more, we were obliged to pay twenty Rix Dollars each for their Tranſportation; and twenty Rix Dollars each more, to the Captains for their Proviſions, in their Voyage. Thirty Perſons more came with the Deputy-Governor on the Ship *Matchlapatam*; and ſeven more are on board the *Madraſs* Brigantine, who left *Batavia* in Company with us; ſo that we had ſaved one hundred and fifty-ſeven Perſons from the Hands of our Enemies, beſides twenty Slaves belonging to the Honourable Company, and private Perſons which were diſpoſed of in *Batavia*.

"One of the *Dutch* Ships arrived here the 24th Inſtant, when Mr. *Newcome*, &c. adviſed the Governor of our Misfortunes, but the Letter we underſtand is not yet gone from this Place. The *Matchlapatam* arrived here Yeſterday, and this Day the other two Ships, on which are our whole Complement; and we ſhall ſtay here no longer than abſolutely neceſſary to provide for our Paſſage to Fort St. *George*; where we hope to arrive ſoon after this comes to your Hands. The *Madraſs* Brigantine is not yet arrived. Whilſt we were in *Batavia*, we uſed all our Endeavours to ſend ſome Aſſiſtance to *Bantal*, tho' we had but little Reaſon to hope that Place had eſcaped the ſame Fate we ourſelves had met with; but in this the *Dutch* oppoſed us in all our Propoſals. The Deputy-Governor would have gone himſelf in the *Matchlapatan*, with as many of our People as ſhe could conveniently carry; but this they would not allow without he could take all our People along with him, which was altogether impoſſible; nor would they ſupply us with a Veſſel on that Occaſion.

"We endeavoured to hire the *Madraſs* Brigantine, for that Purpoſe, but the Maſter and Supercargoes alledged, ſhe was not in a Condition to proceed. We then propoſed to the *Dutch*, that we might have four Cheſts of Treaſure, and ſome Gun-powder to be forwarded to them on the *Amelia*, on her Arrival; but they refuſed to take Charge of it, as they pretended, leſt Diſputes might enſue: We then requeſted, to leave it in the Hands of any private Perſons; or that we might leave ſome of our own Servants there, to take Charge of it; but they would not conſent to any one of theſe Propoſals, nor ſuffer the Treaſure to be left behind in any manner whatſoever. We had drawn out a Proteſt againſt them for this Refuſal, but when we were going to deliver it, the Shawbander, who had been our Friend, plainly told us, what the Effects of it would be, that the next *Engliſh* Ships that fell in there, would ſuffer for it, in meeting with worſe Treatment than ever any had yet done; whereas we ourſelves had been civilly treated in all other Reſpects.

"Upon this, we conſidered, that the *Amelia* would ſhortly arrive, for whom we have left Orders to proceed firſt to *Bantal*, and from thence to Fort *St. George*, with Advice, if ſhe arrives Time enough to get away by the 15th of *June*; if not, to come directly for Fort *St. George*; as alſo the outward-bound *China* Ships: And probably this Year's Shipping from the Weſt Coaſt might be obliged to put in there for Proviſions; which, if they ſhould fail of our Company, might ſuffer more than the Advantage they would reap by our Proteſt: Upon which Conſideration, it was agreed, it ſhould not be delivered. This is a true Narrative of our Proceedings, ſince our Troubles commenced; and what we have omitted herein, you will find more particularly inſerted in our Diaries and Conſultations, when we come to lay them before your Honour, *&c.* for your Peruſal, which we hope will be ſufficient to demonſtrate, that this Misfortune is no way owing to our Miſconduct, which we ſubmit to your Honour's favourable Conſtruction, and beg Leave to ſubſcribe,

Honoured Sir,

Your moſt Obedient, and

Obliged Humble Servants,

Negapatam,
June 28, 1719.

Thomas Cook, *Dept.-Governor,*
Stephen Newcome,
William Palmer.

"The foregoing is an Account of our Proceeding, as it was remitted to the Governor and Council of this Place from *Negapatam*; to which it will not be amiſs to add, the Reaſons that were the Occaſion of this Misfortune, which is omitted in the foregoing Narrative: Firſt, it is to be conſidered, that the *Engliſh* had been involved in Troubles with the Country Government, both at *Marlbrough* and *Bantal* for ſome Time before they arrived on the Coaſt; which tho' I was ſo fortunate as

“ to bring to a Concluſion, and had for many Months
“ after kept a fair Correſpondence with the Natives; ſtill
“ they harboured in their Minds a ſecret Reſentment of
“ the former Injuries they had ſuffered, which they con-
“ cealed under a Cloak of Friendſhip, and ſeeming Satis-
“ faction of my Adminiſtration, till they had brought the
“ whole Country into a Combination, and being ſenſible
“ how briſkly our Fortifications were carried forward, took
“ the Opportunity of Revenge before our Brick-buildings
“ could be finiſhed, and at a Time, as they thought, we
“ ſhould have no Ship in the Road to aſſiſt us; but the
“ *Matchlapatam* very fortunately arrived a few Days be-
“ fore they put their Deſign in Execution. Not long be-
“ fore this Rebellion, a Difference had happened between
“ *Dupatty Benterin* and *See Gibb*, Captain of the *China-*
“ *men*, and Undertaker of the Company's Sugar and Ar-
“ rack Plantations. The *Dupatty* is one of the ſecond
“ Men in the Kingdom, and Governor of *Duſanor*, a
“ Town of that Name, ſituate on the Side of the River,
“ oppoſite to the Company's Sugar and Arrack Plantations.
“ He is a Perſon well beloved among the Natives, being
“ eſteemed a Prieſt amongſt them, and always thought
“ to be a good Friend to the *Engliſh*.

“ The Difference firſt began by the *Chinamen* killing
“ ſome of the *Dupattay*'s Buffaloes, that had broke through
“ ſome of their Fences, and done ſome ſmall Damage
“ to the Plantations, and indeed, the Fences were not ſo well
“ ſecured as they ought to have been; and this they af-
“ firmed to me they had done, by an Order given them
“ by Mr. *Farmer*, when Deputy-Governor. But conſider-
“ ing the ill Conſequences that might attend granting
“ ſuch Liberty to the *Chineſe*, I immediately forbad them
“ doing the like for the future, and obliged them to
“ make the *Dupatty* Satisfaction for ſome Buffaloes they
“ had killed, and if the like ſhould happen again, I pro-
“ miſed that the *Dupatty* ſhould make good to them what
“ Damages the Plantations appeared to have ſuſtained,
“ provided they kept their Fences in Repair. Notwith-
“ ſtanding what I had done in this Affair, ſome of the
“ *Dupatty*'s People, out of Revenge, got into the *China*
“ Compound, in the Night-time, and killed one of *See*
“ *Gibb*'s Slaves, as he was ſleeping in his Houſe. The *Du-*
“ *patty*'s Brother was ſeen, and known to be one of the
“ Company; whereupon he was taken and brought to the
“ Fort, where he was put into the *Cock-houſe* for about
“ twenty-four Hours, till he could be brought to his Trial;
“ when he was acquitted, without any further Puniſh-
“ ment, there being no plain Proof, that he was the Per-
“ ſon that actually committed the Murder, though by
“ the Evidences that appeared againſt him, there were
“ circumſtantial Proofs enough to have condemned him.
“ However, out of Reſpect to the *Dupatty*, whom I al-
“ ways eſteemed to be my Friend, and being well ac-
“ quainted with his Intereſt, and the Influence he had
“ over the Country People, I thought it convenient to
“ paſs the moſt favourable Conſtruction on this Accuſa-
“ tion, which I accordingly did, and made the *Dupatty*
“ and *See Gibb* ſhake Hands, and promiſe Friendſhip to
“ each other before they parted, and ſo they remained
“ for ſome Time after, till the *Dupatty* had got his Forces
“ together in his *Duſan*, and then he again renewed this
“ Diſpute, reſenting the Wrongs they had received from
“ the *Chineſe*, as alſo the Diſgrace of having his Brother
“ put in the *Cock-houſe*, and brought to his Trial, not-
“ withſtanding I had been ſo favourable to him on this
“ Occaſion, and under this Pretence our Trouble com-
“ menced. *Thomas Cook*.

The two following Letters were intercepted by the *Engliſh* in the Year 1717, which ſhews, that the Natives had formed this Conſpiracy ſome Time before it was put in Execution.

“ This comes from Sultan *Manſore*, *Raja Guillamot*,
“ *Dattue Pandaſh*, all the great Men in *Bandat*, *Sapoolo*,
“ and the Overſeers of Trade in *Bantayan*, and *Tego Loora*;
“ to *Datta Raja Quaſſo*, with all the *Proateens* and *Le-*
“ *micotas*, from *Sablat* at *Cottown*, to *Calaboon*, *Surambe*,
“ and *Malacca*.

“ Raja *Quaſſo*'s Letter ſent by *Tuan Mallin* and *Du-*
“ *patty Loora Sambelan*, is received, which we like very
“ well. We are now aſſuredly certified the whole Coun-
“ try as far as *Abong*, likewiſe *Tuan De Goono* with his
“ People, will unanimouſly join us, and when this ar-
“ rives, ſend *Tuan Mallin* into the Country, to adviſe,
“ that we intend utterly to deſtroy the *Engliſh*, and raſe
“ the Settlements throughout the whole Coaſt, becauſe
“ they have broke Faith, and become quite otherwiſe
“ to what they formerly were. We ſhall proceed as ſoon
“ as the Feſtival is over, therefore would have you *Datte*
“ *Raja Quaſſo* diſpatch a Meſſenger with your real Senti-
“ ments of this Affair, ſignifying alſo how the *Proateens*
“ and *Lemicotas* are affected.” The Anſwer. “ This
“ Letter comes from him that eats nothing, to Raja *Man-*
“ *ſora*, and Sultan *Guillamot*, aſſuring them, that he will
“ gather together all thoſe like himſelf, with the moſt va-
“ liant Men hereabouts, and march directly againſt *Ben-*
“ *coulen*, therefore deſires the Aſſiſtance of Arms, which
“ yourſelves and *Raja Paſſaſſer* muſt not fail to ſend to
“ *Tuan De Goono*, who is reſolved, if the Kings are
“ agreed to be their Ally, and you may depend on his
“ Fidelity, for he knows not how to tell a Lye: When he
“ comes down from the Country, will bring over to his
“ Intereſt the People of *Serangi* to *Bencoulen*, and *Lout*
“ *Cowt*, with thoſe belonging to *Pangarran Munco*
“ *Aunoom*, even as far as *Pollombong*. This is what I
“ promiſe to do, deſiring your Letter in Anſwer to it.
“ So God bleſs and keep you in all your Undertakings;
“ give my Service to *Dattoo Raja Quaſſo*.” Faithfully
tranſlated *per*

Robert Dymond, Linguiſt.

“ Found at *Tanjoong Arang*, up *Sablat* River, by *Orang-*
“ *kio Bandabarrab Munco Raja*, *January* the 27th, 1717,
“ while Mr. *Farmer* was Deputy-Governor of the Weſt
“ Coaſts of *Sumatra*.”

Notwithſtanding the Natives had thus driven the *Engliſh* from *Bencoulen*, they ſuffered them in about a Year's Time to return again, and go on with the Fortifications at *Marlbrough* Fort, without Oppoſition. It is true, there had been ſome *Engliſh* Chiefs ſent thither, who were not endowed with ſo much Diſcretion as they ought. Theſe Gentlemen, by an imperious and aſſuming Behaviour, had highly provoked the Natives; but this being very tolerable in compariſon of the Tyranny the *Dutch* had exerciſed in every Place where they prevailed, the *Mallays*, upon the Expulſion of the *Engliſh*, began to be under terrible Apprehenſions leſt the *Dutch* ſhould come and ſettle amongſt them by Force, and put an iron Yoke upon their Necks, as they had upon their Neighbours. They ſoon laid aſide their Reſentment therefore, and over-looking the Indiſcretions of the *Engliſh* Chiefs, gave all Encouragement to our Countrymen to ſettle among them; and it was very happy for the *Engliſh*, that they removed from *Bencoulen*, for there were buried Multitudes every Year, whereas a late Chief of *Marlbrough* Fort aſſures us, that during the whole Year, they did not bury one Gentleman; ſuch a Difference there is in the Situation of theſe two Places, notwithſtanding they are no more than two or three Miles aſunder, and *Marlbrough* Fort being much more defenſible in its Situation than *York* Fort; for at *Marlbrough* our People are not ſo apprehenſive of being ſurprized by the Natives as formerly, if there ſhould happen any miſunderſtanding between them again. By this Means the *Britiſh* Commerce is greatly extended on this Iſland of *Sumatra*, and with very good Effect.

16. The Company of late Years have been extremely attentive, not only to the general Characters, but ſo far as it has been poſſible for them to be informed as to the Education, Genius and Behaviour of their Chiefs; by which wiſe and prudent Conduct, they have given quite a new Face to their Affairs, and if it had not been for the ſetting up new Companies in different Parts of *Europe*, by which their Trade has certainly been very much hurt, they muſt by this Time have been in a Condition to have almoſt doubled their Dividends; yet I cannot but acknowledge, upon this Occaſion, that as theſe new Companies were erected abroad chiefly from the Opinion that Foreigners entertained of the Profits that were made by our Company,

ſo the Diſcovery of this was, in a great meaſure, owing to the factious Diſputes that have long reigned amongſt us; for great Complaints being made of the Decay of our Trade, the Miniſtry cauſed the Amounts of the Company's Sales to be conſtantly publiſhed, which ſtruck Foreigners with Amazement, and contributed greatly to the forwarding the Projects they had formed of obtaining a Share in this lucrative Traffick.

At the ſame time theſe Deſigns were vigorouſly purſued abroad, there wanted not ſome Projectors at home, who were deſirous of laying open the *Indian* Trade; and abundance of plauſible Things were ſaid upon that Subject, which, as it very naturally might, greatly alarmed the Company, more eſpecially as it happened at a Time when they had Reaſon to apprehend that popular Opinions might prevail to their Prejudice; and therefore it is not to be wondered that they entered likewiſe, on their Side, into ſuch Schemes as were moſt likely to defeat theſe Deſigns, and to ſecure them in the Poſſeſſion of their Rights and Privileges. I ſhall not take upon me to decide ſo nice and intricate a Queſtion, as whether the laying open this Trade would, or would not, have been for the Advantage of this Nation; becauſe, on the one hand, I am ſenſible much may be ſaid on both Sides; and on the other, that I have not Room to examine here what might be alledged on either Side. I confine myſelf therefore to Matters of Fact; and endeavour, with all the Brevity that is conſiſtent with my Deſign, of giving as compleat a Hiſtory as is in my Power, of our Commerce to the *Indies*, which, ſo far as I know, is a Subject not attempted before, and conſequently more neceſſary, which leads me to obſerve, that the Reſult of the Company's Conſiderations on this Head was, the propoſing to ſuch as had the Direction of the publick Affairs, a new Agreement with reſpect to the Company's Powers, ſo apparently beneficial to the Nation, as that it might effectually ſecure them from liſtening to the Propoſals that were, or might be made, for laying this Trade open, in which, without doubt, ſuch as were then entruſted with the Direction of the Company's Concerns, did their Duty to the Proprietors, and were ſo ſucceſsful therein, as to obtain the Concurrence of the Adminiſtration; and, in conſequence thereof, ſuch a Law as they deſired for the preſerving the Powers and Privileges of their Principals.

At all Events, this was much better for the Nation than the Method taken in King *William*'s Time upon the like Occaſion, when the old *Eaſt-India* Company found it requiſite to diſtribute an immenſe Sum of Money to Miniſters and Favourites, to obtain a new Charter, by which the Publick did not gain a ſingle Shilling in Return for the Advantages that were granted to this Corporation. This Obſervation of mine will be fully juſtified, and the Truth thereof effectually proved from the Contents of the Act of Parliament before-mentioned, which was paſſed in the third Year of his preſent Majeſty, in conſequence of the Agreement, of which I have before taken Notice, and was intended on both Sides, to be abſolutely final, and in every Reſpect concluſive.

This Act therefore, after reciting ſeveral Acts, Proviſo's, Charters, and Agreements, *&c.* relating to the United Company of Merchants of *England* trading to the *Eaſt-Indies*, Enacts, That in purſuance of their late Agreement, the ſaid Company ſhall pay into the Receipt of the Exchequer, on or before a certain Day appointed, the Sum of 200,000 Pounds, to be applied towards the Supplies granted to his Majeſty, for which no Intereſt ſhall ever be payable to the Company, nor any Addition be made to their capital Stock or Debt from the Publick, on account thereof; nor ſhall the ſame, or any Part of it, be paid to the Company. And after the 29th of *September*, 1730, the Annuity, or yearly Fund of 160,000 *l.* ſhall be reduced to 128,000 *l.* in reſpect of the capital Stock or Debt of 3,200,000 *l.* which reduced Annuity ſhall be charged on the ſame Duties and Revenues by the like weekly or quarterly Payments, and with the ſame Proviſions for making good Deficiencies in the ſaid reduced Fund, as their preſent Annuity or Fund is now charged on, till ſome new or other Proviſion ſhall be made by Parliament, with Conſent of the Company. But, upon one Year's Notice to be given by Parliament after the 25th of *March*, 1736, on the Expiration of that Year, and on Re-payment of the ſaid Debt of 3,200,000 *l.* to the Company, and all Arrears of their reduced Annuity of 128,000 *l.* which ſhall be due at the End of the ſaid Year; then, and from thenceforth, the ſaid Annuity, or yearly Fund, ſhall ceaſe, and be no longer payable.

At any Time, on a Year's Notice after the ſaid 25th of *March*, 1736, given by Parliament, at the ſaid Year's Expiration, upon Re-payment to the Company of any Sum, not being leſs than Five hundred thouſand Pounds, in Part of the capital Stock of 3,200,000 *l.* and on Payment of all Arrears which ſhall be then due on their reduced Annuity, after ſuch Payments made to ſuch of the ſaid Annuity as ſhall bear a Proportion to the Money ſo paid in Part, ſhall ceaſe and be abated; and ſo from time to time, upon ſuch yearly Notices and Payment of ſuch other Sums in Part of the ſaid capital Stock, till the Whole of their Annuity ſhall be entirely ſunk and determined. Notwithſtanding any ſuch Redemption, all Perſons entitled to any Intereſt in the ſaid capital Stock in Trade, or Money paid in for carrying on the ſame, or in the Factories, Settlements, Lands, *&c.* belonging to the United Company, ſhall be, and continue a Body politick and corporate, *&c.* and have perpetual Succeſſion; and they, and their Succeſſors, ſhall be capable in Law to purchaſe Lands, *&c.* not exceeding at any one time the yearly Value of Ten thouſand Pounds in the Kingdom of *Great Britain*, and alſo to aliene the ſame; and may alſo enjoy all Privileges, Stocks, and Eſtates, and Advantages, *&c.* which are not hereby altered as by former Acts or Charters founded thereon, the Company might hold or enjoy the ſame; and after ſuch Redemption of the ſaid yearly Fund, or one Moiety thereof, the Company may, at their General Courts, declare how much, and what Share in the remaining capital Stock, *&c.* ſhall qualify Members of the ſame Company to be Directors, or to give Votes in any General Court. And, notwithſtanding ſuch Redemption as aforeſaid, the Company ſhall, ſubject to the Proviſo of Determination herein after contained, enjoy the whole and ſole Trade to the *Eaſt-Indies*, and have the only Liberty of trading thither, *&c.* And the *Eaſt-Indies*, or Iſlands, *&c.* within the Limits of the ſaid Company, ſhall not, before the ſaid Determination, be ſailed to by any other of his Majeſty's Subjects.

And if any of the ſaid Subjects, other than the Factors, *&c.* of the United Company, ſhall at any Time ſail, trade, or adventure to or from the *Eaſt-Indies*, and Parts aforeſaid, they ſhall incur the Loſs of all Ships which ſhall be employed in ſuch Trade, *&c.* and the Goods laden therein, and double the Value thereof; which Forfeitures ſhall be ſued for, recovered, and diſtributed, as by the 7 *Geo.* I. *c.* 21, is directed, concerning the Penalties and Forfeitures mentioned in that Act.

The ſaid Company ſhall, at all Times hereafter, have all the Powers which by any Charters, *&c.* are granted them, and not altered by this Act, freed and diſcharged from all Proviſo's of Redemption, *&c.* as fully as if the ſame were here ſeverally repeated, but ſubject to the Reſtrictions contained in the Acts and Letters Patents now in Force, and alſo to the Proviſo's following, *viz.* Provided that upon three Years Notice to be given by Parliament, after the 25th of *March*, 1736, upon the Expiration of the ſaid three Years, and repaying to the Company of the whole capital Stock of 3,200,000 *l.* and all Arrears of Annuities payable in reſpect thereof; then, and from thenceforth, the Right, Title, and Intereſt of the ſaid Company, to the whole, ſole, and excluſive Trade to the *Eaſt-Indies*, &c. ſhall ceaſe and determine. But after the Determination of that Company's Right to the ſole and excluſive Trade to and from the *Eaſt-Indies*, the Corporation, with all or any Part of their joint Stock, Goods, Eſtates, *&c.* may trade in common with other the Subjects of his Majeſty trading to and from thoſe Parts.

Any Notice in Writing, ſignified by the Speaker of the Houſe of Commons, ſhall be deemed a due and proper Notice by Parliament, to all the Ends and Purpoſes for which ſuch Notices are directed by this Act to be given to the Company. Nothing in this Act ſhall extend to ſub-

ject

jeƈt the Governor and Company of Merchants of *England* trading to the *Levant-Seas*, to any Penalties and Forfeitures thereby enacted, in reſpect to their Trade in thoſe Seas; and nothing herein ſhall reſtrain or prejudice ſuch Trade or Navigation within any of the Limits of the *Eaſt-India* Company, as the *South-Sea* Company are any ways entitled unto.

With this Act I ſhall conclude the hiſtorical Part of this Section, having, as I promiſed, deduced the Tranſactions of the *Eaſt-India* Company, and with them the Commerce of the *Britiſh* Nation to the *Indies*, from the earlieſt Accounts we have of their trading to this Part of the World, and from their firſt Eſtabliſhment in the Reign of Queen *Elizabeth* down to the preſent Time; in which Series of Facts, we hope the Reader will find a greater Satisfaction, ſince it exhibits to him in one View, and conſidering the vaſt Variety of Matter in a very narrow Compaſs, a regular Chain of Events, which demonſtrates the vaſt Importance of this Commerce to the Nation, the Means by which it was at firſt acquired, the Progreſs made therein, the Difficulties and Obſtructions it has met with, the Methods by which they have been overcome, and the Manner in which the Company has at laſt acquired a happy and ſecure Eſtabliſhment, which we have Reaſon to hope will laſt as long as our preſent excellent Conſtitution, ſince it is founded on the ſame Baſis, and is fortified by the ſtrongeſt Authority that the Laws of this Country can afford.

It remains, in order to conclude the Plan laid down at the Beginning of this Section, that we ſhould preſent the Reader with a clear and ſuccinct View of the Poſſeſſions of the Company in the *Indies*, and the State of their Commerce in thoſe Parts, as it ſtands at preſent, which we ſhall do with all the Brevity poſſible, and in that Order which ſeems moſt natural, both with regard to the Situation of Places, and the avoiding unneceſſary Repetitions, having nothing more in View than to ſtate every thing as clearly as it is poſſible, and to confine ourſelves within as little Room as the Purſuit of that Deſign will allow.

17. We ſhall begin then with the Port of *Gambron*, or, as ſome write it, *Gombroon*, on the Coaſt of *Perſia*, which became famous after the Deſtruction of the Iſland of *Ormuz*, and the Ruin of the *Portugueze* Power in the *Indies*. The City was built by the Great Shah *Abas*, from whence it is called by the *Perſians Bander-Abaſſi*, that is, the Court of *Abas*. It ſtands in the Lat. of 27° 40′ North, and is looked upon as a Port of the greateſt Trade in this Part of the World. We have elſewhere given a large Account of the Situation, Climate, and Condition of the Country in the Neighbourhood of this celebrated Mart, and ſhall here therefore confine ourſelves ſtrictly to what concerns the Commerce of the *Engliſh*.

Our firſt Eſtabliſhment was about the Year 1613, and the Great Shah *Abas* having, at that Time, Occaſion for our Aſſiſtance againſt the *Portugueze*, granted us by Treaties, in Conſideration of our Services in that War, half the Cuſtoms of this Port, which were duly received for a conſiderable Time; but, at length, under various Pretences, were reduced to one thouſand Tomans a Year, which amounts to three thouſand three hundred thirty-three Pounds ſix Shillings and eight Pence of our Money; and even this, for forty Years paſt, has been but very indifferently paid; and at preſent, as I conceive, we have the Right only, and not the Poſſeſſion. But the *Eaſt-India* Company ſtill maintains a noble Factory here, by which it manages the whole Trade of the Empire of *Perſia*, and exports thither a vaſt Quantity of *European* Goods. In the Year 1720, the Factory ſuffered ſeverely, and the Confuſions induced by repeated Rebellions in *Perſia*; but as the Affairs of that Empire are now pretty well ſettled, there is no doubt but thoſe of the Company will be alſo reſtored, and that we ſhall regain that important Commerce which has been ſo long carried on here.

The City of *Mocha* ſtands at the Entrance of the *Red Sea*, in the Latitude of 13° 11′ W. and is a Place of very great Trade, as we have ſhewn in the former Part of this Work. The *Engliſh* are likewiſe well received here; carry on a great Commerce in Coffee, and other Commodities, as well as in all the adjacent Ports of *Arabia*, as has been already ſhewn in the foregoing Sections. It is true, that we have been ſome times expoſed to the Injuſtice of the *Arabian* Princes, and to the Depredations of Pirates in thoſe Parts; but in this we have only ſhared the ſame Fate with other Nations, and perhaps have eſcaped rather better than they.

We ſhall next proceed to the *Indian* Coaſt, where we have either Factories or Forts, and Settlements, at the following Places, *viz. Baroach*, *Swalley*, *Surat*, *Bombay*, *Dabul*, *Carwar*, *Tellechery*, *Anjengo*, Fort *St. David*, *Conymere*, all along the *Malabar* Coaſt, and turning up to thoſe of *Coromandel*, where we come next to what may be called the Capital of our Poſſeſſions in the *Indies*, I mean Fort *St. George*. We have in the Courſe of this Work, and particularly in this Section, given a large Account of moſt of the Places before-mentioned; which is the Reaſon that we have not dwelt upon them here; but as for Fort *St. George*, which ſtands in the Latitude of 13° 20′ North, it requires a more particular Deſcription for many Reaſons; and, therefore, I have thought fit to inſert a large Hiſtorical Account thereof, as well as a clear and circumſtantial Deſcription, written by one who was perfectly acquainted therewith, as well as with all the Tranſactions that occur in his curious Relation, which will contribute to render the Hiſtory of this Part of our *Indian* Settlements compleat, by furniſhing as exact an Account of this, as we have here before given of other Places; and therefore cannot but afford the Reader an agreeable Entertainment.

Fort *St. George* or *Maderaſs*, or, as the Natives call it, *China Patam*, is a Colony and City belonging to the *Engliſh Eaſt-India* Company, ſituated in one of the moſt incommodious Places I ever ſaw: It fronts the Sea, which continually rolls impetuouſly on its Shore more here, than in any other Place on the Coaſt of *Coromandel*: The Foundation is on Sand, with a Salt-water River on its Backſide, which obſtructs all Springs of freſh Water from coming near the Town; ſo that they have no drinkable Water within a Mile of them, the Sea often threatening Deſtruction on one Side, and the River, in the rainy Seaſon, Inundations on the other. The Sun from *April* to *September* ſcorching hot; and if the Sea-Breezes did not moiſten and cool the Air, when they blow, the Place could not poſſibly be inhabited. The Reaſon why a Fort was built on that Place is not well accounted for; but Tradition ſays, that the Gentleman who received his Orders to build a Fort on that Coaſt, about the Beginning of King *Charles* the Second's Reign, after his Reſtoration, for protecting the Company's Trade, choſe that Place to ruin the *Portugueze* Trade at *St. Thomas*'s; others again alledge, and with more Probability, that the Gentleman aforeſaid, which I take to be Sir *William Langhorn*, had a Miſtreſs at *St. Thomas*'s, of whom he was ſo enamoured, that it made him build there, that their Interviews might be the more frequent and uninterrupted; but whatever his Reaſons were, it is very ill ſituated.

The Soil about the City is ſo dry and ſandy, that it bears no Corn; and what Fruits, Roots, and Herbage they have, are brought to Maturity by great Pains and much Trouble. If it be true, that the Company gave him Power to ſettle a Colony in any Part of that Coaſt that pleaſed him beſt, I wonder that he choſe not *Cabelon*, about ſix Leagues to the Southward, where the Ground is fertile, and the Water good, with the Conveniency of a Point of Rocks to facilitate Boats landing; or why he did not go nine Leagues farther northerly, and ſettle at *Policat*, on the Banks of a good River, as the *Dutch* have done ſince, where the Road for Shipping is made eaſy by ſome Sand-Banks that reach three Leagues off Shore, and make the high turbulent Billows that come rolling from the Sea, ſpend their Force on thoſe Banks, before they can reach the Shore. The Soil is good, and the River commodious, and convenient in all Seaſons: Now, whether one of theſe Places had not been more eligible, I leave to the ingenious, and thoſe concerned, to conſider.

However, the War carried on at *Bengal* and *Bombay*, by the *Engliſh*, againſt the Mogul's Subjects, from 1685, to 1689, made Fort *St. George* put on a better Dreſs than he wore before; for the peaceable *Indian* Merchants, who hate Contention and War, came flocking thither, becauſe it lay far from thoſe Incumberers of Trade, and near the Diamond Mines of *Golconda*, where there are many Times good Bargains to be made, and Money got by our Governors; the black Merchants reſorting to our Colony, to ſecure their Fortunes, and bring their Goods to a ſafe Market, made it populous and rich, notwithſtanding its natural Inconveniencies. The Town is divided into two Parts, one where the *Europeans* dwell, is called the white Town: It is walled quite round, and has ſeveral Baſtions and Bulwarks to defend its Walls, which can only be attacked at its Ends, the Sea and River fortifying its Sides. It is about four hundred Paces long, and one hundred and fifty broad, divided into Streets pretty regular, and Fort *St. George* ſtood near its Centre. There are two Churches in it, one for the *Engliſh*, and another for the *Romiſh* Service. The Governor ſuperintends both, and in filling up Vacancies in the *Romiſh* Church, he is the Pope's Legate *à latere* in Spiritualities. There is a very good Hoſpital in the Town, and the Company's Horſe-Stables are neat; but the old College, where a great many Gentlemen Factors are obliged to lodge, is badly kept in Repair. They have a Town-Hall, and underneath it are Priſons for Debtors. They are, or were a Corporation, and had a Mayor and Aldermen, choſen by the free Burghers of the Town, but that ſcurvy Way is grown obſolete, and the Governor and his Council, or Party, fix the Choice.

The City had Laws and Ordinances for its own Preſervation, and a Court kept in Form, the Mayor and Aldermen in their Gowns, with Maces on the Table, a Clerk to keep a Regiſter of Tranſactions and Caſes, and Attornies and Sollicitors to plead in Form, before the Mayor and Aldermen; but after all, it is but a Farce; for, by Experience I found, that a few Pagadoes rightly placed, could turn the Scale of Juſtice, to which Side the Governor pleaſed, without reſpect to Equity or Reputation. In ſmaller Matters, where the Caſe on both Sides is but weakly ſupported by Money, then the Court acts judiciouſly, according to their Conſciences and Knowledge, but often againſt Law and Reaſon; for the Court is but a Court of Conſcience, and its Directions are very irregular, and the Governor's diſpenſing Power of nulling all that the Court tranſacts, puzzles the moſt celebrated Lawyers there, to find Rules to juſtify ſuch Conduct.

They have no martial Law, ſo that they cannot inflict the Pains of Death any other Ways than by Whipping, only for Piracy they can hang, and ſome of them have been ſo fond of that Privilege, that Mr. *Yale* hang'd his Groom (*Croſs*) for riding two or three Days Journey off, to take the Air; but in *England* he paid pretty well for his arbitrary Sentence: And one of a later Date, *viz.* the Orthodox Mr. *Collett*, hang'd a Youth, who was an Apprentice to an Officer on board a Ship, whoſe Maſter going a pirating, carried his Servant along with him, but tho' the Youth ran from them the firſt Opportunity he met with on the Iſland of *Jonkceyloan*, and informed the Maſter of a Sloop which lay in the River there, that the Pirates had a Deſign on his Sloop and Cargo, and went armed in Company with the Maſter, to hinder the Approach of the Pirates, and was the firſt that fired on them, yet that merciful Man was inexorable, and the Youth was hanged.

The Power of executing Pirates is ſo ſtrangely ſtretched, that if any private Trader is injured by the Tricks of a Governor, and can find no Redreſs, if the injured Perſon is ſo bold as to talk of *Lex talionis*, he is infallibly declared a Pirate. The black Town is inhabited by *Gentows*, *Mohammedans*, and *Indian Chriſtians*, *viz.* *Armenians* and *Portugueze*, where there are Temples, and Churches for each Religion, every one being tolerated, and every one follows his proper Employment. It was walled in towards the Land, when Governor *Pit* ruled it. He had ſome Apprehenſion that the Mogul's Generals in *Golconda* might ſome Time or other plunder it; ſo laying the Hazard and Danger before the Inhabitants, they were either perſuaded, or obliged to raiſe Subſidies to wall their Town, except towards the Sea, and the white Town.

The two Towns are abſolutely governed by the Governor, in whoſe Hands the Command of the Military is lodged; but all other Affairs belonging to the Company, are managed by him and his Council, moſt Part of whom are generally his Creatures; and I have been, and am acquainted with ſome Gentlemen, who have been in that Poſt, as well as ſome private Gentlemen who reſided at *Fort St George*, Men of great Candour and Honour, but they ſeldom continued long Favourites at Court. One of the Gates of the white Town looks towards the Sea, and it is for that Reaſon called the Sea-gate, the Gate-way being pretty ſpacious, was formerly the common Exchange, where Merchants of all Nations reſorted about Eleven o'Clock to treat of Buſineſs in Merchandiſe; but that Cuſtom is out of Faſhion, and the Conſultation-chamber, or Governor's Apartment, ſerves for that Uſe now; which made one Captain *Hart*, a very merry Man, ſay, that he could never have believed that the Sea gate could have been carried into the Conſultation-room, if he had not ſeen it.

The Company have their Mint here for coining Bullion, that comes from *Europe*, and other Countries, into Rupees, which brings them in a good Revenue. The Rupee is ſtamp'd with *Perſian* Characters, declaring the Mogul's Name, Year of his Reign, and ſome of his Titles. They alſo coin gold into Pagadoes of ſeveral Denominations and Values. There are alſo Schools for the Education of Children; the *Engliſh* for reading and writing *Engliſh*; the *Portugueze* for their Language, and *Latin*; and the *Mohammedans*, *Gentows* and *Armenians*, for their particular Languages, and the *Engliſh* Church is well endowed, and maintains poor Gentlewomen in good Houſewifery, and good Cloaths and Palankines.

The Diamond Mines are but a Week's Journey from *Fort St. George*. Some Cuſtoms and Laws at the Mines are, when a Perſon goes thither on that Affair, he chuſes a Piece of Ground, and acquaints one of the King's Officers, who ſtay there for that Service, that he wants ſo many Covets of Ground to dig in, but whether they agree for ſo much, or if the Price be certain, I know not. However, when the Money is paid, the Space of Ground is encloſed, and ſome Centinels placed round it. The King challenges all Stones that are found above a certain Weight; I think it is above ſixty Grains; and if any Stones be carried clandeſtinely away, above the ſtipulated Weight, the Perſon guilty of the Theft is puniſhed with Death. Some are fortunate, and get Eſtates by digging, while others loſe both their Money and Labour. (The current Trade of *Fort St. George* runs gradually ſlower. The Traders meeting with Diſappointments, and ſometimes with Oppreſſions, and ſometimes the Liberty of buying and ſelling is denied them: And I have ſeen, when the Governor's Servants have bid for Goods at a public Sale, ſome who had a mind to bid more, durſt not, others who had more Courage, and durſt bid, were brow-beaten and threatened; and I was Witneſs to a Bargain of *Surat* Wheat, taken out of a Gentleman's Hands, after he had fairly bought it by Auction, ſo that many trading People are removed to other Parts, where there is a greater Liberty and leſs Oppreſſion.)

The Colony produces very little of its own Growth, or Manufacture for foreign Markets. They had formerly a Trade to *Pegu*, where many private Traders got pretty good Bread by their Traffick and Induſtry, but the Trade is now removed into the *Armenians*, *Moors* and *Gentows* Hands, and the *Engliſh* are employed in building and repairing of Shipping. The Trade they have to *China* is divided between them and *Surat*; for the Gold and ſome Copper are for their own Markets, and the Groſs of their own Cargo, which conſiſts in Sugar, Sugar-candy, Allum, China-ware, and ſome Drugs, as China-roots, Gallinggal, *&c.* are all for the *Surat* Market. Their Trade to *Perſia* muſt firſt come down the famous *Ganges*, before it can come down *St. George*'s Channel, to be conveyed to *Perſia*. They never had any Trade to *Mocha*, in the Product and Manufactures of *Coromandel*, before the Year 1713, and *Fort St. David* ſupplies the Goods for that Port; ſo that *Fort St. George* is an Emblem of *Holland*, ſupplying foreign Markets with foreign Goods. The Colony is well-peopled, for there is ſuppoſed to be 80,000 Inhabitants in the Towns and Villages; and there are generally about 4 or 500 *Europeans* reſiding there, reckoning the Gentlemen, Merchants, Seamen, and Soldiers. Their Rice is brought by Sea from *Ganjam* and *Orixa*; their Wheat from *Surat* and *Bengal*; and their Fire-wood from the Iſlands of *Diu*, a low Point of Land that lies near *Matchulipatam*; ſo that an Enemy that is ſuperior to them in Sea-Forces, may eaſily diſtreſs them.

Mr. *Lockyer*, in his Account of this Place, tells us, that the Adminiſtration is veſted in the Governor and Council, which conſiſts of ſix grave Merchants in the Company's Service; and though theſe Officers have but ſmall Salaries, yet their Perquiſites and Advantages they derive from Trade, are ſo conſiderable as to enable them to make a good Figure while they live there, and carry home, notwithſtanding, very large Eſtates. He ſeems to differ with other Writers as to the Properties of the Soil and Climate; and therefore it may not be amiſs to attend a little to his Account. The Inhabitants, ſays he, enjoy as perfect Health as they do in *England*, which is plainly diſcovered in their ruddy Complexions, which few of our other Settlements can boaſt. The Heats in Summer are the greateſt Inconveniency they labour under; yet, I never heard of any ill Effect from them. The delicious Fruits that the Country abounds with, are a great Help in this Extremity; nor are they wanting to themſelves in other Reſpects, Bathings and wet Goneys being often apply'd with Succeſs to the Relief of the panting. It ſeldom laſts above four or five Hours in a Day, when the Sea-Breeze coming on, the Town ſeems to be new born. The Governor, during the hot Winds, retires to the Company's new Garden for Refreſhment, which he has made a very delightful Place of a barren one. Its coſtly Gates, lovely Bowling-greens, ſpacious Walks, Teal-pond, and Curioſities, preſerved in ſeveral Diviſions, are worthy to be admired. Lemons and Grapes grow there; but ſo much Pains is neceſſary to bring either to Maturity, that a Bunch of one, or a ſingle Fruit of the other, will ſtand its Owner in five Shillings before it is ripe.

The Governor ſeldom goes abroad with leſs than three or fourſcore perſons armed, beſides his *Engliſh* Guards to attend him: He has two Union-Flags carried before him, and Country Muſick, enough to frighten a Stranger into Belief the Men were mad. Two Dubaſhes attend to cool him with Fans, and drive away the Flies, that otherwiſe would moleſt him. He is a Man of great Power, reſpected as a Prince by the Rajahs of the Country; and is, in every Reſpect, as great, ſave that theſe are for themſelves, this has Maſters. When a Perſon of Note dies, the Funeral is ſolemnized with the greateſt Magnificence. The Governor, Council, and Gentlemen of the Town attend, nor are the Fair-Sex wanting in their duty to their deceaſed Countrymen: The Executors are liberal in all Reſpects to expreſs a juſt Concern for their Friend; whence the Ceremony is performed with all that is neceſſary for the Interment of a Chriſtian. The Burying-Place is at the further End of the Black-Town, adorned with many ſtately Tombs in Honour of the Defunct; ſome with lofty Spires carved into different Fancies, after the *Indian* Manner: Others, in a lower Sphere, gravely expreſs the Merits of the Perſon for whoſe ſake they were erected, and all in general have the moſt curious Workmanſhip in *India* beſtowed on them.

Moſt of the Powder expended in the Garriſon is made on the Iſland, about a Gun-ſhot from the Town. It has not the Force of that which comes from *England*, for no other Reaſon than not well incorporating the Ingredients. They have the fineſt Salt-Petre, and Brimſtone, with good Charcoal, which ought to make the beſt Powder; but for want of ſkilful Managers and good Contrivances, theſe Excellences are of no Effect. And, in truth, the Company in other Caſes of the like Nature, are very much wanting to themſelves. There is not an *Engliſh* Carpenter, Smith, Joiner, or other Artificer in the City, who knows half his Trade; whence they are obliged to black Fellows for what they have Occaſion for in theſe Trades; nor is there ſo much as one Shop of any ſort in the *Engliſh* Town, the Benefit of which all the *Dutch* Settlements ſufficiently demonſtrate; for they are ſo ſenſible of it, that they take due Care never to be deficient that way. This is a Thing eaſily brought to paſs by a Body ſo conſiderable in the Kingdom. I ſhall rather admire it has been ſo long neglected, than offer at the Means for effecting it. However, I wiſh, for the Honour of the *Engliſh* Nation, they would decline ſending ſuch diminutive, dwarfiſh, crooked Recruits, as of late have gone to ſupply their Settlements. To ſay no better can be had in Time of War, is an Evaſion, my own Experience proves altogether light; for, ſince it is no matter what Country in *Europe* they are of, let but three Captains be ſent to *Ireland*, in leſs than three Months they could raiſe a Regiment of picked Fellows, who would be able to do them Service; beſides, they look like Men, which is enough for them at Fort *St. George*. Objecting their Religion, looks like Partiality, for the *Topaſes* in *India* are all of the ſame Principles; our Officers liſt none but Proteſtants to ſerve in our Troops, wherefore that Country is quite over-run with luſty Men, who are ready to ſtarve for want of Employ.

But, to proceed regularly in our Hiſtory of the Settlements of this Company. Along the Coaſt of *Coromandel*, there were formerly ſeveral Places along the Coaſt to the Northward, which had *European* Factories ſettled in them, but are now neglected and unfrequented. There were alſo ſome Places farther up the Country, where the *Engliſh* and *Dutch* ſettled; but the Rajahs, who poſſeſſed the adjacent Countries, giving great Interruption to Trade, by their unjuſt and unreaſonable Impoſitions, obliged them to withdraw their Factories. That of *Matchulipatam* was the laſt they quitted, and, about threeſcore Years ago, was eſteemed the moſt flouriſhing Colony the *Engliſh* had in all *India*; but now their Houſe is deſerted, and the *Dutch*, who remained behind them, are preparing to take the ſame Courſe. It is not a great many Years ago ſince the Mogul's Viceroy, upon this Coaſt, offered the Governor of Fort *St. George*, to make him a Preſent of the Iſlands of *Diu*, and the Inhabitants were well inclined thereto; but the Governor delayed taking Poſſeſſion ſo long, that both the Viceroy and the People changed their Minds; and when he would have erected a Factory, or a Fort there, they would not permit it.

Next to *Matchulipatam* is *Narſipore*, where the *Engliſh* had a Factory for long Cloth, for the Uſe of their Factory of *Matchulipatam*, when they manufactured Chints there. It alſo affords good Teak-Timber for Building, and has a fine deep River, but a dangerous Bar, which makes it little frequented. And paſſing round *Carrango* Point, a little up *Carrango* Bay, is *Angerang*, that has the Benefit of a large deep River, that penetrates far up into the Continent. It has a Bar, ſoft at the Bottom, and three and an half Fathoms on it at High-Water. Here the beſt and fineſt long Cloth is made that *India* affords, and is ſold cheap; but the inland Countries lying near the River, are in the Hands of ſeveral Rajahs; and each being Sovereign in his own ſmall Dominions, lays ſuch Impoſitions and Exactions on the Cloth that comes down the River, that they ruin that beneficial Trade of *Angerang*, and make it little frequented. In *Anno* 1708, the *Engliſh* from *Vizagapatam* ſettled there; but whether the Factory was ſtarved for want of Money, or whether the conſtituent and conſtituted Chiefs of the Factories diſagreed about dividing the Bear's-Skin, I know not; but the Factory was ſoon withdrawn, and the Project loſt.

Coaſting along Shore, there are ſeveral little Ports between *Matchulipatam* and *Vizagapatam*, beſides *Narſipore* and *Angaran*, but *Wabow* is the moſt noted, for it produces Rice for Exportation, beſides ſome Cloth, but it is not frequented by *Europeans*; and therefore I proceed to *Vizagapatam*, a fortified Factory belonging to the *Engliſh*. It is regularly fortified with four little Baſtions, and has about eighteen Guns mounted in it. It has the Advantage of a River, but a dangerous Bar to paſs over before we get into it. The Country about affords Cotton-Cloths both coarſe and fine, and the beſt Dureas, or ſtriped Muſlins in *India*; but the Factory is generally heart-ſick for want of Money to refreſh it.

In *Anno* 1709, the Factory drew a War on themſelves from the Nabob of *Chickacul*; for one Mr. *Simeon Halcomb*, who had been Chief at *Vazagapatam*, had borrowed conſiderable Sums of the Nabob, and affixed the Company's Seals to the Bonds he gave for them. Mr. *Holcomb* dying, the Nabob demanded his Money from the ſucceeding Chief, who would not pay him, alledging that *Holcomb* had borrowed it for his own private Uſe, and not for the Company's, and that he muſt get Payment out of *Holcomb*'s private Eſtate, if there was enough found to pay the Debt, otherwiſe he might get his Money from ſome inland Rajahs, who ſtood indebted to *Holcomb*, by his Books of Accounts, in a greater Sum than would pay his Principal and Intereſt; and that he being the Mogul's General, could compel thoſe Rajahs to pay their juſt Debts, which they would make over to him; but the Nabob, not caring to enter into a War with his Countrymen on ſuch a Foundation, ſent Agents to acquaint the Governor and Council of Fort *St. George* with his Affairs at *Vizagapatam*; they proved deaf to all the Agents Propoſitions and Arguments, and hardly treated him civilly; ſo he went back to his Maſter with the Account of his bad Succeſs; upon which the Nabob came to a Garden, about half a League from *Vizagapatam*, accompanied with 500 Horſe, and 3500 Foot, to demand his Money.

I, ſays Captain *Hamilton*, being accidentally there in a ſmall *Dutch*-built Ship that I had bought from the *French* on my Credit at Fort *St. George*; and the Factory being but ill mann'd, Mr. *Haſtings*, who was then Chief, and my Friend, deſired the Aſſiſtance of my Arms and Council in that Juncture of Affairs, which I very freely gave him; and being aſked in Council what I thought about the Affair, I adviſed him and his Council to compound the Matter as well as they could, and ſpin out Time, that we might better fortify the Avenues to the Factory. My Advice of compounding the Matter was rejected, but the other Part was followed; ſo, with ſeven *Europeans* that belonged to the Factory, and twelve that were with me, and twenty Topaſes, and two hundred Natives, moſt of them Fiſhers, that lived under the Company's Protection, we fortified ſome Rocks that the Enemy were obliged to paſs within Piſtol-Shot of, if they had a mind to attack us.

We threw up Breaſt-works between the Rocks, and moored my Ship within Piſtol-Shot of the Shore, and had eight Minion-Guns to ſcour the Sands, if they had attempted to come that Way; and for ſix Weeks we continued on our Guard, and were often alarmed in the Night, but finding us always ready to receive them, they did not think it proper to force an Entry into the Town. I had the Honour to command all the Out-guards, and the Chief with eight *Europeans*, and twenty Blacks, kept the Fort. Thus we continued in perpetual Watching and Alarms, till Reinforcements arrived from Fort *St. George*, and then I left them, and proceeded on a Voyage to *Pegu*. Both Parties being very buſy, one ſtriving to get his Money by Compulſion, and the other to ſave the Company's Money on any Terms, right or wrong. The War being drawn to a greater Length than was imagined at firſt, and Charges riſing higher than was expected, inclined them to make all up amicably, which was at laſt effected by the Company's paying near the Sum that was at firſt demanded.

The Nabob, whoſe Name was *Takerly Cawn*, would hear of no Peace without the Company's Merchant, who was a *Gentow*, called *Agapa*, and a Subject of the Mogul (who was very active in the War, in encouraging the Town's-people to defend themſelves and the Company's Intereſts, and who alſo had wrote to ſome neighbouring Rajahs to embroil the Nabob's Affairs in his Abſence, in order to divert him from purſuing his Demands on *Vizagapatam*) ſhould be delivered up to him, which at laſt he was, and was put to a very cruel Death. He was ſet in the hot ſcorching Sun three Days, with his Hands faſtened to a Stake over his Head, and one of his Legs tied up till his Heel touched his Buttock, and in the Night put into a Dungeon, with ſome venomous Snakes to bear him Company; and this was repeated till the third Night he ended his miſerable Life. But the Company's Merchants, for the future, will be careful how they eſpouſe the Company's Intereſt again. There was one *Baily*, a Recruit from Fort *St. George*, on ſome Diſcontent deſerted the Company's Service, and entered into the Nabob's; but falling into an Ambuſh, was taken Priſoner by our Men, and was ſent to Fort *St. George*, where, for his Deſertion, he was deſervedly whipped out of this World into the next, and there I leave him.

After the War was ended, and all was quiet, the Nabob returned to *Chickacul*, but could neither forget nor forgive his Treatment at Fort *St. George* and *Vizagapatam*; but finding by Force he could not get the Factory into his own Hands, without a great Loſs of Men and Money, he had Recourſe to Stratagem, for ſurpriſing it: He came into the Town one Day with one Hundred Horſe, and ſome Foot, without adviſing of his coming, as was uſual, at the Town-gate, and before the Chief could have Notice, he was got into the Factory, with twenty or thirty of his Attendants. The Alarm being given a reſolute bold young Gentleman, a Factor in the Company's Service, called Mr. *Richard Harden*, came running down Stairs with his Fuzee in his Hand, and Bayonet ſcrued on its Muzzel, and preſenting it to the Nabob's Breaſt, told him in the *Gentow* Language (which he was Maſter of) that if any of his Attendants offered the leaſt Incivility, his Life ſhould anſwer for it. The Nabob was ſurpriſingly aſtoniſhed at the Reſolution and Bravery of the young Gentleman, and ſat down to conſider a little, Mr. *Harden* keeping the Muzzel of his Piece ſtill at his Breaſt, and one of the Nabob's Servants ſtanding all the while behind Mr. *Harden* with a Dagger's Point cloſe to his Back; ſo they had a Conference of half an Hour long in the above-mentioned Poſture, and then the Nabob thought fit to be gone again, full of Wonder and Admiration at ſo daring a Courage.

The next Kingdom to *Golconda*, in which the Places we have been laſt ſpeaking of lie, is that of *Orixa*; and proceeding along its Coaſt, we come to the Mouth of the River of *Ballaſore*, where there is a very dangerous Bar, ſufficiently noted for the many Wrecks and Loſſes made by it. Between *Cunnaca* and *Ballaſore* Rivers there is one continued ſandy Bay, where prodigious Numbers of Sea-Tortoiſes reſort, to lay their Eggs, and a very delicious Fiſh, called the Pamplee, ſome in Shells, and are ſold for Two-pence a hundred; two of them are ſufficient to dine a moderate Man. The Town of *Ballaſore* is but four Miles from the Sea by Land, but by the River twenty. The Country is fruitful to Admiration, producing Rice, Wheat, Gram, Doll, Callavances, ſeveral ſorts of *Pulſe*, *Annis*, Cummin, Coriander, and Carraway-Seeds, Tobacco, Butter, Oil, and Bee's-Wax. Their Manufactures are of Cotton in Sanis, Caſſes, Dimities, Mulmuls, Silk, and Silk and Cotton Romals, Gurrahs, and Lungies; and of *Herba* (a ſort of tough Graſs) they make Ginghams, Pinaſco's, and ſeveral other Goods for Exportation. The *Engliſh*, *French*, and *Dutch*, have their reſpective Factories here; but at preſent are of little Conſideration; though, in former Times, before the Navigation of *Hughly* River was cultivated, they were the head Factories of the Gulph of *Bengal*.

The Town of *Ballaſore* drives a pretty good Trade to the *Maldives*. Thoſe Iſlands have no Rice or other Grain of their own Product; ſo that *Ballaſore* ſupplies them with all Neceſſaries they want; and in Return bring Cowries and Cayer, for the Service of Shipping The Seaſhore of *Ballaſore* being very low, and the Depths of the Water very gradual from the Strand, make the Ships in *Ballaſore* Road keep at a good Diſtance from the Shore; for in four or five Fathoms they ride three Leagues off. From *April* to *October* is the Seaſon for Shipping to come into the Bay of *Bengal*; Pilots lie ready at *Ballaſore* to carry them up the River *Hughly*, which is a ſmall Branch of the famous *Ganges*. The *European* Companies before-mentioned, keep theirs always in Pay; but when none of their own Shipping is there, their Pilots have the Liberty to ſerve other Ships, which is no ſmall Advantage to them. The Sides of the River are over-grown with Buſhes, which give Shelter to many fierce and troubleſome Tygers, which do much Miſchief. A good Author ſays, he knew an *Engliſhman* that was in the Ship's-boat laden with freſh

Water, lying in the River, waiting the Tide to carry her over the Bar, and this Man had the Curioſity to ſtep aſhore, and being a little Way from the Boat, had a Call to eaſe himſelf, and had no ſooner put himſelf in a Poſture, near the Buſhes, but out leaped a Tyger, and caught both his Buttocks in his Mouth, and was for carrying him away; but one of the Seamen in the Boat ſeeing the Tragedy, took up a Muſket, and placed a Bullet in the Tyger's Head, while the Man was in his Mouth helpleſs. The Tyger immediately let him fall, and ſkulked into the Buſhes, and the wounded Man was carried on board his Ship, where the Surgeon made a perfect Cure of the Wounds.

Piply lies on the Banks of a River, ſuppoſed to be a Branch of the *Ganges*, about five Leagues from that of *Ballaſore*; formerly it was a Place of Trade, and was honoured with the *Engliſh* and *Dutch* Factories. The Country produces the ſame Commodities that *Ballaſore* does. At preſent it is reduced to Beggary, by the Factories removing to *Hughly*, and *Calacutta*, the Merchants being all gone. It is now inhabited by Fiſhers, as are alſo *Angelie*, and *Kidgiere*, two neighbouring Iſlands on the Weſt-ſide the Mouth of the *Ganges*. Theſe Iſlands abound alſo in tame Swine, where they are ſold very cheap. There are near theſe Iſlands dangerous Sand-banks, that are both numerous and large, and make the Navigation out and into *Hughly* River both troubleſome and dangerous; and after we paſs theſe Iſlands, in going up the River, the Channel for Shipping is on the Eaſt-ſide, and ſeveral Creeks run from the Channel among a great number of Iſlands, formed by different Channels of the *Ganges*, two of which are more remarkable than the reſt, *viz. Coxes* and *Sagar* Iſlands, where great Ships are obliged to anchor, to take in Part of their Cargoes, becauſe ſeveral Places in the River are too ſhallow for ſuch Ships to paſs over, when their whole Cargoes are aboard.

There are no Inhabitants on thoſe Iſlands, for they are ſo peſtered with Tygers, that there could be no Security for human Creatures to dwell on them; nay, it is even dangerous to land on them, or for Boats to anchor near them; for in the Night they have ſwam to Boats at Anchor, and carried Men out of them; yet among the *Pagans*, the Iſland *Sagar* is accounted holy, and great Numbers of *Jougies* go yearly thither in the Months of *November* and *December*, to worſhip and waſh in Salt-water, who many of them fall Sacrifices to the hungry Tygers. The firſt ſafe Anchoring-place in the River, is off the Mouth of a River above *Sagar*, commonly known by the Name of Rogues River, which had this Appellation from ſome Banditti *Portugueze*, who were Followers of Sultan *Sujah*, when Emir *Jemal*, *Aurenzeb*'s General, drove the unfortunate Prince out of his Province of *Bengal*. For thoſe *Portugueze* having no way to ſubſiſt after their Maſter's Flight to the Kingdom of *Arachan*, betook themſelves to Piracy among the Iſlands, at the Mouth of the *Ganges*, and that River having Communication with all the Channels from *Xatigam* to the Weſtward from this River, they uſed to ſally out and commit Depredations on thoſe that traded on the River *Hughly*.

About five Leagues farther upon the Weſt-ſide of the River of *Hughly*, is another Branch of the *Ganges*, called *Ganga*; it is broader than that of *Hughly*, but much ſhallower, and more incumbered with Sand-banks. A little below the Mouth of it, the *Danes* have a thatched Houſe, but for what Reaſons they kept a Houſe there we are in the dark. Along the River of *Hughly*, there are many ſmall Villages and Farms interſperſed with thoſe large Plains, but the firſt of any Note on the River-ſide is *Culculla*, a Market-town for Corn, coarſe Cloth, Butter and Oil, with other Productions of the Country. Above it is the *Dutch* Banks Hall, a Place where their Ships ride when they cannot get farther up for the too ſwift Currents of the River.

Culculla has a large deep River that runs to the Eaſtward, and ſo has *Juanpardao*, and on the Weſt-ſide there is a River that runs by the Back of *Hughly* Iſland, which leads up to *Radngur*, famous for manufacturing Cotton-cloth, and ſilk Nomaals, or Handkerchiefs; *Buſſundri* and *Freſindi*, or *Gorgat*, and *Cobong*, are all on that River, which produce the greateſt Quantities of the beſt Sugars in *Bengal*. We are now arrived at the greateſt Settlement the Company have on this Coaſt, which is *Fort William*; but having already given a large Account of this Place, and of ſuch others as are of any Note in its Neighbourhood, we will proceed. The Kingdom of *Daca* is the firſt on the Eaſtern-ſide of the *Ganges*, next to that lies the Kingdom of *Aracan*, then the Kingdom of *Ava*, which is next to that of *Pegu*; on all which Coaſts we have ſome, but very little Trade; and as to the Iſlands along the Coaſt, though well enough ſituated for Commerce, yet, as they are uninhabited, they do not deſerve, or require our Notice.

The next Place on the Continent to the Southward, is *Merjee*, a Town belonging to the King of *Siam*, ſituated on the Banks of the River of *Tanacerin*, lying within a great Number of ſmall uninhabited Iſlands. The Harbour is ſafe, and the Country produces Rice, Timber for Building, Tin, Elephants Teeth, and Agale-wood. In former Times, a good Number of *Engliſh* free Merchants were ſettled at *Merjee*, and drove a good Trade, living under a mild indulgent Government; but the old *Eaſt-India* Company envying their Happineſs, by an arbitrary Command, ordered them to leave their Induſtry, and repair to *Fort St. George*, or to ſerve them, and threatened the King of *Siam* with a Sea-war, if he did not deliver thoſe *Engliſh* up, or force them out of his Country, and in *Anno* 1687, ſent one Captain *Weldon*, in a ſmall Ship called *Courtany* to *Merjee* with that Meſſage; he behaved himſelf very inſolently to the Government, and killed ſome *Siameſe* without any juſt Cauſe. One Night, when *Weldon* was aſhore, the *Siameſe* thinking to do themſelves Juſtice on him, got a Company together, deſigning to ſeize or kill the Aggreſſor; but *Weldon* having Notice of their Deſign, made his Eſcape on board his Ship, and the *Siameſe* miſſing him, tho' very narrowly, vented their Rage on all the *Engliſh* they could find; the poor Victims being only guarded by their Innocence, did not ſo much as arm themſelves to withſtand the Fury of the enraged Mob, ſo that ſeventy-ſix were maſſacred, and hardly twenty eſcaped on board of the *Courtany*; ſuch was the tragical Conſequence of one Man's Inſolence.

Before that fatal Time, the *Engliſh* were ſo beloved, and favoured at the Court of *Siam*, that they had Places of Truſt conferred upon them, both in civil and military Branches of the Government. Mr. *Samuel White* was made *Shawbandaar*, or Cuſtom-maſter at *Merjee* and *Tanacerin*, and Captain *Williams* was Admiral of the King's Navy; but the troubleſome Company, and a great Revolution that happened in the State of *Siam*, made ſome repair to *Fort St. George*, others to *Bengal*, and others to *Achen*.

Since that Time, Things are quite altered, and the Affairs of the Company being thoroughly ſettled, all Things are carried on with the utmoſt Regularity, ſo that though it has not been found neceſſary to eſtabliſh new Factories, or to ſettle Colonies along the Coaſts, which would infallibly have alarmed other Nations, without contributing much to the Service of our own; yet the Commerce of the whole Gulph, from the Mouth of the *Ganges*, to the very Extremity of the Peninſula of *Malaca*, is properly provided for, by which Means the Company reaps the Profit, or at leaſt a reaſonable Part of the Profit of the private Trade thither, without being put to any unneceſſary Expence. As to our Factories on the Iſland of *Sumatra*, they are now ſo numerous, that it is conceived we enjoy the beſt Part of the Traffick which that rich Iſland affords. Our Factories therein are *Mocho*, *Bantal*, *Cattoun*, *Bencoolen*, *Marlbrough Fort*, of which we have ſpoken largely before, and *Sillebar*, of which we have alſo taken Notice.

It is true, that the *Dutch*, being Maſters of the neighbouring Iſland of *Java*, have found Means from thence to fix themſelves upon Part of this Iſland, and it is ſaid, they are poſſeſs'd of a gold Mine, which they work, but to no great Advantage, at leaſt to the Company. On this Occaſion, I cannot help taking Notice, that the Conduct of our *Eaſt-India* Company is to the full as commendable in their not endeavouring to follow this Example, ſince I am ſatisfied, that Commerce is a much more valuable Thing than Mines of Gold, eſpecially in the Hands of a Company. Becauſe this may ſeem a Paradox, I think I ſhall not miſpend either my own or the Reader's Time, by endeavouring to explain it. There is certainly no Country in the *Indies* which abounds ſo plentifully in Gold as this Iſland of *Sumatra*, if we except *China* and *Japan*, and that Method muſt certainly be the beſt, by which moſt of this precious Metal can be obtained. But the eſtabliſhing by Force any Settlements in that Country, is not like to prove the moſt effectual Means, for many Reaſons, for, in the firſt Place, the Natives will not work the Mines for themſelves, and conſidering it as an intolerable Slavery to work them for others, have an unconquerable Averſion for ſuch as would put them on ſuch Labours; ſo that from the Time this Method is tried, there is an End of all free Correſpondence with the People of this Country.

In the next Place, the Mines are far from yielding in any Proportion to what is expected from them, the Reaſon of which is not hard to diſcern; for all the Nations on that extenſive Iſland, being employed in picking out of the Sands and Channels of the Rocks, ſuch Gold as is forced into them by the Torrents, that paſs through the Mines, the Quantity of Metal obtained by the Induſtry of ſuch Multitudes, all working for their own Benefit, muſt exceed, in a tranſcendant Degree, what is dug out of a ſingle Mine, under the Diſcouragements before mentioned. Several Colonies therefore, in different Parts of this Iſland, the gentle Uſage of the Inhabitants, and the bringing them to conſume and eſteem *European* Commodities, is the true, ſafe and certain Means of acquiring peaceably, and by their own Conſent, the Gold that is thus gathered; and theſe three ſeveral Advantages ariſe from the proceeding in this Way.

Firſt, the vaſt Hazard of maintaining an abſolute Power over a numerous Na ion with a Handful of Men, is avoided. Secondly, an Intercourſe is eſtabliſhed, by which not only a vaſt Quantity of Gold is returned to *Europe*; but, which is a thing of no leſs Conſequence, it is returned not by the Labour of *Indian* Slaves, but for Goods and Manufactures belonging to, or wrought amongſt ourſelves. Thirdly, by this Means a great Quantity of Shipping is employed; whereas the Poſſeſſion of Gold or Silver-Mines requires only a few Ships, and as it is acquired by Tyranny abroad, ſo ſuch a Return of this Wealth can only ſerve to promote Idleneſs and Luxury at home. From all which Conſiderations, I conceive the Point I firſt laid down to be fully eſtabliſhed, *viz.* that the Policy of our *East-India* Company, eſpecially if conſidered in a national Light, is much preferable to that of the *Dutch*; and I make no queſtion, that the Experience of future Times will abundantly juſtify this Obſervation. We had formerly Settlements on the Coaſts of *Cochin-China*, and in the Kingdom of *Tonquin*, which have been ſince withdrawn; but we have ſtill an occaſional Trade there, and eſpecially in the laſt-mentioned Kingdom.

As to our Trade to the Eaſtward to *China* and the *Manillas*, I have not much to ſay of it here. The former is ſo well known in every Reſpect, that there is no Need of dwelling upon it; and, as for the latter, there is ſo little can be ſaid with Certainty, that I can ſcarce perſuade myſelf to meddle with it at all: However, for the ſake of Method, and that I may not ſeem to conclude this Matter abruptly, I ſhall juſt touch upon both. As to the *China* Trade, it has been found by Experience, that we manage it as well, or better, at *Canton* than we did formerly at *Amoyer*, when we had a Factory in the Iſland of *Chuſan*. To ſay the Truth, the Affairs of our Company were in ſo good a Condition thirty Years ago, that we bid fair for monopolizing this Trade; but the high Duties laid upon Teas and other *Chineſe* Commodities, defeated our Induſtry abroad, and gave Encouragement to the pernicious Practice of Smuggling, which, in a very ſhort time, put our Trade in *China* almoſt on a Level with that of other Nations; but, perhaps, by a right Management, and a due Regard ſhewn by the Government for the Intereſt of the Company, Things may be ſet right again.

As to the *Manilla* Trade, the *French* ſay, that we carry on a conſiderable Part of it under *Iriſh* Colours; but I muſt confeſs, I believe there is no good Authority for this, though it is very highly probable that ſomething of this ſort may be done under *Mooriſh*, or rather under *Portugueze* Colours; for the *Spaniards*, contrary to their Cuſtom in all their other Colonies, have laid open this Trade to all Nations, the *Engliſh* and *Dutch* only excepted, which Exception by the Government is of no great Conſequence, where it is the Intereſt of their Subjects, as well as ours, to break through it. But, with reſpect to *Japon*, which lies ſtill farther to the Eaſt, we have, as I have already ſhewn at large, loſt all Correſpondence therewith, and whatever Commodities of that Country are brought into ours, we derive from our Trade with the *Chineſe* and *Dutch*.

Thus, according to the cleareſt Lights that I have been able to obtain, I have performed my promiſe, and given the beſt Account that was in my Power, not only of the Riſe and Progreſs, but alſo the preſent State of our Commerce to the *Indies*, which, I hope, appears to the Reader to be in a much more flouriſhing State than ever; and that it may ſtill continue, or rather that it may yet improve beyond what it has hitherto done, it is abſolutely neceſſary that three Points ſhould be univerſally well underſtood; the firſt is, that this Trade is highly beneficial to the Nation; the ſecond, that as Things now ſtand, it cannot be effectually carried on otherwiſe than by ſupporting the preſent Company; and laſtly, that the Objections heretofore made, and which are ſtill circulated among the common People are falſe and groundleſs; ſo that if we ſhould grow careleſs enough to loſe this Trade, it will go near to carry all other Trade with it. We will ſuccinctly demonſtrate each of theſe Points, and ſo conclude this Section.

Firſt, then, I am to ſhew that it is a Thing advantageous to this Nation, that the *Eaſt-India* Trade ſhould be carried on. If we conſider this generally, there is nothing eaſier, nothing more certainly to be made out than this; for have we not ſeen that the *Hebrews*, *Tyrians*, *Egyptians*, *Greeks*, and *Romans* in ancient Times; and that the *Venetians*, *Genoeſe*, *Portugueze* and *Dutch*, among the Moderns, have all raiſed themſelves to immenſe Wealth, and to a ſurpriſing Degree of naval Power, by being poſſeſſed of this Trade? What Need then of arguing to perſuade the People of this Country, that what has enriched all others, muſt be beneficial for them, that what has beſtowed the Dominion of the Sea in Times paſt and preſent, is neceſſary to them, and that if in a Matter of this Nature, we are guided by Experience, it is ſcarce poſſible that we ſhould be miſtaken. But, to deſcend to Particulars, the *Eaſt-India* Trade, I ſpeak in reference to this Kingdom, has all the Marks and Characters of Advantage that any Trade can have.

In the firſt Place, its Navigation is very conſiderable; it maintains a vaſt Number of Seamen, more indeed than can be eaſily computed: But to place this Point in a proper Light, we muſt, firſt of all, conſider the Number of Ships that are annually taken up by the *Eaſt-India* Company; we muſt next call to mind the Number of Seamen continually employed in the *Indies*, in trading from Port to Port; and laſtly, we muſt reflect on the Shipping employed in exporting *Eaſt-India* Goods to all the different Parts of *Europe*, and then we ſhall have a competent Notion of the Value of this Trade in this reſpect, provided alſo that we bear in mind the great Improvement that ſuch long Voyages naturally make in thoſe who are employed in them, and the great Conſequences of this to a Country, the Power and Welfare of which depend upon a maritime Force.

In the next Place, there is nothing more certain, than that we derive a great Part of our Wealth from this Commerce, which brings in large Quantities of Gold and other intrinſick Riches immediately from the *Indies* in its ordinary Courſe. It is no leſs evident, that private Men make vaſt Fortunes in the *Indies*, which, ſooner, or later, they bring home: And all theſe Eſtates are conſequently Acceſſions to the Wealth of this Kingdom. We muſt add to this the Ballance that accrues to the Nation from the exporting of *Indian* Commodities and Manufactures, which is in itſelf ſo vaſt a thing, that it would require Volumes to explain it thoroughly. But this is not my preſent Buſineſs; all I aim at is, to give a general Notion of the Advantages derived to us from this Commerce; and, in order thereto, it is ſufficient that I put the Reader in mind, that there is ſcarce a Branch of Trade which we at preſent enjoy, but is ſome way or other affected by our Importations from *India*, and which, conſequently, muſt ſo far depend upon them, ſince, if we had not theſe Goods, we could not carry them on.

Another great Advantage this Commerce beſtows, is the Exportation of our Manufactures, to which the *Eaſt-India* Company are bound, by their Charters, with which they not only comply, but have greatly exceeded what was expected from them; and, of late Years eſpecially, have conſtantly increaſed their Exportations, ſo that a great Part of thoſe valuable Effects which they bring home are, ſtrictly and properly ſpeaking, the Produce of the Labour and Induſtry of our own People. But, beſides this, they bring home ſeveral raw and unmanufactured Goods, ſuch as Silk, and Cotton, which are wrought up here, and vaſt Quantities of them exported to our Plantations, by which we obtain a great Part of that prodigious Ballance in our Favour which ariſes from that Trade.

There is yet another Point which I muſt inſiſt upon, which is the furniſhing us for our own Wear, with large Quantities of cheap and beautiful Stuffs, that might enable us, if our Poor were properly regulated, and due Care taken to excite an univerſal Spirit of Induſtry, to make and ſend abroad vaſt Quantities of woollen Goods: For though it be true, that our own Conſumption of thoſe Goods is of great Conſequence to ſuch as are employed in the making of them, yet with reſpect to the Nation, it is of no Conſequence at all; for what we gain one by another, is no Acceſſion of Wealth to the Publick, for that muſt ariſe from what we draw from other Nations, either by paying for the Goods and Manufactures which we receive from them by what we export to them, or bringing over the Ballance in Money; or, which is ſtill better, in ſuch as we can again export, and ſo add the Freight and Profit upon thoſe Goods to the Ballance by which they accrue. If theſe are not clear and convincing Proofs of the Benefit reſulting to us from this Trade, it is ſimply impoſſible that we ſhould have any ſuch; and if our Opinions are not to be guided by theſe, it is not eaſy to ſay upon what they muſt be grounded.

But perhaps it may be expected that I ſhould form ſome Computation of the Profits ariſing from the *Eaſt-India* Trade, which, I muſt confeſs, will be a very difficult thing, and would require much more Room than I have to ſpare; to which I may add, that this has been already done by Dr. *Davenant* and others, in a Way that will convince any Man who has Leiſure, Attention, and Capacity, of the Truth of what they have delivered. However, that I may not ſeem altogether deficient in what many of my Readers may conceive the moſt material Point in this Enquiry, I will venture to lay down a Fact, the Proof of which I am ready to undertake whenever I am properly called upon ſo to do, which, I hope, will ſatisfy them, and it is this; that the Nation gains *Cent. per Cent.* by all that the *Eaſt-India* Company exports: And, indeed, it is my private Opinion, that for every five Pounds which the *Eaſt-India* Company employs in that Trade, the Nation gains ſix Pounds; but how far this may be leſſened by the ſetting up ſo many different *Eaſt-India* Companies in all Parts of *Europe*, is a Conſideration of another Nature, and with which therefore I ſhall not meddle here.

The ſecond Thing I promiſed was to ſhew the Expediency of ſupporting the *Eaſt-India* Company, and of leaving that Trade in the Channel it is now in. In the firſt place, I muſt premiſe, that I am abſolutely diſintereſted in this Matter, and ſo far from having any Direction or Inſtructions from, that I have not the leaſt Connection with the Company, or any of its Directors; and am likewiſe ſo far from being a Friend to excluſive Companies in general, that I think this the only one that is, or can be beneficial to this Kingdom, for which I ſhall very freely aſſign my Reaſons. The firſt is, that the Trade to the *Eaſt-Indies* is of ſuch a Nature that it is of the utmoſt Conſequence to the Nation to have, from time to time, diſtinct Accounts of its State and Condition, which could not be ſo well, or at leaſt, not ſo eaſily received, if it was not managed by a Company: As, on the other hand, the neceſſary Inſtructions and Regulations, could not, with ſuch Facility, be any other Way conveyed. What ſeems to ſtrengthen and inforce this Opinion, is the Conduct of all other Nations, who whenever they have adventured to interfere in this Trade, have conſtantly put it under the Management of a Company; and to ſay the Truth, whoever ſhall conſider how Things are to be diſtributed in the *Indies*, and what a Connection there is between the Commerce of the ſeveral Countries included within the Extent of the *Eaſt-India* Company's Charter, will very eaſily diſcern, that if the whole were not under the Management and Direction of a Body of Men converſant therein; and not only capable of giving Directions, but properly empowered to ſee thoſe Directions carried into Execution; it would be impoſſible, that this Commerce ſhould thrive, or even, that it ſhould ſubſiſt.

One may in like manner conceive, that if the Poſſeſſion of the Colonies and Forts in the *Indies* were in the Crown, and the Management of the Trade only in the Hands of the Company, it could not but be attended with numberleſs Inconveniencies, as indeed Experience ſhewed, in the Reign of King *Charles* II. when *Bombay* came to the Crown, by his Marriage with the Infanta of *Portugal*, and therefore both that Iſland, and the Iſland of *St. Helena*, have been granted to the *Eaſt-India* Company, for the Sake of publick Conveniency. We may likewiſe diſcover from the Diſorders of the *Eaſt India* Company's Affairs in that Reign, and in the Reign of King *James*, that it is very detrimental to this Commerce, and to the Benefits reſulting from thence to the Nation, that the Company ſhould be immediately under the Power of the Crown, ſo as to ſtand indebted for all Encouragement, and to have no other Reſource in caſe of Grievances, than what they can draw from Royal Power; for this on the one hand renders Trade precarious, and on the other, intereſts a great Body of People in the Support of the Prerogative, which might be of dangerous Conſequence.

The Miſchiefs flowing from two *Eaſt-India* Companies ſubſiſting at one time, we have known from Experience; and ſo great they were, that both Companies became very ſoon ſenſible, that nothing but the Union of their Intereſts could poſſibly afford a proper Remedy. Yet I think one may ſafely conclude, that the laying this Trade open, which is what has been often contended for, would be a Scheme big with ſtill greater Inconveniencies, becauſe it would be at the Bottom a Multiplication of Companies, all acting upon ſeparate Intereſts, which conſequently would be perpetually claſhing and interfering with each other. But as Things ſtand at preſent, and as all other Countries carry on this Trade in this Way, there remains no other for us, and we muſt either ſupport the *Eaſt-India* Company, or reſolve to give up our Commerce to the *Indies*, there being no middle Courſe for us to ſteer; and it was, without doubt, from a juſt Senſe of this, that in the two laſt Reigns, ſo much has been done by Parliamen, in favour of this Company, and ſo many new Powers granted them.

I am very ſenſible, that even theſe Powers, and indeed, all the Powers with which the Company are intruſted, may be liable to many, and ſome of them juſt Objections; but if the Powers of the Board of Trade were enlarged, and its Juriſdiction properly inforced, all thoſe Inconveniencies upon which theſe Objections are grounded, might be eaſily taken away; and beſides, we very well know, that the Courts of Chancery and Exchequer can, and do interpoſe, as well in favour of Foreigners, as Natives, whenever the Power of the *Eaſt-India* Company, or any of its Officers, is ſo exerciſed, as to commit Acts of manifeſt Injuſtice.

But at the ſame time, that from all theſe concurring, and, as I conceive, unanſwerable Reaſons, I am perſuaded, that this Trade is beſt carried on by an incorporated Body; I am very far from contending, that they ſhould act without Controul, or that they ſhould not be in all reſpects ſubject to whatever Regulations the Legiſlature ſhall from time to time think fit to enact, for rendering the Commerce they carry on more and more beneficial to this Nation It is from a due Senſe of this, that I could heartily wiſh, Propoſals might be made to the Board of Trade, for opening a direct and immediate Correſpondence, either by the *Cape of Good-hope*, or by the *Straits of Magellan*, with the Southern continent; and in caſe any Project of that ſort ſhould be laid before them, that was thought practicable, I ſhould eſteem it highly reaſonable, that upon their Recommendation, the *Eaſt-India* Company ſhould be obliged to make ſuch an Attempt, or if they refuſed, that any private Perſons might be allowed to undertake it, and have proper Aſſurances and Encouragements given them by the Publick. For it is, and will be ever my Sentiment, that this, and all other Companies, are but ſo many Corporations endowed with Powers in Truſt for the Publick, for which they are, and muſt be accountable to the Publick, and alſo be ſubject to ſuch Alterations, Extenſions, and Reſtrictions, as may render them moſt ſerviceable to the Publick.

I the rather inſiſt upon theſe Points at this Time, becauſe without ſome Acceſſion of new Trade, which we may poſſeſs as a Nation excluſive of all others, I do not ſee how it is poſſible, we ſhould maintain our maritime Power at its preſent Height. As on the other hand, I can ſee no Reaſon whatever, why, if any thing can be done for the Service of the Nation, in this reſpect, by opening a Trade to the ſouthern *Indies*, by recovering the Trade of *Japon*, by diſcovering any Countries to the North of that Empire, or by any other Method whatever, it ſhould be left undone out of Reſpect to the Powers or Privileges poſſeſſed by any Corporation.

I come now to the laſt Point that I have undertaken to clear, and that is the popular Objections which have been raiſed againſt the Commerce to the *Indies*, of which there are many, and ſome of them ſo plauſible, that Men of great Parts, and good Intentions, have been led away by them. The firſt of theſe is grounded upon the Exportation of Bullion, and which, if I conceive it right, is thus ſtated. The common Meaſure of all Things in a commercial Way, is Silver, and conſequently the great Mark of a Nation's Wealth, is her drawing this common Meaſure from other Nations; but the *Eaſt-India* Trade is carried on by exporting this real and intrinſick Wealth, which never returns, but is employed to bring back Things that are not neceſſary, but meer Inſtruments of Luxury.

Before I proceed to the direct Solution of this Difficulty, I muſt obſerve, that if we give this Objection its full Weight, it will deſtroy all Commerce. The Neceſſaries of Life, are in every Country, or at leaſt in every habitable Country, and it is to what ſome People call Luxury, that all Trade whatever is owing; ſo that if we admit this Principle, we ſhould not only drink Sage inſtead of Green-tea, but make uſe of Honey inſtead of Sugar. In ſhort, we ſhould endeavour to cultivate and improve the Produce of our own Country, live upon it, and leave all the reſt of the World to ſhift for itſelf. How juſt a Maxim this would be, for People who inhabit an Iſland, and how reaſonable it is, for Folks who derive moſt of the Bleſſings they enjoy from Trade, and maritime Power, to talk thus, I leave the Reader to judge. But if once we ſet this Objection ſo far aſide as to allow that Trade is a commendable Thing for the very Reaſon the Objection aſſigns, *viz.* that it makes the Country in which it flouriſhes, Rich; the Trade to the *Eaſt Indies* becomes as defenſible as any other: For, if exporting of Bullion does not impoveriſh the Nation, then there is no Force at all in the Objection; and that it does not in this Caſe, I am very well able to prove. When the firſt Charter was granted to the *Eaſt India* Company, this Evil was foreſeen, and properly guarded againſt by a Proviſo, that the Company ſhould be obliged to bring in as large a Quantity of Bullion as they carried out, in the Interval between the Voyages made, at the Riſque of the Company. In reality therefore, there never was any Foundation for this Complaint, that the Quantity of Silver in this Kingdom was diminiſhed by the *Eaſt India* Trade. But by degrees, and as this Commerce has increaſed, inſtead of impoveriſhing, it has greatly encreaſed the Wealth of this Nation, by bringing in on one hand large Quantities of Silver for the *Indian* Merchandize exported, and detaining here on the other as great Sums of Money, that muſt otherwiſe have been exported for foreign Manufactures, which would have been worn here, if we had not been better and cheaper ſupplied from *India*.

Another Objection is, or at leaſt was, that the wearing of *India* Piece goods hurt our own woollen and ſilk Manufactures; but this in a great meaſure has been cured by the Laws paſſed for that Purpoſe. It may not be amiſs, however, to obſerve, that thoſe Manufactures are chiefly to be encouraged, which contribute to Exportation, ſince it is certain, that the cheaper People can be cloathed here, let that cloathing come from where it will, the cheaper they can afford to work; and it is the Cheapneſs of Labour, that is the great Point to be ſtudied in a Nation; for if we can under-work other Nations, we ſhall infallibly undermine their Trade, and extend our own; for, as I obſerved before, private People may be enriched by home Conſumption, yet the Publick gets nothing thereby, and this Conſideration is ſufficient to enable the intelligent Reader, to diſcern how a Clamour may be raiſed in favour of Trades, no way advantageous to the Publick, and againſt ſuch Trades as are highly beneficial to the People, and this from confounding the Intereſt of private Men, or of great Bodies of Men, with the Intereſt of the Publick, which it requires great Skill, Induſtry, and Diſintereſtedneſs to diſentangle, and ſet in its proper Light. There is beſides, a great Diſadvantage in arguing on Topicks of this Nature, becauſe, while a Man is really pleading for the Publick, he is maliciouſly miſrepreſented as an Advocate for the private Intereſt of that Body of Men whoſe Cauſe he eſpouſes, tho' in Truth he does not eſpouſe their Cauſe out of regard to their private or particular Intereſt, but merely from a Conviction of Mind, that their Cauſe is in this reſpect the Cauſe of the Publick.

A third Objection is, that even the Exportation of *Indian* Goods is diſadvantageous to the Nation, becauſe it leſſens, or at leaſt is ſuppoſed to leſſen the Conſumption of our own Manufactures, in thoſe Countries to which the Produce of *India* is exported: A very ſtrong Objection this, in all Appearance, and yet at the Bottom a meer Fallacy, and not at all grounded on Truth. For this Objection ſuppoſes what is manifeſtly falſe, *viz.* that it depends upon our Exportation, whether the Inhabitants of thoſe Countries to which we ſend them, ſhall wear the Manufactures of the *Indies*, or not; but as it is notorious, that if we did not ſupply them, they would receive them from the *Dutch*, or *French*, which would have the ſame Effect as to the Excluſion of our Manufactures; the true State of the Queſtion comes at length to this, whether we ſhall take their Money, or their Goods for *Indian* Commodities, or whether we ſhall ſubmit to let them lay out that, or part with thoſe for *Indian* Commodities, which we might ſupply, to other People?

The Truth of all this, as it will appear to every candid and ingenious Reader, from the Reaſons and Arguments already advanced, ſo, at this Juncture, it muſt be evident to every Man who has but common Senſe, from the Light of Experience; for do we not ſee, that the *Ruſſians*, *Swedes*, *Danes*, and other Nations, are bent upon eſtabliſhing a direct Correſpondence with *India*, in order to obtain greater Quantities of the Goods of that Country; and does not this manifeſtly prove, that the Appetites of theſe People for thoſe Things were ſo ſtrong, that it was no way in our Power to check, or correct them?

The Truth of the Matter is, that the ſole Objection againſt this Commerce, that has any Force, lies in this ſimple Propoſition, *that it is againſt the Intereſt of the weſtern Part of the World, to correſpond with the Eaſt.* The Reaſons which are brought to prove this, are indeed very plauſible. It is ſaid, that the Ballance of Trade is againſt us, that we import the Commodities and Manufactures of the *Indies*, and export Silver to pay for them. That this drains *Europe* to ſuch a Degree, as that ſince the Diſcovery of the Paſſage by the *Cape of Good-hope*, it is demonſtrable, that the *Indians* have gained from the *Europeans* upwards of two hundred Millions in Silver, which immenſe Wealth they poſſeſs, while all that we received for it, is long ago loſt and conſumed. It is confeſſed, even by the warmeſt Writers in favour of the *Indian* Trade (tho' I freely own I am of a different Opinion) that this ſufficiently proves, that it would be for the

Benefit of the weſtern Part of the World, if they had no Commerce at all with the Eaſt; and that it would be an Advantage to *Europe* in general, if the Commerce to the *Indies* were totally aboliſhed.

Admitting this to be true, what is it to us? We are not yet the Legiſlators of *Europe*; we cannot bid the *Dutch* diſſolve their Company, and recall their Subjects from the *Indies*; we cannot forbid the *French* to trade thither; and if our Miniſters at *Stockholm*, and *Copenhagen*, ſhould perſuade thoſe Courts not to ſend any more Ships to *China*, it is not at all probable, that they would take our Advice. We muſt be content then, to take the World as it lies before us, and ſince the Humour of trading to *India* cannot be extinguiſhed, we, as a trading Nation, muſt endeavour ſo to manage that Humour, and our Commerce. as that both may turn to our Advantage.

We muſt contrive to maintain and ſupport the Acquiſitions made by our Company in that Part of the World; we muſt engage them to take off as great a Quantity of our Manufactures as is poſſible; we muſt encourage to the utmoſt the Exportation of ſuch Goods and Manufactures as the Company brings home; and, which is of the greateſt Conſequence to this Nation, we muſt, at all Events, and by whatever Means it can be done, prevent the ſmuggling of *Indian* Commodities into theſe Kingdoms; for ſuch as promote that Practice, are the moſt notorious Enemies of their Country, and cannot get a ſingle Shilling, without robbing the Nation of five.

Thus I have entirely finiſhed what I propoſed, with reſpect to our Commerce with this Part of the World. I have ſhewn, that it is the great Wheel which moves all the reſt; that we have no reaſon to be diſſatisfied at ſeeing it managed by an excluſive Company; that by degrees, and by a Variety of Accidents, this Company is now placed on the beſt Baſis that can be for the Nation; that there is no doubt, their Trade is extremely beneficial; that the Objections againſt it are very far from being well founded, and that at this Juncture, it imports us more than ever to be well informed, and clearly convinced as to theſe Things, becauſe there never was a Conjuncture when the thorough underſtanding of them was of ſo great Conſequence to the Publick. If in the managing ſo extenſive, ſo intricate, and in ſome Caſes, ſo invidious a Subject, I ſhall be thought to have performed well, it is the Height of my Ambition; but if I have failed therein, it will be ſtill my Comfort, that it was my Endeavour. I might with much greater Eaſe to myſelf have contracted this Section into a narrower Compaſs, but I have ſincerely ſtudied the Benefit of the Reader, and how to render the Time he beſtows in the Peruſal of this Work beneficial to himſelf, by inſpiring him with ſuch Sentiments as may render him uſeful to his Country.

SECTION XXXIV.

A ſuccinct Hiſtory of the Riſe, Progreſs, and Eſtabliſhment of the Dutch East-India *Company; with a View of the immenſe Profits ariſing from that Commerce, and a Proſpect of their Affairs, and the Manner in which they are conducted, as well at Home, as in their extenſive Settlements Abroad.*

Collected chiefly from their own Writers.

1. *An introductory Account of the Situation of Affairs in* Holland, *at the Time their Commerce to the* Eaſt-Indies *was firſt undertaken.* 2. Houtman's *Impriſonment in* Portugal, *proves the Means of their learning the true Rout to the* Eaſt-Indies. 3. *The firſt Voyages made under the Direction of* Houtman, *at the Cloſe of the ſixteenth Century.* 4. *A new Company of Merchants engage in this Trade with great Succeſs.* 5. *The* States-General *and Prince* Maurice *interpoſe in order to put this Company on a proper Eſtabliſhment.* 6. *The* Dutch Eaſt-India *Company formed, and* Letters Patent *dated* March *the 20th* 1602, *for twenty-one Years.* 7. *A great Struggle between the* Dutch *and* Spaniards *about the* Moluccas, *in which the former at laſt prevailed.* 8. *An Account of the ſurprizing Succeſs of the* Dutch *Company, and of the prodigious Dividends made by them to their Proprietors in a few Years.* 9. *The Riſe of the Company's great Power in the* Indies, *and the Cauſes thereof truly aſſigned.* 10. *Their Charter renewed and enlarged, with the Conſequences ariſing from thence.* 11. *The Progreſs of their Trade in the* Indies, *and other remarkable Occurrences.* 12. *The Hiſtory of this Company continued till the Expiration of their ſecond Charter.* 13. *An Account of their Affairs to the Year* 1660. 14. *The Continuation of this Hiſtory to the Cloſe of the laſt Century.* 15. *A conciſe Deduction of this Hiſtory to the preſent Times.* 16. *A ſhort Account of their preſent Settlements in the* Indies. 17. *A curious and particular Relation of the Manner in which they manage their Affairs.* 18. *Of their Councils and Government in the* Indies. 19. *The Oeconomy of their Fleets, Squadrons, and ſingle Ships, with other Particulars relating to their naval Concerns.* 20. *A View of their Management of Orphans Effects, and of the Care taken by them of their Poor.* 21. *Of the Management of the Company's Affairs in* Holland, *with a Table of their* Dividends, *from* 1610 *to* 1717.

1. THERE could not certainly be any nobler Subject choſen by an Author inclined at once to entertain and inſtruct his Readers, than an Enquiry how far the Spirit of Liberty and Trade may be able to advance a People, notwithſtanding any Difficulties they may labour under from the Situation of their Country, the Poverty of its Soil, and the Oppoſition of their Neighbours. Such a Plan as this, might enable a Man of ſolid Underſtanding, quick Wit, and competent Learning, to frame a political Syſtem as uſeful, and at the ſame time, no leſs pleaſant and agreeable, than the famous Poems of *Homer*, which have hitherto been eſteemed inimitable, and which are allowed to contain the Principles of almoſt all Sciences, though delivered under the ſpecious Veils of Fictions. But if the Compoſition of ſuch a Work be a Taſk ſo hard as ſcarce to be expected, an Author of a cooler Genius than is requiſite for ſuch a Performance, might perform ſomething very laudable in this kind, by writing a copious Hiſtory of the Eſtabliſhment of the *Dutch* Republick, which would ſufficiently ſhew, that the Deſire of preſerving religious and civil Liberty, maintaining the natural Rights of Mankind with reſpect to Trade, and tranſmitting the Bleſſings of an equal and mild Adminiſtration to Poſterity, are Principles capable of raiſing ſuch an heroick Spirit in any People, as will enable them to overcome all Difficulties of what kind ſoever, and that to ſuch a Degree, as to give them a Capacity of changing, ſo as at leaſt in Appearance, the very Laws of Nature,

to render the meaneſt Country a Paradiſe, and the moſt diſtreſſed and dejected of the human Race, the braveſt Soldiers, and the moſt enterprizing Seamen.

Such a Hiſtory would particularly ſhew, that Providence can conduct, by the moſt unlikely Means, the nobleſt Deſigns to the higheſt Degree of Perfection, and lay the Ground-work of the moſt exalted Power and Liberty in the midſt of Tyranny and Oppreſſion. For moſt evident it is, that if the *Spaniards* had not purſued the moſt barbarous Plan of Politicks in reference to their Subjects in the *Low-Countries*, the Republick of the *United Provinces* had never exiſted, nor had the People of *Holland* ever arrived at any Part of that Wealth, Dignity and ſurprizing Power, as for the two laſt Centuries they have enjoyed. It is the peculiar Glory of the Almighty, to produce Order out of Confuſion, Good out of Evil, Strength and Happineſs out of Weakneſs and Miſery, and of this, no Period of Hiſtory affords us a more illuſtrious Inſtance, than that which is to be the Subject of the preſent Section. It was the Bigotry of the *Spaniards*, and their illegal Introduction of the bloody Inquiſition into the *Netherlands*, that introduced that Firmneſs to their relious Principles, and that zealous Concern for the Liberty of Conſcience, which has proved the Source of the Grandeur of the *Dutch*. It was the barbarous, as well as arbitrary Government of the Duke of *Alva*, Cardinal *Granville*, and ſuch Miniſters of Oppreſſion, that eſtabliſhed thoſe Notions of civil Liberty, that enabled the diſtreſſed Inhabitants of the *Low-Countries* to eſtabliſh a Form of Government capable of procuring and maintaining their Freedom; and it was the Meaſures taken to curb, to diſtreſs, and to ruin the little Trade they then had, which forced theſe People upon thoſe Methods that in a very ſmall Space of Time rendered them the moſt conſiderable trading Republick the World ever ſaw.

It muſt be allowed, that of all the Monarchs that were ever ſeized with a Paſſion for univerſal Empire, there never was one who ſeemed to have it more in his Power to gratify Ambition in its largeſt Extent, than *Philip* the Second of *Spain*, who was not led thereto by the Encitements of Miniſters more capable than himſelf, but formed his own Schemes, and conducted them with ſuch Wiſdom and Policy, that if the End he aimed at had been attainable by human Abilities, one could ſcarce conceive how he came to be fruſtrated in his Deſign. He had gained the Court of *Rome* entirely to his Intereſt, and was thereby able to bend the predominant Religion in *Europe* to his Purpoſes. He had the whole Force of the *Spaniſh* Monarchy, and of the Houſe of *Auſtria* in *Germany* at his Command; the greateſt maritime Power in the World was at his Diſpoſal, a great Part of *Italy* was in his Poſſeſſion; he had a ſtrong Party in *England*, and a ſtronger in *France*, and all the Riches in the *Indies* flowed into his Coffers; but what was ſtill of greater Conſequence, he had the moſt able Miniſters, and the moſt experienced Generals, and the beſt diſciplined Troops in the World at his Devotion; all which Advantages were doubled by his Skill in making uſe of them; for he had a Soul above the Reach of Fortune, and a Capacity more extenſive than his Dominions; ſo that had he undertaken what was in the Power of Man to atchieve, he had eaſily and happily performed it; but as his Project was without Bounds, ſo the Methods he uſed, tho' wiſely contrived, and generally ſpeaking, well carried into Execution, proved not only fruitleſs, but ſo diſſipated the Wealth and Strength of his Empire, that as he died himſelf of Diſcontent, ſo he left the *Spaniſh* Monarchy under an incurable Conſumption.

But amongſt all the vaſt Deſigns which this Monarch formed, that which was beſt digeſted, was attended with the worſe Effects. He knew, that a Monopoly of Trade, was the firſt Step to univerſal Empire, and therefore formed a Plan for fixing the whole Trade of the World to his Dominions. It was with this View, that he ſet on Foot two Schemes which proved abortive indeed, but which will eternally prove the Strength of that Genius which deviſed them. The firſt was the ſeizing and ſecuring the Sound, or narrow Paſſage into the *Baltick*, by which he hoped to become Maſter of all the Trade of the North: The other was building a City of his own Name in the Straits of *Magellan*, and eſtabliſhing ſuch a Colony there, as might put it out of the Power of other Nations to trouble the Commerce of the *South-Seas*, or find a Paſſage that Way to the *Eaſt-Indies*. But failing in theſe Deſigns, he turned his Thoughts another Way, and finding that his revolted Subjects in the *Netherlands*, began to make a great Figure in Trade, eſpecially after the Ruin of the City of *Antwerp*, he reſolved to cut them ſhort in that, as much as lay in his Power, and being become Maſter of *Portugal*, he abſolutely forbid them all Commerce, not only with the *Indies*, but in the Commodities of the *Indies*, which they had hitherto purchaſed at *Liſbon*, and with great Profit to themſelves, had diſtributed to the northern Parts of *Europe*. It was by this Prohibition, expreſly calculated for the Ruin of their Trade, that the Inhabitants of the *Low-Countries* were compelled to thoſe Undertakings which have ſince made them Lords of *India*. If the *Spaniards* had never forbid them, they had never thought of going thither; if they had remained the ſole Carriers of Spices, or even been allowed a reaſonable Proportion of that Trade, they had never been the Proprietors of it.

But the making this unexpected Stroke at their Commerce, at a Juncture when they had many rich Merchants amongſt them, and their Country ſwarmed with able Seamen, inſtead of damping their Spirits, and depriving them of all Hopes, excited them to form a multitude of Projects for averting this Evil, more eſpecially when they found that his Catholick Majeſty remained firm to his Point, and actually cauſed their Ships to be ſeized, and ſuch as were on Board them to be impriſoned. This convinced them, that they muſt either abandon all Thoughts of this Commerce, or ſtrike out ſome new Rout for themſelves, which was ſo much the more difficult, becauſe even while they lived under the *Spaniſh* Yoke, they had never been permitted to make Voyages to the *Indies*. They derived, however, ſome Aſſiſtance from the Merchants who had ſettled among them, after the taking of *Antwerp*, for they were better acquainted with the *Spaniſh* Trade, and with the Method uſed in carrying it on, and it was thoſe People who adviſed the taking into their Service ſuch Seamen and Pilots as had ſerved under Sir *Francis Drake*, the famous *Candiſh*, and other *Engliſh* Commanders of Note. The Informations gained from theſe People, gave them ſuch Lights, that by degrees, their Merchants began to think an *Indian* Expedition practicable, and began likewiſe to be willing to run the Hazard of ſuch an Undertaking, from the Proſpect of the prodigious Profit that muſt neceſſarily accrue to them, if they met with Succeſs, which bore ſcarce any Proportion to the Expence neceſſary for making ſuch a Trial.

2. Among others, *James Valk*, and *Chriſtopher Roeltius*, the one Treaſurer, and the other Penſioner to the States of *Zealand*, in Conjunction with ſeveral Merchants, particularly *Balthaſar Moucheron*, *John Janſon*, *Charles Dirk Van Os*, and many others, took up a Reſolution to open a Paſſage into the *Indies*, from whence they were unjuſtly excluded by the Emperor *Charles* V. and *Philip* the Second, King of *Spain*. They conceived, that by ſteering North-Eaſt, they might run along the Coaſt of *Tartary*, and ſo reach *Cathay*, *China*, *Japon*, *India*, and the *Philipine* and *Molucca* Iſlands: The Execution of this Project was committed to two excellent Mariners, *William Barentz*, and *James Heemſkirk*, and afterwards to divers others; but hitherto the Almighty has not favoured the Diſcovery of that Paſſage, or of the People that live in thoſe Climates. While they were in queſt of this Northern Paſſage, one *Cornelius Houtman*, a *Dutchman*, happen'd to be in *Portugal*, and there ſatisfied his Curioſity by a diligent Enquiry into the State of the *Eaſt-Indies*, and the Courſe that one muſt ſteer, in order to come at it. He had frequent Conferences upon this Subject with the *Portugueze*, who gave Notice of it to the Court.

At that Time, all Foreigners were prohibited to make ſuch Enquiries; and upon that Score *Houtman* was put in Priſon, and ordered to ſtay there 'till he paid a heavy Fine: In order to raiſe ſuch a conſiderable Sum of Money, he addreſſed himſelf to the Merchants of *Amſterdam*, and gave them to underſtand, that if they would pay his Fine, he would diſcover to them all that related to the *Eaſt-Indies*, and the Paſſage thither: Accordingly they granted his Requeſt, and he performed his Promiſe.

After mature Conſideration of what he had offered, they reſolved to erect another Company, called the Company for remote Countries. The Directors of this Company were, *Henry Hudden*, *Renier Paw*, *Peter Haſſelaar*, *John Jans*, *Charles de Oude*, *John Poppen*, *Henry Buyck*, *Dirck Van Os*, *Syvert Pieterſz Seem, and Arenten Grootenhuiſe.* Theſe Directors conſidering as yet that 'twas very uncertain, whether the North Paſſage was practicable; tho' at the ſame time they were ſenſible, that it was the ſhorteſt and ſureſt Paſſage, and withal the moſt healthy, in regard that in it they did not croſs the Equinoctial Line: Upon this Conſideration, they came to a Reſolution *Anno Domini* 1595, to ſend four Veſſels to the *Indies*, by the Way of the *Cape of Good-hope.*

3. *Houtman*, and ſome others, who had the Command in this Expedition, were ordered to obſerve the Courſe they ſteered very nicely, and to ſettle with the *Indians* the Commerce of Spices and other Goods, eſpecially in thoſe Countries where the *Portugueze* had no Settlements. They looked upon this Commerce as a very valuable Thing, eſpecially conſidering that it would ſave them the Trouble of fetching that ſort of Goods from *Portugal*, which they could not do without great Hazard. Theſe Ships returned to *Holland* in the Space of two Years and four Months after their ſetting out; and though they had made no great Profit of the Voyage, yet their Succeſs animated their Owners, and ſeveral other Merchants, to carry on the Deſign yet further.

In Effect, a Member of that Company being dead, they preſently put into his Place *Gerard Bicker*, a very conſiderable Merchant. Then they had Advice that ſome other Merchants of *Amſterdam* deſigned to ſet out Ships for *India*. The Names of thoſe Merchants were *Vincent Van Broncherſt*, *Simon Janſz*, *Govert Dirrickz*, *Cornelius Van Campen*, *Jacob Thomaſz*, *Elbert Simonſz Jencheyn*, and *John Harmanſz.* The Company, to avoid Animoſities, thought it neceſſary to unite with thoſe Merchants, and, accordingly, the two Fleets, conſiſting of eight Veſſels, joined under the Command of *James Van Nek*, their Admiral, and ſailed from the *Texel A. D.* 1598.

A Deſign of the ſame Nature was likewiſe ſet on Foot in *Zealand*, and accordingly *Balthaſar Moucheron*, and *Adrian Hendrickzten Haaſ*, with ſome other Partners, fitted out Ships for the *Indies*. The Inhabitants of *Roterdam* being ſpurred forward by ſuch Examples, preſently formed a Company, and fitted out five Ships, under the Command of *James Mahu*, with Orders to ſail to the *Molucca* Iſlands, by the Strait of *Magellan*, and the *South-Sea*. In the mean time, the *Amſterdam* Merchants grew hotter upon the Matter, and the Company before mentioned, without ſtaying for the Return of the Fleet they had ſent already, fitted out three Ships more, which put to Sea *May* 4, 1599, under the Command of *Stephen Vander Hagan*. On the 8th of the then next *July*, four of the eight Ships that went out firſt, arrived in the *Texel*, and after they were unloaded, were immediately ſent back again under the Command of *James Willekens.*

4. About the ſame time, ſeveral *Amſterdam* Merchants, moſt of whom were *Brabanters* by Birth, formed another Company upon the ſame Deſign, and fitted out four Veſſels, which put to Sea *December* 1599, in conſort with four of the old Company's Ships. Two Years after all theſe Ships came home with rich Cargoes: But before their Arrival this new Company had ſent out two Ships, which were joined by ſix more of the old Company, all of them putting to Sea *A. D.* 1600, under the Command of *James Van Nek*; and, in the Proceſs of Time, all of them returned at ſeveral Times to their reſpective Ports. Upon the Conſideration of theſe lucky Adventures, ſeveral freſh Ships were fitted out in *Amſterdam*, *Zealand*, and elſewhere; among others, thirteen were ſent from *Amſterdam*, *viz.* four belonging to the old, and four to the new Company, under the Command of *James Heemſkirk*, and *James Grenier*; and five more of the old Company, bound for the *Moluccas*, under the Command of *Wolphart Harmanſz*; all the thirteen ſet ſail from the *Texel*, *April* 1601.

At this, the *Spaniards* were enraged with Anger and Grief, partly in regard of the Affront they ſuffered in ſeeing ſuch petty Merchants compaſs their Ends in ſpite of their Teeth; and partly upon the Account of the Loſs they ſuſtained, and were likely to ſuſtain hereafter. With this View they fitted out a ſtrong Squadron, in order to ſurprize the *Dutch* Ships. This Squadron conſiſting of thirty Men of War, well manned, fell in with eight of the *Dutch* Ships in the Month of *May*, in the Lat. of 14°. The *Dutch* perceived the Inequality of their Number and Forces, notwithſtanding that they had ſome Soldiers aboard: However, they were not daunted, for they fought bravely, and the *Spaniſh* Admiral was ſo warmly received, that he thought it convenient to let them paſs.

The next Year, three Ships came home from the *Indies* richly laden; they brought Advice, that the King of *Achen* had attempted to ſeize two of the *Maucherons* Ships that had ſet out from *Holland*, *A. D.* 1599. that *Cornelius Houtman*, the Commander, had loſt his Life in the Adventure; and in fine, that the Ships had eſcaped, but that ſome of the *Dutch* continued Priſoners in the Hands of the King of *Achen.*

Paul Van Caerden, having ſet out for the *Indies* that ſame Year, arrived at the Port of *Achen*, without knowing what paſſed, and there was expoſed to the like Danger; for that the King being egged on by a *Franciſcan* Monk, who reſided there in the Quality of a *Portugueze* Envoy, and had come thither from the *Moluccas* on purpoſe to wheedle him. The King, I ſay, thus ſollicited, ſet all Inſtruments at work to ſeize *Caerden*'s Ship; but all his Attempts proved abortive, and the King owned, afterwards, that he was ſeduced by the *Portugueze*, and accordingly gave a very good Reception to the Fleet commanded by *Laurence Bicker*, which had ſet out from *Zealand*, *A. D.* 1601: Nay, when the Fleet had taken in its Lading, which was very conſiderable, he ſent ſome Embaſſadors with them.

This Fleet putting into *St. Helens* to take in freſh Water, happened to meet with a *Portugueze Carrack*, richly laden, which they took, and brought along with them. The ſame Year *George Spilbergen* and the Ships he commanded were as favourably treated by the ſame King of *Achen*. The *Spaniards*, finding themſelves inferior in Strength, endeavoured to ruin the *Dutch* by all manner of Stratagems and Tricks; they ſent Emiſſaries to all the *Indian* Kings, to decry the new Adventurers, to brand them for Pirates, and Men of no Faith or Honour. In fine, they uſed all poſſible Efforts to affect their Ruin, as will appear in the Sequel.

5. The States-General and Prince *Maurice*, having received Advice of what paſſed, reſolved to give Commiſſions to all Ships that ſailed that Way; and indeed the Commanders of the Ships ſtood in need of them, in order to ſtifle the Calumnies of their Enemies. By theſe Commiſſions, they were impowered not only to defend themſelves, but to attack and commit Hoſtilities upon all that ſhould diſturb their Commerce. The valiant *James Heemſkirk*, being cloathed with ſuch Authority, ſailed with two Ships from *Bantam* in order to have them loaded at *Iohor*, and falling in with a rich *Carrack* upon her Return to *Macaa*, or *China*, with above ſeven hundred Men on board, attacked her, and forced the *Portugueze*, after a ſlender Shew of Defence, to ſtrike, and aſk Quarter, which was granted them. This was a Proof, that things were much changed with this Nation, and that the *Dutch* had not to do with thoſe gallant and glorious *Portugueze*, who had ſpread the Terror of their Name, and the Authority of their Crown over the fineſt Provinces in *Aſia*. Neither had the *Dutch* yet learned to behave with that Haughtineſs and Inſolence, with which they have ſince been reproached in this Part of the World. On the contrary, they behaved ſo kindly to their Priſoners, and tranſacted every thing in relation to them, with ſo much Honour, that they obtained ample Teſtimonials to this Purpoſe from the *Spaniſh* Governor in the *Molucca* Iſlands, as alſo from him who preſided at *Malacca*, by which, as they

no way diminiſhed their Wealth, they greatly raiſed their Reputation, and wiped off that Imputation of Piracy; which, to render them odious, the *Spaniſh* Government had thrown upon them.

This Capture was of prodigious Conſequence, becauſe it gave them a compleat View of the Riches and Commodities of the *Indies*; ſo that themſelves and their Countrymen now knew exactly what they were ſeeking, and could form a juſt Notion of the Value of that Prize, for which they drew their Swords. This heightened that Spirit which was already ſufficiently raiſed of joining in Adventures to *India*; and as good or ill Fortune ſeldom comes alone, ſo, in this Caſe another Circumſtance happened, which gave ſtill greater Credit to, and excited warmer Hopes from ſuch Undertakings.

At the ſame time *Oliver Van Noort* returned to *Holland*, after a three Years Voyage: He had been fitted out by *Peter Van Beveren*, *Hugh Buſe*, and *John Hoekbaker*, and ſet ſail from *Goeree September* 1598. He made but very inconſiderable Returns for the Merchants, but he acquired a great deal of Glory, a Share of which redounded to his Country; for, at that time, the *United Provinces* ſhared this common Glory with the *Portugueze* and *Engliſh*, That one of their Natives had ſailed round the World, by the Straits of *Magellan*. We have given a large Account of this Voyage in the firſt Chapter of this Work, and therefore need not inſiſt upon it here. It was, to be ſure, a glorious Undertaking, and the Fame that attended it had ſuch an Effect on the enterpriſing Spirits of thoſe Times, that it induced many rich Merchants to go and ſettle at *Amſterdam*, and drew thither the moſt experienced Seamen and Commanders from all Parts of *Europe*.

This is what the *Dutch* Writers tell us; and, indeed, we follow them entirely in this Account of their Company, as being the beſt inſtructed, and the moſt intelligent Guides. It is, indeed, very poſſible, and probable, that they have repreſented theſe Things to their own Advantage, for which the judicious Reader will make a proper Allowance. But, upon the whole, I believe it would have been difficult to have found any where better Materials, ſince, to do them Juſtice, they have been more careful to preſerve and record the Riſe and Progreſs of this Commerce, from the Time it fell into their Hands, than any other Nation that was ever concerned therein; and the Pains they have taken to inſert the principal Succeſſes of their *Eaſt India* Company in their general Hiſtories, is what can never be too much commended.

6. While their Navigation continued to be thus ſucceſsful, and the Trade of the *Indies* flouriſhed more and more, there happened an Accident that diſcontinued their former good Fortune, and threatened Ruin to the whole; I mean the Plurality of Companies that were then formed, and the ſorry Underſtanding that was between them. Oftentimes many of them fitted out Ships for the ſame Port, which lowered the Price of their Goods, and diſcouraged the Sailors. The States-General being acquainted with theſe Inconveniencies, called a Meeting at the *Hague* of the Directors of the Companies, both of *Holland* and *Zealand*, and obliged them to unite in one Body for the future, to which their High Mightineſſes joined their Conſent and Authority. The Treaty that was then agreed upon was confirmed by a Patent from the Sovereign Power, for twenty-one Years, commencing from the Date, *viz. March* 20, 1602.

The Patent being given out, the Company became a very conſiderable Body, and made a joint Stock of 6,600,000 Livres. Upon this Bottom they promiſed themſelves great Things, and fitted out a Fleet of fourteen great Ships, which put to Sea in *June* 1602, under the Command of *Wybrant Van Warwyk*. The next Year, in the Month of *February*, the Yacht called *Wachter*, returned, and gave Advice that five of the other Ships would be at home very ſpeedily. By this Yacht an Account was brought of what paſſed before *Bantam* between *Wolphart Harmanz* and his Vice-Admiral, *Hans Bouwer*, on one Side, and *Don Andreas Fertado de Mendoza*, who had formed a Deſign to drive the *Dutch* out of the *Indies*. In Effect Don *Andreas* was beat, and the *Dutch* Admirals purſuing their Courſe to the *Moluccas*, arrived there at ſeveral Times one after the other.

The ſame Yacht brought the News of an Engagement at the *Moluccas* between *James Van Nek*, Admiral, and three *Portugueze* Ships, which did not turn to his Advantage; for that, after the Loſs of eight or nine Men, and ſome of the Fingers of his own Right-hand, he was obliged to ſheer off. It was this Veſſel likewiſe that brought the firſt Intelligence of the taking of a *Portugueze Carrack* by *James Heemſkirk*. Upon the Arrival of this News, another Fleet of thirteen Ships was fitted out, and ſailed *December* the 18th, under the Command of *Stephen Vander Hagen*.

In the Year 1605, the King of *Spain* iſſued forth a ſevere Declaration, in which he prohibited the Inhabitants of the *United-Provinces* to trade to the Dominions of the King of *Spain*, or to the *Eaſt* and *Weſt-Indies*, under the Pain of corporal Puniſhment. But the Company was ſo far from being over-awed by this Edict, that it rather inſpired them with freſh Courage, and animated them to purſue their Deſign with more Vigour and Diligence. In a Word, they preſently fitted out a Fleet of eleven Veſſels, which were fit not only for Traffick, but for warlike Exploits, and gave the Command of them to *Cornelius Matelief*. This Fleet had ſcarce put to Sea, when the Directors gave Orders for preparing another of eight Ships, which were manned not only with a full Complement of Seamen, but with Soldiers, that were engaged to ſtay and keep Garriſon in the *Indies*, if Occaſion required. This third Squadron was commanded by *Paul Van Caerdan*. Soon after two Ships of the firſt of theſe two Squadrons came home with a rich Cargoe of Cloves and other Spices: They brought Advice that Admiral *Vander Hagen* would follow them very quickly; and accordingly he arrived the next *July*, after taking ſeveral *Spaniſh* and *Portugueze* Veſſels, and poſſeſſing himſelf of the Fort of *Amboyna*, the demoliſhing that of *Tidore*, and entirely diſlodging thoſe two Nations out of the *Molucca* Iſlands.

This Expedition gave Riſe to a mighty Diſpute between the *Dutch* and the *Engliſh*, upon the Account that the latter favoured the *Spaniards*, and by ſupplying them with Powder, enabled them to hold out longer. The next *October* three other Veſſels arrived in *Holland*, and gave Intelligence that *Wybrandt Van Waerwyk* was upon his Way home, but was obliged to put in at the Iſland of *Maurice*, becauſe his Ship was leaky, and that he had taken a *Carrack* at *Patana*. This Admiral arrived in the Spring 1607, but in the preceding Winter the Company had ſent two Ships more to the *Indies*, under the Command of *John-Janſz Moldie*, to whom they owed the taking of the Fort of *Tidore*.

7. A Negotiation being then ſet on Foot for a Peace in the *Netherlands*, the Company fitted out a freſh Squadron of thirteen Ships, under the Command of *Peter-Williamſen Verhoven*, who had given a ſignal Proof of his Courage and Conduct in the Engagement at *Gibraltar*, where he was Vice Admiral under the illuſtrious *James Heemſkirk*. This great Fleet was fitted out with a Deſign to give the World to underſtand, that no Treaty of Peace ſhould tempt the *United Provinces* to drop their Trade to the *Indies*. Immediately the *Spaniards* ſtarted a warm Diſpute in Reference to this Article, which proved the Subject of their principal Conferences; upon that the Company gave in frequent Remonſtrances both to the States-General, and to the Mediators, and preſented to them written Memorials, in order to make them ſenſible that there was a Neceſſity of being reſolute upon that Head.

In fine, this Point being looked upon as a principal Article by both Parties, ſo that it could not be adjuſted, the States, upon a final Reſolution, made this Propoſal, that either the *Spaniards* ſhould conſent to their *Indian* Trade in the Treaty of Peace, or allow it them by a Truce, for ſome Years, or elſe, that Things ſhould continue beyond the Tropick of *Cancer* upon the ſame Bottom that they then ſtood on, and that either Party ſhould make War there, and do what they could for their own Advantage. This done, the Truce of twelve Years was accepted and concluded, and upon certain Conditions 'twas agreed, that both the *Portugueze* and the *Dutch* ſhould continue their Trade where they pleaſed, and live in mutual Peace. This Affair was in Agitation without coming to any Reſolution in the Year 1608; at which Time Admiral *Mateliéf* returned from the *Indies* with ſeveral Ships. This Admiral had laid Siege to *Malacca*, but was obliged to break it up, in order to give Battle to the *Portugueze* Fleet, that came to relieve it; however, he had concluded an Alliance with the King of *Iohor*. In the Year 1609, the Company ſent a very expert Pilot, called *Henry Hudſon*, with a Fly-boat, to find out a North-eaſt, or North-weſt Paſſage to *China*, but he returned without bringing his Deſign to bear. At that Time they heard nothing from the *Indies* ſince the Arrival of Admiral *Mateliéf*, except ſome Advice by the Way of *England*; but the next Summer, four of their Ships arrived with a large Cargoe; they reported, that the *Spaniards* were ſtill poſſeſſed of *Ternate*; that the *Dutch* had maſtered *Machian* of the *Molucca* Iſlands, and that they hoped in Time to poſſeſs themſelves of *Ternate*.

The Truce being concluded and proclaimed in the *Netherlands*, they reſolved that a Pinnace ſhould be ſent to the *Eaſt-Indies*, with a Paſsport from the King of *Spain*, and the *Archdukes*, to acquaint the *Spaniards* and the *Dutch* with the Treaty: This Project was accordingly put in Execution, and towards the End of the Year, nine Veſſels were fitted out under the Command of *Peter Borth*, both the Seamen and Soldiers being allowed to carry their Wives and Children along with them.

8. It may not be amiſs to obſerve here, that it was by this Truce, the new Republick of the *United-Provinces* came to be owned for a legal and independent State by all the Governments in *Europe*; neither was this Negotiation of leſs Uſe in the *Indies*, where the *Spaniards* and *Portugueze* had begun to recover their Spirits, and to diſtinguiſh themſelves by a vigorous Defence of what they poſſeſſed in that Part of the World, againſt the Attempts of the *Dutch*.

Don *Juan de Silva*, who then commanded for the King of *Spain*, in the *Philippines*, was a Nobleman of ſuch Courage and Conduct, that no Advantages were to be gained while he held the Government. For having received Intelligence, that a *Dutch* Admiral, whoſe Name was *Willert*, was at Sea with a Squadron of four Sail, and had ſunk a *Spaniſh* Galleon richly laden from *China*; not contented with which, they were ſtill cruizing for ſome other Ships that were expected from *China* and *Japon*; Don *Juan* reſolved to hazard his own Life to retrieve the Honour of *Spain*, and to free thoſe Seas from ſuch unwelcome Gueſts. It was with this View, that he embarked his own Guards, and ſuch other Troops as were at *Manila*, on Board ſuch Veſſels as could be drawn together on a ſudden, and with them he attacked the *Dutch* Admiral with ſuch Fury, that he made himſelf Maſter of three of his four Ships, the Admiral himſelf having his Head taken off by a Cannon-ball in the Beginning of the Engagement, in which he loſt one hundred and twenty-five Men. This Battle was fought on the 25th of *April* 1610, and the *Spaniards* following their Blow, made themſelves Maſters of the Iſland of *Tidor*, and came before that of *Ternate*, while the Inhabitants of the Iſland of *Banda*, encouraged by theſe Succeſſes, revolted from the *Dutch*, and having ſurprized their General, *Peter William Verhoff*, at ſome Diſtance from their Fort, killed him, and all that were with him.

Admiral *Paul Van Caerden*, who was then in the *Indies*, thought to put a Stop to theſe Evils by his Preſence, and going on Board a Sloop, with twenty-five Men, proceeded for the Iſland of *Banda*; but being attacked by a *Spauiſh* Veſſel in his Paſſage, and his Crew having mutinied, he was taken Priſoner, and the *Spaniards* demanding for his Ranſom the Iſland of *Machian*, 30,000 Ducats in Money, and half a Year's Wages for the Mariners, he choſe rather to be carried to the *Philippines*, than ſubmit to ſuch Conditions. This happened on the 25th of *July*, in the ſame Year, and it was this News that induced the Company to ſend ſo ſtrong a Fleet as that before-mentioned, under the Command of Admiral *Peter Borth* to the *Eaſt Indies*.

They likewiſe thought fit to ſend a ſolemn Ambaſſy to the Emperor of *Japon*, at the Head of which were *James Spex*, and *Peter Segerſon*, who, on the 10th of *Auguſt*, 1611, had an Audience of the Emperor at *Meaco*, and obtained very advantageous Terms from that Monarch, notwithſtanding all the Oppoſition that could be given them by the *Spaniards* and the *Portugueze*. But while Things went on thus proſperouſly Abroad, the *Eaſt-India* Company were not altogether free from Difficulties and Diſcouragements at Home, occaſioned chiefly by the Covetouſneſs of ſome Merchants concerned in their Stock, who had fallen into a Practice of Jobbing, which was attended with many Inconveniencies; ſo that the Government interfered for the Remedy of theſe Grievances, which the States General redreſſed by a Placard publiſhed *February* 27, 1610.

In *May* 1611, the Company ſent out four Ships more, under the Command of *Laurence Real*, which were followed by a ſtrong Squadron that put to Sea from the *Texel*, in the next *December*, under the Command of *Adrian Block Martz*; near the *Cape Verd* Iſlands, this Squadron met with ſeventeen *Spaniſh* Men of War, which fell upon them, but were ſo warmly received, that only four of them were left in a Condition to ſail for *Spain* with the News of their Succeſs. When the Directors received Advice of a ſharp Engagement, they conceived, that their Ships muſt needs have received ſome Damage, and in order to reinforce them, fitted out two other Ships the next *May*, under the Command of *John Peterſz Coen*. In fine, the Commerce to *India* became ſo extenſive, that the Forces of the Company grew to that Height, that in the Years 1613. and 1614, they fittted out twenty-ſeven Ships at ſeveral Times, under the Command of ſeveral Commodores, particularly *Reyeſt* and *t'Lam*.

In order to a full View of their great Succeſs, we need only to caſt our Eyes upon the following Liſt of the Dividends that were made within the Compaſs of eight Years.

The Dividends made by the *Dutch Eaſt-India* Company, *viz.*

			l.	
Anno Dom.	1605 in	*June*	15	*per Cent.*
	1606	*April*	75	
	1607	*July*	40	
	1608	*April*	20	
	1609	*June*	25	
	1610	*Auguſt*	50	
	1613	*May*	37	

The Company being in ſuch a flouriſhing Condition, the next Year, *viz.* 1615, the States joined in ſending a ſtrong Squadron to the *South-Seas*, by the Way of the *Magellan* Strait, upon the Proſpect of ſurprizing the *Spaniards*, and weakening them on that Side, after which they might have an eaſy Paſſage to the *Indies*. *George Van Spilbergen* was Admiral in this Expedition, of which we have given a large Account in the former Part of this Work. In the mean Time, the War in the *Indies* continued, where the *Spaniards* did all that in them lay to preſerve and to augment their Conqueſts in the *Moluccas*, which appeared to them of the greater Conſequence, becauſe of their Situation which was extreamly favourable for ſecuring a Communication between the Colonies and Settlements of their Countrymen in the *Eaſt* and *Weſt-Indies*.

But the *Dutch* Admiral *Verhagen*, perceiving clearly that Don *Juan de Silva* was under great Difficulties from the Quarrels that continually aroſe between his Officers and the *Portugueze*, and that the latter were extreamly backward in ſending Don *Juan* the Succours that he expected; he reſolved thereupon to lay hold of this Opportunity of cruſhing the *Spaniſh* Strength, and having fitted out a conſiderable Squadron, he cruized on the Coaſt of *Malacca* for the *Portugueze* Galleons, that were going to the Aſſiſtance of Don *Juan de Silva*. They were four in Number, and had a conſiderable Body of Troops on Board, but Admiral *Verhagen* neverthelefs gave a good Account of them all; for the largeſt he ſunk, with all that were on Board her, made himſelf Maſter of the ſecond with all her Equipage, and forced the other two on Shore with very little Loſs to himſelf. This News was brought to *Holland* by a Fleet of four Ships richly laden with Spices, and other Commodities, to the Value of three Millions of Ducats, which ſmall Fleet arrived in the Month of *September*, 1616, and ſoon after the Company received the agreeable News that the King of *Ternate*, and the *Engliſh* ſettled in his Country, had joined the *Dutch*, and had obliged the *Spaniards* to abandon all the Places of which they were Maſters in the *Moluccas*, by which that Nation was entirely driven out of the Spice Trade, for which they had formerly ſtruggled ſo warmly with the *Portugueze.*

2. The Year before this, ſome Merchants, among whom were *Iſaac le Maire*, made the greateſt Figure, endeavoured to ſupplant the Company, and draw ſome Part of their Commerce into their own Hands; with this View, they reſolved to ſearch for another Paſſage to the *South-Sea*, than that of the *Magellan* Straits, and for that End, fitted out two Ships in *June* 1615, under the Command of *Cornelius William Schouten*, and *James le Maire.* In Effect, thoſe Commanders found out a Paſſage to the Southward of the Strait of *Magellan*, which they called *le Maire*'s Strait. By that Paſſage they entered the *South-Sea*, and ſailed as far as the *Moluccas*; but when they came to *Batavia*, their Ships were ſtopp'd and ſequeſtrated, upon the Pretence of their going upon an Expedition contrary to the Patent given to the Company by the States. At that Time the Company ſuſtained great Loſſes, and their Trade was much impaired by the Means of ſome Powders that were imported, and mixed with the Spices by the retale Merchants: This the Company repreſented to the States, and thereupon a Placard was iſſued, for preventing the like Abuſes for the future.

In *June* 1617, *George Van Spilbergen* returned to *Holland*, after two Years Abſence, in which he ſailed round the World. *Cornelius William Schouten*, and *James le Maire*, who had ſet out for *Holland* the ſame Year with himſelf, returned on Board of him, but *James le Maire* died by the Way, on the 22d of the preceding *December.* The States perceived, that ſome Potentates were alarmed with the Company's Proſperity, and did their utmoſt to oppoſe it, particularly by inveigling their beſt and ableſt Seamen, and drawing them off from their Service. Upon this Apprehenſion, the States publiſhed an Edict, by which the Deſertion of Seamen was expreſsly prohibited. In the Year 1618, and 1619, the Company had very good Fortune, for they received from the *Indies*, at ſeveral Times, ten Ships with rich Cargoes, valued at ſix or ſeven Millions. This new Progreſs inſpired them with freſh Courage, not only in reſiſting the *Spaniards*, but in concerting their Ruin by Way of Reprizal. This Work was carried a great Way by the Diligence and Affection of *Laurence Real*, a very knowing and prudent Man. This Gentleman ſerved nine Years in the *Indies*, where the Company honoured him with the moſt conſiderable Poſt, and then he returned to *Holland*, *A. D.* 1620.

The Reader muſt obſerve, that all theſe Facts are taken from the *Dutch* Hiſtorians, and placed in that Light in which they repreſent them, becauſe it would take up a great deal of Room, and oblige us to repeat many Things that have been ſaid before, if we ſhould labour to correct ſuch Deviations from Truth, as from a Propenſity towards magnifying the Power of the *Eaſt-India* Company, theſe Writers have now and then thought fit to make.

But with regard to *Iſaac le Maire*, it may not be amiſs for us to note, that we do not at all depart from the Judgment already given, concerning this Expedition, in the Hiſtory of the Circumnavigators, but merely inſert this, to ſhew in what Light the *Dutch* Authors would have us conſider this Point, out of Regard to their *Eaſt-India* Company. One Obſervation we ſhall take Leave to make by the Way, which is this, that the Treatment given to theſe Adventurers, has, in all Probability, been ſufficiently puniſhed by its Conſequences; all that rich Trade that might have been derived from the Diſcoveries, and the Purſuit of the Diſcoveries of *Le Maire*, has been totally loſt by Neglect, which perhaps has done as much Damage to the *Dutch*, as their *Eaſt-India* Company has done them Good. Of this, *John de Wit* was aware, and has very wiſely remarked, that tho' the Purſuit of ſuch a Commerce might have been beyond the Strength and Power of the *Eaſt-India* Company at that Time, yet there was no good Reaſon why the States ſhould have abandoned it, or ſhould not have encouraged the ſetting up a new Company, in order to have made a Trial of what this new Trade would have produced; for if new Trades do not proſper, they occaſion only a temporary Loſs to private Perſons, and none at all to the States; whereas, if they thrive and turn to good Account, they not only produce immenſe Riches to ſuch as are concerned in them, but prove alſo a mighty Advantage to the Publick. For new Trades, eſpecially under ſuch a Government as that of *Holland*, bring new People, and increaſe the Subjects of the State that encourages them, for Wealth is a powerful Attractive; and where Men are ſure to be rich and free, there will never be any Want of People.

But the *Dutch Eaſt-India* Company began now to feel their own Strength, and, like all other Companies, attended to nothing but the promoting their own Power, which induced them, about this Time, to engage in the War of *Java*, where they had not only the Natives of that Country, but the *Engliſh* alſo to deal with; and by degrees, and their obſtinately perſiſting in their Deſign, they overcame both, though not without great Difficulty and ſome Loſs, which however was abundantly repaired by the Reduction of *Jacatra*, and the ſettling their new Colony at *Batavia*, which was done in 1619, chiefly by the great Aſſiſtance which the States-General afforded to their *Eaſt-India* Company, while ours was ſlighted and neglected by the Government here, either from a Want of knowing the Importance of that Commerce, or from a Want of Power to afford the Aſſiſtance neceſſary in caſe they had a juſt Apprehenſion of the Value of that Trade: But, however it was, moſt certainly the Eſtabliſhment of *Batavia* proved the Baſis of ſuch a Power in the *Eaſt-Indies*, and gave the Company ſuch an Opportunity of diſpoſing all her Factories and Settlements, in an Order ſo agreeable to that Government which ſhe eſtabliſhed in this new Capital, that we may from thence date her Acquiſition of that Empire in the *Indies*, which not only renders her ſuperior to all the trading Companies in the World, but in point of Power, Riches, and Dominion, very little, if at all, inferior to the *Dutch* Republick itſelf.

They began likewiſe, about this Time, to extend their Alliances in that Part of the World, and to treat with the *Indian* Princes in every Reſpect as Sovereigns; appointing at the ſame time Officers, who had not only the Titles of Generals, Commanders in Chief, Admirals, Governors, and ſuch like, but had alſo the Power, and were effectually ſuch as theſe Commiſſions ſpoke them to be; and were, at the ſame time allowed ſuch Salaries, and inveſted with ſuch Authority as did not ſeem either very agreeable to their Dependency upon the Republick, or conſiſtent with the Modeſty and Frugality of the *Dutch* Government at home. This, the States however were content to overlook, becauſe, that ſuch as had the Direction of the Company's Affairs, pretended that theſe Titles, Revenues, and Commands, were abſolutely requiſite in the Eaſtern Part of the World, to preſerve the Reſpect and Obedience of the Natives of thoſe Countries, who were to be wrought upon only by the Splendor of Dreſs, Equipage, and ſuch like Exterior Marks of Superiority. The Truth however ſeems to be, that the Common-Wealth Party in *Holland*, paying a very unwilling Obedience to their Stadtholders of the Houſe of *Orange*, were not a little pleaſed to behold a kind of new Republick riſing in the *Indies*, independent of theſe Princes, and where their Relations might be ſent to acquire Fortunes, to learn Principles, and accuſtom themſelves to the Diſcharge of publick Offices, without being immediately under the Direction of theſe Stadtholders, who, by the Neceſſities of State, were placed at the Head of the Government at home.

Yet the Governor, General, and other principal Officers, always acted under the Prince of *Orange*'s Commiſſion as Stadt Holder, and in moſt Part of the *Indies* magnified his Power, making the *Indian* Monarchs believe that he was a King, nay, and one of the greateſt Kings in *Europe.* But this was only to ſerve their own Purpoſes, and to extend their Power the better; for the Directors of the Company continued to adminiſter its Affairs in a manner independent of the Government of *Holland*, and only made uſe of theſe Commiſſions, becauſe they could not well do their Buſineſs without them.

Two Things eſpecially contributed to their Grandeur, and to their quiet enjoying a Power of ſuch extravagant Extent. The firſt was the Factions and Diviſions that reigned at that Time in *Holland*, which ſo occupied the Cares of the Government, that they were the leſs able to look abroad; for it was at this Juncture that thoſe Troubles happened, which coſt *Barneveldt* his Life, and the famous *Grotius* and other worthy Members of the State, a tedious Impriſonment. The ſecond Cauſe was, the vaſt Riches which flowed in from the *Eaſt-India* Trade, and which were evidently of ſuch prodigious Benefit to the *Dutch* Nation in general, as rendered it very improper to take any Meaſures capable of leſſening the Intereſt or Authority of that Company, by which the Trade was managed, from which ſuch mighty Profits accrued. Beſides, it is not at all improbable, that both Parties had their Views upon this Company, and were in hopes of turning that Indulgence which was ſhewn it to their own Advantage, more eſpecially becauſe the Term granted by their Charter was drawing towards a Cloſe, when it might have been practicable to have given it a new Turn, and to have remedied all thoſe Inconveniencies, which, for particular Reaſons, and perhaps from private and very different Views, had been hitherto paſſed by and over-looked: But, as we ſhall ſee hereafter both Parties in the *Dutch* Government were miſtaken in their Conjectures, and the Company, inſtead of loſing, or abating any Part of her Powers or Privileges, acquired ſtill greater, and more extenſive, by the new Charter which ſhe obtained, as is uſually the Caſe in Countries where Oppoſitions prevail; and the Government, whatever its Form may be, is not at Liberty to purſue ſuch Meaſures as are moſt conſiſtent with her Intereſt.

But to return from theſe Reflections to the Thread of our Hiſtory, as it is taken from the *Dutch* Writers. The vaſt Succeſs which attended this Company in all its Undertakings, ſo raiſed the Spirits, and exalted the Hopes of the States, that they at length began to think of doubling theſe Advantages, by erecting a new Company, with the ſame Power of trading to the *Weſt-Indies*, which this Company enjoyed in trading to the *Eaſt*. But though this was a Project both reaſonable in itſelf, and which had all the Countenance the Government could give it, yet being ſecretly oppoſed by the *Eaſt-India* Company, it went on but heavily, and they were forced to make ſeveral Alterations in the Charter, before the Capital of this new Company, which conſiſted of 7,200,000 Livres, could be made up; and the State likewiſe preſented the new Company with three large fine Ships, equally fit for Trade and War.

But while ſo much Care was taking of the younger Child of the Republick, the elder was very well able to go alone; and there wanted not ſome who were for hurrying at too great a pace, and ſending ſuch Numbers of Ships to the *Indies*, as if the *Dutch* had not ſought the Commerce but the Conqueſt of *Aſia*, in which however they were checked, and all Things kept within due Bounds; which, however it might diſpleaſe arbitrary Spirits, was certainly right in the main.

About this Time the Abuſes and unwarrantable Practices relating to the Sale of the Actions or Stock of the Company, began to revive; upon which the States found themſelves obliged to renew the Placard of 1610, with a few Amendments ſuitable to the Circumſtances of the Time. In the Year 1621, the Ship called *Goede Vreede*, arrived in *Zealand*, having on board five Children of Kings or Princes, in order to their Education, in the Provinces, and Inſtruction in the Chriſtian Religion, purſuant to the Tenor of the Letters that were written to the Prince upon that Subject. In *February* 1622, two Ships more came home with rich Cargoes; they brought Advice that the *Indian* Trade flouriſhed ſtill, that they continued to wage war with the People of *Bantam* in *Java*, and with the *Spaniards* in the *Molucca* and *Manila* Iſlands, and that they had already poſſeſſed themſelves of the Iſland of *Banda*. Soon after there arrived three more, with Advice that the laſt Ships that went out had arrived ſafe in the *Indies* in four Months and three Days Sailing.

10. The Company's Patent expired this very Year, *viz.* 1622, and a Difference aroſe between the Directors and Subſcribers, that might have extended to a great Height, if the States had not interpoſed. Theſe wiſe Mediators appeaſed all by their Prudence. The Directors Accounts were called for, and purſuant to the Meaſures of Equity and Reaſon, a Dividend of 25 *per Cent.* was allotted to the Subſcribers, and paid them in Cloves. After that the Company obtained a new Patent for twenty-one Years, commencing from 1623. By Virtue of the Renewal of the Patent, the Company had the Satisfaction to ſee four Ships richly laden, return in *October*. The Difference between the *Engliſh* and the *Dutch* that had lain ſo long in Suſpence, was then accommodated upon the Payment of 800,000 Livres by the *Dutch* to the *Engliſh*.

The infinite Advantages that redounded to the Country by the erecting of this Company, could not diſſuade the Envious from thwarting it to a flaming Degree: To remedy this, and prevent the other Inconveniencies that might happen, the States thought fit on *March* 13, 1623, to add new Clauſes to their new Patent, after the Diſcovery of a new Paſſage to the *Pacific Sea*, made by *James le Maire*. Their High Mightineſſes, in Conjunction with the Company, came to a Reſolution to ſend another ſtrong Squadron that Way to the *Indies*, in order to ruin their Enemies. This Fleet ſet ſail in *April*, under the Command of *James l' Hermite*; but, before their Departure, two Ships and a Yatch ſet out for the *Indies* by the common Courſe. The next *May* two Ships came home, and found a very good Market. The Abuſes in the Sale of Actions obliged the States to revive a third Time their Placard upon that Head.

In *September John Peter Coen* arrived at *Goeree* with four Ships on the Company's Account, and a fifth, which had ſtraggled from them by the Way, arrived the next *November*. At that time a Handful of Merchants bought up, at one Sale, all the Company's Pepper, the Quantity of which amounted to 19,000 Bales, and the Sum which they paid for it amounted to 4,500,000 Livres, which was certainly a very remarkable Thing. In *May* 1624, the *Haes* Yatch returned, having ſailed to *Batavia* and home again in the Space of nine Months and ſeven Days. Their Intelligence imported, that all things went well in that Country, excepting that the *Engliſh* had raiſed ſome Commotions at *Amboyna*, but the *Dutch* uſed their utmoſt Efforts to hinder the *Spaniards* to trade in *China*, and hoped for Succeſs; that three or four Ships were taking in their Lading in order to come home; accordingly three homeward-bound Ships arrived the next *September*; and in *May* 1625, another, called the *Heuſden*, arrived from *Surat*, which gave Advice that their Affairs were in a pretty good Poſture at *Ormuz*, and in the neighbouring Countries, from whence three Ships more returned the next Spring. The *Schoonhoven*, an outward-bound Ship for the *Indies*, met with a violent Storm on the Coaſt of *Spain*, and was caſt away off *St. Jago*, where twenty-ſix of the Men were ſaved, and carried to *Spain*.

This Affliction was alleviated by the Arrival of two Ships from *Surat* in *February* 1626, and two more ſoon after, having on board an Embaſſador from the King of *Perſia*. They brought the News of the Victory obtained over the *Portugueze*, and of the great Commotion in *Surat*, occaſioned by the King's Son taking up Arms againſt his Father, inſomuch that both Armies were in the Field when the Ships came off. Upon this Intelligence they fitted out a Squadron of nine Ships, bound for that Country, under the Command of *Wybrandt*, who fought ſo bravely at *Sera Leoni* with *Campaen* the Pirate. In *June* two Ships of *James l' Hermite*'s Squadron came home, and before the Year was out, a Ship returned from *Coromandel*. It was in this Fleet that the famous Mariner, *William Yſbrantz Bontekoe* returned ſafe to his native Country, whoſe Adventures, though related by himſelf with all the Plainneſs and Simplicity becoming his Condition, yet were long held abſolutely beyond the Power of Belief, till, by a careful and ſtrict Enquiry, every Circumſtance was verified.

It is true, that a Thing of this Nature does not ſeem to fall ſo immediately under the preſent Section, but, undoubtedly,

edly, it has a very ſtrict Relation to the Buſineſs of this Collection, and therefore I ſhall give as clear an Account of this Man's Misfortunes as is poſſible, and in as few Words as I can.

William Bontekoe, Native of the Town of *Horn*, ſailed on the 28th of *September*, 1618, from the *Texel*, for the *Indies*, on board a Veſſel of eleven hundred Tons, having two hundred and ſix Men on board, in Company with two Ships of a ſmaller Size. The Difficulties he met with began very early; for being ſeparated from the reſt of his Squadron by a violent Storm, which laſted for ſeveral Days, he therein endured ſuch Hardſhips, and ran thro' ſuch Variety of Dangers, that neither himſelf nor any of the experienced Seamen he had on board, expected to eſcape. At length, however, the Violence of the Tempeſt abated, and they found themſelves in the Streights of *Sunda*, where they met with another Accident ſtill more terrible; for one of the Crew going down to pump, at the ſame time that the Steward went to draw Brandy, it fell out unluckily, that the former had a Candle in his Hand, out of which a Spark flew into the little Hole which the Steward had pierced in the Brandy-Caſk, and that conſequently took Fire. The Captain, ſoon appriſed of the Accident, ran down and ordered them to throw Water upon the Caſk, which, in their Confuſion, they rolled down into the Place where their Smith kept his Coals; but, however, the Water ſeemed to have put out the Fire: But in about half an Hour they were fatally convinced, that the Coals being covered with the flaming Brandy, had taken Fire. In this Diſtreſs, they continued to throw great Quantities of Water upon the Coals, in hopes of extinguiſhing them, from whence a new Evil aroſe; the ſulphureous Smoak of the Coals coming up through the Scuttles in ſuch thick Clouds, that they were not able to ſee what they were doing; and, which was worſe, they were ſo ſuffocated thereby, that they were no longer able to mind what they were about.

In this Diſtreſs they were conſtrained to ſhut the Scuttles, and to make Holes in the Ship's Sides, thro' which, by the Help of Canes, they continued to pour Water. Captain *Bontekoe*, foreſeeing that their greateſt Danger lay in the Fire reaching the Powder-room, ſent for the Supercargo, without whoſe Conſent he could do nothing, and endeavoured to perſuade him to conſent that the Powder ſhould be thrown over-board; but he was not to be moved, alledging, that if they threw over the Powder, and ſhould afterwards be attacked, tho' by a Veſſel ever ſo much inferior to them in Strength, they muſt be obliged to ſtrike, without making any Defence. By this Man's Obſtinacy, they were left in this dreadful Condition, fluctuating between Hope and Deſpair, the Fire appearing ſometimes, and ſometimes was ſo little to be diſtinguiſhed, that they had Reaſon to think it had been out. But, alas! they were ſoon convinced of their Miſtake; for the Coals lying at no great Diſtance from a Tire of Buts, filled with Oil, the Fire very ſoon reached them, and then the Crew began abſolutely to deſpair. Their Caſe indeed was miſerable, beyond Deſcription; for they were out of Sight of Land, the rolling Ocean on every Side, and the Fire immediately under them. It ſo happened, that their Shallop had been for ſome time in Tow, and to make room for the Men to bring Water to put out the Fire, they had likewiſe heaved out the Long-boat. The Crew obſerving this, ſlipped ſome to the Fore-caſtle, and ſome into the Galleries, from whence they dropped into the Sea, and then ſwam on board the Shallop, or Boat; ſo that while the Captain was uſing his utmoſt Endeavours to preſerve the Ship, he loſt a great Part of his Men.

When he diſcovered this, he endeavoured to get them on board again; but finding that impoſſible, he made all the Sail he could to come up with them; and while he was doing this, the fatal Blow which he expected took place, that is to ſay, the Ship blew up, and he was thrown from the Quarter-deck with two great Wounds in his Head, his Body half ſcorched, and his Legs and Arms ſo bruiſed, that he could hardly move them. However, his being ſo ſuddenly plunged into the Water, brought him to his Senſes; ſo that ſeeing the Mainmaſt of the Ship near him, he with much ado got upon it, and by the Help of two Boards kept himſelf floating, till he was taken up by the Shallop with much Difficulty. It was by this time Night; and though the Captain, as ſoon as he came on board, adviſed them to keep as near the Wreck as they could, yet they kept rowing all Night long, as if they had been ſure of making Land. But when the Day broke, and they ſaw neither Shore nor Ship, they came to the Captain, beſeeching him to tell them what they ſhould do. They were without Sails, without Compaſs, without Water, and had not above ſeven or eight Pounds of Biſket, but were ſtill rowing as hard as if they had been within Sight of Shore. The Captain exhorted them to Courage and Obedience, and in the firſt Place made a Review of them, by which it appeared, that there were forty-ſix in the Shallop, and twenty-ſix in the Long-boat. He adviſed them to lay aſide their Oars, as ſerving only to weaken them, and bid them make uſe of Sails. They aſked where they were to be had; the Captain replied, that every Man muſt pull off his Shirt, that by ſewing them together, they might make as good Sails as they could. It was then objected, that they had not either Needle or Thread; but the Captain taught them to ſupply the firſt with Nails, and the latter by untwiſting the Ropes. While they were at work upon the Sails, he employed the Carpenter in making a *Jacob*'s Staff, for taking Obſervations; and tho' he was ſo ill, that he could not ſit up, yet he made ſhift to draw a Compaſs, and a Chart, in which he laid down the Iſlands of *Sumatra*, *Java*, and the Streights of *Sunda*.

While they were thus at Sea, they got ſome Mews, and ſome Flying-fiſh; and when it rained, they collected the Water in their Sails, and preſerved it in two or three Caſks. But notwithſtanding all this, they were in a Fortnight's Time driven to ſuch Neceſſities, that it was with great Difficulty the Captain prevailed upon them to deſiſt from a Deſign they had formed of killing and eating two or three Boys they had on board. It was the 20th of *November* that the Ship blew up, and on the 3d of *December* they, with much Difficulty, made an Iſland on the Coaſt of *Sumatra*, from whence, with infinite Danger, they reached that Shore; and after running thro' Variety of Perils, in which they were preſerved by the wiſe Counſel of their Captain, they at laſt paſſed the Streights of *Sunda*, and arrived ſafe on the Coaſt of *Java*, where they were taken on board the *Dutch* Fleet, commanded by *Frederick Houtman* of *Alcmaer*, who ſailed out of the *Texel* at the ſame Time with Captain *Bontekoe*.

After he had remained ſome Time with him, the Admiral ſent Captain *Bontekoe* to *Batavia*, to the General *John Peter Coen*, who then commanded in the *Indies*, and who immediately gave him another Ship, as the juſt Reward of his Toils, and ſent him with naval Stores and Proviſions to the *Moluccas*. After this, he was employed by the ſame General in ſeveral other Services for the Space of two Years, and then he was ſent to *China*, on board the Fleet of *Cornelius Reygers*, who was entruſted with an Expedition of great Importance, which was to eſtabliſh a Commerce with the Inhabitants of that Empire, either by fair Means, or by Force; and in caſe the latter only was found practicable, they were ordered to make themſelves Maſters of the Iſland and Fortreſs of *Macao*, or one of thoſe Iſlands on the Coaſts of *China*, to which the *Portugueze* had given the Name of *Piſcadores*.

This Expedition, tho' very well concerted, and a Force employed, every way ſufficient for the Execution of it, yet failed by unforeſeen Accidents; and the *Portugueze* at *Macao* having repulſed them in their Attempt upon that Place, they were obliged to think of executing the latter Part of their Commiſſion by attacking ſome of the Iſlands before-mentioned. This proved a Work of Time, and was likewiſe attended with innumerable Difficulties, chiefly through the wicked and perfidious Temper of the *Chineſe*, who were too numerous to be wrought upon to Advantage by Force, and who, under Colour of Peace, betrayed and murdered ſuch as truſted themſelves in their Hands. They likewiſe frequently endangered the *Dutch* Squadrons by their Fireſhips; and, in fine, gave ſuch Diſquiet to Captain *Bontekoe*, that he reſolved, as ſoon as the Time for which he was engaged elapſed, to return to *Europe*; nor could all the Offers that were made him, either of Power or Profit, induce him to alter his Reſolution, or to think of ſtaying in the *Indies*.

Accordingly, on the 6th of *February*, 1624, he ſailed from *Batavia*, in Quality of Captain of the *Holland*, with two other large Ships, *viz.* the *Middlebourgh* and the *Gouda*; but in their Paſſage, they met with ſuch a Storm as carried away the Mainmaſt of the *Holland*, all the Maſts of the *Middlebourgh*, and ſunk the *Gouda* to the Bottom. In this Diſtreſs, Captain *Bontekoe* behaved with his uſual Courage and Prudence, by which both Ships were for that Time preſerved; for notwithſtanding the perilous Diſtreſs his own Ship was in, he, with much Difficulty, and yet without uſing any other Courſe than that of Perſuaſion, prevailed upon his Men to ſpare their Mizen-maſt and Boltſprit to the *Middlebourgh*, which otherwiſe could not have been kept above Water. This was on the 22d of *March* 1624, and having performed this good Office for their Friends and Countrymen, Captain *Bontekoe* bore away with his own Ship for the Iſland of *Madagaſcar*, where, in the Bay of *St. Lewis*, he found Means to careen, refit, and remaſt his Ship, with which he then proceeded for *Holland*.

On the Coaſt of the Iſland of *St. Helena*, they met with a *Spaniſh* Carrack, ſo ſtationed in the Road as to prevent their watering, which was what they abſolutely wanted. Captain *Bontekoe* did all that in his Power lay to have engaged the *Spaniards* to allow them to put on Shore, and take in Water; but they could not be perſuaded by fair Means, and thereupon an obſtinate Engagement enſued, without any Advantage to either Party; for the *Dutch* were at laſt obliged to continue their Voyage, with the little Water they had; and the Carrack was ſo dreadfully torn in the Fight, that the *Spaniards* finding it impoſſible to keep her above Water, took out her Guns and Cargo, and then let her ſink. The remaining Part of their Voyage was not attended with any remarkable Accident, except their being able to perform it with ſo ſmall an Allowance as a Quart of Water a Day *per* Man, from the Iſland of *St. Helena* to the Coaſt of *England*. At length, on the 15th of *September* 1625, Captain *Bontekoe* arrived ſafely at *Zealand*, after having been abſent from his Country ſeven Years, and in that Time run through ſuch a Variety of Fortunes as ſcarce any other Seaman ever met with. It may not be amiſs to cloſe this Account with obſerving, that the *Middlebourgh*, tho' ſo happily preſerved by Captain *Bontekoe*, never returned to *Holland*, but was undoubtedly loſt, tho' it is impoſſible to ſay when or where.

After the *Holland* parted with her, ſhe put into the Iſland of *Madagaſcar*, and there buried a Part of her Ship's Company, amongſt whom was the famous *William Cornelius Schouten*, who ſailed round the World with *James le Maire*, as the Reader has already ſeen in the large Account given of their Voyage in the firſt Chapter of this Work. But to return from this Digreſſion to the Thread of our Hiſtory, which will ſhew, how as the firſt Beginning of the Company was fortunate, ſo in her future Progreſs her Proſperity has never failed.

11. Their Commerce flouriſhed ſo much, that they were obliged to enlarge the Number of their Ships every Year, and the Company being ſenſible, that their Proſperity was chiefly owing to the good Conduct of their Admirals, they ſolicited *John Peter Coen* to make a ſecond Voyage to the *Indies*, in the Quality of Governor-General: At laſt *Coen* conſented, and put to Sea in *April* 1627, ſoon after the *Rotterdam* came home, and was quickly followed by four other Veſſels, under the Command of *John William Verſchoer*, who had ſailed from *Holland* with *l'Hermite*, and arrived at this Port in *July*. The rich Cargo of theſe Ships was ſcarce unloaded, and lodged in the Warehouſes, when *Adrian Block Martſen* was ready to ſail with a Squadron of eleven Ships, this being his ſecond Voyage as well as Admiral *Coen*'s. He put to Sea in *October*, and loſt two of his Ships in a Storm, but ſaved the Men and the Cargoes. In the ſame Month of *October*, *John Karſtenſz* of *Embden*, a Merchant, whoſe Vigilance and Experience rendered him very famous, returned to the *United Provinces*, after ſeveral Years Adminiſtration. He brought with him three rich Ships laden at *Surat*, and had been obliged to put in at *Portſmouth*, where an Embargo was put upon his Ships, for ſome Time. In *June* 1628, the Company had the Satisfaction of ſeeing five other Ships come home, under the Command of the Sieur *Carpentier*, who had been the Company's General in the *Indies*, and the Cargoes of theſe Ships were as valuable as that of the former.

Notwithſtanding theſe lucky Adventures, the Company was perplexed by ſome Accidents, moſt of which they had no Reaſon to expect. The *Engliſh* ſtopped their Ships as often as they had Occaſion; and the *Dunkirk* Privateers never failed to give them Chaſe. This obliged them to reſolve upon keeping a ſtrong Squadron every Year in the *German* Ocean, in order to cruize for their homeward-bound Ships, and conduct them ſafe to their Ports. The firſt Squadron that ſcoured the *German* Ocean was commanded by *John Dierkſz Lam*, who had been in the *Indies*; upon his Approach the *Dunkirk* Privateers retired. The three Ships that I mentioned above as coming from *Surat*, under the Command of *John Karſtenſz* of *Embden*, being ſtopped for ſome Time in *England*, were afterwards diſmiſſed, and their Arrival inſpired the Company with freſh Courage. Soon after their Arrival, a Squadron of eleven Ships ſet off for *India* in *October*, under the Command of *James Spex*, who was accompanied by *John Valbeck*, a famous Mathematician.

On the other hand, the Company had the Mortification of ſeeing a Ship, called the *Viana*, arrive with the unwelcome News that they had ſet ſail from *Batavia* the foregoing *January*, in hopes to paſs the Strait of *Baly* in time; but being diſappointed, ran aſhore in the Lat. of 21°, upon the South-ſide of the *Terra Magellanica incognita*; upon which they were obliged to throw overboard a great Quantity of their rich Effects, and ſo got the Ship afloat again with great Difficulty and Danger. Upon their Way they met with *Block*'s Squadron, which had likewiſe had very ſtormy Weather. By this Ship they had Notice, that the People of *Java* had formed a Conſpiracy to aſſaſſinate *John Peter Coen*, which was diſcovered by a young *Chineſe* Boy, and thereby the Execution of that deteſtable Deſign entirely defeated.

It was within this Compaſs of Time that thoſe great Diſcoveries were made by the *Dutch* Officers on the ſouthern Continent, of which we have ſo often ſpoke. The large Country of *Carpenteria*, now better known by the Name of *New-Holland*, was ſo called from General *Carpenter*, who diſcovered it in 1628. The weſtern Part of the ſame Country, which lies to the South of *Java*, was diſcovered the ſame Year, on the Behalf of the Company, and from the Name of the Commodore who commanded the Squadron, was ſtiled *Dewitt's-Land*. But all the ſouthern Coaſts lying towards the Sea, which ſeparates this Continent from that which lies cloſe to the South Pole, was diſcovered in *January* 1627, by *Peter de Nuyts*, who had thereby an Opportunity of beſtowing his Name on one of the fineſt Countries in the World.

All theſe Diſcoveries, together with a juſt Report of their Affairs, the Company received from General *Carpenter*, who returned with five Veſſels richly laden. And upon his Report it was that the Directors reſolved to ſend a Squadron of eleven Sail into thoſe Parts, under the Command of Commodore *Francis Pelſart*, of whom we have elſewhere given a large Account. It may not be amiſs to obſerve, that while the Company was doing all theſe great Things, their Country was torn with civil Diſſentions, chiefly thro' the Ambition of the Prince of *Orange*, who endeavoured to make himſelf in ſome meaſure independent of the States; ſo that if the Affairs of the *Indies* had not been under a Direction diſtinct from that of the Government, it is ſimply impoſſible that they ſhould have ſucceeded as they did, or brought ſuch Advantage to the *Dutch* Nation.

12. The Year 1629 was as favourable to the Company as thoſe that went before; for they had the Satisfaction of the Arrival of ſix Veſſels, under the Command of three ſeveral Commodores, who informed them, that after ſeveral diſhonourable Attempts, in order to ſurprize the *Dutch*,

Dutch, the King of *Mataram* had at laſt laid Siege to *Batavia*, and at the End of three Months was forced to break up with the Loſs of 16,000 Men. *Peter Vanden Broecke*, who had likewiſe been long in *India*, and was the firſt Introducer of Trade upon the *Red-Sea* and the adjacent Countries, returned home the next Year: He brought with him ſeven Ships, the Cargoes of which were valued at Eight Millions. But theſe happy Incidents were accompanied with a very diſagreeable Circumſtance; for of the eight Veſſels he commanded, he brought home but ſix, one being loſt by Fire under the *Açores-Iſlands*, and the other having ſtraggled from the Fleet; however, the laſt went round by *Ireland*, and came ſafe home. *Broecke* acquainted the Company that General *Coen* died ſuddenly two Days before the Arrival of *James Spex*, and that *Spex* acted as General by way of Proviſion. In fine, *Antony Van Diemen* returned in the Year 1631, with ſeven Veſſels, which brought the Company incredible Treaſures.

Theſe mighty Advantages enabled the *Eaſt-India* Company to proſecute their Deſigns to their utmoſt Extent, to enlarge their Commerce in the *Indies* by every Method poſſible; and in order thereto made uſe, with great Dexterity, ſometimes of Force, and ſometimes of fair Means, to compaſs their Ends, and to ſecure to themſelves the largeſt Share of a Trade, which, by Experience, they found of ſuch wonderful Benefit. It was with this View, that in 1641 they attacked the important City of *Malacca*, the ſtrongeſt Place the *Portugueze* had left in the *Indies*, and which was of ſo much the greater Conſequence, becauſe it not only ſecured their Commerce with the Kingdoms of *Johore*, *Siam*, and *Pegu*, but alſo afforded them vaſt Advantages for the Management of their Trade with *China* and *Japon*; at the ſame time it made them Maſters of that Strait which is of ſo great Conſequence to the Commerce of the *Indies* in general; ſo that whoever is Maſter thereof may, in Time of War, be in a Condition to give Law to all the Nations that carry on any Trade in that Part of the World.

It was in the ſame Year that the *Dutch* ſecured to themſelves the entire Poſſeſſion of the rich Commerce of *Japon*, by the total Excluſion of the *Portugueze*, and all other Chriſtians. We have already mentioned this Matter more than once, and given the Reader ſuch Lights therein as may enable him clearly to conceive how that Matter was brought about, and how far the *Dutch* may be juſtly charged with contributing thereto. Inſtead therefore of inſiſting farther upon that Matter here, I ſhall content myſelf with a ſingle Remark, which I think of ſome Importance.

It is this, that whatever other Nations, or the *Dutch* themſelves, may think of the Benefits accruing from this Excluſion of other Nations; it is however demonſtrable, that they would have carried on a more extenſive Trade to that Country, and with much more Eaſe to themſelves, if that Trade had remained on the old Foot; for immediately after the Expulſion of the *Portugueze*, the *Dutch* themſelves were obliged to quit the Port of *Firando*, where they had erected a noble Magazine, built all of Stone, and were obliged to ſhut themſelves up in the little Iſland of *Diſma*, where they have ever ſince been ſubject to the Caprice of the *Japoneſe*, and expoſed to a Multitude of Inſults and Inconveniencies, which never could have befallen them but from this Event; ſo that though, I confeſs, the *Dutch* are much enriched by the *Japoneſe* Trade, yet, I think, I have Reaſon to deny that they are at all the better for the Excluſion of other Nations.

13. The Power and Credit of the Company was now grown to ſuch a Height, the Wealth they brought into the Nation was of ſuch Conſequence, and ſo neceſſary to the State, and the Circumſtances of Things were ſo changed in their Favour, that without any Difficulty, at the Time of the Expiration of their ſecond Charter, they procured the Renewal thereof for the ſame Term of twenty one Years, to commence from the Firſt of *January* 1644. And ſo effectually did their Directors twiſt the Affairs of the Company with thoſe of the Government, that upon the Concluſion of the general Peace, the ſame Care was taken of their Intereſts as of thoſe of the Republick, to which the *Spaniards* conſented, and thereby relinquiſhed their Right, as they had long before loſt the Power of queſtioning the Conqueſts of the Company in the *Eaſt-Indies*. It was in Gratitude for all theſe Favours, that the Company entered the ſame Year into a Project of erecting, at an immenſe Expence, a Monument to the commercial Fame of the City of *Amſterdam*.

The Occaſion was this: The old Town-houſe, or Guild-hall, which had hitherto ſerved well enough as an Exchange for the Merchants, in which they met to tranſact Buſineſs, was now thought too little, and alſo too mean an Edifice for a City of ſuch Wealth and Trade. Upon this, the two great Companies of the *Eaſt* and *Weſt-Indies* undertook to build a new Stadthouſe, the firſt Stone of which was laid on the 29th of *October* 1648. While this noble Structure was raiſing, an Accident happened, which rendered it not only convenient, but neceſſary; for by ſome Means or other the old Town-houſe took Fire, and was burnt down to the Ground, which obliged them to haſten the Erection of the new one, which was fit for Uſe in the Year 1655, and has been ever ſince conſidered as one of the fineſt Structures in the World, in which all the Power of Architecture is diſplayed to the utmoſt without, and all the Riches of the moſt diſtant Countries in the World are aſſembled to render it magnificent within. There never was a Time in which the Company were better able to launch into ſo vaſt an Expence, her Commerce being now at its greateſt Height, and her Power raiſed to ſuch a Degree, that, from the *Cape of Good-Hope* to the moſt diſtant Parts of *China*, there ſcarce inhabited a Nation which had not learned to reſpect her, by having experienced the Effects either of her Reſentment or Good-will.

Yet all this Power, Wealth, and Trade, did not render ſuch as had the Care of the Company's Concerns at all ſlothful or negligent; on the contrary, they were always contriving ſome new Scheme for the Benefit of thoſe by whom they were entruſted; and being very deſirous of overcoming thoſe Difficulties which had hitherto cramped their Trade in *China*, the General and his Council at *Batavia*, in the Month of *July*, 1655, ſent a ſolemn Embaſſy, at the Head of which were *Peter Boyer* and *James Keyſel*, with rich Preſents to the *Chineſe* Emperor. He then reſided in the City of *Peking*, to whoſe Preſence, after a Stay of eight or nine Months, they were admitted, and from the Civility ſhewn them at their firſt Audience, they had great Hopes of Succeſs; but they ſoon diſcovered that there were Perſons in that Court who traverſed all their Deſigns, and found Means to miſrepreſent all the Propoſitions they made. The Chief of their Enemies was Father *Adam Schaal*, a Native of *Cologne* in *Germany*, and by Profeſſion a Jeſuit. He had reſided in *China* upwards of five and thirty Years, and had wrought himſelf ſo highly into the Emperor's Favour, that he raiſed him to the Degree of a Mandarin of the firſt Rank, and placed him at the Head of all the Philoſophers and Mathematicians in the Empire. This Man, by his great Intereſt, and Knowledge, effectually baffled the Deſigns of the *Dutch*; for he repreſented them as a People without any Lands or Settlements in *Europe*, who lived merely by Pedling and Piracy, and had by Treachery and Cruelty raiſed themſelves a large Empire in the *Indies*, at the Expence of the Natives, and more eſpecially of ſuch Princes as ſuffering themſelves to be deceived by their fair Pretences, had admitted them into their Dominions, and by that Means afforded them an Opportunity of diſtreſſing them and their Subjects.

The *Chineſe*, who are naturally ſuſpicious, having once got theſe Notions into their Heads, began to put ſuch Queſtions to the *Dutch* Embaſſadors as might beſt enable them to judge of the Truth of what they had been told: And, upon their aſking at how great a Diſtance the Seat of their Government lay from *China?* they anſwered, about five thouſand Leagues; and being interrogated as to the Power and Strength of the Colony at *Batavia*, they gave ſuch Anſwers as were true in themſelves, and moſt likely to create Reſpect: But theſe were preciſely the Things that turned moſt to their Diſadvantage; becauſe they ſeemed exactly to agree with what Father *Schaal* had laid down. So that towards the latter End of the Year 1657, the Embaſſadors

baſſadors quitted *China*, without being able to make any Progreſs in the Execution of their Commiſſion; ſo ſtrong were the Prejudices raiſed againſt them, and ſo great the Apprehenſions the *Chineſe* had of their Danger, in caſe theſe Strangers were admitted to trade in the Ports of their Empire.

But if they were diſappointed in their Hopes on this Side, they had better Succeſs in *Japon*, to which Country they ſent *Zachary Waghenaer*, with the Title of Embaſſador to the Emperor, with Orders to uſe his utmoſt Endeavours to gain a perfect Knowledge of the Policy of that great Empire, and to make himſelf likewiſe as agreeable as poſſible to the Emperor and his Miniſters, which Commiſſion he was very capable of performing, being a Man of deep Reach, very great Experience, and extremely courteous and affable in his Deportment. He had not been long however at *Iedo*, before a ſudden Fire reduced that City to Aſhes, which occaſioned ſuch Confuſion at the Court of *Japon* as induced the *Dutch* Embaſſador to return home.

He was ſcarce arrived at *Batavia* before News came that great Diſputes had ariſen between the *Japoneſe* at *Nangaſaqui* and the *Dutch*, who were ſettled in their Factory there, which alarmed the General and Council ſo much that they obliged Mr. *Waghanaer*, much againſt his Will, to make a ſecond Voyage to *Japon*, where he did not arrive till the Beginning of the Month of *March*, 1659. He found Ways and Means to ingratiate himſelf with the Emperor and his chief Miniſters, and by promiſing two Things on the Part of the *Dutch*, obtained all that he could reaſonably aſk in their Favour. The firſt of theſe was, that they ſhould give early Intelligence of any Deſigns that might be formed in the *Philippines* to the Prejudice of the *Japoneſe* Empire: The other, that they ſhould forbear taking *Chineſe* Ships upon the Coaſt of *Japon*, becauſe the Emperor allowing them to trade in his Dominions, it was but reaſonable that he ſhould be able to protect them.

While theſe Negotiations were carrying on in the moſt diſtant Parts of the Eaſt, there aroſe a new War in *Java*, which threatened Ruin to the *Dutch* Affairs. We have touched upon this more than once, but, for the better underſtanding this Hiſtory, it will be neceſſary to give a conciſe View of the whole Matter from the *Dutch* Hiſtories. The Iſland of *Java* had been under the Power of a ſingle Monarch, ſometimes ſtiled by the *Dutch* ſimply the Emperor, and at other Times called King of *Japara*, from whom the Governor of *Bantam* revolted, aſſumed the Title of King, and was ſupported in the Quality of an independent Prince by the *Dutch*. It was by the adroit Management of theſe Diviſions that they maintained and ſupported their own Power; for, whenever the Emperor of *Java* attempted any thing to the Prejudice of *Batavia*, the King of *Bantam* was ſure to take Arms in their Favour; as, on the other Hand, whenever the King of *Bantam* took up Arms againſt them they never failed to have Recourſe to the Protection of the Emperor of *Java*. But in the Year 1659, the Emperor being very much embaraſſed at home, the King of *Bantam* laid hold of this favourable Opportunity to raiſe a great Army, and to attack the *Dutch*, ſuppoſing that for want of the Emperor's Aſſiſtance, he ſhould ſoon be able to make himſelf Maſter of *Batavia*, to which he immediately laid Siege. He found himſelf however extremely miſtaken, for the Company was by this time become ſo potent, that they were able to defend themſelves by their own Strength, which they did ſo effectually, that after the Loſs of a great Part of his Forces, the King of *Bantam* found himſelf obliged to raiſe the Siege, and to retire precipitately into his own Dominions.

The Emperor of *Japara* had ſtill worſe Succeſs; for though he inherited from his Father an invincible Hatred to the Company, yet they made him feel the Effects of their Power, and made him ſuffer ſeverely for his Obſtinacy, though they were never able to conquer it, or to bring him either by fair Means or foul, to have any Correſpondence with them. Theſe Diſturbances at home did not hinder the Governor and Council from engaging in a foreign War, for the Support of one of their Allies, which was the King of *Bengal*, who was in great Danger of being dethroned by his Brother. At firſt the *Dutch* only furniſhed him with Proviſions and Artillery, and offered him, in caſe he was expelled, a Sanctuary at *Batavia*. But afterwards, finding that a conſiderable Part of his Subjects adhered to him firmly, they ſent over Troops to his Aſſiſtance, and thereby not only delivered him from the immediate Danger he was in, but reſtored him to his former Dignity: In Gratitude for this ſeaſonable Aſſiſtance, he gave them Leave to erect, not only a Factory, but a Fort at *Hughly*, well fortified with twelve Pieces of large Cannon mounted, and a good Ditch. It was by this Means that they ruined the *Engliſh* Trade there, and ſecured all the Commerce of thoſe Parts to themſelves.

Yet theſe remarkable Inſtances of good Fortune could not make them forget the Miſcarriage of their Affairs in *China*, much leſs incline them to forgive the *Jeſuits*, to whom they attributed the Defeat of that Ambaſſy, which coſt them an immenſe Sum of Money, and which, as we have ſhewn before, ended in an abſolute Diſappointment. To be revenged on the Authors of this Diſgrace, they fitted out a Fleet of thirty Sail, with Orders to ſail to the Iſland of *Macaſſar*, and to attack the City of the ſame Name, in the Port of which they knew there was a *Pertugueze* Fleet, richly laden, and in which the *Jeſuits* were deeply concerned. On the 7th of *June* 1660, the *Dutch* attacked *Macaſſar* by Land and Sea, and tho' the *Indian* Monarch of that Place defended his Allies with his whole Force, yet the *Dutch* obtained a compleat Victory; for they burnt three of the *Portugueze* Ships, ſunk two, and took one, ſo richly laden, that it ſufficiently reimburſed the Expence both of the *Chineſe* Ambaſſy, and of this Expedition. What was ſtill more honourable for the *Dutch*, the unfortunate King of *Macaſſar* was obliged to ſend a ſolemn Ambaſſy to *Batavia*, and to ſubmit to ſuch Terms as the *Dutch* Governor-General thought fit to preſcribe, which were hard enough, ſince he was obliged, not only to expel all the *Portugueze* in his Dominions, but alſo to promiſe, that he would never admit them, or any other *Europeans*, to ſettle in his Territories; ſo that we may juſtly affirm, that never any Expedition was more compleatly executed, or turned more to the Reputation of the *Dutch* Company than this, which not only humbled their Enemies, but brought vaſt Advantages to themſelves.

But as the greateſt Fortune is ſeldom the moſt ſecure, ſo immediately after this mighty Succeſs, the *Dutch* Company received one of the ſevereſt Checks they had ever met with ſince their Eſtabliſhment in the *Indies*. They had at this Time a very fine Settlement on the Iſland of *Formoſa*, one of the faireſt and moſt fruitful Countries in the *Eaſt*, abounding with all the Neceſſaries of Life, producing various rich Commodities, and affording them the Opportunity of carrying on a vaſt Commerce from thence. They had built for the Protection of their Colony, a ſquare Fort, with large Baſtions, and below theſe, towards the Sea, they had another Fortification, which covered the Palace of their Governor, conſiſting of two regular Baſtions, an excellent Covered-way, and four Half-moons, the whole united to the Fort by very ſtrong Walls defended by a great Number of Cannon, and the whole protected by a numerous Garriſon. The Town was long and large, extreamly well peopled, and the Inhabitants, from ſeven Years old and upwards, being charged with a Poll-tax, at the Rate of half a Guilder a Head, produced a Revenue more than ſufficient to diſcharge the Expences neceſſary for the Maintenance of this important Colony. Such indeed it might be well ſtiled, ſince by its Situation, at the Diſtance only of twenty-four Leagues from the Coaſt of *China*, and one hundred and fifty from *Japon*, it afforded them the Means of carrying on, with the greateſt Eaſe, a Trade to both that was exceſſively beneficial.

The *Chineſe*, in the Year 1653, had laid a very deep Deſign for the Deſtruction of the *Dutch*, by an univerſal Conſpiracy amongſt the Natives, which however had not the deſigned Effect; for being luckily diſcovered in Time, it was abſolutely defeated. This Piece of good Fortune made thoſe who were entruſted with the Care of this Settlement, more remiſs than is uſual with the *Dutch*, inſomuch, that they neglected the Fortifications, and ſuffered their Magazines to grow empty, while, by a ſteady Application to Trade, they were labouring to advance their private Fortunes. At the Time the *Tartars* made their laſt Conqueſt of *China*, there dwelt in the *Dutch* Town, upon this Iſland, a Taylor, whoſe Name was *Chinchilung*, by the *Dutch*, and other *Europeans*, called *Iquon.* This Man had a prodigious Spirit, a vaſt Capacity, and a Courage equally ſtubborn and enterprizing; and, from an unconquerable Averſion to the *Tartars*, got together a few Men, two or three ſmall Barks, and with this Force turned Pirate, or Privateer, which ever you will pleaſe to call him. In a ſhort Space of Time, his Power increaſed to ſuch a degree, that he became extreamly formidable to the *Tartar* Emperor, who finding that his Foible was Ambition, offered to make him King of the two great Provinces of *Canton* and *Fokien*, and ſent for him to *Focheu*, where he promiſed to give him the Inveſtiture of his new Dignity; but inſtead of keeping his Word, he cauſed him to be ſeized, and conducted to *Peking*, where he was ſoon after poiſoned.

This Taylor, who was ſo near being a King, had a Son, whoſe Name was *Coxſinia*, or *Coxenga*, and who had been Taylor to Mr. *Puttman*, Governor of *Fort Zealand*, and who, on his Father's Impriſonment, took upon him the Command of the Fleet. He at firſt demanded Succours from the *Dutch*, and promiſed them great Advantages if he was ſucceſsful againſt the *Tartars*, which they refuſed; and this provoked him to ſuch a Degree, that he reſolved to turn his whole Force againſt *Formoſa*, the rather, becauſe he had a good Intelligence from the *Dutch* Town, and knew that their Affairs were in a very bad Condition. He aſſembled, with this View, a Fleet of ſix hundred Sail, moſt of them Frigates of ſmall Force, but near one hundred were ſtout Men of War, of forty Guns and upwards. The News of thoſe great Preparations reaching the Ears of the *Dutch* Governor, who was at that Time Mr. *Frederick Cojet*, Succeſſor to *Cornelius Keiſer*, he immediately diſpatched Advice to *Batavia*, and demanded a ſpeedy Succour, and alſo to *Japon*, for the Aſſiſtance of ſuch *Dutch* Ships as happened to be there. All this, however, was to no Purpoſe; for before any Relief could come, *Coxenga* ſent his Fleet under the Command of his Uncle *Souja*, which appeared before the Place in the Month of *March* 1661.

The *Dutch* Governor ſent a Detachment of three hundred and fifty Men to prevent the debarking of their Troops, who behaved as well as Men could do, but to very little Purpoſe, as we may eaſily gueſs, ſince the *Chineſe* landed forty thouſand Men. They ſoon cut off the Communication between the Town and the Iſland, and having made themſelves Maſters of the adjacent Country, *Coxenga* treated all who had joined the *Dutch*, in the ſame Manner that *Nicholas Werburgh*, who was Governor in 1653, did ſuch as were concerned in the Rebellion; that is to ſay, he put them to Death with all the Marks of Shame and Cruelty he could invent, and without the leaſt Regard to Age, Sex, or Quality. After this, he attacked all the Outworks at the ſame Time, which prevented the *Dutch* from ſuccouring each other; ſo that theſe Places were very ſoon carried, though with a vaſt Effuſion of Blood, and the Governor was forced to retire into *Fort Zealand.*

The Conqueror conſidering the great Strength of the Place, and how unfit his Army was to undertake Sieges, made choice of Mr. *Anthony Hancbroeck*, the eldeſt of the *Dutch* Clergymen, and ſent him with his Brethren, two or three Schoolmaſters, and ſome of the graveſt Men among his Priſoners, to perſuade the Governor to ſurrender, declaring, that he was content they ſhould retire in Safety from *Formoſa*, and that he would not touch the Hair of a *Dutchman*'s Head, or one Farthing's Worth of their Goods; but if they refuſed this Propoſition, he would put them all to the Sword, without Mercy. The Governor told thoſe who brought him this Meſſage, that he had all the Sorrow and Concern in the World for their Misfortune; but at the ſame Time, that there was nothing could induce him to betray his Truſt, or to give up the Place he commanded into the Hands of the Enemy. With this Anſwer they returned to *Coxenga*, who, as ſoon as he heard it, cauſed all his Priſoners to be put to Death, Men, Women, and Children.

When this was done, he embarked the beſt Part of his Army on board three hundred Juncks, a very light Sort of Veſſels, with which he blocked up the Port, while he fired upon the Fortreſs from two Batteries of twelve Pieces of Cannon each. While Things were in this Situation, there arrived from *Batavia* a ſtout Squadron of nine Men of War, commanded by Commodore *James Cawen*, who immediately made the beſt Diſpoſition he could for the Relief of the Place. With this View, he landed the Troops he had on board, and being joined by a Part of the Garriſon, marched to attack 6000 *Chineſe* that were covered by a Redoubt, not yet mounted with Cannon. Theſe Troops being well armed, and compleatly diſciplined, received them in Order of Battle; and tho' the *Dutch* fought with great Reſolution, and renewed the Attack ſeveral Times, they were at length obliged to retire with the Loſs of four hundred Men. The Commodore then ordered his Ships to force a Paſſage into the Port, but the Junks drawing very little Water, kept cloſe under the Shore, where the great Ships durſt not follow them; and in this Attempt the *Dutch* loſt two of their beſt Men of War, of which one run aſhore, and had all her Crew, to the Number of three hundred and eighty Perſons, killed by the *Chineſe*; the other was blown up by a Shot fired into her Powder-room.

Commodore *Cawen* perceiving that it was impoſſible for him to do any Thing more, detached two of his Ships to *Japon*; and having taken on board two hundred Women and Children that were in the Fort, he ſailed back to *Batavia* with the five Ships remaining of his Squadron, and made an exact Report to the Governor of the Council of the State of their Affairs in *Formoſa.*

The News was received there with deep Concern, and a Reſolution was immediately taken to ſend an Ambaſſy to the Emperor of the *Tartars* in *China*, to inform them, that they were in Danger of loſing *Formoſa*, on account of refuſing to aſſiſt this *Chineſe* in his Rebellion; but not depending altogether on the Succeſs of this Ambaſſy, they ordered five Ships of War to be equipped, and to ſail forthwith to the Relief of the Place. The Governor *Cojet* made ſo obſtinate a Defence, that old *Souja*, the Uncle of *Coxenga*, reſolved to raiſe the Siege without the Knowledge of his Nephew, with, at leaſt, that Part of the Army which he commanded. But tho' he managed this Deſign with the utmoſt Secrecy and Caution, yet *Coxenga* came to have a Suſpicion thereof; upon which, forgetting the Nearneſs of his Relation, he cauſed old *Souja* to be arreſted, and put in Irons; after which, notwithſtanding he had the Plague and Famine in his Camp, he puſhed on the Siege ſo vigorouſly, that the Governor found himſelf obliged to ſurrender, notwithſtanding that the Succours he expected were in Sight.

Accordingly the Place being given up to the *Chineſe*, he marched out with the Remains of his Garriſon, and being taken on board the Squadron, he returned to *Batavia*, where, inſtead of having received the Thanks, as he might reaſonably have expected of the Governor General and Council, he was committed to Priſon, and kept there a long Time, under Pretence, that he had given up the Place too ſoon, becauſe the *Dutch* Squadron was in Sight. To ſay the Truth, we may, in ſome meaſure, pardon the Injuſtice of this Proceeding, when we conſider the Importance of the Place, that the Loſs was irreparable; and that, inſtead of having the *Portugueze* and *Spaniſh* Trade at their Mercy, their own was now ſo much expoſed, that it was very difficult for them to ſend their annual Squadron to *Japon.* This Misfortune, however, brought about a Correſpondence with the *Chineſe* Emperor, who conſented to give them his Aſſiſtance, to reſtrain the Power of *Coxenga*, to hinder him from pirating in thoſe Seas, and thereby diſturbing the Commerce of *China* and *Japon.*

14. It was about this Time, and by the Mediation of King *Charles* II. who had married the Infanta of *Portugal*, that a Treaty of Peace was ſet on Foot between that Crown and the Republick of *Holland*, which was ſoon after concluded, to the mutual Satisfaction of both Parties; for the

Eaſt-India Company were much too ſtrong for the *Portugueze* in that Part of the World, and had in a ſhort Time deprived them of their moſt valuable Settlements; yet in the *Weſt-Indies* the *Portugueze* were too hard for the *Dutch*, and had not only recovered *Brazil* out of their Hands, but were alſo in a fair Way of making ſtill greater Conqueſts; and beſides all this, their Privateers were ſo numerous, that the *Dutch* found their Trade in the *Mediterranean*, and on the Coaſt of *Africa*, very precarious; ſo that notwithſtanding the Advantages made in the *Indies*, they had no Reaſon to deſire the Continuance of the War.

The Company, however, as if they had been really Sovereigns within the Bounds of their Charter, took little or no Notice of the Peace; ſo that in the Year 1660, they attacked *Coulan* on the Coaſt of *Malabar*; and having reduced it, they next attacked *Cananor* on the ſame Coaſt, of which, tho' with ſome Difficulty, they became Maſters; and tho' their firſt Deſign was to have demoliſhed the Place, and to have eſtabliſhed only a Factory there; yet, on ſecond Thoughts, and when they came to conſider the Conveniency and Importance of its Situation, they changed their Minds, and determined to repair the Fortifications, and keep it as a Settlement of their own. After the Reduction of *Cananor*, they next proceeded to *Cochin*, a City of ſtill greater Force and greater Conſequence, as being a Biſhop's See, and a Place of great Trade. The *Dutch* Commodore *Goens* met here with greater Reſiſtance than he expected, and during a Siege of ſome Continuance, loſt a conſiderable Number of his People; but being reſolved to maſter it, coſt what it would, he proſecuted his Attempt with ſuch Steadineſs, that at laſt he prevailed; and the *Portugueze*, who had loſt a vaſt Number of Men during the Siege, were conſtrained to ſurrender the City into his Hands.

When he was poſſeſſed of it, however, he ſcarce knew how to act, becauſe on the one hand he ſaw that the Preſervation of it was a Thing of great Conſequence; and, on the other, that it would require a very numerous Garriſon, and a great Expence, to put the Fortification into a proper Repair: He applied himſelf therefore to the General and Council at *Batavia*, who immediately ſent him Orders not to ſpare for any Expence, either of Men or Money, but to puſh his Fortune to the utmoſt; and at the ſame time they ſent him this Meſſage, they ſent likewiſe a freſh Squadron, and a conſiderable Body of Troops on board it. This ſo encouraged Commodore *Goens*, that he marched with his Forces by Land to attack the City of *Porca*, which was the Capital of a little *Rajah*, or *Indian* Prince, who had been ſubject to the *Portugueze*: But he not caring to diſpute with thoſe who had beat his Maſters, offered to become their Tributary, and to pay them the ſame Obedience which he had formerly done to the Crown of *Portugal*; and this being as readily accepted as offered, put an End to the War on that Side.

The City of *Cranganor*, which is ſituated between *Callicut* and *Cochin*, fell next into his Hands without a Blow; and thus, in the Space of one Year, the *Dutch* expelled the *Portugueze* out of all the Places they held on the Coaſt of *Malabar*, and acquired to themſelves a Territory of one hundred and fifty Leagues in Length, with all the Trade belonging to it, and which the *Portugueze* had enjoyed without Interruption from the Time of their firſt Settlement in *India*. They likewiſe contracted Alliance with the Samorin of *Callicut*, the King of *Cochin*, and other *Indian* Princes.

They alſo laid hold of this Occaſion, to ſend a ſolemn Embaſſy to *Aurenzeb*, who had juſt mounted the Throne of the *Mogul*, by whom they were moſt graciouſly received, and an Intercourſe of Friendſhip ſettled between them: They took the ſame Method with reſpect to all the Monarchs whoſe Dominions lay on the Gulph of *Bengal*, and with the ſame Succeſs. It was not long, however, before they found ſome Cauſe to differ with the King of *Siam*; Upon which they withdrew their Factories out of his Dominions, which ſo alarmed that Prince, that he immediately ſent Deputies to *Batavia*, to know the Cauſe; which the Council ſignified to him by a very reſpectful Letter: On receiving which, he ſent an Ambaſſador to invite them back, on the ſtrongeſt Aſſurances not only of Redreſs in reſpect to the Grievances they complained of, but of any other that might happen in Proceſs of Time; and the Company accordingly re-ſettled their Factories at *Siam* and *Ligor*.

Not long after the compoſing theſe Differences, there aroſe freſh Grounds of Complaint, but on the oppoſite Side; for the Crew of a *Dutch* Bark murdered thirty-five *Siameſe* in cold Blood, after having raviſhed their Wives and Daughters. But before the Inhabitants or their Monarch had Time to complain, the *Dutch* Council at *Malucca* cauſed the Offenders to be apprehended; four of whom they broke alive upon the Wheel, and five they hanged; which gave ſuch Satisfaction to the Natives, that they never heard any more of this Matter.

In the midſt of all thoſe Succeſſes, they could not forget the Loſs of *Formoſa*, or the Overtures made by the Emperor of the *Tartars* in *China*, for reſtoring to them that Place. There was the greater Reaſon to expect that this Monarch would act ſincerely with them, becauſe *Coxenga*, not ſatisfied with *Formoſa* and its Dependencies, had actually made himſelf Maſter of ſeveral Iſlands on the Coaſt of *China*, and ſome Towns upon the Continent. On the Aſſurances therefore given them by Mr. *Borel*, who was their Ambaſſador to the Emperor, they fitted out a great Fleet, conſiſting of no leſs than ſeventeen Sail of large Ships, under the Command of *Balthaſar Borth*, with Orders to join the *Tartars*, and to act with the utmoſt Vigour againſt *Coxenga*. On his Arrival on the Coaſt of *China*, he found that Conqueror in Poſſeſſion of the Iſland of *Quemoy*, which the *Tartars* with all their Force were not able to take from him. The *Dutch* Commodore obſerving, that the principal Fortreſs in this Iſland ſtood upon the Sea-Coaſt, reſolved to try whether it was not poſſible to take it by Aſſault; ſuppoſing that this would not only ſtrike a Terror into the Enemy, but alſo raiſe the Credit of the *Dutch* Army with the *Tartars*; but he quickly found, upon Trial, that the Soldiers of *Coxenga* did not at all reſemble any of the *Chineſe* that he had ſeen; for they gave him ſo warm a Reception, that he was very ſoon obliged to abandon his Deſign.

He next determined to attack their Fleet, while the General of the *Tartars* engaged their Forces on Shore; to which the latter conſented. This Fleet of *Coxenga*'s conſiſted of Fourſcore large Juncks, and Twenty ſmall ones, all full of Soldiers and Seamen, and very well provided with Braſs Cannon. The Battle was very obſtinate and bloody, and *Coxenga* diſtinguiſhed himſelf as a gallant Soldier, an experienced Seaman, and a great Captain: But the *Dutch* large Ships tore his Juncks to Pieces, ſo that after an Engagement which laſted for ſeveral Hours, he was forced to retire; but he did it in Order, and with a good Countenance. The *Tartar* General, before the Battle, began to draw up his Forces in a regular Line, and while it laſted, looked on very quietly: After all was over, he expoſtulated this Matter a little warmly; but the *Tartar* General anſwered, That he could not prevail upon his Men to fight; but in caſe the *Dutch* would attack the Enemy a ſecond Time, he believed they would behave better. Admiral *Borth* took his Word, and attacked the Fleet of *Coxenga* a ſecond Time, and routed them entirely: But the *Tartar* General was ſtill a Spectator as before. This Victory, however, was of greater Conſequence than the former, ſince it not only coſt *Coxenga* all his new Conqueſts, but his Life.

The *Tartars* laid hold of this Opportunity to demoliſh the Fortreſſes they had raiſed as faſt as they left them, and the *Dutch* were very briſk in carrying off whatever they met with that was valuable. After this they made themſelves Maſters of the Iſland of *Amoy*, and the Recovery of *Formoſa* was looked upon as a Thing certain; yet when they came to attempt it, they were ſtrangely diſappointed; for old *Souja*, who had now recovered his Liberty, drew together the Fleet and Army of his Nephew, and diſpoſed every thing in ſuch a Manner, that there was nothing to be done but by Force, and even of doing any thing that way there was great Uncertainty. The old *Chineſe*, however, being a Man of great Wiſdom and Experience, was not willing to riſque all, if all might be ſaved without running any Hazard, and therefore had a mind to make Peace with the *Tartars*, and to grant the *Dutch* a Settlement and a free Trade, which he thought might content both Parties.

The Son of *Coxenga*, however, having diſcovered the Deſign, defeated it, and procuring himſelf to be elected General, ſeized the old Man, and ſent him a ſecond time to priſon, where, in a Fit of Melancholy, he diſpatched himſelf with his own Hands. This young Officer inherited all the Spirit and all the Abilities of his Family, and managed his Affairs with ſuch Courage and Conduct, that the Admiral ſoon found himſelf obliged to return to *Batavia* with his Fleet, without being able to execute the Commiſſion he had received, which was the Reaſon that he met from the General and Council no extraordinary Welcome.

The War in which the States engaged with King *Charles* the Second, retarded in ſome meaſure the Progreſs of the Company in the *Indies*; and when this was finiſhed, they very unexpectedly found themſelves a-freſh embarraſſed in that Part of the World, by the Inſults and Depredations committed by the King of *Macaſſar*, as their Writers report; for his Subjects had murdered ſome of the *Dutch* that had landed in his Dominions, and had likewiſe plundered ſeveral Ships that had run aſhore upon the Coaſts of his Dominions; but before any Hoſtilities were committed on either Side, a Treaty was ſet on Foot, by which the King promiſed to make full Satiſfaction for the Injuries done to the Company; as alſo to make ſuch Submiſſions as they ſhould require from him on account of theſe Diſorders.

The Company, however, ſuſpecting the Sincerity of the King's Promiſes in this reſpect, thought proper to ſend their Admiral, *Cornelius Speelman*, who had been Governor of the Coaſt of *Coromandel*, with a Squadron of thirteen Men of War, and a certain Number of Tranſports, with eight hundred Soldiers on board, with Orders to ſee the late Treaty executed according to the Letter in every Article; and he arrived with this naval Force before *Macaſſar* on the 19th of *December*, 1666. The very next Morning came two Deputies from the King on board, and brought with them a thouſand and fifty-ſix Ingots of Gold, which had been promiſed in Satiſfaction for the Murder of the *Dutch*; and alſo the Sum of One thouſand four hundred and thirty-five Rix-Dollars, in Satiſfaction for the Veſſels that had been plundered, but at the ſame time they declared in the Name of the King their Maſter, that the Submiſſions required of him were inconſiſtent with his Dignity; and therefore ſuch as he could not comply with. As this was preciſely what the Company expected, and as they were alſo informed that the King of *Macaſſar* had ſent a large Fleet in order to attack the Iſland of *Bouton*, Admiral *Speelman* immediately declared War; and having made two Deſcents upon the Enemy's Country, carried off an incredible Quantity of Plunder, burned fifty Villages to the Ground, and about an hundred of his Ships in his Ports.

After ſo ſignal a Revenge the Admiral ſailed from *Macaſſar* in order to relieve the Iſland of *Bouton*, which was hard preſſed by the Fleet and Army, which the King of *Macaſſar* had ſent againſt it; Admiral *Speelman* arrived before that Place the laſt Day of the Year before-mentioned; and on *New-Year's-Day*, 1667, he forced a Paſſage with his ſmall Veſſels into the Haven of *Bouton*, and then proceeded to attempt the Relief of the City, which was beſieged by the King of *Macaſſar*'s General, at the Head of ten thouſand Men. But the *Dutch* attacking them in their Entrenchments, and finding Means to ſet their Magazines on Fire, forced them immediately to raiſe the Siege; which Diſaſter was followed by ſuch a prodigious Deſertion among the Troops of their Allies, which made up the beſt Part of their Army, that the Generals of the King of *Macaſſar* found themſelves obliged to enter into a Treaty with the *Dutch* Admiral; and being able to obtain no better Terms, ſurrendered at Diſcretion. Thus this War was ended in the Space of four Months, with great Glory to the Company.

The firſt thing they did was to diſarm their Priſoners, of whom they ſent five thouſand five hundred to people a deſert Iſland not far from *Bouton*. Four hundred of them they kept for Slaves, and five thouſand *Bougies*, or Auxiliaries of different Nations, they delivered up to the King of *Palacca*, who had been their faithful Ally during the Continuance of this War. They reſtored to the King of *Bouton* three hundred Veſſels, together with whatever Plunder had been taken from his Subjects by the Enemy, and could be found after their Defeat; the reſt of the King of *Macaſſar*'s Junks they incorporated with their own Fleet of Tranſports, and with an hundred and ninety-five Standards, and all the Arms and Ammunition of the Enemy, with the principal Officers of their Army, whom they kept Priſoners. Admiral *Speelman* returned in Triumph to *Batavia*, where he was received with univerſal Applauſe.

The King of *Macaſſar* however remained ſtill fixed to his Purpoſe; and notwithſtanding all theſe Loſſes, abſolutely refuſed to ſubmit to the Terms which the Company preſcribed; but knowing, by Experience, that the whole Force of his Iſland would not be ſufficient to protect him from their Reſentment, he reſolved to employ his Endeavours in perſuading moſt of the little Sovereigns, who were his Neighbours, to aſſiſt and ſupport him in his Deſigns, which he declared to be no leſs than ſhaking off the Yoke of the *Dutch* Company for good and all. He ſucceeded ſo effectually in making this Alliance, that Admiral *Speelman* was obliged to ſollicit all the *Dutch* Confederates for their Aſſiſtance; and, at laſt, having drawn together all the Force they could raiſe, he, on the 8th of *June*, ſailed from *Amboyna* with ſixteen Veſſels, great and ſmall, and fourteen Shallops, on board of which were the Succours furniſhed by the Kings of *Palacca* and *Ternate*. He ſailed firſt to *Bouton*, but in his Paſſage Part of his Fleet was ſeparated, which, however, did not hinder him from landing in ſeveral Places on the Coaſt of *Macaſſar*, where, notwithſtanding the great Inequality of the others in Point of Numbers, he had tolerable Succeſs.

At length, on the 19th of *July*, in the Morning, he attempted to force a Paſſage into the Port of *Macaſſar*, but in this he was diſappointed; for the King having erected a Royal Fort for the Defence of the Place, the *Dutch*, after twenty-four Hours cannonading, were forced to retire. A few Days after the Admiral was joined by that Part of the Fleet which had been ſeparated from him by the Storm; and, on the Second of *Auguſt*, he made a Deſcent with his whole Force at a Place called *Gliſſon*. The Army of the Company conſiſted of ſix hundred *Dutch* Troops, three hundred diſciplined *Indians* in their Pay, three thouſand Men from *Ternate* and *Bouton*, ſeven thouſand *Bougeis*, eight hundred Seamen, and two independent Companies, under the Command of the Captains *Jonker* and *Stryker*. But the Forces of the Enemy were incomparably greater; for they amounted to no fewer than twenty thouſand Men, under the Command of all the little Kings and Princes that the Monarch of *Macaſſar* had drawn over to his Party.

Admiral *Speelman* kept the main Body of his Forces near his Fleet, and detached one hundred Men, the braveſt and the beſt armed under his Command, to attack the Caſtle of *Gliſſon* in the Night. The King of *Palacca*, who was intruſted with the Management of this Affair, executed it with ſuch Courage and Conduct, that, by three in the Morning, he became Maſter of the Place, of which he gave Notice to the *Dutch* Admiral, who immediately ſent him ſuch Reinforcements and Supplies as were requiſite to preſerve it. This was a dreadful Blow to the Enemy; and as the Admiral very juſtly foreſaw, the firſt thing they did was to attempt the Recovery of it, in which, however, they were ſo far from ſucceeding, that after three general Aſſaults, in each of which they loſt a great Number of Men, they were forced to give over that Deſign; neither was this all, for taking Advantage of the Situation of this Fortreſs, ſuch Multitudes of Bombs and red-hot Bullets were fired from thence into the Enemy's Camp, as threw them into the utmoſt Conſternation and Confuſion; which Opportunity was not let ſlip by the *Dutch* General, who, with the beſt Part of his Forces, attacked the Enemy's Entrenchments, at the ſame time that a vigorous Sally was made from the Caſtle, which obliged the Enemy to quit all their Poſts.

General *Speelman* ſoon after embarked his Forces, and tranſported them to another Part of the Iſland, where he committed great Ravages, and deſtroyed a great Multitude of Villages. As this War was apparently attended with great Loſſes and Inconveniencies on both Sides, Deputies were at laſt choſen, to try what could be done towards ſettling a Peace. The King of *Macaſſar* was very unwilling to let theſe Deliberations be ſpun out to any length, becauſe he found his *Indian* Allies deſerting him by Degrees, and making Peace for themſelves on the beſt Terms they could; which Example of theirs he reſolved to follow, by ſubmitting to ſuch Terms as he could get, which were, indeed, none of the moſt reaſonable; and ſo the Treaty was concluded on the 18th of *Novemrer*, 1667; in conſequence of which, the Regents of the Iſland, and all the neighbouring Princes, as well as the King of *Macaſſar*, ſent a numerous and ſolemn Embaſſy to the Governor-General, *John Maetſuicher* at *Batavia*, to make their Submiſſion to the Company.

All this Time the *Dutch* Army and Fleet continued in the Iſland, and the rainy Seaſon coming on, there enſued ſuch a Mortality among them, as induced the *Indians* to hope they might gain ſome Advantages over them, by which they were tempted to break the Peace, which they did by maſſacring a great Number of the dying Soldiers, and two of their Captains; upon which the War broke out again, and continued with as great Violence as ever for two Years; in which Time the Succeſs of Admiral *Speelman* was ſo great, and the Calamities he brought upon the Natives of *Macaſſar* were ſo many and ſo heavy, that, at laſt, they were forced to implore a Peace, to ſend a new Embaſſy to *Batavia*, and to make all the Submiſſions the Company could require; and, after all, they were left to the Mercy of *Speelman*, who, by a new Treaty, concluded on the 15th of *June* 1669, not only renewed the Treaties of the 19th of *Auguſt* 1660, and the 18th of *November*, 1667, but alſo impoſed upon them other Conditions ſtill more grievous and more intolerable. By this Treaty the Company became entirely Miſtreſs of the Commerce of the Iſlands of *Celebes*, which, though very conſiderable in itſelf, was ſtill more ſo by being taken from other *European* Nations, who under Colour of trading for the Commodities of the Iſlands, came in for a conſiderable Share of the Trade in Spices; ſo that it ſerved likewiſe to ſecure to the *Dutch* what was of more Conſequence to them than any thing elſe, their abſolute Sovereignty over the *Moluccas*.

I have been the more particular in writing the Hiſtory of this War from the Memoirs furniſhed me by the *Dutch* Authors, becauſe it is the laſt of any Conſequence that the Company has carried on in the *Indies*, and has, with reſpect to the Natives, eſtabliſhed their Power ſo effectually, that there is no great Danger of their being obliged to ſuſtain ſuch another War. Before I part however with this Subject, I ſhall take the Liberty of making a few Remarks, for the ſake of ſuch Readers as ſeek Inſtruction rather than Amuſement, and are truly deſirous of underſtanding what in this Section I have undertaken to explain.

My firſt Obſervation is, that how rude and barbarous ſoever we may eſteem theſe Nations, yet moſt evident it is, that the King of *Macaſſar* acted like a great and wiſe Politician, and that the *Indian* Princes, who joined with him, were entirely guided by a Principle of publick Spirit, and a very juſt and rational Deſire of preſerving a Ballance of Power in thoſe Parts upon which their own immediate Safety and quiet Enjoyment of their Dominions depended. They miſcarried indeed, but it was in a noble Cauſe, and even their Miſcarriage ſufficiently proves the Rectitude of their Intentions; for ſince the Concluſion of this fatal Peace, to which they were driven by abſolute Neceſſity, they have loſt all Commerce with Strangers, and are, to all Intents and Purpoſes, the Vaſſals, or to ſpeak in plain *Engliſh*, the Slaves of the *Dutch*. This plainly ſhews, that the Ballance of Power is not ſuch a Chimera as ſome People would repreſent it; and my next Remark will make this ſtill more evident.

It is very ſtrange, that while theſe *Indian* Princes were not only fighting for their own Freedom, but for the Liberty of trading with *Europeans*, all the *European* Nations ſettled in the *Indies* ſhould be quiet Spectators of a War which ſo much concerned them, without interpoſing in the leaſt for the Preſervation of thoſe who were engaged in their Cauſe as much as in their own. If they had ſtirred ever ſo little, we may eaſily diſcern, even from theſe *Dutch* Accounts, that the King of *Macaſſar* and his Allies might have been ſupported in their Pretenſions, and might have been enabled to have thrown off the Yoke of the *Dutch*; ſo that if Barbarity conſiſts, as ſurely with reſpect to Nations it does, in political Ignorance, then the *Europeans* in the *Indies* may, with greater Juſtice, be ſtiled barbarous than the poor Natives, who certainly did all they could; and the wiſeſt, greateſt, and braveſt Nations never did more.

My third Remark is, that the *Indians* who joined with the *Dutch*, were Enemies to themſelves, and by deſtroying the Power of the King of *Macaſſar*, not only contributed to the Ruin of the only Monarch who underſtood and purſued the true Intereſt of the *Indians* in general, but likewiſe ſubverted and took away their own Importance: For, while the King of *Macaſſar* continued a great and powerful Prince, the *Dutch Eaſt-India* Company conſidered, and muſt have always conſidered ſuch Princes as lived in Friendſhip with them in the light of Allies, and durſt never have treated them but as Allies ought to be treated. But when this Power was gone, which made their Friendſhip ſo neceſſary, and of ſuch Importance, they became as much the Vaſſals, as much the Servants, or, as I called them before, the Slaves of the *Dutch*, as that King and thoſe Princes, who by their Aſſiſtance, the *Dutch* ſubdued. This is a very uſeful and a very important Leſſon; for Men are the ſame in *Europe* and in the *Indies*.

It is now time to reſume our Hiſtory, which leads me to take Notice, that while the *Eaſt-India* Company carried all before them abroad, the Republick was exceſſively diſtreſſed at home; for now it was that the *French*, jealous of her Power, and the *Engliſh*, in Reſentment of former Injuries, concurred in that fatal Alliance, which was very near bringing the States as low as when they firſt ſhook off the Tyranny of the *Spaniards*; nay, which actually did bring them into ſuch Diſtreſs, that it is reported that they had once thought of ſeeking that Protection from their *Eaſt-India* Company, which they had hitherto afforded it, and of transferring that Government to *Batavia*, which they almoſt deſpaired of preſerving at the *Hague*.

Providence however interpoſed, and by touching the Hearts of the *Engliſh* Nation with a generous Concern for their Neighbours, whom though they might wiſh to ſee humbled, yet they had no Deſire, as indeed they had no Intereſt to ſee them deſtroyed, delivered them from this Calamity, and raiſed them once more to Power and Freedom.

Yet the *Eaſt-India* Company, though it felt but little of this Storm, was not altogether exempt from its Force, ſince the *French* ſent a powerful Squadron into the *Indies*, with a View to have torn from them a Part of their Poſſeſſions. This Squadron was commanded by the *Sieur de la Hay*, who propoſed firſt attacking *Ceylon*, with a View to make the *French* Maſters of the Cinnamon Trade at once, as the ſhorteſt Means of introducing the Commerce of the *Indies* according to the Project of one Mr. *Caron*, a *French* Refugee, who had been long in the *Dutch Eaſt-India* Company's Service, underſtood their Affairs perfectly well, and made his Peace at home by betraying all he knew. This Man embarked on Board the Fleet, and was principally depended upon in the Management of every thing. It cannot be denied, that he ſerved the *French* Miniſtry very effectually; but they had not ſufficiently conſidered the Importance of the Expedition in which they employed him, or the Force of the Enemy with whom they had to deal; for if they had, they would undoubtedly have ſent a ſecond Squadron to have ſupported that which Mr. *Hay* commanded; and this might have been of ſome Uſe; but, as it was, it only ſhewed the Diſpoſition of the *French*, and ſerved to put the *Dutch* upon their Guard.

In the Summer of the Year 1673, the *French* Fleet appeared on the Weſt-Coaſt of the Iſland of *Ceylon*, and immediately landed and attacked the Citadel of *Trinquimale*,

male, of which they became Maſters; and by fair Promiſes, and magnifying the Power of the *French* King, drew the Natives to join with them; ſo that thus far they had all the Succeſs they could expect. But *Trinquimale* was a Place of too great Importance for the Company to let it remain long in the Hands of theſe new Conquerors; they therefore ſent Commodore *Goens* from *Batavia* with a Fleet of ſixteen Sail, all of them large Ships, and well manned. On the firſt Appearance of this Squadron Mr. *de la Hay* retired with his Ships to *Surat*, leaving a ſmall Garriſon in his new Conqueſt. The Commodore blocked up *Trinquimale* by Sea, and debarking his Forces, beſieged it at the ſame time by Land; ſo that he ſoon recovered it, together with one hundred and twelve Pieces of fine Braſs Cannon, which the *French* had left there for its Defence; ſo that here ended their Views upon *Ceylon*, almoſt as ſoon as they began.

But Mr. *de la Hay*, when he came to *Surat*, adviſed with Mr. *Caron* about the Meaſures which they ſhould next take; and, purſuant to his Advice, reſolved to attack the Fortreſs of *St. Thomas*, which about twelve Years before the *Dutch* had taken from the *Portugueze*; and in this ſudden Attempt they were as ſucceſsful as they had been before in ſurpriſing *Trinquimale*, and juſt as unlucky in keeping it. After leaving a good Garriſon here, and ſeeing the Magazines put into the beſt Order poſſible, the Sieur *de lay Hay* thought proper to return to *France* with the only Ship that was left of his Squadron. But it fell out unluckily enough for him, that even this poor Conſolation of bringing home a few of the People he had carried out, was denied him; for, in the Road of *Liſbon*, his only Ship was wrecked, by the Malice of his Pilot, as it was ſuppoſed, more than by any Violence of Weather; the rather becauſe Mr. *Caron*, two Captains, and ſeveral other Officers were drowned in their Endeavour to get aſhore in the Long-boat, which was the Effect, as is ſuppoſed, of ſome Practices which the Treachery of *Caron* to the *Dutch* put them upon taking; but as this is a bare Suſpicion, and abſolutely deſtitute of Proof, to inſiſt upon it farther would be needleſs.

This was the laſt Attempt made againſt the Commerce of the *Eaſt-India* Company; and during the Remainder of the Century, they were continually improving and augmenting both their Power and their Commerce; ſo that, at the Cloſe of it, they were in a much better Condition than ever; for in the Year 1687, we find that they brought over One hundred and ſeventy thouſand Pounds Weight of Cinnamon; and yet they brought over leſs that Year than they had done for many Years before, which ſhews the prodigious Importance of their being ſolely poſſeſſed of the Iſland of *Ceylon*. On the 11th of *Auguſt*, 1698, their Charter was renewed for forty Years, which gave them ſuch an Acceſſion of Power and Credit, as rendered them almoſt as conſiderable in the Eyes of all *Europe*, as they were before in the *Indies*: And having ſaid that, it may ſeem altogether unneceſſary to add any thing by way of Explanation.

15. We have now conducted the Hiſtory of this famous Company, from its earlieſt Eſtabliſhment to the Beginning of the preſent Century; and for what regards the Tranſactions thereof from thence to the preſent Time, there is ſo much ſaid in the firſt Chapter of this Work, in the Account we have given of Commodore *Roggewein*, that there ſeems to be the leſs Occaſion for our inſiſting much on that Subject here, therefore we ſhall content ourſelves with mentioning only a few Particulars that have not hitherto fallen in our Way; that, as far as in our Power lies, there may be nothing deficient in the treating a Subject ſo curious and important in itſelf, and the Knowledge of which is ſo peculiarly neceſſary to a trading Nation.

In the firſt Place, though we have mentioned them occaſionally before, we will more exactly diſtinguiſh the Dates of the Company's Charters; the rather, becauſe many of the *Dutch* Writers are not very exact in that Particular. The firſt Charter was dated the 20th of *March*, 1602, and was to continue for twenty-one Years. The ſecond was granted the Year in which the former expired, for the like Term, but with this Variation, that it was to commence from the firſt of *January*, 1623, ſo that it determined in 1644, when they procured a new Charter for the ſame Term. Their fourth Charter bore Date the 7th of *February*, 1665, and was to extend to the 31ſt of *December*, 1700; but the Company thought proper in 1698 to obtain another Charter for forty Years, from the Determination of that which was then in being. And, again, in the Year 1717, the Company thought it requiſite to apply for new Favours, but they were not able to obtain a new Charter, as they expected; however they procured a Placard, by which the States-General forbad all their Subjects to ſend any Ships to the *Eaſt Indies*, or any where within the Limits of the Company's Charter: They likewiſe prohibited their Interfering in any manner in the Commerce of the *Indies*, without the Licence of the Company firſt had and obtained for that Purpoſe; as alſo to have any Concern in foreign Companies, or to ſerve on board any of their Ships; which Precautions were thought neceſſary not only for the *Eaſt-India* Company's Security, but for the preſerving this rich and beneficial Trade to the Subjects of the Republick.

There happened, about the Time that their Charter ſhould have been renewed, ſome Commotions in the *Indies*, which had like to have been of very fatal Conſequence to their Eſtabliſhment; and of which we have not, as yet, received in *Europe* any Account of theſe Tranſactions, that can be thoroughly depended upon; all we know of them is this, that the Conſpiracy having been diſcovered among the *Chineſe* at the very Juncture that it ſhould have been executed, the Governor was conſtrained to have Recourſe to the moſt ſpeedy Methods for ſecuring the Safety of the Inhabitants, and preſerving the City and Fortreſs of *Batavia* from falling into the Hands of the Enemy. It was in conſequence of this Neceſſity that all the Seamen were landed from the Fleet, and had the Plunder given them of the *Chineſe* Suburb, to encourage them to ſerve the Company effectually, which they did, by attacking and putting to the Sword the greateſt Part of the Conſpirators. By this ſpeedy and ſevere Proceeding, the City and the Dominions of the Company in the Iſland of *Java* were preſerved, but not without a vaſt Effuſion of Blood, which was followed by a formidable Rebellion, that was not ſuppreſſed for ſome time.

Such as favoured the Governor and Council of the *Indies*, pretend that all this was owing to the Wickedneſs and Treachery of the *Chineſe*, who, notwithſtanding the Mildneſs of the Company's Adminiſtration, had formed a deep and dark Conſpiracy, the Deſign of which was to extirpate totally the *Dutch* that were ſettled in *Batavia*, and Places adjacent. Such again as were Enemies to the Governor and his Council, attributed the whole of this bloody Affair to their Male-adminiſtration; and would have us believe, that the *Chineſe* and their Accomplices were driven into all they did by the moſt horrid Oppreſſions, in order to afford an Opportunity for thus falling upon and deſtroying them, and thereby putting it out of their Power to demand the immenſe Sums of Money which were due to them from ſuch as were induſtrious in bringing this Calamity upon them. Some again who pretend to ſpeak impartially, without Favour to the *Chineſe*, or Prejudice to the Governor, give quite another Turn to this Affair, and tell us, that he was ſo far from being an Enemy to the *Chineſe*, that he had been rather too much their Friend; and for the ſake of conſiderable Sums of Money and ſeveral rich Preſents that had been made him, granted them ſuch Liberties as were inconſiſtent not only with the Intereſt, but with the Safety of the Company, which were the true Cauſes of their endeavouring to ſubvert the Government, and to make themſelves Maſters of *Batavia*, and the Country about it, agreeable to the true Nature of the *Chineſe*, who are known and acknowledged throughout the Eaſt to be an inſolent, ungrateful, and perfidious People.

However this Matter might be, it made a prodigious Noiſe in *Europe*; and Baron *Imhoff*, the preſent Governor-General, was ſent over to *Batavia*, to ſettle the Concerns of the Colony and Company, and to make a very ſtrict Enquiry into this Affair. The Charter of the Company, when it was near expiring in 1740, was renewed only for one Year; but ſince that Time, all Affairs have been adjuſted in the *Indies*, and at home, to the Satisfaction both of the Company and of the Government, as ſhall be ſhewn hereafter. At preſent, it is our Buſineſs to ſhew, after giving ſo copious an Account of the Growth and Grandeur of this Company, how its Affairs are conducted, and what Form of Government it is, that has been able, not only to render a Body of Merchants formidable to the greateſt Monarchs in the Eaſt, but to acquire them Dominions very little inferior to any of theſe Monarchs, and Revenues, Armies, and Fleets ſuperior to moſt of them: This is a Thing ſo admirable in itſelf, and demonſtrates ſo clearly, what it is in the Power of an extenſive and well regulated Commerce to do, that I flatter myſelf my Reader will pay a very ſtrict Attention to the following Account of it.

16. Their whole Buſineſs in *India* is divided into Governments and Directions, after the following Manner: I. *Batavia* is the chief and capital, where reſide the Governor-General, and Council ordinary of *India*, to whom alſo the Governments and Directions are ſubordinate, ſending their Accounts to them, the Ballance whereof is entered into the Accounts-General of *India*, kept there; beſides which, there are ſeveral Places immediately under the Government and Direction of the Governor and Council of *Batavia*, *viz. Japon* a Chief-ſhip, *Tonquin* a Chief-ſhip, *Macaſſar* a Commandant, *Siam* a Chief-ſhip, *Bantam* a Factory, *Japara* a Factory, *Jambeè* a Chief-ſhip, *Pallambam* a Chief-ſhip, *Arrakan* a Chief-ſhip. II. *Amboyna* a Government, under which are ſeveral Iſlands, where they pay a yearly Penſion to the Inhabitants, not to ſuffer Cloves or other Spices to grow. III. *Banda* is a Government, and under it are ſeveral Iſlands, to the Natives of which they likewiſe pay Money yearly to deſtroy the Spice. IV. *Ternate* is a Government. V. *Malacca* is a Government. VI. *Zelon*, or *Ceylon*, is a Government, where they have many Factories, and all their Accounts are ſent to *Columbo*, the principal Place. VII. *Cochin* is a Government, and under it lies all the *Malabar* Coaſt. VIII. *Policat* is a Government, under which are the Coaſts of *Corromandel* and *Pegu*. IX. *Bengal* is a Direction, and under it all the Factories in that Bay: *Hughly* is the chief, from whence they ſend their Accounts to *Batavia*. X. *Surat*, another Direction, under which are many Factories. XI. *Perſia* a Direction, the chief Reſidence *Gombroon*, and under it are *Iſpahan* and *Baſſora*. XII. *Cape of Good-Hope* a Government, and under it the *Mauritias*, or Iſland of Prince *Maurice*.

To underſtand this perfectly, it muſt be obſerved, that Governments are when the Places are their own, Directions when they are under a foreign Prince, and have no Garriſon. *Batavia* excepted, no Government, Direction, or Command, hath Precedence of Place; but the Perſons in thoſe Places, and all other Degrees and Qualities, take Place according to their Seniority in ſtanding.

This Account ſufficiently explains the general Scheme of their Government, from whence we ſhall deſcend into Particulars, that it may appear, with how much Wiſdom, Juſtice and Prudence, all things are regulated by this Company, to prevent either Corruption or Confuſion, which though it is very probable they may not abſolutely do, yet it is very certain, they muſt do it in a great meaſure; for otherwiſe the Company's Affairs muſt have fallen long ago into a very diſtracted State; whereas we ſee them at this Day in as good a Condition as ever.

This I conceive to be eſpecially owing to that Nicety of Judgment ſhewn in adjuſting all their Salaries, and Allowances for Diet, to the ſeveral Qualities and Degrees of their Servants; ſo that none has either ſo little as to be pinched by Neceſſity, nor any ſo much as to ſet them above the Performance of their Duty, which is, generally ſpeaking, the Ruin of ſuch Governments as purſue a contrary Conduct: For the more eaſy underſtanding of this Point, we ſhall take their inferior Officers firſt, and ſo aſcend gradually to the Governor-General of the *Indies*. The Under-aſſiſtant, Scriver or Writer, is the loweſt Degree, and is chiefly ſupplied with Soldiers, taken out of the Guards, from nine to fourteen Guilders *per menſem*. Next is the Aſſiſtant at twenty Guilders *per menſem* Salary, and four Rix-dollars Diet. After him the Upper-aſſiſtant Book-keeper, or Secretary, from twenty-eight to thirty ſix Guilders *per menſem* Salary, and four Rix-dollars Diet. In the fourth Place, the Under-copeman, from thirty-ſix to forty-five Guilders *per menſem* Salary, and eight Rix dollars Diet. Then the Copeman from fifty to ſixty five Guilders *per menſem* Salary, and eight Rix-dollars Diet. Next to him, Upper-copeman, from eighty to one hundred and twenty Guilders *per menſem* Salary, and twelve Rix-dollars Diet: Some from the leſſer Chambers are ſent out at ſeventy-two Guilders *per menſem* Salary.

At *Batavia* and *Zelon*, where Proviſions are dear, they have thirteen Rix-dollars Diet. In the ſeventh Rank a Commandore has one hundred and fifty Guilders *per menſem* Salary, and twenty Rix-dollars Diet; Commandant, a new Title, ſomewhat leſs than Commandore. The eighth, Director, has two hundred Guilders *per menſem* Salary, and thirty Rix-dollars Diet. The Governor has the ſame, as alſo a Member of the extraordinary Council of *India*. A Member ordinary of the Council of *India* at *Batavia*, each of them, three hundred and fifty Guilders *per menſem* Salary, and one hundred Rix dollars Diet; and laſtly, the Governor-General of *Batavia* has one thouſand two hundred Guilders *per menſem* Salary, and two hundred Rix-dollars Diet; and every Time he goes to the Fleet, one thouſand five hundred Rix-dollars Gratuity, which has been uſually done upon a Fleet's Departure for *Europe*: But this General has not taken it for ſome Years paſt.

All Perſons in the Service, whether Merchants, Divines, civil Magiſtrates, Soldiers or Seamen, are ranked in their Degrees, and take their Places accordingly. The General is allowed Wine, and all other Liquors and Proviſions, out of the Company's Warehouſe, without Limitation. All others, down to the Aſſiſtants, are allowed monthly Liquors, Spice, Oil, Wood, Rice, Vinegar, Candles, *&c.* according to their Quality, very large. The Upper-copeman's Allowance is twenty Canadars of *Spaniſh* Wine *per menſem*, beſides Mum, white Wine, and other Liquors; twenty-four Pounds of Wax for Candles, Corn for Poultry, Rice for Slaves, *&c.* ſo that the Diet-money allowed them is only for freſh Proviſions.

Soldiers are ranked in the ſame Manner, *viz.* firſt a common Soldier, or private Centinel, is from nine to fourteen Guilders *per menſem*, as the Under-aſſiſtant. Next, Serjeant's Pay and Diet as the Aſſiſtant. Then Enſign's Pay and Diet as the Under-copeman. After him Lieutenant's Pay and Diet as the Copeman. The fifth Captain's Pay and Diet as the Upper-copeman; and the ſixth Major's Pay and Diet as the Commandore. Military Perſons give place to the civil of the ſame Rank, *viz.* a Commandore precedes a Major, and Upper-copeman a Captain, and a Copeman a Lieutenant; but a Major precedes an Upper-copeman, a Captain a Copeman, and a Lieutenant an Under-copeman. There are three Majors in *India*, one at *Batavia*, one at *Ceylon*, and one at *Amboyna*, or *Banda*. They aſſiſt the Governor in military Affairs, and have the Command over all other Officers and Soldiers, but have no proper Company of their own. There are not Captains over every Company, but one over two, three, four, or five Companies; every Company has Lieutenants and Enſigns, and they often make proviſional Officers, who, upon ſome Merit in Service, do attain to the Pay of ſuch Places.

Seamen are ranked in the ſame Manner, *viz.* firſt a common Seaman, from nine to fourteen Guilders *per menſem*, as a common Soldier; next third Mate, Gunner, Boatſwain, and Steerman, from eighteen to twenty-four Guilders *per menſem*, and the Aſſiſtant-carpenter's Wages from forty to fifty Guilders *per menſem*. The Under-ſteerman, or ſecond Mate, from twenty-four to thirty-ſix Guilders per *menſem*, as the Upper-aſſiſtant. After them, Upper-ſteerman, or chief Mate, from fifty to ſixty Guilders *per menſem*, in the Under-copeman's Rank. The fifth are Skippers, from ſixty to one hundred Guilders *per menſem*, in the Copeman's Rank; and the ſixth, Commandores from one hundred to one hundred and fifty Guilders *per menſem*, beſides which, they have the Ship's Allowance for Proviſion, and, when in *Batavia*, they have Road-money paid them every Month for freſh Proviſions and

Fruit; but in other Roads, they are ſupplied with theſe things from the Factories on Shore. They have none who have the Title or Pay of Captain at Sea, and the Commodores are very few, ſometimes not more than one in *India*.

The Miniſters Pay and Allowance ſtand thus, *viz.* firſt the Predicant, or Preacher's Pay and Diet, the ſame as the Upper-copeman's. The ſecond Dominees, or Viſitors of the Sick, twenty-four Guilders *per menſem*, as the Aſſiſtant. The Miniſters are all ſworn not to write of, nor intermeddle with any Matter relating to the Affairs of the State, or Commerce. In all Governments they are allowed a Preſident, and in *Batavia* two or three to ſpare, in caſe of Mortalities. In all Directions they have no Dominees, only read the Scriptures, and printed Forms of Prayer, Mornings, Evenings, and Sundays. With them the Surgeon's Pay is from forty to fifty Guilders *per menſem*.

17. In all Qualities from Under-aſſiſtant to Upper-copeman, they generally ſerve five Years, and ſome but three, as they agree; which Term being expired, if they pleaſe, they may quit the Service; but they are uſually continued, and upon their Petitions, if they are deſerving, and the Company's Occaſions require, the Governor and Council entertain them again, to the next Degree they ſerved in before, and for ſuch Terms for Salary, *&c.* as they find them deſerving within the ſettled Salary of each Degree; but on any Merit in Service, they are often preferred from one Degree to another, though they have not ſerved ſix Months in a Station; ſo that upon Account of Merit, ſome have riſen in two or three Years from Aſſiſtant to Under-copeman, and others, in as little Time, from Under-copeman to Upper-copeman; in this they have reſpect to Succeſſion, as if a Chief, or Second of a Factory dies, and the Third performs the Buſineſs of the Place to Content, tho' he be but a Book-keeper, for that Service he ſhall be an Under Copeman, and Chief of the Place; and as he gives further Content, a Copeman in one or two Years more. Married Perſons receive all their Pay in *India*, and the unmarried but half theirs at an Over-rate: As at *Batavia*, the Rix-dollar is valued at ſixty Stivers, which is worth but forty-eight, and at *Policat*, the Pagoda is valued at five and an half Guilders, which is really worth but four and half; but this is in a Way of Regulation, as they ſay, upon Complaint of it to the Governor.

The Company find all their Servants Accommodations for Lodgings, for which, and Warehouſes, they have ſpacious Buildings in all their Factories. All, or moſt Perſons ſent out of *Europe*, are of the Qualities from Aſſiſtant to Upper-copeman, ſeldom in a higher Degree; ſometimes they may be of the extraordinary Council: But ſuch, and all others, are left to the General and Council at *Batavia*, to be diſpoſed of in Employments according to their Qualities or Abilities, who give them Preferment as they merit. Such Perſons as are of Capacity, may gradually riſe by Time of Service to the Quality of Upper-copeman, but they muſt ſtand there, and cannot riſe higher, till they are made Commandores. When Directions or Governments fall vacant, an Upper-copeman, capable of being made Governor, Director, or Commandore, generally ſucceeds; and ſome have been fifteen or twenty Years Upper-copeman, before they have been put into any of thoſe Places: Some ſtand there, and riſe no higher, and many never come to that, but remain in lower Degrees, according to their Capacities.

All Perſons in thoſe Degrees or Qualities, precede one another, according to their Seniorities and Standings in the ſame Degree, or that are of the ſame Profeſſion. As the firſt Aſſiſtant precedes all others that are made after him; ſo likewiſe a Copeman made this Month precedes him that is made a Month after; but the Profeſſion of the Merchant (or as they commonly term it, the Pen) hath the Preference of all others, and he that is an Upper-copeman in that Quality, precedes all others, whether Preachers, Soldiers or Seamen (as is ſaid before) tho' they may be his Seniors in the ſame Degree.

All theſe Salaries and Wages for Merchants, Soldiers, Seamen, and others, go on for their outward bound and home Voyages, and every one has a Copy of his Accounts out of the Book of Wages, every Year, which he keeps, or carries Home with him, or ſells to another; and when he returns to the Chamber from whence he was ſent, he is punctually paid the Ballance of his Account, together with what is due for the Term of the Voyage; and ſuch as have ſerved out their whole Time, and deſire to be Freemen in *India*, ſell their Accounts, or ſend Letters of Procuration Home, upon Sight of which they are paid; ſo that neither the Company, nor their Servants, have ever any Trouble in adjuſting their Accounts.

Theſe Freemen are ſuch as have ſerved out their Time, and are then cleared of the Company's Service, and ſuffered to live in the Country, or ſuch as of late have been permitted, or encouraged to come out of *Europe*, on their own Accounts. They are always obliged to have Families, and live in garriſoned Towns, and in their Plantations on the Spice Iſlands, where they are allowed to trade too and fro in Proviſions of all Sorts, and other Commodities, where the Company do not trade, and ſometimes where they do trade, with the General's and Council's Licence, even in the Company's Commodities: This being their Policy, that the Benefit of ſome Trades may not be loſt, but reſerved to the Company, when they are ſo conſiderable, as to be worth their minding, or will be at the Charges of a Factory. All Freemen perform the publick Offices of the Towns, and take their Turns to watch and ward as in the *Netherlands*, none excepted.

18. The firſt ordinary Council of *India* is choſen by the *Bewinthebers*, or *Directors*, out of ſuch of their Servants, as have ſerved the Company as Governors, or Directors, and none under thoſe Qualities; by which means their head Council conſiſts of Men of Eſtates, and Experience in the Buſineſs of all Parts of *India*. The extraordinary Council are alſo nominated by the *Bewinthebers*, and they, when they are at *Batavia*, ſit with the General and Council, but have no other Vote than one of Advice. Several of the Directors and Governors are of the extraordinary Council, and there is a late Order, that three of the extraordinary Council ſhall always reſide at *Batavia*. By another Order of late, all of the ordinary Council are to reſide there likewiſe, and not to remove from thence, but upon Buſineſs of great Importance; and the General, and Director-General, are not to remove upon any Occaſion whatever.

There are often Boxes ſent out of *Europe* with private Directions, which are ſealed, and ordered not to be opened but on extraordinary Accidents, as in caſe of the General's Deceaſe, or other Occaſions of great Moment, which keeps the great ones in Awe of each other. The General hath Power in a particular Commiſſion to himſelf, to ſend Home any one Perſon of the ordinary Council when he thinks fit, that ſhall not behave himſelf well towards him, and to take to himſelf what Salaries, and other Allowances he thinks proper, which the great *Matzuyker* cauſed to be read on ſome Claſhing of the Council at *Batavia*.

The General, and all the ordinary Council, the Secretary, the Major, the Upper copeman, called the two chief Factors, and the Upper copeman, who keeps the general Books of Accounts, live within the Fort, or Caſtle, with their Wives and Family, in Apartments fitted according to their Offices and Places. The General and Council are ſo near together, becauſe of all Letters being opened and read in the Council, that often ſits in an Evening, after Prayers, and never miſſes upon *Sundays*, for an Hour to diſpatch ſmall Buſineſs, Petitions and Complaints, and twice a Week conſtantly, *Tueſdays* and *Fridays*, at Four o'Clock in the Afternoon, about managing the Company's Buſineſs. The Secretary has good Accommodation, and large Offices to write in; the Major lives in the Fort to receive Orders from the General, and to aſſiſt him in the Government of his Soldiers, and the two chief Factors are near the Second, or Director General, who has the moſt laborious Employment, having the Care of all Ships, Goods, Treaſures, and Stores, and propoſes all Voyages and Cargoes.

Theſe two Upper-copemen, whom they call Factors of the Caſtle of *Batavia*, are his Aſſiſtants, to examine Accounts, and Advices, and thereupon draw up Liſts, and

Calculations, of the Sorts, Qualities, and Quantities, of the Goods, that are ſold at any Place, and ſet down whether they increaſe or diminiſh, with the Loſs and Gain thereon, which Notes they ſend to all the Factories where theſe Goods are provided. The chief Book-keeper lives in the Fort, becauſe all Regiſters and Books are kept there, and the Offices for Accounts muſt be there ſtanding. Every one of the ordinary Council of *India* has his particular Charges and Employments allotted to him, wherein he is moſt experienced, *viz.* one is ordered to read, examine, and anſwer all Letters and Papers from the Government of *Ceylon*. Another the Letters, *&c.* of the Governments of *Amboyna*, *Banda* and *Ternate*; another, the Coaſt of *Coromandel* and Bay of *Bengal*; another the Directorſhip of *Surat* and *Perſia*, and another the *Cape* and *Mauritias*; the General only writes Letters to the Company in *Europe*.

Beſides which, they have other particular Employments and Places of Truſt and Importance at *Batavia*. I. The General propoſes and concludes in Council, and directs all Matters of Government to the Council, and ſuperior Officers. He is ſworn to be faithful to the States in his Office, and that he will not prefer any one in the Company's Service, for Fear, Favour, or Affection, but only ſuch as are moſt faithful, moſt able, and moſt fit to manage the Buſineſs for the Company's Advantage. II. The Director-General, as aforeſaid, propoſes the Employments and Cargoes of all Ships. He ſells, and orders the Diſpoſal of all Goods, Stores and Proviſions, has the Charge of the Treaſure and Caſh, and orders the Receipts and Payments of Money. III. Another is Preſident of the Chamber of Orphans, and the Council, his Aſſiſtants, are half Company's Servants, and half Burghers, whoſe Office and Truſt are the ſame as in the *Netherlands*. They ſit once a Week in Council. IV. Another is Preſident of the College of the Rate of Juſtice, who is always a Civilian. He gives Judgment in all Caſes civil or criminal, between the Company and their Servants, or the Burghers. In this Court, the Company's Servants only are of the Council, none of them under the Quality of a Copeman, and they are uſually Advocates, or ſuch as have been bred up to the Civil Law. V. Another is Preſident of the College of Skepen and Burgomaſters.

He judges in all Caſes, civil, military and criminal, between the Burghers and others. The Counſellors, or Judges, who ſit with the Preſident at this Court, are three Upper-copemen in the Company's Service, and three of the chief Burghers. Both theſe Courts ſit twice a Week, conſtantly, and oftner, as occaſion requires, in the Stadthouſe, or Town-hall. All of the ordinary Council are ſworn to be true to the General and the States, to prefer none for Fear, Favour, or Affection, but the fitteſt and ableſt Perſons to the Offices in their Particular Diſpoſals. Below the Second, or Director, is no Precedency of Place, but Employments or Offices are appointed to thoſe who are the fitteſt for them. The Secretary of the Council at *Batavia*, is a Perſon of great Ability and Experience, of the Quality of Upper-copeman; he takes Place next to the extraordinary Council, and has the Pay and Allowance of a Commandore. The minor Votes are always carried by the major in Council, the Fiſcal hath a double Vote. Upon ſigning, none may enter any Exceptions, except the Matter concluded be expreſsly againſt the Orders of the Company, and then they may enter Diſſent, giving that for the Reaſon.

Upon extraordinary Occaſions, which require Secrecy, a Governor, or Director, may call a Council of any two or three Counſellors, and may act according to their Reſolutions. All Perſons of the Quality of Copeman, and Upper-copeman, as alſo Captains and Lieutenants, are capable of being of Council in all Governments and Directions, except *Batavia*. The Seconds of Governors and Directors, are chiefly Copemen, and the Chiefs of ſubordinate Factories under Governments, are commonly Copemen, and Under-copemen; but if it ſo happens, that one of a higher Degree, or Quality, comes to a Place where one of a lower Degree is Chief, he, of the higher Degree takes Place, and gives his Advice in the Company's Buſineſs, but does not govern or direct in any Affair without ſpecial Commiſſion.

In all Governments and Directions, the Conſultations are entered in Books, and ſigned by the Council. The Offices for the Secretary and Accountants, and the Warehouſes for the Company's fine Goods and Treaſure, are built in the Forts, and Houſes, or Factories, and thoſe who officiate in them, muſt dwell there. In ſubordinate Factories, they keep no Conſultation-books, only Copybooks of Letters, Accounts and Diaries. All Letters and Orders from *Batavia*, are ſigned by the General and Council, and thoſe to *Batavia*, muſt be ſigned by the Governors, or Directors, and their reſpective Councils; but all Letters and Orders from Governors and Directors to ſubordinate Factories under them, are ſigned only by the Governor or Director ſingly. The Caſh at *Policat*, is at the Diſpoſal of the Governor, to be put into the Hands of an Upper-copeman, that ſhall be on the Place; and the Sorting of Cloth is done by the Governor, Second, and others, who are of the Quality of Copeman, and Under-copeman, every one ſetting down his Opinion of the Price of the Goods when ſorted.

They have Fiſcals in their Governments, who are under an Oath to diſcover and ſeize all forbidden private Trade, and detect what elſe may be done to defraud the Company. They are uſually of the Quality of Copeman, or Under-copeman, and ſeldom continue longer than three Years in that Office, except at *Batavia*, where they have two principal Fiſcals, of the Quality of Upper-copemen, who continue many Years in that Employ. One of them is called Advocate-fiſcal; he makes Enquiry, and takes Cognizance of all Faults, Frauds and Miſdemeanors in the Company's Service, in all Parts of *India*, makes and maintains the Proceſſes, and has half of what is recovered thereon, the other half goes to the Company, who gives one Third of it to the Poor, after the Proceſs and Condemnation is paid, before the Preſident of the Council of Juſtice; ſo that the Governors, Directors, *&c.* are not concerned in the Diſcovery of any private Trade.

The Company ſends every Year printed Papers of the News and Affairs of *Europe*, which are diſperſed over all their Factories in *India*, by which they are inſtructed in the Intereſt and Concerns of the ſeveral Powers and are directed to behave themſelves accordingly to all *European* Nations in *India*. Alſo they ſend Abſtracts of the Sale of their Goods, and the Loſs and Gain thereon in *Europe*. It is very eaſy to obſerve, that all theſe Regulations are calculated for the Improvement of the Perſons in the Service of the Company, for enabling them to diſcharge their Duties punctually and perfectly, and with ſuch a Meaſure of Knowledge and Underſtanding, as may fit them for whatever Places they may be called to ſerve in.

It is not eaſy to conceive, what mighty Effects flow from ſuch wiſe and juſt Regulations; what Order and Harmony they may beget, and how eaſily all Things are managed, where ſo much Care is taken, that every Man ſhall be acquainted with the Importance of his Station, and with a Probability of his bettering his Circumſtances by his diſcharging his Functions with Diligence. It is by ſettling theſe Orders, and taking care they ſhall be conſtantly carried into Execution, that we find the *Dutch* are never at a Loſs for Men fit to be employed on any critical Occaſion, as Ambaſſadors, Plenipotentiaries, and ordinary Reſidents in the Courts of *Indian* Princes, whereas other Nations, that carry on other Trade in that Part of the World, are at a Stand in this reſpect, and in all ſuch Emergencies, are forced to take ſuch as come to Hand, or which is worſe, ſuch as puſh themſelves forward, and miſtaking Vanity for Talents, get into Employments only to expoſe themſelves, and thoſe under whoſe Authority they act.

It is a received Opinion, and I believe founded on Reaſon, that the Capacities of Men are much alike, and that where one makes a Figure by dint of what is called Genius, there are a hundred become able Men from Diſcipline and Experience. It is therefore extreamly commendable in the *Dutch*, that they take ſo much Pains to propagate real Knowledge among ſuch as are in the publick Service, and that they do not content themſelves with barely qualifying their Under-officers for the Diſcharge of the Places they are in, but oblige them likewiſe to take Pains to fit themſelves for more important ſervices. It is one Thing to read News-papers for Amuſement, and another Thing quite to oblige People to read them for Inſtruction; and it is very eaſy to conceive, that a Perſon in the Indies, who has a good general Notion of the Affairs of *Europe*, and of the Situation Things are in there, will have vaſt Advantages over another Perſon of equal Abilities, who has never turned his Thoughts that Way, but has lived all along in an Opinion, that if he did his Buſineſs in the Counting-houſe, his Superiors had no farther Title to the Diſpoſal of his Time, but that he was at full Liberty to employ it in ſuch Amuſements or Diverſions as beſt ſuited his Humour or Diſpoſition.

But to bring theſe Reflections to a Point, and not to detain the Reader too long upon ſo grave a Subject, I ſhall finiſh them with obſerving, that whatſoever Company takes Care to give its Servants true Notions of Merit, rewards and encourages Merit, and leaves no other Road open to Preferment but Merit; will be always ſure to have more capable Servants, and will conſequently have its Affairs better carried on than any other Company, in the Management of whoſe Concerns Inclination, Intereſt, or Chance, governs all Preferments. It may be ſaid that theſe are juſt and general Obſervations, very eaſily made, and which never will be diſputed. The Queſtion however is not where theſe Rules are owned and admitted, but where they are recommended and practiſed. Since we took Occaſion to enter upon theſe Remarks, not from the general Principles of the *Dutch* Nation, but from the ſettled and invariable Regulations of their *Eaſt-India* Company, which have the Force of Laws to thoſe in their Service.

19. The Government, Order, and Proviſion for their Ships and Fleets runs thus, *viz.* all their Ships are the Company's own, and the Men belonging to them are all in their Pay, ſworn to ſerve them either by Sea or Land, as Occaſion ſhall require. They have two Perſons, who have the Stile of Admirals, and are of the ordinary Council of *India*. For the Care of their Shipping at *Batavia*, they have one called Equipage-maſter, who is of the Quality and Pay of an Upper-copeman, a ſeafaring Man, and vulgarly called a Commandore: He hath the Care of fitting all their Ships, and is continually viſiting them in the Road, if Occaſion requires, and ſupplying them with what they want.

There is a ſmall Iſland, about three Miles from *Batavia*, where they have a Fort, which ſerves them as a Store-houſe for all Manner of Neceſſaries for Ships, under the Charge of a Maſter-Shipwright, who has alſo Command of the Fort and Iſland. He is of the Quality of Upper-Copeman, and has large Pay and Allowances. When they ſend out a Fleet of War on any Expedition, they make a Merchant of the Quality of Upper-copeman, and ſometimes of the extraordinary Council Admiral or General, who has a Council of Merchants and military Officers to aſſiſt him, as Occaſion requires. The Admirals of the Fleet that go from *Batavia* to *Europe*, are ſuch as have ſerved the Company as Governors, Directors, Commanders, or Upper-copemen, and are willing to go home, they have their Salaries allowed them till their Diſcharge in *Europe*; and if there be none that return of their own Choice, they appoint at leaſt a Copeman to command, who comes back again, if he thinks convenient.

As to their Admirals out of *Europe*, the Flag is worn by Turns; *Amſterdam* Squadron carries it three Years, and the *Zealand* Squadron every fourth Year. The *Amſterdam* having two Parts of the Stock, the other leſſer Chambers add theirs to it, and the *Zealanders* have one Quarter of their own. The Merchant who is ſent Admiral, muſt either take his Paſſage on the *Amſterdam* or *Zealand* Squadron. If a Copeman, or Under-copeman goes from Port to Port on any Ship, they have the Command of her, and alſo of the Fleet or all Ships in Company, by the Company's ſettled Order in their Articles. When there is a Fleet together under the Command of a Commandore, the Council is to conſiſt of Copemen and Skippers. When a Ship is ſingle, the Council is to be of Copemen, Skeeper, Under-copeman, Book-keeper, and Steerſmen, and they are always to ſteer their Courſe by the printed Directions, and to ſet off their Work every Day upon Charts, which are delivered up the very Day when they come to *Batavia* or *Holland*.

There is an Under-copeman, or Book-keeper in every Ship, who keeps an Account of the Ship's Expences, as Stores, Proviſions, and Mens Wages, in the Nature of a Purſer, and they are to ſee the Proviſions ſo given out that none be ſpoiled. Theſe take place as they are capable of Preferment in their Factories by their Time of Service, and they are often taken out of Factories where they are wanted, and others put in their Places. If he that is upon a Ship, as a Book-keeper, be but an Aſſiſtant, he takes Place of the Steerſmen, or next to the Skeeper, by reaſon of his Office, or, as they in Reſpect, term it, the Pen. All Chiefs of Factories, *&c.* have free Power to diſpoſe of their Ships and Men, while they are under their Chief-ſhip, and, as Occaſion requires, in the Company's Service. They may take out Men, Ammunitions, Proviſions and Stores, though ſuch Ships come there caſually, through Accident or Neceſſity. Thus every thing relating to this Subject, is ſo fully and clearly regulated, that Doubts or Difficulties rarely ariſe.

20. At *Batavia*, and all other Governments, they have a Chamber of Accounts for Orphans and Overſeers of the Poor thus provided: There is a Preſident and Maſter of the Chamber of Orphans at *Batavia* of the ordinary Council, who has for his Council half the Companies Servants of the Quality of Copemen, and Upper-copemen, and half of the beſt Burghers, beſides a Secretary, and other Aſſiſtants. They ſit once a Week, and order the Diſpoſal of all Orphans and deceaſed Mens Eſtates, as they think fit. At *Policat*, and all Governments under *Batavia*, they have but two Perſons of the Chamber of Orphans, and a Secretary to them, all Company's Servants. The Chambers in thoſe Governments are not accountable to *Batavia* or *Europe*; nor do they ſend Copies of their Books of Accounts to any Place, but always keep them at *Policat*, &c. and the Eſtates of Perſons who deceaſe in any Place under that government, are under the Charge of that Chamber, whoſe Wills, Inventories and Accounts, are there regiſtered; for which purpoſe they have a particular Chamber in the Fort.

They muſt keep plain and fair Books of Accounts, Journals, and Ledgers. At *Policat* the Maſter of the Orphans Chamber, is every three Months to ſhew the Ballance of the Books to the Governor. Thoſe appointed for this Office do continue in it two Years or longer; and when one goes out the other muſt ſtay a Year to inſtruct the next Comer, though his two Years be out. They are ſworn to deal juſtly, and to keep ſecret the Concerns of the Chamber.

The Secretary of the Office muſt give three thouſand Pagodas Security for the Performance of his Truſt, and be reſponſible for all Goods ſold at Outcries, for which he receives Three *per Cent.* upon the Account of the Sale; and by reaſon he is reſponſible, he may deny any Man to bid or buy, whom he thinks not ſafe to truſt. The Secretary alſo enters the Wills, and Inventories, and poſts the Journal, which is kept by one of the Maſters, and takes Care of the Papers that belong to the Office. The Chamber of Orphans may call whom they will into Council to adviſe with in difficult Matters; and no Perſon may deny to come and ſit with them, though it be the Governor himſelf. The Council is allowed Two and an Half *per Cent.* out of the Eſtates of the Deceaſed, for what is received upon the Sale of Goods, but nothing on Money left in Caſh; which Two and a Half is equally divided betwixt the Preſident and all the Maſters; beſides which they have each Money for a Gown yearly, which is charged on the deceaſed Perſon's Eſtate. If any Man or Woman dies, leaving Children under Age, the Chamber of Orphans take Care of the Eſtate, and provide for their bringing up, till they ariſe to the Age of Twenty-three Years, and then they receive what their Parents left them, with Intereſt, and the Increaſe thereof. If the

Parents of the Children have any Eſtates in *Europe*, the Chamber of Orphans where ſuch Perſons die, writes for the Effects to be ſent to them, which is accordingly done.

The Money the Chamber of Orphans pays into the Company's Caſh at *Batavia*, brings in Nine *per Cent.* and it is often let out to Freemen and others at Twelve *per Cent. per Annum*, upon good Security: But at *Policat* it is uſually put into the Company's Stock, at Six *per Cent. per Annum*. If a Perſon dies and leaves no Will, or Relation in *India* to inherit, the Chamber of Orphans takes Care of the Eſtate, and gives the deceaſed Man's Account current Credit for the ſame; and there it remains till the right Heir demands it. If any Perſon dies with a Will, and leaves his Widow in Truſt for the Children, tho' their Mother, the Chamber of Orphans may, if they pleaſe, require the Eſtate at her Hands, and keep it for the Children. And if they do allow the Mother to keep the Eſtate and the Children, they always take a Copy of the Will, and an Obligation from the Mother for the Eſtate.

The Chamber of Orphans may keep the Eſtate in their Hands, and manage it as they pleaſe; but, for the better Security, it is uſually put into the Company's Hands, at the Intereſt before-mentioned; and they have the Company's Obligation for it. If any Perſon dies, leaving a Will, and therein does not give ſuch a Proportion of his Eſtate to his Children as the Law requires, they will not allow of the Will, but require a full Part for the Children. If a Man dies in the Company's Service, the Official is not to touch his Papers; nor is the Chamber of Orphans to admit of any Diſcovery of his Concerns to the Fiſcal. Again, if any Man dies in the Company's Service, and they owe him Money for Wages, the Chamber receives it, and enters it to the Credit of the Deceaſed. The Company, beſides One third of their Half of the Fiſcal's Confiſcation, allow alſo Fines on Offences; and the Confiſcations of the Eſtates of Men executed, for the Poor. There are many Overſeers and Maſters of the Poor at *Batavia*. At *Policat* they have but two, and thoſe not of the Maſters of Orphans, but others. They have Cognizance of all poor Chriſtians under the Government, whether they be *Dutch*, *Portugueze*, or others, and take Care for their Relief, by making Collections in Churches every *Sunday*, and Diſtributions according to their Number and Neceſſities.

The Poor has always a conſiderable Stock before-hand, which has been gathered from the Confiſcations of private Trade, and charitable Gifts. This Stock they alſo let out to the Company upon Intereſt, which they conſtantly receive, and employ as is found needful; and tho' the Intereſt of the Stock be ſufficient to maintain the Poor, yet they never neglect the weekly Gatherings in Churches, to increaſe the Stock as much as they can. For, ſay they, it may ſo happen, that by great Wars and Loſſes, many may be maimed, made Widows and Fatherleſs, and then the Principal may not be enough to maintain them. The Overſeers, or Maſters of the Poor, muſt keep a fair Book of all Receipts and Payments, that is, an Account of Caſh, and an Account of what's paid into the Company's Stock, at Intereſt, with a Roll of the Names of all Perſons to whom they give Alms, and what they give to every one. At *Batavia* there are Collections for the Poor every *Sunday*, Morning and Evening, in all their Churches.

When the ingenious and intelligent Reader ſhall have peruſed and conſidered this Scheme of *Dutch* Policy in the *Indies*, I am perſuaded that he will very eaſily account to himſelf, for their having raiſed ſo extenſive and ſolid an Empire in this Part of the World. He will ſee that they excel all other Nations in the *Indies*, not from Accident, Fortune, or a Concourſe of lucky Incidents, but from a very wiſe and well diſpoſed Eſtabliſhment, and a conſtant Attention to the Principles on which it is founded. They will ſee, that how much ſoever the *Dutch* may be inclined to a Republick, and how ſteady ſoever in their Notions of a Common-wealth, yet they have made no Scruple of departing from thoſe Sentiments in the *Indies*, for the ſake of complying ſo far with the Genius of the People in that Part of the World, as to eſtabliſh ſuch a Power in a ſingle Perſon, as may contribute to keep up at once the Grandeur and Authority of the Company, and facilitate the Direction of their Affairs. But if the Governor-General of *Batavia* has the Splendor, Revenues, and Power of a Prince, he earns them very dearly, by that perpetual Application to Buſineſs, which is required from him, and which he has it not in his Power to ſhake of: The ſame Thing may be ſaid of the Director-General, and of the Members of the Council of the *Indies*; if they have great Appointments, they have a great deal of Buſineſs, and if their Power be large, they are obliged to give a very ſtrict Account of the Manner in which it is uſed.

Theſe Examples are of inexpreſſible Conſequence, ſince they oblige all their Officers in their ſeveral Stations, to a conſtant and diligent Attendance, from whence they can never hope for any Diſpenſation, when they ſee ſuch as are at the Head of Affairs, tied to a ſtricter and more laborious Attendance than themſelves. The due Care that is taken, that every Man ſhall have a juſt Satisfaction for his Pains, a proper Subſiſtance, and a Certainty of receiving whatever is due to him, without Difficulty or Delay, and without needing the Aſſiſtance or Favour of any Man, muſt be acknowledged a Circumſtance of infinite Importance. The Frugality ſhewn in their military and naval Eſtabliſhments, and the Care taken to preſerve a due Dependance on the civil Government, are Steps worthy not only of Attention but Imitation, becauſe they are equally calculated for increaſing and extending, as well as preſerving and ſecuring the Dominions and Trade of the Company. The Tenderneſs ſhewn for Orphans, and the Security that this affords to private Men, that their Children ſhall certainly enjoy the Fruits of their Labour, is both a Spur to Induſtry, and a Means of promoting Marriages and Settlements, both of the utmoſt Conſequence to their Affairs in the *Indies*, as it ſerves to increaſe their Force, without draining their Mother-country. Their Regulations for the Poor are copied from thoſe in *Holland*, and highly laudable they are, in this reſpect; I mean, in not ſuffering any Diſtance of Country or Climate to deprive their People of their Birth-rights, which is the Benefit of their Laws, and to this I ſuppoſe it is owing that the *Dutch* are obſerved never to loſe, or even to impair their Affection for their native Country, which they particularly diſtinguiſh, by the tender Appellation of Fatherland, and to which therefore all their Cares are confined, and in which all their Acquiſitions center.

To be the better ſatisfied of this, and to bring this Section to a Concluſion, by what moſt of all concerns us, the Knowledge of that Profit which accrues to them by the *Eaſt-India* Trade, we ſhall next conſider the Oeconomy of this flouriſhing Company at Home, and demonſtrate the Means by which all the Proprietors receive the cleareſt Satisfaction, that the whole Profits upon their Capital, are fairly divided out to them, and are not put into the Pockets of ſuch as are intruſted with the Direction of the Company's Affairs, as alſo how the State preſerves ſuch an Influence over the Company, as is requiſite for its own Security; and finally, how an Eſtimate may be made of the Wealth brought into the *United-Provinces* by this Company, from the Time of its original Eſtabliſhment to this Day.

21. The great Power, prodigious Wealth, and vaſt Importance of this Company to the *Dutch* Republick, has occaſioned a great Variety of Treatiſes on its Form, Conſtitution, and Manner of Government; ſo that it is very far from being an eaſy Taſk to reduce the Subſtance of what they had delivered within the narrow Bounds which we are obliged to keep. To begin as methodically as poſſible, we will firſt ſtate the original Stock of the Company, and the Proportions in which it was advanced, and which have never been varied ſince that Time: A Stroke of Policy of infinite Conſequence to them in the Management of this extenſive Commerce.

The Capital Stock of the *Dutch Eaſt-India* Company.

	Florins.
Amſterdam	Florins.
Zealand	3,674,915
Delft	1,333,882
Rotterdam	470,000
Horn	177,400
Enchuyſen	266,868
	536,775
In all	6,459,840

Thoſe ſix having advanced this Money, they ſettled a Chamber in each of the Towns (that of *Zealand* being in *Middleburg*) from whence they chuſe the ſeventeen Deputies, who direct the Affairs of the Company. They meet four Times a Year ſucceſſively at *Amſterdam*, for the Affairs of the Company, and twice at *Middleburg* alternately; but not at the other Towns. Theſe Deputies are the Sovereigns of this illuſtrious Company, yet under the Authority of the *States-General*. The ſeventeen Directors are choſen in the following Manner; eight by the Chamber of *Amſterdam*; four by that of *Zealand*; *Delft*, *Rotterdam*, *Horn*, and *Enchuyſen*, one each; and the *Maes*, *Middleburg*, and *North-Holland*, chuſe one by Turns. Theſe ſeventeen Directors govern the Company, and repreſent the Sovereignty of the whole Body by Plurality of Voices. They regulate all Affairs of Conſequence, as the making of Counſellors, Captains, Lieutenants, and equipping of Ships, the Sale of the Goods, the Diviſion of the Profits, and all the particular Chambers muſt conform themſelves to their Orders. They likewiſe appoint the Time for the Sale of the Goods, one half of which is ſold in the Chamber of *Amſterdam*, a fourth in that of *Middleburg*, and a ſixteenth in each of the other four Chambers, at the Time by them appointed, to the higheſt Bidder.

But beſides theſe ſeventeen Directors, each of the Chambers have more belonging to the ſame Body: Thus *Amſterdam* has ten more, beſides the eight ſent to the ſovereign Court; and *Haerlem*, *Leyden*, *Utrecht*, *Dort*, and *Tergoe*, have each of them one there, as have the Provinces of *Guelderland* and *Friezeland*, and *Zealand* likewiſe, beſides their four Directors have eight or ten more from other Towns of the Province. All the Deputies are to give their Advice in their reſpective Chambers for the Good and Advantage of the Company; and when any of the Deputies die, the Towns to which they belong name three others in their Stead, out of which the Magiſtrates chuſe one. This Committee meets twice a Week, and change their Preſident each Month, ſo that every one preſides in his Turn. There are two Advocates belonging to the Company, who make their Report of what is reſolved upon to the *Indies*; upon which the Officers of the Company there form their Reſolutions, and iſſue their Orders. There are eight Deputies for the Affairs of the Marine, War, and building of Ships; four to inſpect their Magazines, and the Goods that are ſent to and come from the *Indies*; four which take care of the Money which the Company pays and receives; and the reſt take care of the Accounts, and other Affairs relating to Order and Juſtice, which is done to the meaneſt Mariner as well as to the greateſt Officers.

The Whole, though it ſeems at firſt ſight in a manner independent of the State, is however kept in great Subordination, by means of the wiſe Regulations made in eſtabliſhing the Directors, and the Care taken, that not any two of them ſhall be related to each other, which prevents Combinations, and all thoſe Practices by which publick Eſtabliſhments are converted into private Jobbs, and what ought to redound to the common Benefit of a Nation, conveyed into the Pockets of a few private Men. Once in three Years the *States-General* demand and receive a ſtrict Account of the Company's whole Tranſactions, in order to be ſatisfied that they keep within the Bounds of their Charter, that they do Juſtice to their Proprietors, and that they manage their Trade ſo as that it may not be prejudicial to the State; which Regulation may be juſtly eſteemed the principal Cauſe, that hitherto the Affairs of this Company have been ſo perfectly well conducted.

In order to this Examination, or Controul of the Company's Accounts, the ancient Practice was for the *States-General* to name a Committee of their Members to go to *Amſterdam*, and there examine the Books of the *Eaſt-India* Company upon the Spot, which took up a conſiderable Time; and during that whole Space, this Committee from the *States* had their Charges defrayed at the Expence of the Company. In the Year 1728, the Company thought fit to make a Repreſentation to the *States-General*, ſetting forth the Inconveniencies and unneceſſary Charge this Method occaſioned, and therefore praying, that their *High Mightineſſes* would conſent to its Alteration, and allow the Company to ſend a Deputation to the *Hague*, in order to lay their Accounts before them, which, after mature Deliberation, was aſſented to.

The Magazines of the Company are always kept in excellent Order. Such as are intruſted with the Care of them, give large Security, and are liable beſides to the ſevereſt Puniſhments, in caſe they are guilty of any Breach of Truſt. The ſame Degree of Strictneſs is ſhewn to all Degrees of Perſons in their Service; nor are the Directors themſelves exempted, in whom the ſmalleſt Fraud would be puniſhed with a ſpeedy and exemplary Juſtice. This keeps up that Spirit of Care and Diligence which is ſo abſolutely requiſite to the right Management of Commerce; and all the Under-officers, moved by the Example as well as conſtrained by the Inſpection of their Superiors, diſcharge their Duty very exactly; ſo that the Dock, or Yard, in which their Ships are built and repaired, is kept in as exact Order as that of any private Man, tho' there are ſeldom leſs than twelve hundred Perſons employed therein.

They do not however exert the ſame Authority over the Sailors and Under-ſervants of the Company, that return from the *Indies*; but, on the contrary, allow them all the Liberty they can deſire, and ſuffer them to live in what Manner and at what Expence they pleaſe, which is likewiſe done from a Principle of true Policy, ſince it affords them the Means of ſpending, in a ſhort Time, all that they have acquired in long Service; ſo that in the Space of five or ſix Weeks they are, generally ſpeaking, reduced to their primitive State of Indigence, and conſequently are obliged to enter again into the Company's Service for a freſh Term. Thus the Liberty of the Subject is preſerved intire, and the Company nevertheleſs ſeldom wants a regular Supply of able and ſeaſoned Seamen, which has very good Effects, becauſe Experience ſhews, that ſuch as are uſed to theſe eaſtern Climates go many Voyages without Prejudice to their Health; whereas freſh and raw Seamen die in great Numbers, to the vaſt Prejudice of the State. The greateſt Care is taken, that all employed in this Service, both at home and abroad, ſhall be properly qualified for the Stations in which they ſerve; and therefore it is a Rule, that none ſhall be admitted into any Office, before they have undergone a proper Examination; and though there may be ſome Inſtances where Intereſt or Favour may have procured Diſpenſations in this reſpect, yet theſe occur but ſeldom, and are not therefore of very great Conſequence.

In order to have a juſt Idea of the Manner in which this great Maſs of Property is managed, it will be neceſſary to explain the Meaning of a Term frequently made uſe of here, and yet but indifferently underſtood. The Term I mean is the *Actions* of the *Eaſt-India* Company. The general Signification of this Phraſe, both here and in *France*, is preciſely the ſame with what we call *Stocks*. When therefore it is ſaid, that Actions riſe or fall, the Meaning is plain and obvious; but then it is abſolutely neceſſary to know the Value of Actions, or rather the Value of the Actions in a particular Company, before we can form any juſt Notions of them. The original Actions of this *Eaſt-India* Company were fixed at three thouſand Florins; that is to ſay, a Perſon poſſeſſed of ſo much of the original Stock, was ſaid to hold one Action; he who had twice as much two, and ſo on. This Phraſe is ſtill kept up, though the Value is very much altered, ſince a ſingle Action is now worth from twenty-five to twenty-ſix thouſand Florins. Theſe Actions vary in their Price, according as the Dividends made upon the Company's Capital riſe or fall; but whatever their Price be, a principal Director muſt have two in his own Poſſeſſion to qualify him for that Poſt, and none are capable of giving a Vote in an Election, who are not poſſeſſed of one Action at leaſt. The Salaries of the Directors vary, according to the Chambers to which they belong. Thoſe eighteen that are choſen by the City of *Amſterdam*, have three thouſand Florins a Year; but there are others that have but twelve hundred.

The Manner of buying and ſelling *Eaſt-India* Stock is very eaſy and expeditious. When the Parties have ſettled the Price between themſelves, they go together to the *India* Houſe, where the Seller applies himſelf to the Clerk of the Book in which his Stock is entered, and deſires him to transfer ſo much from his Account to that of the Buyer; which being done, he ſigns it, and afterwards ſigns a Receipt for the Purchaſe-money, and the whole Tranſaction being performed in the Preſence of a Director, he ſigns the Book likewiſe; ſo that there is not a Poſſibility of any Fraud being committed, yet the whole Expence of this Transfer does not amount to more than ſeven Shillings and ſix Pence of our Money.

The Directors, who have the ſole Management of the Company's Concerns, ſettle not only the Times, but the Quantities and Qualities of the Company's Goods, that are to be expoſed in their Sales, from the Produce of which their Dividends are raiſed, and are high and low, according to the Profit made by the Company. This, however, muſt be underſtood with ſome Reſtriction; for moſt certain it is, that, from their firſt Eſtabliſhment to this Day, they have never divided to the full Extent of their Profit, and this for very good Reaſons. Firſt, becauſe long Wars, and other chargeable Expeditions, muſt be defrayed out of this reſerved Stock, to prevent a great Decreaſe in their Dividends, which would neceſſarily occaſion a very great Fall of their Actions. Secondly, they have conſtantly paid the State very large Sums for the renewing of their Charters, and they have likewiſe paid largely for ſuch other Acts of State as they have procured from Time to Time in their Favour. Thirdly, it has been found requiſite for them to keep large Sums in Bank, to anſwer the Exigencies of the *State* as well as the Company, in Times of great Difficulty and Danger. Beſides all this, they have likewiſe reſerved vaſt Quantities of Spices, and other rich Commodities, that their Sales might not lower the Price of them too much; and upon this Principle, they have ſometimes burned great Quantities of Spices. They have alſo formerly had recourſe to another Method for the Benefit of their Proprietors, which has been paying their Dividends in Cloves, Mace, and Nutmegss, at a very low Price, by which thoſe who received them, gained very conſiderable Advantages.

It may, indeed, be ſurmiſed, that theſe Methods afforded room for the Directors to make great Advantages to themſelves; but when it is conſidered, that their general Accounts, upon the Balance of which their Dividends have been declared, have been every three Years conſtantly audited by a Committee of the *States-General*, there is no juſt Reaſon to apprehend, that any Thing of this kind has been ever practiſed. Thus it clearly appears, that as the *Eaſt-India* Company in *Holland*, by a wiſe and prudent Diſpoſition of their Affairs abroad, have been able to erect and maintain a Sovereignty, very little, if at all, inferior in Power to the greateſt Monarchs in *Aſia*, without which it would have been impoſſible for them to have maintained and ſupported that Commerce which has been the Source of ſuch immenſe Riches; ſo, on the other hand, by their prudent and exact Oeconomy at home, they have conſtantly ſuſtained the Reputation of the Company at the greateſt Height, and thereby proved of infinite Advantage to their Country.

This indeed is the main Point, and the Thing which of all others we have laboured to ſet in the fulleſt and ſtrongeſt Light in this Section. For though it be true, that both the Glory and the Profit accruing from the right Management of the Affairs of this great Corporation, belong to the *Dutch* alone, and not to any other Nation, yet the Example of ſo extraordinary a Conſtitution as this is, by which a Body of Merchants have been able to raiſe an Empire in the *Indies*, and a kind of new Republick in the Boſom of that by which they were erected, is common to all the World; and therefore the entire Hiſtory of its Riſe, Progreſs, and preſent Condition, concerns not only all the reſt of *Europe*, and in a particular Manner every maritime Power, but ought likewiſe to be tranſmitted to Poſterity. This, as it inclined me to take ſo much Pains, and to turn over ſo many Books, in order to bring all that has been ſaid of it into ſuch a Method, as that the *Engliſh* Reader might clearly comprehend, not only its paſt and preſent Condition, but the Means by which the former was acquired, and the latter is and probably will be maintained as long as the Republick of the *States-General* ſhall ſubſiſt: So I hope it will merit a Degree of Attention equal to the Trouble it has coſt, and inſpire every Reader with a ſincere and hearty Concern to ſee the Affairs of *Engliſh* trading Companies put into a like Train of Management, that as we have not equal only, but greater Advantages for the promoting and ſupporting an extenſive Commerce than the *Dutch*, we may not be always as much behind them in this reſpect as we are at preſent.

There remains but one Thing more to compleat the Aim and Deſign of this Section, and that is, to give an Account of the Dividends which have been made ſince the Eſtabliſhment of this Company, which, when I began this Enquiry, I thought could not have been brought lower than the Year 1717; but by a diligent Search I have continued them eleven Years farther, and have Reaſon to hope that, in the Appendix to the next Volume, I ſhall be able to gratify the Reader's Curioſity to its utmoſt Extent, by bringing them ſtill farther down, perhaps to the preſent Year. As they ſtand in the next Page, they will fully anſwer three very great and uſeful Ends. In the firſt Place, they will fully ſupport, and undeniably prove the Truth, not only of the Facts recorded, but alſo of the Obſervations made upon thoſe Facts through the Courſe of this Hiſtory, and thereby convince the Reader, that it is not an over-weening Paſſion for Trade, or any particular Fondneſs for the *Dutch*, that has led me to treat ſo largely of this Subject, but an honeſt and laudable Zeal for Truth, and for the Intereſt of my Country. It will in the next Place ſhew, what incredible Advantages reſult from Commerce, when wiſely eſtabliſhed, and ſteadily purſued, and how this alone contributes more, not only to the enriching, but to the raiſing the Power and Credit of a Nation, than all other Methods taken for that Purpoſe put together; and laſtly, it will demonſtrate, beyond all Queſtion, the Falſhood of that Objection, which, of all others, has been thought the ſtrongeſt againſt the *Eaſt-India* Trade, *viz.* that it exhauſts and impoveriſhes the Nation which carries it on, by exporting annually vaſt Quantities of Silver; for, if there had been any Truth in this, the Experience of ſo long a Courſe of Time, as one hundred and thirteen Years, muſt have rendered it viſible to a Degree beyond all Contradiction; whereas this Account of the Company's Dividends is the fulleſt and moſt authentick Evidence of the contrary; ſo that it is to be hoped, we ſhall never hear that Objection urged again; or if it be, that it will have as little Weight as an Argument built upon Conjecture ought to have, when oppoſed to the Lights of Experience.

A

A complete TABLE *of the* DIVIDENDS *made by the* DIRECTORS *of the* Dutch-Eaſt-India *Company, upon their Capital*; *from* Anno 1605 *to* 1728, *incluſive.*

In all 2784⅙ *per Cent.*

It may, perhaps be ſaid with Truth, that ſo clear, ſo accurate, and ſo ſatisfactory an Account as this is, for ſuch a Number of Years, and alſo of ſuch an extenſive Commerce, is ſcarce in the World to be met with. Let us therefore make Uſe of this Account, in order to raiſe ſuch Obſervations as may enable us to penetrate clearly into the Subject. In the firſt Place, we muſt remember, that by the Conſtitution of the *Dutch* Government, all Ranks of People were allowed originally, and are, to this Day, permitted to inveſt their Fortunes in the Stock of this Company; by which Means every Body became intereſted in its Welfare; and the Support thereof was conſidered as equally beneficial to the Publick, and to private Perſons; which Spirit has been kept alive for upwards of one hundred Years, by that Skill and Oeconomy which we have deſcribed, and by making all the Proprietors ſenſible of the Profit and Loſs of the Company's Trade, by the Riſe and Fall of their Dividends. In the Courſe of this Time, it clearly appears, by comparing the Total of what has been divided, with the Number of Years in which that Sum has been divided, that, one Year with another, the Proprietors of this Stock have conſtantly received ſomewhat more than twenty-four *per Cent.* which is ſo conſiderable a Thing, that a very little Attention will convince us, that it muſt have laid the Foundation of a great many private Fortunes in *Holland*, and is ſtill of very great Uſe,

Uſe to the Publick, and of prodigious Benefit and Advantage to private Perſons in the ſame Way.

But then, if we conſider it in a larger and more extenſive View; and as it hath a Reference to the Commonwealth of *Holland*, and the *Dutch* Nation, we ſhall find that this *Eaſt-India* Commerce has been ſo far from exhauſting and drawing out the Wealth of theſe Provinces, that, on the contrary, it has brought in a much greater Proportion of Wealth than could have been obtained any other Way. In order to be ſatisfied of this, we need only conſider the original Capital of this *Eaſt-India* Company, which conſiſts of not quite ſix Millions and a half of Florins, that is, to take it in round Numbers, about ſix hundred and fifty thouſand Pounds Sterling; and yet upon this, in the Year 1728, they had divided Eighteen Millions of our Money.

It may, indeed, be objected, that before we can draw any Conſequence from this, we ought to know the Quantities of Silver that have, within that Space of Time been exported from *Holland*; becauſe, till theſe Sums are known, and deducted from the Eighteen Millions, divided amongſt the Proprietors, it cannot, with any Certainty, be known how great Profits have accrued to the *Dutch* Nation from this Trade. But, in anſwer to this Objection, which is the only one that can be made; I ſay, firſt of all, that the Dividends made by the Directors of the Company, ariſe from the Sales by which the Goods brought from the *Indies* on the Company's Account, are thrown into the Hands of private Merchants, by whom the greateſt Part of them have been exported into other Countries of *Europe*, and a vaſt Profit acquired thereby, which Profit is not at all taken Notice of in the Account before ſtated. I ſay, in the next Place, that the home Conſumption of *India* Goods in *Holland*, bears ſo little Proportion to the Quantities of thoſe Goods vended by the Company in their publick Sales, that it is impoſſible to conceive they can conduce to any conſiderable Impoveriſhment of the People; and that there is the higheſt Reaſon to believe the whole Eighteen Millions before mentioned has been drawn from foreign Countries into *Holland*, by the Sale of thoſe Commodities; and conſequently this Sum at leaſt has been gained, not only by the Company, but by the Nation.

I ſay, in the third Place, that this is the more credible, becauſe this is ſo far from being the whole of the Profits which the Company has gained by its Commerce, that there is good Reaſon to believe it is not much above one half of them; for we muſt conſider that the Company has, at ſeveral Times paid for the renewing its Charters and Privileges more than its original Capital; that it has likewiſe expended, from the Time of its firſt Eſtabliſhment, an immenſe Sum every Year for the building, repairing, and equipping the Ships employed in its Service, and in diſcharging the Wages due to all who are in its Service, which, with many other Articles, that I need not enumerate, muſt have ariſen from the Gain produced by their Trade. I ſay, in the fourth Place, that as the Company has very wiſely avoided very high Dividends, and has always retained a vaſt Stock, and an immenſe Treaſure for its Support in caſe of any extraordinary Emergency, ſo all this, let its Amount be what it will, is excluded from the before-mentioned Sum of Eighteen Millions, and belongs to a ſeparate Account.

I ſay, farther, that all the Property of which the Company is poſſeſſed in the *Eaſt-Indies*, and which is capable of being transferred from thence into *Europe*, ought to be conſidered as the entire Produce of this Trade, as it never could have accrued to, or have been by any Means in the Power or Poſſeſſion of the Subjects of the States of *Holland*, but by the Eſtabliſhment and Management of this Company: So that if we take in all theſe various Branches, which make no Part of theſe Eighteen Millions, I believe, there is no reaſonable Man, at leaſt no competent Judge of Matters of this Nature, who will not readily allow that they muſt vaſtly over-balance whatever Quantities of Silver have been exported by the Company, ſince its Eſtabliſhment, for the carrying on of the *India* Trade. So that on the whole, I think, I may very fairly, and with the greateſt Juſtice conclude, that if this Article of the Trade of *Holland* could be balanced with the utmoſt Nicety, it would appear, that, at leaſt, this Sum of Eighteen Millions has been gained by the *Dutch* Nation, as well as by the Proprietors of their *Eaſt-India* Company.

But if it ſhould be ſaid, that the Wealth of the *Dutch* Provinces does by no means correſpond with this Calculation, and that therefore it is very improbable; my Anſwer to this is, that in the firſt Place, this ought to be proved, and in the next, that ſuppoſing it could be proved, it is no reaſonable Objection to the Truth of what I ſay, ſince it is very poſſible, and indeed highly probable, that a great Part of the Wealth brought into *Holland* by this Commerce, and by the numberleſs Branches of Trade which depend upon it, may have been in Part diſſipated and diſperſed by the great Wars maintained by the Republick, and by various other Exigencies of State; ſo that allowing there were not eighteen Millions in the Hands of all the Subjects of this Republick, yet this does not prove, that they may not have gained ſo much by this Commerce, becauſe, as I have ſaid before, they may have ſpent it. I may add to all this, that there is no great Difficulty in ſetting this Argument in ſuch a Light, as that it may operate ſtrongly in my Favour; for, if we conſider the prodigious Sums the *Dutch* Government have levied upon their Subjects, the many and long Wars in which they have engaged, and the great Difficulties and Diſtreſſes to which they have been driven, it is as difficult to imagine, how they ſhould have been able to find Money for their Expences, and yet leave their Subjects ſo rich as they are at preſent known to be, without admitting ſuch a Profit upon this Trade, as it is to believe, that the beſt Part of theſe prodigious Expences was taken out of that Wealth which this Company brought in.

That a great deal of Time has been ſpent in examining and tracing the Hiſtory of the *Dutch* Commerce in the *Indies* for ſuch a Number of Years, that I have been very large in my Deſcription of its Eſtabliſhment Abroad, and have beſtowed no leſs Labour in ſetting forth the Oeconomy of this *Eaſt-India* Company at Home, is what I cannot deny; but at the ſame Time, I muſt profeſs, that the bringing ſuch a Multitude of Things into the Compaſs of this Section, and thereby exhibiting in one View, what it would coſt the Reader much Time and Trouble, and I might add, Expence likewiſe, to pick up, from a Multitude of different Writers, was my ſole Motive thereto; and therefore I hope this will be thought a juſt Excuſe for any Inconveniencies that may have attended it; the rather, becauſe in the Courſe of my Enquiries, I have met with ſuch Helps, as I did not, and indeed could have no Reaſon to expect, which has enabled me to render the Account I have given, much more perfect than at firſt I had any Hopes of making it. There is no Poſſibility of judging, on the firſt laying of a Plan of this Nature, how all the Materials are to be collected, what Space they will fill, or what Acceſſions may be made to them, while the Structure is erecting; but it is always clear, that an Author, who has a due Regard for his own Reputation, and a juſt Concern for the Performance of what he has promiſed to the Publick, will be always attentive to the main Object, and will let Circumſtances of ſmaller Conſideration give Way thereto, for which, when all Things have been ſufficiently weighed, his Readers will not think that he ought to be blamed.

But if we have dwelt ſo long upon a Subject ſo fruitful of Matter as this has apparently been, it will prevent our employing ſo much Time as we ſhould otherwiſe have done in accounting for the Endeavours of ſeveral other Nations in *Europe*, to ſhare in this Trade, by erecting new Companies for carrying it on, of which it will now be neceſſary to ſay no more than what is requiſite, to ſhew how, when, and by whom they were erected, and what their Situation and Expectations are at preſent, which will conclude all that we have to add concerning the *Eaſt-Indies*, as it will alſo do this our firſt Volume.

SECTION XXXV.

The Hiſtory of the French Eaſt-India *Commerce from its firſt Original, together with a clear and conciſe Account of the ſeveral Alterations it has undergone; and a full and plain Deſcription of its preſent Circumſtances at home and abroad; interſperſed with ſome curious Remarks on the Nature of the* French *Government when the Powers thereof come to operate upon Trade.*

Collected entirely from the *French* Writers.

1. *The fruitleſs Endeavours of* Francis I. Henry III. *and* Henry IV. *to engage their Subjects in long Voyages, and the firſt Appearance of an* Indian *Trade in that Country.* 2. *The Pains taken in this Reſpect by the great Cardinal* Richelieu, *and his noble Plan on that Subject abortive.* 3. *The firſt effectual Eſtabliſhment of this Commerce owing to the Wiſdom and publick Spirit of M.* Colbert, *who intereſted the Crown in this Affair.* 4. *The Protection of the King, the Patronage of that able Miniſter, and the moſt zealous Endeavours of the Merchants in* France *fail in promoting the Intereſts of this Company.* 5. *After the Deceaſe of M.* Colbert *it declines continually, and loſes all Countenance from the Court, which brings it into a very low State.* 6. *Tranſition from the Affairs of the Company in* France, *to the Management of their Commerce in the* Indies. 7. *A ſuccinct Hiſtory of the Acquiſition, fortifying, and erecting a Town at* Pondichery, *with the Reaſons which induced the Company to make it their capital Reſidence.* 8. *Remarkable Revolutions that have happened to this Place, and to the Affairs of the Company in the* Indies. 9. *A Deſcription of the Fortreſs and Town of* Pondichery *as it now ſtands, a Calculation of the Number of Inhabitants, and the Importance of this Place ſet in a new Light.* 10. *The Condition of the* French Eaſt-India *Company at the Demiſe of* Louis XIV. *impartially repreſented.* 11. *A View of the Regent Duke of* Orleans's *Scheme for a Coalition of the* French *trading Companies for the Improvement of Commerce, and the Support of publick Credit.* 12. *A ſhort hiſtorical Account of the* China, Senegal, *and* Weſt-India *Companies that were united to the Company of the* Indies *by the Regent's Edict.* 13. *A perfect Repreſentation of the Nature, Power, Privileges, and Eſtabliſhment of the preſent* French Eaſt-India *Company ſince the Execution of that Scheme.* 14. *A brief Account of the Company's Trade from* 1720 *to* 1741, *with an impartial Account of its preſent State at home as well as in the* Indies, *and the true Value of its Actions.* 15. *Remarks and Obſervations on the Facts related in the foregoing Sections, explaining the Nature and Conſequences of maritime Powers.*

1. WE opened the former Section with obſerving, that Zeal for Freedom, a due Portion of publick Spirit, and great Induſtry, were capable of conferring the Bleſſings of an extenſive Trade, even upon Nations labouring under the greateſt natural Impediments: But it will be the Buſineſs of this Section to ſhew, that where Freedom and publick Spirit are wanting, Power cannot ſupply their Place; and even Induſtry itſelf, though it may procure Credit to ſuch a People, will never be able to purchaſe Wealth. Commerce loves to find its own Channels, and will not ſubmit to any Reſtraint. Hope will nouriſh it in the moſt barren Soil, provided that Hope be cheriſhed by a mild and prudent Government; for Trade is found to be of the ſame Nature with certain Plants, which though they become fair and large by Cultivation, yet can never be forced.

There have been few Governments, at leaſt, where the Monarchs affected arbitrary Power, which could boaſt of being ſo happy in Miniſters as *France*; neither has this Country wanted ſome great Princes who have both underſtood their Subjects Intereſts, and laboured to promote them: And yet, with reſpect to the Commerce of which we are treating, both have laboured in vain. The firſt Monarch of this Country, who ſtrove to excite his Subjects to extend their Commerce, by making long and diſtant Voyages, was *Francis* I. who, by his Declarations in the Year 1537, and 1543, exhorted the *French* Nation to emulate their Neighbours, and to labour to obtain a Share in thoſe important Diſcoveries, by which they were ſo much exalted both in Reputation and Riches. *Henry* III. renewed theſe Exhortations by an Edict, dated *December* 15, 1578, but without any Effect.

It was under the Reign of his Succeſſor, *Henry* IV. one of the wiſeſt, greateſt, and which is ſtill a higher Character, one of the beſt Princes that ever ſat upon the *French* Throne, that this Nation firſt attempted to ſhare in the Commerce of the *Indies*. One *Gerard le Roy*, a Native of the *Low-Countries*, and who had made ſeveral Voyages to the *Eaſt-Indies* on board the *Dutch* Ships, came into *France*, and offered his Service as a Pilot to ſome Merchants, who were deſirous of aſſociating themſelves for carrying on that Trade; of which the King having Notice, gave them all the Encouragement they could deſire; and by an Arret, bearing Date *June* 1, 1604, erected the firſt *Eaſt-India* Company that had been ſeen in *France*, and granted them excluſive Privileges for the Term of fifteen Years; which however proved of no Uſe, either through the Diviſions and Diſputes which aroſe amongſt the Merchants that compoſed this new Company, or from their finding it impoſſible to raiſe a Fund ſufficient for carrying ſo great an Undertaking into Execution.

But notwithſtanding this Company failed, yet *Gerard le Roy* ſtill continued in *France*, and ſtill laboured to ſet on foot an *Eaſt-India* Company, which at length however he effected under the Reign of *Lewis* XIII. who granted the Merchants that were engaged in this Project his Letters Patent, dated *March* 2, 1611, by which they had all the Privileges that they could deſire confirmed to them for twelve Years. But, notwithſtanding this, they ſuffered four whole Years to elapſe without fitting out ſo much as a ſingle Ship; and thereupon two Merchants at *Rouen* petitioned the King, that theſe Privileges might be tranſferred to them, offering to fit out a certain Number of Veſſels that very Year. But the Company before erected interpoſed, and declared that this Delay of theirs aroſe from unavoidable Difficulties, and not from any Deſign of dropping or abandoning their Project; upon which the King very wiſely directed, that theſe Merchants ſhould be aſſociated with the old Company, in order to increaſe their Capital, and carry on their Trade the better.

In purſuance of this Reſolution, they had new Letters Patents granted, dated *July* 2, 1615, which were regiſtered in Parliament the Second of *September* following; and, in conſequence of the ample Privileges that they had thus obtained, they began to fit out Ships, and actually poſſeſſed themſelves of the Iſland of *Madagaſcar*, which was then conſidered as a very great Thing, and mighty Hopes were conceived therefrom. But this, inſtead of facilitating their Commerce to the *Indies*, proved the Ruin of it under this Eſtabliſhment; for, it being found by Experience that the Profits ariſing from the Poſſeſſion and Commerce of this Iſland were of very little Conſequence, it was too haſtily concluded, that the Whole of this Trade would prove as inſignificant; and ſo, notwithſtanding all the fair Promiſes made at the Beginning, this Company, like the reſt, ſunk, and was totally loſt.

2. The great Cardinal *Richelieu*, however, reſolved to revive this Commerce, and undertook it with great Spirit, and conſequently with all the Appearance imaginable of Succeſs. The Royal Privileges granted to this new Company were dated the Twenty fourth of *June*, 1642, and contained all that could be thought neceſſary for promoting the Intereſt of a Society, under the peculiar Protection of ſo great a Miniſter; yet it fell out unluckily, that he did not long ſurvive this new Grant, which, without doubt, was a great Prejudice to the Company's Affairs: However, *Lewis* XIV. or rather the Regency acting in his Minority, confirmed thoſe Privileges by an Edict dated the Twentieth of *September*, 1643, and the Company entered into Poſſeſſion of all the Advantages derived therefrom immediately.

All theſe it quietly enjoyed for twenty Years; during which Space, this third Company ſent every Year a Veſſel, but the far greater Part of them were either caſt away in their Paſſage, or loſt the beſt Part of their Crews by the Scurvy; ſo that tho' the Name of an *Eaſt-India* Company was ſtill kept up in *France*, yet, in Fact, they were poſſeſſed of no ſuch Trade, but contented themſelves with a Number of fruitleſs and fatiguing Attempts to ſettle a flouriſhing Colony at *Madagaſcar*; a Deſign, which, after all, they could never bring to bear. The Time of their Privilege being expired, the Duke *de la Meilleray* thought fit to attempt an *Indian* Trade upon his own Bottom, which, however, ended in ſending a Ship or two to *Madagaſcar*, where he got into the Poſſeſſion of the *French* Settlements, and found them not worth keeping, though it is ſaid that he made this Attempt at a pretty eaſy Rate, becauſe being Maſter of the Ordnance, he made ſo free with the King's Stores, as to ſend large Quantities of them to *Madagaſcar*, and placed the ſame to his own Account. On his Death, however, his Son, who was ſtiled the Duke *de Mazarin*, ſold his Intereſt in this Iſland for about one thouſand Pounds of our Money, which proved a great deal more than it was worth.

Thus we have ſpent our Time hitherto in contemplating the Progreſs of the *French Eaſt-India* Companies for about threeſcore Years, within which Space they did nothing; though ſome private Men from *St. Malo's* ſent Ships thither, and found their Trade turn to ſome Account. This very plainly ſhews, how little the *French* Government agrees with Commerce, and how difficult her ableſt Miniſters find it to eſtabliſh Trade by Dint of Power: And yet it muſt be allowed, that Cardinal *Richelieu* took all the Pains in this Reſpect that it was in the Power of Man to do; for he ſent for Perſons who were beſt verſed in this Trade from *Holland*, drew abundance of rich Merchants from various Parts of *Europe* into *France*, drew the Plan for the Eſtabliſhment of the new Company himſelf, and engaged ſome of the principal Perſons for Quality and Fortune in *France* to embark in it.

What he conceived would moſt promote it, proved the Ruin of the whole Deſign; for there being always ſome great Nobleman or other at the Head of this Buſineſs, ſuch as endeavoured to obtain Employment in the Company's Service, were forced to become his Creatures; by which happy Contrivance there were hardly any employed who had either Merit or Capacity; ſo that the Merchants and ſuch as were the beſt Judges of the Means of carrying on ſuch a Commerce with Succeſs, treated the *Eaſt-India* Company as a mere Phantom, and never concerned themſelves at all therewith: As, on the other hand, the *Engliſh* and *Dutch Eaſt-India* Companies were under no Apprehenſions about it; but being ſolely guided by Experience, treated the Affair of a *French Eaſt-India* Company with Contempt; while the reſt of the States of *Europe*, ſeeing that *France*, with all her Power, could make nothing of theſe repeated Attempts, took it for granted that the *India* Trade was deſigned by Nature for the maritime Powers, and ſo never troubled their Heads about it. Thus Things remained quietly in this Situation for the major Part of the laſt Century; and while *France* gave Law to her Neighbours by Land, ſhe made as inconſiderable a Figure by Sea as any of the little States in *Italy*. But the Scene was ſoon changed when *Lewis* XIV. came to manage his own Affairs, and had taken into his Service ſuch Miniſters as were equally capable of undertaking great Deſigns, and of foreſeeing and overcoming all the Difficulties that could poſſibly be met with in the Execution of them.

3. The famous M. *Colbert*, ſo much diſtinguiſhed by *Lewis* XIV. and whoſe Activity and Prudence procured him moſt of thoſe Succeſſes which diſtinguiſhed the former Part of his Reign, and rendered him the moſt powerful Monarch in *Europe*. This active and intelligent Miniſter, I ſay, was the Perſon who conceived the Deſign of reviving the *French Eaſt-India* Company, notwithſtanding all the Misfortunes that Scheme had met with, and which had, over and over, diſappointed the Skill and Care of all his Predeceſſors. But before he made his Intentions known to the Publick, he took care to make himſelf perfectly well inſtructed in the Affair he was to undertake, which he did, by drawing to his Acquaintance ſuch Merchants and Seamen as were held to underſtand this Subject beſt. It was from them he learned that there were *three* principal Difficulties in the way of that Structure which he laboured to raiſe, and which, as they had never hitherto been overcome, ſo it appeared extremely doubtful whether, conſidering the Nature of the *French* Government, and the Temper of the *French* Nation, it was poſſible they ſhould be got over.

The firſt was the finding a ſufficient Fund for the effectually fixing and eſtabliſhing ſuch a Company, as to which nothing hitherto had ever been done worth mentioning, or that could afford any probable Hopes of Succeſs: The *French* Merchants, being extremely fond of new Projects, were ready enough in promiſing Subſcriptions, but very ſlow in performing what they promiſed, and in complying with the Terms of their Contracts, even after they had ſubſcribed. The ſecond Fault was ſaid to be a peremptory Excluſion of Foreigners, notwithſtanding it was ſo evident, that the neceſſary Funds for the carrying on ſo extenſive a Trade were not eaſily, at leaſt, to be found in *France*. The third and greateſt Difficulty of all was, the affording ſuch a Degree of Liberty and Independence to this Company as might ſatisfy both Strangers and Natives as to the Security of their Properties, and put the entire Management of their Affairs into the Hands of ſuch only as were choſen and entruſted by themſelves.

All theſe Things M. *Colbert* weighed in his own Mind, and when he thought he had ſufficiently ripened his Project, he reduced it into Writing; but knowing at the ſame Time, the great Conſequence of having the moſt ſolid Sentiments helped by a proper Method, and adorned with the Graces of Writing, he communicated his Plan to Mr. *Charpentier*, of the *French* Academy, eſteemed one of the beſt Pens in *France*. This Gentleman having new dreſſed our Stateſman's Thoughts, by digeſting them into their proper Order, and cloathed them with the plaineſt and ſignificant Language, the Scheme came abroad with all the Advantages that could be deſired, and was attended with all the Succeſs that could be expected. As this Paper was eſteemed a Maſter-piece in its Kind, had amazing Effects, and contains abundance of curious Circumſtances, it may not be amiſs to give the Reader an Extract of its Contents.

It was in the firſt Place obſerved therein, that as former Schemes of the like kind had failed for want of proper Funds, there was no Danger that any Thing of this Nature ſhould happen here, ſince, beſides the conſtant Protection and Support which the Government determined to give thereto, the King himſelf, and the greateſt and the wealthieſt Perſons in the Nation, were reſolved to furniſh ſuch large Sums at the Beginning, as might put it on a

Level, at leaſt, with the *Dutch Eaſt-India* Company, at its firſt Eſtabliſhment. In regard to any Objection that might be raiſed from the various Diſappointments which had overturned three ſeveral Companies already, it was obſerved, that few, or no Undertakings of this Sort were attended with immediate Succeſs. That the *Spaniards* ſuffered greatly in their firſt Expeditions to *America*, which, however, did not hinder them from perſevering in their Deſigns by which they had acquired the Empire of the new World. That the *Engliſh* Colony to *Virginia* had failed four or five times, and yet was brought to Perfection at laſt; and that even the *Dutch Eaſt-India* Company, which ſo much excelled all others, was far enough from being fortunate in its firſt Beginnings.

These Principles being laid down, it was ſhewn, that the Iſland of *Madagaſcar*, a conſiderable Part of which was then in the Poſſeſſion of the *French*, was a Country capable of being improved to ſuch a Degree, as to become of more Conſequence, and of greater Advantage, than any of the Settlements poſſeſſed by the *Dutch* in the *Eaſt-Indies*. In Support of this, it was ſaid, that no body would deny, that this Settlement was incomparably more commodious and more ſecure than that of *Batavia*, in the Iſland of *Java*, which the *Dutch* had nevertheleſs made the capital Reſidence of their Company in the *Indies*. For with reſpect to the Commodiouſneſs of the Place, the Country of *Madagaſcar* was extreamly agreeable, the Climate equally temperate and pleaſant, and the Soil affording all the Neceſſaries of Life, in the greateſt Abundance, whereas the Territory about *Batavia*, was ſo far from being fruitful, that the Company were obliged to procure from diſtant Places, Rice, freſh Meat, and other Proviſions, for twenty-five, or thirty thouſand People, which could not but be attended with great Difficulties, as well as with a vaſt Expence. In reſpect to Security, it was well enough known, that only a ſmall Part of the Iſland of *Java* was in the Power of the *Dutch*, and that the reſt of the Country, which was very large, and very populous, was inhabited by a Variety of Nations, agreeing, however, in the Fierceneſs and Brutality of their Natures, and in a bigotted Zeal for the *Mohammedan* Religion, which made them hate and deſpiſe all Chriſtians to the laſt Degree. That the Territories of the *Dutch* bordered on one Side on thoſe of the King of *Mataran*, who had more than once invaded them at the Head of an Army of one hundred thouſand Men; that on the other, the City of *Batavia* itſelf, was but twelve Leagues diſtant from the Dominions of the King of *Bantam*, who had likewiſe ſhewn himſelf their powerful and inveterate Enemy; whereas, on the other Hand, the Inhabitants of *Madagaſcar* were of a mild and excellent Diſpoſition, and ſo much inclined to receive the Doctrines of the Goſpel, that a Settlement conſiſting only of one hundred Men, would be in greater Security there, than a like Settlement even of a thouſand and upwards in the Iſland of *Java*.

That beſides all this, by fixing their capital Colony in *Madagaſcar*, the *French* Company would be better ſeated for Trade than the *Dutch* in *Batavia*, becauſe it was equally convenient for carrying on the Commerce of the Red-ſea, or of the Gulph of *Bengal*, and lay at the ſame Time very properly for the Diſpatch of Ships to *China* and *Japon*, affording a convenient Place for re-fitting and refreſhing in their Return. In reference to the Execution of a Project which theſe Arguments were ſuppoſed to demonſtrate probable and feaſible,

It was ſaid in this Memorial, that a Fund of ſix Millions, or ſix hundred thouſand Pounds of our Money, would be neceſſary in order to the equipping twelve or fourteen large Ships, from 800 to 1400 Tons, in order to embark ſuch a Number of Perſons for this Iſland of *Madagaſcar*, as might effectually, and at once eſtabliſh a conſiderable Colony there. That there was no reaſon to doubt, that his Majeſty would advance a tenth Part of this Sum. That the Nobility and other Perſons of large Fortunes, would advance alſo the Sums requiſite to ſet this Deſign on Foot, and that as the King was willing to take a tenth Share in the ſetting out, they had Reaſon to expect he would concern himſelf largely in future Expeditions. That as a farther Encouragement, he was willing to grant the Company an Exemption from half their Duties doth Inward and Outward, on all the Goods they exported to, or imported from the *Indies*; and over and above all this, his Majeſty was content to take upon himſelf all the Loſs that might ariſe for the firſt eight or ten Years, which was ſufficient to ſhew, how much, and how ſincerely he had this great Deſign at Heart, and how willing he was to contribute to its Succeſs. That as to private Perſons, they ſhould be at Liberty to ſubſcribe in what Proportions they pleaſed, till the Fund was full; after which, no farther Subſcriptions ſhould be received on any Terms.

That the King would not only permit Foreigners to take what Share they pleaſed in theſe Subſcriptions, but to encourage them thereto, would likewiſe conſent, that ſuch as ſubſcribed ten thouſand Livres (this was afterwards changed to twenty thouſand) or upwards, ſhould thereby acquire the Right of Naturalization, without any farther Ceremony, by which their Relations, tho' Strangers, ſhould be capable of inheriting their Effects in the Kingdom of *France*; and farther, that in caſe of a Rupture with the State, to which ſuch Strangers were Subjects, their Effects ſhould never be liable to Confiſcation, on any Pretence whatever. That the Affairs of the Company ſhould be managed by their own Directors, choſen from amongſt themſelves, in whoſe Hands the Funds of the Company ſhould conſtantly remain, and that Foreigners ſhould be capable of being elected Directors, provided they were intereſted in a reaſonable Degree in the Stock of the Company, and reſided in *France*. That in Point of Law Suits, the Company ſhould be made as eaſy as poſſible, and after being heard, in the firſt inferior Court, near the Place where the Cauſe of Action aroſe, they ſhould be at Liberty to appeal directly to the Parliament.

Such was the Memorial which this great Miniſter cauſed to be diſperſed through all Parts of the Kingdom of *France*, in the Month of *June*, 1664, and upon which, the Edict for eſtabliſhing the *Eaſt-India* Company, which ſtill ſubſiſts, and which bears Date in the Month of *Auguſt*, in the ſame Year, was founded. We have been the larger and fuller in this Account, becauſe it anſwers two Purpoſes; for, firſt, it clearly explains the Methods taken by this great Miniſter to accompliſh what in his own Opinion appeared to be a moſt difficult Undertaking, and next, it affords us an eaſy, and at the ſame time, a perfect View of the principal Points upon which the preſent *Eaſt-India* Company's Eſtabliſhment reſts; for tho' as we ſhall ſhew in the Courſe of this Section, the royal Authority has been often exerted in changing and new modelling, as the Circumſtances of Affairs in general, and thoſe of the Company in particular required, certain Articles in this Plan; yet has it been always conſidered as the Baſis and Foundation of their Privileges, and conſequently it was neceſſary to be well acquainted therewith, in order thoroughly to underſtand the ſubſequent Hiſtory of their Tranſactions.

But firſt, it will be neceſſary to obſerve, that this Edict for the Eſtabliſhment of the Company, was digeſted into forty-ſeven Articles, and that the Value of the original Actions, (and by the way, this was the firſt Time that Word was uſed in *France*) was fix'd at one thouſand Livres, and the ſubſequent Call reſtrained to five hundred more, which Edict of Eſtabliſhment was regiſtered in Parliament the 7th of *Auguſt* 1664.

4. As ſoon as this Edict was publiſhed, his moſt Chriſtian Majeſty ordered the Sum of three hundred thouſand Livres to be paid out of the royal Treaſury, into the Hands of the Caſhier of the *Eaſt-India* Company, and M. *Colbert*, who had been ſo warm and ſo induſtrious in bringing Things thus far, continued to apply himſelf with equal Attention to whatever might promote the Concerns of a Society, that he had taken ſo immediately under his Protection. The Aſſiduity of a firſt Miniſter in *France* is capable of putting any Thing into Motion, as appeared manifeſtly upon this Occaſion, ſince in the following Spring, there ſailed four large Ships from *Breſt* for *Madagaſcar*, all of which arrived ſafely there on the 10th of *July*. This new Colony changed the Name of the Place where they were eſtabliſhed, from *Madagaſcar* to the *Dau-*

phin's Iſland, by which laſt Name it is ſtill known to the *French*, and, according to the Accounts they publiſhed of it, ought to be eſteemed a perfect Paradiſe. In a ſhort Time, however, they began to change their Opinion, either from the natural Levity of that Nation, or becauſe Opportunities preſented of extending their Views in the *Indies*.

Two Perſons offered themſelves upon this Occaſion, to promote the Intereſt of the new Company; the one was Mr. *Caron*, who has been already often mentioned. He was a Native of *France*, but had been for many Years in the *Dutch* Service, and had been raiſed in that Service to the Rank of Preſident of the Factory of *Japon*, where, for Reaſons which we have aſſigned in another Place, he ſuffered ſeverely. And not thinking himſelf ſufficiently conſidered for his Sufferings, quitted the *Dutch* Service, and returned to *France*, at a Juncture when a Man of his Abilities was much wanted, and therefore he was careſſed and employed. The other was Mr. *Marcara*, a Native of *Iſpahan*, in *Perſia*, and nearly allied to ſeveral Perſons of great Rank in that Kingdom, as alſo to ſome who enjoyed Governments, and other great Employments in the *Indies*; he alſo was employed by the Company, and did it conſiderable Service. In Conjunction with Mr. *Caron*, he ſettled a Factory at *Surat*, and, by his own Intereſt purely, procured for them an Eſtabliſhment in the Kingdom of *Golconda*, in the Year 1669.

But it afterwards fell out, that theſe two Gentlemen differed, and Mr. *Caron* ſent home heavy Accuſations againſt the *Perſian*, who cleared himſelf, however, ſo effectually, of all that was laid to his Charge, that he was honourably acquitted, and continued in his Employment. It was alſo in this Year 1669, that the Directors of this *Eaſt-India* Company began to diſtaſte their Settlement in the Iſland of the *Dauphin*, which had been always conſidered as their chief Reſidence; but now they were deſirous of transferring that Honour to *Surat*, to which the Court of *France* aſſented; and that nothing might be wanting for the Support and Encouragement of this Commerce, the Harbour of *Port-Louis* was granted to them, with all its Dependencies, together with full Power to make ſuch Alterations and Improvements as they judged requiſite; and it was in virtue of this Grant, that they built and eſtabliſhed their Magazines at what is now called *Port l'Orient*. But, notwithſtanding all theſe Acts of Favour, the Affairs of the Company were ſo far from taking a ſucceſsful Turn, that it was found, upon ſtating a general Account, that they were indebted in no leſs a Sum than four Millions to the Crown, which, however, the King, agreeable to the Promiſe made them at their Eſtabliſhment, clearly forgave, and took that Loſs upon himſelf.

About this Time, ſome private Perſons, having inſinuated that they were willing to embark their Fortunes in a Trade to the *Indies*, provided they might have the Company's Licence; and the Company likewiſe having ſignified to the King, that it might prove beneficial to them, if they had it in their Power to grant ſuch Indulgence; this Favour likewiſe was added to the reſt, and private Traders were permitted to engage in this Commerce, upon the following Conditions; firſt, that they ſhould tranſport themſelves and their Effects on board the Company's Ships, both coming and going. Secondly, that they ſhould pay their Freight and Paſſage before their Departure. Thirdly, that the Goods they brought home, Jewels and precious Stones only excepted, ſhould be expoſed in the Company's Sales, and their Produce fairly accounted for. Fourthly, that theſe Licences ſhould be in Force only for five Years; and fifthly, that if they ſhould be found prejudicial to the Affairs of the Company, the Directors might abridge or cancel them at their Pleaſure.

There was yet another and ſtill more conſiderable Act of Grace obtained by their powerful Protector Mr. *Colbert*, which was an Exemption from all Duties on the Goods they brought home. But notwithſtanding theſe mighty Advantages, and though they ſcarce aſked any Thing of their Patron but what was granted, yet their Affairs continued declining; and as he died in 1683, the Spirit of this Commerce might be ſaid to expire with him. The Body, indeed, of the Company was kept up, not much perhaps to its Advantage; they had not only a Court of Directors at *Paris*, but, in Imitation of the *Dutch Eaſt-India* Company, Chambers of Direction at ſeveral Ports, a Council in the *Indies*, and, in ſhort, the Appearance and Trappings of a great and powerful Society, when at the Bottom they were diſtreſſed and poor; ſo that upon ſtating a general Account in 1684, it clearly appeared, that inſtead of gaining one Penny by their Commerce, they had actually run out one Half of their Capital, or about three hundred thouſand Pounds of our Money.

This was attributed to ſeveral Cauſes, but principally to theſe three; firſt, to the War with the *Dutch*, which laſted from 1672 to 1678, and of which we have ſpoke largely enough in the laſt Section. Secondly, to the Negligence and Fraud of the Perſons employed in their Service in the *Indies*, who thought, though they were ſent by the Company, they had no other Buſineſs there than to mind their own Intereſts, which they did at the Expence of their Maſters, ſo that ſome private Fortunes were made, while the Concerns of the Publick were running to Ruin; and laſtly, to the Supineneſs, Timorouſneſs, or Inability of their Subſcribers, who had not paid in, as they ought to have done, to the great Detriment of their Affairs. To remedy theſe Diſorders, and to retrieve, if poſſible, the Trade of the ſinking Company, it was reſolved to change the Syſtem of their Government, to ſuppreſs all the little Chambers of Directors, and to put the whole Management of the Company's Concerns into the Hands of twelve Directors reſiding in *Paris*, who were each of them to pay in thirty thouſand Livres upon the forfeited Actions, and to be allowed reaſonable Salaries for the Buſineſs they did. It was alſo reſolved, that all who had not paid in, ſhould forfeit their Shares to the Company, with a Proviſo, that if in two Years they made good their Payments, they ſhould enter into their former Rights, and have all their Actions reſtored.

This Regulation was confirmed by a royal Edict, dated in *February* 1685, by which the King left the Company free Liberty either to reſume the Sovereignty of *Madagaſcar*, which they had ſurrendered in 1670, as has been beforementioned, or to leave it as it then was in the King's Hands. As the Company had thus their Option, and were left at Liberty to do as they thought fit in this Affair, they, after mature Deliberation, thought proper to adhere to their laſt Reſolution, and to quit this Iſland intirely to the Crown; which Act of theirs was confirmed by the King's Arret, bearing Date the 4th of *June*, 1686. All theſe Regulations at home were ſupported by an Alliance abroad, which it was hoped would have had a very good Effect, and totally reſtored the Company's Affairs.

The Hiſtory of this Treaty will be given in the ſucceeding Volume, and therefore we ſhall be very ſhort in what we have to ſay of it here. The King of *Siam*, a very powerful Prince in the *Indies*, had raiſed one Mr. *Conſtance*, who was originally no better than a Servant in an *Engliſh* Factory, to the Rank of his Firſt Miniſter; and he being a bold enterpriſing Man, took it into his Head that it was very poſſible to convert his Maſter and all his Subjects to the Chriſtian Religion, by engaging him in a very cloſe Correſpondence with the Court of *France*; in which laſt Part of his Scheme he ſucceeded ſo well, that not only Miſſionaries were ſent over to convert the *Siameſe*, but a Squadron of Men of War likewiſe, with ſome Troops on board, to make the King as abſolute as his Brother of *France*. This raiſed ſuch a Jealouſy in the Minds of his Subjects as created an univerſal Revolt, in which the King was murdered in his Palace; his Prime Miniſter cut off in the ſame manner, and the *French* Garriſon in the Citadel of *Bankock*, after an obſtinate Defence, totally deſtroyed; and thus ended that Affair, and all the Advantages that were expected from it; ſo that in about two Years time the Company's Affairs were in as bad a Condition as ever, and all the high Hopes they had conceived from the Change of their Adminiſtration, and the grand Alliance in the *Indies* vaniſhed into Air, and were blaſted almoſt as ſoon as they bloomed. This fell the heavier upon them, becauſe abundance of new Subſcribers had been drawn in, which increaſed the Clamour upon their Miſcarriage, and induced a general Opinion that it was abſolutely impoſſible for the *French* Nation to carry on a Trade to the *Indies* with Advantage.

5. But all theſe vexatious Circumſtances at home and abroad were nothing in compariſon of the Loſs of their generous Protector Mr. *Colbert*, who was ready at all times to exert his Influence in their Favour, and whoſe Influence was ſo great, that he never exerted it in vain. There was nothing of Self-Intereſt, or Views of private Advantage in this Conduct of his; he acted purely from a Principle of publick Spirit, and the Deſire he had of contributing to the Glory of his Prince, by purſuing what he took to be the true Intereſt of his Subjects. Theſe, it muſt be confeſſed, were great and laudible Notions, and ſuch as he carried into Action with ſurpriſing Succeſs; yet, taking all this together, it is perhaps the cleareſt and moſt convincing Argument, that the *French* Nation are altogether incapable of carrying ſuch great Deſigns into Execution, with ſuch Advantage to themſelves as accrues to their leſs powerful Neighbours, becauſe it is impoſſible that Trade ſhould flouriſh in a Country where its Welfare muſt depend ſolely on the Will and Capacity of a ſingle Perſon.

Accidents are not to be truſted to, eſpecially in Matters of Property and Things of Importance. Yet what greater or more apparent Accident can there be than the riſing of an able, experienced, and honeſt Miniſter, in an arbitrary Government? It is ſuch an Accident as not only ſeldom happens, but is very rarely to be expected; and when it does happen, like every other accidental Good, miſleads unwary Minds, and makes Men miſtake for a ſolid and certain Foundation, what is in Fact no more than a lucky Continuance of Things in the ſame Poſture; ſo that ſuch as are tempted to hazard their Subſtance in building upon ſuch a Baſis, are not to be eſteemed wiſer than if they were drawn in to contribute to the erecting a large Structure upon the Ice, becauſe it had been known to remain firm for nine or ten Weeks.

As theſe are reaſonable and juſt Principles in themſelves, ſo, in this Caſe, they were fully juſtified by Experience. The Succeſſor of Mr. *Colbert* was Mr. *Pont-Chartrain*, a Man who was far from wanting Abilities, or being deſtitute of Probity, but whoſe Notions with reſpect to Commerce were either crude and indigeſted, or, which was worſe, narrow and obſcure. He was, from the Beginning of his Adminiſtration, no Friend to the *Eaſt-India* Company, as appeared very clearly by his croſſing every thing they aſked, and countenancing every Attempt that was made againſt them. To enter into a long Detail of the Facts neceſſary to juſtify in its largeſt Extent this Obſervation, would be at once tedious to the Reader, and draw me much beyond the Bounds I have preſcribed to myſelf in this Work, therefore I ſhall take Notice of one Thing only, which is this; the *Eaſt-India* Company finding that all Sorts of painted Cottons, gold and ſilver Brocades, and ſuch other ſhowy Goods as they imported from *India*, went off at a great Rate in *France*, they ſtruck into that Trade, and began to make conſiderable Advantages of it. This encouraged them to venture upon another Undertaking, which was the importing vaſt Quantities of white Cottons, and cauſing them to be painted in *France* after the Manner of the *Indies*, which occaſioned a prodigious Outcry among the Manufacturers in *France*; who ſet forth, that the Sale of theſe Cottons and Silks was exceſſively injurious to them; and that if they continued, it was impoſſible that their Manufactures ſhould ſubſiſt.

Upon the Repreſentation of theſe Things to the Prime Miniſter, he took the Thing ſo warmly, that he immediately procured an Edict, dated the Twenty-ſeventh of *January*, 1687; by which the importing them was abſolutely prohibited. On the Application, however, of the *Eaſt-India* Company, and the Interpoſition of ſome Friends at Court, which they had ſtill left, the Execution of this Law was, in ſome meaſure, ſuſpended in Favour of the Company; that is to ſay, they were allowed a certain Space of Time, in which to diſpoſe of the Goods then in their Hands; as alſo of ſuch as might be brought from the *Indies* within a limited Time: But the great Blow was not to be parried; and the Edict, which required the deſtroying all the Molds, and other Utenſils for painting Linnen in *France*, was to take place abſolutely on the Firſt of *January*, 1689. The Company indeed endeavoured, and by the Help of its Friends made great Efforts to defeat this Deſign; but all they could do proved ineffectual in the main, and procured only a Suſpenſion for three Months; and, in the mean time, they were obliged to take back what they had ſold to private Merchants, and to return them their Money. As to the gold and ſilver Brocades, and other *Indian* Silks, they were permitted to import theſe to a certain Value, *viz.* One hundred and fifty thouſand Livres; but this was upon Condition, that they exported to the Amount of Five hundred thouſand Livres in *French* Manufactures; and they were afterwards reſtrained to the Exportation of ſuch Manufactures only as would ſell to Profit in the *Eaſt-Indies*. The Company's Commerce was before declining, and they had but this ſingle Chance of ſupporting themſelves by the Humour which prevailed of buying theſe printed Cottons, Brocades, and Silks; ſo that the Reader may eaſily judge that when this Prohibition came to take place, it gave the Death's Wound to their Trade.

It muſt however be owned, that upon certain Occaſions they did procure the Diſpenſation of this Law for a certain Space of Time, which might afford them a temporary Relief, and juſt keep them from ſinking: But they had no longer a Power of trading as a Company; their Factories in the *Indies* grew low, thoſe who were employed in their Service loſt their Credit, and the *French* Flag in the *Indies* was little regarded, and indeed ſcarce known. The Farmers-General of the King's Duties likewiſe attacked the Company; and as their Employments gave them the Ear of the Miniſters, they were almoſt always too hard for them; ſo that, by degrees, the Company loſt the Benefit of moſt of thoſe great Privileges which had been procured by Mr. *Colbert*, and yet without their being taken away; for in *France*, and perhaps in ſome other Countries, Methods are found out for eluding the Laws by the Manner of executing them, and without any formal Repeals. Some other Laws were likewiſe made for laying Penalties upon ſuch as dealt in wrought up, or in any way expoſed to Sale any Chints, or any other painted Cottons; which being executed with great Severity, put a full Stop to that Branch of Trade, as the want of Money had done to moſt other Branches. So that between thoſe Oppreſſions peculiar to themſelves, and the Miſchiefs they endured in common with the reſt of the Subjects of *France* by the long Continuance of the War, they found themſelves in ſo low a Condition as to be ſcarce able to keep up the Appearance of the Company; and thoſe who had formerly yielded them Aſſiſtance at Court began to be tired, and liſtened no longer to their Sollicitations.

There aroſe likewiſe a new Spirit in *France* of curbing and diſtreſſing this almoſt broken Company, under Colour of augmenting the Revenues of the Crown, and protecting the Manufactures which afforded Bread to the People; under Pretence of which, they firſt reſtrained the Company from ſelling Chints and other Piece-goods to Foreigners, which was not only a very great Loſs to the Company, but to the *French* Nation in general, among whom the Money would have infallibly circulated for which theſe Manufactures had been ſold; whereas, by this Prohibition, ſo much ready Money was kept out of *France*, and not a Thread more of their own Manufactures vended. Afterwards a Duty was laid upon the raw Silk, which they imported: And notwithſtanding this produced a great Sum of Money, yet it was not long before a Prohibition was applied, under Pretence that the Company importing every Year ſeven thouſand Pounds of raw Silk, did thereby great Damage to one of the ſtaple Commodities of the Kingdom; whereas, in Truth, the greateſt Part, if not all this Silk, was ſold by Strangers: But it was the Misfortune of the Company, that while they were diſtreſſed and ill treated abroad, on purpoſe to drive them totally out of the *Indies*, they were envied and perſecuted at home, on account even of that ſmall Trade which they drove thither; and all this under the plauſible Appearance of publick Spirit, and Concern for the Poor; but, in reality, from private Views and ſelfiſh Principles, as will be ſhewn hereafter.

The Miniſters that then governed *France* were very different from M. *Colbert*; they were unacquainted with the extenſive Nature of Commerce, took every Thing that was alledged by the Farmers of the Revenue on one Side, and by the Agents for Manufactures on the other, for granted, and made whatever Orders were deſired on either Side; but, as for the Company, their Applications were continually ſlighted; and the Decay of their Commerce, though produced by theſe very Meaſures, was pleaded as a ſufficient Excuſe for this Treatment, and made a Reaſon for continuing it. In the mean time all their Settlements abroad were ſinking as faſt as they could; and the few Servants they had were not ſo much bound by a Senſe of Duty, as fixed to the Places where they reſided by the great Debts they had contracted, and which neither they nor their Maſters knew how to diſcharge. But as the Scene ſoon after changed ſurpriſingly, and as this Company has ſince made ſome kind of Figure, it will be neceſſary to enter more particularly into the Hiſtory of their Settlements in the *Indies*.

6. We have already obſerved, that when the Company was erected, they placed the Seat of their Government, and propoſed to fix their capital Settlement in the Iſland of *Madagaſcar*, which, in a warm Fit of Loyalty, they called the Iſland of the *Dauphin*, and which they repreſented to the World in the faireſt Light poſſible. They ſuggeſted, that the Climate was extreamly agreeable, not warmer for two Thirds of the Year than it is in *France*, during the Spring, and not hotter for the remaining four Months than it is in that Kingdom, during the Summer.

The Country abounding with fine Fruits, wholeſome Herbs, and pleaſant Roots, producing three Crops of Rice in a Year, and all Sorts of *European* Grain, better in Kind, and more in Quantity, than in any Part of *France*. They added to all this, that there grew Vines there naturally, which bore admirable Grapes, and from which it was very practicable to make excellent Wine. As to Animals, beſides black Cattle in Abundance, it afforded Goats, Swine of ſeveral ſorts, and many other uſeful Creatures. In Point of Riches, they affirmed, that there were Mines of Gold, which, by the way, could never be found, beſides Iron, Lead, and other Metals: They, with more Truth, aſſerted, that Cotton, Wax, Sugar, black and white Pepper, and Indigo, might be raiſed there to Advantage; that the Country afforded both Mulberry-trees and Silkworms, and that there was great Store of Ebony, and other rich Woods. The Colony they ſettled there coſt them immenſe Sums, and remained for ſome Years in a very flouriſhing Condition, ſending home yearly ſeveral Ships richly laden, and would very probably have anſwered their Expectations, if they could have had Patience.

But after they had once ſettled Factories in the *Indies*, thoſe who were in the Company's Service, found it ſo much eaſier to raiſe Fortunes for themſelves in theſe Settlements, that by their Repreſentations they procured the Removal of the Council of the *Indies* to *Surat*, where they built a moſt noble and convenient Houſe, and added to it Warehouſes, Magazines, and other Offices, much ſuperior to the Trade which they had eſtabliſhed to ſupport it, and from theſe exceſſive and extravagant Expences their firſt Misfortunes aroſe.

7. But after the laſt *Dutch* War, in which they made themſelves Maſters of *St. Thomas*, which they loſt again to the *Dutch*, the Sieur *Martin* retired to a Place called *Pondichery*, where, by the Leave of the Viceroy of the King of *Viſapour*, he ſettled himſelf. This was in the Beginning of the Year 1674, and as the Company had at that Time a great Demand for Piece-goods, it was thought they could not eſtabliſh themſelves in a better Place. It was for this Reaſon, that the *French* Company commiſſioned M. *Martin* to procure that Place for them, on the beſt Terms he could; with which Order he complied exactly. This Gentleman appears to be one of the honeſteſt and moſt capable Perſons they ever had in their Service; and he procured from the Governor, who firſt gave him Leave to ſettle there, a Licence to fortify, and to ſecure his People and Effects in the beſt Manner he could, which he accordingly did, and ſettled under the Protection of his Factory a little *Indian* Village, of about forty Houſes, in which thoſe who wrought for the Company lived quietly and happily.

Things had not remained long in this Condition, before he was threatened with total Ruin; for the famous *Seva-Gi* falling with a vaſt Force into that Part of the Country, endeavoured to overwhelm him as a Dependent upon his Enemies. However, M. *Martin* ſupplied by Prudence what he wanted in Force; and, by a timely Application, brought about a Treaty, which was managed on his Side by an *Indian* Prieſt, which ended in a Licence to trade in his Dominions, for which he paid one thouſand ſix hundred Rupees. This was in the Year 1680, and he had the Year before purchaſed the Territory of the King of *Viſapour*, whoſe Inheritance it was; ſo that now he was tolerably ſecure, only he was apprehenſive, that the Son of *Seva-Gi*, who was Sovereign of the Place, might take it amiſs, if he preſumed to raiſe a regular Fortification without his Conſent, which he obtained in 1689, and then put it in a Poſture of Defence. This was a very timely Proviſion; for the *Dutch* began to be extreamly diſturbed at the flouriſhing Eſtate of this little Colony, and offered very large Preſents to the Rajah, in whoſe Dominions it lay, in caſe he would diſpoſſeſs the *French* of *Pondichery*; but the *Indian* Prince, who was alſo Son to *Seva-Gi*, rejected theſe Offers with Contempt. He ſaid, the *French* had fairly purchaſed that Settlement; that they had applied to his Brother for a Protection, for which they paid him a valuable Conſideration; and that, therefore, all the Money in the World ſhould never tempt him to diſlodge them: A glorious Inſtance of the natural Probity of the unconquered *Indians*, and which deſerves more Praiſe from Mankind than the moſt extenſive Conqueſts.

The *Dutch*, however, reſolved to carry their Point, and the War having broke out between them and *France*, they made Diſpoſitions for attacking it by Force, which, however, they did not do till the Year 1693, when they came before the Place with a Squadron of nineteen Sail, landed an Army of between two and three thouſand Men, with a fine Train of Artillery, and ſix Mortars. To make their Conqueſts the ſurer, they applied to the new Rajah, who was not of the ſame Temper with the old one, and for the Sum of about twenty thouſand Pounds of our Money, purchaſed the whole Diſtrict in Property. They then inveſted and attacked the Place, which, after a good Defence, M. *Martin*, who was then Director-General for the *French Eaſt-India* Company, ſurrendered upon very honourable Conditions, on the 6th of *September*, 1693. This Stroke, which ſeemed to put an End to the Company's Authority in thoſe Parts, proved, in its Conſequences, the happieſt Thing that ever befel them. For the *Dutch* were no ſooner in Poſſeſſion of the Place, than they raiſed new Walls, ſeven regular Baſtions, and whatever elſe was neceſſary to render it one of the compleateſt Fortreſſes in the *Indies*.

In the Year 1669, upon the Concluſion of a general Peace, the Place was reſtored to the *French*, who thereby acquired the Property of *Pondichery*, and all theſe fine new Fortifications, and this for ſo trifling a Sum as five thouſand Pounds, which they paid to the *Dutch* Governor, upon his delivering up all that he was poſſeſſed of, which probably he would never have done, if he had not been compelled thereto by the Orders of the *States-General*, who, as they were great Gainers by that Peace in *Europe*, would not perplex themſelves with the Diſputes between the two Companies.

8. As ſoon as the News of this was brought into *France*, the *Eaſt-India* Company received Orders from the Government to put that Place into ſuch a Condition, as that, in caſe of a ſecond War, they might not loſe it ſo eaſily as they had done before; and, to enable them to do this, a Squadron was ſent from *France*, with two hundred regular Troops, for the Augmentation of the Garriſon; ſeveral able Engineers, a vaſt Quantity of military Stores, and whatever elſe was requiſite to ſecure *Pondichery* from any future Attempts of the *Dutch*. The Sieur *Martin* was again

intruſted with the Command of the Place, which in the Space of four or five Years he ſo changed, as that it was ſcarce to be known. He not only compleated the Fortifications according to his Inſtructions, and aſſembled a good Garriſon of ſeven or eight hundred Men, but likewiſe built one hundred new Houſes, and laid out a regular Plan for a large Town, into which, by his own Prudence and good Management, he drew, within the Space of five Years more, fifty or ſixty thouſand Inhabitants; ſo that in the Year 1710, it was become one of the moſt conſiderable Places in the *Indies*, in the Hands of the *Europeans*; and if the Affairs of the Company in *Europe* had kept Pace at all with the Improvements made by this Gentleman in the *Indies*, the *French* Company might very ſoon have been upon a Level with their Neighbours the *Engliſh* and the *Dutch*.

This, however, was ſo far from being the Caſe, that both this Gentleman and ſucceeding Governors were obliged to find Ways and Means to ſupport themſelves; the Factory and the Town, by the Trade carried on in it, and by the Induſtry of the *Indians* ſettled there, in which they were ſo fortunate, that while the Company was daily declining at home, every Thing carried the Face of Plenty and Proſperity there; and none knew or felt Difficulty or Pain, but the Governor and their Council, who yet were never tempted to oppreſs the People with Taxes, or to endeavour to make their own Circumſtances eaſier, by laying any Part of the Load upon others. It is true, that when the Town grew too large for the old Fortification, it was found neceſſary to ſurround it with a new Wall; but how clear ſoever that Neceſſity might appear, and however advantageous for the People, yet the Governor found it abſolutely impracticable to defray the Expence without the Aſſiſtance of the Inhabitants. In order to procure this, he acted with equal Integrity and Caution; for, having firſt ordered the Wall to be marked out, and Part of it to be erected at each End, he thereby ſhewed his People at once the Advantages which would be derived from ſuch a Fortification, and the Expences that would attend it; ſo that when, in order to compleat his Deſign, he impoſed upon the Inhabitants a Tax of Two-pence a Month for every Head, they were equally ſatisfied, as to the End for which it was impoſed, and the Sum that would be raiſed by this Impoſition, and therefore, inſtead of murmuring or complaining, they paid it with the greateſt Chearfulneſs, and gave the Governor hearty Thanks for the Care taken of their Intereſt.

I have dwelt the longer on this Incident, for a very particular Reaſon, with which, when communicated, I am thoroughly ſatisfied, the Reader will be very well pleaſed. The *French*, who in *Europe* pride themſelves ſo much in the Grandeur and abſolute Power of their King, and talk in ſo high a Strain of his Conqueſts, affect quite another Language in the *Indies*; for they value themſelves there upon their Juſtice and Moderation; their having purchaſed the ſmall Territory, which they poſſeſs; their having lived always upon good Terms with their Neighbours, and their eſtabliſhing ſo large a Town, and acquiring ſo many thouſands of Subjects, purely by the Equity and Mildneſs of their Adminiſtration: The Fact is equally true and ſtrange, at the ſame Time that it demonſtrates that common Senſe directs all Nations to think the ſame Way, and that the great Difference of Opinions, and what we call the Temper and Diſpoſition of Nations, ariſes purely from Accidents in Education and Government. Independent of theſe, Reaſon is every where the ſame, and Men think exactly alike, which ſhews the Reality and Certainty of the Laws of Nature, to which all Men return of themſelves, when the Influence of Power, and other accidental Reſtraints are removed.

9. As we have ſhewn by what Courſe of Events this Town then of *Pondichery* is become the chief Seat and capital Reſidence of the *French Eaſt-India* Company, it will be neceſſary to give the Reader a more particular Deſcription of it, and of the Government eſtabliſhed therein. The Town of *Pondichery* is ſituated in the Province of *Gingy*, on the Coaſt of *Coromandel*, in the Latitude of twelve Degrees North, and in the Longitude of one hundred and fourteen from the Meridian of *Paris*. It ſtands at the Diſtance of one hundred Yards from the Sea ſhore, and has nothing more than a Road before it; ſo that they are obliged to carry all their Goods in Boats for a full League. The Magazines of the Company, and of private Perſons, are both numerous and magnificent, as far as any Thing of this Nature can be ſo; they have a large and very beautiful Market-place, ſix fine Gates, eleven Baſtions for the Defence of their Walls, a regular Citadel well fortified, upwards of four hundred Cannon upon their Works, beſides a good Train of Field-pieces, Bombs, Mortars, and other military Stores in their Arſenal.

The Governor has a very fine Houſe, with convenient Offices, and whatever elſe is requiſite for the Service, or Credit of the Company. On the Weſt-ſide of the Town the Company have a very fine Garden, beautifully laid out into publick Walks, and whatever elſe may contribute to the Satisfaction and Pleaſure of the wealthier and better Sort of Inhabitants: adjoining to which Garden, there is a very fine Houſe, richly furniſhed, made uſe of for the Reception of foreign Princes and Ambaſſadors, who, whenever they reſort thither, are treated with infinite Reſpect, and all their Expences defrayed by the Company, which has been found a very wiſe and uſeful Contrivance, of much more Conſequence to the Intereſt of their Commerce, than the Expence it occaſions. The other publick Buildings conſiſt of a large Convent of the Jeſuits, where they have uſually twelve or fifteen Prieſts, who, beſides officiating in that Character, likewiſe teach School, and inſtruct the Children of the Inhabitants in Reading, Writing, and the Mathematicks, and whatever elſe may be of Uſe in civil Life; for, as to the learned Languages, they trouble not themſelves about them, and indeed, the Knowledge of them would be of little Service in this Part of the World: There are, beſides that of the Jeſuits, two other Convents, but not ſo conſiderable by any means as the former. The Houſes of the Town are as regularly laid out, as if it had been all built at once, tho' it is now near four Leagues in Extent. The *Europeans* build with Brick, but the *Indians*, and other Nations, uſe only Wood, building in that Manner which we call here in *England* Lath and Plaiſter. For the latter, they have the beſt in the World, which is compoſed of all Sorts of Shells ground to Powder, and wrought up into a kind of Paſte, which when expoſed for ſome Time to the Air, becomes altogether as white, and almoſt as hard as Stones.

Theſe Houſes are one Story only, and are uſually eight Yards in Front, and ſix in Depth, and yet there are fifteen or twenty People live in them. They are but very indifferently lighted, ſo that it is not eaſy to conceive how they are able to diſpatch their Buſineſs in them. Their Roofs are all flat, for the Conveniency of lying upon them, which they do almoſt naked, agreeable to the Cuſtom of the Country; for *Pondichery*, lying in the Torrid-zone, is extreamly hot, tho' otherwiſe the Climate is found by Experience very wholſome. One Thing there is in it very ſingular, and which therefore deſerves Notice, and this is, that it never rains there, except ſeven or eight Days at the moſt, towards the End of *October*, which falls out regularly, and is therefore the more ſingular and extraordinary. The native *Indians*, or as they are called here *Gentiles*, are moſt of them Weavers, or Painters; and tho' the very beſt Workman cannot earn above Two-pence a Day, yet upon this he is able to ſubſiſt himſelf, his Wife, and his Children; their principal Food being Rice boiled in Water, or wrought up into a Paſte, and baked upon the Coals. The Country round about is extreamly well cultivated, and produces Rice in Abundance, ſo that there is hardly a Place in the *Indies* of greater Plenty, or where they have Fleſh, Fiſh and Fowl, on more reaſonable Terms; and this, notwithſtanding they have no other Water than what is derived to them from the overflowing of the *Colram*, and other great Rivers, which they preſerve in Lakes, or Ponds, and draw it for Uſe, through their Country, in artificial Canals, after the ſame Manner as in *Egypt*.

The Governor General for the Company, as he is lodged in a fine Palace, ſo he makes a Figure equal thereto in every Reſpect. He has twelve Horſe Guards cloathed in Scarlet, lac'd with Gold, and an Officer with the Title of

Captain who commands them; he has alſo a Foot-Guard of three hundred Men, Natives of the Country, called *Peons*; and when he appears in publick, he is carried in a Palankin very richly adorned with gold Fringe. But all this Pomp and State is diſplayed only on proper and particular Occaſions, upon the receiving of Princes, or Ambaſſadors; at other Times his Guards are employed in the neceſſary Service of the Company, and earn to the full the Wages they are paid; for, as we have already ſhewn, there are few Settlements better regulated, or more diſcreetly governed than this, which the Reader will more eaſily believe when he is told, that, according to the laſt Account taken of the Inhabitants of this Place, there appear to be in it no leſs than one hundred and twenty thouſand Chriſtians, Mohammedans and Gentiles; a thing altogether incredible, if the Fact was not ſupported by Teſtimonies, the Authority of which is not to be diſputed.

There cannot be a Place better ſeated for Trade than this, being in the midſt of the *European* Settlements on the Coaſt of *Coromandel*, and having all the Bay of *Bengal* open before them; ſo that here the Company's Magazines are full of all the Commodities and Manufactures, not only of the Coaſt of *Coromandel*, but of other Parts of the *Indies*; ſuch as *Bengal*, *Surat*, and the Coaſt of *Malabar*, as alſo of ſuch as are imported from *Perſia* and the Coaſt of the *Red Sea*; and here likewiſe are their Warehouſes for all ſorts of *European* Commodities, which are conveniently tranſported from thence, as Occaſions require, to all the Markets in the *Indies*. The ſtaple Trade however of the Place is eſteemed to be Piece-goods, of which the fineſt are made in the neighbouring Kingdom of *Golconda*, and the beſt painted here; they likewiſe have great Quantities of Silk raw and manufactured, Gold and Silver Brocades, Perfumes, Spices, and Diamonds; in which laſt Trade they are ſaid to have made a great Progreſs of late, and for which it is certain they are very conveniently ſituated, as being at a very ſmall Diſtance from the fineſt Mines in the *Indies*, and by having amongſt them Perſons as well ſkilled in Jewels as any in the World. The *French Eaſt-India* Company therefore can neither be blamed for their Choice of this Reſidence, which, all things conſidered, is the fitteſt for them of any in the *Indies*, or for the Pains and Expence they have beſtowed about it, amounting, in the Whole, to about eight hundred thouſand Livres, or forty thouſand Pounds Sterling. Since thereby they have rendered it ſo ſtrong and ſo commodious, that it might very eaſily drive ten times the Trade they have ever had in this Part of the World.

10. We are now to return into *France*, and to conſider the Situation of Things, with reſpect to the Company, as low as the Demiſe of the late King *Lewis* XIV. The War, as it brought numberleſs Miſchiefs on all other Branches of the *French* Commerce, ſo it particularly affected the *Eaſt-India* Company, and this as much through the wrong Notions that were formed of that Trade at home, as from the Interruptions it met with abroad. The Farmers of the Royal Revenue not only continued their Perſecutions, by attacking from time to time the Privileges of the Company, and almoſt always without Succeſs; but new Enemies were daily ariſing, that added to the Number of their Hardſhips and Misfortunes.

The Office of High Admiral, which had been for a long time ſuppreſſed in *France*, was given by the King to his natural Son, the Count of *Toulouſe*, who took Exceptions againſt two Privileges of the Company. The firſt granted them the entire Property of all the Prizes taken by Ships in their Service; and the ſecond exempted them from the Rights of the Admiralty, in regard to Wrecks. This occaſioned a very long Diſpute, which at laſt ended in a Deciſion contrary to the Intereſt of the Company. It appeared clearly from hence, that, on the one hand, the Company had entirely loſt its Credit at Court; and on the other, that their Privileges were far enough from reſting on a firm and ſettled Foundation, ſince they were liable, at every Turn, to be ſubverted and taken away by ſuch kind of Judgments to the Company's Prejudice.

Such a continued Series of Miſchiefs and Misfortunes not only cruſhed the Trade, but broke the Spirits of the Company, and that to ſuch a degree as to oblige them to have recourſe to Expedients for their own Support, which were not very advantageous, though at the ſame time they were highly diſhonoured. We have before obſerved, that in the Year 1682, they had entered into a Scheme for permitting private Trade upon certain Conditions, which we have mentioned; but their Affairs were now fallen into ſuch Diſorder, that they were not only content to ſuffer private Perſons to ſhare in their Trade, but even to reſign it to them, and that upon very moderate Conditions.

Accordingly, in 1708, they granted Leave to Mr. *Croizat* to fit out two Ships in the Name of the *Eaſt-India* Company, upon Condition that he paid them fifteen *per Cent.* upon all the Goods imported under this Privilege, and two *per Cent.* upon all the Prizes they ſhould make beyond the Line; with a farther Reſervation, that the Company might be at Liberty to bring home on board his Ships ten Ton of whatever Commodities they pleaſed, without paying any Freight. The Reaſon they aſſigned for this extraordinary Step was, that their Affairs were become ſo embarraſſed, and the Perſons employed in their Service ſo loaded with Debts, that without the Aſſiſtance of this Project they muſt have been obliged to relinquiſh their Settlements in the *Indies*. It is reaſonable to believe, that they found from this Expedient ſome little Relief, which induced them to extend their Project, and for the Preſervation of their Servants in the *Indies*, who by this time were above ten Millions in Debt, they fairly ſacrificed themſelves.

For in the Year 1712, they entered into a Treaty with ſome private Traders at *St. Malo's*, by which they yielded up to them all their Privilege as a Company, upon the beſt Terms they could obtain; and this with a View to furniſh ſuch as were employed by them in the *Indies* with Sums ſufficient to keep under the Intereſt of their Debts, and thereby prevent all things from falling into Confuſion. A miſerable Situation this, and yet the Company found themſelves unable to undertake any thing upon their own Bottom; ſo that on the Expiration of their own Privileges, about the Time of this King's Death, they warmly ſolicited a Renewal of them, not from any Hopes of reviving their Trade, but purely with an Intention to renew their Agreement with the Merchants of *St. Malo's*, that they might gain enough thereby to preſerve their Settlements, and not ſuffer ſuch as they had employed to be utterly undone in their Service.

It is very clear from hence, that the Ruin of the *French Eaſt-India* Commerce has hitherto been the Nature of their Government, which is a Point I ſhall take the Liberty of laying open, for the Information and Satisfaction of the *Engliſh* Reader. In the firſt place, I muſt obſerve, that the Edicts for their Eſtabliſhment, and the extenſive Privileges granted by them, though they are, in one Senſe, neceſſary to the Being and Foundation of the Company, yet are hurtful and diſadvantageous to it in another. Since though few dare expreſs their Thoughts freely upon the Subject, yet all Men of good Senſe cannot help diſcerning, that in a Country where ſo much depends upon the Will and Pleaſure of the Crown, no Commerce can ever be ſecure; for as the ſame Power that gives may take away, ſo it may likewiſe alter, abridge, and even deſtroy by new Edicts any of thoſe Privileges, though granted and confirmed in the ſtrongeſt Terms that Words can expreſs.

In the next place, as the Company muſt be almoſt ſupported by Acts of royal Favours, ſo the obtaining theſe muſt always depend upon the Temper of the Adminiſtration; or, in other Words, and in plain Terms, upon the Will of the Prime Miniſter for the Time being; which is ſuch a dangerous and precarious Tenure, that no Man, who thinks at all, can believe he has any Property while it depends thereupon. In the third place, the Maxims of the Government rendering it abſolutely neceſſary to prefer the Intereſt of the Royal Revenues, upon which the Adminiſtration of the Government itſelf depends, to any other Intereſt whatever; this is ſuch a Source of Danger

ger and Diſquiet, as muſt neceſſarily baniſh all Truſt and Confidence in the Faith of ſuch a Government. Hence it may be obſerved, in the fourth Place, that ſuch as are engaged in the Management of a Company's Concerns, under ſuch Circumſtances, will look very little farther than the Time preſent; and, inſtead of placing their Hopes in the future Succeſs and Proſperity of ſuch a Company's Affairs, will confine their Views to the making the moſt they can of immediate Advantages, in order to ſecure (if poſſible) their private Fortunes, let what will become of the Publick.

Laſtly, we may eaſily diſcover, from theſe Reflections, how it came to paſs, that private Traders in *France*, ſuch as the Merchants at *St. Malo's* were able to increaſe their Fortunes, and carry on a Trade to the *Eaſt-Indies* with Advantage, under the Authority of a Company that was, in a manner, become bankrupt; and this, notwithſtanding they paid conſiderable Sums out of their Profits for participating in its Privileges; for, as private Men, they could drive a good Bargain with the Company, with ſome reaſonable Aſſurance of having the Terms of their Contract comply'd with, becauſe made only for a certain Time; enjoying alſo the full Benefit of thoſe Settlements which the Company had made, without contributing any thing to the Expence which they originally coſt, or even to that by which they were ſupported; ſo that, conſidered in this Light, the Company ſtood between them and the Government, and theſe private Traders might be ſaid to enjoy in *France* itſelf, thoſe Advantages that could be expected only in a Land of Freedom, and by the Enjoyment of which ſolely their Trade became advantageous.

The more we reflect upon theſe few Obſervations, the more muſt we be convinced, that it is not from any Defect in the Country, any Want of Skill or Induſtry in the People, but for the Want of a right Government in *France*, that her Trade has never been eſtabliſhed on a ſecure and ſolid Baſis. This likewiſe demonſtrates, that however dangerous and deſtructive the Ambition of this Power may be to her Neighbours, from that arbitrary Force, with which, by the Policy of her Miniſters, ſhe has been long armed; yet this, at the ſame time, is an Evil that preys upon her inward Strength, and keeps her in a continual, though ſlow Conſumption; ſo that if her Neighbours would but unite among themſelves for their own Defence, the arbitrary Diſpoſition of the Court of *France* muſt neceſſarily return upon itſelf, and ſooner or later procure its own Diſſolution.

There are, however, certain Seaſons, when from a Variety of Accidents, there appears even in ſuch a Government a ſtrong Spirit of promoting the publick Welfare, not from any real Principle of that kind, but to cover ſome other Deſign, which could not otherwiſe be carried into Execution: As for Inſtance, upon Changes of Adminiſtrations, more eſpecially in Minorities, when ſuch as are at the Head of the Government find the Meaſure of their Power muſt, in ſome meaſure, depend upon the Extent of their Reputation. At ſuch Times as theſe, I ſay, there may be a temporary Ceſſation of thoſe pernicious Notions which infect the Heads and Hearts of arbitrary Rulers, or, which is the ſame thing to the People, a Suſpenſion of the Practices which flow from them; ſo that, for ſome little Time, the Government ſeems to act upon new Principles, and conſequently Affairs change their Face in the ſame Proportion.

This happened to be the Caſe at the Period of Time, when the *French Eaſt-India* Company were ſtruggling for a new Grant of the Privileges which they had enjoyed for fifty Years, though ſometimes in a larger, ſometimes in a leſs Degree. But the Renewal of theſe Privileges in that State in which they then ſtood, was all that they deſired, to have them augmented was what they ſcarce hoped; but to have this done, and their Term rendered perpetual, exceeded the Limits of their Expectations, and was entirely owing to ſuch a Revolution in their Government as has been before-mentioned, and which it is now neceſſary that we ſhould deſcribe as clearly, and at the ſame time as conciſely as poſſible.

11. The Duke of *Orleans*, who defeated the old King's Will, and, in ſome meaſure, eſtabliſhed a new Government in *France*, contrary alike to the Wiſhes of the moſt potent of the Nobility, and of the meaner ſort of People, found himſelf obliged therefore to ſuſtain his Authority, by endeavouring to acquire to his Adminiſtration ſuch a Reputation as had never attended all the Victories and Power of *Lewis the Great*. It was with this View, that from the Time he took the Reins of Government into his Hands, he affected to act on Maxims directly oppoſite to thoſe of his Predeceſſors; he declared openly, that the great End of Government was the Good of the People; that it was impoſſible this ſhould be promoted by being engaged in perpetual Wars, or in continual Quarrels with their Neighbours; that Peace was an univerſal Bleſſing, and muſt therefore be the Intereſt of *France*, as well as of all other Nations; that Commerce was the natural Produce of ſettled and quiet Times; and that the Effects of an extenſive Trade were more certain Reſources of Power and Strength than Conqueſts, or arbitrary Dominion.

Whether the Duke-Regent was perſuaded of the Truth of all this, or whether he pretended only to be ſo perſuaded, is a Point not at all important for us to determine, ſince it is ſufficient for our Purpoſe that he acted upon theſe Maxims, whatever he might believe about them; and that by acting upon them, he really carried his Point, and came to be conſidered as a Prince who had great Notions of Liberty and Commerce. The *Eaſt-India* Company therefore, or at leaſt ſuch as had the Management of the Affairs of the Company, entertained the warmeſt Hopes of Succour and Protection: For though, before the Death of the late King they had obtained a Prolongation of their Privileges for ten Years, to be accounted from the Firſt of *May*, 1715; yet this, like moſt of the royal Favours they had received, was of very little Uſe, ſince they had no Funds left for the carrying on their Commerce; and, beſides, the Term they now had was ſo ſhort, that it added very little to their Credit at home or abroad. It was from the Duke-Regent that they expected more ſolid Aſſiſtance, and ſuch Helps from the Treaſury as might enable them to revive their Trade.

But the Regent and his Miniſters were in Sentiments quite oppoſite to thoſe the Company had flattered themſelves with, and, inſtead of being at all inclined to part with Money out of the Royal Treaſury, for other People to employ in Trade, they were contriving how to make Uſe of the Sound and Reputation of Commerce to fill the King's Coffers, to pay off the Debts of the Crown, and to diſcharge the Loads which lay heavy on the Government upon the Shoulders of the Nation, by that Series of Contrivances which are ſtill known in *France* by the Name of *the Syſtem*. It was with this View that the Regent ſhewed ſo much Favour and Kindneſs to the *Weſt-India* Company, and eſtabliſhed its Capital at One hundred Millions, and thereby procured an Opportunity of leſſening that immenſe Quantity of Paper-Money which the long War had made requiſite. But when the *Eaſt-India* Company came to repreſent the Condition they were in, and to ſue for Aſſiſtance and Protection, they ſoon found that they had to do with thoſe who underſtood their Affairs to the full, as well as themſelves; therefore, inſtead of governing them as they had done former Miniſters, they were forced to put themſelves entirely into their Hands, and truſt abſolutely to their Generoſity and Diſcretion.

The Conſequence of this was, very probably, what they had not foreſeen, ſince it proved to be the Diſſolution of the Company, or, which is the ſame thing in other Words, the Union of it to the *Weſtern* Company, which had already ſwallowed up ſome others. This Edict of Union or new Eſtabliſhment extinguiſhed the Title of both the Companies, as well as of the reſt of the Societies compriſed therein, and gave to the whole the comprehenſive and ſignificant Title of the *Company of the* Indies. In the Preamble of this Edict, we have an excellent Hiſtory of the Tranſactions upon which this Union of the Company was built; for therein it is ſaid, that the King having principally applied himſelf to the reſtoring the Commerce of the Kingdom, and thereby repairing the Loſſes and Decays occaſioned by a very long and expenſive War;

and having already had the Pleaſure to ſee the Circulation of Money wonderfully quickened by the Eſtabliſhment of the *Weſt-India* Company, his Majeſty had from thence been led to look into the State of the old Companies erected before his Acceſſion to the Throne; and in particular into the State of the *Eaſt-India* Company, which he found to be moſt deplorable. In the Space of fifty Years they had, notwithſtanding repeated Aſſiſtances from the Crown, managed their Affairs ſo indifferently, as to be obliged to abandon their Commerce entirely, and to take up with ſuch trifling Advantages as could be obtained by letting out their Privileges to Hire.

The King declared, he was ſatisfied that this did not proceed at all from Diſadvantages in the Nature of that Commerce, but from the Miſtakes and ill Conduct of ſuch as had been entruſted with the Management of the Company's Affairs, who, in the firſt Place, had made their Bottom too narrow, and had undertaken the Traffick of the *Indies* upon much too ſmall a Capital. That, in the ſecond Place, to keep up the Credit of their own Adminiſtration, and to countenance their taking ſuch conſiderable Salaries to themſelves, they had made large Dividends, where there were no Profits; and having, by this means, exhauſted the Company's Stock, they carried on their Trade by borrowing as much Money as they could at very high Intereſt. That however, the King, his Great-grandfather, having always protected and encouraged this Company, and even granted them a new Term towards the End of his Life, they might have enjoyed it, or, at leaſt have drawn all the Profits from it they could, if their Conduct had not become ſo flagrantly bad, that neither the Glory of the King, nor the Intereſt of his People, would permit him to overlook it any longer. On the one Hand, there were continual Complaints from the *Indies*, that the Company had borrowed vaſt Sums of the *Gentiles*, without paying them either Capital or Intereſt, having in the Space of ſixteen Years, not ſent ſo much as one ſingle Ship to *Surat*. On the other, the private Merchants carrying on this Commerce in the Name and under the Authority of the *Eaſt-India* Company, were ſo cramped and oppreſſed by the Duty of Ten *per Cent.* and other Gratuities to the Company, that they are unable to purſue their Trade with the ſame Spirit and Advantages which are enjoyed by the Subjects of other Nations; and, being afraid to go to *Surat*, on account of the Danger they were in of having their Ships ſeized for the Company's Debts, they found themſelves obliged to purchaſe moſt of the *Indian* Commodities and Manufactures which they brought into *Europe* from Foreigners, at a very high Price, and this equally to their own and the Nation's Diſadvantage.

For theſe Reaſons, and others of the like Nature alledged againſt the *China* and *African* Companies, his Majeſty declares, that the Privileges of all thoſe Companies are, by this Edict of his, dated in the Month of *May* 1719, revoked, extinguiſhed, and ſuppreſſed. He granted at the ſame Time, to the new Company of the *Indies*, an excluſive Privilege of trading from the *Cape of Good Hope*, to the utmoſt Extent of the *Eaſt-Indies*, as alſo to the Iſlands of *Madagaſcar*, of *Bourbon*, and of *France*, the Coaſt of *Soffala* in *Africa*, the *Red-ſea*, *Perſia*, the Dominions of the *Mogul*, of the King of *Siam*, and of the Emperors of *China* and *Japon*, as alſo of the *South-ſeas*, from the Straits of *Magellan*, or *la Maire*, to the *Eaſt-Indies* that Way, forbidding all the reſt of his Subjects theſe ſeveral Trades, under Pain of the Confiſcation of their Veſſels and Effects.

He likewiſe gives and grants to this Company, the Poſſeſſions and Effects of the other Companies, at the ſame Time charging them, however, with all the juſt Debts which thoſe Companies had contracted, and were liable to. The better to enable them to diſcharge thoſe Debts, and to carry on the vaſt Trade granted them by this Edict, he creates in their Favour, twenty-five Millions of new Actions, to be purchaſed only for ready Money, on the ſame Terms that the *Weſt-India* Company poſſeſſed one hundred Millions of Actions, and with the like Privileges and Advantages in every Reſpect. He likewiſe granted full Licence and Authority to import all Sorts of Manufactures of Silk, Silk and Cotton, gold and ſilver Stuffs, died Cottons, as alſo painted and ſtriped, on Condition, however, that none of theſe ſhall be vended in his Dominions, but be intirely ſold and diſpoſed of to Foreigners; for which Reaſon they were to be depoſited in Magazines under double Locks, the Keys of one to be kept by the Farmers-general, and the other by the Directors of the Company, for the better preventing Frauds and Colluſions. He likewiſe grants them leave to import all ſorts of white Cotton, Raw-ſilks, Coffee, Drugs, Spices, Metals, and whatever elſe the *Eaſt-India* Company might have imported under their Privileges.

This Edict had all the Effects, and even more than was expected from it, and ſuch an Eagerneſs there appeared of ſubſcribing to this Company, that inſtead of twenty-five, the Subſcriptions amounted to fifty Millions, which encouraged the *French* Miniſtry to venture upon ſome new Regulations, which were made public by an Edict of the Month of *June*, in the ſame Year. The Principal of which was, that they ſhould take off four Times the Number of old Actions, in order to be entitled to the new; ſo that in order to purchaſe five thouſand Livres of the new Actions, the Subſcribers were obliged to take twenty thouſand Livres of the old ones.

The great End the Government propoſed by all this, was, as we have hinted before, to find the means of calling in and ſuppreſſing that immenſe Quantity of Paper-money which was ſuch a heavy Burthen on the State; and to this End Annuities to the Value of twenty-five Millions are created, which not anſwering that Intention, the new Company of the *Indies* offered their Aſſiſtance, and undertook to diſcharge them at the Rate of fifty Millions in one Month; ſo that the whole Load of this Paper-credit, amounting in the whole to near ſixty Millions of our Money, was to be taken away and extinguiſhed, by the End of *July*, 1721. In Conſideration of the Zeal and publick Spirit manifeſted by the Company in this Propoſal, the King was pleaſed, by his Arret dated in the Month of *July*, 1720, to change the Terms on which the Company held their Privileges, and to declare them perpetual, reſtraining himſelf and his Succeſſors, from ever treating them as other Companies had been treated, in order to their Eſtabliſhment; and thus this Company acquired that Title by which they are now known in *France*, *The perpetual Company of the Indies*, with all the Privileges of the other four Companies confirmed to them for ever. In two Years Time it was ſettled and declared, that in Conſequence of the Annuities granted and aſſigned to the Company from the Crown, they ſhould be able to divide annually the Sum of Ten *per Cent.* which ſhould be paid duly and exactly for ever; in Conſequence of which, the Directors were to be at full Liberty to export and import what they thought proper, without being accountable annually to their Conſtituents, becauſe the Dividend was to be regular and certain, and they were to manage Things ſo, as that the Deficiencies of one Year might be made up by the Profits of another.

This Courſe of Management, though it had certainly one great Convenience in fixing and aſcertaining the Intereſt as the Proprietors were to receive it, yet the Circumſtance of not accounting for the Profits, has proved of ſuch ill Conſequence, that notwithſtanding theſe Dividends have been all along very duly and regularly paid till lately, yet the Proprietors could never be cured of a Suſpicion they entertained, that the *Eaſt-India* Commerce has not been carried on for their Profit, but in their Name, for the King's, and this has contributed to keep their Actions low, though they had ſuch extraordinary Intereſt paid them, with ſuch Regularity. The Grounds of this Suſpicion lying in the Annuities paid by the Crown to the Company, which are ſufficient for ſecuring ſuch a Dividend, without the leaſt Aſſiſtance from the Profits of their Trade, made the Thing not altogether incredible, eſpecially when it was perceived, that for twenty Years together, the Dividends remained fixed and ſettled, though the Trade of the Company has for that Time been apparently increaſing.

But to underſtand this Point perfectly, as well as the true State of the Company's Affairs, and how they came to have a Fund capable of diſcharging regularly ſo high an Intereſt for ſuch a Number of Years, as well as to clear up ſome Things that may ſeem obſcure in this Hiſtory of the Eſtabliſhment of the Company now ſubſiſting, it will be requiſite to give as clear and conciſe a Relation as is poſſible, of the Riſe and Progreſs of the other Companies that have been united to this by the Edict before-mentioned, and of the *Weſt-India* Company in particular, in which Abundance of curious and inſtructive Paſſages will occur that never hitherto have appeared in the *Engliſh* Language.

12. The *China* Company in *France* was originally ſet on foot in the Year 1660, but was very ſoon after abſorbed by that of the *Eaſt-India* Company, which, as we have ſhewn, had the Sanction of royal Authority given it in 1664; but when that Company began firſt to decline in its Affairs, thoſe who had the Management of its Concerns, were content, in ſome meaſure, to revive this old Company, by granting their Licence, which was likewiſe confirmed by the Crown to one Mr. *Jourdain*, a very rich Merchant, who fitted out a very large Ship, called *Amphitrite*, for that Voyage, which ſailed in *March* 1698, and returned ſafely to *France* on the Third of *Auguſt*, 1700, very richly laden. The Succeſs of this Voyage encouraged the Merchant before-mentioned, and thoſe who were concerned with him, to fit out the ſame Ship again, and which they accordingly did in the following Spring, and ſhe returned in the Month of *September*, 1703, with as great Profit as from her former Voyage, though ſhe very narrowly miſſed being ſhipwrecked falling down the River of *Canton* at her Return. The Succeſs of theſe Voyages, one would have thought, might have eſtabliſhed this new Company; but the general War in which *France* was then engaged againſt moſt of the Powers of *Europe*, rendered it impracticable: And thus the Company lay dormant, though ſtill poſſeſſed of its Rights, which extended to the Coaſts of *China*, *Tonquin*, *Cochin-China*, and the Iſles adjacent, till ſuch Time as, for Reaſons of State, it was united to the *Weſtern* Company.

The Company of *Senegal*, though under another Name, was one of the earlieſt in *France*, being carried on by a Society of Merchants at *Dieppe*, though without the Sanction of any public Authority. They fixed a little Settlement in an Iſland at the Mouth of the great River *Nigea*, called alſo the River of *Senegal*, and carried on a conſiderable Trade thither. This Commerce came afterwards into the Hands of the Merchants of *Rouen*, who, in the Month of *November*, 1664, yielded it up to the *Weſt-India* Company. But when that Company was diſſolved about ten Years afterwards, the old Company of *Senegal* was revived, and three rich Merchants undertook that Commerce, which they carried on with great Profit to themſelves till the Year 1681, when Mr. *Colbert*, whoſe Character we have already given, conceiving this Traffick might be greatly enlarged, prevailed upon theſe Merchants to accept of a valuable Conſideration for their Privileges, and to admit of its going into the Hands of a larger Number of Perſons, with new Privileges which they enjoyed for many Years. But it being diſcovered, that the excluſive Rights they had were, by much, too extenſive for their Capital, it was thought for the publick Benefit to divide this Company; and hence aroſe the *Guinea* Company, to whom the greateſt Part of their Privileges were aſſigned, and the reſt remained to the old Company of *Senegal*, which ſtill continued in a thriving Condition.

Yet, in Proceſs of Time, and from a Variety of Accidents, it fell out, that the Proprietors of this Company came to be reduced into ſuch low Circumſtances, that the Company muſt have failed, if it had not been for the Wealth and Spirit of a ſingle Merchant, whoſe Name was Mr. *D'Apougny*, who, at length, for the Sum of three hundred thouſand Livres, bought out his Aſſociates, and in the Year 1694, by the Conſent of the Crown, had the whole of their Privileges conveyed to himſelf, and he erected a new Company, which, however, was ſo unfortunate, that after ſtruggling a long Time to no Purpoſe, at laſt, yielded up their Privileges to ſome rich Merchants of *Rouen*, who carried on this Trade with tolerable Succeſs, till the Year 1718, when it was united, as we have ſeen to the Company of the *Indies*.

As for the Company of *Guinea* before-mentioned, it had ſeveral Riſes and Falls till the Acceſſion of *Philip* V. to the Crown of *Spain*, who in the Year 1701, granted them the Liberty of tranſporting Negroes to the *Spaniſh Weſt-Indies*; and then it took from thence the Title of the *Aſſiento* Company, under which it continued to flouriſh, when almoſt all the Branches of *French* Commerce languiſhed and decayed, by reaſon of the War; and as it was ſingular in this, ſo it was no leſs ſingular in its Concluſion; for it loſt all its Privileges, and even its Being, by the Treaty of *Utretch*, which revived the other Branches of *French* Trade, but conveyed this to the *Engliſh*, and gave riſe to our *South Sea* Company.

We muſt now paſs to the *Weſt-Indies*, where the Courſe of a great River, navigable from within ſeven or eight Leagues of its Source for eight hundred Leagues, where it falls into the Gulph of *Mexico*, was diſcovered by *Robert Cavalier de la Salle*, a Native of *Rouen*, who brought the News of it into *France*, 1680. This River, called by the Natives of the Country *Meſchaſippi*, and by the *French*, *Miſſiſippi*, and the Country about it being held of infinite Conſequence, as affording the greateſt Conveniencies for eſtabliſhing a Settlement in one of the fineſt Climates, and moſt fruitful Countries in *America*, the Motion for attempting ſuch a Colony was readily embraced in *France*, and all imaginable Encouragement given to Mr. *de la Salle*, who undertook the Performance. He, by Letters Patent dated in 1684, eſtabliſh'd a Company for that Purpoſe, and embarked on board a Squadron of four Ships, filled with People, and with every Thing neceſſary for his Deſign; but was ſo unlucky as to miſs by Sea the Mouth of that River which he had diſcovered by ſailing down it, and fixed upon another, where his Colony began to decline in ſuch a manner, that he had not above one hundred Perſons left; yet in the Midſt of theſe Misfortunes he kept up his Courage, and endeavoured to repair his paſt Miſtake, by uſing all poſſible Means to diſcover the Place he ſought, which it is very probable he would have done if his Company had not mutinied; in which unlucky Accident one of the Villains ſhot him with a Muſket Ball, on the 20th of *March*, 1687.

Seven or eight Years after his Death, one Mr. *Hiberville*, a Gentleman of *Canada*, diſcovered the Mouth of this famous River, erected a Fort, and began to eſtabliſh a Colony there, but died before it was thoroughly ſettled, and ſo the Deſign miſcarried a ſecond Time, and the Affair ſlept till the Year 1712, when Mr. *Anthony Crozat*, a Gentleman of large Fortune, undertook the fixing a *French* Colony on the River *Miſſiſippi*, a third Time. He obtained the King's Letters Patent, dated 14 *September*, in the ſame Year, and ſucceeded ſo far as to diſcover the River and Country effectually, and to raiſe a Fort and ſome Settlements there. This Gentleman, according to the Cuſtom of the *French*, changed the Names of all the Places he viſited, or, to ſpeak with greater Propriety, were viſited by thoſe he ſent thither. The great River was no longer to be called *Miſſiſippi*, but the River of *St. Lewis*, and the Country round about it was *Louiſiana*, and an Iſland at the Mouth of it, which till then had been ſtiled the Iſland of *Maſſacre*, was thenceforward to be known by the Title of the *Dauphin*'s Iſland.

The Conſequences of theſe Diſcoveries were great in themſelves, and the Expectations raiſed from them much greater, of which Mr. *Crozat* made a very wiſe Uſe, by taking this Opportunity to ſurrender his Patent, which he did in 1717, that the Publick might have the Benefit of theſe important Settlements. The Regent was conſidering at that Time of the Project offered him by the famous Mr. *Law*, a *Scotch* Gentleman, whoſe Name is well known to the preſent Generation, and is not like to be forgot by Poſterity. The End aimed at by his Project, was to reduce all the publick Debts in *France* into ſome Form; and for this Purpoſe it was neceſſary to erect, under plauſible Appearances, a new Company in the like Manner, that by the Advice of Sir *John Blount*, the Lord Treaſurer *Oxford* had done the ſame Thing in *England*, by eſtabliſhing the *South-Sea* Company. But whereas that Nobleman had very wiſely and honeſtly rejected the remaining Part of the Project, which was cheating credulous People of their Money, by running the Actions or Stock of the new Company to an exceſſive Rate; this was accepted by the Regent, and made that Part of the Deſign, which is ſtiled in *France* the Syſtem, and which was at once the moſt iniquitous, and the moſt infamous Contrivance that ever entered into the Heart of Man.

But as it was neceſſary, in order to carry this Scheme into Execution, that a new Company ſhould be ſet up with ſuch Privileges as might create probable Hopes of vaſt Gain to the Proprietors, this new Settlement was thought of for that Purpoſe, from whence the Project itſelf is generally called the *Miſſiſippi* Scheme, tho' that was not the Title of the Company. It cannot be expected, that we ſhould enter here into a long Detail of the Conduct of the Regent's Scheme, becauſe it is not the proper Buſineſs of this Section; all that is aimed at herein, is to ſhew the ſeveral Steps by which almoſt all the foreign Commerce of *France* was thrown into the Hands of the ſingle Company of the *Indies*, which Title, as we have already ſhewn, the Company acquired by the Union of the old *Eaſt-India* Company with the *Weſtern* Company, which had before ſwallowed up ſeveral others that have been already mentioned.

The Royal Bank alſo was united to the Company of the *Indies*, which was the Engine employed for bringing about the great Ends of the Syſtem, which being once effected, the Regent and his Miniſters began to turn their Thoughts on the Means of recovering the Company from that dreadful Confuſion into which it had been thrown by undertaking the Execution of a Deſign equally prejudicial to the general Commerce and private Property of the Inhabitants of *France*, which had very juſtly overturned and deſtroyed their Credit, and put it entirely out of their Power to carry on any Part of the Trade, to which they had an excluſive Right. It was therefore high Time certainly, for the Government to interpoſe, and endeavour to remedy ſome of the many Inconveniences they had introduced, ſince the Welfare of the Kingdom was now ſo cloſely connected with that of the Company of the *Indies*, as that it was neither in the Power of the Government to neglect the one without neglecting the other, or to ſeparate, as perhaps they would have done thoſe Intereſts, which by their own Management were ſo cloſely united.

To underſtand this Matter clearly, we muſt conſider the Company of the *Indies* in two very different Lights; that is to ſay; as a trading Company, and as Creditors of the Government; neither of which Points, if we advert what is daily written about them, ſeem to be well underſtood here, and therefore we ſhall take ſome Pains in repreſenting them both to the *Engliſh* Reader's View, in Terms that may remove all theſe Miſtakes. In the firſt Place then, with regard to their Trade, the Company of the *Indies* in *France*, is generally called here the *French-Eaſt-India* Company; which Title does by no means expreſs the Nature and Importance of their Trade; ſince they have not only the Commerce of the *Indies*, but likewiſe that of *Africa* and the *South-Sea* under their Direction, and though it be true, that they are not able at preſent to exert themſelves in carrying on all theſe Trades; yet it is no leſs true, that they retain the Power of doing it whenever they are able, and that the *French* Government will moſt certainly put them upon it as ſoon as any favourable Opportunity offers.

The Inference I make from this is, that we ought to conſider the Company of the *Indies*, as the Center of *French* Commerce, and to look upon the Riſe and Fall of the Actions of the Company, as a political, or if you will, as a Commercial Barometer, which conſtantly points out the Condition of the Trade in *France*. I look upon this Obſervation to be a Matter of great Conſequence to us, and it was for the Sake of ſetting it in a clear Light that I have taken ſo much Pains to ſhew how the ſeveral Branches of foreign Trafficks came to be thrown into the Hands of a ſingle Company, the chief Motive to which, was undoubtedly this, that the Cares of the Government, with reſpect to Trade, might be brought into a narrower Compaſs, and conſequently be attended to with more Eaſe by the Miniſters.

For ſuch is the Conſtitution of the *French* Government, that every Thing in that Kingdom muſt depend upon it; and we muſt allow, that Experience has ſhewn, that ſome of its Miniſters have underſtood it as well, and proſecuted it better than the ableſt Merchants could have done. I do not ſay this as if what had happened in *France* ought to be a Rule to any other Country, bleſt with a better Conſtitution: God forbid it ſhould! But what I ſay, is, that the Relation betwen the Government and Commerce of *France*, being rightly underſtood, it will appear, that the latter is entirely dependant upon the former, and muſt either proſper or ſink, as it is ſupported by the Crown, and attended to by the Miniſters, or as it is neglected by both

This ſhews, that a general War, which demands all the Power, all the Revenues, and all the Attention of *France*, muſt ſink and ruin its Commerce, and that to ſuch a Degree, as cannot happen to any other Country, the Conſtitution of which is not the ſame with that of which we are ſpeaking. This I am ſenſible has been often ſaid, but I do not know, that it was ever demonſtrated before, and I hope by that Time I have finiſhed this Section, to make this Subject ſo clear, and ſo intelligible to every *Engliſh* Reader, as that he ſhall have no ſort of Doubt as to the Intereſt and Policy of the *French* Court on this Head. Thus much as to the Company of the *Indies*, with reſpect to its Trade; let us next conſider it as a Society of the Creditors of the *French* Government.

We have heard, that this Company has for many Years divided Ten *per Cent.* annually upon their Capital, which, till the preſent War, and indeed to the preſent Year, has been juſtly and regularly paid. But this Intereſt, or Dividend of Ten *per Cent.* never aroſe from the Profits made by the Company, nor in Truth any Part of it, but was paid to the Proprietors, as Creditors of the Publick, out of the ſtated and ſettled Funds aſſigned them for that Purpoſe, and therefore we can attribute the Lowneſs of the *French* Actions in Time of Peace, to nothing but their Diffidence of their own Government.

The Reaſon why the Miniſters of *France* have made it their Choice to continue Things in this Situation, ſeems to have been this, that the regular Payments made by this Company to the Proprietors, might have a double Effect, and ſuſtain at once the Publick Credit and that of the Company. The former was neceſſary to prevent thoſe Confuſions ever falling out again, which happened on the Ruin of the Syſtem, and which had like to have been attended with the moſt fatal Conſequences to the Nation, from which nothing could have ſaved them, but the arbitrary Power of the Government, which forced them to bear their Misfortunes till Ways and Means could be found to relieve them. On the other hand, the regular Payment of theſe Dividends has been of prodigious Service to the Company in their trading Capacity, in which, to ſay the Truth, they could not have ſubſiſted without them; becauſe it kept the Proprietors from either requiring, or receiving any general Accounts of their Dealings, which enabled the Directors to do many Things which otherwiſe they could never have done; and has, in Fact, been the ſole Support of their Commerce: For, we muſt obſerve, that on the founding of this new Company, they had Rights and Privileges given them, without either Powers or Funds to make uſe of them. They had the nominal Advantages of ſeveral Companies beſtowed upon them, but upon Condition that they took likewiſe the real Load of Debts and Incumbrances for which thoſe Companies ſtood engaged. They received vaſt Sums of Money from their Proprietors, but not for their Uſe as a Company to Trade with, but as Agents for the Government, which, very probably, the far greater Part of their Proprietors did not underſtand; but which they might very eaſily have underſtood, if they had conſidered the Funds out of which their Dividends were paid; for they could never conceive that ſuch a Government as theirs would grant them ſo high an Intereſt for Money, without making uſe of it.

On the whole therefore, this was one of the great Secrets of the *French* Councils, and the Deſign of reſtoring the Affairs of the Company, that which, of all others, they have managed with the greateſt Addreſs; for by this Means they have gained Time, which, in ſuch Affairs, is all Things, and by affording the Company ſuch Sums of Money as could be ſpared; and at the Seaſons they could ſpare it, they have revived the *Eaſt-India* Trade, kept it conſtantly and regularly on Foot, put all the Company's Debts in a Train of Payment, relieved and replaced all her Factories; and if this War had not broke out as it did, would very ſoon have placed her, as a Trading-Company, in as fair and good a Condition as for many Years ſhe has ſtood in, conſidered in her other Capacity as a Corporation of publick Creditors. This has been generally attributed to the wiſe and peaceable Adminiſtration of the late Cardinal *Fleury*, but was no otherwiſe due to him than as he continued the Direction of theſe Affairs in the Hands of Mr. *Orry*, who has had the entire Management of them for ten Years paſt; in which Time he has done more Service to this Nation, than all the Stateſmen and Generals that have been employed in this Reign; and though it has ſo fallen out of late, that his Method has been interrupted and thrown into Diſorder, yet we ſhall preſently make it appear, from the Conſideration of the preſent State of the Company, that he has overcome the greateſt Difficulties, and put her Concerns into ſuch a Channel, as muſt ſtrike all who attentively weigh the Particulars, which we ſhall impartially relate, with Amazement and Surprize.

But, before I quit this Part of my Subject, I muſt again remind my Reader, that all this Succeſs has been owing to the Firmneſs and Steadineſs of the Adminiſtration, for ſo many Years, flowing in ſome meaſure from the King's Temper, in ſome meaſure from the long Life of the late Cardinal, and from a Variety of other Circumſtances, that demonſtrate the commercial Intereſt of *France* to be continually liable to Accidents, and to be conſequently always in a precarious Condition. I do not ſay this with any Intention of leſſening our Jealouſy of the *French* Traffick, which I acknowledge to be extremely reaſonable and well founded; but, for the ſake of Truth, and that Things may appear to be as they really are, which I think the moſt likely way to enable us to judge of what will be moſt for our Intereſt and Advantage.

I may likewiſe add, that by proving, as I have done, that this is truly the Caſe, it will afford great Encouragement both to the Government and People of *Great Britain*, to purſue whatever rational Schemes ſhall be offered for promoting and extending our Commerce, ſince our Situation is ſuch, that we need only the Countenance of the Legiſlature, and the Repeal perhaps of a very few Laws, which reſtrain and cramp our Trade, to be able to undertake new Branches of Commerce, which muſt neceſſarily increaſe our Seamen, augment our Shipping, carry off our Manufactures, and, by reviving a Spirit of Induſtry, find Employment for all our People, which would effectually root out factious and ſeditious Humours, and find ſomething elſe for the meaner Sort of Folks to do, than to rail at or reſiſt the Government. But if we neglect the Advantages we have, and the *French* ſhould grow wiſe enough to reſolve upon keeping upon fair Terms with their Neighbours twenty or thirty Years, they may go near to ſhew us, within that Time, that in ſpite of all the Difficulties they ſtruggle with, their Company of the *Indies* may be put into ſuch a Condition as will enable her to put in for a large Share of that Trade, which, by being hitherto engroſſed by us and by the *Dutch*, has obtained and ſecured the honourable Title of a *Maritime Power*, which, as it was acquired by, will certainly be loſt with our Trade.

13. The Capital of the preſent Company of the *Indies* was, as we have before obſerved, compoſed of the original Capital of the *Weſtern* Company, and of twenty-five Millions added thereto, upon the Union of the *Eaſt India* Company therewith; but after the Ruin of the Syſtem, when all Things fell into Confuſion, it was found requiſite, in order to reſtore them, that the King ſhould make a Reviſion of the Actions poſſeſſed by the Proprietors of this Company, in order to diſtinguiſh between ſuch as had acquired their Property fairly, and by Purchaſe; and ſuch as had thruſt themſelves into the Company's Books only to ſerve their own Purpoſes by Stock-jobbing. It was in conſequence of this Reviſion, that by an Edict, in the Year 1723, the King fixed the Actions of this Company to fifty-ſix thouſand, and which formed a Capital of One hundred and twelve Millions; for their Dividend upon which, they had a yearly Revenue aſſigned them of Eight Millions four hundred thouſand Livres. By another Arret in 1725, Five thouſand of theſe Actions were cancelled and burnt; ſo that the Capital of the Company, by this means, was reduced to Fifty one thouſand Actions, and their Dividends ſecured by the annual Payment of Eight Millions from the Farmers-general of the Farm of Tobacco; the excluſive, perpetual, and irrevocable Privilege of vending which, was granted to the Company in 1723, and confirmed to them in 1725, together with the Profits ariſing from the Furs imported from *Canada*; ſo that the Fund for the Payment of their annual Dividends was as effectually ſettled and ſecured, as it was poſſible a Thing of that Nature could be in *France*.

In the mean time the Commerce of the *Indies* was aſſigned to them as a collateral Security, not to be touched for the preſent, but to be employed in ſtrengthening and enlarging the Funds for reſtoring and maintaining that important Trade, diſcharging all the Incumbrances thereon, and putting it thereby in a Condition to become a certain and indubitable Security for the Payment of ſtill higher Intereſt to the Proprietors than they have hitherto received. The Condition of the Company, therefore, conſidered in this Light, appears to be ſuch as ought to ſatisfy all who have rational and moderate Views for the Security and Increaſe of their Fortunes, ſince though no more than fifteen hundred Livres have been paid in upon each Action, yet the Proprietors have conſtantly and regularly received their Intereſt of Ten *per Cent.* which is more than they could have made of their Money in any Part of *Europe*, and have ſtill a clear and undoubted Title to the Profits that have ariſen, or ſhall ariſe from the Commerce of the Company in the *Indies*.

It is indeed true, that hitherto they have received nothing upon this Head; but to ballance this, it is to be conſidered, that, till within theſe few Years, this Trade has been carried on in a very languid and negligent Manner; that ſince it hath been put on a better Foot, they have been obliged to repair the Loſſes ſuſtained by the Shipwreck of ſome of their largeſt Veſſels, to pay off abundance of old Debts, to diſcharge ſeveral Annuities, which the Company were obliged to pay, and which have extinguiſhed very ſlowly, to rebuild and reſtore ſeveral of their Factories, which were in a very bad Condition, to repair many, to build ſome new, and to equip all the Veſſels in the Company's Service, to purchaſe new Houſes for the Eſtabliſhment of new Factories, and to add proper Warehouſes and Magazines to theſe; to lay out upwards of Fifteen Millions for the Improvement and Security of *Louviſiana*; to complete the neceſſary Works at the noble Haven of *Port l'Orient*, and all the leſſer Creeks, Docks, and other Places that depend thereupon; and to be at other very conſiderable Charges and Expences for ſupporting its Commerce, maintaining its Marine, ſubſiſting its Forces, and keeping every where in good Order its Fortifications.

Whenever theſe great Expences ſhall have ſo far anſwered their End as to be no longer neceſſary, and the Affairs of the Company, in point of Commerce, are in ſuch a Situation as that there is no imminent Danger to be apprehended, but, on the contrary, certain annual Profits coming in, theſe will be conſtantly added to the preſent Income of the Company, who will likewiſe enjoy all that Stock which has been raiſing both in *Europe* and the *Indies* for their Benefit. The riſing or falling therefore of the Company's Actions, cannot any way affect its real Security, which depends, in the firſt Place, on thoſe ſettled Funds before mentioned, and upon this Trade, which, before the preſent War, was in a very thriving and flouriſhing Condition. The common Notion therefore, which has ſo long prevailed in *France*, and might be very eaſily impoſed upon Strangers, *viz.* that the King has

ried on this Trade for many Years, and after paying a Part of the Profits, ſuffered all the reſt to paſs immediately into his own Coffers, or into thoſe of the Directors, is an abſurd and ridiculous Calumny, equally repugnant to Reaſon and to Fact, as well as utterly inconſiſtent with the expreſs Words and direct Intention of the eleventh Article of the Edict of 1725, in which, after declaring the Company of the *Indies* to be a Society for promoting the Trade of the *French* Nation, to that Part of the World, under the Protection of the King, and the Adminiſtration of their own Directors, his Majeſty proceeds thus: "Our
" Will and Pleaſure is, that it ſhall remain, conformable
" to its Inſtitution, a Company purely for Commerce,
" applying itſelf ſolely to the Support of that which is
" confided to its Care, and endeavouring, by its Wiſdom
" and Oeconomy, to contribute as much as is poſſible to
" the Welfare of our Subjects intereſted therein; ſo that
" the Funds of the ſaid Company of the *Indies*, ſhall be
" and remain for ever employed in the Maintainance of
" the ſaid Commerce, and to no other End or Purpoſe
" whatſoever."

Such is the Deſcription of the Situation of the *Eaſt-India* Company, as laid down to us by one of the ableſt Pens in *France*, who tells us beſides, that both the Security and the Intereſt of Money placed in this Company, are much better than when employed in the Purchaſe of Lands in *France*; for, ſays he, with reſpect to Security, the Purchaſer of Lands has nothing more than his own and his Lawyer's Knowledge to direct him in the Aſſurance of his Title, and he can very rarely purchaſe at ſuch a Price as to make more than five *per Cent.* of his Money, after which he runs very great Hazards with reſpect to bad Tenants, being forced to lay out large Sums in Repairs, beſides riſquing the Inclemency of Seaſons, which may put it out of the Power of his Tenants, how honeſt ſoever, to pay him punctually his Rent, and to the full; ſo that he may very often be at a Loſs for a Subſiſtance, and not know where to borrow Money, tho' at the ſame time a landed Man of ſo much a Year; whereas he who lays out his Money in the Actions of this Company, has double their Intereſt, paid him regularly and conſtantly every half Year, without having any Reaſon to be apprehenſive of his Capital, or ever being in Danger of wanting Money by an unlucky Turn of Affairs.

We may eaſily judge, from this Repreſentation of the preſent State of the Company's Affairs, that they are in a far better Condition, or at leaſt were ſo at the breaking-out of the preſent War, than ever, and more likely to produce conſiderable Profits to the Nation, and to the Company, than ever. But, on the one hand, the natural Impatience of the *French*, unable to bear being put off for above twenty Years together with fair Words and fine Promiſes; and, on the other, their Apprehenſions that either the King would never ſuffer them to enjoy this Commerce at all, or elſe would deprive them of the Fund they already poſſeſſed, and leave them to the precarious Dividends ariſing from Trade, has conſtantly kept their Actions, I will not ſay below the real Value, but much below what they would have been eſteemed worth in this, or in any other free Country, eſpecially after remaining for ſo many Years in ſo ſtrict and regular a Courſe of Payment. But their continual Jealouſies, as to the true Intention of the Crown, and as to the future State of their Affairs, has conſtantly kept them in a precarious Situation, in ſpite of the wiſeſt Meaſures the *French* Miniſters were able to take, the large Sums purchaſed by Foreigners, the frequent Edicts in their Favour, and, which is ſtill more extraordinary than all the reſt, the regular coming and going of their *Eaſt-India* Fleets, and the vaſt Sums of Money brought in by their publick Sales.

Yet ſo far was this from contributing to make the People eaſy, whoſe Fortunes were engaged in this Undertaking, that they pretended it adminiſtered ſufficient Cauſe for all their Apprehenſions and Complaints. If, ſaid they, the Commerce of the *Indies* be ours, if all this Money that we receive belong to us; if all the Improvements that have been made for ſo many Years are legally and indiſputably our Property; and if thoſe who direct and manage all theſe are only Truſtees for us, or rather our Servants; why ſhould we be kept ſo much in the Dark, why not have it in our Powers to call theſe People to an Account; or why not receive, from time to time, ſome Part of the Profits by way of Addition to the Dividends already made us? It was in vain to tell them, that all theſe Precautions were taken for their Sake; that the Company owed its Reſtoration to this Method of managing their Affairs; that they had viſibly overcome by theſe Means moſt of thoſe Difficulties which had been found inſuperable by former Companies; and that this happy Progreſs of their Trade ought to make them perfectly content with regard to the Manner in which it was carried on, and give them intire Satisfaction as to the Integrity of ſuch as directed their Affairs.

It was in vain, I ſay, that theſe Arguments were uſed, or that Scheme of their Circumſtances, which the Reader juſt now peruſed, ſubmitted to their Conſideration; the Proprietors remained firm to their old Opinion, and their Suſpicions could never be got out of their Heads, till that very Miſchief fell upon them which they had ſo long apprehended; I mean, the Suſpenſion of their Dividends, which, however, produced that general Account for which they had ſo long clamoured. But before we come to ſpeak of this, it will be requiſite to reſume the Hiſtory of the Company's Affairs in the *Indies*, and to give a ſuccinct View of the real Improvements of their Commerce, which will both ſupport what has been already ſaid, and render the Cloſe of this Section more intelligible.

14. At the Time the Company of the *Indies* was formed in *France*, their Affairs in that Part of the World had taken a very bad Turn; for their ſovereign Council, which had been eſtabliſhed at *Surat*, was ſuppreſſed, moſt of their Colonies ſunk to nothing, many of their Factories in the ſame State, and the reſt declining in ſuch a Manner, as that little better than an intire Extinction could be expected, and that too in a very ſhort Space of Time. This was undoubtedly a very melancholy Situation for the Servants of the Company to be in, who, while they meditated nothing more than how to obtain a Paſſage home to *Europe*, and an Indemnification for the Debts contracted in the *Indies*, at leaſt with reſpect to themſelves, were ſurpriſed by the Arrival of three Ships, not only laden with the richeſt Merchandize of *Europe*, but alſo with very large Quantities of Silver; ſo that they were immediately in a Condition to diſcharge a great Part of their Debts, which if it did not reſtore it, at leaſt revived their Credit, and gave them ſome Degree of Reputation in the *Indies*. It is requiſite that the Reader ſhould know how this ſtrange Alteration happened, and the Secret is no more than this. When the Regent executed his Scheme, the Company of the *Indies* being the principal Machine made uſe of, there conſequently came into the Hands of that Company a conſiderable Part of the Plunder of the Publick, which enabled the Directors to fit out theſe three Ships in the manner before-mentioned, not only with the Conſent, but to the great Satisfaction of the Government, inaſmuch as it made a Shew of Trade, and thereby kept up the Spirits of the People, and gave a Reputation to the Company at home. But this, however, did not laſt long, for Reaſons we ſhall quickly ſhew.

This Treaſure was not employed in Commerce, but in diſcharging the Debts contracted by the old Company at *Surat*, at *Camboya*, at *Bengal*, and other Places; ſo that the Returns made to *France* were but very inconſiderable, in Proportion to the Cargo ſent out. But this was not all; for, before theſe Returns arrived, the Syſtem, as it was called, was intirely overturned; ſo that, taking all Things together, the Company, in the two ſucceeding Years, 1721 and 1722, were not able to ſend ſo much as a ſingle Ship to the *Indies*, which expoſed them to the Contempt and Scorn of the trading Nations in *Europe*, and ſubjected ſuch as were in their Service in the *Indies* to the Inſults of the *Engliſh* and *Dutch*, who did not fail to repreſent them to the *Indians* as down-right Bankrupts, without either Effects, Money, Credit, or Reſources. We may therefore truly affirm, that in the Year 1723, the Affairs of this Company were in the loweſt and moſt deplorable Condition.

The Directors at Home, however, repreſented their Diſtreſſes to the Government in the ſtrongeſt Terms poſſible, and at the ſame Time ſhewed, how prejudicial it was to the Glory of the *French* Kingdom, that Things ſhould remain in this Situation, and that after the Government had taken the Company under its immediate Protection, it ſhould be ſuffered to fall at once into Ruin, without the leaſt Effort made to ſuſtain it. One would have imagined, that the more natural Method would have been to have had recourſe, in this Situation of Affairs, to the Proprietors themſelves; but both the Directors and the Miniſtry were ſenſible enough, that this would have been attended with ſtill worſe Conſequences, ſince by laying open the true State of their Affairs, they would infallibly have driven their Proprietors to Deſpair. Inſtead of obtaining a Subſcription for putting their Commerce on a better Foot, the *French* Miniſtry, ſenſible of the Truths contained in this Repreſentation, reſolved to take this Opportunity, as they were in full Peace, to try what might be done to retrieve Things in the *Indies*, and prevent the entire Ruin of the Company, which was then juſtly apprehended. It was from theſe Conſiderations, that two Ships were ſent that Year, with an Aſſurance to ſuch as were in the Company's Service, that they might rely upon annual Supplies from *France*, and that therefore they ſhould order their Affairs accordingly, and put their Debts into ſuch a Method of Payment, as might diſcharge them all by Degrees, and from the Proſpect thereof reſtore their Credit for the preſent.

Things went on in this Way for about fourteen Years, during which Time, ſometimes three, ſometimes four Ships were ſent every Year, and thereby the Affairs of the Company were recovered, and reſtored, though but ſlowly. They had ſtill great Difficulties to ſtruggle with; for, in proportion as their Commerce revived, their Expences were enlarged, by their being obliged to re-ſettle their old Factories, and to eſtabliſh new ones; ſo that in all this Space of Time, there was very little, if any Profit accrued from their Trade; on the contrary, they ran ſome Years into Debt, but not, however, without ſome Proſpects of future Advantages. But as the other trading Nations in the *Indies* were entirely unacquainted with the Secrets of the *French* Commerce, ſo judging by Appearances only, they were fully perſuaded that the *French* Trade was in a flouriſhing Condition, becauſe they ſaw it viſibly extended, and the Returns made to *Europe* far more regular, and, at the ſame Time, much more conſiderable, than they had hitherto ever been. Yet notwithſtanding all this, if they had gone on in the ſame Manner, it would have been many Years before they had been brought into ſuch Circumſtances as to have been able to ſupport themſelves, and carry on their Trade upon their own Bottom.

But in the Year 1737, M. *Orry de Fulvy*, being at the Head of the Finances, or Revenues of *France*, which he has managed with moſt ſurprizing Succeſs, the Company fell naturally under his Care and Protection. He ſaw plainly, that greater Supplies were neceſſary to extricate them from the Difficulties under which they laboured, and therefore, having firſt made a ſtrict Enquiry into the Situation of their Affairs, and put them into the beſt Order poſſible, he next furniſhed them with ſuch Sums as were neceſſary for enlarging and augmenting their Commerce; ſo that in the ſhort Space of two Years, he doubled their Returns, and in three Years more, brought them to thrice as much as they had formely been. By his Management, their Sales at Port *de l'Orient* became regular, and conſiderable, increaſing in ſuch a Manner, that the publick Sale, in the Year 1742, produced twenty-four Millions of *French* Livres, or about one Million of our Money; beſides which, they reſerved in their Magazines, Goods to the Value of four Millions of Livres more; and the firſt Ships that arrived in 1743, brought Home ſtill a richer and more valuable Cargo. This ſudden and extraordinary Change in the Company's Affairs alarmed and amazed all *Europe*, but more eſpecially the Maritime Powers, who ſaw with infinite Concern, a Company that but a few Years before was looked upon as entirely ſunk and deſtroyed, now riſing into as high Credit as any in *Europe*; and on the other hand, this encouraged the northern Powers to proſecute their Schemes of falling into the *Eaſt-India* Trade with greater Warmth and Diligence.

But what was ſtill more extraordinary than all the reſt, the War did not ſeem to affect the Company ſo much as might have been expected; for their Dividends were ſtill regularly paid, and this kept up their Credit to ſuch a Degree, that ſo lately as *Chriſtmas* 1744, their Actions were at two thouſand. But the War with *Great Britain* increaſing the Expences of *France* on the one hand, and leſſening her Income on the other, the Secret at laſt came out, and Mr. *Orry* was forced to acquaint the Directors of the *Eaſt-India* Company, that the King's Affairs were in ſuch a Poſture as would no longer permit him to ſupply the Company in the Manner he had hitherto done; ſo that now they were to ſtand upon their own Bottom, and to carry on their Trade for the future as well as they could. This unexpected Stroke demoliſhed the whole Fabrick, which had been raiſing for ſo many Years, and reduced the Actions of the Company to eight hundred; neither has the Eloquence of Mr. *de Orry*, or the Arts which the Court has made uſe of to recover the Proprietors from their Fright, been able to carry their Actions above one thouſand, or at leaſt very little above it, ever ſince.

The main Cauſe of this was the Propoſitions made by Mr. *Orry* to their Directors, that either the Proprietors ſhould ſubſcribe ſuch a Sum of Money upon their Actions, or ſhould ſuffer their Dividends to be poſtponed for a certain Time, or that they ſhould come to ſome Agreement amongſt themſelves for compounding theſe two Methods, by advancing ſome Part in ready Money, and allowing their Dividends to go in diſcharge of the reſt. The Motive that obliged the Miniſtry to this Diſcovery, was the Neceſſity of having Money to carry on the *Eaſt-India* Trade, which they knew muſt be ruined, even by a temporary Stagnation; which Money, ſince the Crown could no longer furniſh, it was neceſſary that the Proprietors ſhould. But to this it was anſwered, that hitherto the Proprietors had been no Gainers by that Trade, had no general Accounts made up to them of it, nor, according to the Confeſſion of the Directors themſelves, were to have received any ſuch Accounts, if this Accident had not happened; by which they aſſerted, that their Properties had already loſt one half of their Value, and might very probably loſe a Part of the other half; ſo that they were leaſt in a Condition to pay, when this Demand was made, which would have been ſufficiently grievous, even in the midſt of Peace, and when their Actions were at the higheſt.

To this it was replied, that they had no Reaſon to complain of the King, or of his Miniſters, who had hitherto ſupported this Trade for their Advantage, without their contributing to it at all. That if they had received as yet no Profits from their Trade, it was becauſe no Profits had accrued from it; and this, not through any ill Management in ſuch as were intruſted with their Concerns, or becauſe this Commerce had not been carried on to great Advantage, but by reaſon of that immenſe Load of Debts which lay upon them, at their firſt Eſtabliſhment, and which the Profits of the Trade was obliged to pay off, and the prodigious Expence the Company had been at, both in *Europe* and in the *Indies*, for putting their Commerce on a ſolid and certain Footing. That to put all Doubts upon this Subject entirely out of the Queſtion, and that they might be ſatisfied of the Truth of theſe Particulars, a general Account of their Trade ſhould now be laid before them, by which they would, in the firſt place, ſee, that, tho' ſlowly, it had been continually improving, and that of late Years eſpecially, it had thriven exceedingly.

In the next place, they might be ſatisfied, that even at preſent, it was ſo far from being in a deſperate Condition, that notwithſtanding an immediate Sum was neceſſary for carrying it on, yet there was no Danger of their being called upon for another Supply, ſince what was now aſked would be ſufficient to put the Company into a Condition to maintain itſelf, without intrenching upon their Dividends, which ſhould, for the future, he as regularly paid, as ever they had been in Times paſt. It is from this general Account, that Strangers, as well as the Proprietors of this Company, have come to ſo diſtinct a Knowledge of their Affairs; ſince, had it not been for this unforeſeen and unexpected Accident, they would never have let the World into the Truth of an Affair which they had concealed with ſo much Care for ſuch a Number of Years. We will begin with the Account of the Shipping employed by the Company in the *Indies*, which will demonſtrate the Truth of what has already been advanced upon this Subject, both as to the Matter and Manner of it: But then the Reader may obſerve, that the ſame Number of Ships were ſent annually from *Bengal* as from *Pondichery*, and conſequently the Numbers of this Liſt are to be doubled. In the next Place, he is to take Notice, that the Sums ſet down are the Prime-coſt of the Goods in *India*. And, laſtly, that the Value of a Pagoda is about nine *French* Livres, or ſeven Shillings and Six-pence of our Money; by the Help of which Directions this Table will be found to comprehend a ſhort Hiſtory of the Progreſs of this Company, to the preſent Time.

A SCHEME *of the Commerce of the* French *Company of the* Indies, *ſhewing the Number of Ships returning annually from* Pondicherry, *and the Value of their Cargoes.*

It would be needleſs to fatigue the Reader with the reſt of this Report, calculated only to ſhew that the preſent Stop of their Dividends, was a Meaſure abſolutely neceſſary for the Company, as well as the State, and alike calculated for the Service of both; ſince, on the one hand, it would enable his Majeſty to employ, for the preſſing Occaſions of his Government, thoſe Sums which otherwiſe the Company might have made uſe of; and on the other, though it might be a preſent Inconvenience to the Proprietors to raiſe this Money for their own Service, yet it would entirely take away another Inconvenience to which they had long been ſubject, *viz.* their not having a ſufficient Fund of their own to carry on their Trade, which hindered them from receiving general Accounts, or knowing the true State of their Affairs, and when they might expect to have their ſtated and annual Dividends augmented by the Profits ariſing from their Traffick, which they were now given to underſtand was a Thing not far off, and ought therefore to conſole them for the Trouble they were put to by this unfortunate Accident.

I ſhall not pretend to reaſon on theſe Particulars, or to point out the Cauſes why all theſe Aſſurances have given ſo little Satisfaction: It is ſufficient for our Purpoſe, that the Fall of their Actions has very fully demonſtrated the Truth of the Fact, that they have given no Satisfaction, and that the Affairs of this Company are at preſent in a very lamentable Condition, and are not likely to be in a better, at leaſt, ſo long as the War continues. Our Buſineſs is now to conclude the Section, with a few uſeful Remarks, deduced from the Facts contained in it, hitherto unpubliſhed in our own, or any other Language, but entirely collected from Memoirs furniſhed to me by ſome intelligent and inquiſitive Perſons, who thought it would be of publick Service, to have the true State and Condition of this *French* Company of the *Indies* exhibited to the View of the *Engliſh* Reader. This likewiſe muſt be my Apology for the ſmall Delay which the waiting for theſe Memoirs has occaſioned, and which, I hope, will be fully attoned for by their Publication.

15. After the Reader has peruſed this Hiſtory, he will not need many Arguments to perſuade him, that Trade, or, at leaſt, the Commerce of the *Indies*, is by no means ſuitable to the Genius, Diſpoſition, or Condition of the *French* Nation; ſince he not only ſees how often Attempts of this Sort have miſcarried, but alſo how hardly, and with what prodigious Difficulties, they have been ever brought to ſucceed in any tolerable Degree, notwithſtanding all the Pains and Aſſiſtance the Government has beſtowed upon them. In all other Countries, but particularly *Great-Britain* and *Holland*, Undertakings of this Sort have been the Work of private Men in the Beginning, and have never claimed the Aid, or even the Protection of the State, till they were in ſome Degree of Forwardneſs, and then only from the Apprehenſion of this Difficulty, that the Deſire of Gain might engage ſuch Numbers of Adventurers in the ſame Branch of Commerce as might prove prejudicial both to the Publick and to themſelves.

But in *France* it has been quite otherwiſe; private People never did any thing till excited and encouraged by the Government, and then were able to do little more than ruin themſelves, by launching out into Enterprizes beyond their Abilities. This evidently demonſtrates, that Commerce, at leaſt extenſive Commerce, is not the natural Growth of the Climate of *France*; and therefore, though with much Care and Cultivation, it may be brought to ſome degree of Perfection; yet it can never be naturalized, or brought to grow ſpontaneouſly in that Region, but will be ever drooping and pining, if the Care neceſſary at the firſt raiſing it, be either through Negligence or by Accident withdrawn. It may, indeed, be ſaid, and the Facts laid down in the foregoing Section may be brought to prove it, that ſome great Miniſters have ſhewn Talents equal to, if not exceeding thoſe of Merchants, for extending, maintaining, and ſupporting Trade; but then the Trade they ſupport muſt be temporary, and can laſt no longer than they have Power, which is ſo precarious a Situation, that no extenſive or advantageous Trade can flouriſh therein.

But this is not the only Contingency neither; for how well ſoever a Miniſter may be diſpoſed, it will be impoſſible for him to act but in favourable Conjunctures, that is to ſay, in a Time of full Peace, when his Maſter's Affairs are perfectly well ſettled, as well as his own Power; for, if there be any thing wanting as to either, it is impoſſible that the Commerce under his Protection ſhould thrive. What we have ſeen, therefore, in this ſhort Hiſtory of the Company of the *Indies*, proves no more than that once or twice in two or three Centuries, *France* has a Chance of fixing ſuch an Eſtabliſhment, and that is all. The whole Series of the Hiſtory of that Kingdom hardly furniſhes an Inſtance of ſo ſteady an Adminiſtration as, from the time of the Death of the Duke of *Orleans* to that of Cardinal *Fleury*; ſo that we may look upon the Conſequence of this Adminiſtration as a kind of Miracle.

All the good Effects however which it hath produced to this Company, are like to vaniſh into Smoke, by Means of the preſent War, which has been equally fatal to it at home and abroad: For at home it has occaſioned that high Demand for Money, which has brought on the Suſpenſion of their Dividends, and thereby the Ruin of their Credit; and the Blow ſtruck by Commodore *Barnet* in the *Indies*, and the Loſs of the Ships taken at *Cape-Breton* has gone ſo far towards the Ruin of their Commerce abroad, that another ſuch Stroke will go very near putting an End to it: For the *French*, like other People of lively Tempers, are eaſily diſcouraged; and if once, after all the Care has been taken of it, their preſent Company of the *Indies* ſhould fail, they would infallibly deſpair. This ſufficiently ſhews the Conſequence of making a proper Uſe of our Naval Force in a War with that Crown; ſince, if we deſtroy the Commerce of *France*, we muſt neceſſarily enlarge our own. There is ſo much the more Force in this Argument, becauſe Trade in that Kingdom is a new Thing; a Thing, which, as we have abundantly ſhewn, they have nurſed with the greateſt Care, and yet have raiſed with the utmoſt Difficulty; ſo that if it can be overthrown, they are ſet back for twenty or thirty Years at leaſt, which is a Thing of far more Conſequence to us than all the Conqueſts we can gain upon the Continent.

To ſay the Truth, our Title to *Maritime Power* is that which we ought chiefly to regard; and as it is impoſſible to ſucceed in all, if we engage in too many Deſigns at once; ſo, if we fix our Attention upon this, and purſue it with Vigour, we ſhall find that it will have a better Effect, both with Regard to ourſelves and our Allies, than if we diverted our Views to other Objects, which, at firſt Sight, may appear of equal Importance. The Truth of this will be clearly diſcerned, if we conſider that the increaſing of our Naval Power will render us more formidable than any thing elſe, and the recovering and extending our Trade, prove the ſureſt Means of bringing in Riches. The former will render us moſt dreadful to our Enemies, as the latter will make us moſt uſeful to our Friends. While we are able to carry Terror into the moſt diſtant Parts of the World, our Foes can never be out of our Reach; and while we can, without empoveriſhing ourſelves, grant timely and ſuitable Aſſiſtance to our Allies when attacked, there is no Danger either of the diſturbing domeſtic Quiet, or loſing the Ballance of Power. For whatever ſpeculative Politicians may pretend, we muſt derive our Title to both from the Superiority of our Fleets, and the Wealth of our Subjects. Arbitrary Governments may attain Strength and Influence from other Maxims, but a free People never.

It is our peculiar Happineſs, that the Glory of the Crown, and the Intereſt of the People, depend upon the very ſame Thing; ſo that whatever advances one, muſt neceſſarily enlarge the other; and what diminiſhes this may, ſooner or later, deſtroy that. In *France* the Government is obliged to take unwearied Pains for the Encouragement and Protection of Commerce. In *Great-Britain*, again, this may be entirely ſpared; for, provided the Government does not oppreſs Trade, private Men will carry it on with all the Succeſs that can be wiſhed for; and the leſs the Hand of Power meddles therewith, ſo much the better. This ſhews, at once, the Difference between other Conſtitutions, and the Excellence of that under which live. It is to this Conſtitution that we owe our Trade being natural to our Iſland. It is to their living under a different Conſtitution, that the *French* feel, by Experience, the Difficulty of carrying on Commerce to any Advantage. If ever our Trade fails, it muſt be owing to ourſelves; if ever theirs flouriſhes, it muſt be the Effect of Accidents, or rather of Miracles. In ſhort, nothing but Tyranny, under the Maſk of Corruption, can poſſibly hurt the Commerce of this Nation; whereas nothing but the wiſe and gentle Adminiſtration of deſpotick Power, can poſſibly raiſe the Trade of that. Theſe Reflections ſhew ſufficiently what we have to hope, and they have to fear. They ariſe naturally from the Subject; they are of the greateſt Conſequence to my Readers, and if by dint of theſe Reaſons, founded upon Facts, I ſhall be able to impreſs them as ſtrongly upon their Minds as they deſerve, my End will be fully anſwered. In the mean time, having executed all that was propoſed in this Section, I ſhall proceed with as much Brevity as is poſſible, to finiſh the few that remain, in order to make this Volume compleat.

SECTION XXXVI.

A ſuccinct, but compleat Hiſtory of the Riſe, Progreſs, and Suppreſſion of the Imperial Company of the Indies, *eſtabliſhed at* Oſtend, *by the late Emperor* Charles VI.

Collected from private Memoirs, as well as publick Hiſtories and Acts of State.

1. *The firſt Grounds and Beginning of this Trade from the* Auſtrian-Netherlands *to the* Eaſt-Indies, *and the Difficulties with which it was attended from its Infancy.* 2. *The Plan of its firſt Charter, and the Motives which induced the Court of* Vienna *to conſent to its Eſtabliſhment, ſet in a true Light.* 3. *An Account of the Reaſons alledged by the* States-General *for its Abolition, and an Extract of the Memorial preſented by their Miniſter on that Subject to the Court of* Vienna. 4. *The Uſe made of that Memorial by the* Engliſh-Eaſt-India *Company, to obtain an Act of Parliament to prevent the Subjects of* Great-Britain *from having any Concern in the Capital of that Company.* 5. *An Abridgement of the Imperial Letters Patent for the Eſtabliſhing of the ſaid Company, with a conciſe Account of the Privileges granted to the Proprietors.* 6. *The Apprehenſions raiſed by this Eſtabliſhment, in* Great-Britain *and* Holland, *and the Methods uſed to overturn it.* 7. *The Kings of* France *and* Spain *alſo take Umbrage at this Company, and publiſh their Diſapprobation of it to all* Europe. 8. *The Emperor and the King of* Spain *being ſuddenly reconciled, conclude a Treaty of Commerce, by which the* Oſtend *Company obtains the Protection of both Monarchs.* 9. *An excellent Memorial of the* Dutch Eaſt-India *Company, demonſtrating the Incompatibility of this Treaty of Commerce with the Emperor's Title to the* Netherlands. 10. *The Grounds of the Treaty of* Hanover *concerted for the impeding the Execution, and defeating the Views of that of* Vienna. 11. *The Subſtance of* M. Vander Meer's *Memorial to the King of* Spain, *in Defence of the Rights of the Maritime Powers.* 12. *A ſuccinct Detail of the remaining Part of this Diſpute, and the Conduct of their* High-Mightineſſes. 13. *The Letters Patents of the* Oſtend *Company are ſuſpended, by which the Commerce of the* Eaſt-Indies *is ſecured to the Maritime Powers.*

1. AS ſoon as thoſe Provinces which were formerly ſtiled the *Spaniſh* Low Countries, were yielded to the late Emperor *Charles* VI. by the Treaty of Peace concluded at *Raſtadt*, all the rich Merchants in the ſeveral Cities of *Flanders* and *Brabant*, ſet their Heads at Work, to find out Ways and Means by which their Commerce might be extended through the Authority and Influence of their new Maſter. One of the firſt

Things that occurred to them, was the opening a Trade to the *Eaſt-Indies*, for which they thought their Country, at leaſt, as well ſituated, as either *Great-Britain* or *Holland*. In order to make Trial of this, they firſt of all formed a private Company, without Patent, Charter, or even Licence from the Imperial Court, which, notwithſtanding, was thought to have adviſed them to this Method, and furniſhed them with Paſſports. They had, however, but very indifferent Succeſs at the Beginning, one of their Ships being taken on the Coaſt of *Africa*, richly laden, on the 8th of *December*, 1718, by the *Dutch*.

This Accident had very probably daſhed their Hopes in the very Beginning, if they had not been encouraged by *Vienna*, with a Promiſe of Letters Patent, and Leave immediately given them to take in Subſcriptions. The Emperor went yet farther, and demanded Satisfaction of the *States-General* for this Inſult offered to a Veſſel provided with his Paſſport; but before that Complaint was well laid before them, a freſh Occaſion afforded room for another, the *Dutch* having ſeized a ſecond Ship, and ſhewing very little Inclination to give Satisfaction for either. Upon this, the Merchants at *Oſtend* applied for Commiſſions, that in caſe of any farther Inſults, they might, at leaſt, be in a Condition of defending themſelves. This being looked upon as a very reaſonable Requeſt, was readily granted them, and in Conſequence thereof, one of their Veſſels, well armed, took a *Dutch* Ship, and brought her into *Oſtend*. The *States* did not fail to make loud Complaints of this to the Governor-General of the *Auſtrian* Low-Countries, who anſwered, that the Merchants of *Oſtend* had done no more than they were entitled to do by virtue of his Imperial Majeſty's Commiſſion, in order to obtain Satisfaction for their Loſſes.

This gave ſo much Credit to the new Company, that in the Year 1720, they equipped five large Ships for the *Indies*, and the Year following, they fitted out ſix more, three for *China*, one for *Moca*, another for *Surat*, and the Coaſt of *Malabar*, and the ſixth for *Bengal*. This irritated the *Dutch* to ſuch a Degree, that they immediately ſeized a Veſſel richly laden by the Merchants of *Bruges*, and ordered her Cargo to be ſold, notwithſtanding the Applications of the Imperial Miniſters at the *Hague* to prevent it. This Misfortune was followed by another, an *Engliſh* Privateer taking very ſoon after on the Coaſt of *Madagaſcar*, an *Oſtend* homeward bound Ship, very richly laden from the *Indies*, which ſo diſcouraged the new Company, that they ordered a new Ship they were then fitting out, to be laid up.

But in the Months of *May* and *June* 1722, they received two Ships from the *Indies*, and in the Month of *September*, two more, the Cargoes of which being expoſed to Sale, went off at ſo good a Rate, that they found themſelves not only indemnified for all their Loſſes, but likewiſe in a Condition to carry on their Commerce with greater Spirit and Succeſs than ever. The only Thing they wanted, was a legal Eſtabliſhment; for, tho' the Imperial Court had for a long Time flattered them with the Hopes of Letters Patent, yet they had hitherto delayed them, to avoid a down-right Quarrel with the Maritime Powers.

2. After the Arrival, however, of theſe laſt mentioned Ships, the Company having Money in their Hands, and very powerful Friends at the Court of *Vienna*, reſolved to neglect nothing that might put their Affairs on the beſt Foundation poſſible, and with this View, they ſent ſome of their Directors to Court, very well furniſhed with Inſtructions, as alſo with other Credentials, no leſs neceſſary at that, and moſt other Courts, *viz.* Bills for conſiderable Sums of Money. Theſe Gentlemen managed their Affairs with ſuch Diligence and Prudence, that they obtained a Promiſe of a Charter as extenſive as they could wiſh, or any Company in *Europe* had ever received, the Plan of which was immediately drawn, and gave them entire Satisfaction.

This Charter was to have conſiſted of ſeveral Articles, importing firſt, that the Directors ſhould be fixed to the Number of Eight, to be choſen out of the wealthieſt, moſt reputable, and beſt experienced Merchants in the *Low-Countries*; that they ſhould be allowed four thouſand Florins a Year Salary; that none of them ſhould continue above ſix Years, or be capable of being re-choſen, till they had been a full Year out of Office. Secondly, That a general Court of the Proprietors ſhould be held every Year for the Choice of Directors, when the Company ſhould name twenty four, out of which Liſt the Emperor ſhould chooſe Eight. Thirdly, That the Court of Directors, the Treaſury, and Books of Account belonging to the Company, ſhould remain the firſt three Years at *Antwerp*, and the next three Years either at *Ghent* or *Bruges*; but that their Sales ſhould be conſtantly made either at *Oſtend* or *Bruges*. Fourthly, That the Company's Capital ſhould conſiſt of ten Millions of Florins, and ſhould be divided into ten thouſand Actions, of one thouſand Florins each. Fifthly, the Prizes which the Veſſels in the Service of the Company ſhould take in Time of War, were to belong entirely to the Company, and were to be ſold and diſpoſed of for their Profit. Sixthly, All the Ammunition, Proviſions, Artillery, and naval Stores, requiſite for the Forts and Factories of the Company, were to be exempted from all kinds of Duties and Impoſitions in their Paſſage through the Territories, either of his Imperial Majeſty, or of any of the Lords, or Eccleſiaſtical Communities in the *Low-Countries*. Seventhly, That all the Goods tranſported on Board the Ships of the Company, ſhould pay for all Cuſtoms and Duties Inwards and Outwards, four *per Cent.* and no more, till the Expiration of the Month of *September* 1724, and from that Time ſix *per Cent.* for ever.

The Emperor likewiſe promiſed, in which he alſo kept his Word, to ſend a Perſon veſted with a publick Character to the Great *Mogul*, in order to ſettle an Alliance with him, and to return him Thanks for the Permiſſion he had granted the Company, not only to erect a Factory, but alſo a Fort, to protect their Commerce in his Dominions. The Proſpect his Imperial Majeſty had of enriching his Subjects in the *Low Countries*, and augmenting the Revenues he drew from thence, by fixing ſo extenſive and profitable a Commerce there, engaged him to aſſure the Agents of that Company of ſtill greater Favours. He even intimated, that he would remit all Cuſtoms and Duties for three whole Years, and would likewiſe make the Proprietors a Preſent of three hundred thouſand Florins in ready Money, to indemnify them from any Loſſes they might ſuſtain on the firſt Eſtabliſhment of their Commerce.

When all this good News came at once into the *Auſtrian* Netherlands, it raiſed ſuch a Spirit, not only among the Merchants, Bankers, and other Perſons concerned in Trade, and in Money; but alſo among the Nobility and Gentry who had Fortunes and Eſtates in this Part of the World; that they ſhewed an eager Inclination to exert themſelves to the utmoſt in the Support of the new Company, of the Succeſs of which, there ſeemed to be now no longer any Doubt. It may not be amiſs, however, to obſerve, that it was not the Inhabitants only of theſe Provinces, and other Subjects of his Imperial Majeſty, that encouraged this Undertaking, but Strangers alſo, particularly the *Engliſh*, *French*, and *Dutch*, who were chiefly concerned in the Shipping, and in the Management of the Company's Affairs, notwithſtanding that they very well knew they could never proſper, but at the Expence of their native Countries, and of the Eſtabliſhments for the ſame Commerce long ago erected in them, and which hitherto had been carried on with ſo great Profit and Reputation.

3. We need not wonder, therefore, that the erecting this new Company at *Oſtend* ſhould occaſion, as it did, ſuch Noiſe and Oppoſition throughout all *Europe*, ſo as to render the Subject of this Section as remarkable a Part of the general Hiſtory of this Age, as any that finds a Place therein; but it muſt, however, ſeem a little ſtrange, at firſt Sight, that the warmeſt Friends, and moſt faithful Allies of his Imperial Majeſty, ſhould be the moſt violent in this Oppoſition. One would have imagined, that the Emperor had the ſame Right in his Dominions, that other Princes and States have in theirs; and that how con-

trary ſoever the erecting ſuch a Company in the *Low Countries*, might be to the Intereſts of other Nations concerned in the ſame Trade, they could, however, have no juſt Claim to demand, or expect, that his Imperial Majeſty ſhou'd forego ſuch apparent Advantages for their Sakes, or, in plain Terms, hinder his own Subjects from becoming rich, that theirs might remain ſo. Yet this was, in plain Words, the Caſe, and the Maritime Powers declared, in expreſs Terms, that they expected his Imperial Majeſty ſhould do this, and that he was bound by Treaties to comply with their Demands.

The *States-General*, who thought themſelves moſt aggrieved, were both the earlieſt and the loudeſt in their Complaints; and as it is impoſſible to give the *Engliſh* Reader a fuller or clearer Account of the Grounds upon which they were founded, than by laying before him the Memorial preſented by M. *Bruyninx*, Envoy from the *States-General* to the Court of *Vienna*, which contains the Subſtance of all that was alledged againſt the Emperor's Right of eſtabliſhing ſuch a Company, we have, with this View, made as ſhort and ſuccinct an Extract of that very long Memorial, as is conſiſtent with the Deſign of preſerving its Senſe and Spirit.

We muſt at the ſame Time obſerve, that tho' the *States-General* themſelves were very ready and willing to take this Step, which they very well knew was abſolutely neceſſary for ſecuring the Commerce of their Subjects; yet they were not a little quickned therein by the Application of their own *Eaſt-India* Company, who, as they felt the Danger moſt, bore it with the leaſt Patience, and therefore preſſed this Application might be made in Time, before the Letters Patent for this Company were actually granted, or while they might be revoked with a better Grace, becauſe of their turning leſs to the Diſadvantage of the Subſcribers to the Company's Capital, before their Money was actually paid, or veſted in Merchandize. Accordingly, on the fifteenth of *March* 1723, M. *Bruyninx*, by Order from the *States-General*, actually preſented to the Miniſters of his Imperial Majeſty his famous Memorial, which was to the Purpoſe following, *viz.*

“ Their High-Mightineſſes, who have the Honour to live in good Correſpondence and Amity with his Imperial Majeſty, having nothing more at Heart than the Continuance of the ſame good Correſpondence and Amity which has at all Times ſubſiſted between his Imperial Majeſty and this State, and between the Subjects of both Parts, cannot behold, without extream Grief, that the Inhabitants of the *Auſtrian* Netherlands, Subjects of his Imperial Majeſty, are undertaking Matters no Ways conſiſtent with the good Correſpondence and ſincere Amity; but are extreamly prejudicial to the State, and contrary to the Treaties concluded between his Imperial Majeſty and their High-Mightineſſes. Their High-Mightineſſes have the more Reaſon highly to complain in this Matter, becauſe the Inſtances that have been made, and from Time to Time reiterated on their Part, to obtain proper Redreſs, have not only been fruitleſs, but his Imperial Majeſty's ſaid Subjects in the *Auſtrian* Netherlands extend even daily their Enterprizes, in which they ſeem encouraged and confirmed, by their obtaining of his Catholick and Imperial Majeſty, as their High Mightineſſes have been informed, a Licence to ſail from the *Auſtrian* Netherlands to the *Eaſt-Indies*, particularly from *Oſtend*.

“ Their High-Mightineſſes foreſeeing the unavoidable Troubles that muſt attend this Affair, if his Catholick and Imperial Majeſty ſhould, contrary to all Expectation and Equity, permit his Subjects of the *Auſtrian* Netherlands to proceed in their Undertakings, with reſpect to Navigation and Trade to the *Eaſt-Indies*, contrary to the Tenor and Letter of Treaties; and if Oppoſition ſhould be made to their High-Mightineſſes, in caſe they attempt to make uſe of their Right obtained by Treaties. But their High-Mightineſſes being deſirous of nothing more than to prevent ſuch kind of Troubles, could not in the preſent Juncture avoid making ſuch Repreſentations to his Imperial Majeſty, that by the Treaty concluded in 1648, at *Munſter*, between his Majeſty the King of *Spain* then reigning, and his Succeſſors on the one Part, and their High-Mightineſſes on the other Part, Commerce and Navigation to the *Eaſt* and *Weſt-Indies* were regulated and limited with regard to the Subjects of *Spain*, upon the Foot they then were eſtabliſhed, without Power of farther Extenſion; and with regard to the Subjects of this *State*, it was agreed, that the former ſhould refrain from Places which the latter poſſeſſed.

“ Theſe Articles have always been religiouſly obſerved, and the Inhabitants of the *Spaniſh-Netherlands*, at preſent *Auſtrian*, have never been permitted or tolerated to trade to the *Indies*. The ſaid *Netherlands* being fallen under the Dominion of his Catholick Imperial Majeſty, have not thereby acquired larger Privileges than before; nor can it ever be imagined that their High-Mightineſſes, who have made ſuch ſignal Efforts, contributed ſo much to the Recovery of the *Spaniſh Netherlands*, and ſo many other Parts of the *Spaniſh* Monarchy, in Favour of his Catholick and Imperial Majeſty, purſuant to their Engagements on that Behalf, could poſſibly, by entering into thoſe very Engagements, depart from, or ever intend to depart from their Characters, and their right of maintaining themſelves therein to Perpetuity, obtained by the ſaid Treaty of *Munſter*; or that his Catholick and Imperial Majeſty had any Intention in recovering the ſaid *Netherlands*, to make Alterations in the ſaid Treaty, much leſs deſign, contrary to the Stipulation therein ſo plainly expreſſed, to cauſe any Prejudice to the State, in a Point ſo eſſential and important to them, upon which it was ſo ſtrongly inſiſted in the Negotiations at *Munſter*, and without which that Treaty could not have been concluded.

“ Moreover, it is expreſly ſtipulated by the twenty-ſixth Article of the *Barrier* Treaty, that Commerce and all Things relating to it, ſhould remain, to all Intents and Purpoſes, upon the ſame Foot it was eſtabliſhed at the Treaty of *Munſter*, and in the Manner expreſſed in the Articles of the ſaid Treaty; inſomuch that the ſaid Treaty of *Munſter* is evidently confirmed by the Treaty of the *Barrier*, even at the Time his Catholick and Imperial Majeſty was already in the Poſſeſſion of the ſaid *Netherlands*; as likewiſe by the Guaranty of his *Britannick* Majeſty.

“ And whereas the Right of the States in this Particular is ſo manifeſt, that their High-Mightineſſes have the utmoſt Grounds to expect, from the ſo much renowned Friendſhip and Equity of his Catholick and Imperial Majeſty, that he will not favour, or tolerate any Prejudice to the ſaid Right of the State. They therefore amicably require that the Patent, which is ſaid to have been granted for Navigation and Commerce of the *Auſtrian-Netherlands* to the *Indies*, may not be publiſhed, but withdrawn, or at leaſt rendered ineffectual, and that ſuch Orders may be given by his Imperial Majeſty, that ſuch kind of Navigation and Commerce, whether with Patents or without, may entirely ceaſe, and that the Treaties in that Reſpect may be executed, &c.”

4. This Memorial was no ſooner tranſmitted to *England*, than it was tranſlated, and printed by Order of the *Eaſt-India* Company, who directed that it ſhould be given to the Members at the Door of the Houſe of Commons, in order to quicken them in their Proceedings on a Complaint already exhibited to them on the Subject of this new Company, of which the Subjects of *Great-Britain* had the very ſame Right to expect the Abolition that the States-General had expreſſed.

The Method they took had, in every Reſpect, the wiſhed for Effect; for this Memorial, which ſo thoroughly explained the Thing, had ſo good an Operation on the Members of the Houſe, that, upon the 30th of *April*, 1723, Sir *Nathaniel Gold* reported from the Committee appointed to enquire into the Nature of a Subſcription ſaid to be carried on by ſeveral of his Majeſty's Subjects, to promote an *Eaſt-India* Company now erecting in the *Auſtrian Netherlands*, the Matter, as it appeared to them, and the Reſolutions of the Committee thereupon, as follows: *viz.*

1.

1. That it is the Opinion of this Committee, that ſeveral Subjects of *Great-Britain* have been concerned in promoting and carrying on a Trade from the *Auſtrian-Netherlands* to the *Eaſt-Indies*, and negotiating and eſtabliſhing of a Company for that Purpoſe, to the great Prejudice of the Trade of this Kingdom.

2. That it is the Opinion of this Committee, that the Houſe be moved for Leave to bring in a Bill, effectually to prevent his Majeſty's Subjects from ſubſcribing, or being concerned in encouraging or promoting any Subſcription for an *Eaſt-India* Company in the *Auſtrian-Netherlands*, and for the better ſecuring the lawful Trade of his Majeſty's Subjects to and from the *Eaſt-Indies*.

The firſt of the ſaid Reſolutions being read a ſecond Time, was agreed unto by the Houſe *Nemine contradicente*, and it was alſo unanimouſly ordered, that Leave be given to bring in a Bill effectually to prevent his Majeſty's Subjects from ſubſcribing, or being concerned in encouraging or promoting any Subſcription for an *Eaſt-India* Company in the *Auſtrian Netherlands*, and for the better ſecuring the lawful Trade of his Majeſty's Subjects to and from the *Eaſt-Indies*.

This Bill afterwards paſſed into a Law, under the Title of, "An Act for preventing his Majeſty's Subjects from "ſubſcribing, or being concerned in, or encouraging or "promoting any Subſcription for an *Eaſt-India* Company in the *Auſtrian-Netherlands*, and for the better ſecuring a lawful Trade of his Majeſty's Subjects to and "from the *Eaſt-Indies*." We have already, in the thirty-third Section of this Work, given the Reader an Account of the Scope aad Contents of this Law, upon which, therefore, it is not neceſſary that we ſhould dwell longer here; only we ſhall obſerve, that, henceforward, the Maritime Powers looked upon themſelves as equally obliged to proſecute this Affair with Vigour, and to oblige his Imperial Majeſty to aboliſh the new Company in the *Netherlands*, as a Sacrifice neceſſary to preſerve the Friendſhip of his ancient Allies.

5. But, notwithſtanding the joint Sollicitations of the *Engliſh* and *Dutch* Miniſters, the Emperor ſeemed more and more determined to maintain his Point; and therefore, in the Month of *Auguſt*, 1723, actually granted his Letters Patent to the *Oſtend* Company, though with ſome Variations from the Plan before laid down. In the Preamble to theſe Letters, the Emperor not only took all the Titles of the Head of the Houſe of *Auſtria*, but likewiſe thoſe of the King of *Spain*; and, in particular, ſtiled himſelf King of the *Eaſt* and *Weſt-Indies*, of the *Canary-Iſlands*, &c. with a View, probably, to grace this new and ample Grant to the *Oſtend* Company, which was eſtabliſhed for thirty Years, with Licence to trade to the *Eaſt-Indies* and *Weſt*, and on all the Coaſts of *Africa* on this Side, and on the other Side the *Cape of Good-Hope*, obſerving the uſual Cuſtoms.

The Capital however of the Company was, by theſe Letters, reduced to Six Millions of Florins, and the Number of their Actions to Six Thouſand; but, in other Reſpects, they had all the Powers and Privileges laid down in the firſt Plan, and many more: For they were permitted to build Forts and Caſtles in whatever Parts of the *Eaſt-Indies* they ſhould think fit; as alſo to furniſh them with all kind of Arms, Artillery, and Ammunition, that they thought convenient. They were likewiſe allowed to build and equip Ships of what Size and Strength they thought proper, in any of the Ports of his Imperial Majeſty's Dominions, in the *Low-Countries*, *Italy*, or elſewhere; as alſo to make Leagues, Treaties, and Alliances with the Sovereign Princes and States of the *Indies*, in the Name of his Imperial Majeſty, with this Reſtriction only, that they ſhould not make War on any Potentate whatever, without the Leave of his Imperial Majeſty, and his Succeſſors, firſt had and obtained.

In Conſideration of all which Grants, Privileges, Benefits, and Advantages, the ſaid Company bound themſelves to offer as a Homage to his Imperial Majeſty, his Heirs, Succeſſors, on every Succeſſion, a Golden Lion crowned, of the Weight of twenty Marks, holding under his two Fore-Paws the Arms of the Company, which were a Spread-Eagle, diſplayed with the terreſtrial Globe between his two Heads, ſurmounted by an Imperial Crown. Laſtly, his Imperial Majeſty undertook to protect and defend the ſaid new Company againſt all who ſhould unjuſtly attack them; and ſhould, even in caſe of Neceſſity, employ the whole Force of his Dominions to ſupport and maintain them in the full and free Poſſeſſion of the Enjoyment of the Commerce and Navigation granted them by theſe Letters, and obtain for them full Damages and Satisfaction from any Nation, State, or Potentate, that ſhould preſume to trouble or diſturb them; and ſhould likewiſe, for the future, provide, in every reſpect, for their Safety and Welfare, by any Treaties, Alliances, or Leagues, into which his Imperial Majeſty, his Heirs, or Succeſſors ſhould hereafter enter with any Powers whatever. Such was the Riſe, and ſuch the Eſtabliſhment of this famous Company at *Oſtend*, from which both the Company and his Imperial Majeſty promiſed themſelves ſo many and ſo great Advantages.

6. As ſoon as theſe Letters Patent were publiſhed and regiſtered in the Sovereign Courts of the *Auſtrian Low-Countries*, the Directors taking Poſſeſſion of their Offices, held ſoon after their firſt General Court, in which it was reſolved, that the Books of the Company ſhould be opened at *Antwerp* on the Eleventh of *Auguſt*, which was accordingly done, and that with ſuch Succeſs as ſurpriſed all *Europe*; for the next Day, by Noon, the Capital was entirely ſubſcribed, and by the End of the Month of *Auguſt* the Stock of the *Oſtend* Company was 15 *per Cent.* above Par. The Affairs of this new Society were no leſs flouriſhing in the *Indies*, where the Perſons they employed, being moſt of them ſuch as had ſerved before, either the *Engliſh* or the *Dutch Eaſt-India* Companies, found Ways and Means to ſettle Factories with amazing Facility and Succeſs, and to puſh their Trade in ſuch a manner as very evidently ſhewed, that if the Intereſts of ſuch as oppoſed this Company did not get it ſuppreſſed in *Europe*, their Efforts in the *Indies* would do little, unleſs they had Recourſe to open Force.

The *Dutch Eaſt-India* Company was ſo far convinced of this, that, in leſs than a Fortnight, they preſented two Memorials to the States General, in which they ſcarce kept any Meaſures, but plainly intimated, that as the Eſtabliſhment of this Company was in direct Violation of Treaties, ſo they ought to be left at Liberty to act, as if thoſe Treaties no longer ſubſiſted, and do themſelves that Juſtice by Arms, which it was every Day more and more apparent could not be obtained any other way. The States, however, were by no means inclined to break abſolutely with his Imperial Majeſty, if by any Methods poſſible they might avoid it, and therefore ſtill continued their Applications at the Court of *Vienna*, in conjuction with *Great-Britain*, in order to obtain the Revocation of the Authority by which the new Company acted, or at leaſt a Suſpenſion of it; and in the mean time, they made ſuch Laws at home, in Favour of their own laſt *India* Company, as they thought requiſite, to prevent any of the Subjects of their High Mightineſſes from having any Concern, either in the Capital of the *Eaſt-India* Company in the *Netherlands*, or in the Management of their Affairs in the *Indies*.

As, on the other hand, the *Dutch* Company, tho' they did not proceed to direct Acts of Violence, took ſuch Methods in that Part of the World, where their Power is ſo great, and ſo extenſive, as gave this new Society infinite Trouble, by cramping their Trade, and rendering it in a great meaſure precarious, in which they were ſo well ſeconded by the *Engliſh*, that nothing but the Activity and Abilities of the Perſons concerned in this new Trade, and their finding themſelves in a manner deſperate, in caſe it did not ſucceed, could have kept it on foot in ſpite of the Difficulties and Inconveniencies which they every Day experienced.

7. But it was not only *Great-Britain* and *Holland* that exerted themſelves with ſo great Vigour againſt this new Eſtabliſhment; for *France* likewiſe began to take Umbrage at a Scheme which threatened direct Deſtruction to that Eſtabliſhment of the ſame kind, which ſhe was endeavouring to erect, and therefore his moſt Chriſtian Majeſty's Council publiſhed a Declaration, dated the 16th of

Auguſt 1723, by which all the Subjects of the Crown of *France* were forbid to intereſt themſelves in any manner whatever in the Capital of the *Oſtend* Company, under pain of forfeiting three thouſand Livres for every Act of Offence, beſides incurring the Confiſcation of whatever they ſhould ſubſcribe into the Capital of the ſaid Company; and in caſe of a ſecond Offence, the ſame Fine and Forfeiture, together with Baniſhment for three Years By the ſecond Article of this Declaration, his moſt Chriſtian Majeſty directed, that in caſe the Effects his Subjects might acquire by intereſting themſelves in the Stock of this new Company, could not be reached, ſo as to make them liable to the Confiſcation before mentioned, then their Effects and Fortunes in *France*, ſhould be liable to the like Seizures and Forfeitures, until the Sums in which they were ſo concerned in the *Auſtrian* Company ſhould be raiſed and levied, and all this in the ſhort, ſummary, and extraordinary Method deſcribed by the Royal Ordinance of 1670. By the third Article all Seamen, Manufacturers, Tradeſmen, and in general all the Subjects of his moſt Chriſtian Majeſty were ſtrictly prohibited and forbid to enter, in any Manner or Quality, into the Service of the ſaid *Oſtend* Company, on pain of Impriſonment and Forfeiture of all their Effects. By the fourth Article, all Perſons whatever were prohibited from inviting, inliſting, inrolling, or otherwiſe entering into the Service of the ſaid Company, any of the Subjects of his Moſt Chriſtian Majeſty, in Quality of Officers, Soldiers, Seamen, or in any other Quality or Manner; as alſo to ſell, or buy, or lend, or equip any Veſſel for the Service of the ſaid Company, on pain of the Pillory for the firſt Offence, and of being ſent to the Gallies for the ſecond, beſides the Confiſcation of all that ſhould be thus bought or ſold, and a Fine of Three thouſand Livres each on both the Buyer and Seller.

His Catholick Majeſty likewiſe joined heartily with the Maritime Powers in this Affair, as appears plainly from a Repreſentation preſented to his *Britannick* Majeſty by the *Spaniſh* Miniſter on the 26th of *April*, 1724, conceived in the cleareſt and moſt expreſs Terms, and demonſtrating fully the Injuſtice and Illegality of this new Eſtabliſhment, by proving it utterly inconſiſtent with the Treaty of *Munſter*, by which the Crown of *Spain* engaged not to diſturb the Navigation of the *Dutch* to their *Eaſt-Indies*, in Conſideration of a reciprocal Engagement on their Side, not to diſturb the Commerce of the Subjects of the Crown of *Spain* in that Part of the World. It was by theſe reciprocal Stipulations, that the Subjects of the Crown of *Spain* in the *Low-Countries*, were reſtrained from trading to the *Eaſt-Indies*: And it was under theſe Reſtrictions, that the *Spaniſh Low-Countries* were yielded to the Elector of *Bavaria*; and by *France*, with his Conſent, to the Houſe of *Auſtria*, upon expreſs Condition, that this Houſe ſhould hold them in the ſame Manner, and under the ſame Reſtrictions as they had been held by the Crown of *Spain*; for which their High Mightineſſes likewiſe engaged: So that if the *Oſtend* Company might be legally eſtabliſhed, it would turn as much to the Detriment of *Spain* as to that of the States General, contrary to the plain Meaning and Intention of all theſe ſeveral Treaties and Alliances made, as is moſt apparent for eſtabliſhing and ſecuring the Tranquillity of *Europe*; but, by this Conſtruction, if it could be put upon them, rendered hurtful and ruinous to all Parties (ſave the Emperor alone) and deſtructive of themſelves.

Such was the Repreſentation of the Marquis *de Pozzo Bueno* at the Court of *London*; and ſo clearly was his Catholick Majeſty convinced, that the Eſtabliſhment of the *Oſtend* Company was utterly inconſiſtent with his own particular Intereſt, and with the general Syſtem of the Affairs of *Europe*.

8. But, in much leſs than a Year, the whole Face of Affairs was changed; his Catholick Majeſty ſaw, or was perſuaded by his Miniſters to think he ſaw, his Intereſts in another Light; and he no ſooner took this in his Head, than the general Syſtem of Affairs in *Europe* muſt change likewiſe, and every State and Power therein, alter not only their Notions and Maxims, but their Politicks and Conduct. To explain this, we muſt obſerve, that for twenty-five Years together *France* had been ſtruggling to ſet *Philip* V. on the Throne of *Spain* and the *Indies*, notwithſtanding the Pretenſions of the Houſe of *Auſtria*; in maintaining which, almoſt all the reſt of *Europe* was engaged, and even at this very Time a Congreſs was ſitting in the *Low-Countries*, and endeavouring to adjuſt and ſettle amicably the Diſputes between his late Imperial Majeſty *Charles* VI. and this ſame Prince *Philip* V. in whoſe Quarrels ſo many Princes and States had almoſt ruined and exhauſted their Subjects.

Yet ſuch was the Obſtinacy of both theſe Princes, that all the Methods their beſt Friends could employ, proved ineffectual for procuring a Reconciliation; when, of a ſudden, they took a ſurprizing Reſolution, not only of reconciling themſelves, but of doing it at the Expence of their Friends; and as ſuch violent and unnatural Motions generally exert themſelves with extraordinary, not to ſay extravagant Force, ſo they not only concluded a Peace, but likewiſe a Treaty of Commerce, dated at *Vienna* the Firſt of *May*, 1725; by which his Catholick Majeſty ſacrificed the Intereſt of *France*, to whom he owed his Crown; and his Imperial Majeſty thoſe of his Allies, to whom he was under ſo many, and ſo great Obligations, that they were ſcarce to be enumerated or computed. It was one great Deſign of this new and amazing Treaty of Commerce, to fix and eſtabliſh the *Eaſt-India* Company at *Oſtend*; not only by his Imperial Majeſty's Authority, whoſe Intereſt viſibly led him thereto, but alſo by that of his Catholick Majeſty, to whoſe Intereſt it was directly repugnant, and, that as appears by the foregoing Declaration in his own Senſe and Judgment, expreſſed in the cleareſt and moſt direct Terms.

This ſhews how weak and ridiculous a Thing it is, at leaſt for free Governments, where it is always underſtood, that Power is to be ſolely exerted for the common Benefit of their Subjects in general, to intereſt themſelves in the Support of any particular Syſtem which muſt always depend on the Wills and Inclinations of many arbitrary Princes, who, without any Regard to the Principles upon which ſuch Syſtems are founded, or to the Obligation they are under to ſuch free States as riſque the Wealth and Well-being of their Subjects for eſtabliſhing and maintaining ſuch Syſtems, think themſelves at Liberty, not only to alter and change, but to ſubvert and overturn them whenever they ſee, or imagine they ſee, that greater Advantages are to be obtained by ſuch Actions, how unjuſt or unworthy ſoever, than by ſteadily adhering to their Allies. Such ever has been, and ſuch ever will be the Fate of theſe Kind of Engagements, fatal to thoſe who, from Principles of Probity and good Faith, conſtantly and juſtly obſerve them, and profitable only to thoſe who keep their Promiſes, and obſerve their Treaties no longer, than till they can have their own Price for breaking them.

A Leſſon this, that Reaſon has always, and Experience often taught us, though we have moſt unaccountably neglected to learn, or, at leaſt, to practiſe it; but a Leſſon never dictated to us in ſtronger Terms than by this ſingular Treaty of *Vienna*, by which two Princes, who owed their Power and Territories to the Friendſhip and Faith of others, gave up their Benefactors from a Proſpect, and, as it proved a falſe Proſpect too, of particular Advantages to themſelves. However, upon the Concluſion of this Treaty, the *Oſtend* Company ſeemed to be fixed upon ſo firm and ſolid a Foundation, that both Enemies and Friends concluded, that they were not to be moved or ſhaken, much leſs ruined and diſſolved by any thing leſs than a general War: A Thing hard and difficult of Digeſtion to the *Maritime Powers*, who were very unwilling to pull down the Work of their own Hands, and to deſtroy that Bulwark which with ſo much Difficulty, and ſuch vaſt Expence of Blood and Treaſure, they had erected for their own Security.

As, on the other hand, they were no leſs unwilling to ſee the Commerce of their Subjects torn away by the Violence of a Prince who had never been inveſted with this Power of ruining them, but by the Pains they had taken for his Preſervation. But, to return from theſe Reflections, which, however, are very well worthy the Notice and Attention

tention of the *Engliſh* Reader, and to return to Matters of Fact, and the Methods employed by the Maritime Powers, in Conjunction with *France*, which now, out of regard to its own Intereſt, very heartily joined them, for the pulling down this Edifice, which while it ſtood, threatened its Neighbours with the Loſs of thoſe Advantages that had for ſo many Ages rendered them conſiderable, and by maintaining the Wealth of their Subjects, and the Naval Power of their reſpective Governments, had placed them in a Condition to hold the Balance of Power, and to prevent the Madneſs of ambitious Princes from reducing the Inhabitants of *Europe* into that abject State of Slavery, which renders *Aſia* the moſt deſpicable, tho' in itſelf the richeſt, moſt populous, and moſt delightful Quarter of the Earth.

9. The *Eaſt India* Company in *Holland*, were ſo much alarmed at this Accident, and ſo terrified with the Thoughts of ſeeing this new Company almoſt in its very Dawn, on a better Foot than themſelves, that they could not forbear once more repreſenting their Apprehenſions to their High-Mightineſſes, which they did in a Memorial ſo cloſely worded, and in which all the Facts concerning this important Affair, are ſo fully and clearly ſet forth, that for the ſake of avoiding Variety of Abſtracts, we will give the Subſtance of theſe various Treaties therein to the Reader.

The Directors of the *Eaſt-India* Company in this Country, having obſerved their Commerce in the *Eaſt-Indies* decline from Time to Time, ever ſince it hath been attempted in the *Spaniſh*, now *Auſtrian* Netherlands, to carry on a Trade in the *Indies*, have preſented ſeveral Memorials to your High-Mightineſſes, ſhewing, That the ſaid *Netherlands* have no Right by Treaties to this Navigation and Commerce; that they never could claim it under the Kings of *Spain*, and that conſequently they have it neither by virtue of the ſaid Treaties, nor of theſe that have been made with his Imperial Majeſty, and his Predeceſſor the Emperor *Leopold* of glorious Memory. The rather, ſince the chief Aim and Tendency of theſe Treaties and Negociations was, that in the Countries and Dominions which his Imperial Majeſty might acquire by virtue of the grand Alliance with *England* and this *State*, nothing ſhould be attempted that might be more prejudicial to theſe two Nations, than if the ſaid Countries had remained in the Hands of *Spain*. It was therefore very wiſely ſtipulated by the Barrier Treaty, that his Imperial and Catholick Majeſty ſhould poſſeſs the *Spaniſh* Netherlands, in the ſame Manner as the Kings of *Spain* his Predeceſſors had done, and that their Commerce ſhould be carried on in the Manner ſtipulated by the Treaty of *Munſter*. But though the Directors could have heartily wiſhed they had not been obliged by freſh Incidents to trouble your High Mightineſſes again by new Writings, ſeeing they flattered themſelves, that his Imperial and Catholick Majeſty would forbear carrying on that Commerce any farther to their Prejudice.

Yet they have ſeen with Grief, firſt, That the private Navigation begun ſome Years ago at *Oſtend*, has been changed into a formal Company trading to the *Eaſt-Indies*, and authorized by an ample Patent; and ſecondly, That all ſorts of Means are now uſed to improve and maintain this Company by Treaties with other Powers, to the great Prejudice of the Rights and Privileges the *Eaſt-India* Company in this Country has formerly obtained, as it evidently appears to the ſaid Directors from the Treaty of Commerce lately concluded between his Imperial and Catholick Majeſty, and the King of *Spain*, where it is ſaid in the firſt and third Articles, " That the Men of War, and the Merchants Ships belonging to their ſaid Majeſties, or to their Subjects, ſhall be freely admitted to all the Ports, Coaſts, Countries, and Provinces on either Side, without aſking any previous Permiſſion, which extends alſo in a ſpecial Manner to the *Eaſt-Indies*, where they may aſk for every Thing neceſſary for Navigation, with this ſingular Reſtriction, with reſpect to the *Eaſt-Indies*, that it ſhall not be allowed to carry on any Commerce in each others Dominions, and that the Men of War, eſpecially in thoſe Countries, ſhall behave themſelves ſo, as not to give to the *Spaniards* any Cauſe of Fear or Suſpicion." 'Tis moreover ſaid, in the thirty-ſixth Article of the ſaid Treaty, " That his Imperial and Catholick Majeſty's Ships and Subjects, ſhall be allowed to import into, and ſell in all the King of *Spain*'s Dominions, all ſorts of Fruits, and Effects and Merchandizes, brought by them from the *Eaſt-Indies*, provided it appear by Affidavits of the Deputies of the *Eaſt-India* Company eſtabliſhed in the *Auſtrian* Netherlands, that the ſame came from the conquered Places, Colonies or Factories of the ſaid Company; in which caſe they ſhall enjoy the ſame Privileges granted to the Subjects of the United Provinces by the Treaty of *Munſter* in 1648, both with reſpect to the *Indies*, and any other Thing applicable to the ſaid Treaty, and which ſhall not be contrary to it, any more than to the preſent Peace." Which by the forty-ſeventh, or laſt Article of the ſaid Treaty, is moreover extended, " To all what the *Britiſh* Nation has ſtipulated in their Favour by the Treaties of 1667, 1670, 1713, and laſt of all, by a certain Treaty and Convention, the Day and Date whereof are not expreſſed, forasmuch as it may be applicable to the Emperor's Subjects." Moreover, " To all what has been granted to the *States* of the United Provinces, not only by the Treaties of Peace of 1648, but alſo by the Treaty of Marine in 1650, and the Treaty of Peace 1714." With this Addition, " That all theſe Treaties ſhall ſerve as a Rule in doubtful Caſes, or ſuch as are omitted, or not plainly expreſſed in the preſent Treaty between their ſaid Majeſties."

Upon which doubtful Caſes, and which are paſſed by in Silence, it may be pretended and eſtabliſhed in the firſt place, that his Catholick Majeſty has been willing to grant to the Imperial Subjects by the ſecond Article, free Acceſs to all the Countries, Sea-ports, and Places of his Dominions, ſeeing that neither in that Article, nor in the whole Treaty, any expreſs Reſtriction, or Excluſion are found, which are inſerted in all other Treaties of that Nature, to wit.

That this is only to be underſtood of thoſe Countries and Places which the King poſſeſſes in *Europe*, or thoſe where other Nations have always had a free Commerce, as it appears by the fourth Article of the Treaty of Truce concluded by the King of *Spain* and this *State* in 1609, where it is ſaid, " Which the ſaid Lord the King underſtands to be reſtrained and limited to the Kingdoms, Countries, Dominions and Lordſhips, which he holds and poſſeſſes in *Europe*, and other Places and Ports where the Subjects of the Kings and Princes his Allies trade." Moreover, by the Treaty of *Munſter*, in the fifth Article it is ſaid, " That the Directors and Commiſſioners of the *Eaſt* and *Weſt--India* Companies ſhall have free Acceſs and Commerce in all the Countries within the King's Dominions in *Europe*, but all the *States* Subjects are not to frequent the *Caſtilian* Places in the *Eaſt-Indies*." And laſtly, by the thirty-fourth Article of the Treaty concluded at *Utrecht* in 1714, between his preſent Catholick Majeſty and this *State*, wherein it is expreſsly ſaid, " Tho' it be mentioned in ſeveral of the forgoing Articles, that the Subjects on either Side may freely come to, frequent, ſtay, ſail to, and trade in the Countries, Lands, Cities, Ports, Places and Rivers, belonging to the abovesaid reſpective contracting Parties; yet it is to be underſtood, that the ſaid Subjects are only allowed that Liberty in their reciprocal Dominions in *Europe*, ſince it is expreſsly agreed, that as to the *Spaniſh Weſt-Indies*, it ſhall not be allowed to ſail to, or trade there, but purſuant to the thirty-firſt Article of the ſaid Treaty." On the other hand, the like unlimited Terms are again to be met with in the thirty-ſixth Article of the above-mentioned Treaty, between their ſaid Majeſties, wherein it is ſtipulated, " That the Emperor's Subjects ſhall be allowed to import into all the Countries and Dominions belonging to the King of *Spain*, without any Diſtinction, all ſorts of Effects, Fruits and Merchandizes, from their Colonies and conquered Places in the *Eaſt-Indies*, provided they have the neceſſary Affidavits required by the ſaid Article; in which Caſe they ſhall enjoy all the Privileges granted to the Subjects of this *State* by the King of *Spain*'s Letters Patent in 1663."

Although the Directors of the *Eaſt-India* Company in this Country do not know of any other Privilege, but that which allows them to import the Products and Merchandizes from the *Indies*, into the Dominions the King of *Spain* poſſeſſes in *Europe*, or in ſuch Places where all other Nations have a free Trade, and that indeed by certain Letters Patent iſſued by the King of *Spain* in 1663, it was enjoined, that at the entering of thoſe Products and Merchandizes into ſuch of his Majeſty's Dominions where their Importation has always been allowed, Affidavits ſhould be produced, to make it appear, that they are brought from the Countries, Colonies, and conquered Places our *Eaſt-India* Company is poſſeſſed of in the *Eaſt-Indies*, to the end they might be diſtinguiſhed from the Merchandizes brought from the *Portugueze Eaſt-Indies*, *Spain* being then at War with that Nation. Yet your High Mightineſſes Miniſter then reſiding at *Madrid*, ſtrenuouſly oppoſed it, in the Name of the *State*, and having repreſented to his Catholick Majeſty, the Impoſſibility of complying with this Demand, it was dropped in all Appearance, ſince they never heard, that the like Affidavits have been afterwards required in *Spain*, for the Produces and Merchandizes brought from the *Eaſt-Indies*.

But as theſe Things have in all likelihood been interpreted according to the ancient Practice, or that they might be ſuſceptible of ſuch a Conſtruction from preceding Acts and Treaties, the Directors glance upon them occaſionally, to ſhew only, that the implicit Meaning and Intent of theſe Articles is altogether unknown to them, or at leaſt does not appear ſo clear as what is eſtabliſhed in the abovesaid ſecond Article, wherein, " The ſaid free " Acceſs, and Reſort to all his Catholick Majeſty's Ports " and Places is expreſsly extended to the *Eaſt-Indies*." Which the Directors do not remember to have been granted in ſuch a Manner to any Nation whatſoever, and eſpecially to the Subjects of this *State*, ſince by the fifth Article of the Treaty of *Munſter* ſo often quoted, it is expreſsly ſtipulated, " That the Subjects of this *State*, ſhall " forbear frequenting the *Caſtilian* Places in the *Eaſt-In-* " *dies*." This has been ſtrictly obſerved ever ſince by the *Spaniards*, as it appears by a particular Caſe, the Directors had the Honour to lay before your High Mightineſſes, by their Memorial in the Year 1720, *viz.* " That " in 1687, a Ship belonging to their Company, having " on Board two Friars, who had been ſhip-wrecked on " the Coaſt of *China*, and having at their earneſt Requeſt " carried them to the *Phillippine* Iſlands, the Captain of " that Ship only demanded, on this Occaſion, a ſmall Pro" viſion of Water, which he wanted, by reaſon he had gone " ſo much out of his Way; but inſtead of granting him " this, or any other Favour, they ordered him forthwith " to retire."

Hence it is manifeſt, how far the King of *Spain* was from deſigning, that his Sea-ports and Places in the *Eaſt-Indies*, which extended no farther than the *Phillippine* Iſlands, otherwiſe called *Manillas*, ſhould ſerve for Staples, or Places of Refreſhments to the *Eaſt-India* Ships, of this State, as knowing very well what might be the Conſequence of it; but the Directors think they have a more particular Reaſon to complain of the ſaid thirty-ſixth Article, becauſe the King of *Spain* grants thereby to his Imperial and Catholick Majeſty's Subjects, not only all that has been granted, but moreover yielded to the Inhabitants of this State, by the Treaty of *Munſter*, both in regard to the *Indies*, and otherwiſe, which they take to be directly contrary to the fifth Article of the ſaid Treaty of *Munſter*, by which it is ſtipulated, " That the *Spaniards* " ſhall continue their Navigation within the ſame Limits, " as at the Time of that Treaty, without extending it " any farther in the *Eaſt-Indies*." As on the other hand, it was ſtipulated by the Treaty of *Utrecht*, in 1714, between his *Spaniſh* Majeſty and this State, " That the Navigation " and the Trade in the *Eaſt* and *Weſt-Indies*, belonging " to the Lords the *States-General*, ſhall be carried on " in the ſame Manner as it had been practiſed hitherto." Which proves evidently, that no Change ought to be made on either Side, with reſpect to this Navigation, whether it be by their own Subjects, or thoſe of another Power, not comprehended in the fifth Article of the Treaty of *Munſter*, ſeeing the tenth Article of the Treaty of *Utrecht* ſays moreover, " That the Prerogatives relating " to the Navigation and Commerce in the *Eaſt-Indies*, " expreſſed in the fifth Article of the Treaty of *Munſter*, " ſhall only concern the two high contracting Powers, " and their Subjects, namely, *Spain* and this *State*, and " no others."

So that the true Meaning and Intent of theſe Words appear plain and manifeſt by the Report of the Plenipotentiaries at the Congreſs at *Utrecht*, inſerted in the Verbal and the Notules, or Reſolutions of your High Mightineſſes of the Fourth of *January*, 1714, in the ſame Terms: " Firſt, upon the fifth and ſixth Articles of the " Treaty of *Munſter*, which the ſaid Plenipotentiaries " looked upon as deſerving ſome Remarks, as being appli" cable to others, ſaying, that the States and their Inha" bitants ought indeed to enjoy all the Advantages ſtipu" lated by this Treaty, but that the other Nations, and par" ticularly the *Hans Towns*, ſhall not partake of the ſame:" A convincing Proof that the Excluſion, or Non-admittance of other Nations from enjoying what has been agreed upon by the fifth Article, about the Navigation and Commerce of the *Eaſt-Indies*, was the only true Aim of that Treaty; which having been thus inſerted at the Requeſt and Inſtances of the *Spaniſh* Plenipotentiaries, and agreed to by both Parties, it is not allowed to either of theſe two Powers to transfer this Right by Treaty, or make another Nation partake thereof without the Concurrence and Conſent of the other Powers comprehended in the ſame Convention, and concerned therein. Beſides that, after the King of *Spain* had once yielded in Favour of the Inhabitants of this State the Part of the *Indies*, which the privileged *Eaſt-India* Company poſſeſſes, with Promiſe that the *Spaniards* ſhould not extend themſelves on that Side, he has no Right to make over a ſecond Time to other Nations, what his Majeſty had formerly deſiſted from by ſo ſolemn a Treaty, and which he has always left to the privileged *Eaſt-India* Company of this State, or to ſuch who having been formerly his Majeſty's Subjects, are alſo comprehended in the Article of Excluſion. Neither is he entitled to tolerate publickly, that the Diſtricts yielded, and which have been peaceably enjoyed without any Lett from the *Spaniſh* Subjects, but frequented by Men of War and Merchants Ships, that Forts, Colonies, and Factories for Trade be ſet up there, and generally to do every thing that could be done had there been no Treaty, to the great Prejudice and impairing, if not entire Extinction of the Prerogatives of this State formerly ſtipulated and obtained.

And foraſmuch, High and Mighty Lords, as the Directors of the *Eaſt-India* Company in this Country are more and more confirmed in what they did foreſee long ago; that in caſe the *Eaſt* and *Weſt-India* Company erected in the *Auſtrian-Netherlands*, will thus carry on their Navigation and Commerce, within the Limits of the Grant made to the *Eaſt-India* Company of this Country, and diſturb the Commerce every where in the *Indies*, the Conſequences of this Affair will every Day grow more important; and ſeeing, beſides, that this Navigation and Commerce, with the Grant relating thereto, is now of late confirmed on the Part of the King of *Spain*, by an important Treaty, and highly prejudicial to the Commerce of the *Eaſt-India* Company of this Country; and that, in ſome Reſpects, the *Auſtrian* Company is favoured more than the Inhabitants of this State, they could not forbear repreſenting at this Juncture their Grievances, moſt humbly beſeeching your High Mightineſſes to take them into your ſerious Conſideration, and that you would be pleaſed, according to the Importance of this Affair, to uſe the moſt effectual Means, as well at the Court of *Vienna* as at that of *Madrid*, and elſewhere, where it might be of any Service, to have the ſaid Grievances redreſſed, and that Navigation entirely put down, hoping withal, and expecting that it will not be taken amiſs, that, ſeeing they cannot acquieſce to the new Grant and Treaty, they ſtick cloſe to the ancient Treaty, and apply the ſame as a Rule, not only in Caſes that are doubtful, or omitted, but in all other Caſes.

10. In this Memorial we ſee, at one View, and in the moſt expreſſive Terms poſſible, the Nature of thoſe Grievances under which the Maritime Powers laboured from this Treaty of Commence concluded at *Vienna*, and the Reaſons which induced them to hope that they would be redreſſed. We ſee plainly that there could be nothing in Nature more flagrantly injurious to the Maritime Powers than the ſeveral Clauſes in this Treaty, of which they complained, nor any thing more plain or ſelf evident than the Rights upon which they inſiſted, of which the States-General were ſo ſenſible, that they reſolved to repeat their Applications at the Courts of *Vienna* and *Madrid*, in order to obtain Satisfaction and Redreſs. They were ſtrongly ſeconded by the Courts of *London* and *Paris*, who, in the mean time however, conſidering how little Advantage had hitherto been obtained by the ſlow and pacifick Meaſures, reſolved, if poſſible, to quicken them by ſome Step of another kind, which might convince both the Emperor and the King of *Spain*, that they were not to be frighted with high Words, or to be perſuaded out of their Properties, by the Parchment Agreements of other Princes.

They took Advantage therefore of the Diſpoſition the King of *Pruſſia* was in, who ſaw with ſome Diſpleaſure the exorbitant, and as he conceived, Anti-conſtitutional Power of the Emperor in *Germany*, the Conſequences of which he thought might be fatal to the Prerogatives of himſelf and of other Princes; with which Notions ſtriking in, they concluded a defenſive Treaty at *Hanover*, dated *September* the 3d, 1725, which Treaty was to ſubſiſt for fifteen Years, and to which the States-General were to be invited to accede. Tho' there is not the leaſt, mention in this Treaty of the *Oſtend* Company, yet in the ſecond Article it being provided that the contracting Powers guaranty not only each others Dominions, Countries and Cities, as well in as out of *Europe*, but alſo all their Rights, Privileges and Advantages, particularly thoſe relating to Trade, it was well enough underſtood, that under this Phraſe *particularly* the *Oſtend* Company was included, ſince it was impoſſible it ſhould continue to ſubſiſt, and the contracting Parties to this Treaty reſerve their Rights and Privileges relating to Trade. As ſoon as this Alliance was concluded, it was not only made known to the States-General at the *Hague*, but they were likewiſe invited and preſſed to come into it, as the moſt effectual, and indeed the only way of procuring what they of all other Powers were moſt intereſted to procure, *viz.* the Abolition of the new Company.

For while the Emperor and the King of *Spain* continued ſo cloſely united, and the reſt of the Princes of *Europe* unconnected by any counter Alliance, it was moſt evident, that they had it in their Power to give Law, and to do what they pleaſed; which Power it was likewiſe very viſible they intended to uſe for many Purpoſes, abſolutely irreconcileable to the Intereſt of other Princes and States, more eſpecially in the Caſe of this Company, which ſtood now upon ſuch a Foundation as might have enabled it, in the courſe of a few Years, to have ſuſtained itſelf againſt any Force that could have been brought to diſturb it: of this we may be eaſily ſenſible, if we conſider that never any Eſtabliſhment of this kind was poſſeſſed of equal Advantages, or ſupported by the Authority of two ſuch Potentates. Neither for the Time it continued did ever any Company run into ſuch an extenſive Trade, or make ſo rapid a Progreſs as this of the *Auſtrian* Netherlands. So that unqueſtionably had it been left to itſelf, or been oppoſed only by the dilatory Methods of Memorials and Applications, it would have riſen to ſuch a Height as muſt have aſtoniſhed thoſe, who from narrow and particular Views, treated it as a political Chimera.

But the *Dutch* however, though they could not help acknowledging in general Terms the Wiſdom and Prudence of the Treaty of *Hanover*, yet they did not immediately accede to it, but on the contrary, reſolved to try once more the Force of Applications at the Court of *Madrid*. It was with this View that they directed Mr *Vander Meer*, their Ambaſſador at that Court, to preſent a Memorial, in order to demonſtrate the Injuſtice that was done them by this late Treaty with the Emperor, which Memorial was actually preſented on the 4th of *Nov.* 1725, and as it is in itſelf one of the moſt inſtructive, as well as one of the plaineſt Papers that appeared in this whole important Controverſy, in which the whole commercial Intereſt of *Europe* were at Stake, we ſhall, omitting thoſe Parts of it which are purely Matters of Form, inſert, as the beſt Account that can be given of this Matter, and therefore the laſt Paper which we ſhall mention upon this Occaſion. But it may be proper to put the Reader in mind, that tho' Mr. *Vander Meer* preſented this Memorial only in the Name of his Maſters the States-General, yet it contains likewiſe the Grounds of Jealouſy and Diſſatisfaction given to *Great-Britain*, and therefore concerns us as much as it did them; and it is very poſſible there may come a Time when theſe very Points may as much concern us again. The Arguments he uſed were theſe that follow.

11. Treaties being underſtood to be the Baſis and Foundation of the Union of Nations and Potentates, it ſeems juſt, that each Party ſhould make it an inviolable Law, not only to forbear all open Infraction of them, but likewiſe not to alter them in any manner, nor permit their Miniſters to make uſe of Subterfuges for explaining the Tenour and Articles of them in another Senſe than what was intended at the Time of theſe mutual Conventions. It is with theſe Notions of good Faith that their High Mightineſſes have always rigorouſly executed all they have ſtipulated, without infringing or altering in the leaſt Point any Article whatſoever; making it a ſtrict Rule to themſelves, to redreſs any Abuſe, and give Satisfaction for it upon Complaint made, and cauſing ſuch of their Subjects to be ſeverely puniſhed who preſume to deviate from the literal Obſervations of their Orders; and as for entering into Engagements with other Powers to the Prejudice of their Allies, whatever Solicitations have been made to them, they have given evident Marks to your Majeſty of their perfect Attachments to your Intereſts, by refuſing generally all the Advantages that were offered them if they would have gone into the Quadruple Alliance.

My Maſters flattered themſelves, Sire, that after ſuch real and ſuch particular Regards, they ſhould find in your Majeſty's Perſon, not only an Ally, but a ſure Protection againſt all thoſe who ſhould attempt any Invaſion in the Treaties to their Prejudice. Nevertheleſs they have now the Grief to ſee Things bear quite another Face, and that far from being ſupported by your Majeſty in their maniſeſt Rights, in relation to their Commerce to the *Indies*, they find in your Royal Perſon the Protector of a Company, whoſe Commerce cannot ſubſiſt without ruining that of their High Mightineſſes Subjects and People; and to whatever Evaſion your Majeſty's Miniſters may have recourſe, when they inſinuate that nothing has been granted to the Emperor which is not conformable to all the ancient Treaties, it is eaſy to demonſtrate that it cannot be without a ſtrained Conſtruction, contrary to the Expreſſions of the Articles; for by taking them literally, and in the Senſe they were penn'd, it is obvious to every Eye how wide this new Treaty of Commerce is from the Aim of thoſe who (after ſuch cruel Wars, and ſo much Blood ſhed for maintaing the Rights of the Republick, as well with reſpect to their Navigation to the *Indies*, as to their Commerce in general) did at length conclude the Treaties of *Munſter* and *Utrecht*.

I come, Sire, to theſe Demonſtrations. By the ſecond and third Articles of the Treaty of *Vienna*, all Men of War, or Merchant Ships, belonging to his Imperial Majeſty, and his Subjects, are allowed to enter all the Towns and Ports of the Dominions of *Spain* (thoſe of the *Eaſt-Indies* included) there to take in Refreſhments, Proviſions, and generally whatever they may want for continuing their Voyage, with this ſole Reſtriction, that they ſhall not trade, or traffick there. In the thirty-ſixth Article of the ſame Treaty, it is ſaid, that the Subjects of his Imperial Majeſty may import and vend in the Territories, and Dominions of *Spain*, all the Goods, Merchandizes, and Products, which they ſhall bring from the *Eaſt-Indies*, provided they ſhall produce a Certificate from the *India* Company of the *Auſtrian* Netherlands, that thoſe Merchandizes, or Products, are of the Growth of their Colonies and Conqueſts; giving beſides, to theſe Subjects of the Emperor, all that was yielded to the *Dutch*, by the Treaty of *Munſter* in 1648, and afterwards by particular Grants in 1663, and by the Treaty of *Utrecht* in 1714.

The forty-ſeventh Article of the ſame Treaty of *Vienna*, grants likewiſe to the ſaid Subjects of the Emperor, all that the *Engliſh* obtained in 1667, 1670, 1713, and laſtly, by a certain Treaty, or Convention, the Date of which is not ſpecified, with this Addition, that in Caſes doubtful, or not ſufficiently clear, thoſe Treaties ſhould ſerve for a Baſis, and Foundation, nor is it explained, that the Entrance of the Emperor's Subjects into the Dominions of the Crown of *Spain*, ought to be underſtood to comprehend only the Ports, Towns and Harbours, of your Majeſty in *Europe*, and not thoſe of the *Indies*, which Reſtriction is moſt expreſly ſpecified in the Treaties made with their High-Mightineſſes, my Maſters.

So that, under this Pretext, the Subjects of his Imperial Majeſty would enjoy much greater Advantages than any other Nation; for never was any Perſon permitted to frequent, in any Manner, under any Pretence whatever, your Majeſty's Ports and Towns in the *Indies*. And for a Proof that this is obſerved with extraordinary Rigour, on the Part of *Spain*, it may ſuffice to relate, that in 1687, a Ship belonging to the *Dutch Eaſt-India* Company, having taken on Board two Monks, who had been ſhipwreck'd on the Coaſt of *China*, and having at their Intreaty carried them to the *Philippine* Iſlands, the Captain, on that Occaſion, deſired the Governor of the Country, to allow him to take in a little Water, of which he had not Store ſufficient, becauſe he had gone far about, to carry thoſe two Monks whither they had deſired, which had retarded his Voyage; but far from obtaining his Requeſt, he received Orders to retire immediately, without being allowed the leaſt Refreſhment, which (ſetting aſide the Ingratitude of the Governor) is an evident Proof, that the Kings of *Spain* have never underſtood, that the reſorting to Ports of their Dominions, ought to comprehend their Towns and Harbours in the *Indies*; wherefore this Article being granted to the Emperor's Ships, is manifeſtly oppoſite to the Treaty of *Munſter*, as is alſo the thirty-ſixth Article of the ſaid Treaty of *Vienna*, by which (beſides what has been already alledged above) your Majeſty gives to his Imperial Majeſty's Subjects, not only all that was granted, but even yielded to the Inhabitants of the Republick, by the Treaty of *Munſter*, as well with reſpect to the *Indies*, as otherwiſe, which is alſo directly contrary to the ſixth Article of the ſaid Treaty of *Munſter*, where it is ſaid, that the *Spaniards* ſhould limit their Navigation within the Bounds it was at the Time of the Treaty, without extending it further in the *Indies*, and this was confirmed by that of *Utrecht*, in 1714.

Theſe Articles prove evidently then, that no Change ought to be made in that Navigation, the one Side, or the other, whether by the Party's own Subjects, or by thoſe of any other Power, who is not comprehended in the fifth Article of the Treaty of *Munſter*, conſidering further, that the tenth Article of that of *Utrecht* declares, that the Prerogatives, with reſpect to the Navigation and Commerce of the *Eaſt-Indies*, comprized in the ſaid fifth Article of the Treaty of *Munſter*, ſhall have Place ſolely in what concerns the two high Powers contracting, and their Subjects (that is to ſay, *Spain* and the Republick) not others. Accordingly, the true Senſe and Meaning of theſe Words appear clearly, by the Report of the Plenipotentiaries at the ſaid Congreſs of *Utrecht*, inſerted in the Journal, which is among the Acts of the Negotiations, where it is ſaid, concerning the fifth and ſixth Articles of the Treaty of *Munſter*,

That the Intention of your Majeſty's Plenipotentiaries was, that the *States-General* of the United Provinces, and their Inhabitants, ought of Right to enjoy the Advantages ſtipulated by that Treaty, but that other Nations, and particularly the *Hanſe* Towns, ought not to enjoy them, a certain Mark, that the Excluſion (or Non-Admiſſion of other Nations to the Enjoyment of what is ſettled by the fifth Article touching the Navigation and Commerce to the *Eaſt-Indies*) was the only Aim of that Treaty. And ſeeing thoſe Conventions were inſerted at the Requiſition and Inſtance of your Majeſty's Plenipotentiaries, and were agreed to on both Sides, one of the two Powers ought not to transfer his Right by a particular Treaty, or let another Nation participate therein, without the Conſent and Concurrence of the other Power, who is ſo particularly intereſted in the ſaid Convention. Beſides, *Spain* having yielded to the Republick, that Part of the *Indies* which it now poſſeſſes, with a Promiſe, that the *Spaniards* ſhould not extend themſelves on that Side; that Crown has no Right to yield a ſecond Time to other Nations, what it deſiſted from, and yielded by ſo ſolemn a Treaty in Favour of the Republick.

How is it poſſible then, that your Majeſty's Miniſters ſhould permit thoſe Articles to be infringed, by giving an authentick Permiſſion to the *Oſtend* Company, and by beſtowing on them Privileges, which there would have been no Right to grant, had that Part of the *Netherlands*, which they inhabit, remained under your Majeſty's Dominion. And ſeeing that the Kings of *Spain* had anciently the Power, and were in the Poſſeſſion of excluding all the Subjects of their Dominions (except thoſe of *Spain*) from the Navigation to the *Indies*, the Inhabitants of the *Auſtrian* Netherlands, who at that Time were their Subjects, were excluded, and it was only by the Treaty of *Munſter*, that the United-Provinces obtained the Prerogatives they enjoy, with the mutual Conditions, that the Diviſion of the *Indies* being made, the two Parties were obliged to abſtain from the Navigation within each others Liberties.

Whence it follows, that the Republick having engaged, that her Subjects ſhould not navigate in the *Spaniſh Indies*, ſhe at the ſame Time acquired the Right of excluding all the Subjects of the Dominions of *Spain*, and conſequently thoſe of the *Spaniſh* Netherlands, from the Navigation within their Limits. For the reſt, the Ceſſion which was made of the ſaid *Netherlands* to the Emperor, being ſuch, that his Imperial Majeſty ſhould poſſeſs them under the ſame Conditions the Kings of *Spain* had done; it is clear, that theſe Countries, by changing their Maſter, could not acquire any Right prejudicial to the Republick, and contrary to all the Treaties.

Beſides the expreſs Terms of the thirty-firſt Article of the Treaty of *Utrecht* are, that your Majeſty promiſes and engages, not to permit any foreign Nation whatſoever (and for any Reaſon, or under any Pretext whatſoever) to ſend Ships, or to trade in the *Spaniſh Indies*; but that on the contrary, your Majeſty obliges yourſelf to maintain Things on the ſame Foot they were during the Reign of King *Charles* II. and conformable to the fundamental Laws of *Spain*, which abſolutely prohibit, and interdict all foreign Nations from entering and trading into thoſe *Indies*, in which even the *States-General* had engaged to ſupport and maintain your Majeſty againſt all thoſe who ſhould have attempted the contrary. Whether therefore the Subjects of the *Auſtrian* Netherlands be conſidered as having been formerly Subjects of the King of *Spain*, or whether they be conſidered as Foreigners, nothing does authorize the granting them Privileges oppoſite to the Tenor of the mutual Treaties and Conventions between your Majeſty and the Republick.

All theſe Conſiderations, Sire, are reducible to the four following Heads, *viz.* I. That by the Treaty of Commerce between your Majeſty and his Imperial Majeſty, the Emperor's Subjects are permitted to trade in the *Indies*, which is entirely contrary to the Aim and Intention of the Treaties of *Munſter* and *Utrecht*. II. That by the ſaid Treaty of Commerce, the Emperor's Subjects have acquired Permiſſion to enter and frequent your Majeſty's Towns and Ports in the *Indies*, under Pretext of taking in Refreſhments there, *&c.* a Thing which has always been refuſed to the Ships of their High-Mightineſſes, and conſequently, by virtue of the Treaties, cannot be granted to other Nations to their Prejudice. III. That your Majeſty ſupports and authorizes the Eſtabliſhments of a Company formed by the Inhabitants of a Country which have heretofore been under your Dominion, is ſpecifically under the Prohibitions which were ſtipulated with regard to all the Subjects of the Crown of *Spain* (the *Spaniards* excepted) which is very different from the Tenor of the Treaties, wherein it is declared, that your Majeſty will not only hinder all foreign Nations from trading in the *Indies*, but likewiſe that you will ſupport their High-Mightineſſes in all their Rights and Prerogatives in that reſpect; and Laſtly, That your Majeſty and their High-Mightineſſes ſtanding engaged to aſſiſt each other mutually for hindering any other Nation from going to trade in the *Indies*, it is evident, that neither of the two contracting Parties could have a Right to alter, or deſiſt from thoſe Articles, without the Participation and Conſent of the other Party intereſted.

Sire, all the Conſiderations above-mentioned, do, at this Time, form juſt Ground for the Complaints of their High-Mightineſſes, my Maſters, who cannot ſufficiently wonder how your Majeſty's Miniſters (without making due Reflections on the manifeſt Contradiction between the Treaty of *Vienna* and thoſe of *Munſter* and *Utrecht*) could venture to grant ſo conſiderable Advantages to the Subjects of the *Auſtrian* Netherlands, to the great Prejudice of their High-Mightineſſes, and if one may be allowed to ſay it, even to the great Prejudice of your Majeſty, and of your People, who, if that continue, will in Time ſee themſelves fruſtrated of the Advantages of their own Commerce, by that very Company which is now ſo ſignally protected. Their High-Mightineſſes moſt earneſtly entreat your Majeſty, therefore, by my Mouth, to be pleaſed to order, that the moſt ſerious Regards, and the moſt ſuitable to the Importance of the Caſe, may be had to the preſent Remonſtrances, well weighing how far theſe Contradictions to the Treaties of *Munſter* and *Utrecht*, may in Time lead to ill Conſequences, and create Troubles in *Europe*.

Their High-Mightineſſes are thoroughly perſwaded from your Majeſty's Zeal and Piety, that it was not your Intention to over-turn the Rights and Prerogatives of the Republick, founded on ſuch authentick Treaties, ſo that they can impute only to your Majeſty's Miniſters, the Attempts made againſt them by that of *Vienna*. But if your Majeſty has not the Goodneſs to apply in Time the neceſſary Remedy, this Republick will find themſelves fruſtrated of all the Advantages they had acquired at the Expence of ſo much Bloodſhed, for the Support of its Navigation; whence it is eaſy to conclude, Sire, that Commerce being in general Part of the Baſis and Foundation of the State, their High-Mightineſſes can never deſiſt in the leaſt from the mutual Conventions of the Treaties of *Munſter* and *Utrecht*.

They therefore flatter themſelves, that your Majeſty will be pleaſed to cauſe the Articles of the Treaty of *Vienna*, which are contradictory thereto, to be reformed, and will provide, that the *Oſtend* Company may not in any Manner, nor under any Pretext, go, and navigate in the *Indies*, to the End, their High-Mightineſſes, my Maſters, may ſatisfy and calm the alarmed Minds of their People, who look upon this Treaty of *Vienna*, as the entire Subverſion of the Rights and Prerogatives of their Commerce, and claim the Performance of the Treaties of *Munſter* and *Utrecht*.

12. This Repreſentation, however, though extreamly clear and plain, had none of the Effects that were expected from it. Their Catholick Majeſties had formed to themſelves very extenſive, but at the ſame Time very groundleſs Expectations from the Treaty of *Vienna*, and were therefore obſtinate in their Reſolutions of ſupporting it at all Events. The *Oſtend* Company was viſibly of no Advantage, but in its Conſequences very likely to prove a great Prejudice to the *Spaniſh* Trade; but the Reaſon which induced the Court of *Madrid*, notwithſtanding, to conſent to the Support of it, was, the Aſſiſtance ſhe expected from the Emperor, in the Execution of a favourite Deſign of her own, which was the recovering the Fortreſs of *Gibraltar* from the Crown of *Great Britain*.

But the great and all-powerful Motive which induced *Spain* to act as ſhe did, was, the vain Hopes of obtaining the Heireſs of the Houſe of *Auſtria*, the preſent Empreſs and Queen of *Hungary*, for Don *Carlos*, the eldeſt Son of the Queen of *Spain*, and at preſent King of the *Sicilies*. This Notion, tho' very indifferently founded, made ſuch an Impreſſion on the Minds of their Catholick Majeſties, that nothing appeared to them in the Light of an Inconvenience, which they apprehended might contribute thereto, and this it was that engaged them to comply ſo readily with whatever his Imperial Majeſty demanded, and even induce them to make ſuch Diſpoſitions as looked like engaging in a War with the *Hanover* Allies. The Emperor, alſo, on his Side, ſhewed as great Obſtinacy, and indeed, with more Reaſon; for all the Articles of the *Vienna* Alliance, were entirely in his Favour, and the eſtabliſhing the *Oſtend* Company, in the Manner he deſigned, was a Point of ſuch infinite Conſequence, both with reſpect to Honour and Intereſt, that we need not at all wonder he puſhed it in the Manner he did, or that he laboured, by ſeveral Negotiations in the North, to engage moſt of the Crowns there in the Support of his Schemes, in which at firſt he had extraordinary Succeſs, but by Degrees, the Aſpect of Affairs was changed, by Meaſures which we ſhall next explain.

13. The *States-General*, ſeeing how little they were able to effect by Memorials and Repreſentations, and beginning to feel daily more and more the bad Conſequences of the Eſtabliſhment of the *Oſtend* Company, with regard to their Commerce in the *Indies*, took at laſt a Reſolution of acceding to the Treaty of *Hanover*, notwithſtanding all that their Imperial and Catholick Majeſties could do to hinder it. They did accede accordingly, which very clearly demonſtrated to the Courts of *Vienna* and *Madrid*, that it was impoſſible to proſecute their Deſigns farther, without running the immediate Hazard of a War. *Spain* ſeemed reſolved to run this Riſque, and actually committed Hoſtilities againſt *Great-Britain*, by beſieging *Gibraltar*, with very little Effect however, and without any Aſſiſtance from the Emperor, who, on his Side, was unable to make the neceſſary Proviſions for a Rupture, without the Aſſiſtance of ſuch Supplies in Money from *Spain*, as at that Time ſhe could not afford. The Court of *France* remained alſo ſteady to her Engagements, and appeared ſo willing to enter into a War againſt *Spain*, in Conjunction with the Maritime Powers, that this Court began to diſlike exceedingly the Situation ſhe was in, and to wiſh for a Peace upon reaſonable Terms.

The Court of *Vienna* too perceiving that *Spain* began to open her Eyes to her own Intereſt, and having never had really any Inclination to comply with that Marriage, which their Catholick Majeſties had ſo fondly ſet their Hearts upon, thought likewiſe of a timely Return to her old Friends, and thoſe Engagements which had been formerly productive of ſo many Advantages. Things being in this Situation, it was not long before Preliminaries were ſettled, in which there was an Article that took away for the preſent thoſe Apprehenſions that the Settlement of this Company had raiſed.

It was ſome Time before it could be ſo worded, as to ſatisfy all Parties; but at length, the Preliminaries being abſolutely ſettled and ſigned at *Paris*, on the 20th of *May*, 1727, the firſt Article of them ran thus; "His Imperial and Catholick Majeſty having no other View than to contribute to the publick Tranquillity of *Europe*, and obſerving that the Commerce of *Oſtend* has given Birth to Jealouſy and Uneaſineſs, conſents that there ſhall be a Suſpenſion of the Charter of the *Oſtend* Company, and of all Traffick between the *Auſtrian* Netherlands and the *Indies*, during the Term of ſeven Years." By the fifth Article of the ſame Preliminaries it was agreed, that the Ships which ſail'd from *Oſtend* before this Convention, the Names whereof were to be given in a Liſt on the Part of his Imperial Majeſty, were to be permitted ſafely to return home, and in caſe any of them ſhould be taken, it was agreed, that they ſhould be, *bona fide*, reſtored with their Cargoes.

It is unneceſſary to purſue the political Hiſtory of this Point any farther, ſince by this Suſpenſion the *Oſtend* Company was in fact deſtroyed, and tho' ſome Sales were afterwards made with conſiderable Advantage to the Proprietors, yet they loſt the Power of continuing their Commerce, and the Maritime Powers carried their Point. Thus ended this troubleſome and perplexed Affair, which had very near given Birth to a general War, and by which, as it has been very plainly and fully proved, that if his Hands had not been tied by Treaties, his Imperial Majeſty might in a few Years have reſtored the Commerce of the *Auſtrian*

Netherlands, and made the little Port of *Oſtend* of more Uſe to his Dominions than hitherto *France* has been able to make the many Ports in her Dominions, which is a Point worthy of our Conſideration, and indeed, of that of all *Europe*, to whom the raiſing a new Maritime Power would be found a Thing of great and dangerous Conſequence, more eſpecially in the Hands of a Prince otherwiſe powerful on the Continent.

But before we quit this Subject, it will be requiſite to take Notice of ſome few Points, which rendered it ſo abſolutely neceſſary to conſider this Matter, and to conſider it ſo largely as we have done in this Section. In the firſt Place let it be obſerved, that a ſtronger Proof there cannot be of the Importance of the *Eaſt-India* Commerce, than that all *Europe* ſhould be thus as it were in Arms upon that Subject, and having felt ſo lately the Miſchiefs of a general War, ſhould notwithſtanding hazard the breaking out of another about the ſettling the Right of this Commerce. It is impoſſible to conceive how this ſhould have been reconcileable to the Wiſdom of their Councils any other way than by ſuppoſing it was a Thing ſelf-evident to them, that the Trade of the *Indies* was the great Wheel which moved the whole commercial Syſtem in *Europe*. It was in this Light, and in this Light only, that the pulling down the *Oſtend* Company could be looked upon as an Enterprize equally great and glorious, as the pulling down univerſal Monarchy. To ſay the Truth, when cloſely conſidered, they came to be the ſame Thing; for the ſole Reaſon which induced *Spain* to depart from her own Intereſt, ſo far as to countenance this Company, was the Hopes ſhe entertained of ſeeing a Prince of her Blood Heir of the *German* Branch of the Houſe of *Auſtria*, to whom ſhe could not grudge a Share in the Commerce of the *Indies*.

But tho' her Hopes were vain, becauſe very probably the late Emperor never intended any ſuch Thing; yet that would not have leſſened the Value of the Preſent ſhe made him; for if the *Oſtend* Company had been once effectually eſtabliſhed, the whole *Eaſt-India* Trade, in leſs than a Century, would have been confined to the *Auſtrian* Netherlands, and perhaps, the greateſt Part of the Trade in *Europe* muſt have followed it. In order to explain this, we muſt remember, that the *Auſtrian* Low-Countries are in themſelves much finer than the Provinces which compoſe the *Dutch* Republick, and much better ſituated for Trade. Their Sales of *Eaſt-India* Commodities would have brought prodigious Sums of ready Money into thoſe Provinces, and this muſt have revived and reſtored thoſe Manufactures, which formerly flouriſhed here more than in any Part of *Europe*, which would have immediately ſecured to them all the Commerce of *Germany*, and by Degrees that of the North. In ſuch Circumſtances, what ſhould have hindered their attempting and acquiring the Fiſheries, and by opening the Ports of *Trieſte* and *Fiume* on the *Adriatick*, what could have prevented their engroſſing the *Italian* Trade? It may be ſaid, that all theſe are Suppoſitions; but what then, they are reaſonable Suppoſitions, and which is much more to my Purpoſe, they were ſuch Suppoſitions as induced the late Emperor to eſtabliſh this Company, and to ſtruggle ſo hard as he did for the Maintenance of it; nay, what is ſtill more, the *Dutch*, who beyond a Queſtion, were the beſt Judges in the World of what might be done, and what could be done, thought all theſe Suppoſitions both poſſible and practicable, which induced them to act in the Manner they did. Take then all this together, and it will appear a very ſtrong, and not to be refuted Argument, that the Trade of the *Eaſt-Indies* is in itſelf the Foundation of Commerce, and Maritime Power, at leaſt in the Hands of ſuch as know how to manage it, and have it in their Power to manage it as they would do; which, I think, fully juſtifies the Pains I have taken upon this Subject, and all that I have advanced in this Section.

The Deſire I have of making every thing as clear and plain as it is poſſible, induces me to think of reſolving a Queſtion that will naturally ariſe in the Mind of an inquiſitive Perſon upon this Occaſion, and it is this: *How it ſhould come to paſs that the Emperor, or rather the Subjects of the Emperor in the Low Countries, ſhould, in ſo ſhort a ſpace of Time, and having no better a Port than Oſtend, be able to erect and eſtabliſh a Company capable of carrying on immediately ſuch a Commerce in the Indies* as alarmed and aſtoniſhed the Maritime Powers beyond any thing that *France* had been able to do in a much longer Space of Time, with the utmoſt Aſſiſtance the Court could give, and that Aſſiſtance too under the Direction of her ableſt and greateſt Miniſters, who ſcarce ever failed in any thing elſe. This, without queſtion, is a very difficult Point for common People to get over; but to ſuch as are well acquainted with the Situation of the ſeveral Countries, the Genius and Diſpoſition of their Inhabitants, and the Nature of the Governments under which they live, it carries in it little or no Difficulty at all.

For, in the firſt Place, the *Auſtrian Low Countries* are better ſeated for Trade, the People, generally ſpeaking, are not only more inclined thereto, but are alſo better qualified for it, ſince they are not only ſober and frugal, but diligent alſo and induſtrious. Their Country is rich and fruitful, their Towns large and populous; many of them ſtill have, and all of them once had noble and flouriſhing Manufactories. Add to all this, that though the *Flemings* have loſt much of their ancient Freedom, yet they ſtill retain more of it than the *French*, and it will be no difficult Matter to conceive how this Affair happened. In few Words, the Caſe was this: *Flanders* was, for ſeveral Ages, the Center of the Commerce of *Europe*; among ſuch a People therefore Trade might be eaſily revived. In regard to *France*, the Caſe was quite otherwiſe; they never knew the Bleſſing of a flouriſhing Trade, or that kind of Government, under which extenſive Traffick can only riſe and ſpread. But, to return to what is more immediately our Province, and to inform the Reader of the Conſequences that attended the eſtabliſhing this new Company, notwithſtanding its Suſpenſion; and in Conſequence of that Suſpenſion, its Diſſolution.

The great Struggle which this Company occaſioned divulged the Advantages of the *Eaſt-India* Trade throughout all *Europe*; and in every Nation inquiſitive and public ſpirited People began to look ſeriouſly after this political Philoſopher's Stone, which they heard was univerſally confeſſed to be the grand Source of Riches, Commerce, and naval Power. One would have thought that the Ruin of this Company would have damped at leaſt, if not deſtroyed this Deſire of eſtabliſhing a Trade to the *Indies*. So far from it however that the Fall of the *Oſtend* Company actually increaſed it, and that for theſe three Reaſons; Firſt, it ſent abroad abundance of active and intelligent Perſons who had been employed by this Company, and were, of all others, the moſt likely and the moſt capable of ſetting on foot, and of conducting Projects of this Nature in other Places. Secondly, the great Succeſs this Company had, during the ſhort time it continued, was a very ſtrong and prevailing Argument to perſuade the ſetting up a Company in any other Place, and an Argument which the Perſons I have juſt mentioned, knew how to repreſent in the faireſt Colours poſſible. Thirdly, as the Fall and Ruin of this Company was owing entirely to the Treaties ſubſiſting between their Imperial and Catholick Majeſties and the Maritime Powers, which, not extending to other Princes and States, it might well encourage them to hope for equal good Fortune, and to apprehend fewer Inconveniencies. Such were the Motives that determined the *Danes* and the *Swedes*, one to revive, and the other to erect Companies of this kind, of which, as they are ſtill ſubſiſting, we are bound, from the Nature of the Subject, as well as by the expreſs Terms of our Plan, to give the Reader a ſatisfactory Account, which is all that remains for us to do in reference to this Compleat Hiſtory of the Commerce of *Europe* with the *Indies*.

SECTION XXXVII.

The Hiſtory of the Daniſh *Commerce to the* Eaſt-Indies, *their Eſtabliſhments there, the Decay of their Old Company, and the Motives which induced them to ſet up a New One.*

Interſperſed with Original Papers and Memoirs.

1. *The* Danes *anciently very powerful by Sea, famous for maritime Expeditions, and always remarkable for keeping up a conſiderable naval Force in the* North. 2. *Their firſt Voyages to the* Indies, *their Eſtabliſhment on the Coaſt of* Corromandel, *their Fortreſs and Town of* Tranquebar, *or* Trincombar, *and the Fate of their Colony there.* 3. *An Account of their long War with the Rajah of* Tanjour, *the Siege of* Tranquebar, *the Intrigues of the* Dutch *to the Prejudice of the* Danes, *and the Relief of that Town by the* Engliſh, *thro' the Generoſity of Mr.* Pitt, *Governor of Fort* St. George. 4. *The Hiſtory of the* Daniſh *Colony, continued down to the Time of the New* Eaſt-India *Subſcription at* Hambourgh *on the Fall of the* Oſtend *Company.* 5. *An Impartial View of the new Eſtabliſhment, or the Incorporation of the new Company at* Altena, *with the Old* Eaſt-India *Company at* Copenhagen. 6. *Objections raiſed againſt that Eſtabliſhment, and the Probability of its ſucceeding in its Commerce.* 7. *Anſwers to thoſe Objections, and a farther Account of the Privileges and Immunities granted to the incorporated Company by his* Daniſh *Majeſty.* 8. *The Oppoſition made to the New Company (as it was called) at* Altena *by the Maritime Powers, Memorials preſented on this Subject to the Court of* Denmark, *and Iſſue of that Diſpute.* 9. *The thorough Completion of this Scheme under the Auſpice of the preſent King (then Prince) of* Denmark, *and Progreſs of this incorporated Company, from its Foundation to the preſent Time.*

1. THE *Danes* were anciently as remarkable for a Naval Force as any Country in the *North*, which manifeſtly appears, not only from their Chronicles, but ours. It was by this Means that they became Lords of almoſt all the Countries round about them, and were ſo formidable by their Fleets as to undertake various Expeditions into remote Countries. Thus, under the Name of *Normans*, they conquered a Part of *France*, and even ſettled themſelves in the Kingdom of *Naples*. It is true, that the naval Concerns of *Europe* were then in a Condition very different from what they are now; yet this, inſtead of leſſening, will, to a Man of good Senſe and Conſideration, rather increaſe the Difficulty; for if we find it ſo hard with all the Advantages we enjoy to tranſport a ſmall Body of Troops to the oppoſite Part of the Continent, what muſt we think of the *Danes* landing ſuch numerous Armies in this Iſland, in *France*, and in other Countries.

Theſe Facts are not to be diſputed, and, at preſent, it is not my Buſineſs to account for them; all I aim at is, to ſhew that the *Danes* had many Ages ago a great Maritime Power, and I believe Experience will ſhew, that where once a nation has been poſſeſſed of ſuch a Power, and eſcapes being conquered by her Neighbours, ſhe generally preſerves ſomewhat of her ancient Spirit, which exerts itſelf, more or leſs, as Occaſions offer, and is never totally overwhelmed. If the *Danes* had applied themſelves more to Trade, and leſs to foreign Conqueſts, they would have made a much more conſiderable Figure in *Europe* than at this Time they do, ſince it is certain that their being driven out of *Sweden* and Part of *Norway*, exhauſted them extremely, and the Civil Wars in their own Country proved another great Cauſe of weakening their Force.

Yet they have never been totally deprived of Maritime Power, or of a Maritime Spirit, but have frequently ſhewn an Incination to attempt conſiderable Diſcoveries in the Northern Part of the World, to eſtabliſh Colonies and Fiſheries in thoſe Parts, and have even made very long Voyages, with a View of extending their Commerce, if not with all the Succeſs they could wiſh, yet with more than ſome of their Neighbours; and have been alſo more tenacious of what they acquired, as if they meant to retain theſe diſtant Conqueſts, till ſuch a Government aroſe at home, as by giving due Attention to Trade, and juſt Encouragement to thoſe who endeavoured to promote it, might enable them to turn ſuch an Eſtabliſhment to greater Advantage. By this Means they have been, and ſtill are in a Condition to embrace any Opportunity that offers, and will, in all Probability, ſooner or later, diſtinguiſh themſelves as much by Commerce as ever their Forefathers did by Courage and Force, as from the Contents of the preſent Section, we ſhall evidently make appear.

2. It was very early in the laſt Century that the *Danes* thought of attempting a Trade to the *Eaſt-Indies*; and about the Year 1612, King *Chriſtian* IV. granted his Protection to a Company eſtabliſhed at *Copenhagen*, for carrying on a Commerce from thence to the *Indies*. The Capital of this new Company conſiſted of two hundred and fifty Shares, of the Value of One thouſand Rix-dollars each, and about four Years afterwards they fitted out ſome Veſſels for the *Indies*, with ſuch Succeſs that they eſtabliſhed themſelves on the Coaſt of *Corromandel*, at no great Diſtance from the *French* Settlement at *Pondicherry*. The Name of this Place is very differently written; the *Portugueze* and *Indians* call it *Tranguebar*, the *Engliſh* Sailors *Trincombar*; but I take the true Name of it to be *Tranquebar*.

It is ſituated fifteen Miles to the Northward of *Negapatan*, and enjoys a conſiderable Trade. The *Danes* have built here a regular Fort, faced with Stone, and ſurrounded with a deep Mote, which makes it eſteemed one of the ſtrongeſt Fortreſſes in the *Indies*. The Town alſo, which is about two Miles in Circumference, is ſurrounded with a noble Wall, faced with Stone, having large Baſtions at proper Diſtances, mounted with Cannon. The Houſes which the *Danes* and other *Europeans* inhabit, are of Brick or Stone, built all upon a Floor, but commodious enough; the Streets are wide and ſtraight, and paved on the Sides with Brick; but the Houſes of the *Indians* are very mean, having Clay-Walls, and thatched Roofs, as in moſt other Towns of *India*. The Garriſon is not anſwerable to ſo large an Extent of Ground, conſiſting only of one hundred and fifty *Europeans*, or thereabouts, and ſome *Indians*, who are only fit to oppoſe Soldiers like themſelves. In the long Space of Time however, that the *Danes* remained here, they collected together a great Number of *Indian* Subjects, who live very happily, and even grow rich under their Protection. They have likewiſe taken Care to make Proſelytes to the *Lutheran* Religion of a great Part of thoſe who live among them, and they have thereby bound them more effectually to their Service; ſo that their Colony is very conſiderable, and grows more ſo every Day, and this chiefly for the following Reaſon, that it ſupports itſelf, and pays the *Daniſh* Company Ten thouſand Rixdollars a Year, by Way of Tribute.

Their Trade in this Part of the World has ſuffered various Alterations, being ſometimes better and ſometimes worſe, according to the Revolutions that have happened in that Part of the World, and the Accidents which befel the Company in *Europe*. However, as far as I am able to judge, it was moſt conſiderable about twenty-four Years after it was firſt ſettled; for then, I find, a very eminent *Dutch* Writer comparing the *Daniſh* Trade to that of the *Engliſh*, and affirming that the former, with a little Application, might be made as conſiderable as the latter. The Reader will obſerve, that this was ſaid in the Time of our Civil Wars, when, as we have ſhewn in our Hiſtory of the *Engliſh* Company, their Trade declined exceedingly; ſo that it is not at all improbable, that this Obſervation might be then true. It is, notwithſtanding, certain, that the Trade of the *Danes* was rather profitable to private Perſons, ſuch as the Governor of *Tranquebar*, and the principal Merchants employed there, than to the Publick; and the Reaſon was plainly this, that they ſeldom received any conſiderable Supplies from *Denmark*, and as ſeldom ſent home Ships laden with the Commodities and Manufactures of the *Indies*; ſo that they ſubſiſted chiefly by the Trade they carried on with their Neighbours, and into different Parts of *Aſia*, ſince they ſometimes ſent Ships as far as *China*, from whence they obtained conſiderable Returns.

But they had from their firſt Eſtabliſhment very great Difficulties to ſtruggle with, being very often engaged in Wars with their *Indian* Neighbours, and very ſeldom upon good Terms with the reſt of the *European* Nations ſettled in *India*, who, though they affected to deſpiſe and contemn the *Danes*, and to treat their Trade as very deſpicable and inconſiderable, yet they could not help envying them even the little Trade they had, to which, perhaps, the convenient Situation of their Fortreſs might in ſome meaſure contribute, from a Perſuaſion that, in other Hands, it might become of much greater Conſequence, more eſpecially with regard to the Diamond Trade, for which, without doubt, it ſtands as well, or better, than any of the *European* Factories in that Part of the World.

But the moſt conſiderable War in which they were ever engaged, was towards the latter End of the laſt Century, when this Fortreſs very narrowly eſcaped being taken, of which, as it is the moſt remarkable Tranſaction of which I can obtain any Account, I think it will not be amiſs to inſiſt upon it a little more largely, the rather, becauſe it was the principal Occaſion of the old *Daniſh* Company running into Debt, and bringing their Affairs into a worſe Condition than they ever were before.

3. The Ground of the War was this; the *Daniſh* Colony lying on the Frontiers of the *Indian* Rajah of *Tanjour*, the *Dutch* ſtirred him up to attack and deſtroy it, promiſing him conſiderable Aſſiſtance under hand, and to give him a Tun of Gold, which, as we have elſewhere ſhewn, amounts to above Ten thouſand Pounds of our Money, for the Place when taken. That this was a very baſe and barbarous Deſign, an *Engliſh* Reader will very readily allow; but it was, nevertheleſs, very well contrived, and had very near taken Effect; for the *Indian* Prince was very brave in his Perſon, eſteemed by his Countrymen a good Officer, and had, without doubt, Troops enough to have done his Buſineſs, if he had not been prevented by the Interpoſition of Mr. *Pitt*, who was at that Time Governor of Fort *St. George*, who very generouſly aſſiſted the *Danes*, from a Principle of Humanity, which ought to be applauded.

We have, by this Means, a tolerable Account of the whole Tranſaction, which I ſhall give in as few Words as poſſible. When the Prince of *Tanjour* had reſolved upon this Enterprize, he aſſembled the whole Force of his Dominions, and marched directly towards *Tranquebar*, in order to attack it. The *Indians* were ſo extremely cautious, that they began to open their Trenches above a Mile from the Town, and carried on two Attacks; the Earth being a dry Sand, they drove down the Bodies of Cocoa-nut Trees, inſtead of Stakes, both on the Inſide and on the out, and filled up the Space between them with Sand, ſo that their Trenches were almoſt as thick as a Town-wall, and very high, ſo that they were perfectly covered from our Fire. They had about twenty or thirty thouſand Men employed in this Siege; and with incredible Labour and Patience, in about five Months Time, they brought down their Trenches within Piſtol-ſhot of the Walls, and with their Batteries had almoſt ruined one of the Baſtions, when the *Engliſh* Reinforcements arrived. The *Danes* expected every Day an Aſſault, and were preparing to move their Effects into the Fort, and quit the Town; and indeed they gave the Enemy very little Diſturbance, as far as I can learn, in carrying on their Works; for the Garriſon did not conſiſt of more than two hundred *Europeans*, as many *Indian Portugueze*, and about a thouſand Blacks; and, beſides the Fort they had to defend, the Circumference of the Town-wall was not leſs than a Mile and an half. It was faced with Stone indeed, but had no Ditch; and therefore the *Danes*, to prevent the Enemy's ſcaling it, had ſet high Palliſadoes upon the Top of the Ramparts.

A Day or two after the *Engliſh* arrived, a Sally was reſolved upon; and about Sun-riſe in the Morning, a Detachment of the Blacks marched out of a Baſtion, and were followed by the *Engliſh*; but the Blacks were no ſooner out of the Gates, than they opened to the Right and Left, and made room for the *Engliſh* to advance, never intending to engage themſelves. A Body of the Enemy moved out of their Trenches to oppoſe our Troops, and came on in tolerable Order with their Broad-ſwords and Shields, without ſhooting an Arrow, or firing a Piece. They were all decently cloathed in white Veſts and Turbants, and ſeemed determined to engage our People hand to hand, in the Plain between the Town and the Trenches. The *Engliſh* Officers were in ſome Pain, ſeeing this Body of *Indians* advance with that Reſolution, knowing their Men were ſeveral of them new raiſed, and mixed with *Portugueze*, on whom there is very little Dependence: But our great Guns from the Walls, beginning to play upon the Enemy, put them into Confuſion, and they retired to their Trenches with much greater Haſte than they came out. And our Men advancing, while they were in that Conſternation, drove them ſtill farther. But there being no Preparations made for levelling the Trenches, and the Day growing hot, the *Engliſh* retired into the Town, and the Enemy returned into their Works, without any great Loſs on either Side.

A few Days after, it was reſolved to make another Sally, with the greateſt Part of the Garriſon; and accordingly they marched out at the great Gate, which faced their principal Attack; the Black Soldiers, according to Cuſtom, retired under the Walls almoſt as ſoon as they were out, to make room for the *Europeans*. The Enemy kept cloſe in their Trenches firing at us; but between the two Attacks upon the Plain, there ſtood a conſiderable Body of Muſketeers and Pike-men, againſt whom the *Engliſh* Commander thought fit to advance; but he had not marched many Paces before an unlucky Ball wounded him in the Middle of his Foot, which compelled him to quit the Field.

The next Officer thereupon took upon him the Command of the *Engliſh*, and led them towards the Enemy, who were drawn up in the Plain; that Body retreating, drew the *Engliſh* ſo far from the Town, that they were intercepted by the *Mooriſh* Horſe; and the *Danes*, whom the *Engliſh* expected to have ſupported them, never advanced a Step. In this Exigency, the *Engliſh* Officer reſolved to throw himſelf into the Enemy's Trenches, finding it impoſſible to retreat into the Town over the Plain; and having thrown ſome Granades into the Trenches, the *Indians* were ſo complaiſant as to quit them, and make room for the *Engliſh*, who marched quite along them towards the Town, till they came to the End of the Works; but here they were met by the *Mooriſh* Horſe; yet upon making one general Fire, in which great Execution was done, the Horſe ſcoured off, and left the *Engliſh* at Liberty to march on to the Walls, where they found the *Danes* drawn up in perfect Security.

In this Action, the *Engliſh* were one half of them killed or wounded. Among others, one of the Grenadiers, a drunken Shoemaker, received twelve or fourteen Wounds, and yet was brought alive into the Town, and recovered. It was by this ſeaſonable Aſſiſtance afforded them by the *Engliſh*, that the *Danes* preſerved this Town and Fortreſs; for ſoon after, the Rajah of *Tanjour*, growing weary of a War that harraſſed his Subjects, and brought himſelf no Advantage, retired into his own Territories, and left the *Danes* at Liberty to purſue their Trade as before.

4. They have ſince that Time remained in quiet Poſſeſſion of this Place, and carried on the little Trade they have in Quiet. Beſides the Town of *Tranquebar*, and the Fortreſs of *Danebourg*, which is a regular Citadel, with four ſtrong Baſtions, they have a ſmall Diſtrict of Country dependent upon them, the Inhabitants of which, partly *Moors*, and partly *Indians*, are their Subjects; and for the Education of their Children they have built and endowed a publick School, where they are taught all Kinds of uſeful Knowledge; and the *Daniſh* Miſſionaries being compleat Maſters of the *Malabar* Tongue, preach in all the neighbouring Countries, and make many Converts. They have formerly built very good Ships here, which they not only employed in their own Commerce, but alſo let them out to their Neighbours upon Freight, which if it did not turn to a very great Account, it at leaſt enabled them to ſubſiſt, and not only to keep what they had got, but alſo to enlarge and improve their Colony. I muſt not, however, forbear mentioning another Method by which as ſome of their *European* Neighbours ſuggeſt, the *Danes* made uſe of to better their Fortunes; and that is, their allowing their Ships to cruize not only on the Infidels, but alſo on the Shipping of ſome Chriſtian Nations, which, if true, it muſt certainly have been a moſt illegal and unwarrantable Practice.

But we muſt not yield too eaſy a Belief of ſuch kind of Accuſations, ſince it is very certain, that thoſe who framed them were ſtrongly prejudiced againſt the *Danes*, and from thence inclined to ſpeak ill of them, whether with or without Foundation; and not only to ſpeak ill, but alſo to uſe them ill, when it lay in their Power, as is evident from the Behaviour of the *Dutch*, not only in raiſing the War before mentioned, but in their Behaviour towards the People of *Tranquebar*, when in that diſtreſſed Situation; for the Enemy being poſſeſſed of the Springs by which the Town was furniſhed with Water, they ſent Deputies to deſire the Aſſiſtance of their Neighbours the *Dutch*, who, inſtead of complying with ſo neceſſary and reaſonable a Demand, firſt whipped their Meſſengers, and then ſent them back without Water. We may therefore juſtly ſuſpect the Teſtimony of ſuch People as were capable of an Action of this Nature towards their Fellow-Creatures, when in ſuch Diſtreſs. On the Whole therefore, I think, inſtead of wondering, that after above one hundred Years Poſſeſſion of this Place, and of ſome other little Factories about it, they ſhould be conſiderably in Debt, which is no more than what has happened alſo to their Neighbours, we ought rather to wonder, that the *Daniſh* Company were able to go on at all, eſpecially ſince they received ſo little Aſſiſtance from home, and had nothing to depend on but their own Induſtry in the *Indies*, and the ſmall Revenue ariſing from their Territories there.

5. We are now to open a new Scene, by relating what chiefly gave Occaſion to this Section, I mean the eſtabliſhing what its Enemies thought fit to call a new *Eaſt-India* Company in *Denmark*, the Occaſion of which was this: Upon the Ruin of the *Oſtend* Company, a *Dutchman*, whoſe Name was *Joſhua Van Aſperen*, who had been concerned in that Affair, went to *Copenhagen*, where he applied himſelf to King *Frederick* the IVth, a Prince of great Goodneſs and Virtue, and who had nothing more at Heart than promoting the Welfare of his Subjects by all the Means that lay in his Power. The Scheme propoſed by M. *Aſperen* to his *Daniſh* Majeſty, had a very fair Appearance, and great Probability of Succeſs; he obſerved, that there was a great Spirit raiſed of opening a new Trade to the *Indies*; that many People, who were very well verſed in that Trade, had engaged in the Service of the *Oſtend* Company, the Succeſs of which would unqueſtionably have anſwered their Expectations, if they could have carried it on; that the Cauſes of its Ruin were ſuch as could not attend that Project in any other Country, but leaſt of all in *Denmark*, which had enjoyed an uninterrupted Commerce to the *Indies* for above a Century; that therefore there was nothing farther neceſſary to render the *Daniſh* Company as flouriſhing as thoſe of *England* and *Holland*, than to increaſe its Capital, by opening a new Subſcription upon advantageous Terms.

By the Force of theſe Arguments, the King was prevailed upon to ſuffer his Scheme to be put in Execution, and that it might be done more conveniently, the *Daniſh Eaſt-India* Company was transferred from the City of *Copenhagen* to the Borough of *Altena*, a Place belonging to the Crown of *Denmark*, but ſituated cloſe to the rich and free City of *Hamburgh*, and therefore made Choice of, upon this Occaſion: In order to induce Foreigners to engage in this Undertaking, his *Daniſh* Majeſty thought fit to grant a new Charter, dated in *April* 1728, for promoting the Commerce of the ſaid Company to the *Indies*, *China*, and *Bengal*, the chief Articles of which were theſe, *viz.* The new Subſcribers ſhall have an equal Share and Right with the old Members, in all the Conceſſions, Octroys and Privileges granted to the ſaid Company by his preſent Majeſty and his auguſt Predeceſſors. And likewiſe in all the Forts, Settlements, Revenues, Houſes, Magazines, Ships, Effects, and, in ſhort, whatever the Company is poſſeſſed of at this Day, or may acquire in Time to come. The old Shares, or Actions, which are in Number two hundred and fifty, of one thouſand Rixdollars each, ſhall ſubſiſt and remain as they are, and will have the ſame Rights as the new Shares. The Directors ſhall declare, and affirm upon their Honour, that all the Debts of the Company do not exceed one hundred and ſixty thouſand Rixdollars in Specie. The united Company are obliged to diſcharge and pay the ſaid Sum of one hundred and ſixty thouſand Rixdollars, upon Condition that the old Shares ſhall have no Dividends till the Year 1733.

Though there is no Queſtion, that the Accounts of the Company are juſt, and that their Debts do not exceed the ſaid Sum of one hundred and ſixty thouſand Rixdollars, it is nevertheleſs ſtipulated, That if the ſaid Debts ſhould appear to exceed the ſaid Sum, the old Shares ſhall be anſwerable for the Overplus, and that the new Subſcribers ſhall not be obliged to contribute thereunto. Each new Share ſhall be one thouſand Rixdollars in Bank, or Specie, whereof twenty *per Cent.* ſhall be paid upon the Account of M. *Alexander Bruguier*, Banker at *Hamburgh*, or in the Manner preſcribed in the Project publiſhed by the Company at *Copenhagen*, *December* 16, 1727. If there was any abſolute Neceſſity to make a further Call the preſent Year 1727, the ſame ſhall not exceed five or ten *per Cent.* at the fartheſt. The Call for the next Year ſhall not exceed twenty, or twenty-five *per Cent.* The Remainder of the Subſcription ſhall not be called in without the Reſolution and Determination of a general Court of the Company. If the intire Sum of the ſaid one thouſand Rixdollars, for the new Actions, is not paid in the Year 1738, the Proprietors of the old Shares ſhall have an Intereſt at the Rate of five *per Cent.* allowed them, for the Sum they have paid more and above the new Subſcribers. There will be no other Actions than Shares of one thouſand Rixdollars, and half Shares of five hundred Rixdollars each. Every Subſcriber ſhall be allowed to take Shares for the Bearer, ſigned by the Company; and ſuch as pleaſe, may have them inſcribed in the Company's Books. There ſhall be paid for each Transfer two Rixdollars to the Company, and half a Rixdollar to the Poor. The Creditors of the Company are allowed to take new Actions for the Sums due to them, provided they diſcount on the ſaid Debts thirty *per Cent.* for the preſent Year, for each Share, and twenty-five *per Cent.* for the next. The Shares they ſhall purchaſe on this Condition, ſhall have the ſame Dividends as the other new Actions. The ſaid Shares ſhall not be liable to any Seizure, or Stop, upon any Account whatſoever, as it is declared in his Majeſty's Octroy.

The Directors ſhall yearly communicate to the Subſcribers an exact and particular Account of the Affairs of the Company. The Dividend ſhall be regulated upon the ſaid Account, in a general Court of the Company, by the

Admiral, it ſhall belong to him to take Cognizance of ſuch Controverſy; it may pleaſe their Highneſſes, that he or his Deputy, and no other Judge, ſhall try the ſaid Cauſe, if it appertains to the ſaid Office of Admiral as the ſame has been enjoyed by the Admiral Don *Alonſo Henriquez*, or his Predeceſſors in their Diſtricts, and according to Juſtice.

Item, That in all the Ships which ſhall be fitted out for the ſaid Trade and Commerce, as often as they ſhall be fitted, the ſaid Don *Chriſtopher Columbus*, if he ſhall think fit, may lay out the eighth Part of what ſhall be expended in fitting them out; and that he accordingly have and receive the eighth Part of the Profits of ſuch Ships.

Theſe Articles were granted in the Town of *Santa Fee*, in the Plain of *Granada*, with which Diſpatch and Money Don *Chriſtopher Columbus* ſet out from *Granada* on the 12th of *May*, and leaving his Sons at their Studies in *Cordova*, he went to the Town of *Palos*, to undertake his Voyage; few at Court expecting that he would perform what he had promiſed. Their Catholic Majeſties ſtrictly enjoined him not to touch at the Mine in *Guinea*, or to come within one Hundred Leagues of the *Portugueze* Settlements. They gave him their Letters Patents to all the Kings and Princes in the World, for them to give him a favourable Reception as their Commander; he repaired to *Palos*, becauſe there were able Seamen in that Place, and on Account of his Friendſhip with Father *John Perez de Merchena*, who helped him very much in the Diſpatch of his Affairs; perſuading the Sailors who were very backward to engage in an unknown Voyage. He carried with him Orders for that Town to furniſh him with two Caravels, which by ancient Tenure it was obliged to find for the Service of the Crown, during three Months every Year.

He fitted out another Ship as Admiral, and called it *St. Mary*; the ſecond was called *Pinta*, of which *Martin Alonſo Pinzon* was Captain, and his Brother *Francis Martinez Pinzon* Maſter: The third was named *Nina*, carrying ſquare Sails, whoſe Captain and Maſter was *Vincent Yanez Pinzon*, who was very helpful in this Affair, and laid down half a Million of Marvedies for the eighth Part of the Expence. He made uſe of the *Pinzons*, becauſe they were principal Men in that Town, wealthy and ſkilful Mariners, and all the Men ſeeing them approve of the Voyage, were willing to undertake it.

3. The Ships being provided for a Year, having on board ninety Men, moſt of them Natives of *Palos*, and among them ſome Friends of *Columbus*, and ſome of the King's Servants, they ſet ſail on *Friday* the third of *Auguſt*, half an Hour before Sun riſing, and got over the Bar of *Saltes*, directing their Courſe for the *Canary* Iſlands, after they had all (following the Example of *Columbus*) made their Confeſſion, and received the Holy Communion. As they held on their Voyage, on the fourth of *Auguſt*, the Rudder of the Caravel *Pinta*, in which *Martin Alonſo Pinzon* commanded, broke looſe, as was ſuſpected by the Contrivance of *Gomez Raſcon* and *Chriſtopher Quintero* Mariners, to whom the Caravel belonged, becauſe they went the Voyage againſt their Will, and therefore they had endeavoured to diſappoint it before their Departure. But *Martin Alonſo Pinzon* being an able Sailor, the Rudder was faſtened with Cables in ſuch Manner, that they were able to ſail till the *Tueſday* following, when it again broke looſe, and they were all forced to lie by.

This Miſchance happening to the Caravel *Pinta*, at their firſt ſetting out, would have ſtartled any ſuperſtitious Perſon, eſpecially conſidering how diſobedient *Martin Alonſo* afterwards proved to *Columbus*. Having mended the Rudder the beſt they could, on the 11th of *Auguſt* by Break of Day they diſcovered the *Canaries*, and not being able in two Days to put into grand *Canaria*, becauſe the Wind was contrary, *Columbus* ordered *Martin Alonſo* to procure ſome other Veſſel as ſoon as he could get aſhore, and he, with the other two, made for the Iſland *Gomera*, to endeavour the ſame; but finding none, he returned to great *Canaria*, and reſolved to make a new Rudder to the Caravel *Pinta*, and to change the Sails of the Caravel *Nina*, which were ſquare, into thoſe called Shoulder of Mutton Sails, that he might follow the other Ships more ſpeedily, and with leſs Danger.

The 5th of *September*, in the Afternoon, he ſailed, and arrived at the Iſland *Gomera*, ſpent four Days there, taking in freſh Water and Fuel, with the utmoſt Diligence; becauſe, being informed that three *Portugueſe* Caravels were hovering about theſe Iſlands to ſeize him, he apprehended ſome Trouble on Account of the King of *Portugal*'s Concern, when he underſtood that Don *Chriſtopher Columbus* had articled with their *Catholic* Majeſties, being apprehenſive that God had taken that good Fortune out of his Hands. *Thurſday* the 6th, which may be reckoned the Entry of the Undertaking, he ſailed to the Weſtward, making but little Way. But the next Day they loſt ſight of Land, and many ſighed and wept, believing they ſhould never ſee it again: But *Columbus* encouraged and comforted them with Thoughts of Wealth and good Fortune. That Day they run eighteen Leagues, but the Admiral deſignedly reckoned but fifteen, thinking it convenient to ſhorten their Run, that the Men might be leſs afraid. On the 11th, being 150 Leagues from the Iſland *Ferro*, they ſpied a Piece of a Maſt, which ſeemed to have been carried away by the Current. In the ſame Latitude, ſomewhat farther on, the Current ſat ſtrong to the Northward, and 50 Leagues farther Weſtward.

On the 14th *Columbus* about Night-fall obſerved that the Needle varied to the North weſt about half a Point, and that at Break of Day it did the like, ſomewhat above half a Point, by which he perceived that the Needle did not point directly to the Star called the North; but at another fixed and inviſible Point. This Variation had not till then been obſerved by any Perſon whatſoever, which was much admired, and much more the third Day after, when he had advanced 100 Leagues farther, holding the ſame Courſe, becauſe the Needles then at Night-fall varied to the North-weſt as before, and in the Morning again pointed upon the very Star.

On the 15th, being near 300 Leagues Weſtward of the Iſland *Ferro*, a Flame of Fire was ſeen falling into the Sea in the Night, four or five Leagues from the Ships towards the South-weſt; the Weather being calm and the Sea ſmooth, the Currents ſtill ſetting to the North-eaſt; and the Crew of the Caravel *Nina*, ſaid they had the Day before-ſeen a Bird called a Waterwagtail, which they admired, that being the firſt, and a Bird which they ſay never flies above fifteen or twenty Leagues from Land. The next Day they were more ſurprized to ſee Spots of green and yellow Weeds on the Surface of the Water, which ſeemed to have been waſhed from ſome Iſland or Rocks, and they ſaw much more the Day following, which made them conclude that they were near Land, and they were ſtrongly confirmed in it, becauſe they ſaw a little Graſhopper alive upon the Weeds; others fancied there might be Rocks or Lands under Water, and, being afraid, muttered againſt the Voyage; it was alſo obſerved, that the Sea-Water was not half ſo ſalt as that they had paſſed, and that Night they ſaw many Tunnies following the Ships ſo cloſe, that the Men in the Caravel *Nina* killed one of them with an Harping-iron, and in the Morning they found the Air as warm as in *Andaluzia*, in *April*.

Being 370 Leagues to the Weſtward of the Iſland *Ferro*, they ſaw another Waterwagtail, and on the 18th *Martin Alonſo Pinzon*, who had ſlipped before with the Caravel *Pinta*, which was a very good Sailer, lay by for the Admiral, and told him he had ſeen a Multitude of Birds making to the Weſtward, which made him believe he ſhould ſee Land that Night, and find it to the Northward 15 Leagues from thence; nay, he fancied he had ſeen it: But the Admiral judging it was not ſo, would not loſe Time to go in queſt of it, though all were for it; becauſe he did not think himſelf to be in the Place, where, according to his Notions, he expected to diſcover it. That Night the Wind freſhened, after they had ſailed eleven Days without handing their Sails, ſtill ſailing right before the Wind to the Weſtward; the Admiral continually noting down every thing that happened; obſerving what Wind blew; what his Courſe was; what

Fiſhes and Birds were ſeen; and ſounding very frequently.

4. The Men being unexperienced in ſuch a Courſe, ſeeing no Hopes, and nothing appearing but Sky and Water for ſo many Days, carefully obſerved every Token, being then farther from Land than any Men had ever been before. On the 19th, a Sea Gull went to the Admiral's Ship, and others came near in the Afternoon, which gave Hopes that ſome Land was near, as believing that theſe Birds went not far from it; and with this Hopes, the Weather being calm, they ſounded with 200 Fathoms of Line, and though they found no Ground, they perceived that the Currents ran South-weſt. On the 20th, in the Forenoon, they ſaw two other Gulls near the Admiral; and ſome time after they took a Blackbird with a white Spot on the Head, the Feet like a Duck's; they alſo killed a ſmall Fiſh, and ſaw Abundance of Weeds like what they had ſeen before; and the Ships making way through them, they became leſs afraid. The next Morning, at Break of Day, three other little Land Birds came on board the Admiral ſinging, and at Sun riſing they flew away; which was ſome Comfort to the Men, as believing that the other Sea Fowls might eaſily go farther from the Land, but that the little Birds could not come from ſo great a Diſtance. Some time after they ſaw another Gull coming from the Weſt North-weſt; and the next Day in the Afternoon more Weeds to the Northward, which was ſome Satisfaction to them, believing the Land was near. The Weeds at the ſame time perplexed them, ſome Knots of them being ſo thick, that they hindered the Ships Way, and therefore they kept as clear from them as they could. The next Day they ſaw a Whale; and on the 22d they ſpied ſome Birds; and thoſe three Days the Wind was at South-weſt, and though it was contrary, the Admiral ſaid it was good, becauſe the Men muttering and refuſing to obey; and alledging among other things, that ſince they had ſo long run before the Wind, it would be hard for them to return to *Spain*, by Reaſon that though it had ſometimes proved contrary, it had held but of ſhort time, and was not ſteady: And though the Admiral anſwered that was occaſioned by their being near Land, and urged ſome more Reaſons for it; he ſtood in need of God's ſpecial Aſſiſtance, becauſe the Diſcontents increaſed, the Men grew mutinous, and by degrees, paid him no Reſpect; reflecting on the King for having given Orders for the Voyage; and almoſt all of them agreed not to proceed in it.

The Admiral managed Things with great Addreſs; ſometimes encouraging the Men, and aſſuring them of the Shortneſs and good Succeſs of their Voyage; and ſometimes threatning them with the King's Authority; but it pleaſed God, that on the 23d the Wind came up at Weſt North-weſt, the Sea indifferent rough as they all wiſhed; and three Hours before Noon a Turtle Dove flew over the Admiral; and in the Afternoon a Gull and other white Birds; and among the Weeds they found little Graſshoppers. The next Day came a Gull and ſome Turtle Doves from the Weſtward, and ſome ſmall Fiſhes, which they ſtruck. As theſe Tokens had hitherto failed, the Mens Fear increaſed, and they took occaſion to gather Parties, ſaying, the Admiral in a mad Humour had thought to make himſelf great at the Expence of their Lives; and though they had done their Duty, and ſailed farther from Land than ever any Man had done before, they ought not to be inſtrumental to their own Deſtruction; ſtill proceeding without any Reaſon, till their Proviſions failed them, which, though they were ever very ſparing, would not ſuffice to carry them back any more than the Ships, which were already very crazy; ſo that no body would think they had done amiſs, and that ſo many having oppoſed the Admiral's Projects, the more Credit would be given to them: Nay, there wanted not ſome, who ſaid that, to put an End to all Debates, the beſt Way would be to throw him into the Sea, and ſay he had unfortunately fallen in, as he was attentively gazing on the Stars, and no body would go about to enquire into the Truth of it; that was the beſt Means for them to return and ſave themſelves.

Thus the evil Deſigns of the Men very much perplexed *Columbus*; but ſometimes giving good Words, and at other times, putting them in mind of the Puniſhment they would incur if they obſtructed the Voyage, he curbed their Inſolence with Fear, and as a Confirmation of the Hopes he gave them of ſoon concluding the Voyage ſucceſsfully, he often put them in mind of the above mentioned Signs, promiſing them they would ſoon find a very rich Country, where they would all conclude their Labour well beſtowed. The Men were ſo anxious and diſconſolate that every Hour ſeemed a Year, till on the 25th at Sun ſetting, whilſt *Columbus* was talking to *Vincent Yanez Pinzon*, he cried out Land, Land, Sir; let me not loſe my Reward for this good News; and ſhewed towards the South-weſt a Body that looked like an Iſland, about 25 Leagues from the Ships. This, which was looked upon as an Invention concerted between them two, ſo much cheared up the Men, that they returned Thanks to God; and the Admiral, till Night, made as if he believed it to be ſo, ſteering his Courſe that Way a great Part of the Night, to humour the Men.

The next Morning they all perceived they were Clouds, which often look like Land, and to the great Regret of of the major Part, they held on their Courſe Weſtward. But to return to the Tokens; they ſaw a Gull and a Wagtail, and other Birds; and the next Day they ſaw another Wagtail flying from the Weſt Eaſtward, and many gilt Fiſhes appeared, which they killed; and a Wagtail flew very near the Ship, and they perceived that the Currents ran not ſo ſtrong as before, but turned back with the Tides, and there were fewer Weeds; and the Day following they took many Gilt-Fiſhes. On the 29th they ſaw a Wagtail, which is a Sea-Fowl that never reſts, purſues the Gulls till they empty their Bellies for ſear, and catching their Dung in the Air feeds on it; and of theſe Birds there are many in the Iſlands of *Cabo Verde*. Soon after two Wagtails appeared, and many flying Fiſhes, which having two little Wings, ſometimes fly a Muſket Shot, or a few Yards, above the Water; being about a Span in Length, and ſometimes fell into the Ships. In the Afternoon they met with a great Quantity of Weeds, in a Line from North to South, and three Gulls and a Wagtail purſuing them; the Men ſtill fancying that the Weeds were a Token that there was Ground near them under Water, and that they ſhould periſh.

On the 30th, four Wagtails flew near the Admiral, and by their being together, they gueſſed that they were near Land, and alſo becauſe four more came ſoon after, and they ſaw many Weeds in a Line from Weſt North-weſt, to Eaſt South eaſt, and many Fiſhes called Emperors, which have a very hard Skin, and are not fit to eat. Though the Admiral took notice of theſe Tokens, he did not forget thoſe in the Sky. He obſerved, there, that the Polar Stars were, at Night, on the Weſt Quarter, and when Day came on, they were at the North-eaſt Quarter; by which he concluded that during the Night, they advanced but three Lines, which are Nine Hours, and this he found every Night; he alſo perceived, that at Night-fall, the Needles varied one whole Degree, and in the Morning they were right with the Star; which very much troubled and confounded the Pilots, till he told them, that the Occaſion of it was the Compaſs of the North Star about the Pole, and that gave them ſome Satisfaction; for, in reality, that Variation made them apprehenſive of Danger, as being far from Land.

5. *October* the 1ſt, at Break of Day, a Wagtail came to the Admiral, as did others, two or three Hours before Noon; and the Weeds came from Eaſt to Weſt, ſome believing they ſhould fall in ſo near the Land, that the Ships would be a-ground and periſh. The ſame Day, in the Morning, the Pilot told the Admiral that they were then 588 to the Weſtward, off the Iſland *Ferro*. The Admiral told the Pilot, that by his reckoning it was 584; but, in his own Thoughts, and according to his true reckoning, it was 607. The Pilot of the Caravel *Nina*, on the Third, in the Afternoon, ſaid he found they had ſailed 650 Leagues, and the Pilot of the *Pinta* ſaid 634, wherein they were miſtaken, for they had always ſailed before the Wind: But *Columbus* ſtill took no notice, leſt the Men ſhould be diſmayed at the vaſt Run; for the greateſt Sea, till then known, did not exceed 200

Leagues. On the 2d they killed a Tunny, and ſaw much other Fiſh, and a white Bird, and many grey ones, and the Weeds very much withered, and almoſt rotted to Duſt; and having ſeen no Birds the third Day, they feared they had miſſed ſome Iſland on either Side, believing that the many Birds they had ſeen, went over from one Iſland to another; and the Men being deſirous to turn to one Side or other to ſeek for theſe Lands, *Columbus* did not think fit to let ſlip the fair Weather that favoured him; he kept to the Weſt, which was what he deſired, becauſe he thought he ſhould loſe the Credit of his Undertaking, if they ſaw him turning, at random, from one ſide to the other, to find out that, which he always affirmed he knew.

For this Reaſon, the Men began again to mutiny, which none will wonder at, who conſiders ſo many Men led by one, of whom few of them had any Knowledge, expoſed to ſo many Dangers, without ſeeing any thing for ſo many Days, but Sky and Water, or knowing what would be the End of ſuch a long Voyage. But it pleaſed God to ſend new Tokens, which, in ſome meaſure, quieted their Minds; for on the 4th, in the Afternoon, they ſaw about forty Sparrows and two Gulls, which came ſo near to the Ships, that a Sailor killed one of them with a Stone, and ſeveral flying Fiſhes fell into the Ship; all which things, and the good Words the Admiral gave them, pacified them; the next Day there flew near the Ships a Wagtail and a Gull, and ſeveral Sparrows from the Weſtward. On the 7th ſome Signs of Land appeared to the Weſtward, but no Man durſt ſpeak of it becauſe of the Thickneſs of the Weather, though they all wiſhed for it, to gain the Reward of an Annuity of 10,000 Marvedies, their *Catholic* Majeſties had promiſed for Life to the firſt that ſhould diſcover Land; and to prevent their crying Land at every Foot, in Hopes of that Annuity, it was ordained, that whoſoever ſaid it, if the ſame were not made good in three Days, ſhould be for ever excluded from that Reward, though he ſhould afterwards really diſcover it. However, thoſe aboard the Caravel *Nina*, which was much a-head, being ſo good a Sailer, concluding that it was certainly Land, fired their Guns and put out their Colours. But the farther they ſailed, the more their Joy abated, till it quite vaniſhed.

In the Midſt of this Anguiſh, it pleaſed God to comfort them again with the Sight of many Birds, among which many were Land Fowl, flying from the Weſt to the South-weſt; and *Columbus*, conſidering after he had ſailed ſo vaſt a Length, that ſuch ſmall Birds could not be far from Land, concluded it muſt certainly be near, and therefore he altered the Courſe he had then held due Weſt, and ſteered South-weſt; alledging, that though he altered his Courſe, he deviated but little from the firſt Deſign, and did it to follow the Rules and Method of the *Portugueſe*, who had diſcovered moſt of the Iſlands by following the Flight of ſuch Birds: Beſides, that thoſe they then ſaw took the ſame Way, he alſo concluded he ſhould find Land, for as they well knew he had often told them he did not expect to find it till he had ſailed 750 Leagues from the *Canaries* Weſtwards; at which Diſtance he had alſo told them he ſhould diſcover the Iſland *Cipango*, and that he ſhould certainly have found it, had he not known it was ſaid to lie North and South, and that he had not turned to the Southward to avoid falling on it, and that he believed it lay among other Iſlands on the Left-hand, and which Way thoſe Birds flew, and that it was by reaſon they were ſo near Land, ſo many, and ſuch various Sorts, of them appeared.

6. It pleaſed God, when Don *Chriſtopher Columbus* could no longer withſtand ſo much Contradiction, that on the 11th of *October*, 1492, in the Afternoon, he received ſome Comfort by the manifeſt Tokens they perceived of their being near Land; for the Men aboard the Admiral ſaw a green Ruſh near the Ship, and next a large green Fiſh of that Sort, that creeps cloſe about the Rocks. Thoſe aboard the Caravel *Pinta* ſaw a Cane and a Staff, and took up one that was artificially wrought, and a little Board, and ſaw Abundance of Weeds freſh torn off from the Shore; for which Reaſons, and, becauſe they brought up Sand upon Sounding; there was a Certainty of their being near Land, which was confirmed by the Shifting of the Wind, which ſeemed to come from the Shore.

Columbus being ſatisfied, after Night-fall, when they had ſaid the *Salve Regina*, as is uſual among Sailors; he diſcourſed the Men, telling them how merciful God had been to them, carrying them ſafe ſo long a Voyage; and that, ſince the Tokens were hourly manifeſt, he deſired them to watch all Night, ſince they knew that in the firſt Article of the Inſtructions he had given them when he came out of *Spain*, he told them, that when they had run 700 Leagues without diſcovering Land, they were to lie by after Midnight, till Day, and be upon the Watch, for he firmly believed they would find Land that Night. And that, beſides the 10,000 Marvedies, an Annuity their Highneſſes had promiſed the Perſon that ſhould firſt diſcover it, he would give a Velvet Doublet: Two Hours before Midnight, *Columbus* ſtanding on the Poop ſaw a Light, and privately called *Peter Gutierres*, Groom of the Privy Chamber to the King, and bid him look at it, and he ſaw it; then they called *Roderick Sanchez* of *Segovia*, Purſer of the Fleet, who could not diſcern it; but afterwards it was ſeen twice, and looked like a little Candle raiſed up, and then taken down; and *Columbus* did not queſtion but it was a true Light, and that they were near Land, and ſo it proved; and it was of People paſſing from one Houſe to another. Two Hours after Midnight, the Caravel *Pinta*, was always a-head, and made Signs of Land, which was firſt diſcovered by a Sailor, whoſe Name was *Roderick de Trians*, but two Leagues diſtant. But their *Catholic* Majeſties declared, that the Reward of 10,000 Marvedies Annuity belonged to the Admiral, and it was afterwards paid him at the Shambles of *Sevile*, becauſe he ſaw the Light amidſt Darkneſs, meaning the Spiritual Light that was then coming in amongſt thoſe barbarous People. When Day appeared they perceived an Iſland 15 Leagues in Length; plain, much wooded, well watered, and having a Lake of freſh Water in the Midſt of it; well ſtored with People, who ſtood full of Admiration on the Shore, imagining the Ships to be Sea Monſters, waiting with the utmoſt Impatience to know what they were, as the *Spaniards* were no leſs eager to be upon Land.

The Admiral went aſhore in his Boat, armed, and the Royal Colours flying; as did the Captains, *Martin Alonſo Pinzon* and *Vincent Yanez Pinzon*, carrying the Colours of their Enterprize, being a green Croſs with ſome Crowns, and the Names of their *Catholic* Majeſties. Having all of them kiſſed the Ground, and on their Knees, with Tears, given Thanks to God for the Goodneſs he had ſhewn them; the Admiral ſtood up and gave that Iſland the Name of *San Salvador*, which the Natives called *Guanaham*, being one of thoſe afterwards called *Lucayo* Iſlands, 950 Leagues from the *Canaries*, diſcovered after they had ſailed 33 Days. Then, with proper Solemnity, he took Poſſeſſion of it, in the Name of their *Catholic* Majeſties, for the Crown of *Caſtile* and *Leon*, a great Multitude of the Natives looking on.

The *Spaniards* immediately owned him as their Admiral and Viceroy, and ſwore Obedience to him, as repreſenting the King's Perſon in that Country, with all the Joy and Satisfaction that ſo great an Event deſerved; all begging his Pardon for the Trouble and Uneaſineſs they had given him, by their Inconſtancy and want of Reſolution. The Admiral, believing thoſe *Indians* a gentle and ſimple People, gave them ſome red Caps, Glaſs-Beads, and ſuch like Things, which they highly valued: The *Spaniards* no leſs admiring their Colour and Shape. When the Admiral returned on board, the *Indians* followed him; ſome ſwimming, and others in their Boats, called Canoes, made of one Piece of Wood, like Trays. They carried along with them Skins and Bottoms of Cotton, Parrots and Javelins, the Ends of which were armed with Fiſh Bones, inſtead of Horn, and ſome other Things to exchange for Glaſs-toys, Hawks-bells, and the like; which they were ſo fond of, that they received even the broken Pieces of earthen Plates as precious Relics, being a People in their original Simplicity.

They were all ſtark naked as they were born, Men and Women, and moſt of them young, or not above thirty Years of age. They wore their Hair down to their Ears, and ſome few to their Necks, tied with a String. They had good Faces and Features, though their extraordinary high Foreheads ſomewhat disfigured them. They were of a middle Stature, well ſhaped, and their Skins of an Olive Colour, like the Natives of the *Canaries*; ſome of them were painted with black, and others white, and others red; moſt of them on their Bodies, and ſome on their Faces and Eyes, or only the Noſe. They were not acquainted with our Weapons, for when they ſhewed them naked Swords, they ſimply laid hold on the Edges.

They knew nothing of Iron, and wrought Wood with hard ſharp Stones found in Rivers. Some of them having Scars about them, and being aſked by Signs, anſwered, that People, from other Lands, came to make them Priſoners, and they received thoſe Wounds in their Defence. They ſeemed to be ready of Tongue, and ingenious; for they eaſily pronounced the Words they once heard. No other Sort of Creatures were ſeen there but Parrots.

On the 13th many *Indians* came aboard the Ships in their Canoes, moſt of which carried forty five Perſons; yet ſome were ſo ſmall that they held but one. They rowed with an Oar like the Peel of an Oven, as if they had dug with a Spade; and their Boats are ſo artificially made, that though they over-ſet, the *Indians* ſwimming turn them up again, and empty the Water with dried Gourds they had for that Purpoſe. They carried Cotton to barter, and ſome for three Ceutis of *Portugal* (worth about a Farthing) gave as many Bottoms of Cotton as weighed a quarter of an hundred Weight. They wear no Jewels or other things of Value, except ſome little Plates of Gold they had hanging at their Noſes. They were aſked whence they had that Gold, and ſignified it came from the Southward, where a King had much of it. The Admiral underſtanding that there were other Lands, reſolved to go in queſt of them. The Ships were never clear of *Indians*; the whole Day was ſpent in bartering; their Generoſity not extending to give what they had, but for the Value they put upon what they received in return; looking upon the *Spaniards* as Men come from Heaven, and therefore they would have ſomething to keep as a Memorial of their being there.

7. On the 14th, in the Morning, the Admiral, with the Boats, took a View of the Coaſt to the North-weſt. The Natives followed by Land, promiſing Proviſions, and calling others to ſee the People come from Heaven, who, wondring, lifted up their Hands, and ſome ſwimming, and others in Canoes, went to aſk them by Signs, whether they came from Heaven, and praying them to go and reſt in their Country. The Admiral gave them all Glaſs Toys, Pins, and other Baubles, being well pleaſed; at length he came to a Ridge of Rocks, where there was a ſafe and ſpacious Harbour, and where a ſtrong Caſtle might have been erected, becauſe it was almoſt encompaſſed with the Sea. In that Place were ſix Houſes, with many Trees about them; and becauſe the Men were tired with rowing, and he perceived the Country was not proper to make any long ſtay in, he took ſeven *Indians* to learn the *Spaniſh* Tongue, and returning to the Caravels, ſet out in queſt of the other Iſlands; about an hundred appearing flat, green, and inhabited; the *Indians* telling the Names of them.

On the 15th, he came to one that was ſeven Leagues from the Firſt, which he called *St. Mary of the Conception*. The Side whereof next to *St. Saviour* extends 50 Leagues along the Coaſt; but the Admiral took the Coaſt that lies Eaſt and Weſt, being eighteen Leagues in Length; anchored on the Weſt, and went aſhore. The Natives flocked thither in great Numbers, with much Amazement, and he perceiving all alike thought fit to proceed no farther; a Canoe being aboard the Caravel *Nina*, one of the ſeven *Indians* of *San Salvador*, or *St. Saviour*, threw himſelf over-board and went his Way, and though the Boat purſued, they could not overtake him; the Night before another made his Eſcape. Another *Indian* came in a Canoe, to exchange Cotton; the Admiral ordered a red Cap to be put upon his Head, and Hawks-Bells on his Arms and Legs, and ſo ſent him away very joyful, without taking his Cotton. The next Day he ſailed away Weſt to another Iſland, the Coaſt whereof ſtretched a long 18 Leagues North-weſt and South-eaſt, where he arrived on the 17th, in the Afternoon, by reaſon of the Calm.

On their Way they met an *Indian* in a Canoe, carrying a Piece of ſuch Bread as they eat, and a Calabaſh or Gourd with Water; a little black Earth with which they paint themſelves, and dry Leaves of an Herb they very much value, becauſe it is wholeſome, and has a ſweet Scent, and in a little Baſket a String of Glaſs-Beads and two Vintems, a ſmall *Portugal* Coin, by which they knew he came from *St. Salvador*, had paſſed by the *Conception*, and was going to this Iſland, which the Admiral named *Fernanda*, in Honour of the King. They underſtood that the ſaid *Indian* was going to carry Advice of the *Spaniards*, but the Way being very long, and he tired with rowing, he went aboard the Ships, where the Admiral ordered him ſome Bread and Honey to eat, and Wine to drink, and as ſoon as he arrived at the Iſland he ordered him to be ſet aſhore with ſome Toys he gave him. The good Account he gave, cauſed the People to go aboard, and barter for ſuch Things as they had met with in the other Iſlands, the Inhabitants of them being of one Nation. When the Boat went aſhore for Water, the Inhabitants readily ſhewed it, and carried the little Tubs to fill the Pipes; but they ſeemed to be a more underſtanding People than the former; for they managed better in exchange of Commodities. Theſe had Cotton Cloths in their Houſes, and the married Women covered their Privities with a little Cotton Cloth, which the Maids did not.

This Iſland appeared to abound in Water, having many Meadows and Groves, and ſome agreeable little Hills, which there was not in the others; with an infinite Variety of Birds that ſung ſweetly, and flew in flocks, moſt of them different from what *Spain* affords; there were alſo many Lakes, and near one of them they ſaw a Creature like a Crocodile, ſeven Foot long, and they throwing Stones at him, he ran into the Water, where they killed him with their Spears, admiring its Largeneſs and frightful Shape; but Time afterwards made it appear, that theſe Animals being ſcaled and flead, are good Meat; the Fleſh of them being white, and much valued by the *Indians*; and in the Iſland of *Hiſpaniola* they call them *Yavanas*; in that Iſland they ſaw Trees that looked as if they had been grafted, as having Leaves and Branches of four or five different Sorts, and yet they were natural: They alſo ſaw Fiſhes of fine Colours, but no Land Creatures appeared, except large and tame Snakes, and Parrots, Alligators, and a Sort of little Rabbits, in Shape like Mice, but bigger, which they call *Utias*. Proceeding towards the North-weſt, taking a View of this Iſland, they anchored in the Mouth of a fine Harbour, that had an Iſland before it; but they went not in, becauſe it had not Water enough; nor would the Admiral go far from a Town that had covered them; whereas they had not yet ſeen, in any Iſlands, any bigger than of ten or twelve Houſes like Tents, ſome round and others long, with an open Portal before them, as is uſual in the Low Countries; covered with Leaves of Trees, well fitted for the Rain and Weather, with Vents for the Smoak, Ridges at the Top, handſomely made; and within them there was no other Houſhold Stuff or Ornament, than what they carried aboard the Ships to barter. But their Beds were a Net, made faſt to two Poſts, which are called Hamocks. They alſo ſaw ſome little Dogs that did not bark.

They found an *Indian* who had a Bit of Gold in his Noſe, with ſome Characters on it that looked like Letters; and the Admiral would have taken it from him, believing it had been a Coin, but it afterwards appeared there had never been any in the *Weſt Indies*. Finding nothing more in *Fernanda*, than in *St. Salvador*, and the *Conception*; he proceeded to the others that were neareſt. The fourth Iſland he came to was called *Saſmoto*, and he named it *Iſabella*, in Honour of the Queen; and took Poſſeſſion of it before Witneſſes, and the Notary, as he had done in the others. He perceived the Land was beautiful as the reſt, and the People like the former. They killed another

Alligator, and as they were going towards a Town the *Indians* fled, carrying away what they had. But the Admiral having forbid meddling with any thing, they ſoon came to the Ships to barter like the reſt; and the Admiral gave them ſome Toys, and to try their Kindneſs aſked for Water, which they carried to him in Calabaſhes or Gourds. He would not loſe Time at the Iſland of *Iſabella* or others; but reſolved to go in queſt of another, which they told him was very large, and called *Cuba*, pointing to the South; he believing it had been *Cipango*, by Reaſon of the Signs they gave of it, and their extraordinary Reports concerning it.

8. On the 28th he drew near the Coaſt, gave it the Name of *Juana* or *Johanna*; which ſeemed to be a better Country than the others, by Reaſon of the Hills, riſing Grounds, and Variety of Trees, Plains, and Shores that appeared. He anchored in a great River he called *San Salvador*. The Woods appeared very thick, the Trees tall, with Bloſſoms and Fruits different from ours; and there were abundance of Birds. The Admiral, deſiring to have Information, ſent to two Houſes, the People whereof fled, leaving Nets and Fiſhing Tackle behind them, and a Dog that did not bark. He would not ſuffer any thing to be touched, but ſailed to another great River, which he called *de la Luna*, i. e. of the Moon. Another he ſaw, which he called *de Mares*, or of the Seas, the Banks of it were very well inhabited.

The *Indians* fled to the Mountains, which were covered with large and tall Trees of ſeveral Sorts. The *Indians* he carried with him ſignified to him that there was Gold and Pearls in *Cuba*; and he thought it very probable, becauſe he ſaw Muſcles; they alſo ſaid it was not ten Days Sail from thence to the *Continent*, according to the Notion he had. *Paul*, a Phyſician of *Florence*, having writ about it; however, though he was in the right, it was not the Land he imagined. Believing that if many Men went a-ſhore, it would add to the Fear of the *Indians*, he ſent two *Spaniards*, with one *Indian* of *San Salvador*, and one of *Cuba*, who came to the Ships in a Canoe. The *Spaniards* being *Roderigo de Xeres*, an Inhabitant of *Ayamonte*, and *Lewes de Torres*, who had been a Jew, and ſpoke *Hebrew* and *Chaldaic*, and ſome ſay *Arabic*. He gave them Things to exchange, and allowed them ſix Days to return in; directing them to go up into the Country, and enquire into all Affairs without doing Harm to any body. In the mean Time he refitted the Ship, and they obſerved, that from all the Wood they burnt, there came a Sort of Gum like Maſtic, reſembling in the Leaf and Fruit the Maſtic Tree, but much bigger. In this River of *Mares* the Ship had room to wind: It has 7 or 8 Fathom Water at the Mouth, and five within, with two Ridges of high Ground on the South-eaſt, and a fine Cape to the Weſt North-weſt, plain and running out; and this was afterwards the Port of *Baracboa*, which the Adalantado, or Lord Lieutenant *Diego Velaſquez*, called of the *Aſſumption*.

When the Ship was ready to ſail, the *Spaniards* returned, on the 5th of *November*, with three of the Native *Indians*, reporting they had travelled 22 Leagues, and found a Village of fifty Houſes, built like them before mentioned, and that they contained about 1000 Perſons, becauſe a whole Generation lived in a Houſe, and that the prime Man came out to meet them, led them by the Arms, and lodged them in one of theſe new Houſes; cauſing them to ſit down on Seats made of one ſolid Piece of Wood, in the Shape of a Beaſt, with very ſhort Legs, and the Tail held up the Head before, with Eyes and Ears of Gold; and that all the *Indians* ſat about them on the Ground, and one after another went to kiſs their Feet and Hands, believing they came from Heaven, and gave them boiled Roots to eat, which taſted like Cheſnuts; and intreated them to ſtay there, or at leaſt, to reſt five or ſix Days; becauſe the *Indians* that went with them ſaid many kind Things. That Abundance of Women ſoon after coming in to ſee them, all the Men went out, and they, with the ſame Admiration, kiſſed their Feet and Hands, touching them as if they had been ſome holy Things, offering what they brought; and that many of the Men would have come away with them, but that they would admit of none but the Lord and his Son, with one Servant.

They added, that, both coming and going, they found many Villages where the ſame Reſpect was paid them, but, that none of them had above five or ſix Houſes; and that, by the Way, they met many People, each of them carrying a Fire-brand in his Hand to light Fire, and perfume themſelves with ſome Herbs they carried along with them, and to roaſt their Roots, that being their principal Food; and the Fire was eaſily kindled, becauſe they had a Sort of Wood, which, if they worked one Piece againſt another, as if piercing a Hole, took fire; they alſo ſaw a Multitude of ſeveral Sorts of Trees, ſuch as they had not ſeen on the Sea-coaſt, and great Variety of Birds, different from ours, and among them Partridges and Nightingales; but that they had met with no four-footed Creatures, beſides thoſe little Cur-Dogs that cannot bark. They had much Ground ſowed with their Roots; and that Sort of Corn called Maize, well taſted, either boiled or ground into Flower. They ſaw a vaſt Quantity of ſpun Cotton in Bottoms, and in one Houſe they believed there was above 12,000 Pound Weight of it; the ſame growing in the Fields without being planted; and as the Roſes blow of themſelves, ſo does that, when ripe, though not all at the ſame Time; for, upon the ſame Plant, ſome were open and others ſtill cloſed; and for a Leathern Thong, or a Piece of glazed Ware, or a Bit of a Looking-Glaſs, they would give a little Baſket full of Cotton, which they did not make uſe of to cloath themſelves, for they all went naked, but in making Nets for their Beds, and little Cloths to cover their Privities; and that being aſked about Gold and Pearls, they ſaid there was Abundance at *Bobio*, pointing Eaſtward.

9. The *Spaniards* ſtill enquiring of the *Indians* for Gold, they anſwered, *Cubanacan*, which they thought had meant the Great *Cham*, and that the Country of *Cathay* was not far off, becauſe they alſo pointed out four Days Journey. *Martin Alonſo Pinzon* ſaid it muſt be ſome great City, that was four Days Journey from thence; but it was not long before they underſtood that *Cubanacan* was a Province in the Midſt of the Iſland of *Cuba*, for *Nacan* ſignifies in the Middle, and that there were Mines of Gold. Having heard thus much, the Admiral would not loſe any more Time, but ordered ſome *Indians* to be taken, to be carried into *Spain*, from ſeveral Parts, that every one might give an Account of his own Country, as Witneſſes of the Diſcovery: Twelve were taken, Men, Women, and Children, without giving Offence. As they were ready to ſail, an *Indian*, who was one of the Womens Huſband, and Father to two Boys that were aboard, came to the Ship, and deſired they would take him along with his Wife and Children; the Admiral ordered him to be taken aboard, and all of them to be well uſed; and, becauſe of the North Winds, he was obliged to return to a Port, which he called *del Principe*, or the *Princes*, where he arrived on the 13th, and erected a Croſs at the Mouth of it, made of two large Pieces of Timber.

The next Day he ſtood to the Eaſtward, in queſt of the Iſland *Hiſpaniola*, which the *Indians* called *Bobio*, and ſome of them *Babeque*; but it afterwards appeared *Babeque* was not the Iſland of *Hiſpaniola*, but the Continent, for they called it by another Name, *Carabina*. *Martin Alonſo Pinzon* underſtanding now, that the *Indians* ſaid there was much Gold in *Bobio*, being covetous to enrich himſelf, he left the Admiral on the 21ſt, without any Streſs of Weather, or any other lawful Cauſe; and his Ship being a very good Sailer, made the beſt of his Way thither. By the Name of *Bobio*, which was the Land of *Hiſpaniola*, it ſeemed the *Indians* would ſignify that it was a Land full of Bohios, that is, Cottages; the Admiral ſeeing, that, notwithſtanding all the Signals he made, *Martin Alonſo* was not to be found with the two Ships, and the Wind being ſtill contrary, he returned to *Cuba*, to a large and ſafe Harbour, which he called *St. Catherines*; there he wooded and watered, and ſaw ſome Stones with Tokens of Gold in them. On the Land there were tall Firr-trees, fit to make Maſts, and perceiving that all the *Indians* directed him to *Hiſpa-*

niola, he ſailed along the Coaſt more to the South-eaſt 42 Leagues, where he found large and ſafe Harbours, and among them a River, up the Mouth whereof a Gally could eaſily paſs, though the Entrance could not be perceived, unleſs very near to it. The Convenience of the River invited him to go in the Length of the Boat, where he found eight Fathom Water, and proceeding ſtill farther, he ſaw a Canoe of twelve Oars on the Land, under a ſort of Arbour, and in ſome Houſes cloſe by they found a Maſs of Wax, and a Man's Head hanging in a little Baſket at a Poſt, the which Wax they carried to their Catholic Majeſties, none being ever after found in *Cuba*, whence it was concluded to have been brought from *Yucatan*, either by Streſs of Weather in a Canoe, or ſome other Way. They found no People to make any Enquiry of them, becauſe they all fled, but ſaw another Canoe 95 Spans in Length, which could carry fifty Perſons, made of one intire Tree, like the reſt; and though they had no Iron Tools to work them, the Inſtruments they made uſe of for that Purpoſe, of Flints, proved ſufficient, becauſe the Trees were very large, and the Heart of them very ſoft and ſpungy, ſo that they eaſily hollowed them with Flints.

The Admiral arrived at the Eaſtern Point of it, and ſet out from thence on the 5th of *December* for *Hiſpaniola*, being eighteen Leagues over to the Eaſtward, but could not reach it till the next Day, by reaſon of the Currents. When he entered the Port he called it *St. Nicholas*, becauſe it was that Saint's Day, and found it ſafe, ſpacious, and deep, encompaſſed with thick Woods, though the Land is hilly, and the Trees not very large, like thoſe in *Spain*; for they ſaw Firrs and Myrtles, and a pleaſant River ran into the Harbour; and on the Shore there were many Canoes as big as Brigantines of twenty-five Oars. However, finding no People, he proceeded farther to the Northward, to the Port called the *Conception*, to the Southward of an Iſland he called *Tortuga*, ten Leagues from *Hiſpaniola*, and finding that this Iſland of *Bobio* was very large, and that the Soil and Trees were like thoſe in *Spain*, as alſo that at one Draught of a Net, among other Sort of Fiſh, they had taken *Shads*, *Soles*, and other Sort of Fiſh known in *Spain*, which till then they had not ſeen in thoſe Parts; and that they had heard the Nightingale ſing, with other *European* Birds which they admired, about *December*, he ſtiled the Iſland *la Eſpanola*, by us corruptly called *Hiſpaniola*. He thought fit the Name of *Spain* ſhould have place, though ſome told him it would be more proper to call it *Caſtelana*, becauſe only the Kingdoms *Caſtile* and *Leon* were concerned in that Conqueſt.

In regard that the *Indians* he had on board gave him ſo good an Account, he was earneſt to ſee what Truth there was as to the Wealth of that Country, and to take a View of it; but the *Indians* flying, and giving one another Notice by Fires, he thought fit to ſend out ſix armed *Spaniards*, who having travelled far, returned without finding any People, ſaying wonderful Things of the Delightfulneſs of the Land. Having ordered a great Croſs to be erected near the Mouth of the Harbour, on the Weſt-ſide, as three Sailors were in the Wood, ſeeking for proper Trees for that effect, they ſpy'd abundance of naked People, who fled as ſoon as they ſaw the *Spaniards*. The Sailors running after them took a Woman who had a little Plate of Gold hanging at her Noſe. The Admiral gave her Hawks-Bells, Strings of Glaſs-Beads, and cauſed a Shirt to be put upon her, and ſo ſent her away, with three of the *Indians* he had brought with him, and three *Spaniards*, to bear her company to her Habitation.

10. The next Day he ſent nine *Spaniards*, well armed, with an *Indian* of *San Salvador*, which was four Leagues diſtant to the South-eaſt; they found a Town of a Thouſand Houſes abandoned, the Inhabitants being fled. The *Indian* went after them, and ſo much extolled the *Spaniards*, that they returned, and being ſomewhat aſtoniſhed and trembling, laid their Hands on the Heads of the *Spaniards*, by way of Honour and Reſpect, and carrying them Proviſions, deſiring they would ſtay that Night; Abundance of People then came up, carrying on their Shoulders the Woman to whom the Admiral had given the Shirt, with her Huſband, who was going to return them Thanks. The *Spaniards* returned with an Account that the Country abounded in Proviſions; the People whiter and of better Countenances than thoſe of the other Iſlands, more tractable, and that the Country which produced Gold was more to Eaſtward; that the Men were not ſo large, but ſtrong boned, and groſs, without Beards, their Noſtrils very wide, and their Foreheads ſmooth and high, and that they made them ſo at their Birth, reckoning it graceful; for which Reaſon, and becauſe they always went bareheaded, their Skulls were ſo hard, that ſometimes a *Spaniſh* Sword would break upon their Heads.

The Admiral was informed that the Lord of that Territory, whom they called a Cazique, was coming with two hundred Men to ſee the Ships, and though young, they carried him on a Palankin, on their Shoulders, and he had ſeveral Counſellors; when he came on board it was obſerved, with Admiration, how great Reſpect they paid him, and how gravely he behaved. An *Indian* of the Iſland *Iſabella* went and talked to him, telling him the *Spaniards* were heavenly Men. He went aboard, and when he came to the Quarter-deck, he made Signs for thoſe that were with him to ſtay behind, excepting two who ſat down at his Feet, and were his Counſellors. The Admiral ordered to give him to eat; he took a little of every thing, and having taſted it, gave it to the other two, and afterwards carried it to the reſt. They gave him Drink, and he only put it to his Mouth; they all behaved themſelves very gravely, ſaid little; his Men looked at his Mouth, and ſpoke to him, and the Admiral, by means of the *Indian* Interpreter, gave him to underſtand that he was Commander for their Majeſties of *Caſtile* and *Leon*, the greateſt Sovereigns in the World. But, neither the Cazique, nor the reſt, would believe any other than that they came from Heaven. They ſeemed to the Admiral to be a more rational People, than thoſe of the other Iſlands; and becauſe it grew late the Cazique returned aſhore. The next Day, though the Wind was contrary, and blew hard, the Sea did not ſwell, by reaſon of the Shelter the Iſland *Tortuga* afforded to that Coaſt; and ſome Seamen went a-fiſhing, with whom the *Indians* were well pleaſed. Some Men went to the Town, and obtained little Plates of Gold for Glaſs-Beads, which much pleaſed the Admiral, becauſe he was very deſirous that ſome Gold might be found in proſecuting this Diſcovery, to ſhew that his Promiſes were not vain.

The King came again to the Shore, in the Afternoon, and then a Canoe arrived from the Iſland *Tortuga*, with forty Men to ſee the *Spaniards*; at which the Cazique appeared to be concerned; but all the *Indians* of *Hiſpaniola* ſat down on the Ground, in token of Peace, and thoſe in the Canoe went aſhore; but the King ſtood up, and threatning them, they went aboard their Canoe again. The Admiral, being reſolved to diſcover the Country, ſet ſail, and during all the 19th of *December* could not get out of that little Bay between the two Iſlands, nor put into the Harbour hard by it. He ſaw many Mountains, Woods, and Groves, and a little Iſland, which he called *St. Thomas*. He judged that *Hiſpaniola* had many Capes and Harbours, and he thought the Temperature of the Air moſt pleaſant, and the Soil delightful. On the 20th he put into a Harbour, between the little Iſland of *St. Thomas* and the Cape. Several Towns appeared, as alſo Fires; becauſe the Seaſon being dry, and the Graſs there growing high, they burnt it to make Ways; for, as they were naked, the dry Weeds hurt them, and alſo to hunt the Utias, which they took with Fire. The Admiral entered the Port with the Boats, and having viewed it, ſaid it was a very good one. He ſent out to ſee whether there was any Town near, and they found one at a little Diſtance from the Sea; they ſaw *Indians* who kept a-loof from the *Spaniards*, but the *Indians* that came aboard the Ships bid them not to fear; and immediately ſo many Men, Women, and Children came, that there was no ſeeing through the Throng. They carried Meat, Calabaſhes with Water, and good Bread made of Maize or *Indian* Wheat; they did not hide the Women, as had been done in other Parts, but all admired to ſee the Chriſtians, and ſtanding amazed, glorified God. They were whiter and better ſhaped, better natured, and more generous;

and the Admiral took ſpecial Care that no Offence ſhould be given them. He ſent ſix Men to ſee the Town, where they entertained them as believing they came from Heaven. In the mean Time there came ſome Canoes, with Men ſent by a King, who deſired the Admiral to go to his Town, where he was waiting for him, with many People on a Point of Land.

He went in the Boats, though many had intreated him not to go, but to ſtay with them. As ſoon as the Boats came, the King ſent the *Spaniards* Proviſions, and ſeeing they accepted of them, they went to the Town for more, and for Parrots. The Admiral gave the *Indians* Hawks-Bells, Glaſs Baubles, and ſome of Tin; he returned to the Ships, the Women and Children crying out that he ſhould not go away. Some that, out of Curioſity followed him in Canoes, he gave Victuals to, as he did to others that ſwam aboard from half a League Diſtance; though the Shore was covered with People, they could ſee Abundance coming and going croſs a large Plain, which was afterwards called *la Vega Real*, or the Royal Plain; the Admiral again commended the Harbour, and gave it the Name of *St. Thomas*, becauſe he found it on his Day. The 22d, in the Morning, he was going in ſearch of the Iſlands, which the *Indians* ſaid had much Gold, but was hindered by the Weather, and ſent the Boats a-fiſhing; and then one came from King *Guacanagari*, to deſire him to go to his Country, and he would give him all he had, he being one of the five Sovereigns of the Iſland, poſſeſſing the greateſt Part of it on the North-ſide, where the Admiral then was; he ſent him a Girdle he wore inſtead of a Purſe, and a Vizor, with Ears, Tongue, and Noſe, of beaten Gold: The Girdle was adorned with ſmall Fiſh-Bones, like Seed Pearl, curiouſly wrought, four Fingers broad. The Admiral reſolved to go thither on the 23d, though to pleaſe others, there went before ſix *Spaniards*, becauſe the *Indians* were ſo much delighted every where to ſee them.

The foul Weather detaining the Admiral, he ſent a Notary to King *Guacanagari*, to acquaint him with it; he alſo ſent two of his *Indians* to a Town, to ſee if there was any Gold, gueſſing that there was Plenty of it; and it was believed for certain, that this Day above a Thouſand went aboard the Ships; every one of them gave ſomething, and thoſe who went not aboard from their Canoes cried, *Take, take.* The Notary went to *Guacanagari*, who came out to meet him. He thought that Town more regular than any he had ſeen before. All the People gazed on the Chriſtians with Joy and Admiration, and the King gave them Cotton Cloths, Parrots, and ſome Pieces of Gold, and the People, what they had; valuing the Toys the *Spaniards* gave them like Relics. Thus the Notary and his Companions returned to the Ships, attended by *Indians*.

The 24th the Admiral went to viſit *Guacanagari*; the Diſtance from Fort *St. Thomas* to the Place where the King was might be about four or five Leagues, and there he ſtaid, till, ſeeing the Sea calm, he returned aboard, and went to Bed, for he had not ſlept in two Days and a Night. The Weather being calm, the Sailor who was at the Helm left it to a Cabbin-boy, tho' the Admiral had, during the whole Voyage, forbid the Steerſman ever to quit the Helm, and in reality they were out of Danger of Sholes or Rocks; for on *Sunday*, when the Boats went to carry the Notary to the Cazique, they had ſurveyed all the Coaſt, and the Sholes there are from the Point of Land to the Eaſt-ſouth-eaſt, for above three Leagues, and they had alſo obſerved which Way they might paſs, and finding themſelves in a dead Calm they went to ſleep, and it happened the Current carried the Ship on very gently, till it ſtruck on a Rock with ſuch a dreadful Noiſe that it was heard a League off, and the Fellow that was at the Helm, finding the Rudder ſtrike, roared out.

The Admiral, hearing the Cry, was firſt up, and then the Maſter, whoſe Watch it was, and he ordered him, ſince the Boat was out, to let fall an Anchor at the Stern, for by that Means they might, with the Help of the Capſtain, work out the Ship; and when he thought they were doing what he had ordered, he perceived that ſome were making Way in the Boat to the Caravel that lay to the Windward half a League from thence. Obſerving that the Water ebbed, and the Ship was in Danger, he ordered to cut down the Maſt, and lighten it, to ſee if it might be ſaved; but it could not be done; the Water falling away all at once, the Ship was every Moment left dry, and lay a-thwart the Sea; and tho' it was not rough, by reaſon of the Calm, the Ship ſprung a Leak between the Ribs, and lay down on a Side, opened near the Keel, and was ſoon full of Water; and if the Wind had blown, or the Sea been rough, not a Man had eſcaped; but had the Maſter done as the Admiral ordered him, the Ship had got off ſafe. The Boat came again to their Aſſiſtance, for thoſe in the other Ship underſtanding how the Caſe ſtood, not only refuſed to receive thoſe that had fled, but with them ſailed back to the Relief of the Diſtreſſed. There being no Poſſibility of ſaving the Ship, Order was taken for ſaving the Men; to which Purpoſe the Admiral ſent *James de Arana* and *Peter Gutierrez*, to acquaint *Guacanagari* that by going to viſit him he had loſt his Ship a League and half from Land. *Guacanagari* lamented this Misfortune, and immediately ſent the Canoes, which in a Moment carried off all that were on the Decks; and he came himſelf with his Brothers, and took particular Care that nothing ſhould be touched, ſtaying in Perſon to guard the Goods, and ſent Word to the Admiral not to be concerned, for he would give him all he had; and the Goods were carried to two Houſes he had appointed to lay them up in. The *Indians* ſo affectionately gave their Help in this Diſtreſs, that it could not have been better done in *Spain*; for the People were gentle and loving, and their Language was eaſy to be pronounced and learned; and they had ſome commendable Cuſtoms, and the King was ſerved with much State, and he was very ſedate; and the People were ſo curious in aſking, that they would know a Reaſon for every thing.

On the 26th of *December Guacanagari* went on board the Caravel *Nina*, where the Admiral was in great Affliction for the Loſs of his Ship: He comforted him, and offered him all he had. Two *Indians* came from another Town, bringing Plates of Gold to exchange for Hawks-Bells, which were what they moſt valued, and the Admiral had a Stock of thoſe Baubles, grounded on the Experience he had learnt from the *Portugueſe* in *Guinea*. The Sailors alſo gave notice that others carried Gold, and gave it for Ribbons and other Trifles; *Guacanagari* obſerving what the Admiral valued, ſaid he would cauſe ſome to be brought from *Cibao*; and going aſhore, he invited the Admiral to go eat Axis and Cazabi, which was their chief Diet; and he gave him ſome Maſks, with Gold Eyes, Noſes, and Ears, with ſome other ſmall Things they wore about their Necks. He alſo complained to him of the *Caribes*, who carried away his People, which was the Reaſon of his flying at firſt, ſuppoſing the *Spaniards* had been *Caribes*. The Admiral ſhewed him his Arms, and a *Turkiſh* Bow with which a *Spaniard* ſhot very dexterouſly; but what he moſt admired was the Cannon, for when they were fired, the *Indians* fell down as if they had been dead. The Admiral having found ſo much Affection, and ſuch Tokens of Gold; and believing the Country was fruitful and wholeſome, judged that God had permitted the Ship to be caſt away to the End that a Settlement might be made there, and that the Preaching and Knowledge of his moſt holy Name might be begun in that Iſland.

The *Indians* went and came for Hawks-Bells, which were the Things they moſt delighted in, and as ſoon as they came near the Caravel, they held up the Pieces of Gold, crying, *Chuque, Chuque*, that is, Take, Take. An *Indian* came to the Shore with a Piece of Gold weighing half a Mark, (that is, four Ounces) and holding it in his Left-hand, ſtretched out the Right; and an Hawks-Bell being put into it, he let go the Gold and ran away, thinking he had cheated the *Spaniard*. The Admiral reſolved to leave ſome Men in that Country to trade with the People, and acquaint themſelves with the Country, and learn the Language, that when he returned for *Spain* there might be ſome capable to give Directions for making of a Settlement there; and many offered themſelves to that Purpoſe.

He ordered, for the preſent, a ſort of Town to be built with the Timber of the Ship: And at this Time Advice came, that the Caravel *Pinta* was in the River, toward the Eaſtern Point, and *Guacanagari* ſent to inquire into it. The Admiral carefully attended the Building, and the more for that there were daily greater Inducements to it, and becauſe *Guacanagari* always ſhewed himſelf fearful of the *Caribes*. The more to encourage and to ſhew him the Effect of the *Spaniſh* Arms, the Admiral ordered a great Gun to be fired againſt the Side of the Ship that had been caſt away, and the Ball paſſing clear-through fell into the Water: He ſhewed him what Harm our Weapons did, and told him that with them, thoſe he deſigned to leave behind in his Country ſhould defend him, becauſe he deſigned to return into *Spain* to bring ſome Preſents for him.

12. The Admiral haſtened the building of the Fort; and to that purpoſe went aſhore from the Caravel, aboard which he always lay. On the 18th, as he was going into the Boat, he thought he had ſeen *Guacanagari*, who went into his Houſe perhaps for the more State, ſending one of his Brothers, who received the Admiral with much Joy, and led him by the Hand to one of the Houſes that had been given to the Chriſtians, being the largeſt in the Town: In it they had provided for him a raiſed Seat, and made him ſit on a Chair with a low Back the *Indians* uſed, and they were very neatly poliſhed, and bright as if they had been made of Jet. As ſoon as the Admiral was ſeated, the Brother ſent to acquaint the King, who preſently came, and very joyfully hung a great Plate of Gold about his Neck, and ſtaid with him till it grew late, and the Admiral went aboard the Caravel. He had ſeveral Motives for leaving a Colony in that Place; the chief whereof were, That when it was known in *Spain* that Men had been left there to ſettle, the People might be more inclinable to go over thither; and becauſe all the Men left could not build another Veſſel in time, and likewiſe could not be tranſported in the only Caravel he had; as alſo becauſe he found thoſe that were to ſtay very inclinable to it, encouraged by the Gentleneſs and Affability of the People; and becauſe, tho' he had deſigned to carry to their Catholic Majeſties ſome Natives of the Country, and other moſt valuable Things there were in it, in token of the Diſcovery, and for the more Reputation of the Enterprize, it was convenient it ſhould be known that Men had ſtaid there of their own free Will.

The Fort had a Ditch round it; and, tho' built of Wood, was very ſtrong againſt the Natives. It was finiſhed in ten Days, becauſe a vaſt Number of Men worked at it; and he called it the Town of the *Nativity*, becauſe on that Day he came into the Port. On the 29th in the Morning, a Nephew of the King's, very young and of good Senſe, went aboard the Caravel; and the Admiral, being always ſollicitous to know where the Gold was found, learned all that's poſſible by Signs, and thought he underſtood ſome Words. Accordingly he aſked the Youth about the Mines, and underſtood that four Days Journey from thence there was an Iſland to the Eaſtward, which he called *Guarinoex*, and others, *Macorix*, *Mayonis*, *Fumay*, *Cibao*, and *Coray*, in which there was a vaſt Quantity of Gold. The Admiral immediately wrote down thoſe Names: And by this it appeared, that he underſtood nothing of the *Indian* Language; for theſe Places were not Iſlands, but Provinces in that Iſland, and Lands belonging to ſeveral Kings or Lords: *Guarinoex* was the King of that great Royal Plain before-mentioned; and the Youth meant to tell him, that in *Guarinoex*'s Country was the Province of *Cibao*, abounding in Gold: *Macorix* was another Province, which afforded little Gold: And the other Names were, as has been ſaid, Provinces; the Admiral not knowing how to write them, becauſe he did not underſtand them; and he thought the King's Brother, who was preſent, had reproved his Nephew for telling him thoſe Names. At Night the King ſent him a great Gold Maſk, deſiring he would ſend him a Baſon and an Ewer, which it is likely were of Braſs or Tin: He immediately ſent them, and believed he aſked for them to have the like made in Gold.

On the 30th the Admiral went to dine aſhore; and it happened to be at the Time when five Caziques or Princes, ſubject to *Guacanagari*, were come, all of them with Crowns of Gold on their Heads, and with great State; and as ſoon as he landed, *Guacanagari* came to meet him, and led him by the Arm to the ſame Houſe where he had been before, where the raiſed Place and the Chairs were. He cauſed the Admiral to ſit down with great Courteſy and Reſpect, and then took off the Crown from his own Head, and ſet it on the Admiral's, who took off a Collar he had on of fine Beads of ſeveral beautiful Colours, and put it about the King's Neck, and took off an Hood of fine Cloth which he had put on that Day, and put it upon the King, and ſent for a Pair of coloured Buſkins, which he alſo drew on; he alſo put a great Silver Ring upon his Finger, becauſe the Admiral had been told that they had ſeen one on a Sailor's Hand, and did all they could to get it of him; for it is certain that they put a great Value on any thing made of white Metal, whether it were Silver or Tin. With theſe Gifts the King thought himſelf much enriched, and was highly pleaſed. Two of thoſe Caziques bore the Admiral Company to the Place where he took Boat, and each of them gave him a great Plate of Gold; and theſe were not caſt, but made of many Grains beaten together; for the *Indians* of this Iſland had not the Art of caſting, but beat the Grains of Gold they found between two Stones, and by that Means ſpread them.

13. When the Admiral returned to lie aboard the Caravel, and found that *Vincent Yanez* the Commander of it affirmed he had ſeen Rhubarb, and knew the Strings of it, and the Root, the Admiral ſent for ſome Rhubarb, and they brought one Frail full of it, and no more; becauſe they had no Spades to dig it up with; which was carried to their Catholic Majeſties; but it did not prove to be Rhubarb. The Admiral looked upon the Pepper of this Iſland, which they call Axi or Pimento, as good Spice, ſaying it was better than the Pepper that they carried from the Eaſtern Parts; for which reaſon they fancied there were other Sorts of it. The Fort being finiſhed, he ordered all to be provided for ſailing, Wood and Water to be taken in, and other Preparations made. The King ordered as much as he would have of the Country Bread called Cazabi to be given him, as alſo of his Spice called Axi, Salt Fiſh, and what he had beſides. Tho' he would not willingly have gone away for *Spain* without coaſting all that Country, which he thought extended very far towards the Eaſt, that he might have diſcovered its Secrets, and find the beſt Paſſage from it to *Spain*, for the ſafer bringing over of Beaſts and Cattle, he durſt not then attempt it, as thinking he had but one Caravel, and might run himſelf into Danger, and therefore it was not reaſonable to venture farther in unknown Seas.

He complained very much of *Martin Alonſo*'s forſaking him, as being the Cauſe of thoſe Inconveniencies. He made choice of thirty-nine Men to ſtay in the Fort, ſuch as were moſt willing, chearful, ſtrong, and beſt able to endure Fatigues. He left with them for their Commander *James de Arana*, a Native of *Cordova*, Notary and Alguazil, with full Power as he had received it from their Majeſties; and in caſe he ſhould die, he appointed for his Succeſſor in that Poſt *Peter Autichrez*, Groom of the Privy-Chamber to the King; and in caſe he died, the Place to go to *Roderic de Eſcovedo*, born at *Seville*; and alſo left with them a Surgeon whoſe Name was *John*, together with a Ship-carpenter, a Caulker, a Cooper, and a good Gunner who was very ſkilful for Fireworks. There likewiſe was a Taylor left, the reſt were Sailors, whom he furniſhed with Biſket and Wine, and the other Proviſions he had, for a Year; leaving Seeds to ſow, and all the Goods and Things he had brought to barter, being a great Quantity; as alſo all the great Guns and other Arms that were in the Ship, and the Boat that had belonged to it.

When all Things were ready, and he upon the point of departing, he called them together, and ſpoke to them to this Effect, “He bid them offer up their Prayers to “God, and return Thanks to him for having carried “them to ſuch a Country to plant his holy Faith, and “not to forſake him, but to live like good Chriſtians,

“ and he would protect them: That they ſhould pray to God to grant him a good Voyage, that he might ſoon return to them with a greater Power: That they ſhould love and obey their Captain, becauſe it was requiſite for their own Preſervation; and he charged them ſo to do in the Name of their Highneſſes: That they ſhould reſpect *Guacanagari*, and give no Offence to any of his People; nor offer Violence to any Man or Woman, that the Opinion of their coming from Heaven might be confirmed: That they ſhould not part, nor go up the Country, nor out of *Guacanagari*'s Dominions, ſince he loved them ſo well: That with his Conſent they ſhould ſurvey the Coaſt in Canoes and their Boat, endeavouring to diſcover the Gold Mines, and ſome good Harbour, becauſe he was not well pleaſed with that, where they remained, which he called the *Nativity*; and that they ſhould endeavour to barter the moſt they could fairly, without ſhewing Covetouſneſs; and endeavour to learn the Language, ſince it would be ſo uſeful to them, to gain the Friendſhip of the Natives, and very advantagious; and he promiſed to entreat their Catholic Majeſties, to reward them, ſince they had opened the Way to that New World.” They anſwered they would punctually perform all he ordered them.

On the 2d of *January*, 1493, he went on Shore to take his Leave, dined with *Guacanagari* and his Caziques; recommended the Chriſtians to him, whom he commanded to ſerve and defend him againſt the *Caribes*. He gave him a fine Shirt, and ſaid he would ſoon return with Preſents from the King of *Spain*. He anſwered with great Tokens of Sorrow for his Departure. One of the King's Servants then ſaid, he had ſent Canoes along the Coaſt to ſeek for Gold; and the Admiral anſwered, that if *Martin Alonſo Pinzon* had not left him, he would have ventured to ſail round the Iſland, and have carried a Ton of Gold into *Spain*, and would ſtill do it, nevertheleſs, were he not afraid that the Caravel *Pinta* would get home ſafe, and give ſome falſe Information againſt him, to conceal their own Crime.

14. On the 4th of *January*, 1493, The Admiral left the Port he had called *Navidad*, or the *Nativity*, ſailing Eaſtward towards a very high Mountain, without Trees, but covered with Graſs, looking like a Tent, which he called *Monte Chriſto*, and lies to the Eaſt eighteen Leagues from the Cape he called *Santo*, that was behind, and four Leagues from the Port called *Navidad*. That Night he anchored five Leagues from *Monte Chriſto*; and on the 5th of *January* he proceeded to a little Iſland, where there were good Salt Pits; he entered the Ports, and was ſo much pleaſed with the Soil, the Plenty of Wood, and the Plains he ſaw, that he ſaid that was the Iſland of *Cipango*; and had he thought he was ſo near the Mines of *Cibao*, whence ſo much Wealth was brought, he would have affirmed it more poſitively. On the 6th he ſailed from *Monte Chriſto*, and ſoon after diſcovered the Caravel *Pinta*, ſailing towards him before the Wind; they thought fit to return to *Monte Chriſto*, where *Martin Alonſo Pinzon* made his Excuſe for having parted Company, and though there was no ſatisfactory Reaſon for what he had done, the Admiral paſſed it by, and underſtood he had bartered for much Gold, and that he had taken one half for himſelf, and the other half for the Seamen. *Alpeat* River runs down into this Harbour, which he called *Rio de Oro*, that is, the River of Gold; becauſe the Sand looked like Gold, and there he watered. On the 9th he hoiſted Sail, came to *Ponta Roxa* or *Red Point*, which is thirty-ſix Leagues Eaſt of *Monte Chriſto*, and there they took Tortoiſes as big as Bucklers, as they went to lay their Eggs a-ſhore. The Admiral affirmed he had thereabouts ſeen three Mermaids that raiſed themſelves above the Water, and that they were not ſo handſome as they are painted, that they had ſomething like a Human Face, and that he had ſeen others on the Coaſt of *Guinea*. He proceeded to the River *de Gracia* or of *Grace*, where *Martin Alonſo* had been, and was alſo called by his Name, and cauſed four *Indians Martin Alonſo* had taken Priſoners by Force to be left there.

On the 11th he ſailed to a Cape he called *Balprado*, from a Mountain appearing, which being covered with Snow, as if it had been Silver, he called *Monte de Plata*, or the *Silver Mountain*; and a Port that is at the Foot of it, *Puerta de Plata*, or the *Silver Harbour*, which is like a Horſe-ſhoe; and proceeding along the Coaſt, with the Currents and fair Weather, above ten Leagues, he diſcovered ſeveral Capes, which he called *Angel*, *Punta del Hiero*, or *Iron Point*, *el Rodendo*, or the *Round Point*, *el Frances*, the *French*, *el Cabo de Buen Tiempo*, the *Fair Weather Cape*, and *el Tajado*, the *Craggy*. On the 12th he advanced thirty Leagues farther, admiring the Bigneſs of the Iſland, and called one Cape, *de Pedrey Hijo*, or *Father* and *Son*, and gave Names to *Puerto Sacro*, or the *Holy Harbour*, and *Cabo de Los Enamorades*, or the *Lovers Cape*. and coming up with it, he diſcovered a vaſt Bay, which was three Leagues in Breadth, and in the Midſt of it a ſmall Iſland. He ſtayed there to obſerve the Conjunction, which was to be on the 17th, and the Oppoſition of the Moon and Jupiter with Mercury, and the Sun in Oppoſition with Jupiter, which occaſions high Winds.

He ſent the Boat for Water, and they found ſome Men with Bows and Arrows. They bought a Bow and ſome Arrows, and deſired one of the *Indians* to go and ſpeak with the Admiral, to which he conſented. He aſked him for the *Caribes*, and he pointed that they were to the Eaſtward; and for Gold he pointed to the Iſland of *St. John*, ſaying, There was *Gunain*, that is, pale Gold with a purpliſh Caſt, which the *Indians* value very much. He ordered him ſomething to eat, and to give him two Bits of green and yellow Cloth, and ſome Glaſs Beads, and the Boat to ſet him aſhore. Thoſe who went with him found fifty-five naked *Indians* with long Hair, like the Women in *Spain*, Feathers, Bows, Arrows, Swords made of hard Palm Wood, and heavy Spears, with which they gave heavy Blows, lying in the Wood. Theſe *Indians* made them lay down their Arms, and then came to the Boat; where the *Spaniards* bought two Bows of them by the Admiral's Order, and were ſo far from ſelling any more, that they began to lay about, to ſeize the *Spaniards*, who being but ſeven, fell upon them, gave one a Cut upon the Buttocks, and another a Cut on the Breaſt; whereupon they fled, leaving their Arms behind, and many might have been killed, if they had purſued them. This was the firſt Time that the *Spaniards* and *Indians* came to Blows in this Iſland. The Admiral was ſorry for it, tho', on the other hand, it did not diſpleaſe him, that they might be ſenſible of the Weight of the *Spaniards* Hands.

On the 14th, in the Morning, Abundance of People appeared on Shore. The Admiral ordered the Boats-crew to be upon their Guard; but the *Indians* came as if nothing had happened, and among them the King of the Country, and the *Indians* that had been aboard the Caravel, whither the King came with three *Indians*. The Admiral ordered to give them Biſkets and Honey to eat, and gave them red Caps, Bits of Cloth, and Beads. The next Day the King ſent his Gold Crown and Proviſions: The Men were armed with Bows and Arrows, four Youths in Canoes came to the Caravel, and were Men of ſuch good Senſe, that the Admiral reſolved to carry them into *Spain*; they acquainted him with many Particulars, and from thence ſhewed him the Iſland of *St. John*. He ſailed from that Bay which he called *de las Flechas*, or of *Arrows*, on the 16th, and would not make any long Stay becauſe the Caravels were very leaky.

He advanced with the Wind at Weſt North weſt, and when he had ſailed 16 Leagues the *Indian* which he had aboard pointed to the Iſland of *St. John*, that of *Martinino* and the *Caribes*, where the *Indians* were that eat Men; and though he was willing to take a View of thoſe Iſlands, yet for fear of diſheartening the Men, the Wind freſhening, he ordered to ſteer directly for *Spain*; during ſeveral Days advancing ſucceſsfully, they ſaw many Sea-Gulls, and the Air was very drying, and they met with Abundance of Weeds, but being acquainted with it, they were not afraid: They killed a Tunny and a large Shark, which afforded them ſomething to eat, for they had nothing but Bread and Wine. The Caravel *Pinta* was no good Sailer, becauſe ſhe had little Benefit of her Mizen, by reaſon the Maſt was not good, and the Admiral being forced to lie by for her, they made little Way. Sometimes when there were Calms the *Indians* leaped into the Water, ſwam about and diverted themſelves; having ſailed ſeveral Days, changing their Courſe according to the Winds, they endeavoured to keep their Reckoning, and fancied they were to the Eaſtward of the Iſlands of *Azores*, becauſe they reckoned more Leagues than they really ſailed. Being quite miſtaken in the Way, they made to the Northward, ſo that inſtead of any of the *Azores*, they would more likely have fallen in with *Madera*, or *Puerto Santo*.

15. The Admiral, being more ſkilful at reckoning the Run, found 150 Leagues leſs than the others. On the 12th of *February* the Sea began to ſwell with great and dangerous Storms, and he drove moſt of the Night without any Sail; afterwards he put out a little Sail; the Waves broke and wracked the Ships. The next Morning the Wind ſlackened, but the very next Night it roſe again, which hindered the Ship's Way, ſo that he could not ſhift the Sails. The Admiral kept under a main Topſail reefed, only to bear up the Ship againſt the Waves, but, perceiving how dangerous it was, he let it run before the Wind, there being no other Remedy. Then the Caravel *Pinta* began to bear away, though the Admiral kept his Light abroad the whole Night, and the *Pinta* anſwered. The 14th of *February*, after Sun riſing, the Wind blew fiercer, and they were more afraid of periſhing, with the Trouble of believing that the Caravel *Pinta* was already loſt. The Admiral thinking himſelf near Death, to the End that ſome Knowledge might come to their Catholic Majeſties of what he had done in their Service, he writ as much as he could of what he had diſcovered on a Skin of Parchment, and having wrapped it up in a Piece of Cere-cloth, he put it into a wooden Caſk and caſt it into the Sea; all the Men imagining it had been ſome Piece of Devotion; and preſently the Wind ſlackened.

On the 15th he ſaw Land a-head, bearing from them Eaſt North-eaſt: Some ſaid it was the Iſland *Madera*, others, that it was the Rock *Cintra*, near *Liſbon*, but the Admiral always ſaid they were the Iſlands *Azores*, and they plied to and fro with much Labour, but could not come up with the Iſland of *St. Mary*. The Admiral's Legs being very uneaſy, becauſe he had been out in all the Rain and Cold, he ſlept little; and on the 18th came to an Anchor on the North-ſide of the Iſland, which they found to be *St. Mary*'s; preſently three Men made a waft to the Caravel; he ſent the Boat for them; they carried the Admiral Refreſhments of Bread and Fowl from the Governor, whoſe Name was Don *John de Caſtaneda*. On the 19th he ordered one half of the Men to go out in Proceſſion to an Hermitage there was near, to perform their Vow, and that when they returned he would go out with the other half; and deſired the *Portugueſe* to bring him a Clergyman to ſay Maſs. While they were at Prayers in their Shirts, the whole Town on Horſeback and on Foot, with their Commanders, fell upon and made them Priſoners.

They ſtaying vey long, the Admiral ſuſpecting, either that they were detained, or that the Boat was ſtaved, becauſe the Iſland was encloſed with Rocks, and becauſe he could not ſee the Hermitage, being covered by a Point of Land that runs into the Sea, he therefore brought the Caravel right before the Hermitage, and ſaw abundance of People come into the Boat, and make towards the Caravel. The Commander of the Iſland ſtood up and demanded Hoſtages, and though they were offered him, the *Portugueſe* would not venture his Perſon. The Admiral aſked him why he had ſent him Refreſhments and thoſe *Portugueſe* to invite him on Shore, and afterwards, notwithſtanding the two Nations of *Caſtile* and *Portugal* were at Peace, he had ſo baſely detained his Men, and that to convince him he was employed in the King of *Spain*'s Service, he would ſhew him his Commiſſion. The *Portugueſe* anſwered, We here know nothing of their Majeſties of *Caſtile*, nor their Commiſſion, nor do we fear them. Some other Words paſſed between them, and the *Portugueſe* bid him carry his Caravel to the Harbour, for all he had done was by the King's Order. The Admiral took Witneſs of what he ſaid, and anſwered: That if he did not reſtore him his Men and the Boat, he would carry away an hundred *Portugueſe* into *Spain*: This ſaid, he returned and anchored where he was before, becauſe the Wind blew freſh. He ordered the Caſk to be filled with Sea-water to ballaſt the Veſſel, and by reaſon of the foul Weather ſailed towards the Iſland of *St. Michael*, becauſe there are no good Harbours in thoſe Iſlands; and it is ſafeſt to keep out at Sea. He was in a great Storm all the Night, and having miſſed of the Iſland of *St. Michael*, he returned to that of *St. Mary*, and preſently the Boat came with two Clergymen and a Notary, and five Seamen; and upon Security given them they came aboard the Caravel, and required the Admiral to ſhew them the King of *Spain*'s Commiſſion, which he did, and they returned and releaſed his Men and the Boat; and the Commander ſaid he had Orders from the King of *Portugal* to ſeize the Admiral, and would give any thing to have him.

Having recovered his Men, and the Weather becoming fair, he ordered them to ſteer their Courſe Eaſt. The next Day came to the Ship a large Bird, which the Admiral judged to be an Eagle. On the 2d of *March* there was ſo great a Storm, that he ordered to caſt Lots for a Pilgrim to go to *St. Mary de Cinta en Guelva*, and the Lot fell upon the Admiral; ſo that it looked as if God had followed him, that he might humble himſelf, and not grow proud for the Mercies he had ſhewn him. They drove with all their Sails furled in the greateſt Danger, without Hopes of eſcaping; but it pleaſed God that they diſcovered the Land and Rock of *Cintra*; and to avoid the Storm he reſolved to put into the Harbour, not being able to ſtay at *Caſcaes*. He returned Thanks to God for his Delivery, and all admired how he had got into the Port, affirming they had ſcarce ſeen ſuch dreadful Storms. The King of *Portugal* was then at *Valparayſo*, to whom he writ, ſignifying that their Majeſties of *Spain*, his Sovereigns, had ordered him not to avoid entering his Highneſs's Ports, to get what he wanted with his Money, deſiring he would give him Leave to come up to *Liſbon* for more Security, and that his Highneſs might know he came not from *Guinea*, but from the *Indies*.

Bartholomew Diaz de Liſboa, Maſter of a Galeon, who was there in an armed Boat, went aboard the Caravel and ordered the Admiral to go up with him to give an Account of himſelf to the King's Officers and the Captain of the Galeon. *Columbus* anſwered, That he was Admiral in the Service of their Majeſties of *Spain*, and was not obliged to give any Man an Account of himſelf; nor would he go out of his Ship unleſs he was compelled by Force. The *Portugueſe* anſwered, he might ſend the Maſter of his Ship, but the Admiral would not ſend him neither; ſaying he would not do it unleſs compelled and could not reſiſt it, for he looked upon it much alike to ſend another or go himſelf; and that it was the Practice of the Admirals of the Kings of *Caſtile*, rather to die than deliver up themſelves or their Men. The *Portugueſe* Maſter replied, that ſince he was ſo reſolved, he might do as he pleaſed, but that he deſired he would condeſcend to ſhew him his Commiſſion from their Majeſties of *Spain*, if he had any ſuch: As ſoon as he had ſeen it, he returned to the Galeon and reported what had paſſed; and the Captain, whoſe Name was *Alvaro Daman*, went aboard the Admiral's Caravel with Drums, Trumpets, and Hautboys, and offered to ſerve him in whatſoever he ſhould command.

As ſoon as it was known at *Liſbon*, that the Admiral was come to *Liſbon* from the *Indies*, ſuch Numbers flocked to ſee him and the *Indians*, that it was wonderful to obſerve how they ſtood in Admiration. The next Day he received a Letter from the King of *Portugal*, by Don *Martin de Norbona* his Servant, by which he deſired him to come to him, which he was obliged to do to avoid ſhewing any Miſtruſt; he went and lay at *Sacavam*, where he was well entertained; and the King had given Orders that they ſhould give him all he had Occaſion for at *Liſbon*, without Money. The next Day he came to the Place where the King was, and the Gentlemen of the Houſhold came out to receive him, and bore him Company to the Palace. The King received him with much

Honour, bid him ſit, and after having expreſſed much Satisfaction for the Succeſs of his Voyage, and aſked ſome Particulars about it; he ſaid he was of Opinion, that according to the Articles ſtipulated with the Kings of *Caſtile*, the Conqueſt rather belonged to the Kings of *Portugal*, than to thoſe of *Caſtile*. He anſwered he had not ſeen thoſe Articles, nor knew any more than that their Highneſſes had commanded him not to go to *Del Mina* or to *Guinea*, and that the ſame had been proclaimed in all the Ports of *Andaluzia* before he ſet out upon his Voyage.

The King graciouſly anſwered, he believed he would not ſtand in need of Vouchers in that Particular; he then ordered the Prior of *Crato* to entertain him, he being the principal Perſon preſent. The next Day the King told him that if he wanted any thing he ſhould have it; and making him ſit, aſked him many Queſtions concerning the Voyage, the New Countries, the Latitudes, and the People, and other Things relating to thoſe Parts, being much concerned for having miſſed of that good Fortune; and there wanted not ſome who offered the King to kill the Admiral, that what he had diſcovered might not be known, but he would not conſent to it. At length, on the 11th of *March*, the Admiral took his Leave of the King, and all the Gentlemen of the Court attended him. He paſſed through *Villa Franca*, where the Queen was in the Monaſtery of *St. Anthony*; he kiſſed her Hands, and having given her an Account of his Voyage, departed; and a Servant of the King's overtook him, and told him from his Majeſty, that if he would go into *Caſtile* by Land, he would order him to be attended, find him Carriage, and all that he had occaſion for.

On the 13th he ſailed with his Caravel for *Seville*, and found himſelf the 16th off *Saltes*; and, at Noon, he paſſed over the Bar with the Flood into the Port from whence he at firſt departed, on *Friday* the 3d of *Auguſt*, the Year before; ſo that he ſpent ſix Months and an half in the Voyage. Being informed their Catholic Majeſties were at *Barcelona*, he had Thoughts of going to them by Sea in his Caravel. He landed at *Palos*; was received with a ſolemn Proceſſion and much rejoicing of the whole Town, all admiring ſo great an Action, which they never imagined the Admiral could have performed. The Admiral having reſolved not to go by Sea to *Barcelona*, ſent Advices of his Arrival to their Catholic Majeſties, with a Summary of what had befallen him, reſerving a more ample Relation to be delivered by Word of Mouth. The Anſwer found him at *Seville*: The Superſcription of the Letter was, *To Don* Chriſtopher Columbus, *our Admiral of the Ocean*; *Viceroy and Governor of the Iſlands that have been diſcovered in the* Indies. In his Anſwer he ſent a Memorial of the Ships, Men, Ammunition, and Proviſion that were proper to return to the *Indies*, and then ſet out himſelf for *Barcelona* with ſeven *Indians*, for the reſt died by the Way: He carried with him green and red Parrots, and other Things never before ſeen in *Spain*. He ſet out from *Seville*, and the Fame of this Novelty being ſpread abroad, the People flocked to the Roads to ſee the *Indians* and the Admiral.

Their Majeſties having received the Memorial, ordered *John Roderiguez de Fonceca*, Arch-deacon of *Seville*, to furniſh what the Admiral thought fit for the ſecond Voyage he was to make to the *Indies*. The Admiral arrived at *Barcelona* about the Middle of *April*, where the whole Court and City flocking out, the Streets could not hold them, admiring to ſee the Admiral, the *Indians*, and the Things he brought, which were carried uncovered; and the more to honour the Admiral, their Majeſties ordered their royal Throne to be placed in public, where they ſat, and with them Prince *John*. The Admiral came in attended by many Gentlemen; when he came near, the King ſtood up, gave him his Hand to kiſs, bid him riſe, ordered a Chair to be brought him, and to ſit down in the Royal Preſence, where he gave an Account in a very ſedate and diſcreet manner, of the Mercy God had ſhewn him in Favour of their Highneſſes, of his Voyage and Diſcoveries, and the Hopes he had conceived of diſcovering greater Countries; and ſhewed him the *Indians* as they went in their own native Countries, and the other Things he had brought. Their Majeſties roſe, and kneeling down, with their Hands lifted up, and Tears in their Eyes, returned Thanks to God; and then the Choiriſters of the Chapel began the *Te Deum*.

The Articles formerly concluded with the Admiral were only in Form of a Contract; and as he had performed what he promiſed, their Majeſties alſo, in the uſual Form, paſſed Grants, making good what they had offered him in the Town of *Santa Fee*, on the 17th of *April* of the foregoing Year: And the Charters were paſſed at *Barcelona* on the 30th of the ſame Month in the ſucceeding Year 1493, and ſigned by their Highneſſes on the 28th of *May*. They alſo gave him the Royal Arms of *Caſtile* and *Leon*, to bear with thoſe of his Family, with other Additions expreſſing his difficult and wonderful Diſcovery. And their Majeſties conferred ſome Honours on his Brothers, Don *Bartholomew* and Don *James*, tho' they were not then at Court. The King took the Admiral by his Side, when he went through the City of *Barcelona*, and did him much Honour other ways, and therefore all the Grandees and other Noblemen honoured and invited him to Dinner, and the Cardinal of *Spain*, Don *Pedro Gonzalez de Mendoza*, a Prince of much Virtue, and a noble Spirit, was the firſt Grandee that, as they were going one Day from the Palace, carried the Admiral to dine with him, and placed him at the Head of the Table, and cauſed his Meat to be ſerved up uncovered, and the Eſſay to be taken, and from that Time forward he was ſerved in that manner.

17. We have given the Hiſtory of this Voyage largely, and in a manner literally, from one of the beſt *Spaniſh* Hiſtorians, the rather becauſe we eſteem it ſingle in its kind, both with reſpect to the Matter and the Manner of it, for the Diſcoveries hitherto made by the *Portugueſe* were chiefly by creeping along Shore, and rather the Effects of Labour and Induſtry than of great Conduct, or an enterprizing Genius; and the Diſcoveries that were made afterwards, had not only this Example but the Advantage alſo of all the Improvements which the great Skill, conſtant Affection, and wonderful Penetration of *Columbus*, enabled him to make in his own Art; ſo that Navigation grew in his Time quite another Thing than he found it. In this Voyage the Reader will perceive that abundance of very trivial Accidents are very carefully recorded, which we have preſerved, becauſe taken from *Columbus*'s own Journal, and becauſe they ſhew how much he attended to, and what excellent Uſes he made even of the moſt minute Circumſtances, in order to keep up the Spirits of his Men, and to direct himſelf in the Proſecution of ſo hardy an Attempt, in which his Succeſs depended intirely upon the Sagacity he ſhewed in thoſe Obſervations, which therefore, however light and trivial they may ſeem to us, were of great Importance to him, and ſerve to ſhew by what light Helps Men of true Genius are able to execute the moſt difficult Enterprizes.

But there is one Obſervation of his which deſerves to be particularly conſidered, and that is, as to the Variation of the Compaſs, which I find expreſly ſet down by all the *Spaniſh* Writers of note, but more eſpecially by *Herrera*, a very careful and judicious Author, and one who rarely took Things upon Truſt; as well as by Don *Ferdinand Columbus*, the Admiral's Son, who profeſſes that he wrote from his Father's Papers. Upon theſe Grounds I make no Scruple of believing the Fact, and very much wonder that ſo knowing a Man as Sir *Thomas Browne*, in his *Vulgar Errors*, ſhould poſitively aſſert, that *Columbus* was ignorant of the Variation, and that if he had obſerved it in his firſt Voyage, it muſt have confirmed him in his Hopes of finding a new World; becauſe, ſince it turned towards the Weſt, it manifeſtly proved, that there was a great Body of Land on that Side. This ſhews the great Danger of Theories; for, without doubt, if *Columbus* had depended upon this, he might have been miſtaken, ſince ſailing along the Coaſt of *Braſil* the Needle declines from the Land towards the Sea, which is a Fact that fully overturns that Hypotheſis which Sir *Thomas Browne* looked upon as certain: But the Truth of the Matter is, that not only *Columbus* obſerved the Variation, but his Pilots alſo; and from thence they argued, not that they were near any other Land, but that they were in Danger of loſing the beſt Guide they had, *viz.* the Certainty of the Compaſs; and therefore *Columbus* was forced to tell them, that the Reaſon why the Needle varied a whole Point to the North-weſt was, becauſe the Star by which they diſcerned this Variation, took a Compaſs about the Pole, which gave them Satisfaction, tho' it could not give it him, who knew better than to take up with ſuch an Opinion. This Turn, however, ſhews the Wiſdom and good Senſe of this great Navigator, who knew how to diſcover the Cauſe of moſt Things, and when he was at a Loſs for a Cauſe, to invent ſomething that looked like one, in order to pacify thoſe whoſe Fears were the conſtant Effects of their Ignorance.

It was this Talent of his that enabled him to maintain his Authority amongſt ſuch a Crew of wild and unruly Spirits, and put it in his Power to complete that Diſcovery which his great Parts had ſuggeſted to him. To ſay the Truth, conſider him in what Light one will, as a Philoſopher, a Seaman, a Commander in chief, a Governor, or a Legiſlator, he was alike great in all; and had that kind of Superiority of Mind which ſet him above thoſe Events which common People, for want of a better Expreſſion, call the Frowns of Fortune. He was not diſtracted in his Thoughts when his Companions deſpaired of ever ſeeing Land more; nor was he elevated by that ſudden Turn of their Affections when they diſcovered the firſt Iſland; he knew how to pacify them when mutinous, and he knew likewiſe how to make a right Uſe of this ſudden Return to their Obedience; his Behaviour towards the *Indians* was like a Father and a Friend; and it was this Magnanimity of his that induced thoſe honeſt and ſimple People to believe that he and his Companions came from Heaven, and made them ſo deſirous of their Company.

Neither are we to attribute his earneſt and conſtant Search after Gold to any Self-Intereſt, or Principle of Avarice; but to the earneſt Deſire he had of ſhewing that, by this Voyage, he had not only diſcovered new Countries, but Countries in which this precious Metal was found in Abundance, which in thoſe Days paſſed for a Characteriſtic of the *Indies*. The ſame Notion made him liſten with equal Attention to another Diſcovery, that one of his Commanders believed he had made of Rhubarb; which would have been a ſtronger Proof; for all that came of that Drug into *Europe*, in thoſe Days, was by the Way of *Alexandria*, and was therefore believed to come from the *Indies*, as indeed it did, tho' it grows chiefly in *Tartary*, and in thoſe deſart Countries, which, from the Frontiers of *Perſia*, extend quite to *China*.

He ſhewed a becoming Spirit on his Arrival in the Harbour of *Liſbon*, and, in all probability, it was that Spirit that defended him from the Inſults and Injuries that might have been offered him; for there wanted not ſome amongſt the Nobility of *Portugal*, who ſuggeſted that this Diſcovery was to the Prejudice of their Country, and ſo poſſeſſed their Sovereign's Mind with this Notion, that he actually formed Pretenſions to thoſe Countries, notwithſtanding he had relinquiſhed all colour of Right to them, by rejecting the Propoſals of *Columbus* when offered to him at firſt, and before he had made any Overtures to the Court of *Spain*. The ſame Greatneſs of Soul diſtinguiſhed the Admiral in his Audience of their Catholic Majeſties, in which he neither overvalued his Merit, nor boaſted of more than he had performed; but ſtated the Thing truly, and laid open the Conſequences fairly, with that Penetration and Sagacity peculiar to himſelf.

This it was that determined their Catholic Majeſties to ſend him again with a ſtronger Squadron, and better equipped, to perfect thoſe Diſcoveries. He was then in the Zenith of his Favour and of his Reputation; for tho' he did greater Things afterwards, or at leaſt ſuch as redounded more to the Advantage of *Spain*, yet theſe were ſo far from raiſing him higher in Eſteem, that, on the contrary, when others had made Voyages to the New World, not the Vulgar only, but ſome even of Quality and Figure, affected to leſſen his Credit, and to treat that as a ſlight and eaſy Matter, which themſelves had formerly repreſented, not as difficult only, but impracticable. But theſe Turns and Changes in other Men wrought none at all in him, and it is very remarkable, that the Inſtructions he gave for the Preparations of his Second Voyage were ſo perfectly well adapted as exactly to anſwer the End of his Deſign, as will appear in the ſubſequent Section, in which we ſhall give the Reader a full and diſtinct Relation of that Voyage, tho' in fewer Words than were uſed in the Narration of the Firſt, as well to avoid needleſs Repetitions, as that we may keep within the Bounds originally aſſigned to this Work.

SECTION III.

The Second Voyage of the Admiral Don CHRISTOPHER COLUMBUS, *to the* Weſt Indies, *including an Account of all the Diſcoveries made by him in that Voyage.*

1. *The Meaſures taken by their Catholic Majeſties to ſecure their Properties in the firſt Diſcoveries made by their Admiral, and the Terms on which he ſailed a ſecond Time from* Spain. 2. *His ſafe Arrival in the* Weſt Indies, *and the Information he received from the Natives as to the State of that Part of the World.* 3. *The Admiral continues his Voyage to the Iſland of* Hiſpaniola, *finds the Colony ruined, and the Spaniards he had left behind deſtroyed by their own Folly.* 4. *The Pains he took to put Things once more into a good Condition; a Mutiny againſt him, and the Manner of his Proceeding after it was quelled.* 5. *He proceeds to diſcover the inland Parts of the Country, to ſecure the Gold Mines, and to make an abſolute Conqueſt of* Hiſpaniola *for the Uſe of their Catholic Majeſties.* 6. *The Admiral having put all Things in order, reſolves to leave his Brother Governor of* Hiſpaniola, *and to ſail again upon Diſcovery, which he performs accordingly.* 7. *The Conſequences of that Voyage, the Diſcoveries made therein, particularly that of* Jamaica, *and the Hardſhips endured by the Admiral and his People.* 8. *His Return to* Hiſpaniola, *the Condition in which he found Things there, and the Regulations made by him for ſecuring and promoting the Settlement.* 9. *The Grounds of thoſe Jealouſies and Uneaſineſſes which diſturbed the Admiral, and induced him to reſolve upon returning back again to* Spain. 10. *An Account of his ſecond Return from the* Indies, *and of the Reception he met with from their Catholic Majeſties.* 11. *Remarks and Obſervations on the foregoing Section.*

1. THE more the Diſcoveries made by Don *Chriſtopher Columbus* were canvaſſed by the *Spaniſh* Council, the more important they appeared; and therefore to ſtrengthen their Title in the beſt Manner poſſible, their Catholic Majeſties diſpatched an Ambaſſador to the Pope, who was at that Time *Alexander* VI. requeſting him to exert his Apoſtolic Authority in their Favour, and by his Bulls confirm to them thoſe Countries, Iſlands, &c. which their Admiral had diſcovered. This his Holineſs moſt readily complied with, and indeed it coſt him little; and by his Bull, dated *May* 2, 1493, granted the ſaid Diſcoveries to them as fully as the Diſcoveries made

by the *Portugueſe* had been granted to the Crown of *Portugal*; and by another Bull dated the next Day, granted their Catholic Majeſties all that had been, or ſhould be, diſcovered, drawing a Line from Pole to Pole, at the Diſtance of 100 Leagues Weſtward from the *Azores*, or from the Cape *de Verd* Iſlands. As ſoon as theſe Bulls, whether important or impertinent we need not ſtay to determine, were once arrived from *Rome*, their Catholic Majeſties were very deſirous the Admiral ſhould ſail on his ſecond Voyage, for which reaſon they haſtened him away to *Seville*, where he found another Sort of a Fleet prepared than he had commanded in his firſt Voyage. For now there were ſeventeen Sail of Ships of ſeveral Sizes; and no leſs than fifteen hundred Men, many of them Gentlemen of good Families, offered to go over, and took an Oath of Obedience, not only to their Catholic Majeſties, but to the Admiral Don *Chriſtopher Columbus* likewiſe.

Theſe Preparations, which could not be concealed from the King of *Portugal*, raiſed great Uneaſineſs at that Court, which was not to be quieted by the Pope's Bulls, his *Portugueſe* Majeſty apprehending that they were founded on undue Suggeſtions, and himſelf and his Subjects thereby much wronged. This he reſolved to expoſtulate with their Catholic Majeſties, and named an Ambaſſador for that Purpoſe; but they, having Intelligence of his Proceedings, ſent an Ambaſſador to him under Colour of juſtifying the Meaſures they had taken; but, in Reality, to patch up Matters in any Manner, ſo as to hinder that Monarch from obſtructing *Columbus* in his ſecond Voyage. In the mean Time the Admiral being come to *Seville*, and having received with his laſt Diſpatches his Commiſſion, ſetting forth the Limits of his Government, which extended over all that the Apoſtolical Conceſſion extended to; and having left his two Sons, Don *James* and Don *Ferdinand*, to be Pages to Prince *John*, he applied himſelf to pick out the ableſt Pilots, and in muſtering the Men that had been raiſed in the Preſence of the Comptroller. For the ſake of Diſcipline, all Perſons were forbid carrying any Goods, and it was ordered, that all belonging to his Highneſs, and to private Men, ſhould be entered before they left *Spain*, and the ſame to be done when they arrived in the *Indies*; and that all that ſhould appear not to have been ſo entered, ſhould be confiſcated. The Admiral was ordered, as ſoon as he came to *Hiſpaniola*, to muſter the Men, and after that, as often as he ſhould think fit; and that they ſhould be paid by his Direction; and that he ſhould appoint Alcades and Alguazils in the Iſlands, and other Parts, to try civil and criminal Cauſes, and the Appeals from them to be to him, and that in Caſe it was requiſite to appoint Regidores, Jurats, and Officers for the Government of the People, or of any Colony that ſhould be planted, the Admiral ſhould nominate three Perſons to every Employment, for their Highneſſes to chooſe one of them, but that the firſt Time he might name them. That all Proclamations ſhould be in the Names of their Highneſſes; that he ſhould have the eighth Part of all that was gained, paying the eighth Part of all that was carried over, firſt deducting the tenth Part he was to have of the whole, purſuant to the Contract made; and that if it were requiſite to ſend Ships and Men to any Parts, he might do it.

Whilſt the Admiral was at *Seville* expediting his Affairs, he received a Letter from their Majeſties, dated at *Barcelona*, directing him, before his Departure, to cauſe a Sea-chart to be drawn with the Rhumbs and other Particulars requiſite for the Voyage to the *Indies*, and to haſten his Departure, ſtill promiſing him mighty Rewards, becauſe that Affair of the Diſcovery daily appeared to be of ſo great Conſequence; acquainting him that nothing was yet concluded with the King of *Portugal*, though it was believed he would be brought to Reaſon. The Admiral cauſed many Plants and Trees to be put aboard, and Wheat, Barley, Oats, Rye, and all Sorts of Seeds, as alſo Cows, Lime, Bricks, and all Sorts of Materials for building; and having embarked the Men, on the 25th of *September*, 1493, before Sun-riſing, ſailed from the Bay of *Cadiz*: He ſteered South-weſt for the *Canaries*, and arrived at *Grand Canaria* on the 2d of *October*, and on the 5th anchored at *Gomera*, where he ſtayed two Days, taking in Water, Wood, and Cattle, and eight Sows at the Rate of Seventy Marvedies a-head, from which afterwards were produced all that have been ſince in the *Indies*. They alſo took in Hens and other Creatures, as alſo Seeds for Sallading, and all other Sorts of Garden-ſtuff.

On the 7th of *October* the Admiral continued his Voyage towards the *Indies*, having firſt delivered Inſtructions, ſealed, to every Ship, commanding them not to open them unleſs they were ſeparated from him by Streſs of Weather; for as in thoſe Letters he gave an Account of the Courſe they were to ſteer, to come to the Town of the *Nativity*, in *Hiſpaniola*, he would not have that Courſe known to any unleſs neceſſary. Thus ſailing with a fair Gale till the 24th, when being 400 Leagues Weſt of *Gomera*, he yet met with none of the Weeds he had ſeen the firſt Voyage, when he was out but 250 Leagues, to the great Aſtoniſhment of them all. That Day and the next a Swallow flew about the Fleet. On *Saturday*, at Night, the Corps of *St. Elmo* was ſeen, with ſeven Lights, on the round Top, and there followed mighty Rains, and frightful Thunder. On the 2d of *November*, at Night, the Admiral, perceiving a great Alteration in the Sky and Winds, and taking notice of the heavy Rains, concluded that he was near ſome Land, and for this Reaſon cauſed moſt of the Sails to be furled; and ordered all to be upon the Watch, not without Cauſe, for that Night they ſpied Land ſeven Leagues to the Weſtward, which was a very high mountainous Iſland, and he called it *Dominica*, becauſe diſcovered upon *Sunday* Morning. A while after he diſcovered another Iſland North-eaſt of *Dominica*, and then another, and a third after that, more to the Northward, for which Mercy God had been pleaſed to beſtow upon them, all the Men aſſembling in the Poop, ſung the *Salve Regina* and other Prayers, and Hymns, very devoutly giving Thanks to God, for that, in twenty Days after departing from *Gomera*, they had made that Land; judging the Diſtance to be about 750 or 800 Leagues; and finding no convenient Place to come to an Anchor on the Eaſt-ſide of the Iſland *Dominica*, they ſtood over to another Iſland which the Admiral called *Marigalante*, that being his Ship's Name. Here landing, he with all neceſſary Solemnity again repeated the Poſſeſſion he had in his firſt Voyage taken of all the Iſlands and Continents of the *Weſt Indies*, for their Catholic Majeſties.

On the 4th the Admiral failed from the Iſland *Marigalante* Northwards, by another great Iſland he called *Sta. Maria Guadalupe*, at the Requeſt of the Friars of the Houſe of that Name, to whom he had made a Promiſe to call ſome Iſland by the Name of their Monaſtery; before he came to it, by two Leagues Diſtance, they diſcovered a very high Rock, ending in a Point, whence iſſued a Stream of Water, which falling, made ſuch a Noiſe that it was heard aboard of the Ships, though many affirmed that it was only a white Vein in the Rock; the Water was ſo white and frothy by reaſon of its Fall. Going aſhore in the Boat to view a Sort of a Town they ſaw from the Shore, they found no body there, the People being fled to the Woods, except ſome Children, to whoſe Arms they tied ſome Baubles to pleaſe their Parents when they returned; in the Houſes they found Geeſe and abundance of Parrots with red, green, blue, and white Feathers, as big as common Cocks; they alſo found Pompions, and a ſort of Fruit which look like our green Pine-apples, but much bigger, and within full of ſolid Meat like a Melon, and much ſweeter both in Taſte and Smell, which grow on long Sticks like Aloes wild about the Fields, and are better than thoſe produced by Art. They alſo ſaw other Sorts of Fruits and Herbs, different from ours, Beds of Cotton Nets, that is, Hamocks, Bows and Arrows, and other Things of which they took none, that the *Indians* might be the leſs afraid of the Chriſtians. The next Day, which was the 5th of *November*, the Admiral again ſent two Boats aſhore to endeavour to take ſome body that might give an Account of the Country, and inform him how far off, and which Way *Hiſpaniola* lay; each of the Boats brought back a Youth, who agreed in ſaying they were not of that Iſland, but near any other Land, but that they were in Danger of loſing the beſt Guide they had, *viz.* the Certainty of the Compaſs; and therefore *Columbus* was forced to tell them, that the Reaſon why the Needle varied a whole Point to the North-weſt was, becauſe the Star by which they diſcerned this Variation, took a Compaſs about the Pole, which gave them Satisfaction, tho' it could not give it him, who knew better than to take up with ſuch an Opinion. This Turn, however, ſhews the Wiſdom and good Senſe of this great Navigator, who knew how to diſcover the Cauſe of moſt Things, and when he was at a Loſs for a Cauſe, to invent ſomething that looked like one, in order to pacify thoſe whoſe Fears were the conſtant Effects of their Ignorance.

It was this Talent of his that enabled him to maintain his Authority amongſt ſuch a Crew of wild and unruly Spirits, and put it in his Power to complete that Diſcovery which his great Parts had ſuggeſted to him. To ſay the Truth, conſider him in what Light one will, as a Philoſopher, a Seaman, a Commander in chief, a Governor, or a Legiſlator, he was alike great in all; and had that kind of Superiority of Mind which ſet him above thoſe Events which common People, for want of a better Expreſſion, call the Frowns of Fortune. He was not diſtracted in his Thoughts when his Companions deſpaired of ever ſeeing Land more; nor was he elevated by that ſudden Turn of their Affections when they diſcovered the firſt Iſland; he knew how to pacify them when mutinous, and he knew likewiſe how to make a right Uſe of this ſudden Return to their Obedience; his Behaviour towards the *Indians* was like a Father and a Friend; and it was this Magnanimity of his that induced thoſe honeſt and ſimple People to believe that he and his Companions came from Heaven, and made them ſo deſirous of their Company.

Neither are we to attribute his earneſt and conſtant Search after Gold to any Self-Intereſt, or Principle of Avarice; but to the earneſt Deſire he had of ſhewing that, by this Voyage, he had not only diſcovered new Countries, but Countries in which this precious Metal was found in Abundance, which in thoſe Days paſſed for a Characteriſtic of the *Indies.* The ſame Notion made him liſten with equal Attention to another Diſcovery, that one of his Commanders believed he had made of Rhubarb; which would have been a ſtronger Proof; for all that came of that Drug into *Europe,* in thoſe Days, was by the Way of *Alexandria,* and was therefore believed to come from the *Indies,* as indeed it did, tho' it grows chiefly in *Tartary,* and in thoſe deſart Countries, which, from the Frontiers of *Perſia,* extend quite to *China.*

He ſhewed a becoming Spirit on his Arrival in the Harbour of *Liſbon,* and, in all probability, it was that Spirit that defended him from the Inſults and Injuries that might have been offered him; for there wanted not ſome amongſt the Nobility of *Portugal,* who ſuggeſted that this Diſcovery was to the Prejudice of their Country, and ſo poſſeſſed their Sovereign's Mind with this Notion, that he actually formed Pretenſions to thoſe Countries, notwithſtanding he had relinquiſhed all colour of Right to them, by rejecting the Propoſals of *Columbus* when offered to him at firſt, and before he had made any Overtures to the Court of *Spain.* The ſame Greatneſs of Soul diſtinguiſhed the Admiral in his Audience of their Catholic Majeſties, in which he neither overvalued his Merit, nor boaſted of more than he had performed; but ſtated the Thing truly, and laid open the Conſequences fairly, with that Penetration and Sagacity peculiar to himſelf.

This it was that determined their Catholic Majeſties to ſend him again with a ſtronger Squadron, and better equipped, to perfect thoſe Diſcoveries. He was then in the Zenith of his Favour and of his Reputation; for tho' he did greater Things afterwards, or at leaſt ſuch as redounded more to the Advantage of *Spain,* yet theſe were ſo far from raiſing him higher in Eſteem, that, on the contrary, when others had made Voyages to the New World, not the Vulgar only, but ſome even of Quality and Figure, affected to leſſen his Credit, and to treat that as a ſlight and eaſy Matter, which themſelves had formerly repreſented, not as difficult only, but impracticable. But theſe Turns and Changes in other Men wrought none at all in him, and it is very remarkable, that the Inſtructions he gave for the Preparations of his Second Voyage were ſo perfectly well adapted as exactly to anſwer the End of his Deſign, as will appear in the ſubſequent Section, in which we ſhall give the Reader a full and diſtinct Relation of that Voyage, tho' in fewer Words than were uſed in the Narration of the Firſt, as well to avoid needleſs Repetitions, as that we may keep within the Bounds originally aſſigned to this Work.

SECTION III.

The Second Voyage of the Admiral Don CHRISTOPHER COLUMBUS, *to the* Weſt Indies, *including an Account of all the Diſcoveries made by him in that Voyage.*

1. *The Meaſures taken by their Catholic Majeſties to ſecure their Properties in the firſt Diſcoveries made by their Admiral, and the Terms on which he ſailed a ſecond Time from* Spain. 2. *His ſafe Arrival in the* Weſt Indies, *and the Information he received from the Natives as to the State of that Part of the World.* 3. *The Admiral continues his Voyage to the Iſland of* Hiſpaniola, *finds the Colony ruined, and the Spaniards he had left behind deſtroyed by their own Folly.* 4. *The Pains he took to put Things once more into a good Condition; a Mutiny againſt him, and the Manner of his Proceeding after it was quelled.* 5. *He proceeds to diſcover the inland Parts of the Country, to ſecure the Gold Mines, and to make an abſolute Conqueſt of* Hiſpaniola *for the Uſe of their Catholic Majeſties.* 6. *The Admiral having put all Things in order, reſolves to leave his Brother Governor of* Hiſpaniola, *and to ſail again upon Diſcovery, which he performs accordingly.* 7. *The Conſequences of that Voyage, the Diſcoveries made therein, particularly that of* Jamaica, *and the Hardſhips endured by the Admiral and his People.* 8. *His Return to* Hiſpaniola, *the Condition in which he found Things there, and the Regulations made by him for ſecuring and promoting the Settlement.* 9. *The Grounds of thoſe Jealouſies and Uneaſineſſes which diſturbed the Admiral, and induced him to reſolve upon returning back again to* Spain. 10. *An Account of his ſecond Return from the* Indies, *and of the Reception he met with from their Catholic Majeſties.* 11. *Remarks and Obſervations on the foregoing Section.*

1. THE more the Diſcoveries made by Don *Chriſtopher Columbus* were canvaſſed by the *Spaniſh* Council, the more important they appeared; and therefore to ſtrengthen their Title in the beſt Manner poſſible, their Catholic Majeſties diſpatched an Ambaſſador to the Pope, who was at that Time *Alexander* VI. requeſting him to exert his Apoſtolic Authority in their Favour, and by his Bulls confirm to them thoſe Countries, Iſlands, *&c.* which their Admiral had diſcovered. This his Holineſs moſt readily complied with, and indeed it coſt him little; and by his Bull, dated *May* 2, 1493, granted the ſaid Diſcoveries to them as fully as the Diſcoveries made

by the *Portugueſe* had been granted to the Crown of *Portugal*; and by another Bull dated the next Day, granted their Catholic Majeſties all that had been, or ſhould be, diſcovered, drawing a Line from Pole to Pole, at the Diſtance of 100 Leagues Weſtward from the *Azores*, or from the Cape *de Verd* Iſlands. As ſoon as theſe Bulls, whether important or impertinent we need not ſtay to determine, were once arrived from *Rome*, their Catholic Majeſties were very deſirous the Admiral ſhould ſail on his ſecond Voyage, for which reaſon they haſtened him away to *Seville*, where he found another Sort of a Fleet prepared than he had commanded in his firſt Voyage. For now there were ſeventeen Sail of Ships of ſeveral Sizes; and no leſs than fifteen hundred Men, many of them Gentlemen of good Families, offered to go over, and took an Oath of Obedience, not only to their Catholic Majeſties, but to the Admiral Don *Chriſtopher Columbus* likewiſe.

Theſe Preparations, which could not be concealed from the King of *Portugal*, raiſed great Uneaſineſs at that Court, which was not to be quieted by the Pope's Bulls, his *Portugueſe* Majeſty apprehending that they were founded on undue Suggeſtions, and himſelf and his Subjects thereby much wronged. This he reſolved to expoſtulate with their Catholic Majeſties, and named an Ambaſſador for that Purpoſe; but they, having Intelligence of his Proceedings, ſent an Ambaſſador to him under Colour of juſtifying the Meaſures they had taken; but, in Reality, to patch up Matters in any Manner, ſo as to hinder that Monarch from obſtructing *Columbus* in his ſecond Voyage. In the mean Time the Admiral being come to *Seville*, and having received with his laſt Diſpatches his Commiſſion, ſetting forth the Limits of his Government, which extended over all that the Apoſtolical Conceſſion extended to; and having left his two Sons, Don *James* and Don *Ferdinand*, to be Pages to Prince *John*, he applied himſelf to pick out the ableſt Pilots, and in muſtering the Men that had been raiſed in the Preſence of the Comptroller. For the ſake of Diſcipline, all Perſons were forbid carrying any Goods, and it was ordered, that all belonging to his Highneſs, and to private Men, ſhould be entered before they left *Spain*, and the ſame to be done when they arrived in the *Indies*; and that all that ſhould appear not to have been ſo entered, ſhould be confiſcated. The Admiral was ordered, as ſoon as he came to *Hiſpaniola*, to muſter the Men, and after that, as often as he ſhould think fit; and that they ſhould be paid by his Direction; and that he ſhould appoint Alcades and Alguazils in the Iſlands, and other Parts, to try civil and criminal Cauſes, and the Appeals from them to be to him, and that in Caſe it was requiſite to appoint Regidores, Jurats, and Officers for the Government of the People, or of any Colony that ſhould be planted, the Admiral ſhould nominate three Perſons to every Employment, for their Highneſſes to chooſe one of them, but that the firſt Time he might name them. That all Proclamations ſhould be in the Names of their Highneſſes; that he ſhould have the eighth Part of all that was gained, paying the eighth Part of all that was carried over, firſt deducting the tenth Part he was to have of the whole, purſuant to the Contract made; and that if it were requiſite to ſend Ships and Men to any Parts, he might do it.

Whilſt the Admiral was at *Seville* expediting his Affairs, he received a Letter from their Majeſties, dated at *Barcelona*, directing him, before his Departure, to cauſe a Sea-chart to be drawn with the Rhumbs and other Particulars requiſite for the Voyage to the *Indies*, and to haſten his Departure, ſtill promiſing him mighty Rewards, becauſe that Affair of the Diſcovery daily appeared to be of ſo great Conſequence; acquainting him that nothing was yet concluded with the King of *Portugal*, though it was believed he would be brought to Reaſon. The Admiral cauſed many Plants and Trees to be put aboard, and Wheat, Barley, Oats, Rye, and all Sorts of Seeds, as alſo Cows, Lime, Bricks, and all Sorts of Materials for building; and having embarked the Men, on the 25th of *September*, 1493, before Sun-riſing, ſailed from the Bay of *Cadiz*: He ſteered South-weſt for the *Canaries*, and arrived at *Grand Canaria* on the 2d of *October*, and on the 5th anchored at *Gomera*, where he ſtayed two Days, taking in Water, Wood, and Cattle, and eight Sows at the Rate of Seventy Marvedies a-head, from which afterwards were produced all that have been ſince in the *Indies*. They alſo took in Hens and other Creatures, as alſo Seeds for Sallading, and all other Sorts of Garden-ſtuff.

On the 7th of *October* the Admiral continued his Voyage towards the *Indies*, having firſt delivered Inſtructions, ſealed, to every Ship, commanding them not to open them unleſs they were ſeparated from him by Streſs of Weather; for as in thoſe Letters he gave an Account of the Courſe they were to ſteer, to come to the Town of the *Nativity*, in *Hiſpaniola*, he would not have that Courſe known to any unleſs neceſſary. Thus ſailing with a fair Gale till the 24th, when being 400 Leagues Weſt of *Gomera*, he yet met with none of the Weeds he had ſeen the firſt Voyage, when he was out but 250 Leagues, to the great Aſtoniſhment of them all. That Day and the next a Swallow flew about the Fleet. On *Saturday*, at Night, the Corps of *St. Elmo* was ſeen, with ſeven Lights, on the round Top, and there followed mighty Rains, and frightful Thunder. On the 2d of *November*, at Night, the Admiral, perceiving a great Alteration in the Sky and Winds, and taking notice of the heavy Rains, concluded that he was near ſome Land, and for this Reaſon cauſed moſt of the Sails to be furled; and ordered all to be upon the Watch, not without Cauſe, for that Night they ſpied Land ſeven Leagues to the Weſtward, which was a very high mountainous Iſland, and he called it *Dominica*, becauſe diſcovered upon *Sunday* Morning. A while after he diſcovered another Iſland North-eaſt of *Dominica*, and then another, and a third after that, more to the Northward, for which Mercy God had been pleaſed to beſtow upon them, all the Men aſſembling in the Poop, ſung the *Salve Regina* and other Prayers, and Hymns, very devoutly giving Thanks to God, for that, in twenty Days after departing from *Gomera*, they had made that Land; judging the Diſtance to be about 750 or 800 Leagues; and finding no convenient Place to come to an Anchor on the Eaſt-ſide of the Iſland *Dominica*, they ſtood over to another Iſland which the Admiral called *Marigalante*, that being his Ship's Name. Here landing, he with all neceſſary Solemnity again repeated the Poſſeſſion he had in his firſt Voyage taken of all the Iſlands and Continents of the *Weſt Indies*, for their Catholic Majeſties.

On the 4th the Admiral failed from the Iſland *Marigalante* Northwards, by another great Iſland he called *Sta. Maria Guadalupe*, at the Requeſt of the Friars of the Houſe of that Name, to whom he had made a Promiſe to call ſome Iſland by the Name of their Monaſtery; before he came to it, by two Leagues Diſtance, they diſcovered a very high Rock, ending in a Point, whence iſſued a Stream of Water, which falling, made ſuch a Noiſe that it was heard aboard of the Ships, though many affirmed that it was only a white Vein in the Rock; the Water was ſo white and frothy by reaſon of its Fall. Going aſhore in the Boat to view a Sort of a Town they ſaw from the Shore, they found no body there, the People being fled to the Woods, except ſome Children, to whoſe Arms they tied ſome Baubles to pleaſe their Parents when they returned; in the Houſes they found Geeſe and abundance of Parrots with red, green, blue, and white Feathers, as big as common Cocks; they alſo found Pompions, and a ſort of Fruit which look like our green Pine-apples, but much bigger, and within full of ſolid Meat like a Melon, and much ſweeter both in Taſte and Smell, which grow on long Sticks like Aloes wild about the Fields, and are better than thoſe produced by Art. They alſo ſaw other Sorts of Fruits and Herbs, different from ours, Beds of Cotton Nets, that is, Hamocks, Bows and Arrows, and other Things of which they took none, that the *Indians* might be the leſs afraid of the Chriſtians. The next Day, which was the 5th of *November*, the Admiral again ſent two Boats aſhore to endeavour to take ſome body that might give an Account of the Country, and inform him how far off, and which Way *Hiſpaniola* lay; each of the Boats brought back a Youth, who agreed in ſaying they were not of that Iſland, but of another called *Boriquen* (now *St. John de Porto Rico*) and that the Inhabitants of that Iſland of *Guadalupe* were *Caribes* or *Canibals*, and had carried them Priſoners from their own Iſland. Soon after the Boats returning to take up ſome Chriſtians they had left there, found ſix Women with them, who had fled to them from the *Caribes*, and came of their own accord aboard the Ships.

The Admiral to invite the *Iſlanders* would not keep them on board, but gave them ſome Glaſs-beads and Bells, and made them be ſet aſhore againſt their Wills. Yet this was done unadviſedly; for as ſoon as they landed, the *Caribes*, in Sight of the Chriſtians, took away all the Admiral had given them: Therefore, either through the Hatred they bore the *Caribes*, or the Fear they had conceived of thoſe People, a while after when the Boats returned for Wood and Water, the ſaid Women got into them, begging of the Seamen to carry them aboard the Ships, and giving them to underſtand by Signs, that thoſe People eat Men, and made Slaves of them, and therefore they would not ſtay with them; ſo that the Men yielding to their Intreaties, carried them back to the Ships, with two Children and a young Man that had made his Eſcape from the *Caribes*, thinking it ſafer to put themſelves into the Hands of People they never ſaw, and ſuch Strangers to their Nation, than to remain among thoſe they knew to be wicked and cruel, and who had eaten their Huſbands and Children; and as they ſaid, they do not kill and eat the Women, but keep them as Slaves. One of the Women told them, that towards the South there were many Iſlands, ſome inhabited, others not, which ſhe and the other Women called *Giamactic*, *Cairvevo*, *Hunio*, *Buriari*, *Arubiari*, *Sixibei*, but the Continent which they ſaid was very great, both they and the People of *Hiſpaniola* called *Zuanta*.

3. On the 10th of *October* the Admiral weighed Anchor, and ſailed with the whole Fleet along the Coaſt of the Iſland *Guadalupe*, towards the North-weſt, for *Hiſpaniola*, and came to the Iſland *Montſerat*, calling it by that Name becauſe of its Heighth, and underſtood by the *Indians* he had with him, that the *Caribes* had depopulated it by devouring the Inhabitants. Thence he proceeded to *St. Mary Rodonda*, ſo called becauſe it is ſo round and upright, that there ſeems to be no getting up to it without Ladders, which the *Indians* called *Ocamaniro*. Next he came to *St. Maria la Antigua*, which is above 28 Leagues in Extent, ſtill holding on his Courſe North-weſt. There appeared ſeveral other Iſlands towards the North, and lying North-weſt and South-eaſt, all very high and full of Woods, near one of which he caſt Anchor, and called it *St. Martin*, where they took up Pieces of Coral ſticking to the Anchor Hooks, which made them hope they ſhould find other valuable Things in thoſe Countries. Though the Admiral was very deſirous to know every thing, yet he reſolved to hold on his Courſe towards *Hiſpaniola*, to relieve thoſe he had left there; but the Weather being bad, he came to an Anchor on the 13th, in an Iſland where he ordered ſome *Indians* to be taken to know whereabouts he was.

As the Boat was returning to the Fleet with four Men and three Children the Men had taken, they met a Canoe, in which there were four Men and one Woman, who perceiving they could not make their Eſcape, ſtood upon their Guard and hit two of the Chriſtians with their Arrows, which they let fly with ſuch Force and Dexterity that the Woman ſhot a Target quite through; but the Boat furiouſly boarding the Canoe overſet it, ſo that they took them all ſwimming in the Water; and one of them ſwimming ſhot ſeveral Arrows as if he had been upon dry Land. The Admiral departing hence, continued his Voyage Weſt North-weſt, where he found above fifty Iſlands, which he left to the Northward; the biggeſt of them he called *St. Urſula*, and the others, *the eleven thouſand Virgins*; next he came to the Iſland which he called *St. John Baptiſt*, but the *Indians Boriquen*; and the Fleet anchored in a Bay on the Weſt-ſide of it, where they took ſeveral Sorts of Fiſh, as Scate, Soles, Pilchards, and Shads, and ſaw Falcons and Buſhes like wild Vines, more to the Eaſtwards. Some Chriſtians went to certain Houſes, well built after their Faſhion, with a Square before them, and a broad Road down to the Sea, with Towers made of Cane on both Sides, and the Top of them curiouſly interwoven with Greens: At the End of it, next the Sea, was raiſed a large Gallery or Balcony, that could hold ten or twelve People, lofty and well built.

On the 21ſt the Admiral came up with the North-ſide of *Hiſpaniola*, and preſently ſent aſhore, at *Samana*, one of the *Indians* born in that Part, whom he brought out of *Spain*, being then converted, who offered to reduce all the *Indians* to ſubmit to the Chriſtians.

The Admiral continuing his Voyage towards the Town of the *Nativity*; when he came to Cape *Angel*, ſome *Indians* went aboard to barter their Commodities with the Chriſtians; coming to an Anchor, in the Port of *Monte Chriſto*, a Boat that went aſhore, found near a River two dead Men, one of them ſeemed to be young, the other old; who had a Rope made of a certain Sort of Broom, or ſuch Fuz that grows in *Spain*, called Eſparta, about his Neck, his Arms extended, and his Hands tyed to a Piece of Wood in the Form of a Croſs; but they could not diſcern whether they were Chriſtians or *Indians*, but looked upon it as an ill Omen. The next Day, being the 26th, the Admiral ſent aſhore in ſeveral Places; the *Indians* came very friendly and boldly to talk with the Chriſtians, and touching our Mens Shirts and Doublets, repeated their Names in *Spaniſh*, to ſhew they knew how thoſe Things were called, which delivered the Admiral from the Jealouſy he had conceived on Account of the dead Men: Judging that if thoſe People had miſuſed the Chriſtians left there, they would not have come ſo boldly aboard the Ships.

But the next Day when he came to an Anchor, near the Town of *Navidad*, after Midnight a Canoe came to the Fleet, and aſked for the Admiral, and being bid to come on board, for he was there, they would not do it, ſaying they were reſolved not to go aboard till they ſaw and knew him. The Admiral therefore was forced to come to the Ship-ſide to hear them, and then preſently two went up with two Maſks, which they gave to the Admiral, from the Cazique *Guacanagari*. They being aſked by the Admiral concerning the Chriſtians left there, anſwered, that ſome of them died of Diſtempers, ſome parted from their Company, and were gone into other Countries: But, that all of them had four or five Wives, though it appeared by their way of ſpeaking, that all, or moſt of them were dead: Yet the Admiral, not thinking it fit to take any Notice at that Time, ſent back the *Indians* with a Preſent made of Tin, and other Baubles for *Guacanagari* and themſelves, and ſo went away that Night. On the 28th, about Evening, the Admiral with all his Fleet, came into the Fort of *Navidad*, found it all burnt, and no body was ſeen thereabouts. The next Day, in the Morning, the Admiral landed, very much concerned to ſee the Houſes and Fort burnt, and nothing left belonging to the Chriſtians, but only ragged Clothes and ſuch like Things, as is uſual in a Place plundered and deſtroyed; and ſeeing no body to enquire of, the Admiral went with ſome Boats up a River that was near the Fort.

Whilſt he was going up it, he ordered the Well he had made in the Fort to be cleanſed, thinking to find Gold in it; becauſe at his going away, fearing what might happen, he commanded thoſe he had left behind, to throw all the Gold they could get into that Well, but nothing was found in it; and the Admiral could lay hold of no *Indian*, becauſe they all fled from their Houſes to the Woods; having therefore found nothing but ſome of the Chriſtians Clothes; he returned to *Navidad*, where he ſaw eight of the Chriſtians, and three others in the Fields near the Town, whom they knew to be Chriſtians by their Clothes, and they ſeemed to have been dead about a Month; the Chriſtians going about to ſeek ſome other Tokens or Writing of the Dead, a Brother of the Cazique *Guacanagari*, came with ſome *Indians* to talk with the Admiral. Theſe could ſpeak ſome Words in *Spaniſh*, and knew the Names of all the Chriſtians that had been left there, and ſaid that thoſe *Spaniards* ſoon began to fall to Variance among themſelves, and to take every one what Gold, and as many Women as they could; whereupon *Peter Guitierres* and *Eſcovedo*, killed one *James*, and then they, and nine others, went away with their Women to a Cazique, whoſe Name was *Caunabo*, who was Lord of the Mines, who killed them all; then, many Days after came with a great many Men to *Navidad*, where there was only *James de Arana*, with ten Men who had remained with him to guard the Fort, all the reſt being diſperſed about the Iſland. The Cazique, *Caunabo*, coming up by Night, fired the Houſes where the Chriſtians lived with their Women, for Fear whereof they fled to the Sea; where eight of them were drowned, and three died on Shore; that *Guacanagari* fighting with *Caunabo* in Defence of the Chriſtians, was wounded and fled.

This Account agreed with that given by other Chriſtians ſent by the Admiral to learn more of the Country; who went to a Town where *Guacanagari* lay ill of a Wound, which he ſaid had hindered him from waiting on the Admiral, and giving him an Account of what was become of the Chriſtians; among whom, he ſaid, ſoon after the Admiral returned for *Spain*, there began to be Diſſention, and every one would barter Gold for himſelf, and take what Women he thought fit; and not ſatisfied with what *Guacanagari* gave, and allowed to be given them, they divided into ſeveral Parties, and diſperſed ſome one Way and ſome another: And that ſome *Biſcayners* joining together, went where they were all killed; and this was the Truth of what had happened, which they might tell the Admiral; deſiring that he would come and ſee him, becauſe he was in ſuch a Condition, that he could not leave the Houſe. The Admiral did ſo, going the next Day to viſit him, and he with great Signs of Sorrow, told him all that had happened, as has been related above; and that he, and his Men, had all been wounded in Defence of the Chriſtians; as appeared by their Wounds, which were not given with Chriſtian Arms, but with wooden Swords and Arrows, pointed with Fiſh-bones.

This Diſcourſe being over, he preſented the Admiral with eight Strings of ſmall Beads, made of white, green, and red Stones; a String of Gold Beads; a Crown of Gold, and three little Calabaſhes full of Gold Sand; all which might have been about four Marks weight in Gold, each Mark being eight Ounces. The Admiral, in return, gave him abundance of Baubles, which might be worth three Ryals, and were valued by him at above a thouſand. Though he was very ill, he would needs go with the Admiral to ſee the Fleet, where he was courteouſly entertained; and much pleaſed to ſee the Horſes, of which the Chriſtians had before given him an Account. And becauſe ſome of thoſe that were dead had miſinformed him concerning the Faith, the Admiral was forced to inſtruct him in it; and afterwards would have him wear an Image of the Virgin *Mary* about his Neck, which, at firſt, he had refuſed to receive.

4. The Admiral reflecting on the Diſaſter of thoſe Chriſtians, and his own Misfortune at Sea; having loſt the Men and Fort on Shore, and his Ship upon the Water; and that, not far off, there were better and more commodious Places, on the 7th of *December* he ſailed with the whole Fleet Eaſtwards, and anchored not far from the Iſland of *Monte Chriſto*, and the next Day, at *Monte Chriſto*, among thoſe ſeven low little Iſlands; which, tho' they are without Trees, yet are nevertheleſs very pleaſant. Thence he went to anchor before a Town of *Indians*, where, reſolved to plant a Colony, he landed with all the Men, Proviſions, and Utenſils he brought aboard the Fleet, in a Plain near a Rock; on which he built a Town, and called it *Iſabella*, in Honour of Queen *Iſabel*, or *Elizabeth*; this Place was judged very convenient, as the Port was very large, though expoſed to the North-weſt, and had a moſt delicate River within a Bow Shot of it, from which Canals of Water might be drawn to run through the Middle of the Town; and beyond was an open Plain, from which the *Indians* ſaid the Mines of *Cibao* were not very remote. For theſe Reaſons the Admiral was ſo eager upon ſettling the ſaid Colony, that what with the Fatigue at Sea, and what he here went through, he not only wanted Time to write, Day by Day, what happened, but fell ſick, which hindered his writing from the 11th of *December* to the 12th of *March*, in the Year 1494; during which Time, having ordered the Affairs of the Town the beſt he could, he ſent one *Alonſo de Hojeda* with fifteen Men, to ſeek out the Mines of *Cibao*; afterwards, on the 2d of *February*, twelve Ships of the Fleet returned to *Caſtile*, under the Command of one Captain *Anthony de Torres*, Brother to Prince *John*'s Nurſe, a Man of great Judgment and Honour, and in whom their Catholic Majeſties and the Admiral much confided. He carried in Writing an Account at large of all that had happened, as alſo the Nature of the Country, and what it required.

Not long after, *Hojeda* returned, giving an Account, that the 2d Day after he ſet out from *Iſabella*, he lay at the Paſs of a Mountain, which was very difficult of Acceſs; that afterwards, at every League's Diſtance, he found Caziques, who had been very kind to him; and continuing his Journey, the 6th Day he came to the Mines of *Cibao*, where the *Indians* immediately took up Gold in a ſmall River, as they had done in many others, in the ſame Province, where he affirmed there was great Plenty of Gold. This News much rejoiced the Admiral, who was recovered of his Sickneſs, and he reſolved to obſerve this Diſpoſition of the Country, that he might the better know what was to be done. Accordingly, on the 12th of *March*, he ſet out from *Iſabella*, for *Cibao*, to ſee the Mines, with all the People that were in Health, both Foot and Horſe; leaving a good Guard in the two Ships, and three Caravels, the remainder of the Fleet; and cauſing all the Ammunition and Tackle belonging to the other Ships to be put aboard his own, that none might rebel and ſeize them, as they had attempted to do whilſt he was ſick; becauſe they having gone that Voyage upon the Belief, that as ſoon as they landed they might load themſelves with Gold, and ſo return rich Home, the Thing not happening as they expected, they grew diſſatisfied and offended; as alſo, becauſe of building the new Town, and weary of Diſeaſes that the Climate, and Change of Diet cauſed among them; they conſpired to revolt from the Admiral; and taking the Ships that remained, by Force, to return in them to *Spain*. One *Barnard de Piſa*, who had been an Officer of Juſtice at Court, and went that Voyage in the Quality of Comptroller, was the Ring-leader, and Head of the Mutineers; therefore, the Admiral, when informed of it, would not puniſh him any otherwiſe, than by ſecuring him on board a-ſhip, with a Deſign to ſend him aftewards to *Spain*, with his Proceſs drawn up, as well for mutinying, as for having writ a falſe Information againſt the Admiral, which he had hid.

Having therefore ordered all theſe Affairs, and having left ſome Perſons, together with his Brother Don *James Columbus*, to look to and ſecure the Fleet, he ſet forward towards *Cibao*, carrying with him all the Neceſſaries to build a Fort, to keep that Province under, and ſecure the Chriſtians left there to gather Gold, againſt any Attempts or Deſigns of the *Indians*; and the more to terrify them, and to take away all Hopes, that they might do in the Admiral's Preſence as they had done in his Abſence with *Arana*, and the thirty-eight Chriſtians left among them, he carried with him all the Men he could, that they might, in their own Towns, ſee the Power of the Chriſtians, and be ſenſible that whenever any Wrong was done to a ſingle Man travelling through the Country, there was a Force of Men to chaſtiſe it; and to appear the more formidable when he ſet out for *Iſabella* and other Towns, he made his Men march with their Arms in Rank and File, as is uſual in Time of War, with Trumpets ſounding and Colours flying. In this Way he marched to the Side of that River which lay about a Muſket-ſhot from *Iſabella*; and a League beyond he croſſed another River, and went to lie that Night three Leagues off, in a Plain divided into pleaſant Fields, reaching to the Foot of a craggy Hill, and about two Bow-ſhots high: This he called *Puerto de los Hidalgos*, or the Gentleman's Paſs; becauſe ſome Gentlemen went before, to order the Road to be made. And this was the firſt Road made in the *Indies*; for the *Indians* make their Ways but for one Man to paſs at a Time. Beyond this Paſs he came into a large Plain, on which he travelled five Leagues the next Day, and went to lie near a great River, which the Men paſſed upon Floats and Canoes: This River, which he called of *Canes*, fell into the Seat at *Monte Chriſto*. In his Journey he paſſed by many *Indian* Towns, the Houſes whereof were round, thatched, and with ſuch a little Door as he who goes in muſt ſtoop very low. Here, as ſoon as ſome of the *Indians*, brought from *Iſabella*, went into the Houſes, they took what they liked beſt, and yet the Owners were not diſpleaſed; as if all Things were in common.

5. On the 14th, the Admiral ſet forward from the River of *Canes*, and a League and a Half from it found a great River, which he called the *River of Gold*; having paſſed it with ſome Difficulty, he proceeded to a large Town, where many of the People fled to the Mountains, but moſt of them fortified their Houſes, barring their Doors with ſome Canes, as if they were a Defence to hinder any Body from coming in; for, according to their Cuſtom, no Man dares break in at the Door he finds ſo barred. Hence the Admiral went to another fine River, which he called the *Green River*; the Banks whereof were covered with bright round Stones, and there he reſted that Night. Holding on his Journey, the next Day he paſſed by ſome great Towns, where the People had put Sticks a-croſs the Doors, and the Admiral with his Men being tired, they ſtaid that Night, at the Foot of a rugged Mountain, which he called *Parbibao*, as the Province of *Cibao* begins behind the Mountain: From this, the firſt Mountain they paſſed was eleven Leagues diſtant, all which is a Plain, the Way directly South. Setting out the next Day, he travelled through a Path, where they were forced, with Difficulty, to load their Horſes, and thence he ſent back ſome Mules to *Iſabella* to bring Bread and Wine, for they began to want Proviſions, and the Journey was long, and they ſuffered the more becauſe they were not yet uſed to the *Indian* Diet, as they are now, who live and travel in thoſe Parts, who find the Food of that Country more eaſy of Digeſtion, and more agreeable to that Country, than what is carried from *Europe*, though it is not ſo great Nouriſhment.

The Admiral, paſſing over the Mountains, on the 16th entred the Country of *Cibao*, which is rough and ſtony, full of Gravel, plentiful of Graſs, and watered by ſeveral Rivers, in which Gold was found. The farther they went into this Country, they found it encumbered more with Mountains, on the Tops whereof appeared Grains of Golden Sand; for, as the Admiral ſaid great Rains carried it down from the Tops of Mountains to the Rivers in ſmall Sand. The Admiral perceiving he was now 18 Leagues from *Iſabella*, and the Country he had left behind very craggy, he ordered a Fort to be built in a very pleaſant and ſtrong Place, which he called the Caſtle of *St. Thomas*, to command the Mines, and be a Place of Safety for the Chriſtians that worked there. Here, breaking Ground to lay the Foundation, and cutting a Rock to make the Ditches, when they were got two Fathoms below the Stone, they found Neſts made of Hay and Straw, and, inſtead of Eggs, three or four round Stones as big as Oranges, as artificially made as if they had been Cannon Balls. And in the River that runs at the Foot of that Hill the Caſtle now ſtands upon, they found Stones of ſeveral Colours, ſome of them large, of pure Marble, and others of Jaſper. The Admiral, having given Orders for finiſhing the Caſtle, ſet out for *Iſabella*, and near the *Green River* met the Mules, and ſtaid there, ſending the Proviſions to the Port afterwards, endeavouring to find the Ford of that River, and of the River *del Oro*; he ſtaid ſome Days in thoſe *Indian* Towns, eating their Bread and Garlic, came well to *Iſabella*, where Melons were already grown fit to eat, tho' it was not above two Months ſince the Seed was put into the Ground; ſo Cucumbers came up in 20 Days: A wild Vine of that Country, being pruned, produced Grapes which were good and large.

On the 30th a Huſbandman gathered Ears of Wheat he had ſown at the latter end of *January*; there were alſo Vetches, but much bigger than thoſe they ſowed, and all they ſowed ſprung up above Ground in three Days, and the twenty-fifth Day they eat of it. The Stones of Fruit ſet in the Ground ſprouted out in ſeven Days, and the Vine Branches ſhot out in the ſame Time, and in twenty-five Days after they gathered green Grapes; the Sugar Canes budded in ſeven Days, which proceeded from the Temperature of the Climate; beſides that the Waters there are very thin, cold, and wholeſome. The Admiral was well enough pleaſed with the Air, the Soil, and the People of the Country. On the 1ſt of *April* there came a Meſſenger from Fort *St. Thomas*, who brought News that the *Indians* of that Country fled; and that a Cazique, whoſe Name was *Caunabo*, was preparing to come and attack the Fort. The Admiral knowing how inconſiderable the People of that Country were, made little Account of that Report, eſpecially conſidering the Horſes, by whom the *Indians* were afraid to be devoured, and therefore were ſo much afraid, that they durſt not go into any Houſe where a Horſe ſtood; however, the Amiral thought fit to ſend more Men and Proviſions, conſidering, that ſince he deſigned to go to diſcover the Continent with three Caravels he had left him, it was fit to ſecure all behind. Therefore, on the 2d, he ſent ſeventy Men with Proviſions and Ammunition to the Fort; twenty-five of which were to keep Guard, and the others help to make another Road, the firſt being very troubleſome, as were the Fords of the Rivers.

In the mean while, becauſe the Biſket grew towards an End, and they had no Flour but Wheat, he reſolved to make ſome Mills, though there was not a Fall of Water fit for that Purpoſe within a League of the Town, at which Work he was forced to ſtand over the Workmen, they all endeavouring to ſave themſelves from Labour. After that, he reſolved to ſend out all the People that were in Health, except Handicraftmen and Artificers, to the *Royal Plain*; that, travelling about the Counary, they might pacify it, ſtrike a Terror into the *Indians*, and by Degrees be uſed to their Food, ſince they daily felt more Want of that of *Spain*. *Hojeda* was ſent to command theſe Men till they came to *St. Thomas*, there to deliver them to Don *Peter Margarite*, *Hojeda* himſelf to command in the Fort; he having taken the Pains the Winter before, to diſcover that Province of *Cibao*, which in the *Indian* Language ſignifies *Stony*. *Hojeda* ſet out from *Iſabella* the 29th of *April* towards *St. Thomas*, with this Party of Men, being above 400; and, having paſſed the River *del Oro*, apprehended a Cazique that lived there, and a Nephew of his, ſending them in Irons to the Admiral, and cut off the Ears of one of his Subjects in the great Place in the Town, becauſe, three Chriſtians going from *St. Thomas* to *Iſabella*, this Cazique gave them *Indians* to carry their Clothes over the River, at the Ford; and they, being in the Middle of the River, returned to their Town with them; and the Cazique, inſtead of puniſhing them, took the Clothes, refuſing to deliver them. Another Cazique, who dwelt beyond the River, relying on the Service he had done the Chriſtians, reſolved to go with the Priſoners to *Iſabella*, and interceed with the General for them, who entertained him courteouſly, and ordered the other *Indians*, with their Hands bound, to be publicly ſentenced to die in the Market-place; which the honeſt Cazique ſeeing, with many Tears, obtained their Lives, promiſing they ſhould never be guilty of any other Offence. The Admiral having diſcharged them all, a Man on Horſeback came from *St. Thomas*'s, and gave an Account, that he had found in the Houſe of that ſame Cazique, who had been Priſoner in his Town, five Chriſtians, taken by his Subjects as they were coming from *Iſabella*; and that he, frighting the *Indians* with his Horſe, had releaſed them, above 400 Men running away from him, of whom he wounded two in the Purſuit; and that when he had paſſed the River, he ſaw they turned upon the ſaid Chriſtians; whereupon he made as if he would go back againſt them; but they, for fear of his Horſe, all ran away, leſt the Horſe ſhould fly over the River.

6. The Admiral being reſolved to diſcover the Continent, appointed a Council to govern the Iſland in his Abſence; the Sway it conſiſted of was, Dr. *James Columbus*, his Brother, with the Title of Preſident; *F. Boyl* and *Peter Fernandez Colonel*, Regents; *Alonſo Canabez de Corvajal*, Rector of *Bacca*, and *John de Luxan* of *Madrid*, Gentle-

men to their Catholic Majeſties. And that there might not want Meal for the Support of the People, he haſtened the Building of the Mills, notwithſtanding the Rain and Floods very much obſtructed. As the Fruitfulneſs of the Soil appeared very extraordinary, ſo they daily received freſh Advices of the Wealth of the Country; for ſome of thoſe the Admiral had ſent out were always returning with Accounts of new Mines diſcovered, beſides the Relations of the *Indians* concerning great Plenty of Gold found in ſome Parts of the Iſland.

The Admiral not ſo ſatisfied, reſolved to go out to diſcover along the Coaſt of *Cuba*, not knowing whether it was an Iſland or Continent; therefore taking three Ships along with him, he ſailed on the 24th in the Afternoon, and came to an Anchor that Day at *Monte Chriſto*, Weſt of *Iſabella:* Thence he went to *Guacanagari*'s Port, thinking to find him there; but he ſeeing the Ships, fled for Fear, tho' his Subjects falſely affirmed he would ſoon return. But the Admiral not caring to ſtay, departed on *Saturday* the 26th, and went to the Iſland *Tortuga*, which lies ſix Leagues to the Weſtward. He lay by it that Night in a Calm, with his Sails abroad, the Tide running back againſt the Currents. The next Day the North-weſt Winds and Currents ſetting to the Weſt, obliged him to come to an Anchor in the River of *Guadalquiver*, which is on the ſame Iſland, there to wait for a Wind that would ſtem the Current, which both then and the Year before, he found to run ſtrong towards the Eaſt. On the 29th of the ſame Month, the Wind being fair, he came to *Cape St. Nicholas*, and then croſſed over to the Iſland of *Cuba* running along the Coaſt of it. And having ſailed a League beyond *Cabo Puerto* put into a large Bay, which he called *Puerto Granda*, or the *Grand Port*; the Mouth whereof was 150 Paces over, and had much Water. Here he anchored, and took ſome Refreſhment. On the firſt of *May*, he continued his Voyage along the Coaſt, where he found commodious Harbours, and fine Rivers, and high Mountains upon the Sea. After he left *Tortuga*, he met abundance of the Weeds he ſaw on the Ocean on his Voyage to and from *Spain*. And ſailing cloſe along the Shore, abundance of People came on board in their Canoes, to bring off their Bread, Water, and Fiſh; giving it all freely, without aſking any thing for it; but the Admiral, to ſend them home well pleaſed, ordered them to be paid, giving them Beads, Bells, and ſuch like Baubles. On the 3d the Admiral reſolved to ſail over from *Cuba* to *Jamaica*, that he might not leave it behind, without knowing whether the Report of Plenty of Gold they had there was true; and the Wind being fair, and he half Way over, he diſcovered it the next Day. Upon that he came to an Anchor, and thought it the beſt of any he had yet ſeen in the *Indies*; and ſuch Multitudes of People in great and ſmall Canoes came a-board, that it was aſtoniſhing. The next Day he ran along the Coaſt to find out Harbours; and the Boats going to ſound the Mouths of them, there came ſo many Canoes with armed Men to defend the Country, that they were forced to return to the Ships, not ſo much for fear, as to avoid falling out with thoſe People. But afterwards conſidering, that if they ſhewed Signs of Fear, the *Indians* would grow proud upon it, they returned together to the Port which the Admiral called *Puerto Bueno*, that is, *Good Harbour*; and becauſe the *Indians* came to drive them off, thoſe in Boats gave them ſuch a Flight of Arrows from their Croſs Bows, that ſixteen of them being wounded, they retired. The Fight ending in this manner, there came abundance of Canoes from the neighbouring Places, in a peaceable Way to ſee and barter Proviſions; and ſeveral Things they brought, and gave for the leaſt Trifle that was offered them.

In this Port, which reſembles a Horſe-ſhoe, the Admiral's Ship was repaired, being leaky; and that done, they ſet ſail on the 9th, keeping ſo cloſe along the Coaſt Weſtward, that the *Indians* followed in their Canoes to trade. The Wind being ſomewhat contrary, the Admiral could not make ſo much Way as he wiſhed, till on the 14th he reſolved to ſtand over again for *Cuba*, to keep along its Coaſts, deſigning not to return till he had ſailed 5 or 600 Leagues, and was ſatisfied whether it was an Iſland or Continent. The Day he was going off from *Jamaica* a very young *Indian* came a-board, ſaying he would go; and after him came ſeveral of his Kindred and other People in their Canoes, earneſtly intreating him to go back; but they could never alter his Reſolution; and therefore to avoid ſeeing his Siſters cry, he went where they could not come at him. The Admiral admiring his Reſolution, gave Orders that he ſhould be uſed with the utmoſt Civility. The Admiral leaving *Jamaica* on the 15th of *May*, came to that Point of *Cuba* which he called *Cabo de Santa Cruz*, or *Cape Holy Croſs*; and running along the Coaſt, there happened a great Storm of Thunder and Lightning, which, together with the Flats and Currents, put him in no ſmall Danger, and to very much Trouble, being obliged at the ſame time to ſtruggle againſt two Evils, which required contrary Remedies; for it is a proper Remedy againſt Thunder to ſtrike the Sails, and it was requiſite to ſpread them to avoid the Flats. And had this Calamity laſted for eight or ten Leagues, it had been inſupportable. But the worſt of it was, that throughout that Sea, both North, and South-eaſt, the farther they went, the more little low Iſlands they met with: And though there were Trees in ſome of them, yet others were ſandy, and ſcarce appeared above the Surface of the Water; ſome a League, ſome more, and ſome leſs in Compaſs. True it is, that the nearer they ſailed to *Cuba*, the higher and pleaſanter the little Iſlands appeared. And being a Matter of Difficulty, and to no Purpoſe to give every one of them a Name, the Admiral called them all in general, *Jardin de la Reyna*, or the *Queen*'s *Garden*.

But as many Iſlands as he ſaw that Day, he ſaw many more and bigger the next Day than he had before; and not only to the North-eaſt, but North-weſt, and South-weſt, inſomuch that they counted 160 Iſlands that Day, all parted by deep Channels, which the Ship ſailed through. In ſome of theſe Iſlands they ſaw abundance of Cranes, in Shape and Bigneſs like thoſe of *Spain*, but that they were red as Scarlet. In others they found abundance of Tortoiſes, and of their Eggs, not unlike Hens, but that the Shells are very hard. The Tortoiſes lay their Eggs in a Hole they make in the Sand, and cover them, leaving them till the Heat of the Sun hatches and brings forth the Tortoiſes, which in time grow as big as a great Target. In theſe Iſlands they alſo ſaw Crows and Cranes like thoſe of *Spain*, and Sea Crows, and infinite Numbers of little Birds that ſung ſweetly; and the very Air was as ſweet as if they had been among the fineſt Perfumes in the World: Yet the Danger was very great, there being ſuch abundance of Channels, that much Time was ſpent in finding the Way through them.

In one of theſe Channels they diſcovered a Canoe of *Indian* Fiſhermen, who very quietly, without Concern, expected the Boat, which was making toward them; and being come near, made a Sign to them not to approach, till they had done fiſhing. Their Manner of fiſhing was ſo ſtrange, that they were willing to comply with them: It was thus: They had tied ſome ſmall Fiſhes they call *Reves* by the Tail, which run themſelves againſt other Fiſh, and with a certain Roughneſs they have from the Head to the Middle of the Back, ſtick ſo faſt to the next Fiſh they meet, that when the *Indians* perceive it, they draw both up together: And it was a Tortoiſe the *Spaniards* ſaw taken by theſe Fiſhermen, the *Reve* clinging about the Neck of it, where they generally faſten, being by that Means ſafe from the other Fiſh biting them; and ſometimes are ſaid to faſten upon vaſt Sharks. When the *Indians* in the Canoe had taken the Tortoiſe, and two other Fiſhes they had before, they preſently in a very friendly manner came to the Boat to know what they would have; and by their Directions went alone a-board the Ships, where the Admiral treated them very courteouſly, and underſtood by them, that there was an infinite Multitude of theſe Iſlands in that Sea; and they freely gave all they had, tho' the Admiral would ſuffer nothing to be taken of them but the Fiſh, the reſt being their Nets, Hooks, and Calabaſhes full of Water to drink. Having given them ſome Trifles, they went away very well pleaſed; and he held on his Courſe with a Deſign not do ſo long, becauſe he began to be ſhort of Proviſions already; whereas had he been well ſtored, he determined not to have returned into *Spain*, but Eaſt about.

Tho' he was very much ſpent, not becauſe he ſuffered Pain, but becauſe he had not ſlept, or lain in Bed ever ſince he went from *Spain* till the 19th of *May*, except eight Nights (as appears by his Journal) when he was very much indiſpoſed. And if he had much Care upon him at other times, it was doubled this Voyage, by reaſon of the innumerable Quantity of Iſlands among which he was ſailing, which were ſo many, that on the 20th he diſcovered ſeventy one beſides many more he ſaw Weſt-ſouth-weſt at Sun-ſetting. Which Iſlands, or Sands, are not only frightful, by their Multitude appearing on all Sides; but what is yet more terrible is, that every Night there riſes off them a great Fog, Eaſtward, ſo diſmal to behold that it looks as if ſome great Showers of Hail would fall. The Thunder and Lightning is violent, yet when the Sun riſes it all vaniſhes, Part of it turning to Rain and Wind, which is ſo uſual and natural in that Country, that it did not only happen all thoſe Nights the Admiral was there, but the ſame was long after obſerved in thoſe Iſlands by the *Spaniards* in their Return from the Diſcovery of *Veragua*. And generally here, at Night, the Wind is North, coming off the Iſle of *Cuba*; and afterwards, when the Sun is up, it comes about Eaſt, and follows the Sun till it comes to the Weſt.

7. The Admiral, ſtill holding out his Courſe Weſtward among the Number of Iſlands, upon the 22d came to an Iſland ſomewhat bigger than the reſt, which he called *St. Mary*; and, landing at a Town there, not one *Indian* would ſtay to talk to the Chriſtians, nor did they find any thing in the Houſes but Fiſh, which is all the Food thoſe People live on, and ſeveral Dogs, like Maſtiffs, who eat Fiſh too. Thus, without ſpeaking to any body, or ſeeing any Thing remarkable, he ſailed away North-eaſt among many Iſlands, and abundance of thoſe Weeds he ſaw on the Ocean when he diſcovered the *Indies*, which fatigued him very much; for ſometimes he was forced to ſtand Weſt, ſometimes North, and ſometimes South, according as the Channels would permit; for, notwithſtanding his Care in ſounding, and keeping Men upon the Round-top, to look out, yet the Ship often touched, and there was no avoiding it, there being no End of the Flats on all Hands. Sailing on in this manner he came again to *Cuba* to take in Water, whereof they had much need, and tho' there was no Town there, they put in becauſe the Place was wooded, yet one of the Seamen that went aſhore, going up among the Trees with a Croſs-bow, to kill ſome Bird or Beaſt, diſcovered thirty People armed with ſuch Weapons as they uſe, that is, Spears and Staves, which they wear inſtead of Swords, and call *Macanas*; among them, he ſaid, he ſaw one clad in a white Coat or Veſt down to his Knees, and two that carried him, with Veſts down to their Feet; all three of them as white as *Spaniards*, but that he had no Talk with them; for being afraid of ſuch a Number, he began to cry out, and the *Indians* ran away without looking back.

The Admiral, the next Day, ſent People aſhore to know the Truth of it. They could not travel above half a League, becauſe of the Thickneſs of the Trees and the Buſhes, and becauſe that Coaſt is marſhy for two Leagues up the Country, where there are Mountains; ſo that they only ſaw Footſteps of Fiſhermen on the Shore, and abundance of Cranes like thoſe in *Spain*, but bigger. Then ſailing about ten Leagues Weſtward, they ſaw Houſes on the Shore, from which ſome Canoes came with Water, and ſuch Things as thoſe People eat, which they brought to the Chriſtians, who paid well. And the Admiral cauſed one of theſe *Indians* to be ſtopped, telling him and the reſt, by his Interpreter, that he would let him go home as ſoon as he had directed him in his Voyage, and given ſome Account of that Country. At which the *Indian* was very much pleaſed, and aſſured the Admiral, that *Cuba* was an Iſland, and that the King, or Cazique, of the Weſtern Part of it, never ſpoke to his Subjects but by Signs; that all that Coaſt was very low, and full of Iſlands, which was found to be true. The next Day, being the 11th of *June*, to paſs from one Channel to another, the Admiral was forced to have the Ships towed over a Flat where there was not a Foot of Water, and all the Breadth of it was not above two Ships Length. Bearing up cloſe to *Cuba*, they ſaw Tortoiſes of a vaſt Bigneſs, and in ſuch Numbers, that they covered the Sea. At Break of the Day they ſaw ſuch a Cloud of Sea-Crows, that they darkened the Sun, coming from the Seaward to the Iſland where they all lighted. Beſides them, abundance of Pigeons and Birds of other ſorts were ſeen. And the next Day there came ſuch Swarms of Butterflies that they darkened the Air, and laſted till Night, when a great Rain carried them away.

On the 13th the Admiral perceived that the Coaſt of *Cuba* ran far Weſt, and that it was a Matter of the greateſt Difficulty to ſail that Way, by reaſon of Iſlands and Sands that were on all Sides, and that he already began to want Proviſions, for which Reaſon he could not continue his Voyage as he had intended. He reſolving to return to the Town he had begun to build at *Hiſpaniola*, and to furniſh himſelf with Wood and Water, anchored in the Iſland of *Evangeliſta*, which is thirty Leagues in Compaſs, and ſeven hundred from *Dominica*. Having directed his Courſe South, hoping to get out better that Way, and ſailing through that Channel which looked cleareſt, after a few Leagues found it ſhut up, which did not a little trouble and terrify them, ſeeing themſelves, as it were, hemmed in on all Sides, and deſtitute of Proviſions: But the Admiral, who was wiſe and couragious, ſaid with a chearful Countenance, that he thanked God for forcing him back the ſame Way he came; foraſmuch as if they had continued their Voyage that Way they expected to go, it might have, perhaps, happened they might have run themſelves into ſome Place, whence it would have been hard getting out, and at a time when they had neither Ships nor Proviſions to go back, which at preſent they could eaſily do. Thus with great Satisfaction of all the Men he returned to the Iſland of *Evangeliſta*, where he had watered; and the 25th of *June* ſailed thence North-weſt towards ſome ſmall Iſlands that appeared five Leagues off.

On the 20th, as he was writing his Journal of the Voyage, his Ship run a-ground ſo faſt, that neither Anchors nor other Inventions were able to get it off. It was by Boats drawn off a-head, tho' with ſome Damage, becauſe of beating on the Sand. However, with God's Aſſiſtance, they got off at laſt, and he ſailed on as the Wind and ſhoal Water would permit, always through a very white Sea, and two Fathom deep. Beſides which, every Day about Sun-ſetting he was troubled with mighty Showers which riſe in the Mountains from the Moraſſes near the Sea, which was a great Fatigue to him till he came cloſe to *Cuba*, toward the Eaſt, the Way he came at firſt; whence, as he had found before, came off a moſt fragrant Scent of Flowers. On the 7th of *July* he landed to hear Maſs, and there reſorted to him an old Cazique, Lord of the Province, who was very attentive at Prayer. When it was ended, he expreſſed by Signs, it was very well done to give Thanks to God, becauſe the Soul which was good would go to Heaven, and the Body remain on Earth, but that the wicked Souls muſt go to Hell. And, among other Things, ſaid he had been in the Iſland *Hiſpaniola*, where he knew ſome of the chief Men: That he had been at *Jamaica*, and a great Way towards the Weſt of *Cuba*; and that the Cazique of that Place was clad like a Prieſt.

The Admiral ſailing thence on the 16th, drew near to *Cape Cruz* in *Cuba*, where he was ſurprized by ſuch a violent Storm as bore his Ship's Side under Water: But it pleaſed God they immediately ſtruck all their Sails and dropped their Anchors, but yet they took in ſo much Water at the Deck, that the Men were not able to pump it out, eſpecially in the Condition they were, being much ſpent for want of Proviſions, for they eat nothing but a Pound of rotten Biſket in a Day, and about half a Pint of Wine, unleſs they happened to catch ſome Fiſh, which yet they could not keep from one Day to the next, becauſe the Weather was always more inclinable to corrupt than in other Countries. And this Want being common to all, the Admiral, in his Journal, ſpeaks thus concerning it: "I am at the ſame Allowance, God grant it may "be to his Honour, and your Highneſſes Service; for I

“ ſhall never again, for my own Benefit, expoſe myſelf
“ to ſuch Sufferings and Dangers ; never a Day paſſing
“ but I ſee we are all upon the Brink of Death.”

In this Danger and Diſtreſs he arrived at *Cape Cruz* on the 18th, where he was entertained by the *Indians.* They brought him abundance of Cazabi, ſo they call their Bread made of Roots grated, a vaſt deal of Fiſh, Store of Fruit, and other Things ſuch as they eat. The Wind being contrary, ſo that he could not ſail for *Hiſpaniola*, he ſtood over to *Jamaica*, and ſailed along Weſtward, cloſe under the Shore ; the Country all along moſt delightful and fruitful, with excellent Harbours at every League Diſtance, and all the Coaſt full of Towns, the People whereof followed their Ships in their Canoes, bringing Proviſions, which were better liked by the Chriſtians than what they found in the other Iſlands ; the Climate, Air, and Weather, were the ſame as the reſt ; for in this Weſtern Part of *Jamaica*, there gathered every Evening a Storm of Rain, which laſted about an Hour, more or leſs, which the Admiral ſaid he attributed to the great Woods in thoſe Countries, for that he knew this was uſual, at firſt, in the *Canary* Iſlands, *Madera*, and the *Azores*, whereas now the Woods are cut down that ſhaded them, there are not ſo great and frequent Storms of Rain as there were formerly.

Thus the Admiral ſailed on, though with contrary Winds, which obliged him every Night to ſeek the Shelter of the Land, which appeared green, pleaſant, fruitful, abounding in Proviſions, and ſo populous, that he thought none excelled it ; eſpecially near a Bay, which he called *de las Vacas*, becauſe there are nine Iſlands cloſe to the Land, which he ſaid was as high as any he had ſeen ; and yet it was peopled, and very fruitful and pleaſant. This Iſland he judged to be 800 Miles in compaſs, and, when fully diſcovered, computed fifty Leagues in Length, and twenty in Breadth. Being much taken with its Beauty, he had a great Mind to ſtay there, to be fully informed of the Nature of it ; but the Want of Proviſions, and the Leakineſs of the Veſſels, would not permit: Therefore, as ſoon as the Weather was a little fair, he ſailed away Eaſtward ; ſo that on the 9th of *Auguſt* he loſt Sight of that Iſland, ſtanding over directly for *Hiſpaniola*, and called the moſt Eaſtward Cape of *Jamaica* on the South Coaſt *Cabo del Farol.*

8. The two Ships that had been miſſing, came in about ſix Days after, and the Admiral proceeded on his Voyage, and arriving on the Coaſt of *Hiſpaniola*, the *Indians* came in their Canoes, and ſaid, that two had been there from *Iſabella*, and that, at the Colony, they were all well. He held on his Courſe to the Eaſtward, where he diſcovered a great Town, and ſent the Boats thither for Water. The *Indians* came out armed with poiſoned Arrows ; they threatened to bind the *Spaniards* with Cords they brought ; and this was the Province of *Niguey*, the Inhabitants whereof were the moſt warlike People of the Iſland of *Hiſpaniola*, and poiſoned their Weapons ; but when the Boats came aſhore, the *Indians* laid down their Arms, and aſked for the Admiral, and carried Proviſions. He held on his Courſe, and they ſaw a great Fiſh, like a middling Whale, and it had on the Neck a large Shell, like that of a Tortoiſe, little leſs then a Target ; the Head it held above Water was like a Pipe or But, the Tail like that of a Tunny-Fiſh, very large, and two vaſt Fins on the Side ; by this Fiſh and other Obſervations in the Sky, the Admiral perceived there was like to be a Change of Weather, and endeavoured to get under a little Iſland, which the *Indians* called *Adamanoy*, and the *Spaniards Saona*, which makes a Streight a little above a League over, with the Iſland *Hiſpaniola*, and is about two Leagues in Length.

There he came to an Anchor, and the two other Ships, not being able to get in, ran the greateſt Hazard. That Night the Admiral obſerved the Eclipſe of the Moon, and affirmed the Difference of Longitude, between that Place and *Cadiz*, was five Hours and twenty-three Minutes ; he continued there on Account of the Storm eight Days ; and the other Ships being come, he ſailed thence on the 24th of *September*, and came to Cape *Engano*, in *Hiſpaniola*, which the Admiral named *St. Raphael* ; they next touched at the Iſland *Mona*, which is ten Leagues from *Hiſpaniola*, and eight from the Iſland of *Porto Rico*, or *St. John* ; being ſix Leagues in Compaſs, and on it grow moſt delicious Melons, as big as a Jar of Oil that will hold ſix Quarts ; being gone from *Mona*, and near *St. John*, the Admiral was ſeized with ſuch a Fit of the Lethargy, that he loſt all his Senſes, ſo that it was thought he could not live ; for which Reaſon the Seamen uſed the utmoſt Diligence, and arrived with all the Ships at *Iſabella*, on the 29th of *September*, without any farther Certainty of *Cuba* being an Iſland, than what the *Indians* had told them.

As ſoon as they arrived, the Admiral underſtood that his Brother Don *Bartholomew Columbus* was there, and that the Natives of the Iſland were in Arms againſt the *Spaniards.* It is impoſſible to expreſs how much the Admiral was pleaſed to ſee his Brother, and it will not be amiſs, before we proceed, to give an Account of what befel him, from the Time his Brother ſent him to propoſe the undertaking of thoſe Diſcoveries to the King of *England.* He was a long Time before he reached that Kingdom, and then learning the Language, the Methods of Court, and gaining Acceſs to the Miniſters, occaſioned another Delay ; ſo that after ſeven Years, when he had articled and agreed with King *Henry* VII. of *England*, he returned into *Spain* to look for his Brother, who having heard nothing from him during that Time, concluded he was dead : At *Paris* he heard of his having made the Diſcovery, and that he was declared Admiral ; being told it by King *Charles*, who gave him 100 Crowns towards his Journey, and though he made all the Haſte he could, his Brother was gone on his ſecond Voyage, with the ſeventeen Ships ; but he had an Inſtruction, which was left by the Admiral, delivered to him. He went to kiſs their Majeſties Hands, and viſit his Nephews, Don *James* and Don *Ferdinand*, at *Valadolid*, where the Court was ; being then Pages to Prince *John.* Their Catholic Majeſties did him much Honour, and ordered him to go away to the *Indies*, with three Ships that were to carry Proviſions to the Admiral.

He arrived there in *April* 1494, and found he was gone upon the Diſcovery of *Cuba.* The Admiral thought he had ſome Comfort in his Brother, and gave him the Title of Adelantado, or Lord Lieutenant ; which their Catholic Majeſties very much reſented, ſaying, that it was not in the Admiral's Power ſo to do, but that it belonged to them to give that Title : Yet ſome Years after they confirmed it. Don *Bartholomew* was a very wiſe Man, and as expert in Sea Affairs as his Brother ; ſomewhat harſh in his Temper, but very brave and free ſpoken, for which ſome hated him. The Admiral having eſtabliſhed a Council for the Government of the Iſland, Don *Pedro Margarite*, Commander of the four hundred Men, went with them to *Vega Real*, or *Vale Royal*, ten Leagues from *Iſabella*, and quartered them in the Towns there, where they lived without any Order or Diſcipline, ruining the *Indians* ; for a *Spaniard* will eat more in a Day, than one of them in a Month. The Council reproving Don *Pedro*, becauſe he did not check the Licentiouſneſs of the Soldiers, he thereupon began to cavil, refuſing to obey them, either in this Particular, or in marching through the Iſland, as the Admiral had ordered him ; and fearing to be puniſhed for thoſe Diſorders, he thought fit to embark aboard the three Ships that brought over Don *Bartholomew Columbus*, and return to *Caſtile*, and Father *Boyl* with him, beſides ſome more of his Party. Being come to the Court, they gave an Account that there was no Gold in the *Indies*, and that all the Admiral ſaid was mere Invention. The Soldiers being left without their Commander, diſperſed themſelves about the Country, living like Men without a Chief. Whereupon a Cazique, whoſe Name was *Guatiguanti*, who had a large Town upon the Bank of the great River, killed ten Chriſtians, and privately ſent to ſet fire to a Houſe where ſome ſick Men lay ; and the *Indians*, in ſeveral Parts of the Iſland, killed ſix more ; and Calumnies of the *Spaniards* being ſpread abroad every where, in ſuch Sort, that all the People hated them, even them who had not ſeen them, and particularly the four principal Kings, *Guarinoex*, *Caunabo*, *Behechico*, and *Hignanama*,

nama, and all that followed and obeyed them, being an infinite Multitude, were very deſirous to turn the *Spaniards* out of the Country.

Only *Guacanagari*, King of *Marien*, did not ſtir, but on the contrary, kept a hundred Chriſtians in his Country, giving them Part of what he had, and treating them affectionately, as he had done from the Beginning. Some Days after the Admiral's Arrival, *Guacanagari* went to viſit him, expreſſing Sorrow for his Sickneſs and Troubles; and aſſuring him he knew nothing of the killing of the Chriſtians; that he was his Friend, and for that Reaſon all the Natives bore him ill Will, and particularly thoſe that were in Arms in the *Vale Royal*, and other Places. The Admiral reſolving to take the Field, in order to diſperſe thoſe People, and reduce the Iſland to Peace, *Guacanagari* offered to bear him Company with his Subjects; but before he went out in Perſon, he ſent to begin the War with *Guatiguanti*, who had killed the ten Chriſtians, that the Puniſhment might not be delayed, and to prevent his growing bolder. They killed ſeveral of his Men, and took many Priſoners; and he fled, and ſome of the Priſoners were ſent to *Spain*. But as *Caunabo* was the moſt potent Lord of all the Iſland, and brave in his Perſon, and had three valiant Brothers, being King of the Province they called *Maguana*, the Admiral had his Eye more on him; and thinking it would be the beſt to ſubdue him by Policy, becauſe to do it by Force would be difficult, he contrived to ſend *Alonſo de Hojeda*, with nine *Spaniards*, under Colour of carrying him a Preſent.

The *Indians* valued Tin more than Gold, and rejoiced when they got any of it, or of the other Metals they carried from *Spain*, thinking they came down from Heaven; and when the Bell at *Iſabella* rung, and the *Spaniards* upon it went to Church, they thought it ſpoke, and the Fame of it reached *Caunabo*; who had often thought of begging it of the Adelantado, that he might ſee the Turey of *Biſcay*, ſo they called the Tin; for Turey, ſignifies Heaven; and they ſo highly valued Tin and other Metals, that they called it Turey, and the *Spaniards* added of *Biſcay*, and therefore they ſaid the Turey of *Biſcay*. *Hojeda* being come to the Province of *Maguana*, about 60 or 70 Leagues from the Colony of *Iſabella*, the *Indians* were in a Conſternation to ſee him on Horſe back, as believing that the Man and Horſe were all of a Piece.

They told *Caunabo* that ſome Chriſtians were come, being ſent by the Admiral, whom they called *Guamiquini*, and that they had brought him a Preſent of that they called Turey *de Biſcay*, which very much rejoiced him. *Hojeda* being introduced, kiſſed his Hand, as the reſt did, and then ſhewed him the Preſent, being Fetters and Manacles, very bright and well poliſhed, that looked like Silver: He told him the Kings of *Spain* wore them, becauſe they came from Heaven, that they were wont to put them on at the *Areitos*, ſo the *Indians* call their Dancing Matches; and that it would be proper for him to go with them to bathe himſelf in the River *Yaqui*, which was half a League off, that he would there put them on him, and he ſhould come back on Horſe-back, and then would look like the Kings of *Spain*. Accordingly he went one Day, attended by a few Servants, with *Hojeda*, to the River; little imagining that nine or ten Men ſhould have a Deſign upon him, in a Place where he was ſo powerful, he waſhed and refreſhed himſelf, and being very earneſt to try on the Preſent, having ordered the *Indians* to keep at a Diſtance, though they always avoided being near the Horſes; they ſet him up behind *Hojeda*, and put on the Fetters and Hand-cuffs, the King obſerving all very attentively; *Hojeda* took two turns about, the better to palliate his Deſign, and the third time rode off with the *Spaniards* about the Horſe, till the *Indians* loſt Sight of them; then they drew their Swords and threatened to kill him if he did not ſit ſtill whilſt they tied him with Cords to *Hojeda*; and travelling with Expedition, they arrived at *Iſabella*, and delivered him to the Admiral, who kept him in his Houſe, fettered, and when the Admiral came in he never paid him any Reſpect, though he did *Alonſo de Hojeda*; being aſked why he did ſo, he anſwered, that the Admiral durſt not go to his Houſe to ſeize him, and *Hojeda* did.

The Admiral reſolved to ſend him into *Spain*, and being embarked with other *Indians*, there aroſe ſo great a Storm, that the Ship was caſt away, and *Caunabo* and the *Indians* periſhed; upon which the Admiral ordered two Caravels to be provided, that he might not be left without Ships. But let us now look over to *Spain*.

The Return of *Anthony de Torres* was very pleaſing to their Majeſties, which they ſignified to the Admiral by his Brother, giving him Thanks for the Toils he underwent, promiſing always to ſupport him. And foraſmuch as their Catholic Majeſties were willing to pleaſe the Admiral, and that this Affair of the *Indies* ſhould proſper, they ordered the Dean *John Roderiguez de Fonſeca* to fit out four Ships with Expedition, furniſhed with ſuch Things as the Admiral required: And they appointed *Anthony de Torres* to return with them; by whom they wrote to him their Letter, dated at *Segovia* the 16th of *Auguſt*, again repeating their Thanks for his good Services, promiſing to promote him to the utmoſt, becauſe all he had ſaid and propoſed had proved as true as if he had ſeen it before he went upon the Diſcovery: And tho' they had received the Account he had ſent them, yet they deſired he would more particularly acquaint them what Iſlands he had diſcovered, the Names of them before, and thoſe he had given them, with the Diſtances from one to another; what he had found in every one of them, what ſort of Weather there was in thoſe Parts every Month, and how the Things that were ſowed came up, becauſe ſome ſaid there were two Winters and two Summers, and various ſorts of Birds: That all the ſeveral Things he had aſked for in his Memorial were ſent him. And to the end that they might oftener hear from him, it was thought expedient that a Caravel ſhould go from *Spain* every Month, and one return from the *Indies*. The Affairs with *Portugal* being adjuſted, they had ſent him a Copy of the Articles concluded, that he might know and obſerve them on his Part: That as for the Line of Partition that was to be drawn, that being a Matter of much Difficulty and great Truſt, their Highneſſes could wiſh, if it were poſſible, the Admiral ſhould be preſent and draw it, together with thoſe that were to be employed about it by the King of *Portugal*; and that in caſe he could not come himſelf, he ſhould ſend his Brother Don *Bartholomew*, or ſome other intelligent Perſon with Draughts and authentic Relations, and his Opinion concerning what ought to be done in the Caſe with the utmoſt Expedition, that it might come in time, and not diſappoint the King of *Portugal*.

The ſeizing of *Caunabo* very much incenſed his Brethren, who reſolved to make War upon the *Spaniards* with the utmoſt of their Force. The Admiral, perceiving that abundance of Men drew together, and all the Country armed, took the Field with two hundred Foot, twenty Horſe, and twenty Wolf-Dogs; which, as the *Indians* were naked from Head to Foot, made terrible Havock among them. There were no more Soldiers, becauſe the reſt were ſick. The Admiral ſet out on the 24th of *March* 1495, taking along with him his Brother, the Adelantado, Don *Bartholomew Columbus*, and the King *Guacanagari* with his Men. He entered the *Royal Plain*, and diſcovered the Enemies Army; in which King *Manicatex* had a great Number of Men, and the whole ſeemed to amount to an hundred thouſand. The Adelantado gave the Charge, and the Men and Horſes and the Dogs ſo terrified them, that they were ſoon routed, and a vaſt Number of them were killed and taken, the latter being adjudged Slaves, and many ſent into *Spain* on board *Anthony de Torres*'s four Ships. The Admiral continued ranging round about the Iſland near ten Months, ſeverely puniſhing thoſe he found guilty, having ſome Encounters with *Caunabo*'s Brothers, who made the greateſt Reſiſtance; but finding their Power too weak, they and *Guarincex*, being the chief Kings in the Iſland, reſolved to ſubmit themſelves to the Admiral.

The Admiral having thus reduced all the People under the Obedience of their Catholic Majeſties, ordered they ſhould pay Tribute in this Manner: The Inhabitants of the Province of *Cibao*, and thoſe of the *Royal Plain*, and thoſe near the Mines, above fifteen Years of Age, to pay a ſmall Hawk's Bell full of Gold quarterly; and all other Perſons, a Quarter of an hundred Weight of Cotton each; and only King *Manicatex* to pay every Month half a Gourd full of Gold, worth an hundred and fifty Peſos. A certain Coin made of Copper or Braſs with a certain Figure on it was ſtruck, and changed upon every Payment of the Tribute, that every tributary *Indian* might wear it about his Neck, in order to ſhew who had paid. Upon this Occaſion *Guarinoex*, King of the great *Royal Plain*, offered the Admiral to ſow Corn throughout the Country from *Iſabella* to *Santa Domingo*, which is from Sea to Sea fifty-five Leagues Diſtance, which would furniſh all *Caſtile* with Bread, provided he would not require any Gold of him, becauſe his Subjects did not know how to gather it. But the Admiral being a Stranger, alone, and envied by the Miniſters of their Catholic Majeſties, and, like a diſcreet Man, being ſenſible that the Wealth he ſent muſt be his Support, he preſſed for Gold, tho' in other reſpects he was a good Chriſtian, and feared God. And accordingly he moderated the Tribute, being ſenſible that it could not be paid; for which ſome had fled to the Mountains, and others wandered into remote Provinces.

This Oppreſſion, and the *Indians* ſeeing there was no likelihood of the *Spaniards* leaving the Country, becauſe there were no Ships in the Harbour, and they built Houſes on the Land with Stone and Timber, made them melancholy; and they aſked them, Whether they ever deſigned to return home? And having found by Experience, that the *Spaniards*, compared with them, were very great Eaters, they thought they had come thither only to eat; whereupon, obſerving that many of them were ſick, and that the Proviſions brought them from *Spain* were ſpent, many Towns conſpired to contrive ſome Method that they might all periſh, or, to avoid that, be obliged to depart the Iſland.

9. In order to puſh this Deſign with Effect, the *Indians* thought beſt to forbear ſowing, that there might be no Corn, and to retire themſelves to the Mountains, where they had many good Roots to eat, and might help out with hunting Utias, a ſort of Rabbit, whereof there is a vaſt Plenty. This Contrivance little availed them; for though the *Spaniards* ſuffered much through Hunger, and in Purſuit of the *Indians*, they, however, went not away; but many dying through downright Want obliged them to eat loathſome Things, ſo that all the Calamity fell upon the *Indians* themſelves; for they ranging about the Mountains with their Wives and Children, enduring much Hunger, and having no Opportunity to hunt, fiſh, and get Proviſions, the Hills and Rivers about which they ſkulked being full of Damps, a peſtilential Diſtemper reigned among them; ſo that what through this, and the Wars, till the Year 1496, one Third of the Inhabitants periſhed.

But let us now look over to *Spain*, where Father *Boyl* and Don *Pedro Margarite*, as they agreed to go away together without Leave, ſo they alſo combined in ſpeaking ill of the *Indies*, and miſrepreſenting the Enterprize, becauſe they had not found Gold for them to plunder, in Cheſts, or growing on the Trees. They alſo alledged that the Admiral did not behave well, not having been in the Iſland from his Return thither in the ſecond Voyage, till he came back from the Diſcovery of the Iſland of *Cuba*, full four Months. And there being Letters alſo that gave an ill Character of the Admiral, by thoſe who went on board the four Ships under the Command of *Anthony de Torres* (for there are always Malcontents) their Catholic Majeſties, at the Time the Admiral took the Field againſt the *Indians* in the *Royal Plain*, ſent away *John Aguado*, a Native of *Seville*, Groom of the King's Bed-Chamber, to obſerve what was doing in the Iſland *Hiſpaniola*, taking with him four Ships laden with Neceſſaries for the Relief of the People there.

John Aguado carried with him Credentials, dated *April* the 9th, 1495, and arrived at *Iſabella* about *October*, at the Time when the Admiral was carrying on the War againſt *Caunabo*'s Brother in the Province of *Maguana*. At *Iſabella*, by Words, and even by Actions, he pretended to have extraordinary Authority, interpoſing in Matters of Government, ſeizing ſome Perſons, and reproving the Admiral's Miniſters, ſhewing little Reſpect to Don *Bartholomew Columbus*, who had been left Governor there during his Brother's Abſence. Nor was it long before *John Aguado* thought fit to go after the Admiral, and took Horſe and Foot along with him: And thoſe who went with him by the way gave out, that another Admiral was come, who would put the former to Death; and the Natives being diſcontented on account of the Wars and of the Tribute of Gold, they were much pleaſed with this News; and ſome Caziques met privately in the Houſe of King *Manicatex*, whoſe Dominions were near the River *Yaqui*, where they agreed to give in their Complaints againſt the Admiral, and to ſeek Redreſs from this new Miniſter.

The Admiral being informed that *John Aguado* was looking for him, reſolved to return to *Iſabella*, where in the Preſence of the People he read their Highneſſes Letter, with Sound of Trumpet, and great Solemnity: *John Aguado* could not forbear very ſoon diſcovering his Indiſcretion, thruſting himſelf into many Affairs, without any Reſpect to the Admiral, and thereby giving an ill Example to others. His Conduct being pernicious to the Admiral, the bold Threats he made, and the People being diſcontented on account of the Troubles, and becauſe they had nothing to eat but the Allowance given them out of the King's Stores, which was a Porringer of Wheat, ground in a Hand-mill by ſome, and by others eaten boiled, and a Slice of ruſty Bacon, or rotten Cheeſe, with a few Beans, or *Spaniſh* Peas, and no Wine, and the Admiral obliging them, as they were in the King's Pay, to work at the Fortifications, his own Houſe, and other Structures, they complained to *John Aguado*; for as to thoſe who were in Health, by ranging about the Iſland they fared better; and he thought theſe Complaints ſufficient to lay before their Majeſties.

At this Time the four Ships that had carried over *John Aguado* periſhed in the Harbour, in thoſe Tempeſts which the *Indians* call Hurricanes, and there was nothing left to carry him back but the Admiral's two Caravels, who obſerving his Preſumption, and being informed that others had miſrepreſented him at Court, where he had nothing to ſupport him but his own Merit, he reſolved to appear before their Majeſties, to clear himſelf of all thoſe Slanders, and at the ſame Time acquaint them with what he had found, in his ſecond Diſcovery, upon the Iſland of *Cuba*, and his Opinion as to the Partition that was to be made of the Ocean between the two Crowns of *Caſtile* and *Portugal*: And to the end that all Things might be thoroughly ſettled, he would firſt leave other Forts in a good Poſture, which he had begun, beſides that of *St. Thomas*, for the Security of the Country, being the *Magdalen*, called the *Lower Macorix*, in the *Royal Plain* belonging to the Cazique *Guanaconel*, three or four Leagues from the Place where the Town of *St. Jago* now ſtands; another called *St. Catherine*; another on the Bank of the River *Yaqui* on the Side of *Cibao*, called *Eſperanza*; another in the Kingdom of *Guarinoex*, in the *Royal Plain*, called the *Conception*. The Caziques, being much oppreſſed by the Burthen of the Tribute, diſcovered to the Admiral that there were good Gold Mines on the South Side, and that he might ſend his *Spaniards* for it.

Now as it concerned the Admiral to diſcover much of that Sort, to ſupport his own Credit; and this coming at the Time when he was reſolved to return to *Spain*, he ſent *Francis de Garay* and *Michael Diaz*, with ſome Men and the *Indian* Guides: They went from *Iſabella* to the Fort *Magdalen*, and thence to the *Conception*, all the Way over the *Royal Plain*: They next ventured through a Paſs two Leagues in Length, which led them into another Plain, called *Bonao*: They advanced ſome Leagues farther along the Ridges of *Bonao*, and came to a great River called *Hayna*, very fruitful, and where they were told there was much Gold, as there was in all the Brooks, which they found true; for, digging in ſeveral Places, they met with ſuch Plenty, that one Labourer, in a Day, could get above three Peſos: Theſe they called the Mines of *St. Chriſtopher*, from a Fort the Admiral ordered to be there built, and afterwards they were called the Old Mines.

When the Caravels were equipt and provided, the Admiral appointed his Brother Don *Bartholomew Columbus* his Lieutenant, a Perſon capable of a great Command; and, in caſe he died, his Brother *James*; earneſtly charging the People to be obedient to him: He alſo appointed *Francis Roldan*, a Man of good Underſtanding, and who alſo had behaved himſelf well in his Office of Alcade, and others he had employed him in, chief Alcade of the whole Iſland, to adminiſter Juſtice; for tho' he was not a Lawyer, yet being his Servant, and a diſcreet Man, he thought fit to entruſt him in that Place. He went aboard one of the Caravels, and *John Aguado* went in the other; and in regard that their Catholic Majeſties had ordered that the moſt ſickly, and others whoſe Wives and Kindred had complained that the Admiral would not permit them to return into *Spain*, ſhould have Leave, he took on board to the Number of two hundred and twenty, or better. He ſailed on the 10th of *March* 1496, and, going to take a View of *Puerto de Plata*, carried his Brother Don *Bartholomew* along with him, becauſe he deſigned to ſettle a Colony there.

Don *Bartholomew* returned by Land; and the Admiral, by reaſon of contrary Winds and Currents, ſailed to the Eaſtward with much Difficulty, as far as Cape *Eganno*, and on the 22d he loſt Sight of it. On the 9th of *April* he came to an Anchor at *Marigalante*, and the next Day at *Guadalupe*, where many Women came with Bows and Arrows to hinder their Landing; and becauſe the Boats could not come near the Shore, as the Sea ran ſo high, they ſent out two *Indians*, having thirty aboard, from *Hiſpaniola*, who told the Women that they would do them no Harm, but only take in Proviſions. They anſwered, they ſhould go to the other Side of the Iſland, where their Huſbands were; and when they came, a great Number of Men appeared, ſhooting Flights of Arrows, but they fell ſhort; and the Boats firing ſome ſmall Guns, they all fled to the Mountains, leaving their Houſes and Goods, where the Chriſtians took and deſtroyed all they found. Being acquainted with the Way of making Bread, they fell to work, and made enough to ſupply their Want. Among other Things they found in the Houſes, there were Parrots, Honey, Wax, and Iron, whereof they had Hatchets to cut Looms like thoſe for Tapeſtry-work, in which they wove their Tents. Their Houſes were ſquare, and not round as is uſual in the other Iſlands. While the Bread was making, the Admiral ſent forty Men up the Country, to learn ſomething of it; who next Day returned with ten Women and three Boys, the reſt of the People being fled.

Among theſe Women was the Wife of a Cazique, whom a Man born in the *Canaries*, that was very nimble, had much Difficulty to overtake; and ſhe had got from him, but, ſeeing him alone, ſhe thought to take him, and cloſing ſhe got him down, and had ſtifled him, but that others came to his Aſſiſtance. Theſe Womens Legs were ſwathed with Cotton from the Ancle to the Knee, that they might look thick; which Ornament they called *Coiro*, and looked upon it as very genteel, and thoſe they girded ſo hard, that if it happened to ſlip off the Leg, that Part appeared very thin. The ſame both Men and Women uſed in *Jamaica*, who ſwathed their Arms up to their Armpits, that is, about the ſmalleſt Parts, like the old-faſhioned Sleeves among us. Theſe Women, as ſoon as their Children could ſtand upon their Legs, gave them a Bow, that they might learn to ſhoot; and they all wore their Hair long and looſe upon their Shoulders; nor did they cover any Part of the Body. That Lady they took ſaid, that the Iſland was only inhabited by Women, and that thoſe who would have oppoſed them on landing were Women, except only four Men, who were there accidentally from another Iſland; for at a certain Time of the Year they came to ſport with them. The ſame was obſerved by Women of another Iſland, called *Matrimonio*, of whom ſhe gave the ſame Account we read of the *Amazons*; and the Admiral believed it, by what he ſaw among thoſe Women, becauſe of their Courage and Strength. They alſo ſay theſe Women ſeem to be endowed with clearer Underſtandings than thoſe of the other Iſlands; for in other Places they reckon the Day by the Sun, and the Night by the Moon, whereas theſe Women reckon by Stars, ſaying, when ſuch a Star is North, then it is time to do ſo and ſo.

When they had made Proviſion of Bread for twenty Days, beſides what they had aboard, the Admiral reſolved to continue his Voyage towards *Spain*; but perceiving this Iſland was an Inlet to the others, he thought fit firſt to ſatisfy thoſe Women with ſome Gifts for the Loſs they had ſuſtained, and then ſent them all aſhore, except the chief Lady, who choſe to go into *Spain* with her Daughter, among the other *Indians* of the Iſland *Hiſpaniola*, one of whom was *Caunabo*, who, it has been ſaid, was the chief Man in all the Iſland, and that becauſe he was not a Native of it, but of the *Caribes*; and therefore the Lady was content to go into *Spain* with the Admiral, who having furniſhed himſelf with Bread, Wood and Water, ſet ſail on the 20th of *April* from *Guadalupe*, with the Wind very ſcant, keeping near the Latitude of 22; for at that Time they had not found out the Method of running away North, to meet the South-weſt Winds.

Having made but little Way, and the Ships full of People, on the 20th of *May* they all began to be much afflicted for want of Proviſions, which was ſo great, that they had but ſix Ounces a Day for each Perſon, and leſs than a Pint of Water, without any thing elſe. And tho' there were eight or nine Pilots in thoſe two Sloops, yet none of them knew where they were: But the Admiral was confident they were but a little Weſt of the *Azores*. Thus continuing their Voyage, tho' all the Pilots were at a Loſs, on the 8th of *June* they were in ſight of *Odemira*, between *Liſbon* and *Cape St. Vincent*, all the Pilots for ſeveral Days having ſtill made for the Land, except the Admiral, who the Night before ſlacked his Sails for fear of Land, ſaying, he did ſo becauſe they were near *Cape St. Vincent*, which all laughed at, ſome of them affirming they were near the *Engliſh* Channel; and even thoſe that erred leaſt ſaid they were on the Coaſt of *Galicia*, and therefore ought not to take in any Sail, it being better to dye on Shore than ſtarve miſerably at Sea; the Scarcity being ſo great, that there were many, who like the *Canibals*, were for eating the *Indians* they had a-board: And others, to ſave the little Proviſion there was left, were for throwing them over-board; which they would have done, had not the Admiral uſed all his Authority to prevent it, conſidering they were human Creatures; and therefore it ſo pleaſed God to reward him with the Sight of Land next Morning, as he had promiſed them all; for which reaſon he was afterwards looked upon by the Seamen as moſt expert, and almoſt prophetical in Sea Affairs.

10. The Admiral being landed in *Spain*, began to prepare for his Journey to *Burgos*, where he was favourably received by their Catholic Majeſties, who were there celebrating the Nuptials of Prince *John*, who married *Margaret* of *Auſtria*, a Daughter of *Maximilian* the Emperor, who was conducted into *Spain*. The Admiral being come to *Burgos*, he preſented their Majeſties with ſeveral Things he brought from the *Indies*, as well Birds and Beaſts, as Trees, Plants, Inſtruments, and other Things the *Indians* uſe for their Service and Diverſion; alſo ſeveral Girdles and Maſks, with Eyes and Ears of Gold; beſides much Gold Sand, groſs and ſmall, as Nature produced it, ſome Grains as big as Vetches, ſome as Beans, and as Pigeons Eggs. This was not always ſo much valued, becauſe in Proceſs of Time there were Pieces of Gold found that weighed above thirty Pounds: Yet at this Time what he brought was much eſteemed, in Hopes of what was afterwards found; and accordingly their Majeſties received it in good part. When the Admiral had given them an Account of all that related to the improving and peopling the *Indies*, he was deſirous to return with Speed, for fear ſome Diſaſter ſhould happen in his Abſence, eſpecially becauſe he had left the People there in great want of all Neceſſaries.

Though he preſſed hard on this Account, yet the Affairs of that Court being ſubject to Delays, he could not be ſo ſoon diſpatched, but that ten or twelve Months elapſed, before he obtained two Ships; which were ſent with Succours under the Command of *Peter Fernandez*

Colonel. Theſe ſet out in *February*, 1498; and the Admiral ſtaid to negotiate the obtaining ſuch a Fleet as was requiſite for him to return to the *Indies*. But he was forced to ſtay above a Year at *Burgos* and at *Madera del Campo*, where, in the Year 1499, their Catholic Majeſties granted him many Favours, and gave the neceſſary Orders for his Affairs, and for the Government and Settling of the *Indies*.

His Credit with their Catholic Majeſties was ſtill tolerably good, tho' he had met with ſome Enemies in *Spain*, as well as the *Indies*, who laboured all they could to decry his Merit, and to propagate an Opinion, that he had not done ſo much as he had pretended, or as at firſt, and upon his immediate Return from the *Indies*, was univerſally allowed him. For ſuch is the Nature of Envy, that, though often ſtruck dumb by the Luſtre of true Merit, it is a Monſter never to be ſlain, at leaſt ſo long as the Hero lives againſt whom it directs its Rage. In time, therefore, and after brooding in Silence, Envy hiſſes again as loud as ever; and as Meanneſs is a Quality inſeparable from the Multitude, thoſe Hiſſes, tho' over and over exploded, are a-freſh liſtened to and regarded. This has been the Caſe of all the great Men that the World has produced, and therefore we need not wonder it was the Caſe of *Columbus*. But to vindicate his Memory, to ſupport the Truth, and, as far as it is in our Power, to curb the Malice of ſucceeding Times towards Men of equal Worth, we will beſtow a few Remarks upon this Section likewiſe, in order to render it more uſeful and inſtructive to our inquiſitive, generous, and public-ſpirited Readers.

11. In order to explain clearly the Controverſy between the Admiral and his Opponents, we are to obſerve, that they acted and reaſoned upon very different Principles. The Admiral at firſt intended to diſcover Lands hitherto unknown to this Part of the World; which, from the Notion he had of their Situation, he believed to be a Part of the *Indies*, and conſequently abounding in thoſe Commodities which are brought from the *Indies*, and are moſt eſteemed in *Europe*. His Conjecture, certainly, was not improbable, nor can it be ſaid that he failed of Succeſs, ſince he opened a Paſſage to the new World, and plainly made it appear that he had Skill ſufficient to navigate a Ship to thoſe Coaſts, of which he had no Notice whatever, but from the Light of his own Reaſon. He brought over from thoſe Countries Gold, ſome Sorts of Spice, Birds of beautiful Colours, ſeveral kinds of rich Woods, both in Colour and Scent, and People of quite a different Complexion from the Inhabitants of *Europe*. In this Second Voyage he had proſecuted and improved his former Diſcoveries to ſuch a Degree, as to be able to affirm, that there were innumerable Iſlands in theſe new Seas; that they were all of them Countries pleaſantly ſituated, bleſſed, for the moſt part, with a rich Soil, and abundance of fine Rivers, plentifully ſtocked with Wood, and in all Appearance with Metals; inhabited by a Crew of weak, timorous, and ſlaviſhly-inclined People, who were able to make little or no Reſiſtance againſt the *Europeans*, and who were likely, therefore, together with their Lands and Goods, to fall entirely into their Power, and become a Part of their Poſſeſſion. He had formed a Scheme of Civil Government, and ſettled a very effectual Diſcipline among the Soldiers he had left behind him, in order to ſecure all he had thus diſcovered, to the Uſe of their Catholic Majeſties, as well as to ſearch out and render manifeſt all the Advantages that might be derived to the *Spaniards* from his Diſcoveries. In this Light, to be ſure, he had performed all he had promiſed; was well intitled to all the Grants that had been made him, and merited the Favour of his Sovereigns, as well as the Applauſe of their Subjects.

But thoſe who endeavoured to leſſen his Merit, to obſcure his Fame, and to bring him into Diſcredit with their Catholic Majeſties, went upon this Pretence, that he had undertaken to diſcover a Country exceedingly rich, and that on his Return from his firſt Voyage he had boaſted of entire Succeſs in this reſpect; whereas they who went over with him in his ſecond Voyage had found no ſuch Matter, had not been able to collect any great Quantities of Gold, or to make vaſt Fortunes at once, as they had promiſed themſelves. It is very remarkable that when their Catholic Majeſties applied to the Pope for his Grant of theſe Lands which were already diſcovered, and of thoſe that by the Skill and Induſtry of the Admiral, and ſuch as proſecuted his Deſigns, ſhould be diſcovered, the principal Reaſon aſſigned for the obtaining this Grant, was the converting theſe *Indian* Nations to the Chriſtian Faith, and thereby enlarging the Bounds of the Church. It was therefore altogether abſurd and ridiculous to pretend, that becauſe there were not as many Gold Mines found as were expected, or that thoſe Mines were not ſo rich as they at firſt flattered themſelves they were, this Diſcovery ſhould be either neglected or deſpiſed, inaſmuch as ſuch a Behaviour was altogether inconſiſtent with thoſe high Profeſſions of Zeal for the Chriſtian Faith, from whence their Majeſties had aſſumed the Title of Catholic. Yet, what was no leſs remarkable, the Perſon who was at the Head of the Admiral's Enemies, was Father *Boyl*, the very firſt Chriſtian Prieſt, that in Compliance with the Reaſons offered to the Pope, their Catholic Majeſties had ſent over to convert the *Indians*. This Man, with all his Heat and Malice, could not deny, but there were People enough to be preached to, and that they were tractable enough in point of Religion; his only Objection was, that it did not appear that there was ſo much Gold in the Country where he had been as he expected; and this Objection wrought ſo powerfully with many of the *Spaniſh* Clergy, that from being great Promoters of this new Diſcovery, and warm Admirers of this great Man who had made it, they began now to treat the Thing ſlightly, and to miſrepreſent the Admiral as one who had not kept his Word.

The wiſe *Columbus* foreſaw all this in the *Indies*, which induced him to take the Meaſures he did of putting the *Indians* under a Tribute, that he might ſend over conſiderable Quantities of Gold, that the Credit of this Diſcovery might be kept up, and that he might be able to perfect, for their Catholic Majeſties Benefit and his own, that Deſign in which hitherto he had beyond all reaſonable Expectation ſucceeded. This exceſſive and ill-timed Appetite for Gold produced all thoſe Miſchiefs and Inconveniencies in the firſt *Spaniſh* Colonies to which we have ſeen them expoſed in the Courſe of this Section, and which there is no doubt the Admiral himſelf foreſaw, at the ſame Time that he was ſenſible he could not avoid them. It was to ſet theſe Things in a clear Light, to juſtify his own Conduct, to prevent the new World from being loſt again as ſoon as it was found, and to ſecure if poſſible a Reward for his paſt Labours, by obtaining the Means of rendring them effectual, that he came over to *Spain*; where we have ſeen how he was received, and what Difficulties he met with in procuring the Supplies that were neceſſary for undertaking a third Voyage to the *Weſt Indies*, the Hiſtory of which is to be the Subject of the next Section, and which will contain Events ſtill more curious, and more entertaining, than thoſe which have been already related.

SECTION IV.

The Third Voyage of Don CHRISTOPHER COLUMBUS, *to the* Weſt Indies, *in which he firſt ſaw the Continent of* America, *including the Troubles to which he was expoſed, and his being ſent home in Irons.*

1. *The Difficulties the Admiral had to ſurmount, in procuring a Fleet ſufficient for his intended Return to* Hiſpaniola. 2. *A complete View of the Tranſactions in the* Spaniſh *Colonies, and of the Rebellion that happened there during the Admiral's Abſence.* 3. *What happened to the Admiral in the Proſecution of the Voyage, and the Meaſures he took for ſending Supplies.* 4. *The Admiral ſteers a new Courſe for Diſcovery, and actually falls in with Part of the Continent, now called the Province of* Paria. 5. *Examines it, and enters into Correſpondence with the Natives; and yet was not clearly convinced whether it was the Continent or not.* 6. *Paſſes through the* Boca del Drago, *and reſolves to ſteer directly for* St. Domingo. 7. *The Arrival of the Store-ſhips before the Admiral, and his coming to the Iſland.* 8. *A ſuccinct Hiſtory of the Troubles in* Hiſpaniola, *and of the Admiral's Endeavours to pacify them; which however prove altogether ineffectual.* 9. *The Court of* Spain, *being alarmed at the many Complaints ſent from the* Indies, *depute a Perſon to go thither, with full Power to hear and determine them.* 10. *In conſequence of this extraordinary Commiſſion, the Admiral is ſent home in Irons, and his two Brothers with him.* 11. *His Arrival in* Spain, *and the Reception he met with.* 12. *The true State of the Diſcoveries made to this Time by the* Spaniards, *and their Importance.* 13. *Remarks and Obſervations on the foregoing Section, and on the Accidents that prove commonly detrimental to Diſcoveries.*

1. THE Accounts given by the Admiral Don *Chriſtopher Columbus*, both of the *Indies* in general, and of his own Conduct in particular, proved ſo ſatisfactory to their Majeſties, and to the principal Perſons who compoſed their Council, that 'twas reſolved to ſend him back again, as he propoſed, veſted with ſuch Powers, and furniſhed with ſuch Supplies, as he judged requiſite; for, when they came to be examined by competent Judges, the Complaints of his Enemies appeared to be as ill-founded, as the Calumnies invented by mean Minds againſt Perſons of diſtinguiſhed Merit uſually are. But tho' his Enemies were not able either to deprive him of his Authority, or to hinder him from returning with a greater Meaſure thereof to the *Indies* than he enjoyed when there before, yet they had Intereſt ſufficient to throw great Obſtacles in his Way, and to delay from time to time the Performance of thoſe Promiſes that had been made him. The Succours he demanded were, eight good Ships, five hundred Men, and a ſufficient Quantity of Proviſions of all Sorts, of which he gave in a very clear and particular Eſtimate, amounting in the whole to ſix Millions of Marvedies, which make ſomething more than 4,500 *l.* of our Money. But as he well enough knew that ſuch an Embarkation could not be ſoon made, and was ſenſible alſo of the Diſtreſs to which the *Spaniſh* Colonies might be expoſed by the Delays that might attend it, he deſired that two Ships laden with Proviſions might be firſt ſent, and that he might go in Perſon with the other ſix, as ſoon as they could be got ready.

This as a Thing reaſonable in itſelf their Catholic Majeſties very readily conſented to, and yet it was a long Time before he could procure the two firſt Ships to be ſent away; and as for the other Ships, the equipping of them went on ſo ſlowly, and the Money neceſſary for that Service was iſſued ſo negligently, that the Admiral found even his large Stock of Patience almoſt exhauſted before this Fleet was ready to ſail. This was chiefly owing to the Ill-will of Don *Juan Fonſeca*, Archdeacon of *Seville*, and afterwards Biſhop of *Burgos*, who had been formerly one of the beſt Friends the Admiral had, but was now entirely gained over by his Enemies, chiefly by the Intrigues of Father *Boyl*, and proved afterwards himſelf the moſt violent Enemy the Admiral had. But how much ſoever theſe Diſcouragers might perplex and diſturb the Mind of this great Man, they were far enough from diverting him from his Purpoſe, or even from leſſening that Zeal and Diligence with which he had hitherto proſecuted this great Affair: On the contrary, the more Trouble he met with, the more Impediments were thrown in his Way, with ſo much the greater Vigor, with ſo much the more Conſtancy, he applied himſelf to the Performance of what was requiſite to accompliſh it.

It was with this View that he went himſelf to *Seville*, to haſten the Preparations that were making there, and to give ſuch Directions as he thought might moſt contribute to render theſe Preparations effectual. Yet it is more than probable, that, with all his Activity and Diligence, he would ſcarce have been able to have carried his third Expedition into Execution, if it had not been for the Countenance and Protection afforded him by Queen *Iſabella*, who was a Princeſs of vaſt Underſtanding, and of a generous and magnanimous Diſpoſition; whereas her Huſband King *Ferdinand*, though he was undoubtedly a great Politician, yet there was ſuch a Darkneſs in his Temper, and ſuch a Doubleneſs in his Conduct, that there was no great Cauſe to wonder that the Admiral was not much in his Favour, or that the King did not ſtand very high in his Eſteem. But before we come to ſpeak directly of the Admiral's Voyage, it will be neceſſary to give the Reader an Account of what paſſed in the *Indies* during his Abſence.

2. The three Ships the Admiral ſent from *Cadiz* arrived at *Iſabella* about the Beginning of *July* 1496, to the great Joy of the People for the Proviſions they brought, and the News of the Admiral's ſafe Arrival in *Spain*; for Hunger being the greateſt Diſtemper among them, nothing ſo much rejoiced them as Ships coming with Proviſions from home. Don *Bartholomew Columbus* diſpatched the Ships for their Return, and ſent aboard them three hundred *Indian* Slaves, becauſe their Majeſties having been informed that ſome Caziques killed the *Spaniards*, they ordered that all who were guilty ſhould be ſent into *Spain*. And foraſmuch as the Admiral had alſo acquainted their Majeſties, that upon his Return from his Diſcovery along the Iſlands of *Cuba* and *Jamaica*, as he failed along the South Coaſt of *Hiſpaniola*, it had appeared to him a moſt beautiful Country, and that there were fine Inlets which he thought might be good Harbours, and could not be far from the beſt Mines he had diſcovered, which he called *St. Chriſtopher*'s, their Highneſſes, in the Letter he fonnd at *Cadiz*, anſwered him, that he might do as he thought beſt in that Caſe, which they would approve of, as done for their Service. Hereupon the Admiral wrote from *Cadiz* to his Brother Don *Bartholomew*, ordering him immediately to go over to the South Side, and find a convenient Harbour; and if the Place was good, to carry away all that was at *Iſabella*, and abandon it.

Accordingly Don *Bartholomew*, leaving his Brother Don *James* in his Place, ſet out with the ableſt Men for the Mines of *St. Chriſtopher*, and arriving at the River *Ozama*, ſo called by the *Indians*, found it very agreeable, and inhabited on both Sides. He viewed and ſounded, and found that Ships of above three hundred Tons Burthen might come up it. Whereupon he reſolved to build a Fort of Earth on the marſhy Part of the River, at the Mouth of the Harbour on the Eaſt Side. He ſent for Men from *Iſabella* to begin the Settlement, and gave it the Name of *Santa Domingo*, either becauſe he came thither on *St. Dominic*'s Day, or on a *Sunday*, called in *Spaniſh Domingo*, or becauſe his Father's Name was *Dominic*; and tho' the Admiral always called it the *New Iſabella*, yet the other Name has prevailed. There remained at the *Old Iſabella* the People that were building two Caravels, and ſome other Men: The Work being begun, Don *Bartholomew* reſolved to view the Kingdom *Xaragua*, of whoſe State and Government he had heard much Diſcourſe. Having left *Santa Domingo*, thirty Leagues from thence he came to the great River *Neyba*, where a numerous Army of *Indians* were drawn up; for *Bobechico* King of *Xaragua*, being

ing informed that the *Spaniards* were coming, reſolved to oppoſe them. Don *Bartholomew* gave them to underſtand, that he came not to make War, but to viſit the King and his Siſter, and was thereupon received with much Pomp and Rejoicing. Proceeding thence thirty Leagues farther, he came to *Xaragua :* All the prime Men of the Province received him with Dancing and Singing, and other ſorts of Rejoicings ; he was conducted to the King's Palace, where Supper was ready, being Bread made of Cazabi, Utias boiled and roaſted, and a prodigious Quantity of Sea and Freſh-water Fiſh. After Supper they conducted all Don *Bartholomew*'s Company to their reſpective Quarters, their Beds being Cotton Hammocks. The next Day, in the Square where the King, his Siſter, and Don *Bartholomew* were preſent, there appeared two Parties of Men armed with Bows and Arrows, who made a Skirmiſh after the Manner of *Spain*, practiſed with Canes inſtead of Spears ; but by Degrees they began to grow hot, and many of them were wounded, and four dropped down dead ; and all this with much Satisfaction, without regarding the Dead and Wounded ; and many more had ſuffered, had not the King, at the Requeſt of Don *Bartholomew* and the *Spaniards*, commanded them, when moſt furious, to give over.

After the Entertainment Don *Bartholomew* told *Bobechico* and his Siſter, that his Brother, the Admiral, was gone to viſit their Majeſties of *Spain*, his Sovereigns, to whom many Lords of the Iſland were already become Tributaries ; and that he came thither to the end that he ſhould own and pay Tribute to them. He anſwered, That as no Gold was found throughout all his Dominions, he could not pay Tribute. Don *Bartholomew* told him, it was not his Deſign that any one ſhould pay Tribute any otherwiſe than what his Country afforded ; upon which he ſaid, he would give him as much Cotton and Cazabi as he would demand, and ordered his People to plant Cotton, becauſe they were to pay Tribute of it to their Majeſties of *Spain*, and, in their Name, to the Admiral, and to his Brother Don *Bartholomew*, who was then in his Houſe. Having thus concluded with *Bobechico*, Don *Bartholomew* thought fit to return to the Mines of *Cibao* and Colony of *Iſabella*, and found that near 300 Men had died of ſeveral Diſeaſes, which troubled him very much ; and the more, as no Ships came with Proviſions ; for which Reaſon he reſolved to diſtribute the Sick and Infirm among the ſeveral Forts there were between *Iſabella* and *Santo Domingo* and the *Indian* Towns ; that having ſomething to eat, they might have only their Diſtemper to ſtruggle with, and not Hunger at the ſame Time.

Then, having given Orders for the carrying on the Building of the two Ships, he went towards *Santo Domingo*, gathering in the Tribute as he proceeded. The *Indians* of the Plain, and thoſe of *Cibao*, thinking it hard to pay Tribute, and entertain Soldiers at their own Expence, and ſuch as did eat ſo much, beſides other Things, which they looked upon as Grievances, complained to the Cazique *Guarinoex*, repreſenting, it was his Duty to endeavour to ſet himſelf and them at Liberty. *Guarinoex* being a peaceable Man, and conſidering the Force of the *Spaniards*, the Swiftneſs of their Horſes, and the ill Succeſs *Caunabo*, and others of the Province of *Cibao* had met with, refuſed to engage in a War ; but being importuned by his People, who always perſuaded him that they could get the better ; and, as ſome ſay, being threatened they would chuſe another Leader, he conſented to commence the War. The *Spaniards*, in the *Conception*, perceived thoſe Commotions, and gave Notice to thoſe at the Fort built at *Bonao*, by ſome *Indians* who remained faithful to thoſe at *Bonao*, and alſo ſent to Don *Bartholomew*, who was at *Santo Domingo*. The *Indian* made uſe of a Stratagem in carrying thoſe Letters delivered to him in a Staff that was hollow at one End ; for the other *Indians* having found by Experience, that the *Spaniſh* Letters ſpoke, endeavoured to intercept them ; and the Meſſenger, falling into the Hands of the Guards poſted on the Paſſes, pretended to be dumb and lame, anſwering them altogether by Signs and Limping, as if he was going with much Difficulty into his own Country, he eſcaped ; becauſe they thinking he had been dumb, aſked him no Queſtions ; and ſuppoſing that the Staff had been to help him on they did not ſearch it. And thus the Letter came ſafe to Don *Bartholomew Columbus* ; which proved the Safety of the *Spaniards*. As ſoon as Don *Bartholomew* came to the *Conception*, he advanced with all the *Spaniards* to fall upon 15,000 *Indians*, *Guarinoex* had drawn together, and attacked them by Surprize at Midnight, becauſe they never fought in the Night. They killed and took many ; ſeveral Lords, of which Number they executed the chief Ring-leaders of that War ; and *Guarinoex* being carried to the *Conception*, above 5000 Men followed with loud Cries, demanding their King. Don *Bartholomew* pitying them, and he, being ſenſible of *Guarinoex*'s peaceable Temper, gave him and the other Caziques up to them to their great Satisfaction, the leſs regarded by the *Spaniards*, as being vanquiſhed and ſubdued.

At this Time Meſſengers came to Don *Bartholomew* from *Bobechico* and *Anacanona* with Advice, that the Cazabi and Cotton were ready ; for when the Seeds of Cotton are planted, the Shrubs that ſprout produce Fruit in ſix or eight Months, and the higheſt of them riſe about a Fathom, tho' they begin to produce when much ſhorter. Don *Bartholomew* was reſolved to go to *Xaragua*, to gather the Tribute, and leave his Men in that Country, to give them of the Plain, and others, Reſt, tho' the Soldiers were in ſuch Want of Clothes and other Things brought from *Spain*, that they grew very uneaſy. He ſent Orders to *Iſabella*, for one of the Caravels to come to the Port of *Xaragua* to carry him, that Harbour being a large Bay, or Inlet of the Sea, dividing the Iſland into two Parts, the one of which forms Cape *St. Nicholas*, ſtretching out 30 Leagues ; the other much larger, and ends in the Cape called *Tiburon*, and the Bottom of the Bay reached within two Leagues of *Bobechico*'s Palace. Thoſe at *Iſabella* ſent the Caravel, and when it came into the Port, *Anacanona* perſuaded her Brother to go to the Port, to ſee the *Spaniſh* Canoe. Tho' *Bobechico* had two very fine Canoes, yet *Anacanona* would not go in them, but in the Pinnace. The Veſſel fired, which put the *Indians* into ſuch a Conſternation that they were ready to leap into the Water ; but ſeeing Don *Bartholomew* laugh, they compoſed themſelves. When they were aboard, the Seamen played on a Tabor and Pipe, and other Inſtruments, which much pleaſed the *Indians* ; they looked all about the Head and Stern, went aboard the Caravel, and into the Hold, and were amazed. Don *Bartholomew* ordered the Sails to be ſpread, and the Caravel to take a Trip to Sea and return to the ſame Place. The Cazique admired that ſo great a Veſſel ſhould make Way without Oars, and go forward and backward with the ſame Wind.

When they returned to *Xaragua* the Caravel was loaded with Cazabi, Cotton, and other Things, and went away to *Iſabella*, as Don *Bartholomew* did by Land. And being thus employed, *Francis Roldan*, the head Alcalde, a turbulent Man, who forgot the Admiral's Bread he had eaten, deſiring to get into Authority, by raiſing Commotions ; and taking, for his Pretence, Don *James Columbus*'s having ordered the Caravel which had carried Bread and Wine to the *Iſabella*, to be laid dry, to prevent its being ſtollen by ſome Malcontents, who deſired to go away into *Spain*, began to cabal among the labouring Men, as alſo with the Seamen, and other mean People, and thoſe that were moſt diſcontented, intimating that the Caravel would be better in the Water, and ought to be ſent into *Spain* with Letters to their Catholic Majeſties, ſince the Admiral ſtayed ſo long ; that their Wants might be relieved, and they not periſh with Hunger, or be deſtroyed by the *Indians*. That Don *Bartholomew* and his Brother would not ſend it, becauſe they deſigned to revolt, and keep the Iſland to themſelves, and to make them all Slaves, employing them in building their Houſes and Forts ; to attend them in gathering the Tribute, and enriching themſelves with Gold. The Men finding themſelves encouraged by a Perſon of ſuch Power, as the chief Alcalde, had the Impudence to ſay thoſe Things in public which before they ſcarce durſt mutter in Corners. *Roldan* required they ſhould all ſign a Paper, importing, that it was for the Public Good that the Caravel ſhould be ſet afloat ; but, as he was very ſenſible it was not fit that their Catholic Majeſties ſhould know he had been the Ring-leader of ſuch a Mutiny, he ſought plauſible Pretences to cover his Deſigns; he perſuaded the People that the beſt Way to ſecure the Friendſhip of the *Indians*, was to quit them of the Tribute: And Advice being brought that *Guarinoex*'s *Indians* did not pay the Tribute, and that they gave Tokens of Uneaſineſs, Don *James Columbus*, thinking to put *Roldan* out of the Way, ſent him with a conſiderable Part of the Men to the *Conception*, where he carried on the Mutiny more effectually, and diſarmed thoſe that would not follow. Returning to *Iſabella*, having by Force taken the Key of the Magazine, he broke the Locks in Pieces, and crying *long live the King*, took all the Arms and Proviſions he thought fit for his Followers, and ſet up for himſelf. Don *James* attempted to appeaſe the Mutiny, but *Francis Roldan* behaved himſelf ſo inſolently, that he thought fit to retire into the Fort.

The Mutineers went where the King's Cattle were, and, having taken what Cows, Mares, and Colts they thought fit, they went amongſt the *Indian* Towns, giving out that they had quarrelled with the Admiral's Brothers, on account of the Tribute they exacted, perſuaded them not to pay any, and they would defend them. The true Reaſon this Fellow behaved in this inſolent and rebellious Manner, was the Project he had formed of ſecuring all to himſelf, by ſeizing the Perſon of Don *Bartholomew*; for he made no Queſtion that the Admiral's Enemies would hinder him from returning into the *Indies*; and, perhaps, he had given them ſome Reaſon to hope, that he would from time to time tranſmit them ſuch Relations as might ſerve to juſtify their Proſecution of *Columbus*.

But while Things were in this Situation, there arrived at *Santo Domingo*, on the 3d of *February*, 1498, the Ship which the Admiral, with much Difficulty, had procured Leave to ſend to the *Indies*. Both Parties endeavoured to make themſelves Maſters of this Ship, which, however, by the Care of the Inhabitants of the Place where it arrived, was ſecured for Don *Bartholomew*; who, upon opening his Diſpatches found, that though their Catholic Majeſties were at firſt doubtful whether the Admiral had a Power to appoint a Lieutenant, and rather inclined to think he had not, by Virtue of his Commiſſion, yet upon his repreſenting that it was for their Majeſties Service he had taken this Step; and that their Affairs in the new World muſt have fallen into great Confuſion without it; they were pleaſed to confirm Don *Bartholomew* in his Title of Adelantado; which having publiſhed, it greatly promoted his Authority, and enabled him to enter into a War with the *Indians*, though it was begun upon very unjuſtifiable Motives, in as much as the *Spaniards* had laid upon them Burthens they were unable to bear: This War Don *Bartholomew* conducted with great Succeſs againſt thoſe unhappy People; but with Reſpect to the revolted *Spaniards* under *Roldan*, he could neither engage them by fair Means to return to their Duty, nor was it in his Power to reduce them by Force. As we have now run through the Hiſtory of the *Spaniſh* Colonies, during the Abſence of the Admiral, we are at Liberty to purſue the proper Deſign of this Section, and to enter on the Admiral's Third Voyage into theſe Parts.

3. The Admiral ſailed over the Bar of *San Lucar*, on the 18th of *May*, with ſix Ships, and as there was Intelligence that a *Portugueſe* Fleet lay at *Cape St. Vincent*, he, giving them the Slip, ſtood away for the Iſland of *Madera*, touched at *Puerto Santo* on the 7th of *June*, and found the Inhabitants exceedingly frighted, imagining that his Ships had been *French*; he wooded and watered and then proceeded to *Madera*, where he was joyfully received, becauſe they knew him. On the 19th he arrived at *Gomera*, where he found a *French* Ship with two *Spaniſh*, which they had taken: He retook one of them, and ſent after the *Frenchman*, and ſix *Spaniards* that were on board the others, ſeeing their Relief at hand, drove the *French* that guarded them under Hatches, and ſailed away to the Admiral. He reſolved to ſend from *Gomera* the three Ships with Proviſions to *Hiſpaniola*, believing the People there muſt be in Want, and appointed *Alonſo de Carvajal*, a worthy Man, Captain of the firſt of them; *Peter de Arana*, a Native of *Cordova*, Kinſman to Captain *Alana*, who had been left Governor of the Fort of the *Nativity*, at the firſt Diſcovery, Commander of the ſecond; and in the third he placed *John Anthony Columbus*, a Relation of his own, a Man of Capacity and Judgment; he gave them Inſtructions, and ordered that each of them ſhould command a Week in Chief, and carrying the Light, they ſhould ſail Weſt by South 850 Leagues, and then they would fall in with the Iſland *Dominica*; whence they ſhould ſteer Weſt North-weſt, to fall in with the Iſland of *St. John*; then keep along the South-ſide of it, that being the true Courſe for the New *Iſabella*, or *Santo Domingo*.

The Admiral, himſelf, being furniſhed with what he wanted, ſailed on the 12th of *June*, for the Iſland of *Hierro*, one of the *Canary* Iſlands, the fartheſt to the Weſtward: He deſigned in the Name of the Holy Trinity, as he always was wont to ſay, to ſail to the Southward of them, till he came under the Equinoctial, and ſo proceed to the Weſtward, till the Iſland of *Hiſpaniola* ſhould bear North-weſt from him, to ſee what Iſlands or Continent lay in that Part. He ſaid it was his Opinion no Man had ever ſailed that Courſe, and that the Sea there was utterly unknown. When paſt the Iſland *Hierro* he diſmiſſed the three Ships; and with one Ship and two Caravels ſtood away for the Iſlands of *Cabo Verde*, which he uſed to ſay was a falſe Name, for he had always found them dry and barren.

On the 27th of *June* he diſcovered the firſt of them, called *de la Sal*, which is ſmall; he proceeded to that of *Buena Viſta*, anchored cloſe by a ſmall Iſland, to which all the Lepers in *Portugal* were ſent to be cured, by eating the Fleſh of the Tortoiſes, and frequently waſhing with their Blood; for in the Months of *June*, *July*, and *Auguſt*, abundance of them reſort thither from the Continent to lay their Eggs in the Sand; where they ſcratch a Hole, and leave above five hundred Eggs as big as a Hen's, which being covered with Sand, are hatched by the Sun, and the little Tortoiſes run into the Sea. The Men there waiting for the Tortoiſes, turn them on their Backs, and then they cannot recover themſelves. The healthy People living on that Iſland, were only ſix or ſeven, whoſe whole Employment was to kill wild Goats, and ſend their Skins, well cured, into *Portugal*; and ſometimes they killed ſo many in a Year, that they were worth 2000 Ducats.

The Admiral ſailed from thence on the 30th, for the Iſland of *Santiago*, being 28 Leagues diſtant, and is the Chief of them. He thought to have taken Cows aboard, to carry to the Iſland *Hiſpaniola*, becauſe their Majeſties had ordered him ſo to do, but was obliged to abandon that Deſign, becauſe the Air of that Iſland being very unhealthy, the Men began to ſicken, beſides he reſolved to ſail to the Southward, to find out whether King *John* of *Portugal* had been miſtaken, who affirmed there was a Continent to the Southward. On the 4th of *July* he ſteered South-weſt, having never ſeen the Sun or Stars, ſince his Arrival at the Iſlands of *Cabo Verde*, the Sky being continually covered with a thick Fog. He gave another Reaſon for holding that Courſe, *viz.* to find out the Truth of what the *Indians* of the Iſland *Hiſpaniola* reported; That there had come thither from the South-eaſt a black People, who had the Heads of their Javelins of a Sort of Metal which they called *Guanin*, ſome of which he had ſent to their Majeſties; and the Eſſay of it being taken, it appeared that, of thirty two Parts, eighteen were Gold, ſix Silver, and the remaining eight Copper; a plain Proof that the *Weſt Indies* had been viſited by other People before the *Spaniards*.

4. The Admiral purſuing his Courſe South-weſt, he found ſome of thoſe Weeds he had met with in the Way to *Hiſpaniola*; having ſailed one hundred and twenty Leagues, as ſoon as it was Night he took the Latitude, and on the 13th of *July* the Heat was ſo violent he was afraid the Ships would take Fire, and the Men periſh; and ſo ſuddenly the Wind ceaſed, and the exceſſive Heat enſued, that no Man durſt go down between Decks to

take Care of the Caſks of Wine and Water that were falling in Pieces, the Hoops flying off them; the Wheat parched, the Bacon and ſalt Meat fried: This Heat continued eight Days; the firſt of them was fair, ſo that the Sun parched them; the other ſeven it rained and was cloudy, and yet they found no Relief, but were all in a Manner melted. On the 14th of *July* he found himſelf in 7° of North Latitude, and they ſaw ſome black and white Daws, which are Birds that do not go far from Land. On the 15th the Admiral fell ill of the Gout for want of Sleep, and yet ſtill he kept up.

On the 19th the Air was ſo burning hot that they thought they ſhould have been deſtroyed in the Ships, but there ſoon ſprung a fair Gale that delivered them from that Heat, and they ſailed ſeventeen Days to the Weſtward, deſigning to turn again to the South, ſo that *Hiſpaniola* might bear North, where the Admiral believed he might find Land, either before or after he came to that Point; and there he hoped to refit his Ships, which were very leaky, and to recover the Proviſions in order to carry them to *Hiſpaniola*, though they were already damaged. Upon the 22d a Multitude of Birds were ſeen flying from the Weſt South-weſt towards the North-eaſt, and by reaſon of theſe Tokens he hoped to ſee Land very ſoon; and the 31ſt of *July* being come and no Land appearing, and Water growing ſhort, he reſolved to alter his Courſe, and ſtood to the Weſtward, ſtill inclining to the Right-hand, to fall in upon *Dominica*, or ſome one of the Iſlands of the *Canibals*, now called *Caribbee Iſlands*, ſteering North and by Eaſt, which he held till Noon; a Sailor went up to the round Top and ſpied Land to the South eaſt, about fifteen Leagues diſtant, and ſeemed to be three Mountains; they immediately ſung the Hymn *Salve Regina:* Having thus ſpied Land, he altered his Courſe from the *Caribbee Iſlands*, where he deſigned to have watered, and ſtood for a Cape that appeared to the Weſtward, which he called *de la Galera*, or the *Gally Point*, on account of a great Rock on it, which, at a Diſtance, looked like a Gally under ſail. When they came to Land they found a good Port, but could not enter becauſe it had not Water enough. He paſſed on to the Point he had ſeen, being ſeven Leagues to the Southward, without finding any Harbour, and obſerved that the Woods reached down to the Sea, all along the Coaſt; ſome Men were ſeen in a Canoe, at a Diſtance, but they fled; and it appeared that this was an Iſland which he called *la Trinadada*, or the *Trinity*, having promiſed to give that Name to the firſt he ſhould diſcover; the Land was high, pleaſant, and well cultivated.

On the firſt of *Auguſt* the Admiral advanced five Leagues along the Coaſt to the Weſtward, and came to a Point where he anchored with his three Ships, and took in Water, to the great Satisfaction of the Men. They found the Track of People, Fiſhing-tackle, and the Foot-ſteps of Goats, as they thought, which proved to be Deer, there being many in the Iſland. Having ſeen many Towns in this Iſland, they ſaw another to the Southward, which ſeemed to be twenty Leagues long, and he called it *Iſla Santa*, or *Holy Iſland*. All the Way from *Punta de la Galera*, to the Point where they watered, which he named *Punta de la Playa*, or the *Point of Strand*, though the Land was good, there was no Harbour, but there were many Rivers and Woods very agreeable, and ſtill the Length of the *Holy Iſland* ſeemed greater. Seeking for a Harbour, on the 2d of *Auguſt* he arrived at the Point of the Iſland of the *Trinity*, which he called *Punta del Arenal*, or *Sandy Point*, being to the Weſtward, and he was then got into the Bay he called *de la Ballena*, or of the *Whale*, without knowing that he was near the Continent. He gueſſed that the Iſland of the *Trinity* extended, in Length, from Cape *de la Galera*, to *Punta del Arenal*, thirty-five Leagues, though it is above forty-five; but the Admiral proceeding along it, at ſeveral times, could not make an exact Computation.

At *Punta del Arenal* he ordered the Men aſhore to refreſh themſelves, becauſe they were much fatigued: A Cazique of the Iſland was come thither, and obſerving that the Admiral had a Cap on of Crimſon Velvet, he paid him great Reſpect, took off a Circle of Gold he had on his own Head, and put it on the Admiral's; and with the other Hand took off his Cap and put it on his own, being very much pleaſed with it. The ſame Day a great Canoe, carrying twenty-five Men, came from the Eaſtwards, towards the Ships, and being about a Muſket-ſhot from them, they gave over rowing, and cried aloud, which the Admiral ſuppoſed was to aſk who they were, as is uſual among thoſe People; by Way of anſwer, he ſhewed them ſome little Braſs Baſons and other glittering Things to entice them to come near the Ships; but they advancing very little, the Admiral ordered his Men to play on a Tabor and Pipe, and the Youths to dance, thinking to pleaſe them, which proved quite contrary, for they took it for a Signal of War; and, quitting their Oars, laid hold of their Targets and Bows, and ſhot a great Flight of Arrows.

The Admiral then ordered the Muſic to ceaſe, and ſome Croſs-bows to be brought, but only two of them to be ſhot, whereupon the *Indians* immediately laid down their Arms, and ran in cloſe under the Stern of another Caravel; the Pilot whereof went down into the Canoe, entertained them, and gave one, that ſeemed to be a principal Perſon, a red Cap. They deſired him to go aſhore and they would give him ſuch as they had; but as he was going in his Boat to aſk leave of the Admiral, the *Indians* went away. They were young, well adorned after their Way, of agreeable Countenances, and whiter than the *Indians* of the Iſlands. Their Hair was long and ſmooth, cut after the *Spaniſh* Faſhion; about their Heads they tied a Cotton Cloth, curiouſly wrought of ſeveral Colours; and another about their Waiſt to cover their Nakedneſs. The Admiral wondered, that being ſo near the Equinoctial, he felt Cold every Morning, though it was in the Dog-Days; as alſo that the Waters ran ſtronger to the Weſt, than the River of *Seville*; that the Sea Water ebbed and flowed above ſixty-five Paces more than at *San Lucar*; and that the Currents ſet ſo ſtrong between the Iſland of the *Trinity* and *Santa*, which are two Leagues aſunder (by him afterwards called *Gracia* not knowing as yet that it was the Continent) that it run like a rapid River. They found the ſame Sorts of Fruit as in *Hiſpaniola*, and the Trees, Soil, and Climate, were alike; they alſo caught very large Oyſters, and infinite Quantities of Fiſh, Parrots as large as Pullets, of a light green, ſome whitiſh, and others intermixt with red and yellow.

The Admiral being at Point *del Arenal*, which is the laſt Cape of the Iſland of *Trinity*, he ſaw towards the North-weſt about fifteen Leagues the Point of that he till then called *Iſla Santa*, or *Holy Iſland*, which proved to be the Province he afterwards called *Paria*; and believing it to be another Iſland, he gave it the Name of *Gracia*, or *Grace*, as has been ſaid; and he thought it extraordinary high Land, and ſo it is, for a vaſt Ridge of Mountains runs along there. Being come up to the Continent, which he, at this Time, thought to be an Iſland, he ſpied near the aforeſaid Point two ſmall Iſlands in the Midſt of another Mouth or Entrance, forming that Cape which he called *Boto*, that is, blunt, becauſe it appeared ſo; and another Cape of the Iſland of *Trinity* he called *de Lapa:* The Diſtance between them being five Leagues, with two little Iſlands in the Middle, one of which he named *el Caracal*, or the *Snail*; and the other *el Delfin*, or the *Dolphin*. The Narrowneſs of the Place, the Violence of the great River *Yayapari*, and the Waves of the Sea, going into, and out of this Bay, are dangerous, and therefore the Admiral called that Streight the *Dragon's Mouth*, which Name it holds to this Day; this River that falls into the Bay of *la Balena*, runs through the Country above four hundred Leagues, and as it brings down an immenſe Quantity of Water, eſpecially in *July* and *Auguſt*, about which Time the Admiral was there, the Rains falling then, as they do in *Spain* in *October* and *November*, and the Paſſage between the Continent and the Iſland of the *Trinity* being too narrow for ſuch a Quantity of oppoſite Waters; when they meet there is a mighty Struggle between them.

5. While the Admiral lay at Cape *de Lapa*, he diſcovered very high Land to the North-weſt, which he named

Bellaforma, becauſe it looked well. On the 5th of *Auguſt* he ſailed five Leagues from the Cape *Lapa*, and ſaw ſeveral very good Harbours; he ſent the Boats aſhore, and the Men found Fiſh, ſaw the Track of People, and a great Houſe uncovered. He proceeded eight Leagues further, ſtill diſcovering good Harbours, much Land and many Rivers. Going aſhore they found well-taſted Grapes, Apples, and a ſort of Fruit that looked like Oranges, and within were like Figs; and ſaw many Monkeys.

On the 26th he ſailed five Leagues; a Canoe with five Men in it came toward the Caravel that was neareſt the Land. The Pilot called the *Indians*, giving them to underſtand, that he would go aſhore: And as ſoon as he was got into the Canoe, he overſet it, and ſwimming about, took and carried the *Indians* to the Admiral. They were of a proportionable Stature, had their Privy Members tied up and covered; but the Women were all ſtark naked. The Admiral gave thoſe *Indians* Hawks-Bells, Glaſs-Beads, and Sugar, and ſent them aſhore, becauſe a great Number of People appeared. And as ſoon as they underſtood how well the others had been entertained, if there had been Canoes enough, they would have all gone aboard. The Admiral uſed them well, gave them all Toys, aſked them Queſtions; they anſwered, but did not apprehend each other. They brought him Bread and Water, and a ſort of Liquor like green Wine. All of them had Targets, Bows, and poiſoned Arrows. Before they entered, they ſmelled to the Boat, and afterward to the Men. On the 7th abundance of *Indians* came, bringing Bread, *Indian* Corn, and Eatables; as alſo Pitchers of Liquor, ſome of it as white as Milk, taſting like Wine, and ſome green made of Fruit and Maize. They valued not the Beads the Admiral gave them; they had a great Eſteem for Tin, they called it Turey, as if it were come from Heaven, for they called Heaven Turey; and found a certain Scent in it that much pleaſed them. And whatever was given them, they ſmelled to. They carried on board abundance of Parrots of three ſorts, and Bits of Cotton Cloth, well wrought, and wove of ſeveral Colours.

The Admiral would willingly have taken half a Dozen *Indians* to carry away with him, but he could not; for before Night they left the Ship. The next Day a Canoe, with twelve Men, came on board the Admiral, ſix of whom he took, and ſent the reſt on ſhore. He proceeded to *Puta del Aguia*, or *Cape Needle*, whence he ſaw a fine Country, and well peopled. And being come before a Town, which for its Beauty he called the *Gardens*, having a vaſt Number of Houſes and People, he anchored; and many reſorted to the Ships, with their wrought Cloths about their Heads, like the little Veils worn by the *Mooriſh* Women. They wore ſome little Plates of Gold about their Necks; and the *Indians* that were on board ſaid there was Plenty of it in thoſe Parts, and ſhewed how they gathered it. The Admiral conſidering that he was above three hundred Leagues from *Hiſpaniola*, and that his Proviſions began to grow ſhort, made no long ſtay in that Country, which he thought very agreeable, full of good Houſes, and inhabited by a polite and warlike People. Being come to Point *Aguja*, he diſcovered another to the Southward, which he thought to be an Iſland running out South-eaſt and North-weſt, very large, and the Land high. He gave it the Name of *Sabeta*. And in the Afternoon he ſaw another, and they were Parts of the Continent. He anchored at the *Gardens*, many Canoes, great and ſmall, came on board with abundance of People wearing Pieces of Gold about their Necks, in the Shape of a Horſe-ſhoe: And though they ſeemed to value it, they would have given all for Hawks-Bells, but he had none left: However, ſome Gold he got, which was very low, and they told him there were Iſlands hereabout that yielded much ſuch baſe Gold; but the Men were Canibals. And they actually ſaw an *Indian* who had a ſingle Grain of Gold as big as an Apple.

More Canoes came ſtill, all the People wearing Gold Collars and Beads of abundance of ſorts, their Clothes tied about their Heads, their Hair cut ſhort, which looked well. There fell much Rain, which hindered many more from going on board. Some Women went who had Strings of little Beads about their Arms, and among them ſome Seed Pearl, as alſo ſome large, which raiſed the Hopes of the *Spaniards* much. The Admiral aſked, where they found them? They ſhewed him the Mother-of-pearl, and by very intelligible Signs gave him to underſtand, That they were found to the Weſtward, behind that Mountain, which is Cape *Lapa*, being the Point of the Province of *Paria*. He ſent the Boats aſhore, and found the People ſo tractable, that tho' the Sailors went not with a Deſign to land; yet two of their Chiefs civilly conſtrained them to it, and conducted them to a Houſe where they entertained them, and gave them Bread and Fruits of ſeveral ſorts, and that ſort of white Liquor, before-mentioned, and another of a red Colour and good Taſte, the Men all the while keeping together at one End of the Houſe, and the Women at the other. When they had been ſo treated at that Houſe by the eldeſt, the youngeſt carried them to another, and treated them in the ſame manner. It ſeemed to them that the one was the Cazique, and the other his Son; and the Sailors afterwards returned very well ſatisfied to their Boats. They thought theſe People of a very good Stature, whiter than any other *Indians*, the Country delightful and cold, which was admired by reaſon of its being ſo near the Equinoctial. The Admiral called this, which he thought to be an Iſland, *Paria*.

On the 10th he ſailed to the Weſtward, ſeeking ſome Paſſages to get clear of thoſe which he took to be Iſlands, and named *Yſabeta* and *Tramontana*, but were Part of the Continent: And the *Indians* he had on board ſaid the Pearls were found farther Weſtward. He ſailed on in that Bay, and ſent the little Caravel to ſee whether there was any Paſſage out to the Northward, becauſe oppoſite to *Yſabeta* and the Continent there appeared a very high and beautiful Iſland. The Caravel returned and brought an Account that they had found a very large Bay, and in it four ſpacious Openings that looked like ſmall Bays, and a River at the End of each of them, which he called *The Bay of Pearls*, though there are none in it. The Admiral believed thoſe Openings were four Iſlands, which formed that Bay of forty Leagues; but the Mariners affirmed they were Mouths of Rivers; and ſo it proved, at leaſt in two of them; for the great River *Tuyaparitan* came out at one End, and that of *Caurari* at the other: And tho' the Admiral would have diſcovered all very particularly, he could not ſtay, but reſolved to ſail for *Hiſpaniola*, to ſend for Men and Proviſions into *Spain*, and order his Brother to continue this Diſcovery. To which Purpoſe, on the 11th of *Auguſt*, he ſteered over to the Eaſtward, in order to paſs through between the Point of *Paria* and the Continent. He advanced to a good Harbour, which he called *Puerto de Gatos*, or *Cat's Port*, which is near the Mouth, where the two Iſlands lye, between the Capes of *Lapa* and *Boto*.

There he came to an Anchor on the thirteenth, intending to ſail next Day. The Boat was ſent to take a View of another Harbour juſt by, which was alſo good; and near it were ſome Fiſhermens Houſes; for which reaſon he called it *Puerto de las Cabanas*, or the *Port of Cottages*. Near the Sea they ſaw many *Mirabolan* Trees, with abundance of Oyſters ſticking to the Branches that hung over the Sea, and open to receive the Dew. On the 14th he advanced to Cape *Lapa*, which is that of *Paria*, to paſs through the Opening, which he called, the *Dragon's Mouth*, which is between Point *Lapa* to the Weſtward, and Cape *Boto*; the Diſtance between the two Capes being a League and an half beyond the ſmall Iſlands that lye in the Middle. He ran a great Riſque of being loſt in repaſſing the Streight, where the running out of the freſh Water, and the coming in of the Salt, occaſioned a very dreadful Appearance, at leaſt to the *Spaniards*, who were unacquainted therewith, though it is common enough on our Coaſts, and particularly at the Mouth of the *Severn*, where the riding of one Tide upon another is called the *Egre*.

The Admiral himſelf was more amazed at it than at any thing he had ſeen, and could not help ſaying, That if they got ſafe through this Danger, they might be ſaid to have eſcaped out of the Dragon's Mouth; whence the

Name of *Boca del Drago* was fixed upon this Place; and it has been ever ſince known thereby. When they got out of that Bay, extending full fifty Leagues from the firſt Land of *Trinity* to the Bay called *de las Perlas*, or *of Pearls*, he ſailed along the Continent to obſerve whether that immenſe Quantity of freſh Water proceeded from the Rivers, as the Seamen affirmed, and he could not believe, as thinking no River in the World could carry ſo much Water as thoſe Lands he ſaw produced, unleſs they were a Continent. He found along this Coaſt many good Harbours and Capes, to which he gave Names, as *Cabo de Conchas*, or *Cape of Shells*, *Capo Luenga*, *Long Cape*, *Cape Sabor* and *Cape Rico*, &c. He found alſo ſeveral Iſlands, particularly *Margarita*, which is fifteen Leagues in Length, and ſix in Breadth, very green and well inhabited. And at a ſmall Diſtance from it are other ſmall Iſlands, and among them *Cubaque*, where Pearls have been found, but few of the Names the Admiral gave them have continued. Having ſailed forty Leagues farther, and ſeeing the Land continue to the Weſtward, he was convinced that it was no Iſland, but the Continent, which he diſcovered on *Wedneſday* the 21ſt of *Auguſt*, 1498.

6. The Admiral was much ſurprized at the immenſe Quantity of freſh Water before ſpoken of, and no leſs at the extraordinary Coolneſs of the Air ſo near the Equinoctial; and he particularly obſerved, that the People thereabouts were whiter, their Hair long and ſmooth, more ſubtil and ingenious, than thoſe he had ſeen before. He was very deſirous to return to the Iſland *Hiſpaniola*, having a Foreſight that his Preſence was neceſſary there; and he reſolved to ſend his Brother Don *Bartholomew* to continue the Diſcovery; beſides, the Men were fatigued, and grew uneaſy, becauſe he had not told them at his coming from *Spain* that he was going upon Diſcovery: For theſe Reaſons, on the 16th of *Auguſt* he ſtood away for that Iſland, ſtill diſcovering high Mountains on the Continent; and that Day he ran ſixty-three Leagues between Sun and Sun, the great Currents ſetting him forward as much as the Wind.

While the Admiral laboured under the before-mentioned Difficulties, the three Ships he had ſent from *Spain* to *Hiſpaniola* under *Carvajal*, *Arana*, and *Columbus*, thro' the Ignorance of the Pilots, and by the Currents that ſet downwards of that Iſland, inſtead of going to the Port of *Santo Domingo*, ſailed on above 160 Leagues, and not knowing where they were, arrived at the Place where *Francis Roldan* was with the Mutineers, living without any Reſpect to the Laws of God or Man; had they done it deſignedly, it could not have happened worſe; and if the Revolt of *Roldan* had been known in *Spain*, it would have been concluded a malicious Contrivance either of the Captains or the Pilots. As ſoon as *Francis Roldan* and his Followers were informed of the Ships they went to the Harbour, which was two Leagues off, and concealing their Revolt, aſked how they happened to come to that Place, and what News there were of the Admiral? They anſwered, that they had been carried by the Currents, and that the Admiral would ſoon be there with three Ships more, having ſome Days ſince ſteered away to the Southward from them. They went aboard the Ships, were merry together, and had ſome of the Proviſions carried from *Spain*. When they were gone, the Captains thought fit, becauſe of the Difficulty of returning to *Santo Domingo* by reaſon of the Currents and Breezes, that the Labouring-men who were in the King's Pay ſhould march by Land, and agreed, that Captain *John Anthony Columbus*, who commanded one of the Ships, ſhould conduct them. Forty Men, with their Croſs-bows, Lances and Swords, went aſhore; and *Roldan* perſuading them they were to lead a very painful Life, be obliged to labour and dig, with much Hunger and Want, eaſily induced them to ſtay with him, telling them at the ſame Time how they ſhould live, which was only by going about from one Town to another, taking the Gold and what elſe they thought fit. And tho' theſe forty Men were all of them condemned Criminals, yet eight of them remained true to their Captain.

This fully diſcovered that *Roldan* had deſerted the King's Service, and Captain *Columbus*, being moſt concerned at it, went to him, told him that thoſe Men had received the King's Pay for ſix Months before, and that he by employing them much obſtructed the King's Affairs; therefore he adviſed him not to act in ſo ſcandalous a Manner; but *Roldan* regarded nothing he ſaid, becauſe by the Addition of thoſe that had joined him he had above a hundred Men to defend himſelf againſt the Admiral; and Captain *Columbus* returned aboard his Ship, and with the other Captain *Pedro de Arana* reſolved to go away to *Santo Domingo* with the Ships, Captain *Alonſo Sanchez de Carvajal* ſtaying behind to go by Land, and endeavour to bring *Roldan* to his Duty. By this Time the Adelantado had Notice, by Means of the *Indians*, that there were three Ships arrived in the Weſt, and gueſſing that they might be come from *Spain*, and had miſſed their Courſe, he ſent out a Caravel in ſearch of them. Before the Ships arrived, or *Roldan* had got ſo many Men, he had written to ſome of thoſe that were with the Adelantado, deſiring them, in caſe the Admiral ſhould come, to endeavour to make his Peace.

The Admiral the 19th of *Auguſt* arrived at the Iſland *Beata*, which lies fifteen Leagues from the Port of *Yaquimo*, and twenty-five from *Santo Domingo*; and near the Iſland *Beata* is that of *Altovelo*. It troubled him that he had fallen away ſo much, but did not wonder at it, becauſe of his continual Watching all the Nights he lay by, or plied backwards or forwards, for fear of being upon the many Iſlands or Sholes of which thoſe Seas were full, which at that Time were little known, and the Currents which are there very ſtrong, and ſet towards the Continent Weſtward, carried the Ships ſo far inſenſibly towards the Iſlands *Beata* and *Hiſpaniola*, that he was afraid of driving by them. On the 20th of *Auguſt* he ſent the Boats to the neighbouring Towns to ſummon the *Indians*, and wrote to acquaint the Adelantado of his Arrival. Six *Indians* went aboard at twice, and one of them carried a Croſs-bow with all its Furniture, which did not a little ſurprize the Admiral, believing it to have belonged to ſome Soldier that was dead. The Ships having been ſeen to paſs down the Current from *Santo Domingo*, the Adelantado ſet out in a Caravel to ſeek the Admiral: It was high Pleaſure to both Brothers to meet, tho' the Admiral was much vexed at the Advice of *Roldan*'s Revolt. The 22d of *Auguſt* they arrived at *Santo Domingo*, it being but a few Days leſs than two Years ſince the Admiral departed from *Hiſpaniola* for *Spain*.

7. The whole Colony in a manner went out with Don *James Columbus* to receive the Admiral, expreſſing much Joy for his Arrival: But when he thought he was come where he might take ſome Reſt, he found himſelf involved in new Troubles, by reaſon of the Revolt. He immediately examined the Proceſs made by the Adelantado, and diſapproving it, formed another, wherein it was ſufficiently proved, that the Inſurrection had proceeded from the wicked Inclination of *Roldan*, tho' neither the Adelantado, or any other Perſon, had given him Cauſe to complain, or wronged him in the leaſt. Some Days after the Admiral, arrived the other three Ships, with *Arana* and *John Anthony Columbus*, as did the Caravel Don *Bartholomew* had ſent to ſeek them.

One of them had ſtruck on a Shole, loſt her Rudder, and was in a very bad Condition, and having ſtayed very long by reaſon of the Currents and contrary Winds, almoſt all the Proviſions were ſpoiled; and the Account they brought of forty Men ſtaying with *Roldan* much troubled the Admiral. However he reſolved to try him by fair Means, forgiving him all his Offences, being ſenſible his Enemies in *Spain* would make a great Noiſe of that Revolt; for he was alſo poſitively told, that as ſoon as he arrived he would come and ſubmit himſelf to him, he having long before written to that purpoſe. At this Time Capt. *Sanchez de Carvajal* arrived from *Xaragua*, and declared the Obſtinacy of *Roldan*, who refuſed his Propoſals: But *Roldan* having Advice of the Admiral's Arrival, either by the *Indians* or by Letters from ſome Friend he had at *Santo Domingo*, reſolved to come nearer, and accordingly went to *Bonao*, a fruitful and delicious Plain, where ſome *Spaniards* dwelt after the Fort of *Bonao* was built, and it is twenty Leagues from *Santo Domingo*. The Admiral fearing leſt any thing that might give them Uneaſineſs ſhould come to the Ears of their Catholic Majeſties, and at the ſame Time diſcredit the Affairs of the *Indies*, which had coſt him ſo many Fatigues, or give his Enemies occaſion to revile him, tried to bring the Mutineers to an Accommodation; uſing this Method: Moſt of the *Spaniards* in the Iſland were deſirous to return into *Spain*; he therefore, on the 12th of *September*, cauſed Proclamation to be made, that he would give Leave to all that were willing to depart, and provide for their Paſſage and Proviſions: Which was very acceptable to them in general, becauſe of eight Ships that were in the Harbour, five were almoſt cleared, and two ready for the Adelantado to go and proſecute the Diſcovery of the Coaſt of *Paria*.

In the mean Time, the Admiral being informed that *Roldan* was going to the *Conception*, about which ſome of the Mutineers had Eſtates, he gave Notice of it to *Michael Balleſter* the Governor of the Fort, that he might be upon his Guard, and endeavour to draw over *Roldan*, and tell him how much it troubled him that ſuch a Man, whom he had left in ſo conſiderable a Poſt, and on whom he depended ſo much, ſhould range about in that ſcandalous Manner, to the Prejudice of the King's Service; however, for the Good-will he had always borne him, he would pardon him, if he ſubmitted; and if he required any Security, he ſhould have it. The Governor *Balleſter* went to the Fort of *Bonao*, where he found no body, but was informed that *Roldan* and the Chiefs were gone to the Houſe of *Riquelmo*, who was one of them.

Before the Admiral went away to *Spain*, about *March* in the Year 1496, or ſoon after his Departure, ſome Towns were charged inſtead of their Tribute to till the Lands belonging to the *Spaniſh* Colonies, as they had been wont to do for their Caziques; and by this Method it was thought the *Spaniards* might be induced to ſtay the more willingly in the *Indies*, taking a Kindneſs to the Country, and the Merchants would come over from *Spain*, ſo that the Royal Revenue would increaſe without obliging their Majeſties to be at ſo great an Expence as they were at the Beginning, or elſe to quit the Enterprize, which the Admiral much dreaded, ſo many being againſt it. The *Indians* that did not comply in performing this Duty were puniſhed, and thoſe that fled were held as Slaves when taken. The other Improvement, in order to produce ſome Profit, was that of the *Brazil* Wood, which the Admiral ſaid was in the Province of *Yaquimo*, on the Southern Coaſt, near eighty Leagues from *Santo Domingo* to the Weſtward. By thoſe two Improvements, including four thouſand Slaves he reckoned upon, and four thouſand Quintals, or hundred Weight of *Brazil* Wood, he writ to their Majeſties, that they would receive forty Millions of Marvedies, which amounted to twenty thouſand Pound; a large Sum, and much more conſiderable in thoſe Days, than at this Time.

Hereupon, ſoon after his Arrival at *Santo Domingo*, being informed that a Cazique, who had been appointed for the Service of the Fort, leaving the ſame, was fled to the Mountains, Soldiers were ordered thither, who took a good Number of People that were ſent away in thoſe laſt Ships, the Admiral reckoning that their Catholic Majeſties ſhould make their Advantage of thoſe *Indians* as the Kings of *Portugal* did of the *Guinea* Blacks. When *Roldan*, *Gomez*, and *Adrian Moxica* were come together, the Alcalde or Governor, *Balleſter*, went to diſcourſe them; and having told them all he had been directed, offered them Pardon, and repreſented the Diſſervice they did the King by behaving after that manner. They ſoon ſhewed they had quite different Deſigns, uttering many haughty and diſreſpectful Words againſt the Admiral: And, among other Things, ſaid, They came not to ſeek Peace, but War; and that *Roldan* had the Admiral and all his Followers in his Power, either to ſupport or deſtroy them: That they ſhould not talk of any Accommodation till the Admiral had brought back the Number of *Indians* which had been ſent as Slaves, becauſe he had taken them into his Protection, and it was his Duty to deliver them from the Oppreſſion they were under: Beſides, they wrote a Letter to the Admiral, laying all the Blame of their Revolt on his Brother. The Governor, *Balleſter*, went to *Santo Domingo* with *Roldan*'s Anſwer; in which, amongſt other Things, he ſaid, that his Followers would treat with no Man but *Carvajal*; and tho' the Admiral had juſt Cauſe to ſuſpect that Perſon on ſeveral Accounts, yet he thought it beſt to make a Virtue of Neceſſity, and to ſend him with *Balleſter* to endeavour to reduce them to Reaſon. He alſo wrote an affectionate Letter to *Roldan*, ſoothing him, and in a moſt obliging manner inviting him to return to his Duty.

7. The Alcalde, *Balleſter*, and *Carvajal*, diſcourſed the Rebels ſo effectually, that they inclined *Roldan* and the other Ring-leaders to agree with the Admiral; by which it was thought all would be adjuſted; but the meaner Sort, being unwilling to quit that licentious Life they led, unanimouſly cried out, That it ſhould not be ſo, but that if any Accommodation was made, it ſhould be in Public before them all, ſince they were all concerned: And *Carvajal* and *Roldan* trying all Ways to reduce them to Reaſon, and, not being able to prevail, *Roldan* demanding a ſafe Conduct, and ſignifying, that he was thoroughly convinced, that all his Men would forſake him, except ſuch as were Gentlemen, the Admiral was much concerned at this Advice, and ſoon found it was true; for having made a Muſter, in order to march to *Bonao*, only ſeventy of thoſe that were with him ſaid they would obey his Orders; and he had no Confidence even in many of them. In this Diſtreſs, he cauſed Proclamation to be made, that as to all who would return to their Duty, no Notice ſhould ever be taken of what was paſt; beſides, that ſuch as deſired to return into *Spain* ſhould have their Paſſage gratis. At the ſame Time he ſent a ſafe Conduct to *Francis Roldan* for himſelf, and all thoſe that ſhould come with him, to treat at *Santo Domingo*.

Whilſt this Treaty was in Agitation, the Ships having been detained eighteen Days beyond the Month agreed on when they were hired, and many of the Slaves aboard them dying, the Admiral was forced to diſpatch them, and by them writ to their Majeſties, acquainting them with the Rebellion of *Roldan*, and the Miſchiefs his Men did in the Iſland. He alſo deſired to have religious Men ſent to inſtruct the People, and an able Lawyer for the Execution of Juſtice. He added, that though at firſt the Men had ſickened by the Change of Air and Water, they were all then healthy and inured to the Country, and did better with the *Indian* Bread than with that of *Spaniſh* Corn; and that there was an infinite Number of Swine and Poultry and other Things, which had ſo multiplied, that they wanted nothing but Wine and Clothes: That it would be expedient as often as poſſible to ſend him ſixty or ſeventy Men, and he would return as many of theſe troubleſome Diſturbers. Much more he wrote to their Majeſties in Vindication of himſelf and his Brother, and ſent them ſome of the painted Cloths of the Coaſt of *Paria*, one hundred and ſeventy Pearls, and ſome Pieces of Gold, as alſo a Draught of his laſt Diſcovery, and a Relation of his Voyage. After ſeveral Meſſages it was concluded, that the Mutineers ſhould have two Ships with Proviſions to carry them to *Spain*, and every one a Slave with him; and to have Certificates of their good Behaviour. The Admiral ſigned thoſe Articles on his Part, as did *Roldan* for the Mutineers. However, all Things came to nothing, the Rebels not daring to go into *Spain* for fear of being puniſhed for their Crimes.

But afterwards Captain *Carvajal* having acquainted the Admiral, that *Roldan* earneſtly deſired to ſubmit himſelf, he went to *Azua* to be nearer to the Rebels; *Roldan* went thither to him, where a new Contract was concluded, by virtue whereof, his Followers were to be reſtored to what they had enjoyed before their Revolt, and he to be Alcalde-Mayor, or Chief Judge of the Iſland. *Roldan* began again to exerciſe that Office with the greateſt Inſolence; and all his Followers behaved themſelves in the ſame Manner. The Admiral diſpatched two Ships for *Spain*; and, purſuant to his Agreement, permitted the Mutineers to embark, allowing ſome of them three Slaves, and others one. In *October*, 1499, *Roldan* delivered to the Admiral a Petition from all his Followers, being one hundred and two Men ſtill adhering to him, wherein they deſired to have Lands aſſigned them in the Province of *Xaragua*. But becauſe it was not convenient they ſhould be all together, ſome were ſettled at *Bonao*, others on the Plain on the Bank of the great River, others at *Santiago*; at which Places the Admiral gave them Lands. And this was the firſt Diſtribution made in the *Indies*; which ſet an Example to all the others that followed, that is, of aſſigning ſuch a Number of *Indians* to ſuch a Perſon, it being expreſſed in the Grants, that ſuch a Cazique, or his People, ſhould till the Ground for the *Spaniard* to whom it was given.

8. The Admiral having adjuſted Matters with *Roldan*, appointed an Officer, with a Detachment, to patrol about the Iſland, to reduce the *Indians* to pay Tribute, and to be in Readineſs, that upon any Mutiny among the Chriſtians, or Signs of Rebellion among the *Indians*, he might ſuppreſs them; which he did with a Deſign to go over to *Spain*, and carry with him his Brother the Lieutenant, becauſe he judged it would be difficult, if he were left behind, to forget old Grudges. As he was preparing for his Voyage, *Alonſo de Hojeda*, who had been out on Diſcovery with four Ships, arrived in the Iſland. This Man was a Creature and Dependant upon the Biſhop of *Burgos*, who perceiving this Prelate had entirely changed his Affection towards the Admiral, ſtruck in with him, and procured a Licence to go and make Diſcoveries, but without the Knowledge of their Catholic Majeſties; and ſome Perſons at *Seville*, having equipped, on the Credit of this Licence, four Ships, he ſailed with them from Port *St. Mary*'s, on the 20th of *May* 1499, and went directly in ſearch of the Continent, purſuant to the Schemes the Admiral had delivered to their Catholic Majeſties before his Departure, and which, before this Time, he had actually carried into Execution.

With this Man *Americus Veſpucius* made his firſt Voyage, and though they never ſaw any other Part of the Continent than what the Admiral had diſcovered ſailing from the Iſland of *Trinity*, along the Coaſt to *Venezuela*, yet he impudently pretended to have firſt diſcovered the Continent; and by confounding this with a ſubſequent Voyage which he made into thoſe Parts, he dreſſed up a fine Story to his own Advantage; and being an excellent Geographer, and the beſt Draftſman of his Time, impoſed upon the greateſt Part of *Europe*. But in *Spain*, the Falſhood and Injuſtice of his Pretences were ſoon detected; for whereas he pretended that, after a Voyage of thirteen Months ſpent in Diſcoveries, he returned directly to *Spain*; *Alonſo de Hojeda* poſitively made Oath, that he ſpent but five Months in the Voyage, and that finding themſelves ſhort of Proviſions, they ſtood over, as indeed was the Truth, to the Iſland of *Hiſpaniola*, for a Supply. When he came upon the Coaſt of that Iſland, at the Time of which we are now writing, he gave out, that he did not do it willingly, but purely to obtain Relief, and that he had juſt Reaſons to expect it in a Country under the Dominion of his Sovereigns; but his real Deſign of creating Diſturbances there, being ſtrongly ſuſpected, he was adviſed to take what he wanted, and to continue his Voyage.

This he pretended to call a great Hardſhip, and threw out many Reflections upon the Admiral and his Family. Upon which Grounds he began to write to ſome that were deep in the late Troubles, and to hold Correſpondence with them: But *Roldan* being informed of his Proceedings, by the Admiral's Order, went againſt him to prevent his doing the Harm he intended. Being come within a League and a Half of him, he underſtood he was at a Cazique's, baking Bread and Biſkets, and therefore he travelled that Night to ſurprize him. *Hojeda* underſtanding that *Roldan* was coming upon him, to make the beſt of a bad Caſe, went to meet him; alledging, Want of Proviſions had brought him thither, to ſupply himſelf in the King his Maſter's Dominions, and that he meant no ſort of Harm.

But holding his wicked Purpoſe, and taking Leave of *Roldan*, he went with his Ships to *Xaragua*, where a great many of thoſe People lived who had before rebelled with *Roldan*; and becauſe the Shew of Gain is the moſt ready Way to promote any Miſchief, he began to give out that their Catholic Majeſties had appointed him and *Carvajal* the Admiral's Counſellors; and that, among many other Things they had adviſed him to, one was, That they ſhould pay in ready Money all in their Service, and ſince the Admiral was not ſo juſt as to do it, he was ready to go with them to *Santo Domingo*, to oblige him to pay out of hand; and that done, to turn him out of the Iſland, dead or alive, for they ought not to rely upon the Word he had given them, for he would keep it no longer than Neceſſity obliged him to it. Upon theſe Promiſes, many reſolved to follow him; and being aſſiſted by them, he fell upon others who oppoſed him, and there were ſome killed and others wounded, on both Sides. And being ſatisfied that *Roldan* would not join with them, they reſolved to ſurprize him; but he being informed of their Deſign, went where *Hojeda* was, to put a Stop to his Diſorders. *Hojeda*, for fear of him, retired to his Ships, and *Roldan* continuing aſhore, they treated, each of them fearing to put himſelf into the Power of the other. *Roldan* perceiving that *Hojeda* was unwilling to come aſhore, he pretended to treat with him aboard, to which Purpoſe he ſent for his Boat, which he ſent him well manned; and having taken in *Roldan* and ſix or ſeven of his Followers, when they leaſt ſuſpected it, *Roldan* and his People fell upon *Hojeda*'s Men, and, killing ſome, and wounding others, made themſelves Maſters of the Boat, returning with it to Land. *Hojeda*, who had only a ſmall Ship left, reſolved to come peaceably to treat with *Roldan*. He agreed to reſtore ſome Men he had taken by Force, that his Boat and Men might be returned, alledging, if it was not reſtored it would be the Ruin of them all and their Ships, becauſe he had no other. *Roldan* readily granted it, that he might have no Cauſe to ſay he was loſt through his Means; yet he made him give Security that he would depart the Iſland by a Time appointed, as he was obliged to do by the good Guard *Roldan* kept on Shore.

A few Days after *Hojeda* was gone, one Don *Ferdinand de Guevara* being in Diſgrace with the Admiral, as a ſeditious Perſon; and having taken part with *Hojeda* through Spite to *Roldan*, becauſe he would not permit him to take to Wife the Daughter of *Anacaona* Queen of *Xaragua*, began to gather many Conſpirators, deſigning to ſeize *Roldan*, and ſucceed him; particularly he gained to his Party *Adrian de Moxica*, a chief Man among the late Rebels, and other wicked Men; who, about the Month of *July*, contrived to murder *Roldan*. He having Intelligence of the Deſign, ſtood upon his Guard, and ordered his Buſineſs ſo well that he ſeized Don *Ferdinand*, *Adrian*, and the chief Men of their Party; and ſending the Admiral an Account of what had happened, demanded what he ſhould do with them. The Anſwer was, That ſince they had endeavoured, without any Provocation, to diſturb the Country, he ſhould puniſh them according to their Demerit, and as the Law directed: The Judge did it accordingly, and proceeded legally againſt them, hanged *Adrian*, as chief Author of the Conſpiracy; baniſhed others, and kept Don *Ferdinand* in Priſon, till, on the 13th of *June*, he delivered him with other Priſoners to *Gonſalo Blanco*, to carry them to the *Plain*, where the Admiral then was.

This Example quieted the Country, and the *Indians* again ſubmitted themſelves to the Chriſtians. Such rich Gold Mines were now diſcovered, that every Man left the King's Pay, and went to dig Gold at his own Expence, allowing the King the Third Part of all they found. This proſpered ſo well that a Man has gathered five Marks, or forty Ounces of Gold in a Day. The *Indians* were alſo become ſubmiſſive, dreading the Admiral, and ſo deſirous to pleaſe him, that they readily became Chriſtians only to oblige him; and therefore, to ſettle all Things the better, the Admiral reſolved to take a Progreſs through the Iſland, and accordingly he and his Brother, the Lieutenant, ſet out on the 20th of *February* 1499, and came to *Iſabella* the 19th of *March*. From *Iſabella* they ſet out the 5th of *Auguſt*, for the *Conception*. From the *Conception* the Admiral deſigned to go to *Santo Domingo*, on the 3d of *February*, in order to return into

Spain, to give their Catholic Majeſties an Account of all Things in the Colonies.

9. At the very Time thoſe Diſorders fell out in the Colonies, many of the Rebels from *Hiſpaniola*, and others that were returned into *Spain*, did not ceaſe to give in falſe Informations to the King and his Council againſt the Admiral and his Brother; alledging they were cruel, and unfit for that Government, as well becauſe they were not *Spaniards*, as becauſe they had not formerly been in a Condition to learn by Experience how to govern People of Condition; affirming, That if their Highneſſes did not apply ſome Remedy, thoſe Countries would be utterly deſtroyed; or, in caſe they were not quite ruined, by their ill Government, the Admiral would revolt, and procure ſome Prince to ſupport him, by pretending that all was his own, as having been diſcovered by his Induſtry and Labour; and that the better to compaſs his Deſign, he concealed the Wealth of the Country, and would not have the *Indians* ſerve the Chriſtians, or be converted to the Faith, becauſe by making much of them, he hoped they would be on his Side, to do what he pleaſed againſt their Highneſſes.

They therefore importuned their Catholic Majeſties to remove him, complaining there were ſeveral Years Pay due to them, which gave Occaſion to all that were at Court to rail. And their Impudence was ſo great, that if the Catholic King went abroad they all got about him, crying, *Pay, Pay*; and if the Admiral's Sons, who were Pages to her Majeſty paſſed by where they were, they cried out in a hideous Manner, making the Sign of the Croſs, and ſaying, There are the Admiral of the Muſquito's Sons, he that has found out falſe and deceitful Countries, to be the Ruin and Burial-place of the *Spaniſh* Gentry. Their Complaints running ſo high, it was reſolved to ſend a Judge to *Hiſpaniola*, to enquire into all theſe Affairs, ordering him, in caſe he found the Admiral guilty of what was alledged, to ſend him to *Spain*, and ſtay there himſelf as Governor. The Perſon their Majeſties made Choice of for this Purpoſe, was one *Francis de Bovadilla*, a poor Knight of the Order of *Calatrava*, who, on the 21ſt of *May*, 1499, had full and ample Commiſſion given him at *Madrid*, and blank Letters ſubſcribed by their Majeſties to ſuch Perſons as he ſhould think fit, in *Hiſpaniola*, commanding them to be aiding and aſſiſting to him.

Thus furniſhed, he arrived at *Santo Domingo* at the latter End of *Auguſt*, 1500, at ſuch Time as the Admiral was at the *Conception* ſettling the Affairs of that Province, where his Brother had been attacked by the Rebels, and where there were more *Indians*, and thoſe more underſtanding People than in the reſt of the Iſland; ſo that *Bovadilla*, at his Arrival, finding no body to keep him in Awe, the firſt Thing he did was to take up his Quarters in the Admiral's Palace, and ſeize and make uſe of all he found there, as if it had fallen to him by Inheritance; and gathering together all he could find that had been in the Rebellion, and many others that hated the Admiral and his Brothers, he preſently declared himſelf Governor; and, to gain the Affection of the People, he cauſed a general Freedom to be proclaimed for twenty Years to come; requiring the Admiral to repair to him without any Delay, becauſe it was convenient for his Majeſty's Service he ſhould ſo do. And to back his Summons, on the 7th of *September* ſent him the King's Letter, by *F. John de la Sera*, containing no more, in effect, than that their Majeſties had ſent the Bearer to acquaint him with their Pleaſure, which he was directed to obey. This Order was dated at *Madrid*, 21ſt of *May*, 1499, which Order was ſigned both by the King and by the Queen.

10. The Admiral having ſeen their Majeſties Letter, came away preſently to *Santo Domingo*, where the new Judge was; who having been eager to eſtabliſh himſelf Governor there, in the Beginning of *October*, without any legal Information, ſent him Priſoner aboard a Ship, together with his Brother *James*, putting them in Irons, and a good Guard over them; and ordered on ſevere Penalties that none ſhould dare to ſpeak to them; after this he began to draw up a Proceſs againſt them, admitting the Rebels as Witneſſes, and publickly favoured all that came to ſpeak ill of them; who, in their Depoſitions, gave in ſuch Incoherences, that he muſt have been blind that had not plainly perceived they were falſe and malicious. For this Reaſon their Catholic Majeſties would not admit of them, and cleared the Admiral, repenting that they had ſent ſuch a Man, and not without Cauſe; for this *Bovadilla* ruined the Iſland, and ſquandered the King's Revenues, gaining Numbers to be his Friends, by ſaying their Majeſties would have nothing but the Dominion, and that the Profit ſhould be for their Subjects; yet he neglected not his own Share, but, ſiding with the richeſt and moſt powerful Men, gave them *Indians* to ſerve them, upon Condition, they ſhould ſhare with him all they got by their Means, and ſold by Auction the Poſſeſſions and Rights the Admiral had required for their Majeſties, ſaying they were no Labourers, nor did not deſire to make a Profit of thoſe Lands, only kept them for the Benefit of their Subjects.

He thus on one Side ſelling all Things under this Colour, endeavoured on the other, that they ſhould be bought by ſome of his own Confederates, for one third of the Value: Beſides all this, he made uſe of his judicial Power to enrich himſelf, and gain the Affections of the People; being ſtill afraid, that the Lieutenant, who was not yet come from *Xaragua*, ſhould put a Stop to his Proceedings, and endeavour to ſet the Admiral at Liberty by Force of Arms; in which Particular the Brothers behaved themſelves very prudently, for the Admiral ſent them Word immediately, that they ſhould come peaceably to him, the King's Service ſo requiring, that the Iſland might not be put into an Uproar; for when they were in *Spain*, they ſhould more eaſily obtain the Puniſhment of ſuch a Perſon, and Satisfaction for the Wrongs done them.

Yet this did not divert *Bovadilla* from putting him and his Brother into Irons, allowing the baſer Sort to rail at them publickly; blowing Horns about the Port where they were ſhipped, beſides ſcandalous Libels ſet up at Corners of Streets againſt them. When they were to ſail, he deſired *Andrew Martin*, the Maſter of the Ship, to look to him, and to deliver him in Irons as he was, to the Biſhop *D. John de Fonceca*, by whoſe Advice and Direction, it was concluded, he did all theſe Things; though when they were at Sea, the Maſter, being ſenſible of *Bovadilla*'s Unworthineſs, would have knocked off the Admiral's Irons, which he would not permit, ſaying, That ſince their Catholic Majeſties, by their Letter, directed him to perform whatſoever *Bovadilla*, in their Name, commanded him to do; in Virtue of which Commiſſion he had put him into Irons, he would have none but their Highneſſes themſelves to do their Pleaſure herein; and he was reſolved to keep theſe Fetters as Relicks, and Memorials of the Reward of his many Services, as accordingly he did; for theſe Irons hung up in his Room, and he ordered them to be buried with him. Notwithſtanding that, having on the 20th of *November*, 1500, written to their Highneſſes, acquainting them with his Arrival at *Cadiz*; they immediately gave Orders that he ſhould be releaſed, and ſent him very gracious Letters; in which they declared they were very ſorry for his Sufferings, and the unmannerly Behaviour of *Bovadilla* towards him, directing him to come to Court, where Care ſhould be taken that he ſhould be ſpeedily diſpatched with full Reſtitution of his Honour, as, indeed, was but reaſonable, ſince all he had done, and which had brought upon him ſo many Troubles, was purely out of Regard to the Intereſt of their Majeſties; and from the earneſt Deſire he had to hinder private Avarice from overturning the Meaſures taken for the public Benefit; and for the Intereſt of the Crown of *Caſtile*, at whoſe Expence the firſt Diſcoveries had been made.

11. Their Majeſties Orders came on the 12th of *December* for him to be ſet at Liberty, and to repair to *Granada*; where he was received by their Majeſties with a favourable Aſpect, and kind Words, importing that his Impriſonment had not been by their Deſire or Command, therefore they were much offended at it, and they would take Care thoſe that were in Fault ſhould

be puniſhed, and full Satisfaction given him. Afterwards they ordered his Buſineſs ſhould be expedited immediately, the Reſult thereof was, That a Governor ſhould be ſent to *Hiſpaniola*, who was to right the Admiral and his Brothers ; and *Bovadilla* ſhould be obliged to reſtore all he had taken from them ; and that the Admiral ſhould be allowed all that belonged to him, according to the Articles their Majeſties had granted him ; and that the Rebels ſhould be proceeded againſt, and puniſhed according to their Offences. Don *Nicholas de Obando* was ſent with theſe Powers ; he was a wiſe and judicious Man, but, as afterwards appeared, partial, craftily concealing his Paſſions, giving Credit to malicious Perſons, and therefore acting cruelly and revengefully.

But to return to the Admiral ; as their Majeſties were pleaſed to ſend *Obando* to *Hiſpaniola*, ſo they thought it proper to ſend the Admiral upon ſome Voyage that might turn to his Advantage, and keep him employed till the ſaid *Obando* could pacify and reduce the Iſland *Hiſpaniola* ; becauſe they did not mean to keep him ſo long out of his Office, without any juſt Occaſion ; the Informations ſent by *Bovadilla*, plainly appearing to be full of Malice, and not containing any thing for which he ought to forfeit his Rights. But there being ſome Delay in the Execution of this Deſign, and ill Men endeavouring to prevail that a new Information might be expected, the Admiral reſolved to ſpeak to their Majeſties, and beg of them that they would defend him againſt all Dangers, which he afterwards repeated by Letters ; and this procured him, firſt of all, a very favourable Anſwer, and very ſoon afterwards as favourable Grants and Conceſſions as he could poſſibly deſire ; which made him, in ſome Meaſure, forget all that he had ſuffered, and reſolve once more to expoſe his Life in another Voyage to the *Indies*, for the perfecting his Deſign, which probably after ſuch Uſage no other Man would have done.

12. The Continent of *America* had never been touched upon, or known before this Voyage ; and, to the Honour of the Admiral, it muſt be confeſſed, that he diſcovered it by Skill, and not by Chance ; and ſailed directly in ſearch of it from *Spain*, and not from the *Indies*. That he was indiſputably the firſt Diſcoverer, appears from hence, that he was at the Iſland of *Margarita* on the firſt of *Auguſt*, 1498, whereas *Alonſo Hojeda*, and *Americus Veſpucius* did not ſail from *Cadiz* till the 20th of *May*, 1499. But if the Admiral had been hindered from making this Diſcovery, they could not, with any Propriety, have claimed the Merit or Title of Diſcoverers, from what they performed in that Voyage, ſince they made uſe of the Admiral's Drafts and Projects, which by their Catholic Majeſties Commands, he had put into the Hands of the Biſhop of *Burgos*, for their Service ; and which, without their Majeſties Knowledge, he communicated to theſe Men, out of pure Hatred to the Admiral, and that he might, if it was poſſible, rob him of his Credit and Reputation, as he had already deprived him of a great Part of his Intereſt at Court. The Licenſes that he gave theſe Men were clandeſtine, and it was no ſooner known that they had obtained them, than others reſolved to make uſe of the ſame Intereſt, in order to obtain Shares in the Riches of the new World.

Amongſt others, ſome Inhabitants of the City of *Seville* formed a Company for this Purpoſe, and the principal Man amongſt them, at leaſt in Point of Capacity, was one *Peter Alonſo Nino*, an Inhabitant of *Palos*, who was with the Admiral when *Paria* was diſcovered, and *Chriſtopher Guerra* of *Seville*. *Peter Alonſo Nino* having obtained the King's Licence, upon Condition that he ſhould not come to an Anchor, nor land any where within fifty Leagues of what the Admiral had diſcovered, being himſelf unable to fit out a Ship, propoſed it to *Lewis Guerra* of *Seville* to defray the Expence ; and the Samples of Gold and Pearls the Admiral had ſent, having ſtirred up the Avarice of many, *Guerra* accepted of the Offer, provided that his Brother *Chriſtopher* ſhould go as Captain ; and accordingly they ſet ſail not long after *Alonſo de Hojeda*. They ſailed two or 300 Leagues to the Southward, diſcovered Land, and, keeping down the Coaſt, arrived at the Province of *Paria* a few Days after *Hojeda*, where, finding the *Indians* peaceably diſpoſed, they, contrary to their Inſtructions, cut *Brazil* Wood ; and holding on their Courſe, came to that which *Hojeda* had called the *Bay of Pearls*, formed by the Iſland *Margarita*, where they bartered for many Pearls.

The People of this Country went aboard the Ships without any Fear, carrying Necklaces of Pearls, and ſome of them in their Noſes and Ears ; the *Spaniards* drove a great Trade with Hawks-bells, Bracelets, Rings, and ſeveral Trifles made of Tin, which they took, and for them very freely gave their Pearls ; having got a conſiderable Quantity of them, they paſſed by *Coro*, near the Province now called *Venezuela*, 130 Leagues below *Paria* and the *Dragon's Mouth* ; and anchored in a Bay where they were very well received by fifty Men, who came from a Place a League off ; and very earneſtly preſſed them to anchor at their Town. The *Spaniards* gave them ſome of their Toys, and the *Indians* taking off all the Pearls they had about their Necks and Arms, in the Space of an Hour gave them as many as weighed fifteen Ounces. The next Day they came to anchor before the Town called *Curiana*, where the *Indians* intreated them to go aſhore, but the *Spaniards* being no more than thirty-three durſt not venture, and made Signs to them to come aboard, which they did in their Canoes, carrying Pearls to exchange for ſome *Spaniſh* Toys.

At length, being convinced of their Sincerity, the *Spaniards* went aſhore, and being courteouſly entertained, ſtayed there twenty Days : They plentifully ſupplied them with Veniſon, Rabbits, Geeſe, Ducks, Parrots, Fiſh, Bread made of Maize, *Indian* Wheat, and other Things, and brought them all the Game they would aſk for. By ſeeing ſo many Deer they concluded that this muſt be the Continent. They perceived that they kept Markets or Fairs, and that they made uſe of Jars, Diſhes, or Porringers, beſides other Veſſels of ſeveral Shapes, and that in their Pearl Necklaces they had Frogs and other Creatures made of Gold ; and on aſking where it was gathered, they anſwered, ſix Days Journey from thence ; they reſolved to ſail thither, and that was the Province of *Curiana Cauchcito*, where the People came aboard in their Canoes, without any Jealouſy. They carried ſome wrought and unwrought Gold, which they bartered away, but would not part with the Pearls, they had like thoſe of *Curiana* ; however, they gave them very fine Monkies and moſt beautiful Parrots of ſeveral Colours.

Departing hence, they proceeded further, where above five thouſand naked Men came out with Bows and Arrows, to hinder their landing, and though they endeavoured to appeaſe them by ſhewing Hawks-bells and other Things, they could not prevail, and therefore returned to *Curiana*, and were received with the ſame Satisfaction as before, and earneſtly entreated for Pins and Needles ; for whereas, at firſt, they had underſtood they were to ſew, and tack Things together, and therefore ſaid they had no uſe for them, going naked, the *Spaniards* ſhewed them that they were uſed for drawing Thorns out of their Feet, there being many in that Part, at which they ſmiled, and aſked for them. All that Country lies in ſeven or eight Degrees Latitude, and is not at all cold in *November* and *December*. The *Indians* were highly pleaſed, thinking they had cheated the *Spaniards*, who carried away above 150 Marks, or 1200 Ounces of Pearls, and ſome of them as large as ſmall Haſle-nuts, very beautiful and well coloured ; but they were ill bored, the *Indians* having no Iron. The *Spaniards* thought fit to return home, and ſo came back to *Paria* and the *Dragon's Mouth*. Two Months after they left *Curiana* they arrived in *Galicia*, on the 6th of *February*, 1500, where *Ferdinand de la Vega*, Lord of *Grajal*, was then Governor ; before whom *Peter Alonſo Nino* and *Chriſtopher Guerra* were accuſed, by their own Ships Crew, of having concealed Pearls, and defrauded the King of his fifth Part, which was the Duty.

The Noiſe that this Voyage made, and the great Riches which the Adventurers gained thereby, promoted the Spirit of Diſcovery, but more eſpecially among ſuch as had been acquainted with the Propoſals made by the Admiral,

miral, or had ſerved under him in his two firſt Voyages, and conſequently had greater Opportunities of gaining Experience, in this Way, than any other Men. Of theſe there was none ſo capable of proſecuting Voyages of this kind as *Vincent Yanez Pinſon*, of whom we have already ſpoken, for he was not only a very able Seaman, and, as ſuch, had ſailed with the Admiral in his firſt Diſcovery, but was alſo a Man of liberal Education, great Courage, and had a large Fortune, ſo that he fitted out at his own Expence a Squadron of four Sail of ſtout Ships, with which he ſailed to the *Cape de Verd* Iſlands, and, having there taken in ſuch Refreſhments as he thought neceſſary, proceeded from *St. Jago* upon the 13th of *January*, 1500, upon Diſcovery.

He firſt ſtood away to the South, and then to the Weſt, and having ſailed 700 Leagues loſt Sight of the North Star, and croſſed the Equinoctial Line, being the firſt Subject of the Crown of *Caſtile* and *Leon* that did it. When paſt the Line, they met with ſuch a dreadful Storm, that they expected to periſh; he ran 240 Leagues farther to the Weſtward, and on the 26th of *February* they diſcovered Land at a great Diſtance, being that which is now called *Cape St. Auguſtine*, though *Vincent Yanez* named it *Cabo de Conſolation*, or *Cape Comfort*, and the *Portugueſe* call it the Province of *Santa Cruz*, or of the *Holy Croſs*, now a Part of *Brazil*; they found the Sea thick and whitiſh, like a River, and, ſounding, had ſixteen Fathom Water. Captain *Pinſon*, going on Shore, here took Poſſeſſion of the Country in the Name of their Catholic Majeſties, and endeavoured all he could to bring the People to trade, but without Effect, for at laſt they came to Blows, in which ſome were ſlain on both Sides; and at laſt he thought it adviſeable to retire and continue his Voyage, which he did to the Mouth of the River *Maranon*, where he obſerved what the Admiral had done before at the Mouth of another great River; a mighty Struggle between the Tide of Salt-water running in, and a vaſt Current of freſh Water pouring down from the Land: He likewiſe found the Country at the Mouth of this River well inhabited on both Sides, but could not bring them to enter into any Trade as he expected, and therefore he reſolved, without any farther Delay, to proceed towards *Paria*, which he accordingly did.

In his Paſſage he met with another very large River, ſo that he drew up freſh Water when above twenty Leagues at Sea, and therefore he called it *Rio Dulce*, or the *Freſh River*, which has been ſince ſuppoſed to be a Branch of the great River *Yapari*, that makes the freſh Bay between *Paria* and the Iſland of *Trinity*; upon this freſh River, found by *Vincent Yanez*, it is ſuppoſed that the People called *Aruacas* have their Dwellings. They proceeded to *Paria*, and there took in *Brazil* Wood; from which *Vincent Yanez* ſtruck over to the Iſlands that lay in the Way to *Hiſpaniola*, and, the Ships being at Anchor, there aroſe ſuch a dreadful Storm that two of them ſunk in the Sight of the others, with all the Men; a third was forced from its Anchors, with eighteen Men, and carried out of Sight: The fourth, which is likely had the beſt Anchors and Cables, riding it out, beat ſo furiouſly upon the Sea, that the Sailors, believing it would be daſhed in Pieces, went all aſhore in the Long Boat, without Hopes of its eſcaping; and, for their own Security, had Thoughts of killing all the *Indians* thereabouts, to prevent their calling in their Neighbours to deſtroy them; but the Ship that had been drove away with the eighteen Men returned, and that which had rode out, when the Sea grew calm, was ſaved. In theſe two Ships they went away to *Hiſpaniola*, where they refitted, and returned into *Spain*, about the latter end of *September*, having diſcovered 600 Leagues about the Coaſt of *Paria*.

In the latter end of the Month of *December*, 1499, *James de Lepe*, a Native of the Town of *Palos*, having heard of the Expedition undertaken by *Pinſon*, applied himſelf to the Earl of *Miranda*, his Patron, and promiſed him mighty Things in caſe he would enable him to make the ſame Voyage, which was very ſoon complied with; and he actually arrived at the Mouth of the River *Maranon*, within a very ſhort time after *Pinſon* had left it, as he found to his Coſt; for the People, being provoked by his carrying away thirty-ſix Men out of their Country, attacked the *Spaniards* briſkly, and killed ſeveral, ſo that he was compelled to proſecute his Voyage to *Paria*, where he likewiſe quarrelled with the People, and returned without making the leaſt Advantage of this Expedition, except taking a few *Indian* Priſoners.

As it happened about this Time, it is requiſite that we ſhould ſpeak here of the great good Fortune of the Crown of *Portugal*, a Subject of which was ſo happy as to fall upon one of the richeſt Countries of *South America*, by meer Chance; the Thing happened thus: Don *Emanuel* King of *Portugal*, fitted out a Fleet for the *Eaſt Indies*, conſiſting of thirteen Sail, having on Board one thouſand two hundred Men, Soldiers and Sailors, under the Command of *Peter Alvarez Cabral*, who ſailed from *Liſbon* on *Monday* the 9th of *March*, 1500, and, to avoid the Coaſt of *Guinea*, where they afterwards met with great Calms, ſtruck out to Sea on the Starboard, ſteering his Courſe to the Southward, the better to turn the *Cape of Good Hope*, becauſe it runs far out into the Sea; having ſailed a Month, ſtill keeping to Sea, on the 24th of *April* he fell in with the Coaſt of the Continent of *America*, which, according to the Computation of the Pilots, might be about 450 Leagues diſtant from the Coaſt of *Guinea*, and in about 10° South Latitude. The Pilots could not perſuade themſelves that it was a Continent, but ſome great Iſland like *Hiſpaniola*, and, in order to find it out, they held on one Day along the Coaſt, hoiſted out a Boat, went aſhore, and ſaw an infinite Number of naked People, but not black, nor with curled Hair like thoſe of *Guinea*, but hanging down lank like ours, which they thought was extraordinary; the Boat returned to give an Account of it, and ſaid that there was a good Harbour where they might come to an Anchor; the Fleet drew near to Land, and the Commander ſent out the Boat again, with Orders to endeavour to take ſome Men.

The *Indians* retired to a Hill, waiting to ſee what the *Portugueſe* would do; but when they were about ſending other Boats, the Weather obliged them to proceed along the Coaſt, and they anchored in another good Harbour, which they called *Puerto Seguro*, or *Safe Harbour*; a Boat went aſhore and took two *Indians*, whom the Commander ordered to be cloathed and ſent back, whereupon a great Number of People came forward, ſinging and dancing, ſounding Horns of ſeveral Sorts, and leaping in joyful Manner; the Commander went aſhore with moſt of his Men, and that being *Eaſter-day*, they erected an Altar under a Tree, where they ſung Maſs; the *Indians* drew near in a very peaceable Manner, and with much Security kneeled down, beat their Breaſts, doing all that they ſaw the Chriſtians do, and were as attentive at a Sermon that was preached as if they underſtood it.

Peter Alvarez Cabral ſent away a Ship from thence under *Gaſpar de Lemos*, with Advice of the Land he had diſcovered, which was very acceptable. The Men walked about all that Day diverting themſelves, and the *Indians*, for Pieces of Paper, Bits of Cloth, and ſuch like inconſiderable Things, gave them Parrots and other Birds of fine Colours, Axis, Batatas, and the like. They went to the Towns, and thought the Country fruitful and agreeable, very full of Maize, or *Indian* Wheat, and Cotton. *Peter Alvarez* ordered a Stone Croſs to be erected there, in Token of Poſſeſſion, and therefore the *Portugueſe* called that Country *Santa Cruz*, or *Holy Croſs*, and it is now called *Brazil*, from that Sort of Wood brought from thence. The Commander left two Men there of twenty he had brought from *Portugal*, being baniſhed Men, to be left where he thought fit, whom the *Indians* uſed very well, and one of them learned the Language, and ſerved a long time for an Interpreter. Thus the Diſcovery of *Brazil* was purely accidental, and the only one independant of what was projected by the Admiral, or grounded upon his Projects.

By Eman Bowen Geographer to His Majesty.

The most difficult part of the Course of Sailing thro' the Windward Paſsage is, from Port Royal to Point Morant, which, being against the Trade Winds, takes up sometimes 5 or 6 Weeks, tho' but the distance of 20 Leagues. But the most dangerous is from that Point, till they get clear of Crooked Iſland, a Course of 160 Leagues; for the French and Spaniards are generally waiting to intercept such English Ships, as chuse to paſs this way rather than by the Gulf of Florida; where they are also exposed to the same inconveniences, both from the Trade Winds and the French and Spanish Cruizers.

K. Charles II by Charter dated June 30.th 1665 granted to the E. of Clarendon D. of Albemarle, &c. the Province of Carolina extending Southward to the 29 Deg: of N. Latitude, so that Fort S.t Auguſtin as well as Georgia falls within these limits.

Guanahani San Salvador or Cat Island, was the first Land discover'd in the New World Anno Dom: 1492 by Christopher Columbus.

The Bahama Iſlands where taken from the English by the French & Spaniards in 1703 in 1717 Captain Rogers after having Plunder'd most of them retook New Providence which has ever since belong'd to y.e English.

The Moſquitos is a small Nation of Indians never yet Conquer'd by the Spaniards, the Country being secured by Moraſses and inaccessible Mountains within the Land, and by dangerous Rocks & Shoals on y.e Sea Side.

The Spanish Gallions coming before R. de la Hacha notice is sent from thence over land to Cartagena, Lima, Panama &c. to hasten y.e King's Treasure. They then continue their Course to Cartagena, and after a stay of 2 Months go to Puerto Bello and are about a Month taking in the Treasure from Panama &c. then they return to Cartagena finish their Lading & Sail to the Havana to meet the Flota from la Vera Crux whence they proceed together thro the Gulf of Florida for Old Spain.

John Oxnam of Plymouth in 1575 fitted out a Ship with 70 Men; landed on the Iſthmus of Darien, near y.e place where S.r Francis Drake had conference with the Indians; left the Ship there a-ground, & covered her w.th Trees; went inland to a River, built a Bark & sail'd thro' to y.e South Sea, where he made several rich Prizes, one of 60 Thousand Peazes of Gold.

13. It muſt naturally ſeem ſtrange to the judicious and attentive Reader, that every light, every tranſient Scheme for finding new Countries, and making freſh Diſcoveries, ſhould meet with Encouragement, while the Admiral himſelf was not only in a manner neglected, but alſo moſt infamouſly abuſed. He ought to conſider, however, that Diſcoveries and Improvements are ſeldom well underſtood by Stateſmen and Courtiers. To ſpeak honeſtly and fairly they are the laſt Sort of Men that can be brought to underſtand them, and that for this plain Reaſon: The Merit of ſuch Undertakings conſiſts in propoſing a very large and certain future Advantage from a ſmall preſent Expence, whereas Stateſmen and Courtiers, having the preſent Time only in View, care very little for ſuch Advantages as are to redound to their Country in Times after their own.

We have here a clear and direct Proof of this in the Conduct of the *Spaniſh* Miniſters upon this Occaſion; for they were infinitely more ready to liſten to all ſuch Adventurers as propoſed immediate Profits, and a preſent Supply of Gold, Pearl, and other rich Commodities, than to the Schemes of the Admiral, who was a grave public-ſpirited Man, and ſhewed his Integrity as well as his Wiſdom, in deſiring his Reward in thoſe Countries which he diſcovered, and not in *Spain*. But to enter more particularly into the Miſtakes that were made by the *Spaniſh* Miniſters in their Conduct of this Affair, for the ſake of other Countries, and future Diſcoveries, we will reduce them under Three Heads.

Firſt, It was extremely wrong, to place the ſole Merit of thoſe new found Countries, in producing Gold and Pearls; and this for many Reaſons which might be aſſigned, but we will mention only two; one is, that a Country is not enriched ſo much as endangered by having Gold Mines; and this, becauſe it exhauſts its Subjects, encourages Luxury, and excites the Envy of other Nations. In this Senſe, whatever Commodities will produce Gold and Silver are much more valuable than thoſe Metals, as we ſee plainly by the *Dutch* Fiſheries on our Coaſt, which are infinitely more beneficial than if, inſtead of Herrings, their Nets brought up ſo much Gold as thoſe Herrings ſell for, ſince it is a continual Nurſery for Seamen, employs a vaſt Number of People on Shore, creates a very large and profitable Trade, and has increaſed the *Dutch* Shipping to almoſt an incredible Degree: Gold and Silver, therefore, are the Riches of private Men; but the Wealth of a Nation conſiſts in Induſtry and Trade. The other Reaſon why the bringing over ſuch rich Metals ought not to be encouraged, eſpecially at the Beginning of ſuch Diſcoveries, is, becauſe it hinders Plantations and Settlements, and, by exciting a Spirit of Avarice, abſolutely deſtroys that kind of public Spirit, which can alone diſpoſe the Inhabitants of Colonies to become truly uſeful to their Mother Country.

The *ſecond* great Miſtake they committed was, in making their Notions public, and thereby drawing Multitude of Adventurers to croud in with their Projects; which not only diſtracted the Views of the great Men themſelves, but diſturbed all *Spain*, and, inſtead of promoting that kind of Turn which was requiſite to improve thoſe new diſcovered Countries, begat quite the reverſe, and eſtabliſhed it as a general Opinion, that Wealth was the ſole Good, and that every kind of Hazard was to be run in order to obtain it.

The *third* Error, was their ſlighting and relinquiſhing that moſt wiſe and judicious Plan which *Columbus* had chalked out; for he, by ſuggeſting the Converſion of Infidels to the Chriſtian Faith, and thereby obtaining the Sanction of the Pope's Grant, had moſt effectually covered all the Views of Ambition and Intereſt which it became the Court of *Caſtile* to conceal; but the Biſhop of *Burgos* and his Creatures were not more wanting in Virtue than negligent in Point of Decency, and, from a reſtleſs and rapacious Deſire of enriching themſelves in an Inſtant, at the Expence of this new World, drew aſide the Curtain, and ſhewed all *Europe* at once, both what it was they ſought, and how eaſy a Thing it might be to ſhare with them. Whereas, if they had ſilently eſtabliſhed large and powerful Colonies in *Hiſpaniola*, and contented themſelves with moderate Returns of Gold, they might have been ſtrong enough to have given Laws in that Part of the World, before it had been poſſible for any other Nation to have found their Way thither.

SECTION V.

The Fourth Voyage of the Admiral Don CHRISTOPHER COLUMBUS; *his Diſcoveries on the Continent, and of the Iſlands in* America; *with an Account of his Return from that Voyage to* Spain, *and his Deceaſe.*

1. *An Account of the new Propoſals made by the Admiral to the Court of* Spain *in regard to his Fourth Voyage to the* Indies, *and the Acceptance they met with.* 2. *His Arrival in the* Indies, *and the baſe Uſage that he met with from* Nicholas Obando, *the new Governor of* Hiſpaniola. 3. *The Admiral proſecutes his Diſcoveries along the Coaſt of the Continent, and labours all he can to gain Intelligence from the* Indians, *whom he treats with the utmoſt Humanity.* 4. *He continues his Voyage towards the Iſthmus of* Darien, *ſuppoſing from the Account given by the Natives, that he ſhould have found a Paſſage thereabouts into the* South-Sea. 5. *Diſcovers all along the Coaſt of the Continent to the famous Haven of* Porto-Bello, *to which he gave that Name, and the Reaſon of it.* 6. *He enters the Port of* Baſtimentos, *and ſhelters himſelf afterwards in that of* Retrete, *where he falls out with the Natives, through the Fault of his own People.* 7. *The Meaſures he took for the Preſervation of the* Spaniards, *and the Reaſon of his reſolving to leave a conſiderable Colony in that Neighbourhood.* 8. *The Diſcoveries made by them of rich Mines of Gold in the Country near their Settlement, and of the Cauſes of the Troubles that enſued among them.* 9. *The Miſeries endured by the Admiral and his Men in* Jamaica, *and the Method they took to ſend Advice of their Miſfortunes to* Santo Domingo. 10. *A large Account of the Rebellion raiſed againſt the Admiral under theſe Diſtreſſes, and of his Wiſdom and Courage in ſupporting them.* 11. *His Return with great Difficulty to* Hiſpaniola, *and from thence into* Spain, *and his Reception there.* 12. *His Death, and ſome Remarks on the Circumſtances attending it.* 13. *Obſervations upon this Section, and the ill Uſage his Family met with notwithſtanding all the Advantages derived to* Spain *from Admiral* Columbus's *Diſcoveries.*

1. THE Admiral found not only all his Patience, of which he had a large Stock, but all his Parts, and all his Addreſs, in neither of which he was the leaſt deficient, abſolutely neceſſary to maintain his Ground at Court. The King, who was a Prince flattered with the Reputation of being a profound Stateſman, becauſe he knew how to diſſemble, who had a large Share of Cunning, and who durſt do any thing however unbecoming his Dignity and Birth, treated the Admiral with a cold Eſteem, and ſecretly hated a Character ſo unlike his own. The Queen herſelf, tho' a true *Caſtilian*, which implies a Woman of Genius, Piety, and Honour, had conceived

ſome Prejudices againſt *Columbus*, on account of that Height with which he had exerted his Authority; but at the Bottom at his having procured it rather by way of Contract, than by expecting ſuch a Reward as their Catholic Majeſties ſhould judge proper. The Admiral ſaw this clearly enough, and that though their Majeſties were deſirous to do Juſtice to his Pretenſions, yet they were inclined to ſtrip him of his Power, and were therefore averſe to his Deſire of returning to the *Indies*.

He reſolved therefore to attack them in their own Way; and, having demanded a private Audience of the Queen, inſinuated, that what he had yet done was nothing; that his Diſcoveries on the Continent were with a View to find a Paſſage to the *Eaſt Indies*, and that he did not at all doubt but that in another Voyage he ſhould be able to ſurmount all Difficulties, and ſubdue the *Eaſt* as well as the *Weſt Indies* to the Power of their Catholic Majeſties. This had its deſired Effect; a Fleet was immediately ordered for this new Service, and the Admiral was again as much careſſed, as if the King and Queen had really thought it poſſible to blot out of his Mind the Memory of his ill Uſage.

2. He ſet ſail from *Cadiz* on the 9th of *May*, 1502, and ſailed to *St. Catherines*; thence they went to *Arzilla* to relieve the *Portugueſe*, who were reported to be in great Diſtreſs; but when they came thither the *Moors* had raiſed the Siege: The Admiral therefore ſent his Brother Don *Bartholomew Columbus*, his own Son, with the Captain of the Ships, on ſhore, to viſit the Governor of *Arzilla*, who had been wounded by the *Moors* in an Aſſault. He returned the Admiral Thanks for the Viſit, and to this Purpoſe ſent ſome Gentlemen to him, among whom ſome were Relations to Donna *Philippa Moniz*, the Admiral's Wife. The ſame Day he ſailed, and, arriving at *Grand Canaria* on the 20th of *May*, caſt anchor among the little Iſlands, and on the 24th went over to *Maſpalomas* in the ſame Iſland, there to wood and water for their Voyage. The 15th of *June* they arrived at the Iſland *Martinico*, whence they ſtood to the Weſtward and came to *Domingo*, ten Leagues from the other, ſo running along among the *Caribbee Iſlands* to *Santa Cruz*; and on the 24th of the ſame Month ran along the South Side of the Iſland of *St. John*. The Admiral had a mind to change one of his Ships for another, becauſe it was a bad Sailer, and beſides would lie almoſt under Water, which was a Hindrance to his Voyage, becauſe his Deſign was to have gone directly upon the Coaſt of *Paria*, and keep upon the Shore till he came upon the Streight, which he certainly concluded was about the Places ſince called *Veragua* and *Nombre de Dios*; but ſeeing the Fault of the Ship, he was forced to repair to *S. Domingo*, to change it for a better.

Yet, that the Judge ſent by their Majeſties to call *Bovadilla* to an Account for his Mal-adminiſtration might not be ſurprized at his unexpected Arrival, upon the 29th of *June*, being near the Port, the Admiral ſent *Peter de Terreros*, Captain of one of the Ships, to ſignify what Occaſion he had to change that Ship, for which Reaſon, as alſo becauſe he apprehended a great Storm was coming, he deſired to ſecure himſelf in that Port, adviſing him not to let the homeward-bound Fleet ſail out for eight Days to come, for if he did it would be in great Danger. But the Governor would not permit the Admiral to come into the Harbour, nor did he hinder the going out of the Fleet that was bound for *Spain*, which conſiſted of eighteen Sail, and was to carry *Bovadilla*, who had impriſoned the Admiral and his Brother, *Francis Roldan*, and all the reſt who had been in the Rebellion againſt them, and done them ſo much Harm; all whom it pleaſed God to infatuate, that they might not admit of the Admiral's good Advice. This was prevented by their ſetting out of that Port for *Spain*; for no ſooner were they come to the Eaſt Point of the Iſland *Hiſpaniola*, but there aroſe ſo terrible a Storm, that the Admiral of the Fleet ſunk, in which was *Bovadilla*, with moſt of the Rebels; and this Hurricane made ſuch Havock among the reſt, that of the eighteen Ships only three or four were ſaved. This happened on the laſt of *June*, when the Admiral, having foreſeen the Storm, and being refuſed Admittance into the Port for his Security, drew up as cloſe to Land as he could, thus ſheltering himſelf, not without much Diſſatiſfaction among the Men, who, for being with him, were denied that Reception which certainly had been allowed to Strangers, much more to them who were of the ſame Nation; for they feared they ſhould be ſo ſerved if any Miſfortune ſhould befal them for the future; and though the Admiral was concerned on the ſame Account, yet it grieved him more to behold the Baſeneſs and Ingratitude uſed towards him in that Country he had diſcovered for the Honour and Benefit of *Spain*, in being thus refuſed to ſhelter his Life in it.

Yet his Judgment and Prudence ſecured his Ships till the next Day; when the Tempeſt increaſing, and the Night coming on very dark, three Ships broke from him, every one his own Way, the Men on board each of them, though all in great Danger, concluding, the others were loſt: Thoſe aboard the Ship called *Santo*, thinking to ſave their Boat, which had been aſhore with the Captain *Terreros*, dragged it aſtern, where it overſet, and were at laſt forced to let go to ſave themſelves: But the Caravel *Bermuda* was in much more Danger; for while running out to Sea, ſhe was almoſt covered with it; by which it appeared the Admiral had Reaſon to change it, and all Men concluding that, under God, the Admiral's Brother was the ſaving of her, by his Wiſdom and Reſolution; for, as has been ſaid, there was not at that Time a more expert Sailor than he. So that after they had all ſuffered very much, except the Admiral, it pleaſed God they met again in the Port of *Azua*, on the South Side of *Hiſpaniola*, where every one giving an Account of his Miſfortunes, it appeared, that *Bartholomew Columbus* had weathered ſo great a Storm, by flying from Land like an able Sailor; and that the Admiral was out of Danger, by lying cloſe to the Shore like a cunning Aſtrologer, who knew whence the Danger muſt come. Well might his Enemies blame him therefore, as if he had raiſed the Storm by Magic, to be revenged on *Bovadilla*, and the reſt of his Enemies that were with him, ſeeing that none of his four Ships periſhed, and that of eighteen with *Bovadilla*, only one, called *la Aguja* or the *Needle*, the worſt of them all, held on its Courſe for *Spain*, where it arrived ſafe, having on board four thouſand Peſos of Gold belonging to the Admiral, the other three that eſcaped, returning to *S. Domingo* ſhattered and in a diſtreſſed Condition.

3. The Admiral in the Port of *Azua* gave his Men ſome Refreſhment after the Storm, and it being one of the Diverſions uſed at Sea to fiſh when there is nothing elſe to do, it may not be amiſs to mention two Sorts of Fiſh among the reſt which were taken there, the one pleaſant, the other ſingular: The firſt was a Fiſh called *Saavina*, as big as half an ordinary Bell, which lying aſleep above Water was ſtruck with a Harping-iron from the Boat of the Ship *Biſccina*, and held ſo faſt that it could not get looſe, but being tied with a long Rope to the Boat, drew it after it as ſwift as an Arrow, ſo that thoſe aboard the Ship ſeeing the Boat ſkim about, and not knowing the Occaſion, were aſtoniſhed, till at laſt the Fiſh ſunk, and being drawn to the Ship's Side was there hauled up by the Tackle. The other Fiſh was taken after another Manner: The *Indians* call it *Manati*, and there are none in *Europe*; it is as big as a Calf, nothing differing from it in the Colour and Taſte of the Fleſh, but that it is better and fatter: Within they have nothing like a Fiſh, and feed only on the Graſs they find along the Banks.

But to return to our Hiſtory: The Admiral having a little refreſhed his Men and repaired his Ships, left the Port of *Azua* and went to that of *Brazil*, which the *Indians* call *Giacchomo*, to ſhun another Storm that was coming: He ſailed again on the 14th of *July*, and was ſo becalmed, that, inſtead of holding his Courſe, the Currents carried him away to certain Iſlands near *Jamaica*, which are very ſmall and ſandy, and he called them *los Poros*, or the *Wells*, becauſe, not finding any Water in them, they dug many Pits in the Sand, and took up Water there for their Uſe: Then ſailing Southward for the Continent, he came to certain Iſlands, and went aſhore upon the biggeſt only, called *Guanaia*, (whence thoſe that made Sea-Charts took occaſion to call all the *Iſlands of Guanaia*) which are almoſt twelve Leagues from the Continent, near the Province now called *Honduras*, though then the Admiral called it *Cape Caſinas*. Being come to the Iſland of *Guanaia*, the Admiral ordered his Brother *Bartholomew* to go aſhore with two Boats; where he found the People like thoſe of the other Iſlands, except their not having ſuch high Foreheads; they alſo ſaw abundance of Pine-trees, and Pieces of *Lapis Caliminaris*, uſed to mix with Copper, which ſome Seamen, taking for Gold, kept Parcels of it privately a long Time.

The Admiral's Brother being aſhore at that Iſland, and very deſirous to know ſomething of it, it ſo fell out that a Canoe as long as a Galley, eight Foot wide, all of one Tree, and like the others in Shape, put in there, being loaded with Commodities brought from the Weſtward, and bound towards *New Spain*; in the midſt of it was a Covering like an Awning, made of Palm-tree Leaves, not unlike thoſe of the *Venetian* Gondolas, which kept all under it ſo cloſe, that neither Rain nor Sea-water could wet the Goods; under this Awning were the Children, the Women, and all the Goods; and though there were twenty-five Men on board this Canoe, they had not the Courage to defend themſelves againſt the Boats that purſued them. The Canoe being thus taken, without any Oppoſition was carried to the Admiral, who bleſſed God that it had pleaſed him at once to give him Samples of the Commodities of that Country, without expoſing his Men to any Danger: He therefore ordered ſuch Things to be taken as he judged moſt valuable, ſuch as ſome Quilts, and Shirts of Cotton without Sleeves, very curiouſly wrought, and dyed of ſeveral Colours, with ſome ſmall Cloths of the ſame Sort, and large Sheets in which the *Indian* Women on board the Canoe wrapped themſelves, as the *Mooriſh* Women at *Granada* uſed to do, and long wooden Swords with a Channel on each Side where the Edge ſhould be, in which there were ſharp Edges of Flint, fixed with Thread and a bituminous Sort of Matter, which cut naked Men as if they were of Steel; and Hatchets to cleave Wood, like thoſe of Stone the other *Indians* uſe, but that theſe were made of good Copper; alſo Bells of the ſame Metal, Plates, and Crucibles to melt the Metal.

For their Proviſion, they had ſuch Roots and Grain as in *Hiſpaniola*, and a ſort of Liquor, made of Maize, like *Engliſh* Beer, and abundance of Cacoa Nuts, which in *New Spain* paſſed for Money, and which they ſeemed to value very much, for when they were brought on board among their other Goods, if any of thoſe Nuts fell, they all ſtooped to take them up, as if they had been Things of great Conſequence. Yet at that Time they ſeemed to be in a manner beſide themſelves, being brought Priſoners from their Canoe aboard the Ship, among ſuch ſtrange and fierce People, and diſcovered nothing extraordinary, except their Modeſty, which among Men and Women was highly remarkable. This moved the Admiral to uſe them well, and reſtore their Canoe, and give them ſome Things in exchange for thoſe that had been taken from them. Nor did he keep any one of them but an old Man whoſe Name was *Giumbe*, that ſeemed to be the Chief of them, to learn ſomething of him concerning their Country, and that he might draw others to converſe with the Chriſtians; which he did very readily and faithfully all the while they ſailed where his Language was underſtood; therefore, as a Reward for this his Service, when they came where he was not underſtood, the Admiral gave him a Preſent, and ſent him home very well pleaſed, which was before he came to *Cape Gracias de Dios*.

4. Notwithſtanding the Admiral had heard ſo much from thoſe in the Canoes concerning the great Wealth, Politeneſs, and Ingenuity of the People Weſtward towards *New Spain*; yet thinking that thoſe Countries lying to the Leeward, he could ſail thither when he thought fit from *Cuba*, he would not go at this Time, but held on his Deſign of diſcovering the Streight in the Continent, to clear a Way into the *South Sea*; which was what he aimed at, in order to come at the Countries that produce Spice, and therefore reſolved to ſail Eaſtwards towards *Veragua*, and *Nombre de Dios*, where he imagined the ſaid Streight to be, as in effect it was; yet he was deceived in the Matter, for he did not conceit it to be an Iſthmus or narrow Neck of Land; but a ſmall Gulph, running from Sea to Sea, from whence his Miſtake might proceed; for when they ſaid the Streight was at *Veragua* and *Nombre de Dios*, it might be underſtood either of the Land or Water; and he took it in the moſt uſual Senſe, and for what he moſt earneſtly deſired: And yet, though that Streight is Land, it was, and is, the Way to both Seas, and by which ſuch immenſe Riches have been diſcovered and conveyed; for (ſays the Admiral's Journal) it was God's Will a Matter of ſuch vaſt Concern ſhould not be otherwiſe found out, that Canoe having given the firſt Information concerning *New Spain*.

There being nothing therefore in the Iſland of *Guanaia* worth taking notice of, he without further Delay ſailed, in order to ſeek out the Streight towards the Continent to a Point he called *Caſinas*, becauſe there were abundance of Trees that bear a Sort of Fruit that is rough, have a Stone, and is good to eat, eſpecially boiled, which Fruit the *Indians* in *Hiſpaniola* call *Caſinas*. There appearing nothing worth taking notice of in that Country, the Admiral would not loſe Time to go into a great Bay the Land makes there, but held on his Courſe Eaſtwards along that Coaſt which runs along the ſame Way towards *Cape Gracias a Dios*, and is very low and open. The People neareſt to *Cape Caſinas* wear thoſe painted Shirts or Jerkins, before mentioned, and which were like Coats of Mail, made of Cotton, ſtrong enough to defend them againſt their Weapons, and even to bear off the Stroke of ſome of ours. But the People higher Eaſtwards towards *Cape Gracias a Dios* were almoſt black, of a fierce Aſpect, go ſtark naked, are very ſavage, and, as the *Indian* that was taken ſaid, eat Man's Fleſh, and alſo Fiſh juſt as it was taken. They have their Ears bored with ſuch large Holes, that they may put a Hen's Egg into them; which made the Admiral call that Coaſt *de las Orejas*, or, *Of the Ears*.

There, on the 14th of *Auguſt*, 1502, Don *Bartholomew* went aſhore in the Morning, with the Colours, the Captains, and many of the Men to hear Maſs. And when the Boats went aſhore to take Poſſeſſion of the Country for their Catholic Majeſties, above one hundred Men ran down to the Shore loaded with Proviſions, who, as ſoon as the Boats came aſhore with the Lieutenant, on a ſudden retired back without ſpeaking a Word. He ordered they ſhould give them Hawks-Bells, Beads, and other Things; and, by means of the before-mentioned Interpreter, inquired concerning the Country; tho' he having been but a ſhort Time with him, did not underſtand the Chriſtians, by reaſon of the Diſtance of this Country from *Hiſpaniola*, where ſeveral Perſons aboard the Ships had learned the *Indian* Language; nor did he underſtand thoſe *Indians*; who being pleaſed with the Things which had been given them, came the next Day to the ſame Place loaded with ſeveral ſorts of Proviſions, as Hens of that Country, which are better than ours, Geeſe, roaſted Fiſh, red and white Beans like Kidney Beans, and other Things like thoſe in *Hiſpaniola*. The Country was green and beautiful, tho' low, and producing abundance of Pines, Oaks, Palm Trees of ſeveral ſorts, and Mirabolans, and almoſt all ſorts of Proviſions which *Hiſpaniola* affords were there to be found; abundance of Leopards, Deer, and other Beaſts, as alſo all ſorts of Fiſh that there are in the Iſlands, and in *Spain*.

The People in this Country are much like thoſe of the Iſlands, but that their Foreheads are not ſo high, nor do they ſeem to have any Religion. They uſe ſeveral Languages among them, and for the moſt part they go naked, but cover their Privities; yet ſome wear ſhort Jumps down to their Navels without Sleeves; their Arms and Bodies have Figures wrought upon them with Fire, which make them look odly; and ſome have Lions, others Deer, and others Caſtles, with Towers or other Things painted on their Bodies: Inſtead of Caps the better ſort of them wear red and white Cloths of Cotton; and ſome have Locks of Hair hanging on their Forehead; but when they are to be fine on a Feſtival

Day, they colour their Faces, ſome black, and ſome red; others draw Streaks of ſeveral Colours; others paint their Noſe, and others black their Eyes; and thus adorn themſelves to appear beautiful, in a manner that to us would make them look like Devils. The Admiral ſailed along the ſaid Coaſt *de las Orejas* Eaſtward to *Cape Gracias a Dios*, which was ſo called, becauſe tho' there be but ſixty Leagues to it from *Caſinas*, they laboured ſeventy Days by reaſon of the Current and contrary Winds upon a Tack to gain it, ſtanding out to Sea, and then making the Shore, ſometimes gaining, and ſometimes loſing Ground, as the Wind was ſcant or large when it came about. And had not the Coaſt afforded ſuch good anchoring, they had been much longer upon it; but being clear, and having two Fathom Water half a League from the Shore, and two more at every League's Diſtance, they had always the Conveniency of anchoring at Night, when there was but little Wind; ſo that the Courſe was navigable by reaſon of the good anchoring, but however with Difficulty.

When, on the 14th of *September*, they came up to the Cape, perceiving the Land turned off to the South, and that they could conveniently continue their Voyage with thoſe Levant Winds that reigned there, and had been ſo contrary, they gave Thanks to God; for which Reaſon the Admiral called this Cape *Gracias a Dios*. A little beyond it they paſſed by ſome dangerous Sands that ran out to Sea as far as the Eye could reach. It being requiſite to take in Wood and Water, on the 16th of *September* the Admiral ſent the Boats to the River, that ſeemed to be deep and have a good Entrance; but the coming out proved otherwiſe, for the Winds blowing from Sea, and the Waves running high againſt the Current of the River, ſo diſtreſſed the Boats, that one of them was loſt with all the Men in it; and therefore the Admiral called it the River *de la Diſgratia*, that is, *of the Diſaſter*. In this River, and about it, there were Canes as thick as a Man's Leg. And on the 25th of *September*, ſtill running Southward, they came to an Anchor near a little Iſland called *Quiriviri*, and a Town on the Continent, the Name whereof was *Cariari*, where were the civileſt People, the fineſt Country, and beſt Situation they had yet ſeen, as well becauſe it was high, full of Rivers, and abounding in Trees, as becauſe the Iſland was thick wooded, and full of Foreſts of Palm, Mirabolan, and other ſorts of Trees: For this reaſon the Admiral called it *Hucite*. It is a ſmall League from the Town the *Indians* call *Cariari*, which is near a great River; whither reſorted a great Multitude of People from the adjacent Parts, ſome with Bows and Arrows, others with Staves of Palm Tree, black as a Coal, and hard as Horn, pointed with the Bones of Fiſh; others with Clubs, as if they intended to defend the Country. The Men had their Hair braided about their Heads, the Women ſhort, like ours; but perceiving the *Spaniards* to be a peaceable People, they were very deſirous to barter their Commodities, which were Arms, Cotton Jerkins, and *Guanins*, which is pale Gold they wear about their Necks.

Theſe Things they ſwam with to the Boats, for the Chriſtians went not aſhore that Day nor the next, nor would the Admiral allow any thing of theirs to be taken, that they might not be eſteemed Men that valued that Goods; but gave them ſome *Spaniſh* Baubles. The leſs they ſaw Strangers deſired Exchange, the more eager they were, making abundance of Signs from Land; at laſt perceiving no body went aſhore, they took all the Things that had been given them, without reſerving any, and tying them together, left them in the ſame Place where the Boats firſt went aſhore, and where our Men found them when they landed. The *Indians* about this Place, believing that the Chriſtians did not confide in them, ſent an antient Man of an awful Preſence, with a Flag upon a Staff, and two Girls, one about eight, the other of about fourteen Years of Age, who putting them into the Boat, made Signs that the Chriſtians might ſafely land. Upon their Requeſt, they went aſhore to take in Water, the *Indians* taking great Care not to do any thing that might diſtaſte the Chriſtians. And when they ſaw them return to their Ships, they made Signs to them to take along with them the young Girls, with their Guanins about their Necks: And at the Requeſt of the old Man that conducted them, they complied, and carried them aboard, wherein thoſe People ſeemed more friendly than others had done; and in the Girls appeared a wonderful Spirit; for though the Chriſtians were Strangers to them, they expreſſed no manner of Concern, but always looked pleaſant and modeſt, which made the Admiral treat them well, and ſet them aſhore again where the fifty Men were; and the old Man that had delivered them received them with much Satisfaction.

The Boats going aſhore that ſame Day, found the ſame People with the Girls, who reſtored all the Chriſtians had given them. The next Day the Admiral's Brother going aſhore to learn ſomething of thoſe People, two of the chief Men came to the Boat, and taking him by the Arms between them, made him ſit down upon the Graſs; and he aſking ſome Queſtions of them, ordered the Secretary to write down what they anſwered; but they ſeeing the Pen, Ink, and Paper, were in ſuch a Conſternation, that moſt of them ran away; which it was believed they did for fear of being bewitched, for they are reputed a ſuperſtitious People, and that not without Reaſon, becauſe when they came near the Chriſtians, they ſcattered ſome Powder about them in the Air, and burning ſome of the ſame Powder, endeavoured to make the Smoke go towards the Chriſtians. Beſides their refuſing to keep any thing that belonged to them, ſhewed a Jealouſy. Having ſtaid here longer than was convenient, conſidering the ſhort Time they had after repairing the Ships, and provided all they wanted, they now haſtened away.

Upon the 2d of *October* the Admiral ordered his Brother to go aſhore with ſome Men to view that *Indian* Town, and learn ſomething of their Manners, and the Nature of the Country. The moſt remarkable Things they ſaw were, in a great wooden Palace, covered with Canes, ſeveral Tombs; in one of which there was a dead Body, dried up and embalmed; in another, two Bodies wrapt up in Cotton Sheets, without any ill Scent; and over each Tomb was a Board with Figures of Beaſts carved on it; and on ſome of them the Effigies of the Perſons buried there, adorned with Guanins, Beads, and other Things they moſt valued. Theſe being the moſt civilized *Indians* in thoſe Parts, the Admiral ordered ſome to be taken: Two of the chiefeſt were picked out, and the reſt ſent away with ſome Gifts and Civility, that the Country might not be left in an Uproar, telling them they were to ſerve as Guides upon that Coaſt, and then be ſet at Liberty. But they believing they were taken out of Covetouſneſs, that they might ranſom themſelves with their Things and Goods of Value, the next Day abundance of them came down to the Shore, and ſent four aboard the Admiral, as their Embaſſadors, to treat about their Ranſom, offering ſome Things, and freely giving two Hogs of the Country, which, tho' ſmall, are very wild. The Admiral therefore, obſerving the Policy of theſe People, was more deſirous to be acquainted with them, and would not depart till he had learned ſome Things of them, but would not liſten to their Offers; he therefore ordered ſome Trifles to be given to the Meſſengers, that they might not go away diſſatisfied, and that they ſhould be paid for their Hogs.

5. On the 5th of *October* the Admiral ſailed, and came to the Bay of *Caravaro*, which is ſix Leagues in Length, and about three in Breadth. Here there are many ſmall Iſlands, and two or three Channels within thoſe Iſlands. The Ships ſail as it were in Streets between Iſlands, the Leaves of the Trees ſticking againſt the Shrouds. As ſoon as they anchored in this Bay, the Boats went to one of thoſe Iſlands, where there were twenty Canoes upon the Shore, and the People lye naked, having only a Gold Plate about their Necks, and ſome an Eagle of Gold. They ſhewed no Signs of Fear; and the two *Indians* of *Cariari* interpoſing gave a Gold Plate for three Hawks-Bells, which weighed ten Ducats. And they ſaid there was great Plenty of that Metal upon the oppoſite Continent, not far from thence.

The next Day, being the twenty-ſeventh of *October*, the Boats went aſhore, where meeting ten Canoes full of People, and they refuſing to barter their Gold Plates, two of the chief of them were taken, that the Admiral might learn ſomething of them by the Aſſiſtance of two Interpreters. The Gold Plate one of them wore weighed fourteen Ducats, and the other's Eagle, twenty-two. Theſe ſaid, that a Day or two's Journey up the Country there was abundance of Gold in ſome Places, which they named. In the Bay vaſt Quantities of Fiſh were taken, and aſhore abundance of freſh Proviſions, alſo great Plenty of Roots, Grains, and Fruit. The Men, who were painted all over, of ſeveral Colours, as red, black, and white, went naked, only covered their Privities with a narrow Cotton Cloth.

From this Bay of *Caravaro* they went to another cloſe by it, called *Aburena*, which in ſome Meaſure is like the other. On the 17th they put out to Sea to continue their Voyage: And being come to *Guaiga*, a River twelve Leagues from *Aburena*, the Admiral commanded the Boats to go aſhore; which when they were doing, they ſaw above one hundred *Indians* on the Strand, who aſſaulted them very furiouſly, running up to the Middle in Water, brandiſhing their Spears, blowing Horns, and beating a Drum in a warlike manner to defend their Country, throwing the Salt Water towards the Chriſtians, chewing Herbs, and ſpurting the Juice towards them. The *Spaniards* without ſtirring, endeavoured to appeaſe them, as they did, for at laſt they drew near to exchange the Gold Plates they had about their Necks, ſome for two, and ſome for three Hawks-Bells, by which Means they got ſixteen Gold Plates, worth one hundred and fifty Ducats, for a few Baubles.

On the 19th of *October* the Boats went to Land again; yet before any Chriſtians went aſhore, they called to ſome *Indians* who were under Huts they had built that Night to defend their Country; but none of them would come, nor would the Chriſtians land without knowing firſt what Mind they were in; for, as afterwards appeared, they waited in order to fall on them as ſoon as they had landed. But perceiving they came not out of the Boats, they blew their Horns, beat their Drums, and, making a great Noiſe, ran into the Water as they had done the Day before, till they came almoſt to the Boats, making Signs as if they would caſt their Javelins if they did not return to the Ships. The Chriſtians, offended at this Proceeding, that they might not be ſo bold and deſpiſe them, wounded one with an Arrow in the Arm, and fired a Cannon; at which they were ſo frighted, that all ran away. Then four Chriſtians landed, and calling them back, they came very peaceably, leaving their Arms, and exchanged three Gold Plates, declaring they had no more, becauſe they came not to trade, but to fight. All the Admiral looked for in this Voyage, was to obtain Specimens of what thoſe Parts afforded; and therefore, without further Delay, he proceeded to *Calibay* and caſt anchor in the Mouth of a great River.

The People of the Country were ſeen to aſſemble, and afterwards ſent a Canoe, with two Men in it, to the Ships, who having talked with the *Indians* that were taken at *Cariari*, preſently came aboard the Admiral without any Apprehenſions; and, by the Advice of thoſe *Indians*, gave him freely two Plates of Gold they had about their Necks; and he in return gave them ſome Baubles. When theſe were gone, there came another Canoe with three Men, who did as the firſt had done. The Men, going aſhore, found abundance of People with their King; and, to give his Subjects an Example, exchanged a Plate, and bid them barter for theirs; which in all were nineteen of pure Gold.

He then ſteered Eaſtwards, and came to *Cabravo*; the People of which Place lye near the Rivers of that Coaſt; and becauſe none came down, and the Winds blew freſh, he held on his Courſe, and went on to five Towns of great Trade; among which was *Veragua*, where the *Indians* ſaid the Gold was gathered, and the Plates made that they wore about their Necks. The next Day he came to a Town called *Cubija*; for here the *Indians* of *Cariari* ſaid the Trading Country ended, which began at *Caravaro*, and ran as far as *Cubija*, for fifty Leagues along the Coaſt. The Admiral proceeded till he put into *Porto Bello*, giving it that Name becauſe it was large, beautiful, well peopled, and encompaſſed by a well-cultivated Country: He entred this Place on the 2d of *November*, paſſing between two ſmall Iſlands, within which the Ships may lie cloſe to the Shore, and turn out if they have Occaſion.

6. The Admiral the 9th of *November* ſailed out of *Porto Bello* eight Leagues to the Eaſtward, but the next Day was forced back four Leagues by Streſs of Weather, and put in among the Iſlands, where afterwards ſtood the Town of *Nombre de Dios*; and becauſe all theſe ſmall Iſlands were full of Grain, he called it *Puerto de Baſtimentos*, or the *Port of Proviſions*. There a Boat well-manned purſuing a Canoe, the *Indians* imagining the Men would do them Harm, and perceiving the Boat was within leſs than a Stone's-throw of them, they all threw themſelves into the Water to ſwim away, as they did; for though the Boat rowed hard, it could not in half a League overtake any of them. Here they continued till the 23d of *November* refitting the Ships, and that Day ſailed Eaſtward to the Place called *Guaiga*. The Boats going aſhore here found above three hundred Perſons ready to trade for ſuch Proviſions as they had, and ſome ſmall Ornaments of Gold they wore at their Ears and in their Noſes.

But, without making any Stay here, on the 24th they put into a ſmall Port, which was called *Retrete*, or the *Retired Place*, becauſe it could not contain above five or ſix Ships together, and the Mouth of it was not above fifteen or twenty Paces over, and on both Sides of it Rocks appearing above Water, and the Channel between them was ſo deep that they found no Bottom, though if the Ships inclined to either Side the Men might leap aſhore, which hazarded the Ships in that narrow Place, through the Fault of thoſe who went in the Boats to view it, being covetous to deal with the *Indians*, and perceiving the Ships would lie there conveniently for it, run cloſe to the Shore. At firſt the *Indians* came very familiarly to trade for ſuch Things as they had; but when they ſaw the Chriſtians ſteal privately out of their Ships, they retired to their Houſes; becauſe the Seamen, like covetous, diſſolute Men, committed a thouſand Inſolencies, inſomuch that they provoked the *Indians* to break the Peace, and ſome Skirmiſhes happened between them.

The *Indians*, encreaſing daily, took Courage to come up to the Ships, which lay with their Sides cloſe to the Shore, thinking to do ſome Miſchief, which had turned to their own Detriment; had not the Admiral always endeavoured to gain them by Patience and Civilities: But at laſt, perceiving their Inſolence, to ſtrike a Terror into them, he cauſed ſome Pieces of Cannon to be fired; which they anſwered with Shouts, thraſhing the Trees with Staves, and by threatening Signs ſhewed they did not fear the Noiſe; for they thought it had been only a Thundering made to terrify them: Therefore to abate their Pride, and make them fear the Chriſtians, the Admiral cauſed a Shot to be made at a Company of them upon a Hillock, and the Ball falling in the midſt of them, made them ſenſible there was a Thunderbolt as well as Thunder; ſo that for the future they durſt not appear, even on the Mountains. The People of this Country were the moſt likely they had yet ſeen among the *Indians*, for they were tall and ſpare, without great Bellies, and well-countenanced.

The Country was all plain, bearing little Graſs, and few Trees; and in the Harbour there were vaſt Alligators, which went out to ſleep aſhore, and diffuſed as ſtrong a Scent as if all the Muſk in the World were togther, but they are ſo ravenous and cruel, that if they find a Man ſleeping, they drag him to the Water to devour him, though they are fearful and cowardly when attacked. Theſe Alligators are found in many other Parts of the Continent, and ſome affirm that they are the very ſame as the Crocodiles of the *Nile*.

7. The Admiral, perceiving the violent Eaſt and North-eaſt Winds did not ceaſe, and that there was no trading with theſe People, reſolved to go back, to be ſatisfied in what the *Indians* ſaid of the Mines of *Veragua*;

and therefore that Day he returned to *Porto Bello*, ten Leagues Weſtward, and, continuing his Courſe the next Day, was retarded by a Weſt Wind, which was oppoſite to his new Deſign, but favourable to that he had for three Months paſt: But he believing this Wind would not laſt long did not alter his Courſe, but bore up againſt the Wind for ſome Days, becauſe the Weather was unſettled; and when the Weather ſeemed a little favourable to go to *Veragua*, another Wind ſtarted up and drove him towards *Porto Bello*; and when they were in hopes to get into Port, they were quite beat off again. This perplexed them, and made them almoſt deſpair, ſeeing they could not get half an Hour's Reſt, being continually wet, turning ſometimes one Way and ſometimes another, ſtruggling againſt all the Elements. Now it appeared that the Currents on that Coaſt followed the Wind, running Weſtward with a Weſt, and with the Eaſt Wind the contrary, the Water ſtill coming with the prevailing Wind.

The Ships being now almoſt broke to Pieces with the Tempeſt, and the Men quite ſpent with Labour, a Day or two's Calm gave them ſome Reſpite, and brought ſuch Multitudes of Sharks about the Ships, that they were dreadful to behold; eſpecially for ſuch as were ſuperſtitious; becauſe it is reported, that as Ravens at a great Diſtance ſmell out dead Bodies, ſo ſome think theſe Sharks likewiſe do; which, if they lay hold of a Man's Arm, or Leg, cut it off like a Razor. Such a Multitude of thoſe were killed with the Hook and Chain, that, being able to deſtroy no more, they lay ſmimming upon the Water; and ſo greedy they are, that they do not only bite at Carrion, but may be taken with a red Rag upon the Hook.

Upon the 17th the Admiral put into Port, three Leagues Eaſt of *Pennon*, which the *Indians* call *Huiva*: It was like a great Bay; where going aſhore they ſaw the Inhabitants, whoſe Cots were upon the Tops of Trees like Birds, they laying Sticks acroſs from Bough to Bough, and building Huts upon them. In the Beginning of *January* they caſt anchor near a River which the *Indians* call *Yebra*, and the Admiral *Belem* or *Bethlem*, becauſe they came to this Place upon the Feaſt of the Three Kings. He cauſed the Mouth of that River, and another Weſtward, to be ſounded; the latter the *Indians* called *Veragua*, where he found but ſhole Water, and in that of *Belem* four Fathom at high Water. The Boats went up this River to the Town where they were informed the Gold Mines of *Veragua* were. At firſt the *Indians* were ſo far from converſing, that they endeavoured with their Weapons to hinder the Chriſtians from landing.

The next Day their Boats going to the River of *Veragua*, the *Indians* there did as the others had done, and not only aſhore but on their Canoes in the Water. But an *Indian* of that Coaſt who underſtood them a little, going aſhore with the Chriſtians, and telling them they were good People, and deſired nothing but what they paid for, they were ſomewhat pacified, and trucked twenty Gold Plates, ſome hollow Pieces like Joints of Reeds, and ſome Grains which were never melted, which, to make their Value the more, they ſaid were gathered a great Way off upon certain Mountains, and when they gathered it they did not eat, nor carry Women along with them; which the People of *Hiſpaniola* ſaid they alſo practiſed, when it was firſt diſcovered.

On the 9th the Admiral and the *Biſcaina* went up the River, and the *Indians* came preſently to truck for ſuch Things as they had, particularly Fiſh, which at certain Times of the Year come out of the Sea up thoſe Rivers, in ſuch Quantities as ſeem incredible to thoſe who do not ſee it; and they exchanged ſome little Things for Pins, and Things they moſt valued they gave for Beads or Hawks-Bells. Next Day the other two Ships came in, which they had not done at firſt, becauſe there being but little Water at the Mouth of the River, they were forced to ſtay for the Flood, though there the Sea never riſes or falls above half a Fathom. *Veragua* being celebrated for Mines, the third Day after their Arrival the Admiral's Brother went up the River with the Boats to the Town of *Quibio*, the *Indian* King, who, hearing of the Lieutenant, came in his Canoe to meet him; they met in a very friendly Manner, giving one another ſuch Things as they valued moſt; and having diſcourſed a long Time together, went away peaceably: Next Day *Quibio* came aboard to viſit the Admiral, and, having diſcourſed together about an Hour, the Admiral gave him ſome Things, and his Men trucked Bells for ſome Gold; and ſo he returned without any Ceremony. Being thus very eaſy and ſecure, on the 24th the River of *Belem* ſuddenly ſwelled ſo high, that before they could provide againſt it, or carry a Cable aſhore, the Fury of the Waves came ſo impetuouſly againſt the Admiral's Ship, that it broke one of her Anchors, and drove her with ſuch Force againſt the Ship *Gallega*, which lay aſtern of it, that it brought the Foremaſt by the Board, and both were carried away foul of one another, in the utmoſt Danger of periſhing. Some judged the mighty Rains to have been the Cauſe of this Flood, they having never ceaſed during the Winter in that Country; but had that been it, the River would have ſwelled by Degrees, and not all of a ſudden; which made it probable ſome great Snows had fallen on the Mountains of *Veragua*, which the Admiral called *St. Chriſtophers*, becauſe the higheſt of them was above the Region of the Air where Meteors are bred; for no Cloud was ever ſeen above, but all below it.

This Tempeſt laſted ſo long, that they had Time enough to refit and caulk the Ships. The Waves broke ſo furiouſly upon the Mouth of the River, that the Boats could not go out to diſcover along the Coaſt, to learn where the Mines lay, and chuſe a Place where to build a Town, the Admiral being reſolved to leave his Brother there with moſt of the Men, that they might ſettle, and ſubdue the Country, while he went into *Spain* for Supplies of Men and Proviſions. Upon this Proſpect, the Weather growing calmer, on the 6th of *February* he ſent his Brother with ſixty-eight Men by Sea to the Mouth of *Veragua*, a League diſtant from *Belem* Weſtward; and he went a League and a half up the River to the Cazique's Town, where he ſtaid a Day enquiring the Way to the Mines. They travelled four Leagues and a half, and came near a River, which they paſſed forty-four Times, and the next Day advanced a League and a half towards the Mines ſhewed them by the *Indians* ſent by *Quibio* to guide them. In two Hour's Time after they came thither every Man gathered ſome Gold about the Roots of Trees, which were there very thick, and of a prodigious Heighth. This Sample was much valued, becauſe none of thoſe who went had any Tools to dig, or had before ever gathered any. Therefore the Deſign of their Journey being only to get Information of the Mines, they returned very well pleaſed that ſame Day to *Veragua*, and the next to the Ships. True it is, that as was afterwards known, theſe Mines were not thoſe of *Veragua*, which lay much nearer, but of *Urira*, a Town whoſe People were Enemies to thoſe of *Veragua*; to do whom a Diſpleaſure, *Quibio* ordered the Chriſtians to be conducted thither, that they might go away to thoſe, and leave his.

8. On the 14th of *February*, 1503, the Admiral's Brother went into the Country with forty Men, a Boat following with fourteen. The next Day they came to the River of *Urira*, ſeven Leagues from *Belem* Weſtward; the Cazique came out a League from his Town to meet him with twenty Men, and preſented him with ſuch Things as they fed on, and ſome Gold Plates. Whilſt they were here the Cazique and chief Men never ceaſed putting a dry Leaf into their Mouths and chewing it; and ſometimes they took a ſort of Powder they carried with that Herb, which looked very odd. Having reſted here a while, the Chriſtians and *Indians* went to the Town, where abundance of People came out to them, and provided them a Houſe to lye in, giving them much to eat. Soon after came the Cazique of *Dururi*, which is a neighbouring Town, and with him a great many *Indians* who brought ſome Gold Plates to barter. All theſe *Indians* ſaid there were Caziques up the Country who had plenty of Gold, and abundance of Men armed like the *Spaniards*.

Next Day the Lieutenant ordered the reſt of his Men to return by Land to the Ships, and he, with thirty, held on his Journey towards *Zobraba*, where the Fields, for above ſix Leagues, were all full of Maize, like Corn Fields. Thence he went to *Cateba* another Town. At both Places he was well entertained, abundance of Proviſions given him, and ſome Gold Plates exchanged, which, as has been ſaid, are like the Paten of a Chalice, ſome bigger, and ſome leſs, weighing about twelve Ducats. They wear them about their Necks, hanging by a String, as in *Popiſh* Countries they do Relics. The Lieutenant, being now very far from the Ships, without finding any Port on that Coaſt, or any River bigger than that of *Belere*, to ſettle his Colony, came back the ſame Way on the 24th of *February*. As ſoon as he returned, order was taken for his Stay, eighty Men being appointed to remain with him. They began to build Houſes on the Bank of the River of *Belemal*, about a Cannon Shot from the Mouth of it, within a Trench that lies on the Right-hand coming up the River; at the Mouth of which there is a little Hill. Beſides theſe Houſes which are all of Timber, and covered with Palm-tree Leaves which grew along the Shore, another large Houſe was built to ſerve as a Store-houſe and Magazine; into which ſeveral Pieces of Cannon, Powder, and Proviſions were put, and other Neceſſaries for the Support of the Planters. But for Wine, Biſket, Oil, Vinegar, Cheeſe, and much Grain, which was all they had to eat, theſe Things were left in the ſafeſt Place aboard the Ship called *Gallega*, that was to be left with the Lieutenant, that he might make Uſe of it either at Sea or aſhore, having all its Cordage, Nets, and other Fiſhing Tackle; for, as we have ſaid, there is vaſt Plenty of Fiſh in that Country in every River, ſeveral Sorts at certain Times running along the Coaſt in Shoals; on which the People of the Country feed more than on Fleſh: For tho' there be ſome Sorts of Beaſts, they are not enough to maintain them.

The *Indians*, perceiving the *Spaniards* built Houſes, as if they deſigned to ſtay among them, began to be alarmed; and the Adelantado, ſuſpecting they deſigned to ſet fire to the Houſes, marched out with ſeventy-four Men on the thirtieth of *March*, and, ordering them to advance two by two as privately as they could, came to the Cazique *Quibio*'s Houſe, where he ſecured him, ſome of his Wives and Children, and about fifty Perſons in all, who offered a great Treaſure, which, as they ſaid, was on the Mountain, for their Ranſom. The Adelantado, fearing the Country would riſe upon him, and reſcue the Priſoners, ſent them all away to the Ships, and followed the next Day himſelf with the Plunder of *Quibio*'s Houſe, which might amount to the Value of three hundred Ducats in Gold Plates, Eagles, Beads, and the like. But the Cazique made his Eſcape from thoſe that had him in Charge, and returned to his People. Soon after the Rains fell, and the Flood coming down, opened the Mouth of the River, when the Admiral ſailed out with three Ships, leaving one for the Service of his Brother. However, he came to an Anchor a League from thence to wait for fair Weather, and in the mean time ſent back the Boat for Water.

The Cazique *Quibio*, who, as has been ſaid before, had made his Eſcape, being much concerned for the Loſs of his Wives and Children, and ſeeing the three Ships were gone, fell upon the *Spaniſh* Colony ſo unexpectedly, that he was within a few Paces of it before the *Spaniards* perceived it. He began the Attack with loud Shouts, caſting abundance of Darts, armed at the Ends with Bones of Fiſh, ſo that ſome were immediately wounded. The Adelantado being very brave, with ſeven or eight Men that ſtood by him, repulſed the *Indians*, driving them into the Wood, tho' they ſeveral times rallied: But the *Spaniſh* Swords making great Havock, and a Dog tearing many of them, they at length abſolutely betook themſelves to Flight, leaving one *Spaniard* dead, and eight wounded, of which Number the Adelantado was one. The Men in the Boat, tho' near Shore, did not land to aſſiſt their Friends, but after the Engagement went up the River to take in their Water.

The *Indians*, ſeeing the Boat a full League above the Colony, came out in their Canoes, and beſetting it on all Sides, ſhouting and ſounding their Horns, ſo plyed about ten Men that were in it, with their Darts, that they all periſhed but one, who, falling into the Water, ſwam away to the Shore, without being diſcerned by the *Indians*, and carried the News of the Diſaſter; which ſo much diſmayed them, being but few in Number, and moſt of them wounded; the Admiral out at Sea without a Long-boat, and in Danger of not being able to return to any Place, whence he might ſend them Relief; that, being deſtitute of all Hopes, they reſolved not to ſtay aſhore, and went aboard the Ship without aſking the Adelantado Leave, to ſail out; but they could not, becauſe the Mouth of the River was again choaked up, nor could they find any body to acquaint the Admiral therewith, by reaſon of the violent working of the Sea upon the Bar. The Admiral was, at the ſame Time, in great Danger, where his Ship lay at anchor; that Coaſt being all open, and having only a ſmall Boat, and weakened, beſides, by the Loſs of the Men that had periſhed in his Long-boat. Thus thoſe in the River, as well as thoſe at Sea, were in the greateſt Diſtreſs.

To add to all theſe Vexations, one Night the *Indian* Priſoners that were on board the Admiral opening one of the Hatches, ſeveral of them leaped out, and threw themſelves into the Sea to ſwim aſhore; and the reſt that were prevented from following their Example all hanged themſelves in the Hold. The Admiral being in this Affliction, ſome *Spaniards* offered to ſwim aſhore to enquire after the Boat, and the Men that had been left behind, provided the little Boat might carry them beyond the Place where the Waves broke: The Admiral accepted their Offer, ordering the Boat to carry them beyond the Place where the Waves broke, and as near the Land as might be; and there *Peter de Ledeſma*, a Pilot, born at *Seville*, had the Courage to leap into the Water, and, making his Way through the rolling Waves, got to Shore, where he was informed of the Condition the Men were in; and that they all affirmed that they would not ſtay in that Place of Danger; for which Reaſon they entreated the Admiral not to depart without them, becauſe it would be ſacrificing them; and they were reſolved, as ſoon as the Weather grew ſomewhat calmer, to go away in *Indian* Canoes, aboard the Ships; the Boat they had, not being able to contain them. With this Advice *Peter de Ledeſma* ſwam back to the Boat that waited for him.

In ſhort, thoſe that were aſhore, as ſoon as the Weather grew calm, went all away in two large Canoes they had made faſt together, that they might not over-ſet, and their own Boat, leaving nothing behind them but the Hulk of the Ship, which was all worm-eaten. Being all aboard, they ſailed in three Ships as far as *Porto Bello*, where they were obliged to leave one of the Ships, which was ſo leaky that they could not keep it above Water. They proceeded thence to a Province near which there were many ſmall Iſlands, which the Admiral called *Las Barbas*, or the *Beard*, but which is now known by the Name of the *Bay of St. Blaſe*. Ten Leagues from thence they turned from the Continent, and ſtood to the Northward, to recover *Hiſpaniala*. At the End of ten Days they arrived at two ſmall Iſlands, which were all covered with Tortoiſes as well as the Sea, which looked like Ridges of Rocks, and therefore the Admiral called them *las Tortugas*, or the *Tortoiſes*, and they are now called *Caymanes*, being about twenty-five Leagues Weſt of *Jamaica*, and forty-five to the Southward of *Cuba*, there being no other all the Way the Admiral paſſed. There they came to anchor at *Jardin de la Reyna*, the *Queen's Garden*, being a great Number of ſmall Iſlands to the South of *Cuba*, before ſpoken of; they were ten Leagues from this Iſland in much Want, their Biſket ſpoiled, and little Oil left, and labouring Day and Night at three Pumps, becauſe the Ships were ready to ſink, when there aroſe ſuch a Storm that one of them run foul of the Admiral, tore off Part off his Poop, the Cables gave Way, and all had like to have periſhed. Thence they ſailed to a Port in the Iſland of *Cuba*, called *Macaca*, where they refreſhed themſelves, being ſupplied by the *Indians*.

Thence they ſtood for *Jamaica*, where they arrived at *Puerto Bueno*, or *Good Port*, on Midſummer Eve, but it was a bad one for them, there being neither Water nor any *Indian* Town; ſo that the Day after Midſummer they proceeded to another called *Santa Gloria*, and, being no longer able to keep the Ships above Water, they ſet them faſt a-ground, as near the Shore as they poſſibly could, being about a Croſs-bow ſhot from it, and the two Ships cloſe together, Board and Board, ſhoring them on both Sides, ſo that they could not part, but were filled with Water almoſt up to the Deck, and Cabins were made on the Heads and Sterns to ſhelter the Men. When the Ships were thus ſecured, the *Indians* came in their Canoes, being covetous of *Spaniſh* Toys; and, to prevent Controverſy, the Admiral appointed two Perſons to deal with them; and every Afternoon to divide what they had purchaſed amongſt the Men, to maintain them, for the Proviſions were all either ſpent or ſpoiled.

The Admiral looked upon it as a great Mercy that God had brought him to *Jamaica*, becauſe that Iſland was very populous, abounded in Eatables, and the Natives were deſirous to trade; therefore to keep them in that good Humour, he would not go up the Country for fear the *Spaniards* ſhould diſoblige the People, which would prove of ill Conſequence; and this Conduct was ſo pleaſing to the *Indians*, that they gave two *Utias* or ſmall Rabbits for a Bit of Tin, and two of their Cakes of Bread for two little green or yellow Beads, and for Things of more Value they took a Hawks-Bell. They gave the Caziques little Looking-glaſſes, red Caps, and Sciſſars, to pleaſe them. The Admiral having purchaſed ten Canoes for the Service of his ſtranded Ships, by this Method, the Men were plentifully ſupplied with Neceſſaries, and the *Indians* no Way diſturbed at their Stay.

9. *Columbus* having conſulted the Officers about the Means of getting away from thence, it was concluded to ſend Advice to *Nicholas de Obando*, Governor of *Hiſpaniola*, and to *Alonſo Sanchez de Carvajal*, the Admiral's Factor there, of the Condition they were in, that a Ship might be there freighted at the Admiral's Expence, to fetch them all away. This being an Affair of much Difficulty, two Perſons of Fidelity and Diſcretion were appointed for it, becauſe they were to undertake ſo great a Paſſage in Canoes made of a ſmall Piece of Timber. The Diſtance between the two neareſt Points of *Jamaica* and *Hiſpaniola* being twenty-five Leagues, beſides thirty more to the Points where they were to croſs over, it required very great Courage to go upon ſuch an Enterprize. In the Paſſage there is only one little Iſland or Rock, called *Navaſa*, which is eight Leagues from *Hiſpaniola*. The Perſons the Admiral pitched upon to perform this were, *James Mendez de Sagura*, chief Notary of the Fleet, a very honeſt and diſcreet Man, and *Bartholomew Fieſco*, a *Genoeſe*, a Perſon worthy of ſuch a Truſt. Each of theſe went in a Canoe with ſix *Spaniards*, and ten *Indians* to row.

The Admiral ordered *James Mendez*, as ſoon as he came to *Santo Domingo*, to go away to *Spain* with his Diſpatches for their Majeſties; containing a full Relation of his Voyage, the Dangers and Troubles he had met with, the Lands he had diſcovered, and the rich Mines he had actually viſited at *Veragua*; and at the ſame Time complained of the unworthy Uſage he had before met with, his Impriſonment, and the ſeizing of all he had, praying Redreſs, and lamenting, that, after having ſpent twenty Years in the Service of the Crown, he had not a Houſe to put his Head in; but muſt be obliged, when he came to *Spain*, to take up his Lodgings at an Inn, *&c.* *Bartholomew Fieſco* was to treat with the Governor of *Hiſpaniola* about ſending a Ship to bring the Men off, and to return with it himſelf. The two Canoes ſet out on the 7th of *July*; the *Spaniards* carrying their Proviſions, Swords, and Targets, and the *Indians* their Gourds full of Water, Axis and Cazabi. When they came to the Point of the Iſland of *Jamaica*, they were obliged to ſtay till the Sea was very calm, to venture to ſtrike over, the Danger being very great, eſpecially for the *Spaniards*; for the *Indians* being very expert and naked, if the Canoes happened to over-ſet, ſoon turned them again, and with their Gourds threw out the Water. As ſoon as the Weather grew calm, they put themſelves into the Hands of God, and launched out one Night, the *Indians* rowing, who, to cool themſelves, ſometimes leaped into the Water, and afterwards returned to the Oar. When they had loſt Sight of *Jamaica*, the *Spaniards* relieved the *Indians*, that they might hold out, and always watched for fear thoſe People ſhould do any thing amiſs.

The ſecond Day after their Departure, they began to be all very much tired, but the two Chiefs encouraged the Men, adviſing them to eat and recover their Strength. The *Indians*, being heated with the Sun, and the Labour of the Oars, were more buſy with their Gourds than they ſhould have been, ſo that they were ſoon empty; and, the Heat encreaſing, and their Thirſt with it, by Noon they had not Strength to work. The Commanders then relieved them, giving them now and then to drink out of their Rundlets, and ſo ſupported them till cool of the Evening. That which moſt perplexed them, after having rowed a Night and two Days, was, the Fear that they had miſtaken the Way, in which they were to find the Iſland *Navaſa*, eight Leagues from *Hiſpaniola*, as was ſaid before, where they expected to refreſh themſelves. That Afternoon they had thrown an *Indian* overboard, who died by Thirſt; others lay along ſtretched out, quite diſabled, and the reſt were totally dejected, expecting Death, holding Salt-water in their Mouths to cool them, and finding no Comfort in it. They proceeded the ſecond Night as far as they were able again, without ſeeing the Iſland till the Moon-riſing; *James Mendez* perceived that it appeared like a half Moon, the other half being, at firſt, covered by the Iſland; for otherwiſe they could not have ſeen it, by reaſon of its Smallneſs and the Night. Then they all encouraged the *Indians*, ſhewing them the Land, and giving them ſome Sips of Water, wherewith they were ſo much encouraged, that they rowed on, and by Break of Day arrived at the Iſland where they landed.

They found this Iſland was all a ſolid Rock, about half a League in Compaſs, but there was no Tree nor Spring of Water on it; however, going about from one Cleft to another, they collected ſo much in the Hollows, as ſerved to quench their Thirſt, which did them Harm; becauſe, being ſcorched with Drought, they drank ſo much of it, that ſome of the poor *Indians* died upon the Spot, and others fell ſick. They ſtayed there till the Afternoon, providing themſelves with the beſt the Place would afford; gathering ſmall Shell-fiſh on the Shore, and making a Fire to broil it, *James Mendez* having carried Neceſſaries for that Purpoſe. Being then in the Sight of the Point of *Hiſpaniola*, which the Admiral had named *St. Michael's*, and was ſince called *del Tiburon*, and deſigning to conclude their Paſſage before the Weather grew foul, as ſoon as the Sun was low they went into their Canoes again, and rowed, and by Break of Day arrived at the Cape, the fourth Day after their ſetting out. They refreſhed themſelves there two Days, and neither *Spaniards* nor *Indians* would run the Hazard of returning to *Jamaica* the ſame Way they came.

James Mendez, being in haſte, went on as far as he could in the Canoe, and, at length, arrived in the Province of *Xaragua*, where he found the Governor of *Hiſpaniola*, who ſeemed well pleaſed with the Letter he brought him, though he proved very tedious in diſpatching the Buſineſs he came about; for he ſuſpecting the Admiral, was afraid leſt ſome Diſturbance ſhould happen in the Iſland. After much importuning he gave *James Mendez* Leave to proceed with his Company to *Santo Domingo*, to perform what the Admiral had ordered him. He there bought a Ship, and ſent it well provided, though it were a conſiderable Time before he could accompliſh his Deſign, as will be ſhewn.

10. After this Step had been taken, not only with the Conſent, but by the Advice, and at the Requeſt of the Principal Perſons on board, it was very natural to ſuppoſe they would have been eaſy; but the *Spaniards* that remained with the Admiral in *Jamaica*, having ſuffered very much in that Voyage, began to ſicken, and, deſpairing of Relief, all their Diſcourſe was how they ſhould eſcape over to *Hiſpaniola*; railing at the Admiral as if he had been the Cauſe of all their Miſfortunes. The chief Promoters of theſe Diſcontents were two Brothers,

Natives of *Seville*, whoſe Names were *Porras*, one of whom went over Captain of a Ship, and the other Purſer of the Fleet; theſe Men, having endeavoured to bring all the reſt to their Deſign, thought it ſufficient that they had gained forty of the moſt mutinous, and reſolved to declare their Intentions: Accordingly, on the 2d of *January*, 1504, being all armed, Captain *Francis de Porras* went upon the Poop where the Admiral was, and, without any Reſpect, ſaid, *We are of Opinion that your Lordſhip will not go into* Spain, *but intend to keep us here to periſh.* The Admiral, hearing theſe inſolent Words, and gueſſing at the Meaning, very mildly anſwered, He could not but be ſenſible how impracticable it was for them to paſs over to *Hiſpaniola*, ; that it was well known, he had already, by the unanimous Advice of all, ſent for Ships, and if they had any better Method to offer, they might propoſe it. *Francis de Porras* replied, there was no need of much adviſing, that he might embark immediately, or ſtay behind; and, turning his Back, added, for I will go away into *Spain*, with all thoſe that will follow me: Then the Conſpirators cryed out, *One and all, One and all*; and, after having cauſed much Confuſion aboard the Ship, they ſeized ten of the Canoes the Admiral had bought, and, many of thoſe who were ſick joining them, went away to the Eaſtern Point of *Jamaica*, whence *James Mendez* and *Bartholomew Fieſco* had taken Boat to *Hiſpaniola*.

Being come to the Point of the Iſland, they attempted to paſs over it to *Hiſpaniola*, forcing ſome Natives with them, to row: But the Sea growing rough, and wetting them, they thought fit to lighten the Canoes, which were heavy loaded, throwing over-board all they had, except ſome Proviſions, Water, and their Arms; and, at laſt, the poor *Indians* that rowed; cutting their Hands if they offered to eaſe themſelves by holding the Sides of the Canoes when tired with Swimming. Returning aſhore, ſome were for paſſing over to *Cuba*, ſome for returning and making their Peace with the Admiral, or taking all he had by Force from him; others, for attempting, again, to paſs over into *Hiſpaniola*, which laſt prevailing, they ſtayed ſix Weeks in the *Indian* Town, at the Point of Land, for calm Weather, ruining the poor Natives, and then twice ventured out to Sea, but were forced back. Then quitting the Canoes, they went from Town to Town, ſometimes bartering with the People for Proviſions, and ſometimes taking them by Force; whilſt they were thus ranging, the Admiral took particular Care of the Sick, to ſecure them to him, and laboured to gain the Friendſhip of the *Indians*, to make ſure of Proviſions, and by ſuch Methods, all that had been diſtempered recovered; however, the *Spaniards* eating much more than the Natives, it was a difficult Matter to ſupply them plentifully, and ſo a great Part of his Men being revolted from the Admiral, thoſe People began to make the leſs account of him, inſomuch, that he was reduced to great Streights; but it pleaſed God to relieve him in that Diſtreſs, after the following Manner:

The Admiral knowing there would be an Eclipſe of the Moon within three Days, took therefore this Opportunity to ſend an *Indian*, that ſpoke *Spaniſh*, to call the Cazique and principal Men of thoſe Parts to him. They being come a Day before the Eclipſe, he told them that the *Spaniards* were Chriſtians, Servants of God, who dwells in Heaven, and is Lord and Maker of all Things; who rewards the Good, and puniſhes the Wicked; and, being angry with thoſe that had mutinied, would not permit them to paſs over to *Hiſpaniola*, as the others, ſent by him, had done; that he was alſo diſpleaſed with them, becauſe they did not ſupply his diſtreſſed Servants with Proviſions, in exchange for Commodities, and therefore was reſolved to chaſtiſe them with Famine and other Calamities; and, that they might be convinced of the Truth of what he ſaid, God was pleaſed they ſhould ſee a Token of his Anger in the Sky: So that they might, that Night, obſerve the Riſing of the Moon, that ſhe would appear of a bloody Hue, to point out the Puniſhment God would inflict upon them. When he had made his Speech, ſome of them went away in a Fright, and others ſcoffed at his Prediction. But, the Eclipſe beginning as ſoon as the Moon was up, and encreaſing the higher ſhe roſe, it put them into ſuch a Conſternation; that they haſtened to the Ships, loaded with Proviſions; entreating the Admiral that he would pray to God that he would not be longer angry with them; and they would, for the future, bring him all the Proviſions he ſhould have Occaſion for.

The Admiral anſwered, he would offer up his Prayers to God; and then ſhutting himſelf up till the Eclipſe was at the Height, and ready to decreaſe, he came out again, telling them he had prayed for them, promiſing they would be good, and ſupply the Chriſtians, whereupon God had forgiven them; and they would ſee the Moon, by Degrees, turn to her uſual Complexion. The *Indians*, perceiving the Eclipſe to go off entirely, returned the Admiral many Thanks, admiring the God of the Chriſtians; went away very well pleaſed, religiouſly remembring to be grateful for the Benefit they thought they had received of the Admiral; for they ſupplied him plentifully with Proviſions, always bleſſing God, believing he would puniſh them for their Sins; and that the Eclipſes they had formerly ſeen had been Tokens of his Anger.

There were eight Months paſſed ſince the Departure of their Agents without any Advice of their Arrival, or what had befallen them; which made thoſe that were with the Admiral deſpair, ſuppoſing thoſe Meſſengers had been caſt away in their Paſſage, or murdered by the *Indians*. On this, one *Barnard* of *Valencia*, and the reſt that had remained ſick, conſpired together to do as the *Porras*'s had done before: But God prevented this Miſchief by the Arrival of a ſmall Caravel, ſent by the Governor of *Hiſpaniola*, under the Command of *James de Eſcobar*, one of thoſe that had been in the Rebellion with *Roldan*. He had Orders not to go aboard the Ships, or aſhore, or permit any to talk with thoſe that were with the Admiral; or to receive, or deliver, any Letter; being only ſent to ſee the Condition the Admiral and his Men were in. The Governor had pitched upon *Eſcobar* to execute this Commiſſion, becauſe he knew he had been in Rebellion, and therefore would not ſide with thoſe in Diſtreſs. *Eſcobar*, leaving his Caravel at ſome Diſtance, went in his Boat to deliver a Letter from the Governor; and then ſtanding off, made an empty Compliment from him; after which he preſented the Admiral with a Caſk of Wine and two Flitches of Bacon. The Admiral anſwered the Governor's Letter, giving him an Account of what he had diſcovered, and what had happened ſince, and praying him to ſend ſpeedy Relief. Whereupon *Eſcobar* ſailed away, which made the Men ſuſpect that the Governor *Obando* deſigned to let them all periſh in that Iſland.

However, this diſappointed the ſecond Conſpiracy, and the Admiral told them, that *Eſcobar* went away ſo ſuddenly that they might be the ſooner relieved, for he was reſolved not to go away without them, and that little Caravel would not carry them all. Theſe Words, and the Sight of the little Caravel, with the Advice that *Mendez* and *Fieſco* were ſafely arrived in *Hiſpaniola*, ſomewhat comforted the Men, and gave them Hopes of getting off in time. The Admiral, rather deſirous to reduce the Mutineers by fair Means than by Force, that they might do no Miſchief in the Iſland, ſent two of their beſt Friends to acquaint them with the Advice he had received, deſiring them to return, and no Notice ſhould be taken of what had happened. *Francis de Porras* met thoſe Meſſengers at a Diſtance, for fear they ſhould perſuade any of his Men to ſubmit themſelves, and anſwered, that they would not truſt the Admiral, but would behave themſelves peaceably in the Iſland, if he would promiſe to find a Ship to carry them off, and ſhare half of what he had with them, ſince they had loſt all their own Effects.

The Meſſengers refuſed to make any ſuch Propoſal to the Admiral, and *Porras* replied that if he would not do it by fair Means, he ſhould be compelled to it by Force. When the Meſſengers were gone, he railed at *Columbus*, charging him with Cruelty; alledging, he would not perform what he had promiſed if he had them once in his Power; ridiculouſly accuſing him of being a

Sorcerer; and affirming, that the Caravel his Men had ſeen had been only a Deluſion, formed by Magic Art, or elſe he would have gone in it himſelf, with his Son and his Brother. By ſuch Diſcourſes he confirmed them in the Rebellion, and perſuaded them to go and ſeize the Admiral, and take away what he had aboard the Ships: He accordingly marched with his Followers towards the Ships; and, being within a Quarter of a League of them, halted in an *Indian* Town called *Mayma.* The Admiral being informed of it ſent the Adelantado, his Brother, with fifty Men, to perſuade him to return to his Duty; who, coming within a Croſs-bow-ſhot of the Place, ſent the two Meſſengers the Admiral had employed before, to offer Peace; but they, deſpiſing all Accommodations, would not ſo much as hear them; and, on the contrary, advanced in fighting Order, crying, *Kill him, kill him*; ſix of them having taken an Oath to deſtroy the Adelantado, who bid his Men do as he did, and to fear nothing but the Stain of being vanquiſhed by Rebels. This ſaid, they engaged; and, at the firſt Attack, ſix Men fell, moſt of them Rebels. *Francis de Porras,* who was a bold Man, ſingled out the Adelantado, and at one Cut clove down his Target to the Hand, which he wounded, but could not recover his Sword as he would; and the Adelantado, ſeeing his Men give Way, cloſed with *Porras*; which done, others came in and ſeized him, much wounded. The Adelantado then fell in among the reſt, ſo that many were ſoon killed, and among the reſt *John Barla,* who had been the firſt that drew his Sword againſt the Admiral when they began to rebel; others being much wounded, the reſt betook themſelves to Flight.

The Adelantado would have purſued them, had not ſome of the beſt Men about him diſſuaded him from it, ſaying, That was a ſufficient Puniſhment, and that it was not proper to carry Things to Extremity; ſo he returned to the Ships, carrying *Francis de Porras,* and other Priſoners, and was joyfully received by the Admiral and thoſe about him. The Day after the Battle, being the 20th of *May,* thoſe that eſcaped ſent a Petition, ſigned, to the Admiral, confeſſing their Fault, and begging Pardon, and promiſing to ſerve him faithfully for the future; all which they took ſolemnly an Oath to perform, renouncing any Abſolution in caſe of Failure from Prieſt, Biſhop, or Pope himſelf, at the Hour of Death, and all Benefit of the Sacraments of the Church.

The Admiral, on his Part, promiſed to pardon them provided their Ringleader, *Francis de Porras,* ſhould continue a cloſe Priſoner; and, to prevent any Controverſies between the Rebels and the others, he ſent them a Commander to keep them in the Iſland till the Ship arrived; ſuch was the Poſture of Affairs in *Jamaica,* and the Admiral had been there full a Year, when a Ship arrived freighted by *James Mendez,* and with it a Caravel commanded by *James de Salcedo,* the Admiral's Servant. *Columbus,* his Followers, and the Rebels embarked, and they ſailed from thence the 28th of *June* 1504, and arrived at *Santo Domingo* on the 13th of *Auguſt.* The Governor with all the City went out to meet him, and paid him much Reſpect, lodging him in his own Houſe, and paying abundance of Compliments, but all with a falſe Heart; for he ſet at Liberty *Francis de Porras,* the Ringleader of the Rebellion at *Jamaica,* who was a Priſoner aboard the Ship; and threatened to puniſh thoſe that had honourably ſtood by the Admiral in his greateſt Danger.

11. The Admiral was a Perſon of too great Penetration not to diſcern how deceitfully he was treated, and the true Motives of the Governor's Behaviour. He knew very well that *Obando* hated him, and at the ſame Time feared his Credit and Reputation; but he diſſembled Things as well as he could, till the Ships were ready that were preparing for carrying him back to *Spain*; and as ſoon as he knew that they were fit to ſail, and the proper Seaſon was come, he diſpoſed every thing for his Departure; which was a Thing no leſs agreeable to the Governor *Obando* than convenient for his own Affairs.

Accordingly, on the 12th of *September,* 1504, he embarked on board a Ship, provided by his Agents, and took with him likewiſe the Veſſel that had brought him and his People over from *Jamaica*; but juſt as they were out of Port, the Main-maſt of the leſſer Veſſel came by the Board; upon which he ordered her back to *Santo Domingo,* and continued his Voyage in the other. He had not, however, been long at Sea before he met with a moſt violent Tempeſt, in which, not the Men only, but the Pilot, expected every Moment to be caſt away; and when the Vehemence of the Storm was over, and they began to congratulate each other on their narrow Eſcape from ſo great a Danger, they were aſtoniſhed by a very unlooked for Accident; their Main-maſt flying to pieces on a ſudden, and without any viſible Cauſe.

The Admiral was at that Time confined to his Bed by the Gout, which, however, did not hinder his giving the neceſſary Directions for making a Jury-maſt of the Yard, which was accordingly done; and in this Condition they proſecuted their Voyage. Soon after they encountered another Tempeſt, in which they loſt their Mizen-maſt; notwithſtanding which Accident they ſafely arrived at their intended Port of *St. Lucar,* having ſailed 700 Leagues after they had loſt their Main-maſt. All the Dangers and Difficulties he had ſtruggled with at Sea had not near ſo much Effect on the Admiral's Mind, as the ill News he met with on Shore; being informed, as ſoon as he landed, that his beſt Friend and only Patroneſs, the Queen, was dead, ſo that he had now none but King *Ferdinand* to apply to, who, though he always treated him reſpectfully, the Admiral well knew was far enough from having any Kindneſs for him, and even from inclining to do him Juſtice.

In this Situation of his Affairs, the Admiral reſolved with himſelf to go to *Seville,* in order to take ſome Repoſe, and the Advice of his Phyſicians for the Recovery of his Health, which he accordingly did, having his Sons with him; and employing himſelf wholly in ſetting his Family-Affairs in order. When he had reſted ſome Months at *Seville,* in *May* 1505, he proceeded to the Court, which reſided then at *Segovia.* He did not think the King received him as he deſerved, yet he preſented ſeveral Petitions ſetting forth the Services he had performed, and his great Sufferings, and deſiring the Performance of what he had promiſed him in return; for which the King gave him many fair Words without any Effect, having no Intention to fulfil his Engagements, and therefore under-hand offered him a large Eſtate in *Spain,* in exchange for what was his due in the *Indies.*

This much vexed the Admiral, who was then confined to his Bed, and he complained of it to the Archbiſhop of *Seville*; but at that Time King *Ferdinand* travelled from *Valladolid* to *Laredo,* to wait for his Son-in-law King *Philip,* and Queen *Johanna* his Daughter, who ſoon after arrived there from *Flanders.* The Admiral, not being able to go, ſent his Brother the Adelantado, to compliment their Majeſties and ſollicit his Affairs; where he was well received, and had fair Promiſes of having his Buſineſs favourably diſpatched. But notwithſtanding all this, ſuch Methods were made uſe of to poſtpone his Demand, and protract his Buſineſs in all Offices to which it was referred, that it was no difficult Matter for him to diſcern, that very little good was intended him.

13. While the Adelantado, Don *Bartholomew Columbus,* was ſolliciting, as has been ſaid, the Admiral's Diſtemper grew upon him, till, having made the neceſſary Diſpoſitions, he departed this Life, with much Piety, at *Valladolid,* on *Aſcenſion-Day,* being the 20th of *May,* 1506. His Body was conveyed to the Monaſtery of the *Carthuſians* at *Seville,* and from thence to the City of *Santo Domingo* in *Hiſpaniola,* where it lies in the Chancel of the Cathedral. He left his Son *James* his ſole Heir, and died before he knew whether *Cuba* was an Iſland. It may be expected that we ſhould add here ſome Character of this great Man, or at leaſt a Deſcription of his Perſon; but, having already ſpoken largely of his Abilities in the Beginning of our former Volume, as well as in this, we ſhall content ourſelves with barely tranſcribing what a *Spaniſh* Hiſtorian, juſtly eſteemed for his Fidelity and Knowledge, has diſcourſed upon this Subject:

His Words are theſe: " *Columbus* was tall of Stature,
" long Viſage, of a majeſtic Aſpect, his Noſe aquiline,
his

“ his Eyes grey, of a clear Complection and ruddy, his
“ Beard and Hair, when young, fair, though through
“ many Hardſhips they ſoon turned grey: He was a
“ Man of Wit, pleaſant and eloquent, moderately grave,
“ affable to Strangers, and kind to his own Family: His
“ Converſation diſcreet, which gained him the Affection
“ of thoſe he had to deal with, and his Preſence attracted
“ Reſpect, having an Air of Authority and Grandeur;
“ temperate in Eating and Drinking, and modeſt in his
“ Dreſs. He was very ſtrict in Religion according to the
“ Mode of his Country, and obliged ſuch as were under
“ his Command to obſerve the ſame with Decency. In
“ that Reſpect, he ſhewed an earneſt Concern for the Con-
“ verſion of the *Indians* to the Chriſtian Faith, and en-
“ deavoured all he could to invite them thereto, by
“ obliging the *Spaniards* to lead a Life, in ſome meaſure
“ agreeable to that Faith which they profeſſed. In other
“ Reſpects he was a Man of undaunted Courage and
“ high Thoughts, fond of great Enterprizes; patient,
“ ready to forgive Wrongs, and only deſirous that Of-
“ fenders ſhould be ſenſible of their Faults, unmoved in
“ the many Troubles and Adverſities that attended him,
“ ever relying on Divine Providence. In ſhort, had
“ he performed ſuch a wonderful Enterprize in the an-
“ tient Days, as the Diſcovery of the new World, it is
“ likely he would not only have had Statues, and even
“ Temples, erected to his Honour; but that ſome Star
“ would have been dedicated to him, as was done to
“ *Hercules* and *Bacchus*, and among us his Name will be
“ renowned whilſt the World endures.”

13. Such was the End of this great Man, to whom, in the ſtricteſt Senſe, the *Spaniards* are indebted for all that they poſſeſs in the new World, as will very clearly appear; if we conſider that he ſettled *Hiſpaniola*, took a View of *Cuba*, viſited *Jamaica*, beſtowed the Name of *St. John* on the Iſland of *Porto Rico*, called formerly *Borriquen*, and diſcovered almoſt all that can properly be called the *Weſt Indies*. As to the Continent, it muſt be confeſſed that he barely ſaw it, but then he ſaw both Parts of it, and the Iſthmus that unites them; and he left behind him Projects for extending all theſe Diſcoveries, and his Conjectures of the Conſequences that might attend them. He did ſtill more than this, he declared poſitively, that there lay a Sea on the other Side of the Continent, through which there might be a Paſſage diſcovered to the *Eaſt Indies*; and accordingly, as we have ſhewn elſewhere, that is, in the Hiſtory of *Magellan*'s Voyage, this Paſſage was actually diſcovered from the Lights given by him.

It muſt be confeſſed, that for ſuch Services ſcarce any Rewards could be ſufficient, much leſs too great; and if it be remembered, he demanded nothing beyond his firſt Contract, notwithſtanding that he performed much more than he promiſed therein, one cannot help wondering at the mean and ſcandalous Behaviour of King *Ferdinand*, who ſo ungratefully endeavoured to deprive him, and his Family, of what were their juſt Rights.

His eldeſt Son and Heir, *James*, or, as the *Spaniards* ſtile him, Don *Diego Colon*, inherited his Pretenſions, and inherited likewiſe, the Diſlike of *Ferdinand*, and the Hatred of the Biſhop *Fonſeca*; and though he endeavoured by Petitions, and perſonal Applications, to obtain his Right, yet he never could receive any other Satisfaction than fair Words and fine Promiſes; with which being ot laſt quite tired out, he deſired the King to leave his Demands to the Deciſion of the Law, which, being what he could not decently deny, was granted.

This Suit, as may be well ſuppoſed, was tedious and troubleſome, but at laſt, he obtained a clear Deciſion in his Favour, and was re-eſtabliſhed, by the Judges, in all his Fathers Pretenſions; notwithſtanding which the King and the Biſhop found Ways and Means to delay the Execution of the Judgment; ſo that he obtained nothing thereby, except the Recognition of a Right, which was ſufficiently clear before. To ſtrengthen his Intereſt, therefore he thought fit to marry, which he accordingly did, into one of the moſt illuſtrious Families in *Spain*; eſpouſing *Mary de Toledo*, Daughter to Don *Ferdinand*, Brother to the Duke of *Alva*, and Couſin to his Catholic Majeſty. By the Aſſiſtance of his Wife's Relations, he at laſt obtained the Government of *Hiſpaniola*: ſucceeding the great Enemy of his Father, *Nicholas de Obando*, but with the Title only of Governor, and not of Viceroy, which was his Right.

He went thither in 1508, with his Wife, his Brother, Don *Ferdinand*, who wrote the Life of his Father, of which we have made uſe in the foregoing Sections, and his Uncles, *Bartholomew* and *James Columbus*; together with many young Noblemen, and ſeveral young Ladies of good Families, by which the Luſtre of the *Spaniſh* Settlement, in *Hiſpaniola*, was reſtored, and encreaſed. Yet his Power was not at all greater than that of his Predeceſſor; and the little he had was ſoon after reſtrained by the ſettling of a new Court, at *Santo Domingo*, under the Title of the *Royal Audience*, to which Appeals were allowed from all Parts of the *Indies*. Here then we are to cloſe our Accounts of this illuſtrious Perſon and the State of his Family at his Deceaſe.

In the next Section we ſhall give a ſuccinct Account of the manner in which the *Spaniards* proſecuted the Diſcovery of the *Indies*, to the time of thoſe two great Expeditions, for the Conqueſt of *Mexico* and *Peru*; of which as the moſt memorable and extraordinary Tranſactions that have happened in this Part of the World, and which have contributed moſt to make it known, we ſhall give a larger and more particular Account; and, indeed, if we reflect, that in all Senſes whatever, the Conqueſts of the *Spaniards*, in the new World, have been the greateſt in themſelves, and more beneficial in their Conſequences, than thoſe of any *European* Nation, we cannot, certainly, think that time ill employed, which is ſpent in acquiring a circumſtantial Account of them; more eſpecially as the Events therein are more curious and entertaining than thoſe that occur in any other Hiſtory whatever.

SECTION VI.

The Hiſtory of the ſeveral Diſcoveries, Settlements, and Conqueſts made by the Spaniards, *in the* Weſt Indies, *after the Death of the Admiral Don* CHRISTOPHER COLUMBUS, *to the Expedition of* FERDINAND, *or* HERNAN CORTES.

1. *The Improvements made by* Nicholas de Obando *in the Iſland of* Hiſpaniola, *and the great Value of the Gold Mines wrought there.* 2. *The Expedition of Don* Juan Ponce de Leon *into* Puerto Rico, *and his Conqueſt of that Iſland.* 3. *A Settlement made on the ſmall Iſland of* Cubagua, *the vaſt Fiſhery of Pearls there, and the Occaſion of loſing it entirely.* 4, Alonſo de Hojeda, *and* Diego de Nicueſſa, *commiſſioned to make Diſcoveries, and ſail with that View to the* Indies. 5. Hojeda's *unfortunate Expedition to* Carthagena, *where he had been deſtroyed, but for the timely Aſſiſtance afforded him by* Nicueſſa. 6. *Afterwards fixes the Settlement of* St. Sebaſtian, *his Misfortunes and Death, together with the Fate of his new Colony before mentioned.* 7. *The Hiſtory of* Vaſquez Nugnez de Balboa, *and of his ſurprizing Exploits in the* Indies. 8. *The Hiſtory of Don* Diego de Nicueſſa *reſumed; he founds the Colony of* Nombre de Dios, *his ſubſequent Misfortunes and miſerable Death.* 9. *The Conqueſt of the great Iſland of*

of Cuba *undertaken by Don* Diego Velaſquez, *and the Progreſs made therein by him.* 10. *The famous* John Ponce de Leon, *by an unaccountable Deluſion, undertakes an Expedition to find out the* Fountain of Youth; *which produces the Diſcovery of* Florida. 11. *The Diſcoveries made on the Continent by the Command of* Diego Velaſquez, *under* Ferdinand de Cordova *his Lieutenant, to the Death of* Cordova. 12. *Theſe Diſcoveries reſumed and proſecuted with greater Succeſs, by the Command of* Velaſquez, *under* John Grijalva. 13. *His ſubſequent Expeditions open a Paſſage into that Country, ſince ſtiled* New-Spain. 14. *On his Return* Grijalva *is moſt unjuſtly diſgraced by* Diego Velaſquez, *for purſuing his Orders too ſtrictly.* 15. *Obſervations and Remarks on the principal Events in the foregoing Section.*

IT is natural for us to begin this Section with ſome Account of the Progreſs of the *Spaniards* in *Santo Domingo*, or *Hiſpaniola*, after a regular Government was ſettled there, and the Value of the Diſcovery thereby made known; and this for two Reaſons, firſt, becauſe the immenſe Wealth derived from this Colony was what excited the *Spaniards* to continue their Diſcoveries; and becuauſe this Vein of Wealth has been long ſince dried up, and, at preſent, we hear nothing of the Gold of *Hiſpaniola*; which, at its firſt Diſcovery, yielded more in Proportion than ever *Peru* has done ſince. This was, in ſome Meaſure owing to the Induſtry and Care of *Nicolas Obando*, who firſt employed a ſkilful Pilot to ſail round the Iſland, and deſcribe its Coaſts; and afterwards took Pains to examine all the Provinces into which it was divided, and ſurveyed them likewiſe.

In his Time there was diſcovered, near the Town of *Puerto Real*, a Mine of good Copper, but, after much Money expended about it, the Produce did not anſwer. Thoſe three hundred *Spaniards* whom *Obando* found in the Iſland, at his firſt coming, lived very diſorderly, and had taken the moſt beautiful Women, and of the beſt Quality in it, for their Miſtreſſes, their Parents believing that they were married; but the *Franciſcan* Friars, thinking the Lewdneſs not to be tollerated, made Inſtance to the Governor for ſome Remedy therein; who, at laſt, decreed, that they ſhould either part, or be married within a limited time: Many Men of Quality thought this a very hard Impoſition, yet, rather than loſe the Dominion they had over the *Indians*, in right to thoſe Women, they complied, and married them, and tho' this entitled them to what was their Wives, and the Lawyers ſaid they had a legal Right to the Service of thoſe *Indians*, *Obando* took them away as ſoon as they were married, and gave them to others, allowing them as many in other Places; alledging he did it to prevent their growing proud as natural Lords, and to keep them in Submiſſion, as holding thoſe *Indians* only by Gift; but this was looked upon as an unjuſt depriving of the natural Lords of their Subjects.

This *Nicholas de Obando*, when he went over Governor of *Hiſpaniola*, carried with him *Roderick de Alcaçar*, Goldſmith to their Majeſties; a diſcreet and honeſt Man, who had the Employment of Marker of the Gold, and his Fee was one per Cent.; which was looked upon as a very indifferent Allowance; but, after the Diſtribution of the *Indians*, there was ſo much Gold gathered, that it was four times melted down every Year; twice at the Town of *Buena Ventura*, on the Banks of *Hayna*, eight Leagues from *Santo Domingo*, where the Gold, brought from the old and new Mines, was caſt; and the other two at the City *de la Vega*, or the *Conception*, where the Gold of the Mines of *Cibao*, and the adjacent Parts, was conveyed; at each Melting, in the Town of *Buena Ventura*, there came out between 110000, and 120000 Peſos; and at *la Vega* between 125000, and 130000 Peſos, and ſometimes 140000. Thus the Product of *la Vega* was the greateſt, and all the Gold of the Iſland amounted to 460000 Peſos, or more Money; according to the niceſt Computation, 150000 Pounds; which yielded unto *Roderick de Alcaçar* about 4500 Peſos a Year; which at that time was a very conſiderable Revenue, and though it was well beſtowed on him, their Catholic Majeſties revoked it.

It was remarked, even at this time, that ſuch as wrought at theſe Mines were never any Gainers, notwithſtanding the vaſt Quantities of Gold, of which they became Maſters; for, living always luxuriouſly, and upon Credit, their Gold at the melting times, was often ſeized for their Debts, and very frequently did not afford enough to bring things to a Ballance.

2. The laſt War, in the Province of *Higuey* in *Hiſpaniola*, produced a great Extenſion of the *Spaniſh* Power; for the Governor, *Obando*, appointed one to command in thoſe Parts, and keep the *Indians* in awe, who ſoon formed a Project of carrying his Authority beyond the narrow Bounds which were aſſigned it. The Name of this *Spaniſh* Gentleman, was *Juan Ponce de Leon*, a Perſon of good Senſe, great Courage, but, withal, imperious and cruel. He was informed, by the *Indians*, that the Iſland of *St. John de Puerto Rico*, by theſe People called *Borriquen*, was exceedingly rich in Gold; a Circumſtance ſufficient to tempt him to a better Acquaintance with it.

In order to this, he applied himſelf to the Governor, giving him a full Account of all that he had heard, and deſiring his Licence to go over to the Iſland to enquire into that Affair, to trade with the Natives, and ſee what might be done towards ſettling there; for, till then, they knew nothing of it farther, than that it appeared very beautiful; and they ſaw abundance of People when Ships paſſed by it. *Juan Ponce* embarked in a ſmall Caravel, with ſome *Spaniards* and *Indians* that knew the Place, and landed in the Dominions of *Aguey Bana*, the greateſt Lord of the Iſland, who had a Mother and Father-in-law, who all received and entertained him very kindly; and the Cazique changed Names with him, which they called becoming *Guatiacos*, or ſworn Brothers. He gave the Mother the Name of *Agnes*, and called the Father-in-law *Francis*; and, though they would not be baptized, they kept the Names which the Chriſtians gave them.

This Cazique, his Mother, and Father-in-law, were very good-natured, and always adviſed the Son to be a Friend to the *Spaniards*. *Juan Ponce* preſently made it his Buſineſs to enquire whether what the *Indians* had told him was true, concerning the Gold Mines. The Cazique conducted him all over the Iſland, ſhewing him the Rivers where Gold was found, and among them two that were very rich; the one called *Manatuabon*, and the other *Cebuco*, where much Treaſure was afterwards drawn. He cauſed Samples to be taken, which he carried to the Governor of *Hiſpaniola*, leaving ſome *Spaniards* there well recommended to the Cazique, and his Mother, who were well entertained till others came to ſettle. The greateſt Part of this Iſland conſiſted of high Mountains, ſome of them covered with fine high Graſs, like that in *Hiſpaniola*. There are few Plains, but many Vales with pleaſant Rivers running through them, and all very fruitful. The Weſtern Point of it is but twelve or fifteen Leagues from the eaſtern Cape of *Hiſpaniola*; ſo that in fair Weather the one may be ſeen from the other, by People ſtanding on the Tops of thoſe Points.

There are ſome Ports, but none good, except that which is called *Puerto Rico*, where the City and epiſcopal See are ſeated. The Length of it is about forty Leagues at leaſt, and the Breadth ſixteen; the Circumference about 120. The Southern Coaſt lies all in ſeventeen, and the Northern in eighteen Degrees Latitude. It produced much Gold, though not quite ſo fine as that of *Hiſpaniola*, yet not much inferior to it.

While *Ponce de Leon* was thus employed, *Obando* was recalled, and Don *Diego Colon*, Son to the Admiral, came to take the Government of *Hiſpaniola* in his Room; bringing with him from *Spain*, a new Governor for *Puerto Rico*; but he who had made the firſt Settlement on that Iſland diſputing this Appointment, the young Admiral, without farther Ceremony, ſet them both aſide, and appointed one *Michael Cerron* Governor of that Place, and made one *Michael Diaz* his Lieutenant.

However *Juan Ponce de Leon*, by the Intereſt of his Friend *Obando*, procured a new Commiſſion from *Spain*, and going over to *Puerto Rico*, eaſily found Pretences for picking a Quarrel with *Cerron* and *Diaz*, whom he ſent Priſoners into *Spain*. Theſe People thus out of his way, *Juan Ponce de Leon* proſecuted his firſt Deſign of conquering the Iſland, but found it a much more difficult Taſk than he imagined. However, at laſt he compaſſed it: and with much ado the poor *Indians* were forced to ſubmit. In conſequence of which they were made Slaves, and employed in the Mines till they were quite worn out. Since which the Gold has likewiſe failed; which many *Spaniſh* Writers acknowledge to have been a Judgment from God for that barbarous Proceeding; ſo much the more probable, becauſe the ſame thing has happened in other Parts of their Dominions.

3. The Court of *Spain* was at this Time very ſollicitous to make the moſt of the Settlements already made in the new World, and therefore from time to time admitted of ſuch Repreſentations as thoſe who had been in the *Indies* thought fit to make, as to what was requiſite to be done there for promoting the Royal Revenue.

Amongſt other Propoſitions of this nature, there was one which ſuggeſted it was much for the King's Intereſt that the Iſland of *Cubagua*, called alſo *Of Pearls*, near *Margarita*, ſhould be inhabited by *Spaniards*, and therefore the Admiral was ordered to take care of it, that the Trade there might be better looked after. And the Inhabitants of *Hiſpaniola* made a great Advantage of it, finding the *Lucayo Indians* moſt uſeful, becauſe they were extraordinary Swimmers and Divers; ſo that one of them came to be worth one hundred and fifty Ducats. And they not only defrauded the King of his Fifth, but alſo abuſed and deſtroyed the *Indians*, which obliged them to ſtand upon their Guard, and was prejudicial to the Trade. This Iſland of *Cubagua*, ſomewhat about three hundred Leagues from *Hiſpaniola*, is about three Leagues in Compaſs, lies in almoſt ten Degrees of Latitude, the Soil very barren and dry, affording much Salt-petre, ſome few Guiacum Trees and Shrubs, without any Graſs or Birds, only ſuch as are proper to the Sea, being all flat and without any Springs of freſh Water.

No Land Creatures were found upon it, except a few Rabbits. The Natives painted themſelves, and fed on the Pearl Oyſters. They brought over in their Canoes Water from *Cumana* on the Continent, which is ſeven Leagues diſtant, and gave Seed-pearl for it to thoſe who would carry it over. Wood they had from the Iſland *Margarita*, which lies a League to the Northward of it, and incompaſſes it from the Eaſt to the North-weſt. And to the Southward of it is *Cape Araya* on the Continent, where the great Salt Pits are.

It has a good Port on the North Side. The Swine that were carried thither from *Spain* ſoon degenerated, their Claws turning upwards half a Handful. There was infinite Plenty of Oyſters breeding the Pearl within them, a little Nob growing at firſt ſoft, and afterwards hardening as it grows. Some Years the King's Fifth of only the Pearl Fiſhery amounted to fifteen Thouſand Ducats. And it was wonderful that ſuch a Quantity of Pearls ſhould be found in ſo ſmall a Compaſs, taken by Men diving, and ſtaying under Water as long as they can hold their Breath, pulling off the Shells from the Places they ſtick to. And it is to be obſerved that there are Pearls for above four hundred Leagues from *Cape de la Vela* to the Bay of *Paria*. And beſides theſe the Admiral found at *Cubagua* (which he called the *Iſland of Pearls*) he diſcovered them on the Coaſt of *Cumana*, as alſo all along the Coaſt of *Paria*, *Maracapa*, *Puerto Flechado*, and *Curiana*, which is near *Venezuela*.

4. Amongſt other Adventurers who petitioned the *Spaniſh* Court for Leave to make Diſcoveries, *Hojeda* was one, a brave Man, but poor; and *John de la Coſa*, who had been his Pilot, and had ſaved that Money which the other ſpent, out of pure Affection offered to aſſiſt him with his Life and Fortune. They had a Grant promiſed them of all that had been diſcovered on the Continent: But *Diego Nicueſſa* interpoſing, being a richer Man, and having a better Intereſt, ſtopped the Grant, and procured Half of it for himſelf. To the former Adventurers the Court granted all the Country between *Cape de la Vela* and the Gulph of *Uraba*, now ſtiled the *Gulph of Darien*, under the Name of *New Andaluſia*; and to the latter, from the before mentioned Gulph to *Cape Gracias a Dios*, under the Name of *Caſtilla del Oro*, or *Golden Caſtile*, without a Word ſaid of the Admiral, to whom of Right all theſe Countries belonged as diſcovered by his Father.

The Iſland of *Jamaica* was likewiſe granted to *Diego Nicueſſa*, in common, but the Admiral, being in the *Indies*, ſecured that for himſelf. *Hojeda* was able to fit out but one Ship, and one Brigantine; but *Nicueſſa* had two Ships and ſeveral Brigantines; with which they both ſailed to *Santo Domingo*, where they quarrelled about their Rights: And it was with great Difficulty that the Diſputes between them were adjuſted: At laſt, however, this was done, and both proceeded to their reſpective Governments, or rather to ſettle the Colonies they had promiſed.

5. Thoſe Diſputes took up much time, ſo that it was the latter End of the Year 1510 before either of them left *Hiſpaniola*. *Alonſo de Hojeda*, with whom *Francis Pizaro* imbarked, departed from the Iſland *Beata*, and, ſtanding to the Southward, in a few Days arrived at *Carthagena*, which the *Indians* called *Caramari*, and they were then in an Uproar, and ready to oppoſe the *Spaniards* becauſe of the Injuries done them by *Chriſtopher Guerra* and others, who had paſſed by that way, and under Pretence of trading had ſeized many, and made Slaves of them. Thoſe People were of a large Stature, the Men wore their Hair down to their Ears, and the Women very long. And both Sexes were very expert in ſhooting with their Bows. *Hojeda* and *John de la Coſa* had religious Men with them, his Maſter being very deſirous to induce them to ſubmit; and, having *Indians* of *Hiſpaniola* who ſpoke the Language, he adviſed them to be peaceable, and leave off their Cruelty, Idolatry, and other hideous Vices practiſed among them; but they, being very much incenſed, for Reaſons before mentioned, would not give ear to thoſe Perſuaſions.

Alonſo de Hojeda, purſuant to his Inſtructions, tryed all poſſible Methods to allure them, tho' he had alſo Orders in caſe they proved obſtinate, to declare War and make Slaves of them. He began to barter for Gold, giving them ſome *Spaniſh* Toys; but thoſe *Indians* being fierce and bold, *John de la Coſa* ſaid he thought it would be better to ſettle a Colony at the Bay *Uraba*, where the Natives were more gentle, and that from thence they might return to *Carthagena* better provided. *Alonſo de Hojeda* being always too reſolute, and the more for that, having been in a great Number of Quarrels and Engagements in *Spain* and *Hiſpaniola*, he had never loſt a Drop of Blood, did not regard the Advice, but fell upon the *Indians* who were preparing to attack him, killed many, ſeized ſome, and found a ſmall Quantity of Gold in the Places taken from them.

Not ſatisfied with that, uſing ſome of the Priſoners for his Guide, he went to a Town four Leagues up the Country, whither thoſe who had eſcaped from the laſt Fray were retired, and found the People there upon their Guard, armed with Targets, Swords of extraordinary hard Wood, Bows, ſharp poiſoned Arrows, and Rods, which they threw like Darts. The *Spaniards* crying out *Santiago*, that is St. *James*, fell on, killing and taking all they met. Eight *Indians*, who were not ſo expeditious as the reſt, retired into one of their thatched Houſes, where they defended themſelves a conſiderable Space, killing one *Spaniard*; at which *Hojeda* was ſo provoked, that he ordered the Houſe to be fired, where they all periſhed in a Moment. Here he took ſixty Captives, whom he ſent to the Ships, and purſued thoſe that fled. The Inhabitants of a Town called *Yarbaco* having Notice thereof, withdrew into the Mountains with their Wives, Children, and Effects.

The *Spaniards* coming thither by Break of the Day, and finding nobody, grew heedleſs, and diſperſed themſelves

ſelves about the Country. The *Indians*, obſerving their Careleſſneſs, fell upon them unexpectedly, and they ſo ſurpriſed endeavoured to retire to ſome Place of Safety, but ſtill met with their Enemies, who, they being divided into ſeveral Detachments, attacked, wounded, and killed them with Flights of poiſoned Arrows. *Hojeda*, with ſome of his Companions, maintained the Fight, often kneeling, the better to cover himſelf with his Target; but when he ſaw moſt of his Men killed, truſting to his Activity, he ruſhed through the thickeſt of the *Indians*, and, running as if he had flown, got into the thickeſt Part of the Woods, directing his Courſe the beſt he could towards the Sea, where his Ships were. *John de la Coſa* got into a Houſe that had no Thatch on it, where he defended himſelf at the Door till his Men being ſlain, and himſelf ſo wounded with the poiſoned Arrows that he could no longer ſtand, looking about he ſaw one that ſtill fought courageouſly, to whom he ſaid, That ſince it had pleaſed God to preſerve him he ſhould go immediately and tell *Hojeda* all that happened, and *Hojeda* and he were the only two that eſcaped, ſeventy *Spaniards* being ſlaughtered.

Things being in this Situation, very lucky for the *Spaniards*, *Nicueſſa* with his Ships appeared, and he landing, was informed of what had befallen his Rival through his own Raſhneſs; upon which he deſired he might be ſought for, and brought to him; and as ſoon as he ſaw him he ſaid, That in ſuch a Caſe they ought to forget their Diſputes, and only remember they were Gentlemen and *Spaniards*, offering at the ſame time to land his Men, and aſſiſt him in revenging the Death of *John de la Coſa*. They did accordingly land 400 Men, which proved alone more than ſufficient to beat the *Indians*, to take and burn their Town, and to put them in poſſeſſion of a vaſt Number of Slaves, and of a Booty worth Seven thouſand Pieces of Gold to each of them. After this Victory they agreed to part, and that each ſhould purſue that Plan of Diſcovery and Planting directed by his Commiſſion; which they accordingly did, with what Fortune we ſhall hereafter ſhew.

6. As for *Alonſo Hojeda*, as ſoon as he underſtood that it was the Deſign of *Nicueſſa* to ſteer for *Veragua*, he crouded all the Sail he could, for the River of *Darien*; but having loſt his old Pilot, upon whoſe Experience he chiefly depended, he miſſed the River, and at laſt reſolved to fix a Settlement on the Eaſtern Promontory of the Gulph of *Uraba*; which he accordingly did, and called his new Town *St. Sebaſtian*; which he did the rather, becauſe as that Saint is ſaid to have been martyred by the Arrows of the Infidels, he thought him a fit Patron to defend him againſt poiſoned Arrows of the *Indians*.

He was hardly fixed there before he found all the Inhabitants of the Country to be a Race of barbarous Savages, from whom he had nothing to expect, but all the Miſchief they could do him; in this Situation he thought fit to detach Captain *Enciſo* with one of his Ships to *Hiſpaniola*, with Orders to bring him as great a Reinforcement of Men as he could poſſibly obtain, and during his Abſence he intrenched himſelf as well as he could, the better to ſecure his People; but Proviſions growing very ſoon ſo low, that they were not in a Condition to ſubſiſt, he found himſelf under a Neceſſity of making ſome Excurſions into the Country to obtain a Supply; which Expedient, however, failed him, and he had the Misfortune likewiſe to loſe many of his Men by the Arrows of the *Indians*, which were poiſoned with the Juice of a certain ſtinking Root, that grew by the Seaſide. By theſe Diſaſters his new Colony was quickly reduced into a moſt wretched Condition, ſtarved if they remained within their Works, and ſure of meeting with Death if they ventered out of them; in this ſad State, and when they abſolutely deſpaired, they ſaw with an Amazement a Ship enter the Port.

It proved to be no better than a Pirate commanded by one *Bernard de Talavera*, who, flying from Juſtice, took Shelter here, in a place to him unknown. *Alonſo Hojeda* did not think it neceſſary to enquire very nicely into the Man's Character, but very readily bought his Ship's Cargo, and treated the Captain ſo well that he willingly entered into his Service. However ſerviceable this Relief might be, it was but of ſhort Continuance; ſo that, all their Proviſions eaten up, the Savages more troubleſome than before, and no Succour coming from *Hiſpaniola*, they were once more at their Wits-end. After various Schemes formed to no Purpoſe, it was at laſt reſolved that he ſhould go himſelf to *Santo Domingo*, in order to procure Supplies; and accordingly, leaving *Francis Pizaro* to command the Colony, he embarked on board *Talavera*'s Veſſel, and put to Sea. The Voyage was very unfortunate from the Beginning; for *Hojeda* uſing too much Severity towards the Crew, and behaving very haughtily to Captain *Talavera*, he not only deprived him of all Command, but very fairly clapped him in Irons. A Storm however ariſing, the Crew who, though they thought him a bad Officer, yet knew him to be a good Seaman, ſet him at Liberty; and it was chiefly by his Skill they were enabled to ſave their Lives, by running the Ship aſhore on the Iſland of *Cuba*.

It was but a very ſhort Paſſage from thence to *Hiſpaniola*, but *Talavera* durſt not go there; and therefore he prevailed upon *Hojeda* to venture a Voyage of one hundred Leagues to *Jamaica* in a Canoe, and he was lucky enough to perform it. He had by his Commiſſion, ſome Pretenſions on this Iſland; and having heard that the Admiral had ſent over thither Don *Juan de Eſquibel*, with the Title of Governor, he threatened to cut off his Head if ever he fell into his Hands; but now he was forced to ſue to him for Favour, and was very kindly uſed. After a ſhort ſtay at *Jamaica*, the Governor, at his own Requeſt, ſent him over to *Santo Domingo*; where he learned that Captain *Enciſo* was ſailed for *St. Sebaſtian*, but found his own Credit ſo low that he could ſcarce raiſe wherewithal to buy him Bread; and in a ſhort Time after he actually died of Want, though he deſerved a better Fate, being one of the braveſt Men that ever ſailed from *Spain* to the *Indies*. *Talavera* had ſtill worſe Luck; for, ſtaying too long at *Jamaica*, the Admiral cauſed him to be apprehended, tried, and hanged for a Pirate.

In the mean time, Captain *Pizaro* quitted *St. Sebaſtian*, and, with a very few Men, and with much Difficulty, eſcaped to *Carthagena*, where, very luckily for him, Captain *Enciſo* was juſt arrived with two Ships, and a conſiderable Reinforcement, he took *Pizaro* on board; and they returned altogether to *St. Sebaſtian*, where they had the Misfortune to be ſhipwrecked; and, getting aſhore with much difficulty, they found the Place reduced to Aſhes by the Savages. They reſtored it as well as they could, and got aſhore what they were able of Proviſions, and other Neceſſaries, out of their ſtranded Veſſels; but were ſoon reduced to the utmoſt Extremities both by War and Famine; Hunger frequently forcing them out, and the Savages conſtantly driving them back again with the Loſs of ſome of their Number, which they could very ill ſpare, being but One hundred and eighty Men at firſt. Such were the Miſeries to which theſe Men expoſed themſelves in Search of Riches.

7. We muſt before we can proceed, give the Reader ſome Account of a very extraordinary Perſon who was engaged in this Expedition, and who, by his Dexterity and Preſence of Mind, delivered his Companions, in ſome meaſure, out of the Dangers they were in. The Name of this Gentleman was *Vaſquez Nugnez* or *Nunez de Balboa*: He was a Perſon of good Family, great Parts, liberal Education, of a fine Preſence, and in the Flower of his Age, being then about Thirty-five. He had formerly ſailed with *Baſtidas* upon Diſcoveries, and had afterwards obtained a very good Settlement in *Hiſpaniola*, but, having committed ſome Exceſſes there, was in danger of being put to Death. In theſe unfortunate Circumſtances he procured himſelf to be put on board Captain *Enciſo*'s Ship in a Bread-caſk, and, after having remained there ſome Days, he ventured at laſt to make his Appearance, when the Ship was an hundred Leagues at Sea. The Captain, who had been charged not to carry any Offenders out of the Iſland, was extremely vexed at this Adventure, and threatned to ſet him on Shore in the firſt Deſart Iſland he came to; but the principal Perſons on board interceeding for him, the Captain was at laſt pacified, and granted him his Pro-

tection; which, however, did not efface from his Memory the Uſage he had met with, as we ſhall ſee in its proper Place.

This Man, obſerving that the Company were in a down-right Deſpair, and knew not which way to turn themſelves, took upon him to encourage them, by aſſerting, that they were not in ſo deſperate a Condition as they imagined; for that, when he was upon this Coaſt before, with *Baſtidas*, they had ſailed to the Bottom of the Gulph, where they had ſeen a very large fine Town, ſituated in a fruitful Soil, in a fine Climate, and which was inhabited by warlike *Indians* indeed; but ſuch as did not make uſe of poiſoned Darts. He therefore adviſed them to get off their Brigantines which were ſtranded, and endeavour to purſue their Voyage.

They approved *Nunez*'s Advice, ſailed to the River which the *Indians* call *Darien*, and, having viewed the Place, found all according as he had deſcribed it. The Inhabitants and their Cazique, whoſe Name was *Cemano*, underſtanding that the *Spaniards* were coming, ſecured their Wives and Children, and with Five hundred Men waited for the *Spainards* on a little Hill, who having performed their Devotions fell upon them, and ſoon put them to the Rout. They went to the Town, and, as they wiſhed, found it full of Proviſions. The next Day they marched up the Country and the Mountains thereabouts, where they found many Houſes without Inhabitants, they being all fled, but there were Veſſels, Houſhold Goods, and Cotton Things like ſhort Petticoats for Women, as alſo much Cotton ſpun and unſpun, and Plates of Gold, ſuch as they hung on their Breaſts, and other Things, amounting in the whole to Ten thouſand Pieces of fine Gold. *Enciſo* being overjoyed at this Succeſs, ſent for the Men that had been left on the other Side of the Bay, becauſe the Brigantines could not carry them at once. *Nunez* gained much Reputation by the Succeſs of this Enterpriſe, and began to be in very high Eſteem.

They all agreed to eſtabliſh a Colony there, and to call it *Santa Maria el Antiqua del Darien*, or *S. Mary the Antient of Darien*; the firſt being the Name of a Church at *Seville*, and the latter, the *Indian* Name of the River. *Nunez*, being now in great Credit, ſecretly contrived with his Friends to depoſe *Enciſo* from the Command, alledging, that ſince they were out of the Limits of *Hojeda*'s Government, he had no longer any Authority. Whilſt theſe Things were in Agitation *Enciſo* thought fit to order that no Man, upon Pain of Death, ſhould trade with the *Indians* for Gold; and they, ſuſpecting he did it to draw all to his own Advantage, unanimouſly threw off all Subjection to him, ſaying his Authority was expired on the Account above mentioned, and for other Reaſons. *Enciſo* thus deprived of the Government, they reſolved to chuſe Alcades and Regidores, which are the Titles of the chief Magiſtrates in *Spaniſh* Towns; and accordingly *Nunez de Balboa*, and *Zamadio*, were elected Alcades, and *Valdibia* was appointed Regidore. However, the Men, not being pleaſed with this Government, and repenting that they had excluded *Enciſo*, begun to fall at variance about it; ſome alledging that it was not proper to be without a Commander in chief, and by this means they divided into three Parties. One of them demanding that *Enciſo* ſhould be reſtored till the King appointed another Governor; the ſecond ſaid they ought to ſubmit themſelves to *Nicueſſa*, becauſe that Country was within his Diſtrict; the third conſiſted of *Nunez*'s Friends, who would have the preſent Governmet ſtand, but, in caſe they would have a ſingle Commander, inſiſted it ſhould be *Nunez de Balboa*.

In the Midſt of all theſe Debates, *Roderic Enriques de Colmenares* arrived with two Ships, having on Board Proviſions, military Stores, and ſeventy Men. This Captain, meeting a great Storm by the Way, put into the Port of *Santa Maria*, fifty or ſixty Leagues from *Carthagena*, by the *Indians* called *Gayra*; the Boats going there to water, the Lord of that Country came out with twenty of his Followers, cloathed in a ſort of Cotton Cloaks, though all *Indians* in thoſe parts go naked, and, drawing near, bid them not take of that Water, becauſe it was not good, ſhewing them another River. Not being able to come at it by the beating of the Sea, they returned to the firſt Place; and, as they were filling their Caſks, on a ſudden about ſeventy *Indians* ruſhed out, and, before the *Spaniards* could ſtand upon their Guard, wounded forty-five of them with their poiſoned Arrows: The wounded Men ſwam away becauſe the Natives ſtaved the Long-boat, and, when they got to the Ships, they all died except one. Seven *Spaniards* hid themſelves in a great hollow Tree, in order to ſwim to the Ship at Night.

But the Men on board, ſuppoſing them to be killed, ſailed away very melancholy, for the Bay of *Uraba*, to enquire after *Nicueſſa*; and finding no body on the Eaſt-ſide of the Bay, where they thought *Hojeda*'s Men, or their own, might be, *Colmenares* was much ſurprized, ſuſpecting they were all dead, or gone to ſome other Place; but thought fit to fire ſome Pieces of Cannon, that they might hear him if they were thereabouts; and to make Fires at Night; and Smokes by Day, on the adjacent high Rocks. They that were at *Santa Maria el Antiqua del Darien* heard the Gun, which made all the Bay roar to the Weſtward, and made Signals, and he came to them about the middle of *November*, 1510. He diſtributed the Proviſions he had among them all, and, by that Generoſity gained the Affections of the greater part of thoſe who oppoſed the calling of *Nicueſſa*; ſo that they agreed he ſhould be ſent for, in order to take upon him the Government.

8. It is requiſite for us, now, to turn to Don *Diego Nicueſſa*, in order to ſee how he paſſed his time after leaving *Alonſo Hojeda*, whom he had ſo generouſly aſſiſted. A few Days after, he met with as great Miſchiefs at Sea, as *Hojeda* had done on Shore; for he was toſſed by a dreadful Tempeſt from without, and betrayed within by *Lopez de Olano*; who, perceiving the Squadron ſeparate, followed one of the largeſt Ships into the River *Chagre*, in order to ſet up for himſelf, and left his Patron to ſhift as he could. After ſome very unlucky Adventures, he arrived at *Veragua*, which was their general Rendezvous; and there he laboured to perſuade the People to abandon their original Deſign as impracticable, and to ſail away to *Hiſpaniola*, there to make the moſt of what they had left; alledging, that without all doubt, *Nicueſſa* was periſhed with all his Men.

While they were meditating this Project, there came a Shallop into the Port, with four Men on Board, who brought Advice that the Governor *Nicueſſa* was not far off; that he had been ſtranded upon an unknown Coaſt, and marched a great Way with incredible Fatigue by Land, and was, with his Followers, in a moſt miſerable Condition. Upon hearing this News, *Olano*'s Heart relented, and he immediately diſpatched the Shallop with Proviſions and Refreſhments, which came ſo opportunely, as to ſave *Nicueſſa* and his Men from ſtarving, which otherwiſe muſt have been their Fate. Yet this did not, in the leaſt, ſoften his Reſentments againſt his Lieutenant; whom, if it had not been for fear of the Men, he would have hanged; and, as it was, he put him in Irons, and threatened to ſend him in that Condition to *Spain*. It was not long, however, that this Authority remained in his Hands; for, endeavouring to ſettle a Colony on the River *Bethlehem*, he found himſelf ſo ſtreightened for Proviſions, that he was conſtrained to leave a Part of his Men there, and to ſail with the reſt to *Puerto Bello*; but the *Indians* not ſuffering them to land, he was conſtrained to proceed four or five Leagues farther to that Port, which for Reaſons before mentioned, *Columbus* called the *Baſtimentos*; and as ſoon as he entered it, he cried out *Paremos aqui en el nombre de Dios*, that is, *Let us ſtay here in the Name of God.*

There debarking his Men, he began to erect a Fortreſs, which from the Expreſſion before mentioned, was called *Nombre de Dios*. He had not been long there before he found himſelf in the ſame Plight as in the former Colony; ſo that he was obliged to ſend one of his Veſſels to *Santo Domingo*, to beſeech the Governor to grant him ſome Aſſiſtance. This Veſſel was ſcarce out of the Port, before that with *Colmenares* on board arrived in the River of *Darien*, on the Meſſage that has been before related from the *Spaniſh* Colony ſettled there. *Col-*

him the chief Command next himſelf, ſo that he governed all things under him. The *Indians* of the Province of *Mayci* being quite ſuppreſſed, *Velaſquez* began to think of dividing them among the *Spaniards*, as *Obando* had done by them in *Hiſpaniola*, and took to himſelf thoſe of five Towns, where he had been Lieutenant; and to this purpoſe he founded a Town at a Harbour on the North Side, which Place was by the Natives called *Barracoa*; and this was the firſt *Spaniſh* Colony in that Iſland.

From this Place he ſent *Narvaez* with thirty Men to the Province of *Bayamo*, fifty Leagues from *Barracoa*, a fine open Country, and very agreeable: Only *Narvaez* rode, all the reſt marching on foot. The Natives of the Country came out to meet them with Proviſions, becauſe they had no Gold, being aſtoniſhed at the ſight of the Mare, and a Man on her Back. The *Spaniards* took up their Quarters in an *Indian* Town, the Inhabitants whereof, obſerving their ſmall Number, reſolved to rid themſelves of them. Though *Narvaez* was not very cautious, he had his Mare in the ſame thatched Houſe where he lay, and a Guard at Night. Near ſeven thouſand *Indians* aſſembled from all Parts of the Province, with their Bows and Arrows: They fell upon *Narvaez* and his Men after Midnight, though it was unuſual for them to fight at that time: They gave the Attack in two Parties, and fonnd the Sentinels aſleep. The beſt of it was, that being earneſt to plunder the *Spaniards*, for they ever coveted to be cloathed ſince firſt they ſaw them, they did not obſerve the time they had agreed on, ſo that one Party was more forward than the other, and entered the Town ſhouting.

Narvaez awaked in a Conſternation: The *Indians* went into the thatched Houſes, where finding the *Spaniards*, they neither wounded nor killed them, being wholly intent upon getting their Cloaths. The Shouts having ſurpriſed them, the *Spaniards* in their Fright knew not what they were doing. Thoſe *Indians Narvaez* had carried with him from *Jamaica* lighted Firebrands; and, this ſhewing the *Spaniards* their Danger, *Narvaez*, though wounded by a Stone, found Means to get to his Mare and mount her: At that time, it ſeems Part of the *Spaniſh* Furniture was hung with Bells, and the *Indians* hearing the Sound of them, and ſeeing *Narvaez* coming after them on a round Trot, with his Sword drawn in his right Hand, they not only abandoned their Enterprize, but fled out of their Country; and *Velaſquez* being informed of this, ſent a Detatchment to join *Narvaez*, and ſo became abſolute Maſter of that Province, the Inhabitants taking ſhelter in different Parts of the Iſland; and ſome, from their firſt Impreſſions of Terror, flying to the full Diſtance of fifty Leagues, leaving none but their old and decrepid People behind them.

10. We have already ſhewn, how *Juan Ponce de Leon*, by the Intereſt of *Nicholas Obando*, was reſtored to the Government of *Puerto Rico*, and how he ſent his Predeceſſors *Cerron* and *Diaz* Priſoners into *Spain*, which, tho' he looked upon it as a bold Stroke in Politicks, turned upon himſelf; for they preſenting a Petition againſt him to the Court of *Spain*, and being ſtrongly ſupported by the Admiral's Intereſt, were ſent back again in their former Employments; by which *Ponce de Leon* found himſelf reduced to the State of a private Man. But having made a good uſe of his Time, he had acquired a large Fortune, which induced him to think of regaining his Credit and Power by making Diſcoveries: And accordingly, on the 1ſt of *March* 1512, he ſailed from the Port of *St. German*, with two ſtout Ships fitted out at his own Expence, ſteering through the Iſlands called *Lucayos*, till, on the 2d of *April*, he diſcovered Land unknown to the *Spaniards* before that time, in the Latitude of 30° 8'. Charmed with which Piece of good Fortune, he ran along the Coaſt in ſearch of ſome Port, and at Night anchored near the Shore, in eight Fathom Water: Believing that Land to be an Iſland, they named it *Florida*, becauſe it appeared beautiful, having many pleaſant Groves, and was all level, as alſo becauſe they diſcovered it at *Eaſter*, which the *Spaniards* call *Paſcha de Flores*. *Juan Ponce* went aſhore there to diſcover and take poſſeſſion.

On the 8th they ſailed again, and on the 20th of *April* they perceived ſome *Indians*, where they anchored. *Juan Ponce* being called by the *Indians* went aſhore, and they immediately endeavoured to poſſeſs themſelves of the Boat, the Oars and the Arms; which was not reſented, that they might not provoke them, till one of them ſtunning a Sailor with a Stroke of a Cudgel he gave him on the Head, the *Spaniards* were obliged to fight, and had two of their Men wounded with Darts and Arrows pointed with ſharp Bones, and the *Indians* received little Damage. Night parting them, *Juan Ponce* with ſome Difficulty got his Men together, and ſailed thence to a River, where they wooded and watered; ſixty *Indians* came to oppoſe them, one of whom was taken to give ſome Information, and to learn *Spaniſh*. The River they called *de la Cruz*, or *of the Croſs*, leaving one of Stone there, with an Inſcription. On the 8th of *May* they doubled the Cape of *Florida*, giving it the Name of *Cabo de las Corrientes*, or *Cape Currents*, becauſe they are ſtronger there than the Winds, and came to an Anchor near to a Town called *Abacoa*. All this Coaſt, from Cape *Arracifes* to this Cape *Corrientes*, lies North and South one Point to the Eaſtward, is clean, and has ſix Fathom Water; the Cape lying in eighteen Degrees fifteen Minutes North Latitude. They ſailed on till they met with two Iſlands to the Southward, in twenty-ſeven Degrees; one of which being a League in Compaſs, they named *Santa Menta*, and watered there.

On the 15th of *May* they proceeded ten Leagues, along a Ridge of ſmall Iſlands, as far as two white ones, and called them altogether *los Martyres*, or *the Martyrs*, becauſe the high Rocks at a diſtance look like Men that are ſuffering, and the Name has been regarded as prophetic, on account of the many that have ſince been caſt away there: they held on ſometimes North and ſometimes North-eaſt, and on the 24th ran along the Coaſt to the Southward, as far as ſome ſmall Iſlands that lay out at Sea, and yet did not perceive that was the Continent. A Way appearing to be between them and the Coaſt for the Ships to take in Wood and Water, they continued there till the 3d of *June*, and careened one of the Ships called *St. Chriſtopher*. Here the *Iudians* came out in Canoes to view the Chriſtians, being the firſt time they did ſo, for the *Spaniards*, tho' called by them, would not go aſhore. When they went about to weigh an Anchor, only to remove it, thoſe People, thinking they were going away, came out in their Canoes, and laid hold of the Cable to draw the Ship away; whereupon the Long-boat was ſent after them, and the Men going aſhore took four Women, and broke two old Canoes. At other times when they came, there was no falling out, as finding no Opportunity, but on the contrary they bartered ſome Skins and Gold, tho' but indifferent.

On the 4th of *June*, while they were waiting for a Wind to go in ſearch for the Cazique *Carlos*, who the *Indians* that were aboard ſaid had Gold, a Canoe came to the Ships with an *Indian* that underſtood the *Spaniards*, ſuppoſed to be a Native of *Hiſpaniola*, or ſome of the Iſlands inhabited by Chriſtians; he bid them ſtay for the Cazique would ſend Gold to barter. They waiting accordingly, ſaw twenty Canoes, Part of them made faſt two and two together, ſome of them went to the Anchors, others to the Ships, and began to fight: Thoſe at the Anchors, not being able to weigh them, attempted to cut the Cables; but a Long-boat was ſent out, which obliged them to fly, taking four, and killing ſome. *Juan Ponce* ſent two of them to tell the Cazique, that, though he had killed a *Spaniard*, he would make peace with him. The next Day the Boats went to ſound the Harbour, and the Men landed. Some *Indians* came and told them, that the Cazique would come the next Day to trade; but it was to gain Time to draw Men and Canoes together, as it appeared; for at eleven o' Clock eighty Canoes well equipped attacked the neareſt Ship, and fought from Morning to Night, without doing the *Spaniards* any harm, the Arrows falling ſhort, becauſe they durſt not come near, for fear of the Croſs-bows and great Guns. At length they drew off, and the *Spaniards*, having ſtaid there nine Days, reſolved on *Monday* the

14th to return to *Hiſpaniola* and *Puerto Rico*, diſcovering ſome Iſlands in the Way, of which the *Indians* they had with them gave an Account.

They ſailed along Iſlands till the 21ſt, when they arrived at the ſmall Iſlands they called *las Tortugas*, or the *Tortoiſes*; becauſe they took one hundred and ſeventy of them in a ſhort time in one of them, and might have taken many more if they would. On the 28th, ſeeing Land, they came to an Anchor to trim their Yards and Sails, but could not tell what Country it was, moſt of them took it for *Cuba*, becauſe they found Canoes, Dogs, Cuts of Knives, and other Iron Tools, yet none of them knew it to be that Iſland. The 25th of *July* they were among a parcel of low Iſlands, without knowing any thing of that Place, till *Juan Ponce* ſent to view an Iſland, which appeared to be *Babama*, and ſo an old *Indian* Woman, they had found alone in another Iſland, told them, as did *James Miruelo*, a Pilot, who happened to be there with a Boat from *Hiſpaniola*; having ranged backward and forward till the 23d of *September*, and refitted the Ships, *Juan Ponce* reſolved to ſend one of them to take a View of the Iſland *Bimini*, where the *Indians* ſaid there was a Spring that made old People young again. *John Perez de Ortubia* was appointed Captain of that Ship, and *Anthony de Alaminos* Pilot; they took two *Indians* to pilot them over the Sholes, there being ſo many that it is a difficult Matter to paſs between them. Twenty Days after *Juan Ponce* returned to *Puerto Rico*, as did, ſome time after him the Ship which he had ſent, which found the Iſland of *Bimini*, but not the famous Spring. Yet the Iſland was large, pleaſant, and diverſified with Hills, Meadows, Plains, many Rivers and delightful Groves.

It is certain that *Juan Ponce de Leon*, beſides the main Deſign of making new Diſcoveries, which all the *Spaniards* then aſpired to do, was intent upon finding out the Spring of *Bimini*, and that River in *Florida*, the *Indians* of *Cuba* and *Hiſpaniola* affirmed old People bathing themſelves in became young again; and it was certain that many *Indians* of *Cuba*, firmly believing that there was ſuch a River, had, not long before the *Spaniards* diſcovered that Iſland, paſſed over into *Florida* in ſearch of that River, and there built a Town, where the Race of them ſtill continue. This Report prevailed with all the Princes and Caziques in thoſe Parts, to endeavour to find out a River that wrought ſuch a wonderful Change; ſo that there was not a Brook, nay, ſcarce a Lake or Puddle in all *Florida* but what they bathed themſelves in, and there are ſome ſtill that perſiſt in it, ignorantly believing that it is the River now called *Jordan*, at the Cape of *Santa Helena*; never reflecting that the *Spaniards* firſt gave it that Name, in the Year 1520, when the Country of *Chicora* was diſcovered. Though this Voyage, made by *Juan Ponce*, turned to little or no Account to him, yet it gave him Encouragement to go to Court to ſue for ſome Reward for the Countries he had diſcovered, believing them to be all Iſlands and no Continent, which Notion continued ſome Years. However, the Voyage was beneficial on account of the Rout ſoon after found out, to return to *Spain* through the Channel of *Babama*, which was firſt performed by the Pilot, *Antony de Alaminos*.

For the better underſtanding of *Juan Ponce*'s Voyage it is to be obſerved that there are three different Archipelagoes of *Lucayo* Iſlands. The firſt the *Babama* Iſlands, which gave Name to the Channel where the Currents are moſt impetuous: The ſecond they called *de los Organos*, and the third *Martyres*, which are next to the Shore of Tortoiſes to the Weſtward, which laſt being all Sand, cannot be ſeen at a Diſtance, and therefore many Ships have periſhed on them, and along that Coaſt of the Channel of *Babama* and the Iſlands of *Tortugas*. *Havanna*, in the Iſland of *Cuba*, is to the Southward, and *Florida* to the Northward, and between them are all the before mentioned Iſlands of *Organos*, *Babama*, *Martyres*, and the *Tortugas*; having a Channel with a violent Current, twenty Leagues over in the narroweſt Place, between *Havanna* and *los Martyres*, and fourteen Leagues from *los Martyres* to *Florida*; between Iſlands to the Eaſtward and the wideſt Part of this Paſſage to the Weſtward, is forty Leagues, with many Sholes and deep Channels, but there is no way for Ships or Brigantines, only for Canoes. But the Paſſage from *Havanna*, to come to *Spain*, is along the Channel of *Babama*, between the ſaid *Havanna*, *Martyres*, the *Lucayos*, and Cape *Canaveral*; and this was the great Merit of *Juan Ponce de Leon*, who was well rewarded in *Spain*. There happened about this time a very ſingular and melancholy Event, which, becauſe I find it recorded by many *Spaniſh* Hiſtorians, and as it ſhews to what a Height Corruption was grown in ſo ſhort a time, as ſince the *Spaniards* had ſettled in the *Indies*; it ſeems but reaſonable that it ſhould find a Place here for the Inſtruction of the Reader. The Reports that had reached *Spain* of the manner in which the poor Natives were treated in the *Indies*, being aſſigned to the Proprietors of Land as if they were Cattle that grazed upon it; it moved ſome religious Men, of the *Dominican* Order, to go over to the new World, in order to ſee what Progreſs they ſhould be able to make among the *Indians*, by the Uſe of ſpiritual Weapons only.

Three of theſe Fathers landed in the Iſland of *Porto Rico*, where one of them falling ſick, the other two procured a Veſſel to carry them over to the Main, where they were landed not far from that City, which *Hojeda* and *Veſpucius* ſaw in their firſt Voyage, and called it from its ſtanding in the Water *Venezuela*, that is, *little Venice*; where they found the People very docile and tractable, and were in a fair Way of making Converts to the Chriſtian Religion; but, very unluckily for them, a *Spaniſh* Pirate that made it his Buſineſs to ſteal *Indians*, anchored on the Coaſt, and the poor People, confident of being well treated by Chriſtians, went on board the Veſſel with their Cazique at their Head, of which the Pirate taking advantage, weighed anchor, and made all the Sail he could for *Hiſpaniola*. This, as may be eaſily imagined, raiſed a great Tumult among the *Indians*, who were on the very Point of putting the two *Dominicans* to Death; when another *Spaniſh* Ship arrived in the Port, commanded by a Gentleman of Honour; he pacified the *Indians* as well as he could, and having received Letters containing a true ſtate of the Fact, from the Fathers, he promiſed that in four Months time their Cazique and the reſt of their Countrymen ſhould be ſent home again.

As he really intended to perform what he had promiſed, ſo on his return to *Hiſpaniola*, he applied himſelf to the Royal Audience, or ſupreme Tribunal, at *Santo Domingo*, ſetting forth the Caſe as it ſtood, and the Danger that the two Prieſts were in, if theſe *Indians* were not ſent back in due time. But, alas! it ſo happened, that theſe very People had been purchaſed as Slaves by ſome of the Members of the Royal Audience, and they were not ſo much in love with Juſtice as to releaſe them. The Conſequence was, that when the four Months were expired, the *Indians*, to revenge the Loſs of their Prince and Relations, murdered the two *Dominicans*, whoſe Names were *Franciſco de Cordova*, and *Juan Garcias*.

13. It is now time for us to return to the Tranſactions of Don *Diego de Velaſquez* in the Iſland of *Cuba*, who having reduced the beſt Part of that Country, and ſettled ſeveral *Spaniſh* Colonies therein, began to be very deſirous of ſetting up for himſelf, and of ſhaking off the Authority of the Admiral *James Columbus*, by whom he had been placed there. The Admiral was by this time recalled into *Spain*, and oppoſed this Project of *Velaſquez* to the utmoſt of his Power; which, however, was now ſunk ſo low, that he was not able to carry his Point; for though *Velaſquez* was ſtill left accountable to him for the Exerciſe of his Authority, yet he was not allowed to recall him but with the Conſent of the Crown, which ſo well anſwered the Purpoſe of *Velaſquez*, that he reſolved to execute, without further Delay, a Project which he had long meditated of fitting out Ships for Diſcovery.

He no ſooner made his Intentions known, than numbers of *Spaniſh* Planters, who were grown rich, embraced the Propoſal, and offered to contribute large Sums towards carrying it into execution. Amongſt thoſe who diſtinguiſhed themſelves on this Occaſion, *Francis Hernandez de Cordova*, a rich and brave Man, who had *Indians* of his own, offered to go as Captain of thoſe Men, which, being granted, he fitted out two Ships and a Brigantine with all neceſſary Stores: He liſted one hundred and ten Soldiers, and ſailed from *Santo Domingo*, in *Cuba*, to the *Havanna*. They left the *Havanna* on the 8th of *February*, 1517, and on the 12th they doubled Cape *St. Antony*, holding on their Courſe to the Weſtward, becauſe the Pilot *Antony de Alaminos* ſaid the firſt Admiral had always inclined that Way when he ſailed with him, being a Boy,

They met with a great Storm that held them two Days, in which they expected to have periſhed; and after twenty-one Days being at Sea, lying by at Nights, they ſaw Land, and, from their Ships, could deſcry a large Town, which was about two Leagues from the Coaſt. As they drew nigh two Canoes full of Men appeared: They haled them, the Canoes drew near, and thirty *Indians* went aboard the Commodore, having Jackets without Sleeves, and pieces of Cloth wrapped about them inſtead of Breeches. The *Spaniards* gave them Meat, ſome *Spaniſh* Wine, and Strings of Beads. They made Signs, for there was no Interpreter, that they would be gone, and return the next Day with more Canoes to carry them aſhore; very much admiring the Ships, the Men, their Beards, their Cloaths, their Arms, and other things they had never ſeen before. The next Day they returned with twelve Canoes and an *Indian*, who was the Cazique, crying out *Conez Cotoche*, that is, come to my Houſe; and, for this Reaſon, that Place was called *Cape Cotoche*. The *Spaniards*, having conſulted, hoiſted out their Boats, and in them, and the Canoes, went aſhore with their Arms, where an infinite number of People waited to ſee them.

The Cazique ſtill preſſed them to go to his Houſe, and they, obſerving ſo many Tokens of Friendſhip, concluded to do ſo, in order to take a view of the Country; when they came to the Wood, the Cazique called out to a great Number of armed Men that lay in Ambuſh, and immediately there appeared a Multitude in Armour, made of quilted Cotton, with Targets, wooden Swords having edges of Flints, large Cutlaſſes, Spears and Slings, adorned with Plumes of Feathers, and their Faces painted of ſeveral Colours. They gave a hideous Shout, pouring in at the ſame time ſuch a ſhower of Stones and Arrows that they wounded fifteen *Spaniards*, after which they fell on Sword in Hand, and fought with much Reſolution. The *Spaniards* had only twenty-five Croſs-bows and Muſkets, which were well plyed. But, when the *Indians* felt the Sharpneſs of the *Spaniards* Swords, they fled, many being wounded, and ſeventeen killed. There were taken in this Action two Youths who became Chriſtians, and were called *Julian* and *Melchior*; the *Spaniards* returned to their Ships well pleaſed, for having found a rational ſort of People, and other things different from what there were at *Darien*, and in the Iſlands; and, more eſpecially, Houſes of Stone and Lime, which had not, till then, been ſeen in the *Indies*.

They held on their Courſe down the Coaſt, always lying by at Night; and having advanced fifteen Days after this manner, they found a large Town, and a Bay near it, which they believed to be a River where they might water, which was very acceptable, as they were in want. They landed, and underſtanding the *Indians* called it *Quimpeche*, they from thence called it *Campeche*. Being come to a Well of good Water, of which the Natives uſed to drink; when they had taken what they wanted, and were ready to return to their Ships; fifty *Indians* clad in Jackets, with large Cotton Cloths inſtead of Cloaks, came, and, by Signs, aſked them what they wanted, and, whether they came from thoſe Parts where the Sun riſes, inviting them to go to their Town: When they had ſeriouſly conſidered on it, and put themſelves into a good poſture of Defence, for fear of being ſerved as they had been at *Cotoche*, they went to certain Places of Worſhip built with Lime and Stone, where there were Idols of various ugly Shapes, as they had ſeen in the former, with freſh Signs of Blood, as alſo Croſſes painted, which they were much amazed at.

Abundance of People, Men, Women, and Children, came flocking, looking upon them with Aſtoniſhment, and ſome of them ſmiled; ſoon after two Parties of armed Men appeared in good order, like thoſe of *Cotoche*; from one of the Temples iſſued ten Men in very long white Mantles, their Hair long, black, and twiſted up in Rolls behind: In their Hands they had little earthen Fire-pans, into which they caſt Gum Anime, which they called *Copal*, and perfumed the *Spaniards*, bidding them to depart their Country or they would kill them; then they began to beat their little Kettle-Drums, and to ſound their Horns, Trumpets, and Pipes. The *Spaniards*, becauſe the Men that had been wounded at *Cotoche* were not yet well recovered, and two died, retired to the Shore in good Order, ſtill purſued by the armed Parties, and embarked again without any Loſs. When they had ſailed ſix Days longer the Wind blew North, bearing upon the Coaſt, ſo that they had like to have periſhed. When the Storm ceaſed they endeavoured to draw near the Shore to water, becauſe their Caſks were leaky, ſo that their Water laſted not long. They anchored near a Town, in a Bay, where they landed in the Afternoon, a League from the Town called *Potonchan*, and filled their Veſſels at ſome Wells they found near certain Places of Worſhip of Lime and Stone, like the former. When ready to return they perceived armed Men advancing towards them from the Town, juſt as before. They aſked whether they came from thoſe Parts where the Sun riſes, the *Spaniards* anſwered they did; and then the *Indians* drew back to ſome Houſes, becauſe the Night came on, and the *Spaniards* for the ſame Reaſon, reſolved to ſtay there; a great Noiſe being heard ſoon after, the *Spaniards*, upon Debate, were divided, ſome being for embarking, and others thinking the Retreat dangerous, becauſe there ſeemed to be three hundred *Indians* to one of them.

When Day appeared they perceived that the firſt Parties had been joined by others, who, incompaſſing them, poured in a great ſhower of Arrows, Stones and Darts, which wounded near eighty *Spaniards*, with whom they cloſed, uſing their Swords and Spears; and, though the *Spaniards* were not idle with their Fire-arms, Croſs-bows, and Swords, the *Indians* ſtreightened them, but, when they felt the *Spaniſh* Swords, they drew farther off, the better to take aim with their Arrows; whilſt they fought they cried out *Calachani*, *Calachani*, which, in the Language of *Yucatan*, ſignifies Cazique, or Captain, meaning that they ſhould ſhoot at the Commander, *Hernand de Cordova*, and they were not wanting in Endeavours, for they ſhot twelve Arrows into him, which, it was generally ſaid, he might have avoided, for there was no Encounter in which he was not foremoſt, though there was more Occaſion for his directing than acting. He finding himſelf ſo much wounded, and, that the Courage of his Men could not vanquiſh ſuch a Multitude, continually encreaſing, they made a moſt furious Onſet, and broke through them, the *Indians* ſtill purſuing them with hideous Noiſe and Cries; when they came to the Boats, their Number being great they were ready to ſink, but ſtill they made off, the Natives ſhouting at them, and running into the Water to wound them with their Spears: Seven and forty *Spaniards* were killed in this Action, and five died aboard the Ships. The wounded Men endured moſt piercing Pains, their Wounds having been wet with the Sea-water, and ſwelling, curſing the Pilot *Alaminos* for his Diſcovery, who ſtill perſiſted that this Country was an Iſland, and they called this Bay *de Mala Prelea*, that is of the *bad Fight*, for the ill Succeſs they had met with. The *Spaniards* that eſcaped aboard the Ships gave God Thanks for their Deliverance out of that Danger; but, being all wounded except one, they reſolved to return to *Cuba*, and, in order to it, burnt one of their Ships that was leaky, becauſe they wanted able Hands to ſail them both, and ply the Pump. Being diſtreſſed for want of Drink, having left their Caſks at *Potonchan*, ſome of the ſoundeſt Men went aſhore, who could get no Water but what was brackiſh, which they took at a Creek where there were many Alligators, and therefore they called it *de los Lagartos*, or of *Alligators*. *Antony de Alaminos* adviſing with the other Pilots, it was reſolved to ſtand over for *Florida*, and, accordingly, in four Days they diſcovered that Country. *Alaminos* was ſent aſhore with twenty of the ſtouteſt Soldiers, carrying Croſs-bows and Muſkets, and Captain *Francis Hernandez*, who was much wounded, begged he would ſpeedily bring him ſome Water, becauſe he was periſhing for want of it.

When landed near a Creek, *Alaminos* told them he knew the Place, having been there before with *Juan Ponce de Leon*, and that they muſt be upon their Guard; having accordingly poſted Centinels along an open Shore, they dug Pits, where they found good Water, drank ſome, and waſhed out Linen for the wounded Men. When they were about returning, they perceived one of the Sentinels come running and crying, *To Sea, to Sea; for warlike* Indians *are coming*. On the other hand, they ſpied many Canoes coming down the Creek. The *Indians* with long Bows and Arrows, Spears and Swords, after their manner, cloathed in Deer-ſkins, and being of a large Size, were very dreadful. They let fly their Arrows, and at the firſt Diſcharge wounded ſix of the Soldiers; but ſeeing the Effect of the Croſs-bows, Muſkets, and Swords, they made to the Canoes, which preſſed hard upon the Sailors, and had wounded *Antony de Alaminos* in the Throat. The Soldiers cloſed with them, being up to the Waſte in Water, and with their Swords made them quit the Boat they had taken. When ready to embark, they aſked the Soldier who had ſtood Sentinel, What was become of the other Sentinel? He ſaid, he had ſeen him ſtep aſide with a Hatchet in his Hand, to cut down a *Palmito* going towards the Creek along which the *Indians* came, and preſently had heard the Cry of a *Spaniard*, which made him come to bring the Alarm. That Soldier was the only one who eſcaped at *Potonchan*, and it was his hard Fate to periſh here; for the others followed the Tract of the *Indians*, and found a Palm Tree he had begun to cut, and near it a greater Tract than elſewhere, which made them conclude that they had carried him away alive, and though they had ſearched for above an Hour, they returned to the Ships without finding him.

The Men were ſo extreme thirſty, and deſirous of Water, that, as ſoon as the Boat came to the Ship's ſide, a Soldier leaped into it, and laid hold of a Jar, and drank ſo much that he ſwelled, and died within two Days. Sailing from thence, in two Days and Nights they arrived at the little Iſlands, called *los Martyres*, where the greateſt Depth being but four Fathoms, the Ship touched upon ſome Rocks, and became very leaky; but it pleaſed God that after ſo many Sufferings, they arrived at *Port Carenas*, now the *Havanna*; from whence Captain *Hernandez de Cordova* ſent an Account of his Voyage to the Governor *James Velaſquez*, with the Particulars of all he had ſeen, and died ten Days after. Three of his Soldiers died alſo at the *Havanna*, which made up fifty-ſix loſt in the Expedition; the reſt diſperſed themſelves about the Iſland, and the Ships returned to the City of *Santiago*; by which the Fame of their Voyage was ſpread over all *Cuba*.

12. As indifferent Succeſs as this firſt Diſcoverer met with, yet his Memoirs were highly eſteemed by *Velaſquez*, who frequently declared, that it was by no means his Intention to part with this Diſcovery in ſuch a manner; but that, on the contrary, he was determined to purſue it when Opportunity offered, for many Reaſons, but chiefly for this, becauſe thoſe People ſeemed more civilized than any other *Indians*, and were conſequently more likely to prove rich. Theſe Sentiments of his were no ſooner known, than ſeveral of the principal Inhabitants of the Iſland offered him their Aſſiſtance, ſo that he was quickly in a Condition to put to Sea a ſmall Squadron conſiſting of three Sail of Ships and one Brigantine, having on board in the whole two hundred and fifty Men, under the Command of the Captains *Alvaredo*, *Montejo*, and *d'Avila*; but the Perſon who commanded in chief was *John Grijalva*, a Man of Courage, Fidelity and Experience, to whom *Velaſquez* gave this Order, That he ſhould make what Diſcoveries he could, but no Settlement. They ſailed from *Cuba* on the 8th of *May* 1518, and, having viſited the Coaſt of *Florida*, and doubled Cape *St. Antony*, diſcovered the Iſland of *Cozumel*, to which their Commander gave the Name of the Iſland of *Santa Cruz*, becauſe he found it on the Feaſt of *Holy Croſs*, but it retained, notwithſtanding, its old Name, by which it is ſtill called.

Grijalva landed with a competent Number of Soldiers, and no body appeared, becauſe the Natives having never ſeen Ships before, when they perceived them under ſail, fled; whilſt ſome went to ſeek them he ordered Maſs to be ſaid. Two old Men being found in a Field of *Indian* Wheat, and underſtanding the Language of the *Indians*, *Melchior* and *Julian*, who had been taken in the former Expedition, *Grijalva* made much of them, and giving them ſome Beads and Looking-glaſſes, ſent them away to their Lord, but they never returned. Whilſt they waited for them, a young Woman, exceeding handſome, came, and in the Language of *Jamaica* ſaid, The People were all fled into the Wood for fear; but that ſhe, being acquainted with Ships and *Spaniards*, was come to them: Many that came on board the Ships underſtanding her, and admiring at it, aſked, Who had carried her to that Iſland? ſhe anſwered, That a Canoe going out a fiſhing from *Jamaica* two Years before, with ten Men in it, a Storm, and the Currents, had drove them to *Cozumel*, where her Huſband and all the reſt had been ſacrificed to their Idols. *Grijalva* believing that Woman would be a truſty Meſſenger, ſent her to call the Natives, not confiding in *Melchior* or *Julian* for fear they would not return. The Woman came again two Days after, according to Promiſe, telling them, That though ſhe had done all ſhe could to perſuade them, they would not by any Means be brought to go back.

13. *Grijalva* finding no Good could be done there, went aboard again, and took with him the *Jamaica* Woman, becauſe ſhe begged him not to leave her there. In this Iſland they found many Hives of good Honey, Batatos, and Swine of that Country, having their Navel on their Backs; which much refreſhed them. They ſaw ſeveral Temples, and one particularly like a ſquare Tower, wide at the Bottom, and hollow at the Top, with four large Windows and Galleries; and in the hollow Part, being the Chapel, were the Idols, behind which was a ſort of Veſtry; where the Things belonging to the Service of the Temple were kept: At the Foot of it was an Incloſure of Lime and Stone, with Battlements well plaiſtered; and in the Midſt of it a Croſs of white Lime three Yards high, which they held to be the God of Rain, affirming, that they never wanted it when they devoutly begged it of the ſame. The *Spaniards*, embarking again, ſailed along the Coaſt, much admiring to ſee large and beautiful Structures of Stone, with ſeveral high Towers, which at a Diſtance made a good Appearance; for which Reaſon, no ſuch Thing having been ſeen at the *Indies*, as alſo on Account of the Croſs, *Grijalva* ſaid they had found a NEW SPAIN. Eight Days after they arrived at the Shore of *Potonchan*'s Town, came to an Anchor, and landed the Soldiers with all the Boats near ſome Houſes, where the *Indians* being grown vain with the Thoughts of having drove *Hernandez*'s Men out of the Country, ſtood drawn up to hinder the *Spaniards* from landing, ſhouting, and making a great Noiſe with their Trumpets and Kettle-drums; and tho' ſome Falconets, in the Boats, put the Men to a great Fright, being a Thing they had never ſeen, yet, when the Boats came near, they began to ſhoot their Arrows, and caſt Stones and Darts with their Slings, running into the Water to wound the *Spaniards* with their Spears; but as ſoon as they landed they made them give way with their Swords; for the *Spaniards* being taught by Experience, began to uſe the ſame ſort of defenſive Armour ſtuffed with Cotton, as the *Indians* did; ſo that they received leſs Harm by the Arrows, and yet ſixty Soldiers were wounded, three killed, and *John de Grijalva*, the Commander in chief, was ſhot with three Arrows, one of which broke ſome of his Teeth.

The Boats coming with the Soldiers that had been left aboard, the *Indians* quitted the Field, and the *Spaniards* went to the Town, dreſſed the wounded Men, buried the Dead, and found only three of the Natives. *Grijalva* uſed thoſe three well, gave them ſome Toys, and ſent them to call the Inhabitants, promiſing not to hurt any Man; but they never returned, nor would he ſend *Melchior* or *Julian*, becauſe he ſuſpected them. *Grijalva* embarked again, and came to a large, wide Gulph of freſh Water, like a River, but it was not; and *Antony de Alaminos* ſaid it was an Iſland, and that the Water parted it from another Country, for which reaſon he called it *Bocca de Terminos*, that is, *the Mouth of the Boundaries.* They landed, ſtayed three Days, and found it was no Iſland, but a Bay, and good Harbour. There were Temples, with Idols of Clay and of Wood, repreſenting Men, Women, and Serpents; but no Town could be ſeen, and it appeared that thoſe were Chapels for People that went a trading and hunting. During thoſe three Days they took ſeveral Deer and Rabbits with a Grey-hound Bitch they had, which the *Spaniards* not minding her, they left there; holding on the ſame Way, always by Day, to avoid falling in among Flats or Rocks, they diſcovered a very large Mouth of a River, which ſeemed to be a good Harbour; but ſounding it, they perceived that the two largeſt Ships could not go in, as the two ſmaller did. The Boats went up the River very cautiouſly, becauſe they ſaw many armed *Indians*, like thoſe at *Potonchan*, in Canoes along the Shore.

This River, by the Natives called *Tabaſco*, being the Name of the Lord of the adjacent Town, the *Spaniards* named *Rio de Grijalva*, from their Commander in chief who found it. As they advanced higher, they heard the Noiſe of hewing Wood, becauſe the Inhabitants, having been informed of what had happened at *Potonchan*, concluded there muſt be War.

The *Spaniards* landed at a Grove of Palm-trees, about half a League from the Town. The *Indians* ſeeing them land, about fifty Canoes full of armed Men, with Plumes of Feathers, and very fine, moved, ſtoped again at a ſmall Diſtance from the *Spaniards*, in a warlike Poſture; and when the *Spaniards* were ready to fire their Falconets upon them, they firſt ſent *Melchior* and *Julian* to ſpeak to them. Theſe Interpreters told them, that they came only to treat about ſome Affairs that would pleaſe them. Four Canoes drew nearer, and being ſhewn little Glaſſes on Strings, and thinking they had been the Sort of Stones called *Chalchibites*, much valued among them, they were pacified. Then *Grijalva* ordered the Interpreters to tell them, that theſe Men were Subjects of a great King, to whom mighty Princes paid Obedience, and it was reaſonable they alſo ſhould ſubmit to him, becauſe it would be much to their Advantage; and that till they could explain theſe Affairs to them they ſhould furniſh Proviſions. The *Indians* anſwered, that they would give Proviſions, but that they had a Lord of their own, and did not know why they who were juſt come ſhould offer to impoſe a new Lord upon them; that they ſhould take heed how they made war on them, as they had done at *Potonchan*, for that they had provided above three *Xiquiples* (each Xiquiple being eight thouſand) of Men againſt them; that they knew they had killed and wounded abouve two hundred at *Potonchan*; but that they were not ſo weak as thoſe Prople; and, to conclude, that they were come thither to know their Will, and would go and make a very juſt Report of what they ſaid to a Number of very great Men, that were aſſembled either to treat of Peace or renew the War. *Grijalva* gave them Strings of Beads, Looking-glaſſes, and other things, charging them not to fail to bring back an Anſwer, becauſe if they did not, he muſt needs go to the Town, though not to do any harm.

He then returned to the Ships. The Meſſengers delivered the Meſſage, and all the prime Men, who were wont to be conſulted in martial Affairs, thought Peace was preferable to War. They immediately ſent their *Indians* loaded with roaſted Fiſh, Hens, ſeveral Sorts of Fruit, and Bread; then laying ſome Mats on the Ground, they placed a Preſent on them, being a handſome Maſk of Wood, and ſeveral Sorts of Feather-work, very beautiful; and an *Indian* ſaid the Lord would come the next Day to ſee the *Spaniards:* Accordingly, taking along with him many Men unarmed, he without any Jealouſy went aboard *John de Grijalva*'s Ship, who was a genteel Man, about twenty-eight, and had on a looſe Coat of Crimſon Velvet, a Cap of the ſame, with other rich Ornaments ſuitable to the Coat. The Cazique was received with much Honour; ſitting down they began their Diſcourſe, of which both Parties underſtood very little, unleſs it was by Signs, and ſome Words the two *Indians*, *Julian* and *Melchior*, interpreted. After ſome time, the Cazique ordered one to take out of a *Petaca*, which is in the Nature of a Trunk, the things he had carried.

The *Indian* took out Plates of Gold, and thin Boards covered with Gold, for Armour, as fit as if they had been made for *Grijalva*, and the Cazique himſelf put them upon him, and took them off, applying thoſe that ſuited beſt; and in this manner he put him on a compleat Suit of Gold Armour, as if it had been of Steel. He alſo preſented him various Works in Gold and Feathers, a thing much valued among them; and it was wonderful to ſee how beautiful *Grijalva* looked; who gave the Cazique all the Signs of Gratitude that could be thought of. He called for a very fine Shirt, and with his own Hands put it upon the Cazique; took off his great Coat of Crimſon Velvet, and put that on him, as alſo a Pair of new Shoes. In ſhort, he cloathed and adorned him the beſt he could, gave him ſome of the beſt ſtrings of Beads, and Looking-glaſſes, Sciſſars, Knives, and ſeveral things of Tin; and the like to all that were with the Cazique. What the Cazique gave to *Grijalva* was computed to be worth three thouſand Pieces of Eight; and among the reſt there was a wooden Head-piece covered with thin Plates of Gold, three or four Maſks, ſome of them covered with a ſort of Stones like Emeralds, *&c.* and the Sight of theſe things made the *Spaniards* very eager to ſettle in a Country which produced ſo much Wealth.

As for *John Grijalva*, having received this great Preſent at *Tabaſco*, and being ſenſible that the *Indians* were not willing that their Gueſts ſhould ſtay long, and in regard that the *Spaniards* aſking for more Gold, the *Indians* anſwered *Culua, Culua*, he proceeded farther, and in two Days came to a Town called *Aqualunco*, which the *Spaniards* named *la Rambla*, the Inhabitants whereof appearing at a diſtance, and having Targets of Tortoiſe-ſhells, which glittered in the Sun, made ſome of the *Spaniards* fancy that they were of pale Gold; they diſcovered a Bay in which the River *Tonala* falls, where they entered at their Return, and called it *St. Anthony*'s River: At a diſtance again they ſaw the great River *Guazacoalco*, but could not go up it, becauſe of the foul Weather: Next they had a Sight of the ſnowy Iſlands of *New Spain* and *St. Martin*, which Name was given them by the Soldiers who firſt diſcovered them. Holding on their Courſe, Captain *Alverado* went ahead with his Ship, and entered a River the *Indians* call *Papaloava* but the *Spaniards* gave it the Name of *Alverado*'s River, where the *Indians* of the Town of *Tavotulpale* brought Fiſh, and the other Ships ſtaid till he came out again: They then advanced to the Mouth of another River, which they called *de Banderas*, or *of Colours*, becauſe the *Indians* having large white Cloths on long Poles, like Colours, waved them for the *Spaniards* to come to them.

It it neceſſary to inform the Reader of the Reaſons which occaſioned this, and which, in few Words, were theſe: The Country, on the Coaſt of which they now were, was a Province of the great Empire of *Mexico*, over which *Montezuma* reigned, a Prince of great Wiſdom and Penetration, who, having heard both of the former and of the latter Exploit of the *Spaniards*, and of the Pains they took to be acquainted with the maritime Parts of his Empire, began to grow jealous thereat, and was uneaſy in his turn to know who and what theſe People were, and why they took ſo much Pains to be inſtructed as to the State of Countries that did not belong to them: To anſwer this Purpoſe effectually, he gave Directions to the Governors of theſe Provinces to entertain theſe Strangers civilly, to take every Opportunity that offered of trading with them, and to ſend him, from time to time, ſuch an Account of their Motions, as might enable him clearly to diſcern what Opinion he ought to entertain of them. It was in Conſequence of theſe Inſtructions, that the *Indians* ſet up theſe Colours, to invite the Strangers on Shore.

On the other hand, the *Spaniards* ſeeing themſelves invited by the Signals of the Colours *Grijalva*, ordered two Boats to go aſhore, and in them Captain *Francis de Montejo*,

tejo, with all the Muſketeers and twenty other Soldiers, with Directions, that, in caſe the *Indians* appeared in a warlike Poſture, he ſhould give notice of it, that Succours might be ſent. As ſoon as they landed they offered him Fowls, Bread, and Fruit; the *Indian*, *Julian*, not underſtanding that Language, which was the *Mexican*, and they perfuming the *Spaniards*, burning Copal in little Fire-pans; *Montejo* ſent advice to *Grijalva*, who, thereupon came up cloſe with the Ships and landed, when one of the King of *Mexico*'s Governors, and the other great Men, paid him much Reſpect, he having given them ſome Glaſs-Beads and Necklaces of ſeveral Colours. The Governor ordered the *Indians* to bring Gold to barter, and in the ſpace of ſix Days they ſtayed there, they got the Value of 15,000 Pieces of Eight in Gold Baubles, and Toys in ſeveral Shapes.

4. All things had hitherto ſucceeded happily, ſo as to do great Credit to the Commander in chief, and to thoſe who were under him, but ſtill there was nothing done comparable to the Expectations which had been raiſed in *Cuba* of this Expedition; which prompted them to loſe no time, but to continue their Voyage with the utmoſt Diligence, and, at the ſame time, with all poſſible Caution. *John Grijalva* therefore contented the Caziques with Preſents of ſuch things as he had, and having taken Poſſeſſion of the New Country for the King, and for *James Velaſquez*, in his Majeſty's Name, embarked again becauſe the North Winds blew there upon the Land, and he was not ſafe; finding an Iſland near the Continent he called it *Iſla Blancha*, or *white Iſland*, becauſe the Sands were whitiſh; and not very far from theſe another appeared four Leagues from the Coaſt, which, being well wooded, they called *la Verd*, or the *Green*. Farther they ſaw another a League and a half from Land, and there being a good Road oppoſite to it, *Grijalva* ordered the Ships to anchor there; he went to the Iſland with the Boats, becauſe there was Smoak, and found two Houſes well built with Lime and Stone, having many Steps that led up to Altars, on which there were Idols; and they perceived that five Men had been ſacrificed there that Night, their Breaſts being ripped open, their Legs and Thighs being cut off, and the Walls bloody, which much aſtoniſhed the Chriſtians, and therefore they call this the *Iſland of Sacrifices*.

They landed, again, oppoſite to the Iſland, where they made themſelves Huts of Boughs and the Sails of the Ships, whither ſome reſorted to barter Gold in ſmall Figures; but the Gold being inconſiderable, and the *Indians* fearful, the *Spaniards* removed to another little Iſland about half a League from the Main. They landed on a Strand, built Barracs on the higheſt Part of thoſe Sands to avoid the Plague of the *Moſquitos*, or *Gnats*; and having ſounded the Harbour, found there was ſufficent Water, and that the little Iſland ſheltered them from the Northwind. *Grijalva* went over to the Iſland with thirty Soldiers, in two Boats, where he found a Temple with Idols, and four Men who wore very long black Mantles with Hoods, being the Prieſts of the Temple, and, that very Day, had ſacrificed two Boys, whom they found ripped open, and their Hearts taken out; a piece of Cruelty which moved the *Spaniards* to Compaſſion. *Grijalva* aſked an *Indian* he had carried from the River *de Banderas*, who ſeemed a good rational Man, what that was for, who anſwered, that the People of *Ulua* would have it ſo. The Name of the *Spaniſh* Commander in chief being *John*, and the time of the Year about the Feaſt of St. *John Baptiſt*, he gave that Name to the Iſland, and accordingly it has always been called *St. John de Ulua*, to diſtinguiſh it from *St. John de Puerto Rico*.

Grijalva ſtaid there ſeven Days bartering for ſome ſmall quantity of Gold; the Men being quite tired with the Trouble given by Gnats, having certain Knowledge that the Land they had been on was the Continent, and that there were great Towns on it, juſtifying the Name given it of *New Spain*; the Cazibi Bread growing mouldy and bitter, and the Men being too few to ſettle a Colony, becauſe ten had died of their Wounds, and others were ſick; it was thought fit to give an Account of all things to the Governor *Velaſquez*, eſpecially as he had ordered not to make any Settlement, that he might ſend a greater Number if he ſhould judge it fit to be done; for *Grijalva*, notwithſtanding all the aforeſaid Reaſons to the contrary, was always of Opinion to build a Town. *Peter de Alverado* was made Choice of to carry this Meſſage to *James Velaſquez*, in the Ship *St. Sebaſtian*, and to take with him all the Gold and other things that had been traded for, and all the ſick. *Velaſquez*, after the Departure of *Grijalva*, from *Cuba*, had been in much Care for his Ships, as ſailing on unknown Seas, and therefore ſent *Chriſtopher de Olido*, a Commander of Note, in a Ship with ſeventy Soldiers, to get Intelligence.

He being at Anchor on the Coaſt of *Yucatan*, there aroſe ſuch a Storm as obliged him to cut his Cables, and run back to *Santiago*, in *Cuba*, whence he had ſet out; and, at the ſame time, arrived *Peter de Alverado* with the Gold, Cotton Cloths, and a Relation of what had been done and diſcovered, which was mighty agreeable to *Velaſquez*, who conceived great hopes of that Enterprize, and the Report was ſpread abroad to the great Aſtoniſhment of all Men.

Velaſquez being a ſevere Man to thoſe that ſerved him, and eſpecially provoked againſt ſuch as were miſrepreſented, alſo over-credulous, and *Peter de Alverado* having been one of thoſe that were for ſettling a Colony, and repreſenting the Affair to him as he thought fit, gave him very ill Impreſſions of the Man who had ſerved him ſo faithfully, and with ſuch ſtrict regard to the Orders he received from him at his Departure. But before we inſiſt on this, let us return to our Diſcoverers, and to the Progreſs they made in their Deſign of obtaining a clear Account of this Part of the Continent.

When Captain *Alverado* was gone for *Cuba*, *Grijalva*, by the advice of the Captains and Pilots, continued his Diſcovery; and coaſting along in ſight of the Mountains of *Tuſpa*; ſo called from the Town near by them, and others, higher than they, for the ſame Reaſon, called *Tuſpa*; farther in the Province of *Panuco*, they ſaw Towns, and a River which they called *Decanoas*. As they lay at Anchor, not being upon their Guard, ten Canoes, full of armed Men, appeared, and drawing near to the leaſt Ship, commanded by *Alonſo d'Avila*, poured in a flight of Arrows, wounded five Soldiers, laid hold of the Cables and cut one, intending to carry off the Ship; and, though the Men in it behaved well, and overſet two of the Canoes, yet they ſtood in need of the Fire-arms from the other Ships; for the moſt of the *Indians* being wounded by them, deſiſted from their Enterprize, and ſheered off; the *Spaniards* ſailed along the Coaſt till they came to a very large Point of Land, which being very difficult to double, and the Currents extraordinary ſtrong, the Pilot *Alaminos*, gave *Grijalva* many Reaſons to ſhew that it was not convenient to proceed any farther that Way; the Captains, Pilots, and principal Men, conſulting together what ſhould be done, thoſe that had been before for ſettling a Colony, were for turning back to find a proper Place for it.

The Captains, *Montejo*, and *Avila*, who differed in Judgment, alledged that Winter was drawing on, and Proviſions were ſcarce, for which Reaſon, and becauſe one of the Ships was leaky, it was proper to return to *Cuba*; beſides, that they were not able to maintain their Ground because the Natives were numerous and warlike, and the *Spaniards* much fatigued with being ſo long at Sea. *Grijalva* conſidering that his Inſtructions were poſitive not to ſettle, and that his Commanders oppoſed it, urging ſufficient Reaſons, thought fit to comply; and, tacking about, they arrived at the great River of *Guazacualco*, but could not enter it, the Weather preventing them. They proceeded to that of *Tanola*, which they called of *St. Antony*, where they careened the leaky Ship. In the mean time many *Indians* came from the Town, which was a League off, with Hens, Bread, and other Eatables, which they parted with for *Spaniſh* Toys; and the News being ſpread abroad, others came from *Guazacualco* and the reſt of the Neighbouring Towns, bringing Proviſions, ſome ſmall Gold Plates, and Copper Axes very bright, with the Shafts of them painted. The *Spaniards*, thinking thoſe Axes had been of pale Gold, purchaſed ſix hundred of them, and the *Indians* would willingly have parted with more.

A Soldier, whoſe Name was *Bartholomew Pardo*, went into a Temple that ſtood in the Fields, whence he took that Perfume which the *Indians* call *Copal*, or, as ſome call it, *Gum Anime*; he alſo took the Knives made of Flints, with which they ſacrificed Men, ripping open their Breaſts; and ſome Idols; all which he delivered to the Commander in chief, having firſt taken off their Ear-rings, Pendants, Plates, and Crowns of Gold, worth about ninety Pieces of Eight; but, not being able to conceal his Joy for the Booty, *Grijalva* had Notice of it, who ordered all to be taken from him; yet, being of a generous Temper, reſtored them upon paying the fifth to the King. The Ship being refitted, in forty-five Days they arrived at *Cuba* with four thouſand Pieces of Eight in Gold, beſides what *Alverado* had carried, and the Copper Axes, which, when they went to pay the fifth, thinking them to have been Gold, they found ruſty, to the Confuſion of the Purchaſers.

They put into the Port of *Matancas*, where they found a Letter from the Governor, ordering *Grijalva* to make haſte to the Port of *Santiago*, and to tell the Men that another Fleet was fitting out to return thither to make a Settlement; and that they who intended to go back ſhould remain in ſome Farms he had thereabouts. *Grijalva* made haſte to *Santiago*, where the Fleet was making ready; and when he appeared before *Velaſquez*, he had no Thanks for the Trouble he had been at; but was abuſed, becauſe he had not ſettled, though it was purſuant to his own Inſtructions; which was a great Overſight in *Velaſquez*, and ſuch an Overſight as was altogether inexcuſable; for his great Point was, to find in the firſt Place a Man capable of making ſuch a Diſcovery, and in the next, one incapable of betraying him in order to ſet up for himſelf.

There could not certainly be a more difficult, or a more uneaſy Employment, than to ſearch out ſuch a Perſon; but one would have imagined, that a Man of ſo much good Senſe as *Velaſquez* really was, would have had Wit enough to have kept him, when Experience had demonſtrated that *Grijalva* was ſuch a Man. The very thing for which he diſgraced him, ought chiefly to have preſerved him from that Fate, ſince nothing but a ſcrupulous Regard to Inſtructions could poſſibly tie down a Man who had made great Diſcoveries, from taking that Method which was moſt likely to acquire him Reputation, and to eſtabliſh at once his Fortune and Independency. But *Velaſquez*, like many other Men of good Senſe, preferred other People's Opinions to his own, and thereby loſt the Advantage which his ſuperior Talents would have given him, though it is highly probable that this Error of his might contribute more to the important Conqueſts made by the *Spaniards* in thoſe Parts than the wiſeſt Meaſures he could have taken, as the Reader will ſee at large in the enſuing Sections; but it is now time to conclude this with a few Obſervations and Remarks, which I flatter myſelf will be of ſome Uſe to the Reader.

15. The vaſt and ſurpriſing Succeſs which the *Spaniards* met with in reducing ſo many fine Iſlands, and ſuch rich and fruitful Countries under their Dominion, has united a multitude of Writers in a Notion, that they conducted their Affairs with that extraordinary Prudence and Steadineſs of Character, for which they have been always remarkable; but a little Reflection on the Facts related in this and the foregoing Sections will ſhew, that this Notion is abſolutely groundleſs, and that they acted in this Matter with as little Conduct and with leſs Judgment than could have been expected from a Nation at that time in ſo high a Reputation for Wiſdom, as they were. The Truth is, that it was the Virtue of Particulars that acquired all; and, in this Reſpect, they were indeed very fortunate, ſince few Nations could boaſt of abler Politicians, or of more expert Captains than thoſe three great Men to whom the *Spaniards* owe their mighty Empire in *America*.

The firſt was the Admiral *Columbus* who diſcovered the Iſlands, and upon whoſe Schemes thoſe Diſcoverers went who found and ſubdued the two great Empires on the Continent. The next was *Ferdinand Cortes*, and the Third, the Marquis *Pizaro*, Men of incredible Abilities, and therefore worthy of immortal Reputation. There is no doubt that their Atchievements, weighed in the Balance of Reaſon, very far exceeded thoſe of moſt of the Antients; for whereas, theſe had commonly good Tools to work with, thoſe not only did their Work but forged their Tools. To convince the judicious Reader of what I ſay, I ſhall not ſend him for Inſtances without the Limits of this Performance; for having given this Work the Title of a *Library*, there ought to be nothing wanting in it that is neceſſary to make its Subject underſtood. Let us compare then the Expedition of *Nearchus*, of which we have given the Hiſtory in our former Volume, with that of *Columbus*, let us conſider how great a Fleet, what a Number of Men, and what able Commanders he had, how ſmall a Diſcovery he made, ſailing always within Sight of Land, and only from the Mouth of the *Ganges* to the Head of the *Perſian Gulph*, yet how great a Figure does his Expedition make in the Works of the ableſt Authors of Antiquity, and what mighty Rewards were beſtowed upon him for thoſe Services, his important Diſcoveries. Yet *Columbus*, with three Veſſels, ſmaller than any of his, with ſcarce any Encouragement or Aſſiſtance from thoſe about him, made this ſurpriſing Tranſit from *Spain* to the *Weſt-Indies*, and eſtabliſhed the *Spaniards* there before his Death, in wider and more uſeful Conqueſts, than accrued to the Maſter of *Nearchus*, from his *Indian* Expedition. Let us compare the Force with which *Alexander* attacked the *Indians*, and failed of ſubduing them, with the Armies commanded by *Cortes* and *Pizaro*, and we ſhall find that the latter were beyond all queſtion, greater Conquerors, as we ſhall fully demonſtrate at the Cloſe of their reſpective Expeditions.

At preſent we mention theſe only as Proofs of the Truth of our Obſervation, that it was not the Wiſdom of the *Spaniſh* Government; but the perſonal Abilities of ſuch as were accidentally employed in their Service that brought about thoſe great Events. For, with regard to the former, we have ſeen how ill they treated the firſt Diſcoverer at Court, and how far they were from putting it in his Power to exert, even in their Service, his great Capacity to the utmoſt. After his Deceaſe, the Management of the Affairs of the *Indies* fell almoſt intirely into the Hands of the Biſhop of *Burgos*, who, of all the Stateſmen at that Court, was the leaſt fit to have been intruſted with them, and who in fact managed them in the ſtrangeſt manner imaginable. Liſtening, on the one hand, to the Propoſals of every needy Projector, as in the Caſe of the firſt Adventurers mentioned in this Section; and on the other, ſlighting the Schemes of thoſe who, by their general Knowledge of the *Indies*, were moſt likely to accompliſh great Things, and who, by their wiſe Conduct in the ſettling of their new Colonies, had, in their own Hands, a Power ſufficient to accompliſh them. Accordingly we ſhall ſee that of all the Biſhop's Inſtruments, not one ſucceeded in what he propoſed; but, on the contrary, brought themſelves to Beggary and Want, by raſhly engaging in Enterprizes every way beyond their Ability, whereas all the ſucceſsful Undertakings of the *Spaniards* were under ſuch as were employed by the Governors of Colonies, and conſequently the *Spaniſh* Miniſtry had no Right to take to themſelves any ſort of Credit from their Performances.

The only Favourites of our famous Biſhop *Fonſeca*, that made any Figure in the World, were two very bad Men, well provided with Impudence, but very indifferently furniſhed with other Talents. The firſt of theſe was *Americus Veſpucius*, whom we have already mentioned with little Credit, and whom we ſhall again have occaſion to mention with leſs. This Man, by the Intereſt of his Patron, was declared Chief Pilot of *Spain*, and to him all the Journals of Diſcoveries were communicated, from which he drew very elegant Maps, and helped out by his Fancy whatever Defects there was in his Memory, ſo that he exhibited things with a very graceful Proportion, and the only thing wanting in his Charts was a ſtrict Regard to Truth; but, however, they anſwered his Purpoſe very well, for, beſides ſecuring to him a good Place and a competent Salary; they enabled him to impoſe his Name on the new World, before he had diſcovered a Foot of it.

The other Creature of the Biſhop's that diſtinguiſhed himſelf, was *Bernard de Santa Clara*, whom he preferred to be Treaſurer of *Hiſpaniola*, under the Governor *Obando*, who was likewiſe in the Eſteem of the Biſhop, and the moſt worthy of all his Friends; the Treaſurer before mentioned, was a very indifferent Steward for the King, but acquired a very good Eſtate for himſelf, of which he was ſo proud, that, beſides the Salt for uſe he cauſed four large Salt-ſellers, full of Gold-duſt, to be ſet every Day upon his Table; which piece of Vanity being know in *Spain*, a Commiſſion was granted to inſpect this Gentleman's Accounts, and by this means it was diſcovered that he had cheated the King, or, at leaſt, was indebted to him in 80000 Peſos; which makes near 25000 Pounds in our Money. The Governor *Obando* was very ſenſible, that, when all this Man had was ſold, the King would hardly have his Due; but, to ſave the Biſhop's Credit, and his own, he bethought himſelf of a very extraordinary Expedient: He loved to paſs for a Man of ſtrict Juſtice, and therefore he ordered the Treaſurer's Effects to be ſet up to Auction; this was, in all appearance, very fair, and no Exception could be taken at it; but the Governor, when the Lots came to be put up, encouraged People to bid conſiderably more than they were worth, telling them that he would warrant it a good Bargain; they, to merit his Favour and Protection, bidding upon each other; the whole of his Effects were ſold for 96000 Peſos, ſo that the King had his Debt, and the Treaſurer a very pretty Fortune to begin the World with again. Such were the Arts, ſuch the Intrigues, of thoſe Men, who had oppreſſed the old Admiral, and ſuch the little dirty Contrivances by which they hid their own Failings.

Yet theſe things were done under the Reign of King *Ferdinand*, eſteemed one the wiſeſt Monarchs of his time; and things went rather worſe under the Emperor *Charles* V. though he was, certainly, in every Reſpect, as great a Prince as ever ſat upon the *Spaniſh* Throne. The Inference I would make from thence, is, that all Events, and under all Adminiſtrations, Diſcoveries ought to be attempted and encouraged, becauſe they carry in themſelves ſuch Incitements to compleat them, that they ſeldom or never fail of proving beneficial in the End, whatever Miſtakes there may fall out in the Management of them at the beginning.

Some aſcribe this to Chance, others with more Senſe as well as Decency, to Providence. But, however, certain it is, that great Occaſions provoke, if they do not produce, great Spirits; and when once the Way is open, and two or three Inſtances have ſhewn the World that many things are practicable, that for ſeveral Ages were thought impoſſible, mighty things are performed; for Emulation is a noble Principle, and one of the greateſt Secrets in Government is to excite it; for it is rarely ſeen that any thing meets either with Favour from the Great, or with popular Encouragement, but it is ſuddenly carried to a great Degree of Perfection. When once ſuch a Spirit is raiſed, even the moſt diſaſtrous Accidents cannot extinguiſh it; the Numbers of *Spaniards* that periſhed in the firſt Attempts on the Continent, by Shipwreck, Famine, and Diſeaſes; the unfortunate Ends of *Hojeda*, *Nicueſſa*, and *Cordova*, had no bad Effects in deterring others; for as all agreed there were Gold and Pearls to be met with in thoſe Parts; the Thirſt of Gain in ſome, and the Thirſt of Glory in others, ſoon overcame the Terror of ſuch Examples, which at firſt Sight, one would have thought impoſſible to have removed; beſides, their wanted not ſome who diverted the blame of all theſe Miſcarriages, from the Difficulty of the Enterprize, on the Imprudence or ſome other Imperfection of the Commander; and, as Slanders always find an eaſy Belief, ſo the Imputations that fell upon the Dead, ſerved to encourage the Living; and Men were eaſily brought to think that either their ſuperior Capacities, or better Fortune, would carry them through, notwithſtanding former Adventurers had failed.

To theſe we may add ſeveral concurring Circumſtances, which gave Life and Vigour to theſe Undertakings, and which, for the Sake of Brevity, we ſhall reduce under three general Heads. Firſt then, the Marriage of Don *Diego Colon*, to *Donna Maria de Toledo*, induced a great many young Gentlemen, and ſome Ladies of good Families, to tranſport themſelves to *Hiſpaniola*, which proved of incredible Service to the new Colony, as we may eaſily conceive, if we reflect on the *Spaniſh* Temper, and that it had in it, formerly, a much ſtronger Tincture of the Heroic, or if you will, romantic Spirit, of which it ſtill retains enough; and which, of all others, was the fitteſt for promoting ſuch kind of Exploits. The ſecond was the eſtabliſhing a ſovereign Tribunal at *Santo Domingo*; the Members of which having large Salaries; ſome conſiderable Perſons, and thoſe too of a more advanced Age, were thereby engaged to accept of theſe Employments; which carried over likewiſe a new Train of young People, in Quality of their Dependants, and there being a continual Struggle for Power between this new Tribunal, or as the *Spaniards* ſtile it, the *Royal Audience of Santo Domingo, and the Admiral*; this created ſuch a Jealouſy and Competition amongſt the Dependants on both Parties, as had very favourable Effects on Affairs in general, and greatly promoted the Succeſs of the Colony; how much ſoever it might perplex or diſturb their Superiors, by the Trouble it occaſioned. The third and laſt that we ſhall mention, was the Diſtaſte taken, eſpecially at his firſt coming to the Crown, againſt the Emperor *Charles*, on account of his Partiality in favour of his Countrymen, the *Flemings*, which induced the Flower of the *Spaniſh* Gentry to think rather of advancing their Fortunes in the *Indies*, whither none but *Spaniards* could go, than their Credit in his Service; whom they judged to be neither over-willing to diſcern their Merit, nor over-ready to reward it.

Theſe Obſervations as they ariſe naturally from what has been before related, ſo they will ſerve greatly to illuſtrate the following Sections; in which we ſhall exhibit to the view of the Reader, as great Inſtances of Courage and Conduct; of civil Policy, and military Skill, as are to be met with in any Hiſtory whatever; and for the Honour of the *Spaniards* it muſt be acknowledged, that how ill ſoever thoſe Heroes who conquered *America* were treated by their Stateſmen; the learned Pens of that Nation have done as much Juſtice to their Labours, as themſelves could wiſh, and have not ſuffered any of their Actions to appear with leſs Luſtre to Poſterity in their Writings, than the Recital of ſuch great and glorious Performances deſerved. But it is now time to quit theſe Reflections, and to reſume the Thread of our Hiſtory, which leads us to ſhew on what Grounds, in what manner, and with what Force the Conqueſt of the great Empire of *Mexico* was undertaken.

SECTION VII.

The Expedition of HERNAN CORTES *for the Reduction of* New-Spain, *from the Time of his being appointed to that Command, unto his being obliged to return to the Iſland of* Cozumel.

1. *The Reſolution taken by* Diego Velaſquez, *Governor of* Cuba, *to purſue the Diſcoveries and Settlements*
of New-Spain, *and the Meaſures taken for equipping a third Squadron for this Expedition.* 2. *The*
Character of Cortes, *who was appointed Commander in chief, and the manner in which he attained that*
Command by the Nomination of Velaſquez. 3. *Departure of the Fleet from* St. Jago de Cuba, *and the*
Reaſons why Velaſquez *laboured to deprive* Cortes *of the Command he had given him.* 4. *The Attempts*
made by Velaſquez *to carry this Deſign of his into Execution, and the Methods which were ſucceſsfully*
uſed by Cortes *to overthrow and defeat them.* 5. Cortes *takes upon him the Command, notwithſtanding*
Velaſquez *recalled his Commiſſion, and proceeds in his Voyage with the univerſal Applauſe of all who are*
engaged in the Deſign. 6. *Arrives at the Iſland of* Cozumel, *and remedies all the Diſorders which had*
been occaſioned by the coming thither of a Part of his Fleet before him, under Peter Alverado. 7. *Sails*
from thence with a Deſign of proſecuting his Expedition, but finds himſelf obliged to return thither with
his Fleet. 8. *There comes thither, during his ſtay, one* Jerom de Aguilar, *a* Spaniard, *long a Priſoner*
in Yucatan, *who gives a large Account of that Country, and of its Products.* 9. *Obſervations and Re-*
marks on the foregoing Section, with ſome Reflections on the political Character of Cortes.

1. THE Diſcoveries made on the Continent, under the Direction of thoſe employed by *Diego Velaſquez*, made a prodigious Noiſe over all the *Weſt-Indies*, and multitudes there were who ſhewed a Readineſs to hazard their Lives, and embark their Fortunes for the Proſecution of this Deſign. We have, in the former Section, ſhewn how this Country, when firſt diſcovered, came to be called *New Spain*; for the Soldiers obſerving to one another the Reſemblance between the Soil and Climate of this ſtrange Land, with thoſe of their own, the Compariſon made ſuch an Impreſſion upon their Minds, that they cried out one and all, a *New Spain*, a *New Spain*; ſo that while other Colonies derived their Names either from the miſunderſtanding of *Indian* Words, or from the arbitrary Pleaſure of the firſt Diſcoverers, this was impoſed by the Voice of the People.

But the great Buſineſs was to ſecure and ſettle this new found Country, and that immediately and without Delay; for *Velaſquez* ſaw plainly, that if he did not proceed in his Deſign, it would be undertaken, either from other Colonies, or by Perſons commiſſioned directly from *Old Spain*; and it was the Apprehenſion of this that made him ſo very angry, though with very little Reaſon, at the Conduct of his Couſin and Creature, *John Grijalva*, in not making a Settlement there, though in expreſs Compliance with his own Order. His own Ambition hindered him from diſtinguiſhing another's Obedience; and the vaſt Hopes he had formed to himſelf, from the Diſcovery and Conqueſt of *New Spain*, would not permit him to receive any Excuſe from him, who, as he thought, had defeated them. On the other hand *Grijalva* was extremely modeſt, which hindered him from defending himſelf as he might have done; ſo that he contented himſelf with ſhewing the Inſtructions he had received, and inſiſting that his Behaviour ſhould be tried by them; which *Velaſquez* looked upon as a tacit Imputation on himſelf; he applied all his Care, however, to the refitting the Veſſels employed in the laſt Expedition, and equipping both them and others, for a new one, in which he ſucceeded very happily, and had in a ſhort time, ſuch a Proſpect of a Fleet, capable of carrying into execution the Deſigns he had formed, that he directed his Agents at the Court of *Spain*, to inſiſt upon very high Terms, particularly that he ſhould be declared Lord Lieutenant of the Countries ſubdued by his Direction, and at his Expence.

His Preparations being in ſuch Forwardneſs it was abſolutely neceſſary that he ſhould make choice of ſome body to act in quality of General and Commander in chief: And, in this he found himſelf under very great Difficulties. The inferior Officers, and even the People in general, who were to make the Voyage, were very deſirous of their old Commander, *John Grijalva*; but to this, he would by no means agree, either from an obſtinate ill grounded Perſuaſion of his want of Capacity, or, becauſe he was afraid of truſting a Man whom he had injured in ſo high a Degree. When his Friends and Counſellors ſaw this, they recommended ſeveral others, rather in Compliance with their own Intereſt and Notions, then from a juſt Eſteem of their Abilities, and a due Notion of the great Danger there was in committing the Conduct of ſo important an Enterprize, to one who might prove unequal to the Taſk.

This gave exceſſive Uneaſineſs to *Velaſquez*, who was a better Judge of Men than thoſe who adviſed him, and who had probably been more ſucceſsful in his Choice, at leaſt with regard to his own Intereſt, if he had acted without any Advice at all.

At laſt, when the Seaſon for ſailing approached, and this Affair would admit of no longer Delay, *Amador de Laris*, the King's Treaſurer, and *Andres de Duero*, his Secretary, took upon them to mention *Ferdinand*, or, as the *Spaniards* call him, *Hernan Cortes*, but in a very artful Way; for they told the Governor, that in doing this, they had not the Service of their Friend ſo much at Heart, as the Good of the Expedition: and the Character they gave him was ſo modeſt, and ſo much ſhort of the Truth, that *Velaſquez*, who knew him as well as they did, was extremely ſenſible that they did not endeavour to impoſe upon him; and therefore, from the very beginning, he liſtened readily to their Recommendations; he knew very well, that not only great, but even contrary Talents were requiſite in the Perſon he wanted, who of Neceſſity muſt be a Man of high Spirit, capable of acting from his own Lights in all Caſes, without adhering too ſtrictly to Inſtructions, and at the ſame time it was to be wiſhed that he ſhould preſerve ſuch a Regard for the Perſon who employed him, as not to be tempted by any Succeſs whatever to throw off his Dependance. Hard Qualities theſe to be found, but Qualities about which the wiſeſt Man might be eaſily miſtaken.

2. Before we go farther, it will be proper to ſay who *Hernan Cortes* was, and through what variety of Events his happy Deſtiny led him to atchieve the Conqueſt of *New Spain*. He was born in *Medillin*, a Town of *Eſtremadura*, Son of *Martin Cortes*, of *Monroy*, and *Donna Catalina Pizaro Altamarino*, Names that ſufficiently declare the Nobility of his Extraction. In his Youth he for ſome time applied himſelf to Letters, and was two Years at *Salamanca*, which were ſufficient to make him ſenſible that the Application of a ſtudious Life, was contrary to his Temper. He returned home, reſolved to follow the Wars, and his Parents pointed out to him *Italy*, but when he came to embark, he fell dangerouſly ill, by which Accident he found himſelf obliged to change his Intention, though not his Profeſſion, and therefore he reſolved to go to the *Indies*, where the War, at that time, was carried on with a View to Glory, rather than to Wealth. He embarked with the Approbation of his Parents, in the Year 1504; and carried Letters of Recommendation to Don *Nicholas de Obando*, great Commander of the Order of *Alcantara*, his Kinſman, and then Governor of the Iſland of *St. Domingo*.

He was no ſooner arrived there, and known, than he gained general Eſteem, and was ſo kindly received by the Governor, as to be immediately admitted into the Number of his Friends; but all theſe Favours were not ſufficient to divert his Inclination to Arms, for he was ſo uneaſy at the Inaction wherein he found that Iſland which the *Spaniards* now poſſeſſed, without any Oppoſition from the Natives, that he deſired leave to go and ſerve

in

is the Iſle of *Cuba*, where the War was ſtill carried on; and having gained the Conſent of his Kinſman, he endeavoured to ſignalize himſelf in that War, by Valour and Obedience, which are the firſt Virtues of a military Profeſſion. He very ſoon acquired not only the Reputation of a valiant Soldier, but alſo that of an able Commander; diſtinguiſhing both his Courage in Action, and his Capacity in Council. *Cortes* was well made, of an agreeable Countenance, and, beſides theſe common natural Endowments, he was of a Temper which rendered him amiable; for he always ſpoke well of the Abſent, and was pleaſant and diſcreet in his Converſation. His Generoſity was ſuch, that his Friends partook of all he had, without being ſuffered by him to publiſh their Obligations.

He married in that Iſland, *Donna Cathalina Suarez Pacheco*, a noble and virtuous young Lady. This Courtſhip brought him under many Difficulties, by the Interfering of *Diego Valeſquez*, who made him Priſoner till ſuch time as all Differences were adjuſted; and then *Velaſquez* gave her to him in Marriage, after which they were intimate Friends, and the Governor, in a little Time, gave him a Diſtribution of *Indians*, and the Poſt of *Alcade* or chief Magiſtrate in the Town of *St. Jago*; an Employment uſually conferred on thoſe who had diſtinguiſhed themſelves in the Conqueſt of thoſe Countries. In theſe Circumſtances was *Herman Cortes*, when *Amador de Laris*, and *Andres de Duero*, propoſed him for the Conqueſt of *New Spain:* And they did it with ſo much Addreſs, that the next Time they waited upon *Diego Velaſquez*, furniſhed with freſh Reaſons to enforce their Recommendation, they found him reſolved on *Cortes*, and ſo poſſeſſed with the Advantages of entruſting the Undertaking to his Care, that they changed their premeditated Arguments into Flattery; and only endeavoured to oblige him by applauding a Reſolution ſo agreeable to their own Wiſhes. They agreed with the Governor that it was convenient immediately to publiſh the Choice, in order to put a Stop, at once, to all farther Pretenſions; and *Andres de Duero* was not ſlow in the Diſpatch of the Commiſſion.

Cortes received his new Charge from *Velaſquez* with great Expreſſions of Reſpect; being as ſenſibly affected with the Confidence the Governor repoſed in him, as he was afterwards with his Diſtruſt. The Reſolution was made public, and well received among thoſe who deſired to ſee that Affair brought to a Concluſion; but occaſioned much Diſcontent among his Rivals for the Employment. Thoſe who had declared themſelves with the greateſt Coldneſs, were the Relations of *Diego Valeſquez*; who made very ſtrong Efforts to raiſe in the Governor a Diſtruſt in *Cortes*. 'Tis reported, that *Diego Valaſquez* walking out with *Cortes*, and with his Friends and Relations, a pleaſant crack-brained Fellow, with whoſe Whimſies he uſed to be diverted, ſaid to him, Thou haſt done well Friend *Diego*; ſhortly there will be Occaſion for another Fleet to go in purſuit of *Cortes*. But *Diego Velaſquez* ſtood firm to his Reſolution, and *Cortes* wholly applied himſelf to haſten the Preparations for his Departure. The firſt Step, was to erect his Standard with the Sign of the Croſs; having this Inſcription in *Latin*, *Let us follow the Croſs, for with this Sign we ſhall overcome.*

He appeared in the Habit of a Soldier, which became his Perſon well, and ſuited his Inclinations better; he employed his own Stock liberally, and what he could borrow from his Friends, in the buying of Proviſions, Arms, and Ammunition, to haſten the Departure of the Fleet; endeavouring, at the ſame Time, to draw together a Number of Soldiers for the Expedition, in which he did not find much Difficulty; for, the very Name of Enterprize, and the Fame of the Captain, were ſo great that, in a few Days, were liſted three hundred Soldiers; among whom, were *Diego de Ordaz*, the principal Confident of the Governor, *Franciſco de Morla*, *Bernard Diaz del Caſtillo* (who has written the Hiſtory of this Conqueſt) and other Gentlemen. The Time for their Departure being come, Orders were given for the Soldiers to embark, which they did in the Day-time, the People all running to the Sight; and at Night, *Cortes*, accompanied by his Friends, went to take leave of the Governor, who embraced him in a very friendly Manner, and the next Morning accompanied him to the Sea-ſide, and ſaw him embark. Small Circumſtances, and of little Importance, if ſome had not wrote, without any manner of Reaſon, that he called the Soldiers together from their Houſes, at Midnight, embarking with them by ſtealth; and that *Diego Velaſquez* going out after him in the Morning, *Cortes* came up to him in a Boat well armed, and gave him to underſtand, in a diſreſpectful Manner, that he no longer had regard to his Orders.

3. The Fleet weighed from the Port of *St. Jago*, in *Cuba*, the 18th Day of *November*, 1518; and, having coaſted along the North-ſide of the Iſland, ſailed towards the Eaſt, and in a few Days arrived at the Port of *la Trinadad*, where *Cortes* had ſome Friends, who gave him a very kind Reception. With this Reinforcement of Gentlemen, and an hundred Soldiers who came from the two Settlements, the Strength of the Fleet was conſiderably augmented; and, at the ſame Time, Care was taken to buy up Proviſions, Arms, and ſome Horſes. *Cortes* aſſiſted all who wanted with his Money; but ſcarce had left the Port of *St. Jago*, when his Enemies began to cry out againſt him, talking of his Diſobedience, after the Cuſtom of Cowards, who always attack the Abſent.

Diego Velaſquez hearkened to their Diſcourſe, and though he ſeemed to be diſpleaſed, they diſcovered in his Mind Jealouſy, eaſy to be worked up to an entire Diſtruſt; to which end they made uſe of *Juan Millan*, who, notwithſtanding he was very ignorant, pretended to the Knowledge of Aſtrology. This Man, ſet on by others, having engaged *Velaſquez* to Secrecy, acquainted him in myſterious Terms, that this Expedition would have a fortunate and unfortunate Event, giving him to underſtand that he had learned ſo much from the Stars; and though *Diego Velaſquez* was a Man of ſufficient Senſe to diſcern the Vanity of ſuch Prognoſtications, nevertheleſs as his Foible was Jealouſy, this had ſuch an Effect, that notwithſtanding he deſpiſed the Aſtrologer, he began to be affected by what he ſaid. From ſuch ſlight Beginnings ſprang the firſt Reſolution which *Diego Velaſquez* took to break with *Cortes*, by depriving him of the Command of the Fleet; he diſpatched immediately two Couriers to *la Trinadad*, with expreſs Orders to *Franciſco Verdago* his Couſin, to diſpoſſeſs him of his Captain Generalſhip, in a judicial Way, as ſuppoſing his Commiſſion now revoked, and another Perſon named in his Room.

Cortes was quickly informed of this Accident, and without being diſcouraged at the Difficulty of the Remedy, ſhewed himſelf to his Friends and Soldiers, that he might know in what Manner they would reſent the Injury done to their Captain, and how far he might depend upon the Juſtice of his Cauſe, by the Judgment they paſſed upon it: He found them all not only in his Intereſt, but reſolved to defend him from ſuch an Injury, though it ſhould carry them to the laſt Extremity of taking Arms in his Defence; and though *Diego de Ordaz*, and *Julian Velaſquez de Leon* were leſs warm, as depending more upon the Governor; they were eaſily brought to approve that, which they had not Power to hinder. Being thus ſecure, he went to viſit the Alcade. He laid before him the Danger to which he might expoſe himſelf in ſupporting ſuch a Piece of Injuſtice, by diſguſting ſo many Perſons of Diſtinction as followed him; and how much the Fury of Soldiers was to be feared, whoſe Affections he had gained, that he might the better ſerve *Diego Velaſquez*; and that he already found it difficult to keep them within the Bounds of Obedience to him.

Franciſco Verdago approved his Reaſons from a Principle of Generoſity, and offered not only to ſuſpend the Execution of the Order, but to write to *Diego Velaſquez* to engage him to deſiſt from a Reſolution, which was now impracticable; *Diego de Ordaz*, and the reſt who had any Intereſt with the Governor, offered to do the ſame, and wrote immediately. *Cortes* likewiſe wrote to him, complaining of his Diſtruſt, without ſhewing how far he was diſguſted, or omitting his ordinary Reſpect.

Theſe Meaſures taken to quiet the Mind of *Velaſquez*; *Cortes* reſolved to proſecute his Voyage, and, ſending *Pedro Alverado* by Land, with a ſtrong Party of Soldiers, to take care of the Horſes, and raiſe more Men in the Settlements upon the Road, he ſailed with the Fleet for the *Havanna*.

The Ships parted from *la Trinidad* with a favourable Wind; but, at the coming on of the Night, they ſeparated from the *Capitana*, where *Cortes* was on board, without obſerving, as they ought to have done, the Courſe he ſtood, or perceiving the Error of the Pilots, until the Day diſcovered it; but being now far advanced, they continued their Voyage, and arrived at the *Havanna*, where the Soldiers landed. They were kindly entertained by *Pedro de Barba*, at that time Governor of the *Havanna*, under *Velaſquez.* They were much concerned that they had not waited for their Captain, but their Diſcourſes on that Subject went no farther than to furniſh themſelves with Excuſes againſt his Arrival; yet perceiving that he ſtaid longer than they thought it poſſible he could, unleſs ſome Misfortune had befallen him, they began to be uneaſy and divided in their Opinions: Some were for ſending two or three Veſſels in Search of him; ſome propoſed to name a Commander in Chief in his Abſence, but others thought ſuch a Propoſition unſeaſonable; however, as nobody commanded, every one gave his Verdict, and nothing was done.

He who moſt inſiſted upon naming a Commander, was *Diego de Ordaz*; who, as a Confident of *Velaſquez*, expected to be preferred to the reſt; and thought, that by gaining of this Point, he ſhould ſtand fair to obtain that Poſt from *Velaſquez*. But at laſt, after a Diſpute of ſeven Days, *Cortes* ſafely arrived with the *Capitana.* His Delay was occaſioned by the Fleet's paſſing over ſome Flats, which lie between the Harbour of *la Trinidad* and Cape *St. Anthony*, at a ſmall Diſtance from the Iſle of *Pines*; where the *Capitana*, as being the largeſt Ship, ſtruck, and was in Danger of being over-ſet.

4. This Accident ſerved to raiſe his Reputation; for animating his Men on the View of the Danger, he gave ſuch Orders as were neceſſary, with great Preſence of Mind, and without Confuſion. His firſt Care was to put out his Boat, and take out the Ship's Lading, which was carried to a little ſandy Iſland; by which Means he ſo far lightened her, as to ſet her afloat; after which, getting clear of the Shole, he took her Lading on board again, and purſued his Courſe; having thus ſpent the ſeven Days he was detained, and thereby much advanced his Reputation. *Pedro de Barba* lodged him in his own Houſe, and he was received with great Acclamations by his Soldiers, whoſe Numbers immediately increaſed; ſeveral of the Inhabitants and Gentry entering into the Service; among theſe were *Franciſco de Montejo*, who was afterwards the King's Lieutenant of *Yucatan*; *Diego de Soto del Toro*, *Garcia Caro*, *Juan Sedo*, and other Perſons of Diſtinction and Fortune, who added very much to the Reputation of the Enterprize.

Theſe Preperations took up ſome Days, but as *Cortes* knew not how to be idle, he commanded the Artillery to be brought on Shore to be cleaned and proved; ordered the Cannoniers to obſerve, exactly, how far each Gun would carry; and, as there was great Plenty of Cotton thereabouts, he directed the making a ſufficient Quantity of defenſive Arms. Theſe were a kind of Quilts in the Form of great Coats, which were called *Eſcaupilles*: Neceſſity inventing what Experience afterwards approved. It being found that Cotton ſtitched between two Cloths was a better Defence than Iron againſt the Arrows and Darts of the *Indians*; for they loſt their Force, by the weak Reſiſtance they met with; and were likewiſe hindered from glancing from one Man to another. At the ſame Time he exerciſed his Soldiers in the Uſe of their Fire-arms and Croſs-bows, and the Management of their Pikes: He taught them how to form and file off in Order; how to charge, and how to ſecure a Poſt: Inſtructing them both by Voice and Example, in the Rudiments of War, after the Manner of Antiquity; which Practice, in Time of Peace, was in ſo much Eſteem among the *Romans*, that from this kind of Exerciſe they gave their Armies the Name of *Exercitus*.

With the like Diligence and Ardour he went on with the reſt of his Preparations; but when every one was rejoicing at the near Approach of the Day appointed for their Departure, *Gaſpar de Garnica*, a Servant of *Velaſquez*, arrived at the *Havanna* with freſh Orders to *Pedro de Barba*, expreſly enjoining him to diſpoſſeſs *Cortes* of the Command of the Fleet, and to ſend him Priſoner under a good Eſcort; telling him how highly he had been diſpleaſed with *Franciſco Verdago*, for letting him go from *la Trinidad*: And withal, giving him to underſtand how much he would riſque in not complying with his Orders. He likewiſe ſent to *Diego de Ordaz*, and to *Juan Velaſquez de Leon*, to be aſſiſting to *Pedro de Barba* in the Execution of his Commands. But *Cortes* was advertiſed of what was doing from ſeveral Hands, and even from *Garnica.* They warned him to take care of himſelf, ſince he, who firſt entruſted his Enterprize to his Conduct, was now going to diſcard him, in a Manner highly injurious to his Honour, and who freed him from the Scandal of Ingratitude, by forcing from him the Favour for which he ſtood obliged. *Cortes*, though a Man of great Spirit, could not help being ſhocked with this new Attempt, which touched him the more ſenſibly, the leſs it was expected; for he thought *Velaſquez* had been ſatisfied with the Aſſurances that had been given him by all, in their Anſwer to his firſt Orders which came to *la Trinidad*; but being convinced of his Obſtinacy, he began with leſs Temper to think of taking care of himſelf. He acknowledged that *Velaſquez* had expended ſome Money in fitting out the Fleet, but the greateſt Part of the Charge was borne by himſelf and his Friends, and almoſt all the Soldiers were raiſed upon their Credit: He was alſo concerned for the Enterprize, which he foreſaw would entirely miſcarry if he quitted it; but that which moſt ſenſibly affected him, was the Wound given to his Honour, which is dearer than Life itſelf; and upon theſe Reflections *Cortes* took his firſt Reſolution of breaking with *Velaſquez*, judging that it was now no longer a Time to ſmother his Reſentment, but reſolved to provide for himſelf, and make Uſe of the Force he was Maſter of, as Occaſion ſhould require. To this end, before *Pedro de Barba* had determined to publiſh the Order he had againſt him, he made haſte to ſend away from the *Havanna Diego de Ordaz*, whoſe Fidelity he ſuſpected on Account of the Efforts he had made to be choſen Commander in chief in his Abſence. He therefore commanded him to embark immediately on board one of the Veſſels, and to make the beſt of his Way to *Guanicanico*, a Settlement ſituate on the other Side of the Cape *St. Antony*, to take in ſome Proviſions, which he had directed to be carried to that Place, and there to wait his Arrival with the reſt of the Fleet.

Cortes aſſiſted in putting this Order in Execution, with his uſual Diligence and Calmneſs, and by this Means got quickly rid of a Perſon who might have given ſome Oppoſition to his Deſign. He went then to viſit *Juan Velaſquez de Leon*, whom he eaſily brought over to his Intereſt; being himſelf not a little diſpleaſed with the Proceedings of his Relation, and withal, more tractable and of leſs Artifice than *Diego de Ordaz*. Having taken theſe Precautions, he ſhewed himſelf to the Soldiers, acquainting them with the new Diſaſter that threatened him. They all offered him their Services, agreeing in their Reſolution of aſſiſting him, but differing in the Manner of expreſſing themſelves. But *Pedro de Barba*, apprehending the ill Conſequences of not appeaſing this Tumult in Time, went to *Cortes*, and, appearing publickly with him, quieted all in a Moment, by declaring aloud that he did not deſign to execute the Order of *Velaſquez*, or to have any Share in ſo great and ſo unprovoked an Injuſtice.

This turned all their Threats into Acclamations; and he preſently ſhewed the Sincerity of his Intentions by publickly diſpatching *Gaſper de Garnica* with a Letter to *Velaſquez*; in which he told him that this was not a Time to ſtop *Cortes*, who was too well attended to let himſelf be ill treated, or to be reduced to Obedience by Violence: he repreſented to him in the ſtrongeſt Terms, the Ferment his Order had occaſioned among the Soldiers, and the Danger the Town had been in by the Commotion, and concluded his Letter with adviſing him to regain *Cortes* by Acts of Friendſhip, by adding new Favours to thoſe he had already beſtowed, and relying on his Gratitude for what could not be compaſſed either by Perſuaſion or by Force.

5. A Brigantine of moderate Burden having joined the ten Veſſels which compoſed his Fleet, *Cortes* diſtributed his Men into eleven Companies, putting one on board each Veſſel; and named, for Captains, *Juan Velaſquez de Leon*, *Alonſo Fernandez Portocarrero*, *Franciſco de Montejo*, *Chriſtoval de Olod*, *Juan de Eſculante*, *Franciſco de Mirla*, *Pedro de Alverado*, *Franciſco Saucedo*, and *Diego de Ordaz*, who he had not ſent out of the Way with an Intention to forget him, nor was he willing to diſoblige him, by not giving him an Employment. He reſerved for himſelf the Command of the *Capitana*, and intruſted the Care of the Brigantine to *Gines de Mortes*. The Command of the Artillery he beſtowed upon *Franciſco de Orozco*, a Soldier, who had ſignalized himſelf in the Wars in *Italy*; and choſe for his chief Pilot *Antonio de Alaminos*, a Man of Experience in thoſe Seas, having ſerved in the ſame Quality in the two Voyages of *Franciſco Hernandez de Cordova*, and *Juan de Grijalva*.

He drew up Inſtructions for his Officers, wherein, with ſingular Foreſight, he provided againſt Contingencies; and the Day of Embarkation being come, they celebrated a Maſs for the Holy Ghoſt with great Solemnity, at which all the Soldiers very devoutly aſſiſted, recommending to God the Beginning of an Enterprize, the Succeſs of which they expected from his Divine Aſſiſtance; and *Hernan Cortes*, as the firſt Act of his Command, gave the Word *St. Peter*, thereby acknowledging him the Patron of this Expedition as he had been of all his Actions from his Childhood. After which he ordered *Pedro de Alverado* to ſail for the North Coaſt, in Search of *Diego de Ordaz* in *Guanicanico*, and, after they were joined, to wait for the Fleet at Cape *St. Antonio*. The reſt of the Veſſels had Inſtructions to follow the *Capitana*, and, ſhould they be ſeparated by contrary Winds, or any other Accident, to ſtand for the Iſle of *Cozumel*, diſcovered by *Juan de Grijalva*, which was but little diſtant from the Land they were in Search of, and where *Cortes* purpoſed to conſider and reſolve on what ſhould be moſt neceſſary for the Proſecution of their Enterprize.

In fine, they departed from the *Havanna* the 10th of *February*, 1519. The Wind at firſt was favourable, but did not long continue ſo, for at Sun-ſet there aroſe a furious Storm, which put them in great Diſorder; and when the Night came, the Ships were obliged to ſeparate, that they might not run foul of each other, and to put right before the Wind. The Ship that *Franciſco de Mirla* commanded ſuffered moſt, a Break of the Sea carrying away the Rudder, whereby he was in great Hazard of being loſt; but the Storm ended with the Night, and as ſoon as they had Light enough to diſtinguiſh Objects, *Cortes* was the firſt who came up with the Ship in Danger; the reſt followed his Example, and the Damage ſhe had ſuffered was ſoon repaired. At this Time *Pedro de Alverado*, who was gone in Search of *Diego de Ordaz*, diſcovered, by Day-break, that the ſame Storm had forced him into the Gulph a great Way farther than he imagined; for, in order to keep clear of the Shore, he had been obliged to put out into the open Sea, as leaſt dangerous. The Pilot found by his Compaſs and Chart, that he was fallen very far from the Courſe preſcribed to him, and was at ſuch a Diſtance from Cape *St. Antonio*, that his Return would have been very difficult; wherefore he propoſed it, as moſt adviſeable, to ſail directly for the Iſle of *Cozumel*: *Alverado* left it to his own Choice, repreſenting to him the Order of *Cortes*, after ſuch a Manner as looked as if he diſapproved it.

Hereupon they continued the Voyage, and arrived at the Iſland two Days before the Fleet. They landed with a Deſign to lodge themſelves in a ſmall Town near the Coaſt, well known to the Captain and ſome of the Soldiers ſince the Voyage of *Grijalva*, but they found it deſerted; for the *Indians*, upon the firſt Notice that the *Spaniards* were landed, abandoned their Houſes, retiring farther into the Country. *Pedro de Alverado* was a young Man of Spirit and Valour, well qualified where he received Orders, but of two little Experience to give them. He had a miſtaken Notion, that while the Fleet was coming, any thing but Inaction would be a Virtue in a Soldier, and therefore ordered his Men to march, and to take a View of the inner Part of the Iſland; and at a little more than a League Diſtance they found another Town forſaken in the ſame Manner, but not ſo entirely unfurniſhed as the former, for there were ſome Cloths and Proviſions, which the Soldiers ſeized as Spoils of an Enemy; and in a Temple of one of their Idols they found many Jewels which ſerved to adorn it, and ſome Inſtruments for ſacrificing, made of Gold mixed with Copper, which, though of ſmall Value, they took away. This Expedition did by no means promote the Service they were upon, but, on the contrary, frighted the *Indians*, and croſſed the Deſign of gaining their Friendſhip. *Pedro de Alverado* grew ſenſible that he had made a falſe Step, and retired to his firſt Poſt, having taken three Priſoners, two Men and one Woman, who ſurrendered without any Oppoſition.

6. The next Day *Cortes* arrived with the whole Fleet, having ſent to *Diego de Ordaz*, at Cape *St. Antonio*, to join him; ſuſpecting, as it proved, that the Storm would hinder *Alverado* from executing his Orders, and though inwardly well pleaſed to find him there in Safety, he commanded the Pilot to be impriſoned, and reprimanded the Captain very ſeverely, for not purſuing his Inſtructions, as well as for his Preſumption in marching up and down the Iſland, permitting his Soldiers all the while to rob and plunder the Inhabitants.

He did all this publickly, delivering his Reproof in a ſet Speech, which not only contained his Sentiments, but his Reaſons alſo why he thought it ſo great a Fault, inaſmuch as it tended to leſſen the Reputation of the *Spaniards*, and to defeat the Deſign of the whole Voyage. To repair this Miſtake, however, as well as he could, he immediately ſent for the three Priſoners, and, having ſet them at Liberty, cauſed both their Gold and their Cloths to be reſtored to them, and then, joining his own *Indian*, *Melchior*, who was the only Interpreter he had, his Companion *Julian* being dead, he ſent them away with a great many Preſents for their Cazique, with Orders to aſſure them, that he highly diſapproved of whatever had been done to their Prejudice; and that he was firmly reſolved to do every thing in his Power to merit their Friendſhip. To prevent any new Diſputes, which he thought it his Intereſt to avoid, he drew down his Forces to the Sea-ſide, and, having encamped them there for three Days, he thought fit to make a general Review; upon which it appeared, that this mighty Army with which he was to undertake the Conqueſt of the *Mexican* Empire, conſiſted of no more than Five hundred and eight Soldiers and Officers, Sixteen Horſe, and of thoſe who did not belong to the Army, two Chaplains and one hundred and nine Pilots, Mariners, and Men of other Profeſſions. To theſe he made a long Speech, in which he repreſented to them, that Diſcipline was of far greater Advantage than Numbers, exhorting them to obey his Orders punctually, and promiſing that his Example ſhould ever give Weight to his Authority.

He had ſcarce made an End of his Oration before Intelligence was brought him, that a conſiderable Number of *Indians* were approaching, divided into ſeveral Corps, and without Arms: He drew up his Men, however, in Order of Battle, and commanded them to remain under Arms, till it ſhould appear what it was thoſe People aimed at. The *Indians* no ſooner came in Sight, than, gazing attentively upon the *Spaniards*, they remained for ſome Time without Motion, only whiſpering and conſulting among themſelves what they had beſt to do. At length, perceiving that no Hoſtilities were offered, they advanced boldly on a ſudden, and, mingling themſelves with the Soldiers, preſented them with Refreſhments, and from that Time continued a friendly Correſpondence, without ſhewing any Signs either of Terror or Surprize; the Reaſon of this was, That having in their Iſland an Idol univerſally reverenced by all the neighbouring Nations, they were accuſtomed to ſee People of different Countries, Habits, and Languages, which either hindered them from being ſo much aſtoniſhed, as other *Indians* were, or elſe taught them better to conceal their Fear.

At Night they all retired to their Houſes, and the next Day the principal Cazique of the Iſland came to viſit *Cortes* with a numerous Equipage, delivering his Embaſſy and Preſent himſelf. The General received him with great Courteſy, and by his Interpreter returned Thanks for the Viſit, with an Offer of his Friendſhip and that of his Followers. To which the Cazique replied, That he accepted the Friendſhip offered, as a Man who knew how to preſerve it. One among the *Indians* who accompanied him was heard to repeat, after a bad Manner, the Name of *Caſtilla*, and *Cortes*, whoſe Attention nothing could divert from his Point, obſerved the Word, and commanded the Interpreter to inquire into the Meaning of it. The *Indians* ſaid, that his Men very much reſembled certain Perſons who were in *Yucatan*, Natives of a Country called *Caſtilla*; which *Cortes* no ſooner heard than he reſolved to ſet them at Liberty, and engage them in his Service.

Upon informing himſelf more particularly, he found that they were in the Power of ſome *Indians* of the higheſt Rank reſiding two Days Journey within the Province of *Yucatan*. *Cortes* communicated his Intention to the Cazique, and aſked him, whether theſe were warlike *Indians*, and what Force would be neceſſary to reſcue the Chriſtians from Slavery? The Cazique gave him a very reaſonable Anſwer, telling him, the ſecureſt Way would be to ranſom them; for that endeavouring to releaſe them by Force of Arms, would expoſe them to the Hazard of being maſſacred by their Maſters. *Cortes* embraced his Advice, with Admiration to find ſo much good Senſe and Policy in the Cazique, whoſe Rank among Princes, though inconſiderable, had taught him ſome Principles of what they call Reaſon of State.

He immediately gave Orders to *Diego de Ordaz*, to ſail with his Veſſel and Company to the Coaſt of *Yucatan* by the ſhorteſt Cut from the Iſle of *Cozumel*, where he was to land the *Indians* appointed by the Cazique for this Purpoſe. They carried a Letter from *Cortes* to the Priſoners, together with ſome Trifles for their Ranſom, and *Ordaz* was commanded to ſtay eight Days for them, in which Time the *Indians* undertook to return with an Anſwer. The two Veſſels came upon the Coaſt of *Yucatan*, and landed the *Indians*. They, within two Days, delivered the Letters to a *Spaniard* whoſe Name was *Jerom de Aguilar*, who was pleaſed with it and the Toys. Some ſay, the *Indians*, for Fear, delivered the Letter to *Aguilar*'s Maſter, who ſeeing him read it, wondered that Perſons at ſuch a Diſtance ſhould underſtand each other by that Method. *Aguila* referring himſelf to his Maſter, as fearing he would cauſe him to be killed if he attempted to go away privately, obtained Leave of him to go, deſiring that he would make them his Friends. This Lord ſent ſome *Indians* with him, and when he came to the Coaſt, he perceived they had waited thereabouts, finding ſeveral Croſſes made of Canes. Being much grieved for want of ſome Conveniency to proceed any farther, and going along the Coaſt, he found a Canoe half ſunk, which, with the Help of his Companions, he cleared of the Sand; and, though half rotten, got into it, rowing with a Pipe-ſtave he alſo found by chance, and ſo went down the Coaſt, croſſing the narroweſt Part over to the Iſland, being at leaſt four Leagues. The Currents carrying him near to the Fleet.

In the mean time *Cortes* marched, with all his Troops in a Body, to take a View of the Iſland; not that he ſaw any Neceſſity for being on his Guard, but to keep the Soldiers together, and to preſerve the Inhabitants from being inſulted. He told his Men, that they were an indigent People unable to defend themſelves; that the Sincerity they ſhewed entitled them to good Treatment in return; and that their Poverty was ſuch as gave no Temptation to Avarice; that they were not to expect from that ſmall Spot of Ground any other Wealth than Reputation. He was always accompanied by the Cazique and great Numbers of *Indians*, who ſupplied him with Proviſions, and exchanged Gold for Glaſs Beads, believing that they over-reached the *Spaniards*, and could never purchaſe thoſe Toys at too dear a Rate.

At a little Diſtance from the Coaſt ſtood the Temple of the Idol ſo much revered by the *Indians*. It was a ſquare building of Stone, and of no contemptible Structure. The Idol bore the Figure of a Man, but of ſuch an horrible Aſpect as plainly diſcovered the Original it was deſigned to repreſent. This Circumſtance of Deformity was obſerved in all the Idols worſhipped by thoſe miſerable People, however, they differed in Make or Signification; whether it were that their Imaginations hit in this reſpect, or that he who ſtruck out the moſt hideous Figure was accounted the beſt Workman. 'Tis ſaid, this Idol was called *Cozumel*, and gave to the Iſland the Name which it retains to this Day. The *Spaniards* found a very great Concourſe of *Indians* in the Temple, and in the midſt of them a Prieſt, diſtinguiſhed from the reſt by a certain Ornament or Covering, which ſcarcely hid his Nakedneſs. He ſeemed to preach, and perſuade them to ſomething, by a Voice and Action extremely ridiculous. *Cortes* took this Opportunity to diſcourſe the *Indian* Prince roundly on the Subject of his Idolatry, telling him, in the firſt Place, that it was impoſſible for them to continue Friends if he did not quit it; and next, that it was very unworthy of him, who was a Man of Senſe and good Underſtanding, to pay Divine Honours to an ugly deformed Image, fitter to frighten Children than to be revered by Men.

The Cazique did not know how to argue with him, but ſeemed rather willing to ſhift the Diſcourſe; telling him, that he was much his Servant in what depended upon him; but that, as for Religion, it was out of his Way, and ſo left it wholly to the Prieſts, who ſhould, if he pleaſed, diſcourſe with him upon the Subject. This was readily accepted, and one of the Prieſts ſent for, who no ſooner underſtood the Buſineſs than he began to threaten the moſt dreadful Penalties, in the Name of his Idol, againſt any who ſhould preſume to diſhonour him or his Habitation. Upon which *Cortes*, to ſhew them how much they were deceived and impoſed upon by theſe Jugglers, cauſed all the Idols to be broke to pieces, and moſt of their Chapels to be demoliſhed, only the largeſt of them he preſerved entire; and, having cauſed a very neat Altar to be ſet up there, he had Maſs ſaid thereon by the Chaplains and Prieſts; and, at his Departure, charged the Cazique to take care that every Thing was kept in good Order, and that no inſult was offered to the Image of the bleſſed Virgin, or to the two Croſſes which he erected in that Chapel; which the *Indian* Chief very readily promiſed. And thus all Things being adjuſted, *Cortes* began to provide for his Departure, the Ship being returned with Advice, That they had waited the appointed Time without ſeeing any thing of the Perſons for whom they were ſent, and therefore judged it their Duty to return.

7. All Things being in order, *Cortes* put to Sea, with a Deſign to follow the ſame Courſe, which *Juan de Grijalva* had done before, and to diſcover the Countries from which he had retired by too ſcrupulous an Obedience to the Orders he had received. The Fleet had the Wind a-ſtern, and all were overjoyed at the proſperous Beginning of their Voyage, when an unexpected Accident gave them great Uneaſineſs. *Juan de Eſculante* fired a Gun, and the reſt of the Commanders, caſting their Eyes towards him, obſerved that he followed with great Difficulty, and ſoon after tacked about, and ſtood for the Iſland. *Cortes* well underſtood the Meaning of what he ſaw; and, without ſtaying to deliberate, immediately ordered the Fleet to follow him. *Juan de Eſculante* ſtood in need of all his Diligence to ſave his Veſſel, for ſhe had ſprung a Leak, and took in ſo much Water that ſhe was upon the Point of ſinking when ſhe reached the Shore, notwithſtanding all poſſible Expe-

dition had been uſed in coming to his Relief: The Soldiers landed, and the Cazique preſently came down with the *Indians*, and ſeemed to be ſurprized at the ſudden Return; but when they underſtood the Reaſon, they very chearfully helped to unload the Veſſel, and afterwards aſſiſted in repairing and careening it, managing their Canoes with great Dexterity, and performing ſingular Service in a Caſe that required it.

8. While this was doing, *Cortes*, accompanied by the Cazique and ſome of his Soldiers, went to viſit the Temple, and found the Croſs and Image of the Virgin *Mary* in the ſame Place where he had left them, obſerving withal, to his great Satisfaction, ſome Signs of the Veneration paid them by theſe *Barbarians* in the Cleanneſs of the Temple, and the Perfumes they had burned, beſides Flowers and Boughs, with which they had adorned the Altar. *Cortes* thanked the Cazique for the Care he had taken in his Abſence. The *Indian* was pleaſed, and received the Compliment of the *Spaniard* as if it had been an Inſtance of his extraordinary Conduct, that the Image and Altar had ſtood unmoleſted for no longer a Time at the moſt than for two or three Hours.

Whilſt the Ship was refitting, *Cortes* was told that a Canoe appeared making from *Yucatan* towards the Iſland; he came out to view, and, thinking it fell off a little, ordered *Andrew de Tapia* to go as much under the Shelter of the Land as he could, and endeavour to take that Canoe which made to the Shore behind a Point of Land; four Men ſtark naked landed out of it, only their Privities covered, and their Hair treſſed wound about their Heads, with Bows and Arrows in their Hands. *Andrew de Tapia* had poſted himſelf ſo as to come upon the Canoe, and as ſoon as the *Indians* were landed, made towards them Sword in Hand; three were afraid, and would have returned to the Canoe, but the fourth bid them not fear, and ſpoke to the *Spaniards*, ſaying, *Gentlemen, I am a Chriſtian:* And, with Tears in his Eyes, aſked if that was *Wedneſday?* becauſe he had a Prayer-Book he made uſe of every Day, and deſired to know whether he was right? He deſired them to return Thanks to God, kneeled down, and lifted up his Eyes and Hands to Heaven, and alſo bleſſed God for having reſtored him to the Company of Chriſtians.

Andrew de Tapia embraced him, as did all the reſt, and then they went to *Cortes*, who received him with much Joy. The new Comer and his *Indian* Companions paid the greateſt Reſpect, and couched down upon their Hams, laying their Bows and Arrows on the Ground at their Right-hands; then having moiſtened their Right-hands with Spittle, they touched the Ground, and ſtroaked their Breaſts next the Heart, that being the greateſt Reſpect they paid to their Princes, to denote, that they humbled themſelves to the Ground they trode on. *Cortes* being informed that this was the way of Salution, he again bid *Aguilar* welcome, and, taking off a long yellow Robe trimmed with Crimſon, he had on, with his own Hands put it upon him, deſiring he would riſe off his Hams and ſit on a Chair. Aſking his Name, he anſwered, his Name was *Jerom de Aguilar*, and that he was born at *Eija*, and related to the Licenciate *Mark de Aguilar*, whom *Cortes* knew. Meat and Drink being ſet before him, he took of both very moderately. And being aſked why he was ſo very ſparing, anſwered, he did it, becauſe having been ſo long uſed to the *Indian* Food, that Change of Diet might do him harm, whereas taking very little, tho' it were Poiſon, there was no Danger.

He was in Deacon's Orders, and for that Reaſon ſaid, he never would marry, tho' he had been much importuned to it by the *Indians*. The Account of his Life and Adventures being too long for that Time, *Cortes* bid him reſt till the next Day, and ordered his Steward to clothe him; which he was not very fond of at that Time, becauſe, having been ſo long uſed to go naked, the Garment *Cortes* had thrown over him was ſomewhat troubleſome.

The next Day *Cortes* aſked him, before leſs Company, how he had fallen into the Hands of thoſe *Indians*; he anſwered, That being at *Darien* at the Time of the Conteſt between *James de Nicueſſa* and *Nunez de Balboa*, he came away with *Valdibia*, who was bound for *Santo Domingo*, to inform the Admiral and the King's Officers of what was doing in thoſe Parts, to return with Men and Ammunition, and carry twenty Thouſand Ducats for the King: That when he came near *Jamaica*, the Caravel was caſt away on the Sholes called *Caymanes* or *Alligators*; at which Time twenty Men, with much Difficulty, got into the Long-boat, without Sails, Bread or Water, and very bad Oars: That ſeven of the twenty Men ſoon died, being reduced to ſuch Diſtreſs, that they drank their own Water; and the others landed in a Province called *Maya*, where they fell into the Hands of a cruel Cazique, who ſacrificed *Valdibia* and five others, offering them up to his Idols, and then eating them, keeping a Feſtival, according to the Cuſtom of the Country: That he and ſix more that were ſhut up in a Pen or Coop to ſerve for another Feſtival, reſolved to loſe their Lives ſome other Way, and breaking thro' the Cage accordingly, fled over the Mountains without being diſcovered, till it pleaſed God that they came into the Dominions of another Lord who was an Enemy to him from whom they fled, and naturally courteous, affable, and inclined to do Good; his Name was *Acquineuz*, Governor of *Xaman Cona*, who granted them their Lives, but made Slaves of them: That the ſaid Lord ſoon dying, he ſerved *Taxmar*, who ſucceeded him in the Lordſhip: That five of his Companions ſoon died thro' the Hardſhips they endured, he only remaining with one *Gonzalo Guerro*, who was with the Cazique *Chetemal*, and married a very great Lady in that Country, by whom he had Children: He was then Commander for a Cazique called *Nachaneam*, and, having gained many Victories over his Lord's Enemies, was much beloved and eſteemed.

He added, that he had ſent him *Cortes*'s Letter, and deſired him to come away, ſince there was ſo favourable an Opportunity, and had ſtaid for him longer than was convenient, and believed he kept away for Shame, becauſe his Noſe, Lips, and Ears were bored, his Face painted, and his Hands wrought after the manner of that Country, where only brave Men are permitted to have their Hands wrought. Proceeding in the Account of his own Adventures, he ſaid he had endured very much during the firſt three Years, being obliged to carry Wood, Water, and Fiſh for his Lord; which he performed with much Satisfaction to ſave his Life, doing what every *Indian* directed him; by which means he gained the Affection of them all. The Cazique obſerving that he lived chaſtly, tempted him ſeveral Ways, ſending him out at Night a fiſhing with a beautiful *Indian* Girl about fourteen Years of Age, who had been inſtructed to provoke him; and he had a Hammoc given him for them to lie in. The Hammoc being hung up, the Young Girl went into it, and invited *Aguilar* to come and lie with her, upbraiding him upon his Refuſal, ſaying that he was not a Man; yet he lighted a Fire, and lay down on the Ground by it. The Cazique, being informed of this by her, had the more Value for him, and truſted him with his Wife and Houſe; which ſhews that Virtue is honoured even among barbarous Nations. Afterwards he deſired his Lord to employ him in his Wars, and contributed to the obtaining ſeveral Victories, which gained him ſo much Reputation, that he was looked upon as the prime Man in the Country: And when the Ships under the Command of *Hernandez de Cordova*, and thoſe under *Grijalva*, traded on that Coaſt, they took ſpecial Care that he ſhould not make his Eſcape. The Converſation of this Man proved highly agreeable to *Cortes*, and the Accounts he gave were of extraordinary Uſe in the Proſecution of his Expedition, becauſe they enabled him to foreſee whatever might happen, to procure Advantages, and to provide againſt Difficulties.

9. It muſt be acknowledged that the Facts which are contained in this Section are far enough from being ſurprizing or extraordinary, but however, they are extremely curious, and withal highly neceſſary. The Hiſtories of ſuch Diſcoverers as theſe ought to be written for ſome great End, and with ſome important View; bare A-

muſement is too mean a Conſideration. But what End, what View ſo juſt, ſo laudable, ſo worthy of the Subject, as the promoting vigorouſly Expeditions of a like Nature by ſo noble an Example. Yet how is this to be done otherwiſe than by explaining the Character of *Cortes* fully, and ſhewing how he came to undertake ſo great an Enterprize with ſo ſlight a Force; how from the very Beginning he had all the Difficulties to ſtruggle with that the Author of an Epic Poem could have ſuggeſted to raiſe the Character of his Hero, and ſhewed ſuch Fortitude, Sagacity, and Penetration in overcoming them, as would have puzzled the greateſt Poet to have feigned in Favour of him, whoſe Character and Adventures had depended ſolely upon his Imagination.

Here we ſee him fixed upon to be the Commander in Chief in the greateſt Expedition that hitherto the *Spaniards* had undertaken, merely for the ſake of his perſonal Merit and great Abilities. We next find him ſuſpected, hated, recalled by the very Perſon to whom he owed his Power. Yet proceeding, notwithſtanding all theſe Difficulties; and tho' the Beginnings of his Enterprizes were not attended with any remarkable Succeſs, we ſee him eſtabliſhing an Authority even ſuperior to that given him by his Commiſſion, when by the Contrivances of his Enemies, his Title to command was ſo weakened, as that he had ſcarce any legal Authority at all. We ſee him from his firſt ſetting out, acting as the Legiſlator as well as General and Commander in Chief, and not only forming his own Conduct upon juſt, honourable, and heroic Principles, but infuſing theſe with great Diligence and Dexterity into the whole Body of his Followers, as if, not content with being a Hero himſelf, his Ambition excited him to command an Army of Heroes, and ſo to ballance his want of Numbers by raiſing the Power, the Credit, and Courage of the ſmall Number he commanded.

We ſee him acting upon all Occaſions by the Lights of his own Reaſon, and without taking the Advice of any who were about him; not that he deſpiſed Counſel, but that for good Reaſons, and from juſt Motives, he ſuſpected thoſe he would otherwiſe have admitted of his Council. And laſtly, we ſee him behave towards the *Indians* with Dignity void of Arrogance, inſtilling Courage, not Fear, and teaching them Obedience, by propoſing it as their Intereſt, rather than due to his Pleaſure. We ſhall ſee him in the ſucceeding Sections uniform in his Conduct, exact in his Diſcipline, ſage in his Reſolutions, vigorous in their Execution, always beſieged with new Difficulties, and yet ſurmounting them by the Force of his Underſtanding, and the Steadineſs of his Virtue.

SECTION VIII.

The Progreſs of this Expedition from the Time of the Spaniards *embarking for* New Spain, *to the firſt Meſſage ſent by* CORTES *to* MOTEZUMA *Emperor of* Mexico.

1. *The Motives which induced* Cortes *to reſolve to attempt the Conqueſt of* New Spain *with ſo ſmall a Force, and under ſo many Difficulties.* 2. *He arrives at the River* Grijalva, *finds his landing oppoſed, but debarks at laſt in ſpite of the* Indians. 3. *The Town of* Tabaſco *taken, and a great Victory gained over the* Indians. 4. *A Peace enſues thereupon, to the Satisfaction of both Parties; after which the* Spaniards *embark in Order to continue their Voyage.* 5. *They land in* New Spain, *and meet there with Embaſſadors from* Motezuma *Emperor of* Mexico. 6. *The General and Governor of the Province confer with* Cortes; *inquire into the Reaſon of his coming thither, and ſend an Account of it to their Emperor* Motezuma. 7. *The Manner in which the* Indians *tranſmitted a full Account of the* Spaniards *and their Force to their* Emperor. 8. *The Reception that Account met with, and the Anſwer returned to* Cortes's *Requeſt, by* Motezuma. 9. *Remarks and Obſervations upon this Section, and on the Situation* Cortes *found himſelf in at this Juncture.*

1. THE ſhort Stay that *Cortes* made in this Iſland was ſpent in deliberating on the proper Means for carrying his great Deſigns into Execution, towards which he found that good Information was likely to contribute more than the beſt Advice; he therefore ſpent many Hours alone with *Aguilar*, whom he found to be a Man of Senſe and Probity, of great Courage, and who had a Head perfectly well turned either for Service in Time of War, or for Negotiations in Time of Peace. It was from this Man that he learned perfectly the Humour and Temper of the *Indians*, their Maxims of Government, their Military Diſcipline, the Advantages derived to them from thence, and in what Reſpect they were inferior to the *Spaniards*. Matters about which he ſeemed to inquire from that natural Curioſity only which is incident even to the greateſt Minds; but, in reality, he had nothing leſs in View than to amuſe himſelf with hearing ſtrange Stories, and made theſe Inquiries for the ſake of knowing how to uſe all Opportunities that offered, and that he might be able to create them where they were wanting.

Among other extraordinary Qualities, he was bleſſed with ſo happy a Memory, that he retained whatever he once heard, and knew how to make Uſe of the ſlighteſt Circumſtances ſo as to convert them into material Advantages; of which we ſhall ſee many remarkable Inſtances in the following Sections. He took occaſion likewiſe, during his Stay in this Iſland, to gain over to his Intereſt the ableſt and moſt enterpriſing Perſons that were embarked with him in this Expedition, by repreſenting to them how inſeparably their Intereſts were connected with his, ſo that it was impoſſible for him to neglect rewarding them, if by a proper Diſcharge of their Duty they put it in his Power. In all theſe Applications he had much leſs regard to the Character and Station, than to the Temper and Compacities of the Men with whom he dealt, ſo that he admitted to his Converſation private Men as well as Officers, which gained him the Affections of the People, and render it impoſſible for any Cabals to be formed againſt him, without his having immediate Intelligence of the Motives from whence they ſprung, and the Perſons by whom they were managed.

He drew likewiſe another great Advantage from this Conduct, and that was bringing the greateſt Points to bear without appearing to have any Concern in them; ſo that he never propoſed any Thing he had a mind to carry, but by the help of his Agents he firſt infuſed it into the Minds of the People, and then complied with their Will, or rather ſeemed to comply with it when he accompliſhed his own. He defeated the Deſigns of his Enemies by preparing the People to ſuggeſt the Diſlike to them, when propoſed by himſelf in Compliance with the Reſolutions taken in Councils of War. And by theſe Arts he rendered himſelf at once the moſt arbitrary and deſpotic Commander, and the very Man in the World leaſt ſuſpected of having any ſuch Thing in his Thoughts. The Difficulties they had hitherto met with, might under any other General have diſguſted the People and deſtroyed their Hopes, but his Management was ſo dexterous, that under him they had quite different Effects; for he found Means to convince them, that all Miſcarriages were owing to thoſe of *Velaſquez*'s Party; whence the Soldiers inferred, that all Things would go well if

Cortes had the ſole Command. Such were the Diſpoſitions of the *Spaniards* while Preparations were making to proſecute their Voyage to the Main.

2. The Fleet left this Iſland the ſecond Time on the 4th of *March*, 1519, doubled the Point of *Catoche*, which is the moſt Eaſterly Part of *Yucatan*, and following the Coaſt came to the Road of *Champatan*, where the Queſtion was put in a Council held on that Subject, Whether they ſhould land or not? *Cortes* inclined to the Affirmative, that he might chaſtize the *Indians* for the Oppoſition given to *Juan de Grijalva*, and before that to *Franciſco Hernandez de Cordova*; and ſome Soldiers that had been preſent on both theſe Occaſions, puſhed by a Spirit of Revenge, ſupported his Opinion with an extreme Warmth; but the chief Pilot, and the reſt of his Profeſſion oppoſed it with unanſwerable Reaſons; for the Wind that favoured the Continuance of their Voyage, directly oppoſed their landing in that Place. Whereupon they purſued their Courſe, and arrived at the River *Grijalva*. There was no Occaſion to deliberate here, for the good Treatment which the *Spaniards* had received formerly from the *Indians* of *Tabaſco*, and the Gold at that Time brought from thence, were too powerful Attractives, and *Cortes* readily complied with the Inclinations of his Soldiers, although he had no Deſign to ſtay there many Days, for his Thoughts were continually bent on the Dominions of *Motezuma*, of which *Juan de Grijalva* had his firſt Account in this Province; it being his Opinion, That in this Sort of Expeditions it was adviſeable to begin with attacking the Head rather than the Members, and ſo encounter the greateſt Difficulties with his Forces entire.

As he had ſome Knowledge of this Place by the Experience of thoſe who had been there before, he made a Diſpoſition for entering the River. And leaving the larger Veſſels at an Anchor, he embarked all his Soldiers, well armed, in thoſe of a ſmaller Size, and in the Boats, and was beginning to make the beſt of his Way againſt the Current, in the ſame Order as had been before obſerved by *Juan de Grijalva*; when he perceived a conſiderable Number of Canoes, with armed *Indians*, cover both Sides of the River, ſupported by ſeveral other Bodies on the Shore. *Cortes* drew near in cloſe Order, and commanded that none ſhould fire or ſhew the leaſt Sign of Hoſtility. He followed in this likewiſe the Conduct of *Grijalva*, for he was more ſolicitous to uſe the proper Means of ſucceeding in his Enterprize, than to avoid the Imputation of copying after another, well knowing what Riſques they run who value themſelves upon finding new Ways with no other Deſign than to be diſtinguiſhed from thoſe who went before them. The *Indians* thought to put a Stop to the *Spaniards* by their horrible Outcries; and as ſoon as they were ſo near that what they ſaid could be diſtinguiſhed, *Jerom de Aguilar* found that he underſtood their Language, which was the ſame, or with little Difference from that of *Yucatan*. And *Cortes* looked upon it as the Work of Providence that he was furniſhed with ſo good an Interpreter. *Aguilar* informed him, that the Words he underſtood were Menaces, and that the *Indians* were inclined to War. Upon which *Cortes* ſtopt, and ordered him to advance in one of the Boats with Offers of Peace. *Aguilar* executed his Orders, and returned in a very ſhort Time with an Account, that the *Indians* were in great Numbers prepared to defend the Entrance of the River, and ſo obſtinate in their Reſolution, that they had very inſolently refuſed ſo much as to hear him. *Cortes* had no Deſign to begin a War in that Country, or delay his Voyage; but finding that he was now engaged, he thought it would be diſhonourable to retreat, and ſuffer this Inſolence of the Barbarians to go unpuniſhed. The Night overtaking them in a Country unknown, *Cortes* thought it moſt adviſeable to lye by till Day, and diſpoſed every Thing after the beſt Manner for the Engagement. During this Suſpenſion he commanded all the Artillery out of the great Veſſels; and his Soldiers had Orders to arm themſelves with their Cotton Coats, for the better reſiſting the Arrows; to which he added ſuch other Directions as he thought neceſſary, without repreſenting the Danger greater or leſs than it was.

As ſoon as Day appeared, the Veſſels were drawn up in a Half-Moon, whoſe Figure leſſened by Fegrees till it ended in the Boats, the River being large enough to allow Room for that Diſpoſition. Their Advance was very ſlow, and ſeemed to invite to Peace; but the Men ſoon diſcovered the Canoes of the *Indians* who waited their Coming in the ſame Order as the Night before. The General commanded his Men not to ſtir till they were attacked, telling them all, That they ought to uſe their Shields before their Swords, as the Juſtice of this War depended on the Provocation to it. And being deſirous to have Reaſon ſtill more on his Side, he ſent *Aguilar* to them a ſecond Time with Offers of Peace, and to aſſure them that this was a Fleet of their Friends who deſigned their Advantage, and came on the Foot of that Alliance which had been formerly made with *Juan de Grijalva*; That to refuſe them Entrance, would be a Breach of it, and would oblige the *Spaniards* to open their Way by force of Arms; and that whatever Damage they ſhould ſuſtain, muſt be imputed to themſelves. The Anſwer to this ſecond Propoſal, was the giving the Signal for the Attack. They advanced by the Favour of the Current near enough to uſe their Arrows, of which they diſcharged ſo great a Number, both from the Canoes and the Banks of the River, that the *Spaniards* were very much embarraſſed in their Endeavours to cover themſelves; but having received the firſt Charge, according to Order, they returned it with ſo much Vigour, that the Canoes quickly left the Paſſage free: And many of the *Indians*, intimidated at the Deaths of their Companions, flung themſelves into the River. The Veſſels purſued their Way up the River, without farther Oppoſition, and approaching the Shore on the left Side, the Troops began to land, but in a Place ſo marſhy and covered with Brambles, that they found themſelves engaged in a ſecond Conflict, for the *Indians* who lay there in Ambuſh, and thoſe who eſcaped from the Engagement on the River, united in one Body, and renewed the Attack with prodigious Fury. The great Quantity of Arrows, Darts, and Stones which they diſcharged, increaſed the Difficulty of the Moraſs.

But *Hernan Cortes* drew up his Men, and thoſe Ranks which were formed making head againſt the Enemy, covered the reſt of their Troops, who were landing. Having formed his Batallion in Sight of the Enemy, whoſe Numbers continually increaſed, he gave Orders to Captain *Alonſo Davila* to advance with an hundred Soldiers through the Wood, and poſſeſs himſelf of the Town of *Tabaſco*, the Capital of that Province, not far diſtant from the Place of Action, according to the Accounts of thoſe who had been upon the former Expedition. After which he engaged that vaſt Multitude, forcing them back with equal Courage and Difficulty, for he was obliged very often to march up to the Knees in Mud; and it is ſaid, that in the Heat of the Engagement the General loſt one of his Shoes, and fought a great while without miſſing it, ſo thorougly was his Attention employed upon the Buſineſs of the Day. After the *Spaniards* had paſſed the Marſh, the *Indians* gave way, and diſappeared in an Inſtant among the Buſhes. Their Flight was owing in Part to their loſing the Advantage of Ground, and in Part, to their Concern for the Town of *Tabaſco*, upon their diſcovering the March of *Davila*, as it preſently appeared by the great Multitudes that repaired to the Defence of that Place.

This Town was fortified with a kind of Wall, generally uſed in the *Indies*, made of large Trunks of Trees fixed in the Ground after the manner of Paliſadoes, and ſo placed together, that there was Room between to diſcharge their Arrows. The Compaſs was round, without any Traverſes or other Defences; and at the cloſing of the Circle, the Extremity of one Line covered the other, and formed a narrow winding Street, in which were two or three little Caſtles of Wood which filled up the Paſſage, and wherein they uſed to poſt their Sentinels. A ſufficient Fortreſs againſt the Arms of this new World, where they were happily ignorant of the Arts of War, and of thoſe Methods to attack and defend, in which Mankind have been inſtructed elſewhere either by Malice or Neceſſity.

3. *Cortes* arrived at the Town a little while before *Alonſo Davila*, who had been hindered by ſome Marſhes and Lakes in his Way; and having joined his Troops to the Batallion, and diſtributed proper Inſtructions for breaking down the Paliſadoes (without giving Time either to the *Indians* to recover themſelves, or to his own Soldiers to reflect on the Difficulty) gave the Signal to begin the Attack, only ſtopping to ſay, *My Friends, here we muſt lodge this Night.* The Soldiers went on together with equal Reſolution, and turning aſide a Shower of Arrows with their Shields, and even with their Swords, gained the Foot of the Paliſado; the Intervals of which were of Service at that Time for the Diſcharge of the Fire-arms and Croſs-bows, which quickly drove the Enemy from their Poſts, and gave an Opportunity to thoſe who were not engaged to beat down a Part of their Paliſadoes. The *Spaniards* entered without Difficulty, becauſe the *Indians* retired to the inner Part of the Town; but it was ſoon perceived that they had ſtopped up the Streets, where they again made head, but with ſmall Effect, for they were embarreſſed by their own Numbers; and while ſome were retiring from one Work to another, they put the reſt, who would have fought, into Diſorder.

In the Centre of the Town there was a void Space, where the *Indians* made their utmoſt Efforts, but after a ſhort Reſiſtance, turned their Backs and fled into the Woods. *Cortes* would not follow the Chace, that he might give his Soldiers Time to refreſh, and the Fugitives an Opportunity to ſue for Peace, taking Counſel from their Defeat. Thus did the *Spaniards* gain *Tabaſco*, a large Town, and well provided for Defence, for the *Indians* had ſent away all their Families and Effects, and ſtored the Place with Proviſions; ſo that tho' there was nothing found to gratify Avarice, there was nothing wanting which Neceſſity required. Fourteen or fifteen were wounded, in this Engagement, in which died a conſiderable Number of *Indians*. Of the Wounded there was no Account, becauſe they took care to carry them off, it being a Point of Honour amongſt them to conceal their Loſs from the Enemy. That Night the Troops were quartered in that Part of the Town in which they laſt engaged. *Cortes* went his Rounds, and poſted his Sentinels with as much Care and Exactneſs, as if he had had an Army of Enemies in View, well knowing Caution is as neceſſary as Valour in a Commander.

The next Day the Country appeared quite deſerted, and ſo far as the Eye could reach there was not the leaſt Sign of an Enemy. However, *Cortes* did not think it proper to march out of his Quarters; this great Stillneſs made him ſuſpicious, and his Apprehenſions were increaſed when he underſtood that his Interpreter *Melchior*, who came from *Cuba*, had deſerted them that very Night, leaving his Chriſtian Habit hanging on a Tree. It was he that induced them to renew the War, acquainting them with the ſmall Number of our Soldiers, that they were not immortal, nor their Fire-arms Thunder and Lightning, as they imagined; the Dread of which had made them deſirous of Peace. But this Crime did not go long unpuniſhed, for the ſame Barbarians whom he had perſuaded to take up Arms, being vanquiſhed a ſecond Time, revenged themſelves on the Adviſer of the War, by making him a miſerable Sacrifice to their Idol.

In this Uncertainty, *Cortes* reſolved to ſend out *Pedro de Alverado*, and *Franciſco de Lugo*, each with an hundred Men by different Ways, to View the Country, with Orders, if they found an Army in the Field, to retire to their Quarters without engaging with unequal Numbers. This Reſolution was immediately executed, and *Franciſco de Lugo*, after a little more than an Hour's March, fell into an Ambuſcade of numberleſs *Indians*, who attacked him on all Sides, and that with ſuch Fury, that he was obliged to draw up his little Batallion into a Square. The Number of the Enemy increaſed, and the *Spaniards* began to be tired, when it pleaſed God that *Alverado*, who had taken a different Road from his Companion, met with a Marſh, which obliged him to turn aſide, and brought him where the Report of the Fire-arms gave him Notice of the Engagement. *Alverado* marched ſtraight to the Noiſe, and diſcovered the Enemies Squadrons: Upon which he advanced with all the Haſte poſſible, under Cover of a Wood; and ſending an *Indian* of *Cuba* to *Cortes* to adviſe him of the Accident, drew up his Men, and fell upon the Enemy with ſo much Reſolution, that the *Indians*, ſurprized at the ſudden Aſſault, left them the Paſſage free, and, without giving the *Spaniards* Time to break them, diſperſed of themſelves.

This Succour gave *Franciſco de Lugo*'s Soldiers Time to breathe, and as ſoon as the two Captains had joined their Troops and doubled their Ranks, they charged another Batallion of the Enemy, who ſtopt up the Way that they might not execute the Orders they had received to retreat. Here again they found Reſiſtance, but in fine, they made Way through them with their Swords, marching forward, though continually attacked, and ſometimes almoſt borne down; ſome fought while others took Breath; and whenſoever they mended their Pace to gain Ground, they were charged by the whole Body of the Enemy, who immediately, upon their facing about, got out of their Reach, retiring with the ſame Swiftneſs that they attacked; the Motions of this Multitude of Barbarians, reſembling the Rolling of the Sea, when the Waves are driven back by the Wind. The *Spaniards* had marched about three Quarters of a League, continually plying their Weapons, when *Hernan Cortes* appeared at a Diſtance; who upon the Notice given him by *Alverado*, was coming to their Relief with all the reſt of his Troops. As ſoon as the *Indians* ſpied him, they made a Halt, giving thoſe they purſued Time to march off, and continued a while looking on by way of threatning, or to ſignify that they were not afraid. Yet afterwards they diſperſed in ſeveral ſmall Bodies, and left the Field. *Cortes* returned to his Quarters without engaging farther, becauſe it was requiſite to take Care of the Wounded, being eleven in both Companies, of which Number two died; and this was reckoned at that Time a very great Loſs.

Some Priſoners were taken upon this Occaſion, and *Cortes* ordered *Jerom de Aguilar*, to examine them ſeparately, to know what it was thoſe *Indians* founded their Obſtinacy on, and what Forces they had to ſupport it. Their Anſwer differed in ſome Circumſtances, but they agreed in declaring that all the Caziques, in the Neighbouring Countries, were ſummoned to the Aſſiſtance of *Tabaſco*, and that the next Day a very powerful Army was to be drawn together, to make an End of the *Spaniards* at once, of which Number the Body that had attacked the two Companies under *Franciſco de Lugo*, and *Pedro de Alverado*, was but a ſmall Detachment. This Intelligence gave *Cortes* ſome Uneaſineſs, whereupon he reſolved to call his Captains together, and adviſed with them what was proper to be done. He laid before them the Difficulties in which they were engaged, their ſmall Numbers, and the great Preparations the *Indians* had made to deſtroy them, without concealing the leaſt Circumſtances of what the Priſoners had declared. He then proceeded to conſider how far their Glory was concerned, repreſenting to them their own Valour, the Nakedneſs and Weakneſs of their Neighbours, and how eaſily they had defeated them at *Tabaſco*, at their Landing; but above all, he urged the ill Conſequences of turning their Back upon thoſe Barbarians, which would be a Diſgrace of ſo much Conſequence, that, in his Opinion, they muſt either intirely lay aſide the Enterprize of *New Spain*, or proceed no farther, till they had either eſtabliſhed Peace, or ſubdued that Province; but, that he only propoſed this, being reſolved to act as ſhould be judged moſt convenient.

Every one gave his Opinion, and they all agreed that it was not practicable to depart that Country, till they had reduced the Inhabitants: Whereupon *Cortes* proceeded to make the neceſſary Diſpoſitions for that Enterprize. He ordered the wounded Men to be carried on Board, the Horſes to be landed, the Artillery to be in a Readineſs, and every thing to be in Order by the next Morning. As ſoon as it was Day, giving the Command of the Foot to *Diego de Ordaz*, he and the other Commanders mounted on Horſeback, and kept Pace with the Artillery, which moved with much Difficulty, becauſe the Ground was boggy; till coming to a Place called *Cintha*, a little leſs than a League from their Quarters, they diſcovered, at a great Diſtance, the *Indian* Army ſo numerous, that the Eye could not reach to ſee the end of them.

We will now deſcribe the *Indian* Way of marching and engaging, which may ſerve upon all Occaſions, the Art of War being almoſt the ſame among all the Nations in *New Spain.* Moſt of their Weapons were Bows and Arrows; the Bow-Strings were made of the Sinews of Beaſts, or of Thongs of Deer Skin twiſted, and their Arrows were headed with Bones ground ſharp, or Fiſh-bones; they uſed alſo a kind of Darts, which ſometimes they threw, and ſometimes managed like a Pike. They had likewiſe long Swords which they uſed with both Hands, as we do Faulchions, made of Wood, in which they fixed ſharp Flints; the ſtrongeſt of them had Clubs pointed with Flints, and there were Slingers who threw Stones with great Force and Skill. The defenſive Arms, which are only uſed by Commanders and Perſons of Diſtinction, were Coats of quilted Cotton, Breaſt Plates, and Shields of Wood or Tortoiſe-ſhell, adorned with Plates of ſuch Metal as they could get, and ſome made uſe of Gold as we do of Iron. The reſt were naked, and all of them painted with various Dyes and Colours on their Faces and Bodies, which they made uſe of to ſtrike a Terror into their Enemies, believing that Uglineſs made them appear dreadful. Their Heads were covered with diverſe Plumes of Feathers, like Crowns raiſed high to make them appear taller. They had alſo warlike Inſtruments and Muſic, with which they animated their Soldiers and gave Signals; there were Flutes made of great Canes, Sea-ſhells, and a Sort of Drums made of the Trunk of a Tree, ſo hollowed and made thin, that they anſwered to the Stroke of a Stick a very diſpleaſing Sound, but ſeemed well ſuited to the Ears of thoſe People. They formed their Batallions of great Numbers without any Order, but had Troops of Reſerve to relieve where there was Occaſion. They made their Attacks with great Fury and terrible Out-cries, with which they thought to intimidate their Enemies; a Cuſtom which ſome have accounted among the Brutalities of thoſe *Indians*, without obſerving that it has been uſed by many ancient Nations, and not deſpiſed even by the *Romans*: We do not argue whether this is a commendable Cuſtom or not, but only ſay it was not ſo barbarous in the *Indians*, as to be without Example in other Nations.

Their Armies were compoſed of Natives, and ſeveral Troops of Auxiliaries from the neighbouring Provinces, who came to the Aſſiſtance of their Confederates, being led by their Caziques, or ſome prime *Indian* of their Family: Theſe were divided into Companies, whoſe Captains led, but could ſcarce govern, their Men: For when they came to engage, they were directed either by Fear or Rage, as is uſual among ſuch Multitudes, being equally eager to attack and to run away. Such was the Soldiery of the *Indians*, and after this manner that Army, or rather Inundation of Men, which ſeemed to cover all the Country, advanced towards the *Spaniards*; *Cortes* was ſenſible of the Danger he was in, yet did not deſpair of the Succeſs, but encouraged his Soldiers with a chearful Countenance, and poſted them under the Shelter of a riſing Ground, which covered their Rear, and placing the Artillery where it could do moſt Execution, he ſtruck into a Wood with his fifteen Horſe, advancing far into it in order to ſally out and flank them as Occaſion ſhould require. As ſoon as the *Indian* Army came up within a proper Diſtance, they firſt ſhot their Arrows, and then fell upon the *Spaniards* with ſuch Fury and Precipitation, that the Fire-arms and Croſs-bows not being able to ſtop them, they were obliged to make uſe of their Swords. Great was the Slaughter made among them, and as they preſſed on in Throngs, the Artillery deſtroyed whole Companies; but they were ſo obſtinate, that, as ſoon as the Ball was paſſed they cloſed again, and covered the Loſs they had ſuſtained; making loud Cries, and throwing Duſt into the Air that the *Spaniards* might not ſee thoſe who fell, or hear their Lamentations.

Diego de Ordaz acquitted himſelf as a good Captain and valiant Soldier. But the Enemies being ſo very numerous, the *Spaniards* had enough to do to ſtand their Ground; and the Inequality of their Strength began to appear, when *Cortes*, who could not come ſooner to the Aſſiſtance of his Men, by reaſon of ſome Brooks he had to paſs, ſallied forth from the Wood, and fell upon all that Army, breaking through the thickeſt of their Batallions, and doing ſuch Execution with his Horſe, that the *Indians*, wounded and trodden under Foot, thought of nothing but getting from them, throwing away their Arms as an Obſtacle to their Flight. *Diego de Ordaz* ſenſible that the Relief he expected was come, by the weak Reſiſtance of the Enemies Van-guard, which began to face about by Reaſon of the Confuſion in the Rear, without Loſs of time advanced with his Foot, charging thoſe who had oppreſſed him, with ſo much Reſolution, that he obliged them to give way till he came to the Place where *Cortes* and his Captains had cleared off the Enemy.

They all joined to make the laſt Effort, and were forced to mend their Pace, for the *Indians* were retiring in an haſty Manner; yet ſtill making head, and employing their miſſive Weapons; and this manner of renewing, and withdrawing from Fight in good Order, they continued till the *Spaniards* came up to them, when finding themſelves again attacked, they turned their Backs, and inſtead of retreating, fled outright. *Cortes* commanded his Men to halt, to avoid the ſhedding of more Blood; ordering only ſome Priſoners to be taken whom he might make uſe of to ſet on foot a Treaty of Peace, which he chiefly had in view, looking on this War as no more than a Circumſtance of his principal Deſign. Above eight hundred *Indians* remained dead upon the Spot, and the Number of the Wounded was very great. Of the *Spaniards*, two Soldiers were killed, and threeſcore and ten wounded. The Enemy's Army, according to the Accounts we have, conſiſted of forty thouſand Men; who, although they were naked Barbarians, yet had Hands to do Miſchief. And ſhould we grant that they wanted Courage, which is proper to Men, yet they could not be deſtitute of that Fierceneſs of which brute Beaſts are capable.

4. The next Day *Cortes* cauſed the Priſoners to be brought before him, among whom were two or three Officers. They diſcovered in their Countenances great Fear, expecting to be treated after the ſame cruel Manner they uſed to treat the Vanquiſhed. But *Cortes* received them with great Courteſy, encouraged them with a chearful Countenance, and ſet them at Liberty, giving them ſome trifling Preſents, and telling them at the ſame time, that he knew both how to conquer and to forgive. This Piece of Humanity had ſo good an Effect, that within a few Hours ſeveral *Indians* came to the Quarters with *Indian* Wheat, Flower, and other Proviſions; deſigning by that Preſent to facilitate the Peace, which they were to propoſe from the principal Cazique of *Tabaſco*. The People who came on this Embaſſy were of the meaneſt Sort, and made no Figure; which *Jerom de Aguilar* took notice of; becauſe it was the Cuſtom of that Country, upon all Occaſions, to ſend Perſons of the firſt Rank. And although *Cortes* was very deſirous of Peace, he refuſed to admit their Propoſals, as not coming in due Form, and ſent back the *Indians* without ſo much as ſeeing them; bidding them, by his Interpreter, acquaint their Cazique, That if he deſired his Friendſhip, he muſt ſend Perſons of greater account, and after a more decent Manner, to ſollicit it. The Cazique acknowledged his Fault, and the next Day ſent thirty *Indians* of better Quality, with their Ornaments of Plumes and Jewels, wherein all their Pride conſiſted; they were followed by a Train of *Indians* loaded with another Preſent of the ſame kind as before, but in greater abundance. *Cortes* gave them Audience, attended by all his Captains, affecting a grave and ſevere Countenance.

They approached with very great Submiſſion, and having perfumed him with *Gum Anime*, or *Gum Copal*, and other ſweet Scents, they delivered their Embaſſy, which began with ſome frivolous Excuſes for their paſt War, and concluded in earneſt Entreaties for Peace. The General repreſented to them the juſt Cauſes he had to be diſpleaſed with them, that on a View of their Faults, the Pardon might appear with greater Luſtre, and the Peace which he granted them prove more welcome. The Ambaſſadors received it with great Applauſe, returning extremely ſatiſfied and eaſily enriched with thoſe ſlight Baubles they ſo highly valued. Afterwards the Cazique himſelf came to viſit *Cortes*, accompanied by all his Officers, bringing with him a Preſent of Cotton Cloths, Plumes of various Colours, and ſome Pieces of Low Gold, more valuable for the Workmanſhip than for the Metal; he firſt made his Preſent in order to be better received: *Cortes* careſſed him very much, and the Viſit paſſed in Proteſtations of a reciprocal and ſincere Friendſhip, all tranſacted by the Interpreter; the *Spaniſh* Captains treated the other prime *Indians* who accompanied the Cazique, and nothing appeared but Signs of Joy and Peace, which they explained by their Countenances and Embraces to ſupply the Want of Language.

The Cazique took his leave, and appointed another Day for an Interview, and to ſhew his Sincerity and how much he confided in the General, he ordered his Subjects to return with their Families to *Tabaſco*, and aſſiſt the *Spaniards* in whatever they ſhould want. The next Day he came again to the Quarters, with the ſame Attendance, and twenty *Indian* Women, well dreſſed after the Manner of the Country, telling *Cortes* he brought them as a Preſent to ſerve him and his Companions, being very ſkilful in dreſſing all Sorts of Meat, and in making Bread of *Indian* Wheat, which amongſt them was always the Work of Women; they ground the Grain between two Stones, like thoſe we uſe for Chocolate, and when reduced to Flower, they made it into Paſte, without having any Occaſion for Leaven: Then they ſpread and moulded it upon a Sort of Earthen Plates, which they put over the Fire and baked it; this being the Bread with which God has abundantly ſupplied that new World (to make amends for the Want of Wheat) and is very agreeable to the Taſte, and not offenſive to the Stomach. Amongſt theſe Women came one principal *Indian*, well made, and of more than ordinary Beauty, who was afterwards baptiſed, and received the Name of *Marina*, and proved very uſeful in the Conqueſt, as will appear in its proper Place.

The Pilots preſſed the Departure of the Fleet, which, according to their Obſervations, might be endangered by any longer Stay in that Place. And though *Cortes* was concerned to leave thoſe People before he had better inſtructed them, he found himſelf obliged to think of his Voyage, and Palm Sunday drawing nigh, he appointed that Day for embarking, ſo ordering it that the Feſtival might be kept firſt, according to the Rites of the Church, Religion being always his firſt Care; at the ſame time they embarked their Proviſions, and made all other neceſſary Preparations for their Voyage. The *Indians* aſſiſted in all things with an officious Diligence; and the Cazique, with his Captains, attended *Cortes* with the greateſt Reſpect and Veneration. When Maſs was done, *Cortes* took leave of the Cazique, and, having confirmed the Peace with further Demonſtrations of Friendſhip, he embarked, leaving theſe People rather obedient than ſubject to the King: and as to Religion, ſo far in the Way to Salvation, as to deſire, or at leaſt not to oppoſe, the Means of obtaining it.

5. The next Day the *Spaniards* ſet ſail, and, following the Coaſt to the Weſtward, came within Sight of the Iſland of *Guazacoalco*, and without putting in at the Iſland of *Banners*, had a View of the Iſland of *Sacrifices* and other Places, which had been before diſcovered, and forſaken by *Juan de Grijalva*; the Soldiers who had ſerved under him, telling their Comrades what Adventures they had met with in that Expedition; and *Cortes* learning from the ill Succeſs of that Enterprize, how to manage his own better. At length they arrived at *St. Juan de Ulua* at Noon, and the Ships had no ſooner anchored between the Iſland and the main Land to ſhelter themſelves from the North Winds, than they ſaw two large Canoes, which in that Country are called *Piraguas*, coming from the neighbouring Coaſt with ſome *Indians* in them, who drew near without ſhewing the leaſt Concern, diſcovering by this Security, and ſome Signs they made, that they came in a peaceable Manner, and had thoſe on board who deſired to be heard. When they came within a ſmall Diſtance of the Admiral, they began to ſpeak in a ſtrange Language that *Aguilar* did not underſtand, which much troubled *Cortes*, being concerned to want an Interpreter, when he had moſt Occaſion for him, looking upon it as an Obſtacle to his Undertaking; but Providence, that brings about its Deſigns by Ways which to Men appear caſual, ſoon relieved him in this Diſtreſs.

The *Indian* Woman, whom we ſhall now call Donna *Marina*, was not far from *Cortes* and *Aguilar*, and gueſſing by their Looks what they were diſcourſing, and what they wanted, ſhe told *Aguilar*, in the *Yucatan* Tongue, that thoſe *Indians* ſpoke the *Mexican* Language, and deſired Audience of the General, on the Part of the Governor of that Province. This Donna *Marina* was Daughter to the Cacique of *Guazacoalco*, one of the Provinces ſubject to the Emperor of *Mexico*, bordering upon that of *Tabaſco*, and had, through ſome Accidents of Life, which are variouſly reported, been carried away in her Youth to *Xicalango*, a ſtrong Place upon the Confines of *Yucatan*, which was kept by a *Mexican* Garriſon: There ſhe was bred in a poor Manner, no way agreeable to her Birth; till by a freſh Misfortune, either by Sale or being taken in War, ſhe became a Slave to the Cazique of *Tabaſco*, who made a Preſent of her to *Cortes*. In *Guazocoalco* and in *Xicalango* they ſpoke the *Mexican* Language, and in *Tabaſco*, that of *Yucatan*, which *Aguilar* underſtood: ſo that Donna *Marina* underſtood both thoſe Languages, and explained to the *Indians* in the *Mexican* Language, what *Aguilar* told her in that of *Yucatan*. *Cortes* making uſe of this round about Way of ſpeaking by two Interpreters, till ſuch time as Donna *Marina* had learned *Spaniſh*, which was not long, for ſhe had a very ready Wit and ſeveral natural Endowments which well agreed with her Birth. She was ever a moſt faithful Interpreter to *Cortes*, and he confirmed her in his Intereſt by Ways not altogether ſo decent, for he had a Son by her called Don *Martin Cortes* who was made Knight of *St. Jago*, in conſideration of the Nobility of his Mother's Birth.

The *Indians* acquainted him that *Pilpatoe*, and *Teutile*, the one Governor, and the other Captain General of that Province, from the great Emperor *Motezuma*, had ſent them to know of the Commander of the Fleet, with what Intention he was come upon their Coaſt? *Cortes* careſſed them, gave them a few Baubles, and treated them with ſome *Spaniſh* Wine, and having thus obliged them, anſwered, "That he came as a Friend, to treat of Matters of great Importance to their Prince and all his Empire; for which Purpoſe he would meet the two Governors, and hoped to receive the ſame good Treatment from them, as others of his Nation had done the Year before." And having received ſome Information concerning the Greatneſs of *Motezuma*, his Riches and Form of Government, he ſent them away very well contented.

The next Day being *Good Friday*, the *Spaniards* all landed on Shore near the Fleet, and *Cortes* gave Orders for landing the Horſes and Artillery, and that the Soldiers, in Companies, ſhould go and cut Faſcines to entrench themſelves, not forgetting to poſt the neceſſary Guards at the Avenues, and to build a ſufficient Number of Barracs to ſhelter them from the Heat of the Sun, which, at that time, was very great. The Artillery were planted ſo as to command the Country, and in a little time they were all under Cover. For *Teutile* ſent a great Number of *Indians* with Proviſions, and Orders to aſſiſt the *Spaniards* in that Work: To whom they were of great uſe, becauſe they brought their Tools edged with ſharp Flints, with which they cut Stakes, and fixed them in the Ground; interwove with them the Boughs and Leaves of Palm-trees; forming the Walls and Roofs of a Lodging with much Eaſe and Diligence, being great Maſters in this kind of Architecture, as having in many Places no other Houſes, and being leſs barbarous in proportioning their Structures to what Nature requires, than thoſe who build vaſt Palaces where ſtill they cannot find ſufficient Room for their Vanity. They alſo brought ſome Cotton Cloths with which they covered the Officers Barracs, the better to defend them from the Heat of the Sun. In the beſt of them *Cortes* ordered an Altar to be ſet up, on which, when adorned, he placed the Image of the *Virgin Mary*, and at the Entrance a great Croſs, in order to celebrate Eaſter; for Religion was always his chief Care, and in that he was always equally zealous with the Prieſts. *Cortes* underſtood by theſe *Indians*, that General *Teutile* was attended by a conſiderable Body of Troops, and that he was eſtabliſhing the Dominion of *Motezuma*, in ſome Places newly conquered of this Province, the Civil Government of which was veſted in *Pilpatoe*. And the great Care they took to ſend Proviſions and help the *Spaniards* in building of their Barracs, was not without Artifice, ſo far as could be gathered; for they were very much terrified with the Account of the Succeſs at *Tabaſco*, which had now ſpread over all the Country; and conſidering that the Forces with which they were provided were inferior in Strength to thoſe they had vanquiſhed; they had recourſe to Preſents and Civilities, in order to oblige thoſe they could not reſiſt.

6. They paſſed the following Day in great Tranquility; but not the leſs upon their guard; the *Indians* were continually coming to their Quarters, ſome to work, and others with Proviſions, which they trucked. On *Eaſter-day* in the Morning *Teutile* and *Pilpatoe* came with a very great Attendance to viſit *Cortes*; he received them in equal State, ſurrounded by his Officers and Soldiers. The firſt Compliments being over, he carried them with him to the great Barrac, which ſerved for a Chaple, it being the Hour of Divine Service, ordering *Aguilar* and Donna *Marina* to tell them, that before he acquainted them with the Intention of his Journey, he was to comply with the Duties of his Religion; and recommend to the God of all other Gods, the good Succeſs of his Propoſition. After Service was over, they returned to the Governor's Barrac, who entertained the two Generals at Dinner, and he treated them with great Plenty. The Banquet being over, *Hernan Cortes* called his Interpreters, and, with a determined Air, ſaid, That his coming thither was to treat with the Emperor *Motezuma* on the Part of Don *Carlos* of *Auſtria*, Monarch of the *Eaſt*, touching Affairs of great Importance, not only to his own Perſon and Eſtate, but likewiſe to the Welfare of all his Subjects; for performing whereof it was neceſſary for him to appear before his royal Preſence; and hoped he ſhould be admitted with all the Civility and Reſpect that was due to the King who ſent him.

The Governors changed Countenance at this Propoſal, and ſeemed to hear it with Diſſatisfaction; but before they returned an Anſwer, *Teutile* ordered a Preſent he had provided to be brought, and about twenty or thirty *Indians* came in loaded with Proviſions, fine Cloths, Feathers of ſeveral Colours, and a great Box in which were ſeveral Pieces of Gold curiouſly wrought: Having made his Preſent with a good Grace and Civility, and finding it was well received and praiſed, he turned to *Cortes*, and, by the Help of the ſame Interpreters, prayed him to accept that ſmall Preſent from two Slaves of *Motezuma's*, who had Orders to entertain ſuch Strangers as came upon his Coaſt; but adding, that he muſt not immediately think of proſecuting his Voyage, it being no eaſy Matter to ſpeak with their Prince. *Cortes* replied with ſome Warmth, That Kings never refuſed to hear the Ambaſſadors of other Princes: That what belonged to them in this Caſe was, to acquaint *Motezuma* with his Arrival, for which he would allow ſome Time; but that they ſhould likewiſe let their Emperor know that he came reſolved to ſee him, and determined not to leave his Country with Diſhonour to the King whoſe Repreſentative he was. This bold Reſolution of *Cortes*, gave the *Indians* ſo much Uneaſineſs, that they durſt not reply; on the contrary, they intreated him not to move from theſe Quarters till the return of *Motezuma's* Anſwer, offering to ſupply him with all Things that were neceſſary for the Support of his Soldiers. At this Time ſome *Mexican* Painters, who came in the Train of the two Governors, were very buſy about drawing upon Cotton Cloths (which they brought ready primed for that Purpoſe) the Ships, Soldiers; Arms; Artillery, Horſes, and every thing elſe that appeared to them remarkable, of which Variety of Objects they formed different Landſkips no way contemptible; either for the Colours or the Drawing.

7. Theſe Pictures were drawn by the Order of *Teutile*, the better to inform *Motezuma* of that extraordinary Novelty; and, to make thoſe Deſcriptions more intelligible, they placed ſome Characters here and there, with which they ſeemed to explain and give the Signification of the Picture. *Cortes* had notice of what theſe Painters were doing, and went out to ſee them: and being informed that they were painting upon thoſe Cloths the Information which *Teutile* was to give *Motezuma* of what he had propoſed; and the Forces he had with him to make it good, he with his uſual Wit preſently obſerved, that theſe Images wanted Action to expreſs the Valour of his Soldiers; and therefore reſolved to exerciſe his Men before them, to give the greater Life and Vigour to the Picture: To this End, he ordered them to Arms, drew up in a Body, commanded the Artillery to be made ready; and telling *Teutile* and *Pilpatoe*, that he would entertain them after the manner of his Country, he mounted his Horſe with his Captains: They firſt ran two and two, after the Manner in *Spain*; and then the whole Troop being divided into two Bodies, they ſkirmiſhed, at which ſtrange Sight the *Indians* ſtood amazed, and like Men beſide themſelves; for obſerving the obedient Fierceneſs of thoſe Beaſts, they began to think there was ſomething more than natural in thoſe Men that managed them. Immediately, at a Signal made by *Cortes*, the Fire-arms diſcharged; and, ſoon after, the Artillery. The Confuſion and Aſtoniſhment of theſe People increaſing, with ſuch various Effects, that ſome fell down to the Ground, others began to fly; and thoſe who had moſt Preſence of Mind affected Admiration, to diſſemble their Fear.

Then *Cortes* encouraged them, giving them to underſtand, that, among the *Spaniards*, theſe were military Diverſions. It was preſently obſerved, that the Painters were inventing new Figures and Characters, to ſupply what was wanting on their Cloths; ſome painted the *Spaniards* armed and drawn up in Form, others, their Horſes in Exerciſe and Motion. They deſcribed the Artillery with Fire and Smoke, and repreſented the very Noiſe with the Similitude of Lightning, without omitting any of thoſe frightful Circumſtances that moſt directly regarded what their King was ſolicitous to know. In the mean time *Cortes* returned to his Barrac with the two Governors, and after having preſented them with ſome ſmall *Spaniſh* Jewels, he prepared a Preſent of ſundry ſorts of Curioſities, to be ſent from him to *Motezuma*; to which Purpoſe he made Choice of ſeveral Pieces of the moſt ſolid and brighteſt Glaſs, to which he added a *Holland* Shirt, a Cap of Crimſon Velvet adorned with a Gold Medal repreſenting *St. George*, and a Tapeſtry Chair; which the *Indians* ſeemed ſo much to admire, that it was thought a fit Preſent for the Emperor. With this ſmall Shew of Liberality, *Hernan Cortes* took leave of the two Governors, who remained as much obliged by his Civilities, as embarraſſed by his Deſigns.

8. The *Indians* halted at a ſmall Diſtance from the *Spaniſh* Quarters to conſult what Meaſures they ſhould take. Now the Reſult of this Stop was, that *Pilpatoe* remained there to obſerve the *Spaniards*; for which Purpoſe a convenient Spot being fixed, a great Number of Barracs were raiſed; and in a few Hours there appeared a conſiderable Village built upon the Plain. *Pilpatoe* provided againſt the Suſpicion this Novelty might produce, ſending word to *Cortes*, that he ſtaid there to take care of his Entertainment, and the better to ſupply his Troops with Proviſions. *Teutile* proceeded to his own Quarters, and diſpatched an Account to *Motezuma* of

all that had happened upon the Coaſt, ſending the Pictures which were drawn by his Orders, and *Cortes*'s Preſent, with the utmoſt Diligence. For this Purpoſe, the Kings of *Mexico* had a great Number of Couriers diſtributed among all the principal Roads of the Kingdom, choſen out of the ſwifteſt *Indians*, and bred up to it from little Children. Rewards were paid out of the Public Treaſury to thoſe who arrived firſt at the appointed Place. Thoſe Couriers were relieved at every Town, like our Poſt-horſes, and made the greateſt Speed, becauſe they ſucceeded one another before they were tired, ſo that the firſt four of the Couriers never ceaſed. The Anſwer came in ſeven Days, and *Teutile* brought it to the *Spaniſh* Quarters, together with a Preſent from *Motezuma*, which loaded an hundred *Indians*; and before he delivered his Embaſſy, he cauſed them to lay Mats of Palm-tree Leaves upon the Ground, and place in order upon them the ſeveral things of which the Preſent was compoſed.

There were various ſorts of Cotton Cloth well wove, and ſo fine, that they could not be diſtinguiſhed from Silk but by feeling, a Quantity of Plumes and other Curioſities made of Feathers, whoſe beautiful and natural Variety of Colours the *Indian* Artiſts knew to mix and diſpoſe with ſo much Skill, that without making uſe of artificial Colours, or of the Pencil, they would draw Pictures and imitate Nature. They next produced a great Number of Arms, Bows, Arrows, and Targets, made of the fineſt ſorts of Woods; two very large Plates of a circular Form, the one of Gold, which by its emboſſing repreſented the Sun; and the other of Silver, repreſenting the Moon; and laſtly, a conſiderable Quantity of Jewels, Pieces of Gold, ſome Precious Stones, Collars of Gold, Rings, Pendants after their Faſhion, and other Ornaments of greater Weight, in the Shape of Birds and Beaſts, ſo curiouſly wrought, that notwithſtanding the great Value of the Metal, the Workmanſhip exceeded it. As ſoon as *Teutile* had brought his Wealth before the *Spaniards*, he turned to *Cortes* and told him, That the great Emperor *Motezuma* ſent him theſe in Return for his Preſents, and to ſhew how much he valued his King's Friendſhip, but that he did not think it convenient, nor was it poſſible in the preſent Poſture of his Affairs to grant the Permiſſion he aſked, of paſſing to his Court.

Cortes returned Thanks for the Preſent, and anſwered *Teutile*, That it was far from his Intention to be wanting in Obedience to *Motezuma*, but that it was not in his Power to go back without Diſhonour to the King, or to forbear perſiſting in his Demand with all the Earneſtneſs to which he was obliged by the Reputation of a Crown that was honoured and reſpected among the greateſt Princes of the World. The *Spaniards* reaſoned amongſt themſelves very differently upon thoſe Preſents, ſome conceiving great Hopes from conquering ſo rich a Country, while many concluded, the attacking ſo powerful a Monarch with ſuch an Handful of Men, to be a Piece of Raſhneſs; but the greateſt Part juſtified the Conſtancy of their Captain, looking on the Conqueſt as good as made. *Cortes* gave them leave to talk on, concealing his Sentiments till a proper time; and to keep his People out of Idleneſs, which was the way to make them diſpute leſs, he ordered two Veſſels out to view the Coaſt, and ſearch out ſome Port or Bay where the Fleet might be more under Shelter, and ſome more fertile Plain, where they might be accommodated until the return of *Motezuma*'s Anſwer, making a Pretence of the Sufferings of his People in this ſandy Soil, where the Heat of the Summer was doubled by Reflection, and the Perſecution of the Moſquitoes made even the Hours of Reſt uneaſy. He appointed Captain *Franciſco de Montejo* to command this Cruize, and picked out the Soldiers that were to bear him company, being thoſe that ſeemed moſt averſe to his own Opinion. He ordered him to run along as far as he could, ſteering the ſame Courſe he had done the Year before with *Grijalva*, and that he ſhould take notice of what Towns appeared along the Coaſt, without landing to view them, alotting ten Days for their Return; by which Means he executed what was proper to be done, employed thoſe that were troubleſome, and entertained the reſt with Hopes of Relief.

9. The Skill and Conduct of *Cortes* appear manifeſtly in the Prudence with which, in his Circumſtances, he took ſuch Precautions. But tho' they made him ſomewhat eaſy for the preſent, yet they were ſo far from filling him with Confidence, that on the contrary his Mind was never more occupied than at this Juncture. He ſaw a new Scene opened, not only unexpectedly, but directly oppoſite to his Expectations. He found inſtead of ſmall and narrow Diſtricts, which hitherto the *Spaniſh* Arms had eaſily ſubdued, a wide extended Empire, to which *Spain* itſelf was, in compariſon, a Province; and this under the Dominion of one potent Monarch, whoſe Power deſcended to him through a Line of glorious Princes, renowned for the Wiſdom of their Politics and the Compaſs of their Conqueſts: He found this Monarch well apprized of his Deſigns, and determined to oppoſe them with the whole Force of his Empire.

On the other hand, theſe Informations ſo clearly convinced him of the Weakneſs, or rather Inequality of his Army; and he was at the ſame time ſo ſenſible of the Difficulties, which perplexed him in the Command of it, that he began ſeriouſly to doubt whether it was poſſible for him to perform what his Ambition had prompted him to undertake. He kept this Concern of his ſo well concealed, that nothing of it appeared either in his Countenance or his Language, the former appearing more open, and the latter aſſuming a more reſolute Tone than in times when for want of good Information he had leſs Fears about him; he determined however, not to relinquiſh his Enterprize, but to puſh it as far as it would go, and never to think of a Retreat till he was fully ſatisfied that the Obſtacles that lay in his way were abſolutely inſurmountable. He applied himſelf therefore with the utmoſt Diligence to raiſe the Spirits, and heighten the Fortitude of his Soldiers.

In order to this, he took Pains to ſhew them the great Advantages derived from their Diſcipline, and the ſmall Strength that occurred from Numbers, where they wanted that material Circumſtance. He taught them to obſerve how favourable the Diviſions of the *Indians* among themſelves were to their Deſign, and of what vaſt Importance it was to preſerve the Good Will of thoſe who were inclined to favour them, which was no otherwiſe to be done than by behaving towards them with all the Kindneſs and Clemency imaginable. But above all he made it his Buſineſs to inflame their Hopes with the Proſpect of that vaſt Wealth which muſt accrue to them from the Poſſeſſion of ſo rich a Country, and for the ſake of which, it would be requiſite, and at the ſame time highly reaſonable to forego certain trifling and temporary Advantages, particularly ſuch as reſulted from plundering the little Towns that fell into their Hands, and treating all that came under their Power as Vaſſals and Slaves. He ſhewed them that this muſt neceſſarily break their Spirits, and enervate their Power, which at the ſame time that it rendered theſe *Indians* uſeleſs as Subjects, loſt all that Acceſſion of Strength which might be derived from them as Allies, and without which it was ſimply impoſſible they could carry on their Enterprize with any Probability of Succeſs.

By a frequent and conſtant Practice of theſe Methods, he brought his Troops to a Degree of Confidence, which as yet he wanted himſelf, and rendered them not only willing to obey his Commands, but impatient even of neceſſary Delays, and ſo little afraid of Danger as to treat with Contempt ſuch as attempted to inſinuate, that their General engaged in an Undertaking to which his Forces were utterly unequal.

SECTION

SECTION IX.

The Continuation of HERNAN CORTES's *Expedition, his Alliances with ſeveral* Indian *Nations, his Succeſs in quelling various Seditions in his own Army, and his Preparation for his March to* Mexico, *by burning his whole Fleet.*

1. *The State of the* Mexican *Empire at this Time, and the Cauſes of* Motezuma's *Apprehenſions, which diffuſe themſelves through the whole* Indian *Nation.* 2. *The Anſwer ſent by him to* Cortes, *and the Reſolution taken by the* Spaniſh *General thereupon, which produces a Rupture with the* Indians. 3. Cortes *defeats a Conſpiracy formed againſt him, embraces the Friendſhip of the* Zempoallans, *and under Colour of ſettling a Colony inſtitutes a new Government amongſt his* Spaniards. 4. *Reſigns up his Commiſſion to the new Magiſtrates, receives it again, and quaſhes another Conſpiracy.* 5. *The Army continues its March to* Zempoalla, *where* Cortes *brings the Cazique to have a perfect Confidence in him and in his People.* 6. *He proſecutes his Journey to* Quiabiſlan, *gains over the Cazique of that Country alſo, and perſuades him to ſeize* Motezuma's *Commiſſioners.* 7. *He encreaſes the Number of his Allies, founds the City of* Vera Cruz, *and gives Audience to freſh Embaſſadors from the Emperor of* Mexico. 8. *The* Spaniadrs, *by an artful Contrivance, are drawn in by their* Indian *Confederates to attack the Inhabitants of* Zimpazingo, *with whom, coming to a better Underſtanding, they ſoon make Peace.* 9. Cortes *returns to his own Colony at* Vera Cruz, *ſends Deputies to* Spain *to juſtify his Conduct, and prevents ſome Diſputes that might have happened from Sharers in his Diſcoveries.*

1. THERE cannot occur, in any Hiſtory, a more ſurprizing Event than that the Rumour of the Approach of *Cortes*, with his Handful of *Spaniards*, ſhould ſtrike ſo great an Empire as that of *Mexico* really was, with ſo much Terror and Amazement. The nearer he came, the more *Motezuma* was alarmed; the more frequent Councils he held, and in each of theſe diſcovered more and more Uneaſineſs and Apprehenſion, which quickly infected his Grandees; for in all Countries, and in all Ages, Courtiers are, in ſome Meaſure, Copies of their Monarchs, eſpecially in arbitrary Governments; and therefore, we need not wonder that his Fear firſt diffuſed itſelf among his Nobility, and from them, through the whole Maſs of his Subjects, ſo that the Confuſion became general, and the approaching Deſtruction of their Government, might in very legible Characters be read in the Faces of the whole Nation. But to conceive this Fact clearly, to underſtand it perfectly, and to form from thence juſt Notions both of its Cauſes and Conſequences, it is abſolutely requiſite that we ſhould take a View of the State of this Country, and of its Government at this Juncture, which will, indeed, require Time and Room; but, the Importance of the Matter conſidered, I hope it will appear that neither can be better employed.

The Empire of *Mexico* was then at its greateſt Height of Glory, having under its Dominion almoſt all the Provinces which had been diſcovered in *North America*, which were governed by *Motezuma* himſelf, or by the petty Kings or Caziques, his Tributaries. The Length of it extended from Eaſt to Weſt above five hundred Leagues, and the Breadth from North to South, in ſome Places, was two hundred; a Country populous, rich, and plentiful. On the Eaſt it was bounded by the *Atlantic* Sea (now called the *North Sea)* and extended along all that great Space of Land, between *Panuco* and *Yucatan*: on the Weſt it reacheth the other Sea, being waſhed by the *Aſiatic* Ocean (or Gulph of *Anian)* from Cape *Mendocino*, to the furtheſt Part of *New Galicia*. On the South, it ſtretched out farther, running along the South Sea from *Acapulco* to *Guatimala*, approaching by the Way of *Nicaragua* to the Iſthmus or narrow Neck of Land, which unites the two *Americas*. On the North it extends as far as *Panuco*, including that Province, but was ſtreightened conſiderably by the Mountains poſſeſſed by the *Chichimecas* and *Otemies*, a barbarous People, without Government, living in the Holes of Rocks, feeding upon the Game they kill in hunting, and the Fruits of ſuch Trees as grow wild; but ſo dextrous in the Uſe of their Arrows, and in making their Advantage of the Paſſes of the Mountains, that they had often withſtood the whole Power of *Mexico*, being ſatisfied with not being conquered, and only deſiring to preſerve their Liberty amongſt the wild Beaſts.

This Empire grew to this vaſt Greatneſs in little more than one hundred and thirty Years; for the *Mexicans*, a warlike Nation, were always making room with their Arms, among thoſe who inhabited that Part of the World. They were, at firſt, governed by a valiant Captain, who made them Soldiers and ſenſible of military Honour. Afterwards they choſe a King, giving the ſupreme Dominion to him, who had the greateſt Reputation for Valour, being acquainted with no Virtue but Fortitude, or if acquainted with other Virtues, they looked upon them as much inferior: They always obſerved this Cuſtom, without regard to hereditary Succeſſion; yet, where Merit was equal, they preferred the Royal Blood; and the ſame Wars by which their Kings acquired their Titles to the Crown, enlarged the Monarchy.

At firſt Juſtice ſupported their Arms, for the Oppreſſion of their Neighbours forced them to Defence; but their Power afterwards increaſing, Juſtice was laid aſide, and Tyranny took Place. *Motezuma* was the eleventh King, and the ſecond of that Name, a ſingular Perſon, and much eſteemed among the *Mexicans* before he began to reign. He was of Royal Blood, and a Soldier in his Youth; he raiſed his Character by ſeveral heroic Actions, and gained the Reputation of a valiant Captain: He returned to the Court, and finding himſelf applauded and reſpected as the firſt Man of his Nation, he entertained Hopes of graſping the Scepter at the next Election. He then employed all his Skill in gaining Friends, to which end he made uſe of many Arts. He affected great Obedience towards the King, and extraordinary Modeſty and Compoſure in his Words and Actions; carefully preſerving ſuch an auſtere Gravity in his Countenance, that the *Indians* were wont to ſay the Name of *Motezuma* became him well, which, in their Language, ſignifies a *ſurly Prince*, tho' he endeavoured to temper his Severity by his Liberality.

He alſo gained the Character of being zealous for his Religion: And to this End he built an Apartment in the moſt frequented Temple, to which he retired in the Sight of all the People, and ſtayed there many Hours. He gained ſo much Veneration by theſe outward Appearances, that when the King his Predeceſſor died, the Electors gave him their Votes unanimouſly, and the People received him with great Acclamations; he made a ſhew of refuſing, ſuffering himſelf to be courted to comply with his own Deſires, and ſeemed to accept the Crown with Reluctancy: But no ſooner was he poſſeſſed of it, than all that Artifice which he had forced upon his natural Temper ceaſed, and he diſcovered thoſe Vices that had been hitherto covered with the Shew of Virtues.

The firſt Action by which he manifeſted his Pride, was the diſcarding all who belonged to the Royal Family,

mily, which till his Time was compoſed of middling People; and under colour of great Decency he made his Nobles ſerve him, even in the meaneſt Employments of his Houſe. He ſhewed himſelf ſeldom to his Subjects, and only when it was neceſſary to his Miniſters and Domeſticks, looking upon Retirement and Melancholy as a Part of Majeſty. And for thoſe who obtained Leave to come into his Preſence he invented new Obeiſances and Ceremonies, inlarging Reſpect almoſt to Adoration. He perſuaded himſelf that he had the intire Command of the Lives and Liberties of his Subjects, and exerciſed great Cruelties that he might put it out of Doubt with others; he impoſed new Taxes, without Neceſſity, at a certain Rate on each Head of his Subjects, and exacted it with ſo much Rigour, that even Beggars were not exempted bringing to his Treaſury ſome mean Things, which were received and then thrown away before their Faces.

Theſe violent Actions made his People fear him, but as it is uſual for Fear and Hatred to go together, ſome Provinces rebelled; to reduce which, he went himſelf in Perſon, being too jealous of his Authority to ſuffer any other to command his Armies. But, however, it cannot be denied, that he had a martial Inclination and Spirit, and that none were able to reſiſt his Power, except the Provinces of *Mecoacan*, *Tlaſcala*, and *Tebcaca*, and he was wont to ſay, " He did not ſubdue them becauſe he wanted thoſe Enemies to ſupply him with Captives for the Sacrifices of his Gods." He had reigned fourteen Years when *Cortes* arrived on his Coaſt, and had ſpent all that Time in eſtabliſhing the moſt thorough Tyranny that any Hiſtory has recorded. Many ſtrange Things fell out at this Juncture, which were magnified by Report, and falling in with the ſuperſtitious Temper of the Emperor and his Subjects, formed ſuch a Series of Prodigies as frighted all Ranks and Degrees of People, in a Manner, out of their Wits.

2. Whilſt *Motezuma*'s Court was taken up with melancholy Reflections, *Hernan Cortes* endeavoured to obtain ſome Account of the Country; at that Time *Franciſco Montejo* returned from his Voyage, having coaſted ſome Leagues to the Weſtward, and diſcovered a Town called *Quiabiſlan*, ſituated in a fertile Soil, and well cultivated, near an anchoring Place or Bay, capacious enough, where, in the Opinion of the Pilots, the Ships might ride and be ſecure, under the Shelter of ſome great Rocks which broke the Force of the Winds. This Place was diſtant from *St. Juan de Ulua* about twelve Leagues, and *Hernan Cortes* began to conſider it as a commodious Situation: But before he came to a Reſolution *Motezuma*'s Anſwer arrived.

Teutile, with the principal Captains of his Troops, came with their little perfuming Pans, burning Gum Copal. After the Smoaking, Courteſies, and Ceremonies were over, *Teutile* ordered *Motezuma*'s Preſent to be produced, which was ſomewhat leſs, but of the ſame Sort of Goods and Pieces of Gold as came with the firſt Embaſſy. All that they brought particular, were four green Stones like Emeralds, called *Chalcuities*; and *Teutile* told *Cortes*, with a great deal of Gravity, that *Motezuma* had ſent thoſe Stones to the King of *Spain* as Jewels of an ineſtimable Value. The Embaſſy was delivered in Terms reſolute and diſagreeable, and the Concluſion of it was to diſmiſs the Gueſts without giving them leave to reply. Night drew on, and when *Cortes* was beginning his Anſwer, the *Ave-Maria* Bell rung in the Barrac, that ſerved for a Chapel, and he kneeled down to ſay that Prayer, as did all the reſt after his Example. Their Silence and Devotion ſtruck the *Indians* with Admiration, and *Teutile* aſked Donna *Marina* the Meaning of that Ceremony; *Cortes* underſtood their Queſtion, and thought it proper to make uſe of this Opportunity, while he ſatisfied their Curioſity, to talk to them upon the Subject of Religion, beginning to return to his Anſwer, by telling *Teutile* that one Point of his Embaſſy, and the principal Motive which his King had to offer his Friendſhip to *Motezuma*, was the Obligation Chriſtian Princes lay under to oppoſe Idolatry, and the Deſire he had to inſtruct him in the Knowledge of the Truth, and to help him to get free from the Slavery of the Devil, the inviſible Tyrant of his Kingdoms, who, in reality, held him a Slave and a Vaſſal, though, in outward Appearance, he was ſo powerful a Monarch; and that coming from ſuch remote Countries upon Affairs of ſuch a Nature, and in the Name of another more powerful Monarch, he could not omit making new Efforts, and perſevering in his Inſtances till he ſhould prevail to be heard: Since he came on a peaceful Account, as appeared by the ſmall Number of his Men, from which no Suſpicion could be had of greater Deſigns.

No ſooner had *Teutile* heard the Reſolution of *Cortes*, than he ſtarted up haſtily, and with ſome Sort of Impatience, between Anger and Confuſion, told him, That hitherto the great *Motezuma* had treated him as a Gueſt, but that if he continued obſtinate it would be his own Fault if he found himſelf treated as an Enemy; and, without ſtaying for an Anſwer, or ſo much as taking leave, he turned his Back and went haſtily out of his Preſence, followed by *Pilatoe* and the reſt of his Attendants. *Hernan Cortes* was a little ſtartled at *Teutile*'s Proceeding, but ſo much Maſter of himſelf, that, turning to his People with a Smile in his Countenance, " We ſhall " ſee, ſays he, where this Challenge will End; we know, " for the moſt Part, Threats are the effects of Fear." And that very Night the Guards were doubled, and *Cortes* provided againſt what was poſſible, as againſt a Thing certain, for Commanders can never be too careful. As ſoon as Day appeared, the *Spaniards* found a conſiderable Alteration, which gave them ſome Diſturbance; for thoſe *Indians* which inhabited *Pilpatoe*'s Cabins were retired, and not a Man appeared in all the Country: Thoſe alſo kept away who uſed to bring Proviſions from the neighbouring Towns.

Theſe Beginnings of Want were ſufficient to make ſome Soldiers begin to be uneaſy, looking upon it as very unadviſed to think of ſettling in that Country, which Murmuring, ſome Friends of *Velaſquez* took Advantage of, and began to exclaim, ſaying in common Diſcourſe, That *Hernan Cortes* had a Mind to deſtroy them, and ambitiouſly purſued a Deſign without a Force proportioned to the Undertaking. That the Intention of maintaining themſelves with ſuch a Handful of People in the Dominions of ſo powerful a Prince, would be judged raſh by all Men. And that it was now neceſſary that they ſhould all demand to return to the Iſland of *Cuba*, in order to refit the Fleet and reinforce the Army.

Cortes being informed of this, made uſe of his Friends and Confidents to enquire the Opinions of the reſt of his Men, and found that he had on his Side the moſt, and thoſe too of greateſt Conſequence, upon which he ſuffered himſelf to be ſeen by the Malcontents. *Diego de Ordaz* was the Perſon who ſpoke in the Name of all, and with ſome Heat and Diſreſpect told him, That as his Forces were very unequal to the Attempt he was about to make, his Soldiers thought he would do much better to return and endeavour to get ſuch Reinforcements as might enable him to purſue his Deſign with ſome Probability of Succeſs. *Cortes* heard him patiently, and then told him calmly, that if all the Soldiers were of that Opinion they were very unfit for ſuch an Enterprize, and he would think of returning home.

3. After *Ordaz* and his Party had left *Cortes*, he gave Direction for publiſhing the Return to the Iſland of *Cuba*, and ordered the Captains ſhould embark with their reſpective Companies on board the Veſſels under their Command, and be ready to ſail the next Day early. But no ſooner was this Declaration publiſhed, than thoſe who were under-hand in the General's Intereſt began to ſtir in the Affair, crying out, That *Cortes* had deceived them by profeſſing he meant to ſettle in that Country, they would not leave it, that if he had a Mind to retire he might, with ſuch as were willing to follow him, for they ſhould not want ſome Gentleman that would take the Command. This Clamour was ſo well managed, that it brought over many that had been forced or perſuaded into the contrary Faction; and *Cortes*'s Friends who had ſtirred up one Part were obliged to appeaſe the other.

They commended their Reſolution, and offered to ſpeak to *Cortes* to ſuſpend the Execution of his Order, and before this Ardour cooled they went to him, attended by many of the Soldiers, in whoſe Preſence they told him in a high Strain, That the Troops were upon the Point to mutiny on Account of his Order: They complained that he had taken ſuch a Reſolution without the Advice of their Captains: They put him in mind of what had happened to *Juan de Grijalva*, whoſe Diſgrace was occaſioned by his not making a Settlement in the Country, he had diſcovered, and maintaining himſelf there; for which he was treated as a puſilanimous Perſon, and the Command of the Fleet taken from him: They told him, in ſhort, what he had directed ſhould be told him, which he received as if it had been unexpected News. When they had done, he ſaid that he had been miſinformed, that he would proceed with ſuch as were willing, that he would conſtrain nobody, but, on the contrary, would cauſe a Ship and every Thing neceſſary to be provided for carrying back to *Cuba*, ſuch as found they had not Courage enough to follow him and his Friends.

This Reſolution met with great Applauſe, for ſome made Rejoicings becauſe they were ſincerely glad, and others that they might not be diſtinguiſhed from thoſe that really were ſo. None were ſo bold, at that Time, as to contradict the making of a ſettlement: Nor did thoſe very Men who had before been Malcontents know what to ſay for themſelves. But *Cortes* admitted thoſe Excuſes they offered without enquiring further into the Affair, laying that up for a better Opportunity. It happened that whilſt *Bernal Diaz del Caſtillo*, with another Soldier, ſtood at one of the Avenues, they ſaw Five *Indians* coming along the Road next the Sea-ſide, towards the Quarters, and thinking them too ſmall a Number to alarm the Army, they ſuffered them to approach.

They ſtopped at a little Diſtance, and ſignified by Signs that they came in a peaceable Manner, with a Meſſage to their General; *Diaz* went with them, leaving his Companion in the ſame Poſt to obſerve if any more followed. *Cortes* received them very civilly, ordered them to be well treated before he heard them, and obſerved they were of another Nation, as differing from the *Mexicans* in their Habit, though, like them, they had Rings in their Ears and Lips, with Jewels hanging to them. Their Language alſo had a different Sound, and when *Aguilar* and Donna *Maria* came, it appeared that they ſpoke in a different Idiom, and it fell out happily that one of them underſtood, and with ſome Difficulty pronounced, the *Mexican* Language, by which Means, and not without ſome Trouble, it was known that they were ſent by the Lord of *Zempoalla* to viſit the Captain of thoſe valiant People, whoſe great Actions in the Province of *Tabaſco* had reached his Ears, and to inform him, that being a warlike Prince, and a Friend to brave Men, he deſired his Friendſhip.

They dwelt much upon the Value their Maſter had for good Soldiers, as doubting leaſt the *Spaniards* ſhould attribute that to his Fear, which they would have thought the Effects of his Inclination. *Cortes* very courteouſly accepted of the Friendſhip propoſed to him on the Part of their Cazique, looking upon it as a particular Favour from Heaven, that this Embaſſy ſhould arrive at a Time when the *Mexicans* had left him, of whom he was now growing jealous; and he put the more Value upon it when he underſtood that the Province of *Zempoalla* was in the Road to that Place which *Franciſco de Montejo* diſcovered from the Coaſt whither he was thinking to remove his Quarters. He aſked the *Indians* ſome Queſtions, to inform himſelf of the Forces of the Cazique.

It being aſked how it came to paſs that they (being ſo near) had ſo long delayed coming with this Propoſal, they anſwered, that the *Zempoallans* had nothing to do where the *Mexicans* appeared, whoſe Cruelties were abhorred by their Nation. This Intelligence was not diſagreeable to *Cortes*, and diving farther into it, thro' Curioſity, he underſtood that *Motezuma* was a cruel Prince, abhorred for his Pride and Tyranny, that many of his People were ſubject out of Fear; and that ſome Nations were deſirous to free themſelves from his Yoke. This made his Power appear the leſs formidable, and ſeveral Stratagems and Means of increaſing his Army came into his Head, which gave him ſome Sort of Encouragement.

The firſt that occurred, was to take Part with thoſe afflicted People, believing it would not be difficult to form a Party againſt a Tyrant, among his own Rebels. So he reaſoned then, and it fell out afterwards accordingly: He immediately diſmiſſed thoſe *Indians* with ſome Gifts, in Token of Friendſhip; and told them he would ſoon come and pay their Maſter a Viſit, in Order to eſtabliſh a Friendſhip with him, and give him the Aſſiſtance he ſhould ſtand in need of.

His Intent was to paſs through the Province, and take a View of *Quiabiſlan*, where he had Thoughts of fixing his firſt Settlement, from the good Account he had received of its Fertility; but it behoved him, for other Ends, which he was then contriving how to compaſs, to haſten the forming his ſmall Corporation in his preſent Quarters, although he was to remove the Troops to a place more commodious: He communicated his Reſolution to thoſe Captains that were his Confidents, and having by this Means ſmoothed the Way for what he had to propoſe, he aſſembled the Men in Order to name the Officers of the new Government. At which ſhort Conference, thoſe that were acquainted with the Mind of *Cortes* prevailed; and *Alonſo Portocarrero*, and *Franciſco de Montejo* were appointed Alcaldes, *Alonſo Davila*, *Pedro*, and *Alonſo de Alverado*, and *Gonzalo de Saudoval* were Regidores. The chief Alguazil and Procurator General *Juan de Eſculante*, and *Franciſco Alverez Chico*.

They alſo oppointed other inferior Officers; and, having taken the accuſtomed Oath, to obſerve Reaſon and Juſtice, according to their Duty, for the greater Service of God and the King, they took Poſſeſſion, and began to exerciſe their Employments with the uſual Solemnity, calling their new Settlement by the Name of *Villa Rica de la Vera Cruz*; which Title it received in the Place where it was afterwards fixed, being called *Villa Rica*, in Remembrance of the Gold they had ſeen in that Country, and *de la Vera Cruz*, in Acknowledgment of their landing there, on the *Friday of the Croſs*, or *Good Friday*, as we call it. *Cortes* was preſent as a private Perſon among the other Members of the Colony, and, though he could not eaſily lay aſide that kind of Superiority which is want to conſiſt in the Reſpect which others pay, he endeavoured to ſupport the Authority of thoſe new Miniſters, and by his Reſpect to reduce the others to obey them.

4. The next Day in the Morning the Council met, under colour of conſulting about ſome Points relating to the Preſervation and Augmentation of the new Settlement, and ſoon after *Hernan Cortes* deſired Admittance, to propoſe an Affair which concerned the public Good. The Council roſe up to receive him, and he, paying his Reſpect to the Magiſtracy of the Town, went and took his Seat immediately next to the firſt Regidore, and then laid open the Reaſon which induced him to diſapprove that Commiſſion under which he had hitherto acted; and having finiſhed his Diſcourſe, he threw upon the Table the Commiſſion given him by *Diego Velaſquez*, kiſſed the Truncheon, and delivered it into the Hands of the Alcalde, and retired to his Barrac.

He was under no Uneaſineſs about the Event, for he had ſo diſpoſed Matters that he ventured but little in the Reſolution; but it muſt be confeſſed, that the Manner of acting was very handſome and noble, and no leſs commendable, than the Art he uſed to ſupply the Defects in his Authority. The Council ſoon reſolved upon the Election, for ſome had conſidered what they were to propoſe, and others had nothing to reply: They all voted to admit the Reſignation of *Cortes*; but that he ought to be obliged to take upon him the Command of the Army again, the Town giving him his Commiſſion in the Name of the King, during the Time, and in the Interim, until his Majeſty ſhould otherwiſe Order. And they reſolved to communicate the new Election to the People, either to ſee how they would receive it, or, in Order to be ſatisfied of their Approbation. The People were called together by the Voice of a Cryer; and the

Renunciation of *Cortes* being publiſhed, with the Reſolution of the Council, they received ſuch Applauſe as was concerted.

Some congratulated the Council on their good Election; others demanded *Cortes*, as if he had been denied, and if any were of a contrary Opinion they diſſembled, and took care not to be remarkable by their Silence. This Work being over, the Alcades and Regidores went with the greateſt Part of the Soldiers to the Quarters of *Cortes*, and acquainted him that the Town of *Villa Rica de la Vera Cruz* had, in the Name of the King Don *Carlos*, with the Conſent and Approbation of the Inhabitants in full Council, choſen and appointed him General of the Army of *New Spain*; and, in caſe it were neceſſary, did require and command him to take upon him that Poſt, it being convenient for the public Good of the Town and his Majeſty.

Cortes accepted of the new Command with great Reſpect, and now began to govern the Troops with another kind of Authority, which had its Effect in the Obedience of the Soldiers. The Dependants upon *Velaſquez* reſented this Alteration in a very indiſcreet Manner, for they could not diſguiſe their Vexation, nor would they give way to the Current which they were not able to ſtem. They endeavoured to invalidate the Authority of the Council, and caſt Reflections on *Cortes*, blaming his Ambition, and talking with Contempt of thoſe that were deceived. And, as Scandal has its hidden Poiſon, and an unknown Power over thoſe that hear it, it ſpread in their Converſation, where there wanted not ſome who hearked to, and endeavoured to foment it.

Cortes did all in his Power to remedy this Inconvenience, apprehending it might draw away thoſe who were already diſquieted, or put thoſe into a Commotion who were eaſily ſtirred up. He had already found by Experience how little his Patience availed, and gentle Means made the Evil worſe, and therefore reſolved to make uſe of Severity, which generally has the beſt Effect upon the Inſolent. He ordered *Diego de Ordaz*, *Pedro Eſcudero*, and *Juan Velaſquez de Leon*, to be ſeized, carried aboard the Fleet, and put in Irons. This Action ſtruck a great Terror into the Troops, and it was his Deſign to improve it, declaring in a very poſitive and reſolute Manner, that he ſeized them as ſeditious Perſons, and Diſturbers of the public Peace; and, that he would proceed againſt them, and make them pay for their Obſtinacy with the Loſs of their Heads.

In which Diſpoſition he continued ſome Days, without proceeding to the Rigour of Juſtice; for he rather deſired to reform, than puniſh them. At firſt he ſuffered none to go near them, but afterwards permitted it, artfully making uſe of this Permiſſion for ſome of his Confidents to endeavour to reduce and bring them to Reaſon, which in Time they compaſſed, he ſuffering himſelf to be pacified ſo effectually, that he made them his Friends; and they faithfully ſtood by him in all the Accidents which afterwards befel him; believing that they owed their Lives to his Clemency only.

5. The Perſons before-mentioned were no ſooner impriſoned, than *Pedro de Alverado* marched with a hundred Men to view the Country, and bring in Proviſions; for they began to be ſenſible of the Want of thoſe *Indians* who uſed to provide for the Army. He was ordered to commit no Hoſtility, and he had the good Fortune to perform his Commiſſion with little Trouble. At a ſmall Diſtance he came to ſome Villages, the Inhabitants whereof had fled into the Woods, but had left their Houſes well provided, and without doing any Damage either to them or their Furniture, the Soldiers took what they had Occaſion for; and returned to their Quarters thoroughly loaded, and very well pleaſed. *Cortes* immediately diſpoſed his March as he had reſolved, and the Ships accordingly ſailed for the Bay of *Quiabiſlan*; he followed by Land, taking the Road of *Zempoalla*, keeping the Coaſt on his Right, and ſending a Party before to diſcover the Country, providing againſt all Accidents which might happen in Circumſtances where Security might be juſtly accounted Neglect.

They reached in a few Hours the River of *Zempoalla*, and finding it deep, they were obliged to make uſe of ſome Canoes, and other Veſſels of Fiſhermen, which they found on the Shore; in which the Soldiers paſſed over, making their Horſes ſwim. Having overcome this Difficulty, they arrived at ſome Houſes in the Diſtrict of *Zempoalla*; and they took it for no good Sign, not only finding them forſaken by the *Indians*, but alſo without either Furniture or Proviſions, only they left in their Temples ſeveral Idols, with various Inſtruments, or Knives made of Flint, and ſome miſerable Remains of human Victims ſcattered upon the Ground, which at the ſame Time moved Compaſſion, and ſtruck them with Horror. Here they firſt ſaw the *Mexican* Books, which have been already mentioned: There were three or four of them in the Temples, which was thought contained the Rights of their Religion, each made of a long thin varniſhed Cloth, which they folded in equal Foldings, ſo that every Fold made a Leaf, and all together made up the Volume like ours to Appearance, and were written or painted with that kind of Cyphers uſed by the Painters of *Teutile*.

The Army were preſently quartered in the beſt Houſes, and paſſed the Night ſomewhat uneaſily, their Arms in Readineſs, with Sentinals at a convenient Diſtance. The next Day they continued their March in the ſame Order along the great Road, which turned off to the Weſtward, leading farther from the Shore, and during the Morning, they ſaw no Perſon of whom to gain Intelligence, which gave them Uneaſineſs; till, entering into ſome very pleaſant Meadows, they diſcovered twelve *Indians*, who were coming in ſearch of *Cortes* with a Preſent of Hens and Bread, ſent him by the Cazique of *Zempoalla*; very earneſtly entreating him not to fail of coming to his Town, where he had provided Quarters for his Men, and where he ſhould be more plentifully entertained. By theſe *Indians* he underſtood, that the Cazique's Reſidence was at a Town one Sun's Diſtance from that Place, which, in their Language, ſignifies the ſame as one Day's March; for they underſtood not the Diviſion of Leagues, but meaſured Diſtance by Suns, counting Time, and not the Way. *Cortes* diſmiſſed ſix of the *Indians*, with many Thanks for the Preſent, keeping the other ſix to ſhew him the Way, and to aſk them ſome Queſtions; for he was not entirely ſatisfied with this kind Treatment, which being ſo much unlooked for, ſeemed the leſs to be depended on. That Night they halted in a ſmall Village, thin of Inhabitants; but very deſirous to entertain the *Spaniards* well: And by the Behaviour of thoſe People to the *Spaniards*, judged that their Nation was inclined to Peace; nor were they deceived in their Conjectures.

In the Morning the Army moved towards *Zempoalla*, following the Guides with all neceſſary Caution, and towards Evening there came twenty *Indians* forth, to receive *Cortes*, well dreſſed after their Faſhion, who, after having paid their Reſpects, ſaid, That their Cazique did not come with them, by reaſon of ſome Impediment, but had ſent them to pay that Reſpect on his Part, being very deſirous to be acquainted with ſuch valiant Gueſts, and to receive them into his Friendſhip, and Eſteem. The Town was large and beautiful, ſituated between two Rivers, which fertilized the Country, deſcending from ſome Mountains at a ſmall Diſtance, which were covered with Trees, and eaſy of Aſcent. The Buildings were of Stone, covered and adorned with a ſort of Lime very white and ſhining, and afforded a pleaſant and noble Shew at a Diſtance, inſomuch that one of the Scouts, who was ſent before, returned in haſte, crying aloud, That the Walls were of Silver; which Miſtake made much Mirth in the Army, where many at firſt perhaps believed it, who afterwards made a Jeſt of his Credulity.

The Squares and Streets were filled with People, who came to ſee the Entry without any Arms that could give Suſpicions, or any other Noiſe than that which uſually proceeds from a Multitude. The Cazique came out to the Gates of his Palace, and his Diſtemper appeared to be a monſtrous Fatneſs, which oppreſſed and disfigured him: He drew near with ſome Difficulty, ſupported by the Arms of ſome noble *Indians*, by whom he ſeemed to direct his Motion. His Habit was a Mantle of fine

Cotton thrown over his naked Body, enriched with various Jewels and Pendants, which alſo he wore in his Ears and Lips: A Prince of a very extraordinary Make, in whom Weight and Gravity agreed wonderfully well. It was neceſſary for *Cortes* to put a Stop to the laughing of the Soldiers. But as ſoon as the Cazique began his Diſcourſe, receiving *Cortes* with his Arms, and welcoming the reſt of the Captains, he ſhewed his good Senſe, and by his Speech forced a Reſpect to his Perſon.

He diſcourſed much to the Purpoſe, and ſhortened his Compliments with Reſpect and Diſcretion, bidding *Cortes* retire to reſt after his Journey, and quarter his Men, after which he would viſit him in his Quarters, and talk more at Leiſure about their common Intereſts. He had provided Quarters in ſquare Courts which had many Chambers, where they were all accomodated, and plentifully furniſhed with all they had Occaſion for. After which the Cazique made Way for his Viſit, by ſending a Preſent of Jewels, of Gold, and other Curioſities, to the Value of above 2000 Peſos, and ſoon after came himſelf with a ſplendid Attendance, in a Chair carried on the Shoulders of the Chiefs of his Family. *Cortes* went forth to receive him, attended by his Captains, and, giving him the Precedence and the Right-hand, retired with him and his Interpreters, for he thought it convenient to talk to him without Witneſs. After having made him the uſual Speech about the Intent of his coming, the Grandeur of his King, and the Errors of Idolatry; he proceeded to tell him that the Deſign of thoſe valiant Troops was to redreſs Wrongs, puniſh Violence, and take Part with Juſtice and Reaſon.

He touched on that Point on purpoſe to draw him in, by Degrees, to complain of *Motezuma*, and to diſcover what Advantages might be expected from his Indignation, of which he had been before informed. It preſently appeared, by the Change of his Countenance, that *Cortes* had touched the right String; and, before he reſolved on an Anſwer, he began to ſigh, as one who found a Difficulty in making his Complaints: But at length, his Reſentment prevailing, he broke out into Lamentations of his Unhappineſs, and told him, That all the Caziques of the neighbouring Countries were under a miſerable Slavery, groaning under the Oppreſſions and Tyranny of *Motezuma*, without ſufficient Force to free themſelves, or Courage to think on a Remedy; that he cauſed himſelf to be ſerved and adored by his Subjects like one of his Gods, and would have his Violences reverenced like the Decrees of Heaven: But that it was not his Deſire to have him adventure to ſupport them, becauſe *Motezuma* was too powerful and ſtrong for him to reſolve to declare himſelf his Enemy, nor would it be agreeable to the Laws of Civility to pretend to his Friendſhip by ſelling, at ſo great a Price, the ſmall Service he had done him.

Cortes endeavoured to comfort him; telling him, That he ſhould little regard *Motezuma*'s Power, having Juſtice on his Side; but that he was obliged to paſs on to *Quiabiſlan*, where the Oppreſſed and Needy ſhould find him ready to aſſiſt them, and all who, having Reaſon on their Side, ſtood in need of his Arms, which he might communicate to his Friends and Confederates; aſſuring them all, that *Motezuma* ſhould not be able to oppoſe it while he undertook their Defence. With this they both took Leave, and *Cortes* prepared for his March, having gained the Good-will of that Cazique, and being extremely well pleaſed in himſelf, at the better Proſpect of his Deſigns; which, from being only diſtant Views of the Imagination, began now to appear poſſible.

6. The Army being ready to march, they found four hundred *Indians* provided to carry their Baggage and Proviſions, and to help to conduct the Artillery, which was a great Eaſe to the Soldiers, and looked upon as an extraordinary Reſpect of the Cazique, till they underſtood from Donna *Marina*, that it was a common Practice to aſſiſt their Allies with that Sort of Luggage-carriers, which in their Language, they call *Tamenes*, who are able to travel five or ſix Leagues with three Quarters of an Hundred Weight on their Backs. The Country they were entering was pleaſant and delightful; Part covered with great Trees, and the reſt cultivated; at which Sight the *Spaniards* went on chearfully, rejoicing at their good Fortune in marching through ſo plentiful a Country. At Sun-ſet they found themſelves near a little Village unpeopled, where they ſtaid to avoid the Inconveniency of entering *Quiabiſlan* by Night; and arrived the next Day by Ten in the Morning.

The Buildings appeared at a Diſtance, on an Eminence of Rocks, which ſeemed to ſerve inſtead of Walls; a Situation naturally ſtrong, the Avenues narrow and ſteep, which they found without Defence, and yet they entered with Difficulty. The Cazique had retired with the Inhabitants to diſcover at a Diſtance, the Intention of the *Spaniards*; and the Troops took Poſſeſſion of the Town, without finding any Perſon from whom they could gain the leaſt Information, till coming to a Square where the *Indians* had their Temples, there came out Fourteen or Fifteen *Indians* to meet them, handſomely dreſſed after their Manner, and with Abundance of Civilities endeavoured to cover their Fear with Reſpect. *Cortes* encouraged them by his Careſſes, and gave them ſome Beads of blue and green Glaſs, a ſort of Coin, which for its Effects began to be valued even among thoſe who were acquainted with it; with which good Treatment they recovered from the Fright, and gave him to underſtand, That their Cazique had withdrawn himſelf to prevent a War, by putting himſelf on his Defence, and not adventuring his Perſon by truſting to armed Troops which he did not know; and it was impoſſible to hinder the Flight of the Inhabitants, who were under leſs Obligations to run themſelves into Danger. But that as ſoon as the reſt ſhould be ſenſible of the Goodneſs of ſuch Gueſts, they would immediately return to their Houſes, and account it a great Happineſs to ſerve and obey them. *Cortes* gave them all the Aſſurances poſſible, and, whilſt they were gone with this News, he gave ſtrict Orders to the Soldiers to treat the *Indians* well, who ſoon ſhewed what Confidence they had in the *Spaniards*; for that very Night ſome Families returned, and, in a little Time, the Town was filled again with its Inhabitants.

Some Time after the Cazique returned, bringing with him the Cazique of *Zempoalla*. They both came in Litters, on the Shoulders of Men. He of *Zempoalla* made a handſome Excuſe for his Neighbour, and, after ſome ſhort Diſcourſe, they introduced their Complaints of *Motezuma*, recounting, with great Warmth, and ſometimes with Tears, his Tyrannies and Cruelties; to which the Cazique of *Zempoalla* added as the utmoſt Aggravation: "This Monſter is ſo proud and fierce, that, beſides his "impoveriſhing us by Tributes, and raiſing his Wealth "out of our Calamities, he invades the Houſes of his "Subjects, taking forcibly from us both our Wives and "Daughters, ſtaining with their Blood the Altars of his "Gods, after having ſacrificed them firſt to other Uſes "more cruel, and leſs honeſt." *Cortes* endeavoured to comfort them, and bring them to enter into a Confederacy with him; but at the Time that he was enquiring into their Strength, and the Number of People that would take Arms in Defence of their Liberty, two or three *Indians* came in, and ſeemed in a great Fright, and whiſpering the Caziques in their Ears, put them into ſuch Confuſion that they roſe up, loſing Courage and Colour, and went haſtily away, without ſo much as taking Leave or making an End of their Diſcourſe.

The Cauſe of this Diſorder was quickly known; for ſix Royal Commiſſioners, ſuch as went about the Kingdom to gather *Motezuma*'s Tributes, were ſeen paſſing before the *Spaniards* Quarters. They were adorned with Abundance of Feathers and Pendants of Gold on fine clean Cotton Cloths, with a ſufficient Number of Servants and inferior Officers; who, moving great Fans made of Feathers, fanned their Maſters to cool them, or ſhaded them from the Sun as Occaſion required. *Cortes* went out to the Gates, with his Captain, to ſee them, and they paſſed on without paying him any Reſpect, and with Countenances that ſhewed Indignation; which Pride provoked ſome of the Soldiers ſo much, that they would have chaſtiſed them, had they not been with-held by *Cortes*, who reſted ſatisfied at that Time with ſending Donna *Marina*, with a ſufficient Guard, to inform himſelf of what they were doing. By this Means it was underſtood, that, after having ſeated themſelves in the Town-houſe, they ſummoned the Caziques to appear before them, and reprimanded them publickly for their Boldneſs in admiting Strangers into their Town, who were Enemies to their King; and therefore, beſides the ordinary Service, to which they were obliged, they demanded twenty *Indians* to ſacrifice to their Gods, as an Attonement for ſuch a Crime.

Cortes ſent for the two Caziques by ſome Soldiers, who had Orders, without any Noiſe, to bring them to his Preſence; when letting them know that he ſaw into their moſt hidden Deſigns, he told them, That he was well acquainted with the Vileneſs of thoſe Commiſſioners, who, without any Pretence but their having admitted his Troops, endeavoured to impoſe on them new Tributes of Human Blood: That it was no Time for ſuch Abominations, nor would he ſuffer ſuch horrid Commands in his Preſence; but ordered them, without fail, to call their People, ſeize the Commiſſioners, and leave him to maintain what they ſhould do by his Advice. The Caziques refuſed to execute ſuch a bold Command, as being grown mean-ſpirited; but *Cortes* repeated his Order with ſo much Reſolution, that they immediately went to execute it, and that with great Applauſe of the *Indians*.

They ſeized the Miniſters of *Motezuma*, whom they put in a kind of Pillories in their Priſons, and very incommodious, for they held the Delinquents by the Neck, obliging them continually to do their utmoſt with their Shoulders to eaſe the Weight, for the ſake of breathing. It was very pleaſant to ſee how proud the Caziques returned to give an Account of their noble Action, for they thought to execute them, and to make them ſuffer the Puniſhments aſſigned by the Laws to Traitors; and, ſeeing that would not be permitted, they deſired to ſacrifice them to their Gods, as if it were a kind of Grace. The Priſoners being ſecured by a ſufficient Number of *Spaniſh* Soldiers, *Cortes* retired to his Quarters, and to conſider with himſelf what was to be done; for he was not willing abſolutely to break with *Motezuma*, but ſtill to keep him in Suſpence. On the other Hand he conſidered it as a very neceſſary Point to maintain that Party which was beginning to form, that he might have their Aſſiſtance, in Caſe he ſhould happen to want them. In fine, he held it moſt convenient to manage Matters with *Motezuma* by making a Merit of ſuſpending the Effects of that Diſreſpect.

The Reſult of thoſe Reflections was, to ſend, at Midnight, for two of the Priſoners with all poſſible Privacy; and, after receiving them courteouſly, to tell them, That he had ſent for them in order to ſet them at Liberty: And that, as they received it ſolely from his Hands, they might aſſure their Prince he would endeavour very ſpeedily to ſend the reſt of their Companions, who remained in the Power of the Caziques, whom he would endeavour to make ſenſible of their Faults, and perform all that ſhould be for his Service; for that he was deſirous of Peace, and to teſtify, by his Speech and Actions, all the Marks of Civility that were due to the Embaſſadors of ſo great a Prince. The *Indians* durſt not ſet out on their Journey, for Fear of being killed, or taken by the Way; and he was forced to give them a Guard of *Spaniſh* Soldiers, who conveyed them to the next Bay, where the Ships lay, and one of the Boats was ordered to land them beyond the Diſtrict of *Zempoalla*.

The Caziques came in the Morning, much troubled for the Eſcape of the two Priſoners; and *Cortes* received the News with Signs of Surprize and Concern, blaming their Want of Vigilance, and, upon this Pretence, he ordered, in their Preſence, that the reſt ſhould be carried aboard the Fleet; but he privately directed the Officers on board to treat them well, and to keep them ſafe, by which he gained the Confidence of the Caziques, without diſobliging *Motezuma*, whoſe Power, ſo much cried up and dreaded among thoſe *Indians*, made him careful how he acted.

7. The good Behaviour of the *Spaniards* towards their Allies was quickly divulged through all the Diſtricts thereabouts; and the two Caziques, of *Zempoalla* and *Quiabiſlan*, gave Notice to all their Friends and Confederates of their Advantages, being freed from Impoſitions, and their Liberty ſecured by the Protection of a People invincible, who knew the very Thoughts of Men, and ſeemed of a ſuperior Nature. The Report ſpread with Exaggerations. It was ſaid publicly among the People, That their Gods were come down to *Quiabiſlan*, darting Lightning againſt *Motezuma*; which Credulity laſted ſome Time among the *Indians*, and cauſed a Veneration, which, though ill founded, very much facilitated the Beginnings of this Conqueſt.

This high Opinion of the *Spaniards* ſo increaſed, and the Name of Liberty ſounded ſo well in the Ears of the Oppreſſed, that, in a few Days, there came to *Quiabiſlan* thirty Caziques of the Mountains that were in Sight, which had numerous Settlements of *Indians*, called *Totanaques*, a ruſtic People, of different Languages and Cuſtoms; but ſtrong, active, induſtrious, and remarkable for their Courage. They paid Obedience, offered their Troops, and, in the Form propoſed to them, ſwore Fidelity and Vaſſallage to the King of *Spain*, of which a ſolemn Act was made before the Secretary of the Council.

The Number it is likely was very great, the Settlements many, and the People eaſily ſtirred up againſt *Motezuma*; eſpecially for that the mountainous Country was inhabited by warlike *Indians* lately ſubdued, or not quite conquered. This kind of Confederacy being made, the Caziques returned to their Houſes, ready to do as they had been commanded; and *Cortes* reſolved to ſettle the Town of *Villa Rica de la Vera Cruz*, which till then moved with the Army, though obſerving its proper Diſtinctions as a Republic. They pitched upon the Plain between the Sea and *Quiabiſlan*, half a League from that Town, a pleaſant Place which invited them by its Fertility, abounding in Water, and having great Plenty of Trees, which lay commodious for the cutting of Timber for the Buildings. They laid the Foundations, beginning with the Church; the Handicraftmen were diſtributed; Carpenters and Maſons, *&c.* who came with Soldiers Pay; and the *Indians* of *Zempoalla* and *Quiabiſlan* aſſiſting with equal Activity, the Houſes began to riſe, mean as to Architecture, rather for a Covering than any Commodiouſneſs. They preſently drew the Compaſs of the Wall, with Traverſes of ſtrong Mudwork; a ſufficient Defence againſt the Weapons of the *Indians*, and, in that Country, it might be properly called a Fortreſs. The principal Officers of the Army helped to carry on the Work, applying both their Hands and Shoulders, and *Cortes* worked hard as if he had ſet himſelf a Taſk, not ſatisfied with the ſeeming Diligence, which is ſufficient in a Superior, to ſet a good Example.

In the meen Time they had at *Mexico* the firſt Advice of the *Spaniards* being admitted into *Zempoalla* by that Cazique, a Man, in their Opinion, of ſuſpected Fidelity, and the neighbouring Places little to be depended upon. Which Account ſo provoked *Motezuma*, that he propoſed to draw together his Forces, and march out in Perſon to chaſtiſe this Offence of the *Zempoallans*, and put the reſt of the Mountain Nations under the Yoke, taking the *Spaniards* alive, whom he had already deſtined for a ſolemn Sacrifice to his Gods.

But, at the ſame Time that he began to make great Preparations for this Enterprize, the two *Indians* whom *Cortes* had diſpatched from *Quiabiſlan* arrived at *Mexico*, and gave an Account of their Impriſonment, and that they owed their Liberty to the Captain of the Strangers, who had ſent them to repreſent how much he deſired Peace, and how far it was from his Intentions to do him any Diſſervice; extolling his Courteſy and Mildneſs ſo much, that it might be perceived, by the Praiſes they gave *Cortes*, how much they had been frighted by the Caziques.

Upon this, Affairs changed. The Anger of *Motezuma* was mitigated, his Preparations for War ceaſed, and he determined again to try Negotiation, and endeavour to divert *Cortes* from his Deſigns by a new Embaſſy and Preſent, to which Meaſures he eaſily inclined; for, in the Midſt of his Anger and Pride, he could not forget the Signals of Heaven, and the Anſwers of his Idols, which he looked upon as evil Omens of his Undertaking, or at leaſt they obliged him to delay the Breach, endeavouring to qualify his Fear after ſuch a Manner, that it ſhould be taken for Prudence by Men, and for Reſpect by his Gods.

His Embaſſadors arrived juſt as the new Settlement and Fortreſs of *Vera Cruz* were completed. They were the Emperor's Nephews, young Men, but aſſiſted by four ancient Princes, who attended them as Counſellors. They told *Cortes*, That the Emperor had determined to chaſtiſe the Caziques, till he received an Account of his Behaviour, which induced him to ſuſpend his Vengeance: That he hoped, however, he would ſoon quit that Country, ſince the Obſtacles which hindred his coming to his Court were in their Nature inſurmountable.

According to his uſual Cuſtom, *Cortes* heard their Diſcourſe with great Temper and Calmneſs, and received the Preſents made him by the Emperor with all Reſpect poſſible; treated the Embaſſadors with great Kindneſs and Complaiſance; made them many Preſents, beſides a proper Return to *Motezuma*: But, at the ſame Time, declared, That Difficulties were no Diſcouragements to him, and the Importance of his Commiſſion was ſuch, that, at all Events, he muſt purſue his Journey. This highly diſguſted the Embaſſadors; but was very uſeful with Regard to the Allies, who were confirmed in their Opinion that *Cortes* was ſomething more than Man, ſince the great Emperor of *Mexico* vouchſafed to court his Friendſhip, and diſcovered an Apprehenſion of his Preſence. They began therefore to conclude themſelves ſafe under his Protection, and to lay aſide that Fear, to which not only they, but their Anceſtors, had been accuſtomed.

8. The Cazique of *Zempoalla*, a ſhort Time after, came to *Vera Cruz*, with ſome principle *Indians*, whom he brought as Witneſſes of what he intended to offer, which was, That now the Time was come to protect and defend his Country; for that ſome Troops of the *Mexicans* were arrived in *Zimpazingo*, deſtroying the Corn-fields, and committing ſome Hoſtilities in his Diſtrict. *Cortes* found himſelf engaged to ſupport the *Zepoallans* to maintain his Credit; and beſides, he thought it would not be right to ſuffer that Inſolence of the *Mexicans* as it were in his Sight, and that in Caſe they were ſome advanced Troops of *Motezuma*'s Army, it would be neceſſary to ſtrike a Terror into them to diſcourage the reſt of his People, for which Purpoſe he determined to march in Perſon; engaging in it ſomewhat too haſtily, for he was yet unacquainted with the Deceits of thoſe People (a capital Vice among the *Indians*) and ſuffered himſelf to be carried away without examining into the Truth. He offered them to march out immediately with his Troops to chaſtiſe thoſe Enemies who diſturbed the Peace of his Allies, and, ordering them to provide *Indians* of Burthen for the Service of the Baggage and Artillery, he made a Diſpoſition immediately for his March, and took the Road of *Zimpazingo*, with four hundred Men, leaving the reſt in the Fortreſs of *Vera Cruz*.

As he paſſed by *Zempoalla* he found two thouſand armed *Indians* whom the Cazique had provided to ſerve under him in that Expedition, divided into four Bodies, with their Captains, Colours, and Arms, according to the Cuſtom of their Militia. *Cortes* thanked him very much for the Care he took to provide that Succour; and though he let him underſtand that he had no Occaſion for his Men upon an Expedition of ſo ſmall Importance, yet he ſuffered them to go to provide againſt all Events; but intimated he did ſo only to let them ſhare in the Glory of the Succeſs. That Night they lodged three Leagues from *Zimpazingo*, and the next Day, in the Afternoon, they diſcovered the Town on the Top of a ſmall Hill, a Branch of the Mountain, among great Rocks, which hid Part of the Buildings.

The *Spaniards* began to overcome the Craggedneſs of the Mountain, but not without conſiderable Trouble; for, being jealous of an Ambuſcade, they went doubling and filing off as the Ground would permit; but the *Zempoallans*, either more dexterous or leſs embarraſſed by the Narrowneſs of the Paths, advanced with a Sort of Fury, which appeared like Valour, but was, indeed, no better than Revenge. *Cortes* was obliged to give Orders to halt, at a Time when ſome Troops of the Van-guard were already in the Town.

He continued his March without meeting any Reſiſtance, and juſt as he was preparing to attack the Town in ſeveral Parts, there came out of it eight Prieſts who enquired for the Captain of that Army, before whoſe Preſence they came in an humble and pitiful Manner, ſuch as ſufficiently ſhewed Submiſſion, without the Help of an Interpreter. Their Dreſs was a black Mantle, of which the End reached the Ground, and the upper Part was gathered and plaited about the Neck, with a Piece hanging looſe in Form of a Hood. Their Hair reached to their Shoulders, clodded with the human Blood of their Sacrifices; Marks of which they ſuperſtitiouſly preſerved on their Faces and Hands, for it was not lawful for them to waſh themſelves. Theſe Prieſts ſoon convinced the *Spaniſh* Commander that he had been impoſed on, that the Troops from *Motezuma* were long ago retired, and that this was only an Artifice of his Allies, who were their Enemies, in Order to make Uſe of him as an Inſtrument for their Deſtruction.

A Thing in itſelf very ſcandalous and baſe, but at this Juncture particularly barbarous and black, as is contributed to draw an Imputation upon the *Spaniards*, which might have been fatal to their Affairs. After hearing their Diſcourſe he returned to his *Indian* Allies, and by the Confuſion of the *Zempoallan* Captains, it appeared that thoſe Prieſts ſpoke Truth, and *Cortes* was concerned at the Deceit, and vexed, at the ſame Time, at the Malice of the *Indians*; but conſidering what was moſt proper to be done upon this Occaſion, he preſently ordered the Captains *Olido* and *Alverado* to go with their Companies, and gather the *Indians* together who had advanced before to get into the Town, and were now buſy in the Pillage, and had taken a conſiderable Quantity of Cloaths and Furniture and ſome Priſoners.

They were brought to the Army ſhamefully loaded, and the plundered People following, crying out for their Goods, for whoſe Satisfaction *Cortes* commanded them to unbind the Priſoners and deliver up the Goods to the Prieſts, that they might reſtore them to their proper Owners, and calling for the *Zempoallan* Captains, reproved them publicly for their Preſumption, telling them they deſerved Death for their Offence, in making Uſe of him only to compaſs their Revenge; however, being warmly entreated by the *Spaniſh* Captains whom he had inſtructed before to pacify him, he pardoned them for that Time, enlarging upon his Clemency, though, in Truth, he did not then dare to chaſtiſe them; knowing well, that to preſerve new acquired Friends, Clemency was more requiſite than Juſtice. Having managed Things ſo as to give him a Reputation with both the Nations, he commanded the *Zempoallans* to lodge without the Town, and marched in with the *Spaniards*, where he was received with the Applauſe due to a Deliverer.

Immediately the Cazique of *Zimpazingo* viſited him in his Lodging, with others of the Neighbourhood, who came out of Friendſhip, acknowledging the King of *Spain* for their Prince, whoſe Name was already beloved and reverenced in that Country, where the People deſired to be his Subjects out of Hatred to *Motezuma*, whom they knew, and Love to a Prince they knew not.

In their March back to *Zempoalla*, the Troops paſſed by two Towns of thoſe that were newly entered into the Confederacy; and while they halted in the Afternoon, a Soldier, whoſe Name was *Mora*, took two Hens, ſo that *Cortes* ſaw it, and was ſo angry becauſe it was done in his Preſence, and in regard that he would have his Soldiers to obſerve Diſcipline, that he ordered him to be hanged, and had not *Peter Alverado* cut him down with his Sword, he had actually died; as it was he dropped down half choaked, and ſome Time afterwards was killed in Battle, at *Guatemala*. The Lord himſelf was near *Zempoalla* waiting for *Cortes* with Proviſions, and under great Concern, on Account of having made him undertake that Journey on falſe Relations; for they were not ſo barbarous as not to be ſenſible that *Cortes* made good his Aſſertion, that he was ſent to maintain Juſtice, which gained him much Reputation; and as the Dread of *Mo-*

tezuma made them uneaſy, they could have wiſhed, that for their greater Security, the *Spaniards* had never departed from their Town; for which Reaſon they ſaid that ſince they were now all one Nation, they ſhould take their Women, and carried them eight beautiful Damſels, Daughters of principal Perſons, with Gold Necklaces and Pendants in their Ears, with Women Servants, the Cazique ſaying that ſeven of them were for the Captains, and the other, being his own Niece, for *Cortes.*

That General, before he would receive the Ladies, inſiſted that Idolatry ſhould be aboliſhed, to which the *Indians* were very loth to conſent, alledging that they had no Occaſion to quarrel with the Gods of their Fore-fathers, ſince they had given them Succeſs in War and good Harveſts; but what ſtruck them moſt, was their Fear that if they diſtroyed theſe Gods, that is to ſay, the Idols they worſhipped, they would puniſh them ſeverely; but *Cortes* put them out of their Terror, by taking that upon himſelf; and when the Idols were once deſtroyed, the People ſubmitted readily enough, in ſpite of all the Pains their Prieſts took to prevent it; and this great Point of Religion once ſettled, *Cortes* and his Commanders made no Sort of Difficulty of accepting the Ladies, which was very agreeable to the *Indians,* who looked upon them thenceforward, not only as their Allies, but as their Countrymen.

9. *Cortes* having thus concluded a League with the *Zempoallans,* marched away to his new Colony of *Villa Rica,* and the ſame Day he came to it a Ship arrived from *Cuba,* commanded by *Franciſco de Salcedo.* The Ship brought Captain *Lewis Martin,* with a Mare and ten Soldiers, and *Salcedo* had a good Horſe. Theſe Perſons brought Advice that *James Velaſquez,* had received the Title of Adelantado, and the King's Commiſſion to trade and make Settlements in the new diſcovered Countries that had been granted him. The Forces having been now three Months in *New Spain,* and the Fort almoſt made defenſible, it was propoſed to go up the Country: But it was reſolved, in the firſt Place, to ſend ſome Perſons to the King, to give an Account of what had been done in his Service, and carry him a fifth of the Gold, and all the reſt that had been given.

Alonſo Puerto Carrero and Captain *de Montejo* were pitched upon to go on this Errand, and *Cortes* thinking that what he had was very little, when every Officer and Soldier had his Share, and that the King's Fifth being accordingly very inconſiderable, it would not anſwer the Account they were to give of the Wealth of that Country; he ordered *Francis de Montejo* and *James de Ordaz,* that they, as Men in Authority, ſhould ſpeak to the Soldiers Man by Man, to reſign their Shares to be ſent to the King as a Preſent; many of the Gentlemen to whom the ſame was propoſed, freely offering to do the like. They readily conſented, and all that had been got was converted into a Preſent, for *Cortes* would not deduct his own fifth Part, nor any Salary, only taking ſo much out of the whole Sum, as was neceſſary for the Expence of the Voyage, and to maintain the Meſſengers going and coming, beſides ſomething *Cortes* ſent to his Father *Martin Cortes.* He gave thoſe Deputies ample Inſtructions, with a particular Relation of what he had done both at *Cuba* and in *New Spain;* he likewiſe wrote a very long Letter to the King, taking Notice in it of the vaſt Extent and Wealth of the Country, the Hopes he had of reducing it under his Obedience, and begging he would not forget him when any Commiſſions were given out for that Country. The Magiſtrates of *Vera Cruz* wrote another Letter, repreſenting the Service they had done his Majeſty, the Reaſons they had for making the Settlement, and their Sufferings. The Captains wrote another to the ſame Effect, as did the Soldiers of moſt Note; promiſing to defend that Town at the Expence of their Lives, unleſs otherwiſe commanded by his Majeſty; and all of them moſt humbly intreating the King to beſtow the Government of that Country, and others that ſhould be by them diſcovered and ſubdued, upon *Ferdinand Cortes,* whom they had choſen for their Commander, to prevent Diſputes; and becauſe no Man was more capable of ſerving his Majeſty; and that, in Caſe another had been appointed, his Commiſſion might be called in Queſtion, and that his Majeſty would be pleaſed ſpeedily to anſwer and diſpatch their Deputies.

Cortes gave them the beſt Ships, and appointed *Antony Alaminos* their Pilot, who, in order to avoid coming near *St. Jago de Cuba,* ſailed through the Channel of *Bahama.* They ſailed on the 26th of *July,* 1519, with fifteen Sailors, and touched at *Marien,* in *Cuba,* proceeded to the *Havannah,* paſſed the Channel of *Bahama,* and had a good Voyage to *Spain;* being the firſt that ever ſailed that Way, which he did to avoid falling into the Hands of *Velaſquez. Alaminos* took this Reſolution, being well acquainted with the *Lucayo* Iſlands, and the Coaſt of *Florida,* and concluding that thoſe Currents muſt end ſomewhere; and accordingly he ſtood Northwards, and it proved well, for being got ſafe out of the Channel, he came into the open Sea, and arrived ſafe at *Sanlucar,* in *October. Benedict Martin* was then at *Seville,* in order to carry over the King's Diſpatches to *James Velaſquez,* at *Cuba.* He informing the Officers of the *Indian* Houſe, that thoſe Deputies were out of the King's Service, they ſeized all that was in the Ship, together with the 3000 Caſtalanos they had for their Expences, and what *Cortes* ſent his Father. The Preſent for the King was ſent to him at *Valladolid,* and Advice given to the Biſhop of *Burgos,* who was fitting out the Fleet to carry his Majeſty over to *Flanders,* with Complaints againſt *Cortes,* for having revolted from *James Velaſquez.* The Deputies, with the Pilot *Antony de Alaminos,* and *Cortes*'s Father, went away to meet the King at *Tordeſillas.*

When the Deputies were gone from *Vera Cruz,* ſome Servants and Friends of *Velaſquez,* and among them *F. John Diaz,* being uneaſy among themſelves, contrived to ſteal a ſmall Veſſel, and ſail to *Cuba,* to acquaint *James Velaſquez* with what was doing; but when they had got the Ship ready, and were going to embark in the Night, *Bernard de Coria* repented, and gave Notice of it to *Cortes,* who immediately ordered the Sails to be taken from the Ships, and the Fugitives to be ſecured, who owned the Truth of the Charge, impeaching alſo ſome Perſons of more Note than themſelves, at whom, *Cortes* conſidering his Circumſtances, connived. However, he, with much ſeeming Sorrow, condemned *James Eſcudero* the *Alguazil,* who had formerly arreſted him in *Cuba,* to be hanged, and, with him *James Cermeno,* a Man ſo active, that with only a Spear in his Hand, he would leap over another Spear held up at Arms-length by the talleſt Men in the Army. Another had one Foot cut off, and two were whipped; he would not puniſh *F. John Diaz,* becauſe he was a Clergyman; and thus *Cortes* made himſelf feared and honoured. And as ſoon as he had ſigned the Warrant for Execution, to prevent its being obſtructed by Intreaties, he went away to *Zempoalla,* where he appointed *Peter Álverado* to meet him.

He was now intent on his Journey to *Mexico,* and his People deſirous of undertaking it, *Cortes* putting them in Hopes that they would be there enriched, by which Means he gained their Affections, and kept them in Awe. The Order of this March being under Deliberation at *Zempoalla, Cortes* reſolved to ſink all his Ships, to deprive the Favourers of *Velaſquez* of all Hopes of returning to *Cuba;* becauſe there were ſo many of them, that if they went away they would have weakened his Forces, and, at the ſame Time, to add Reſolution to the reſt; who finding themſelves in that vaſt populous Country, without any Poſſibility of getting away, would be obliged to follow and obey him, and to truſt only to their Valour. However, leſt this ſhould occaſion ſome Diſturbance among the Men, he contrived, that the Soldiers who were his moſt zealous Friends, ſhould aſk it of him, perſuading him to it, with ſeveral Arguments, and among the reſt, that the Mariners, being an hundred Men, they would be a great Help to the Soldiers, and bear Part of all their Fatigues. The Soldiers, accordingly aſked it, and a public Inſtrument was made of the ſame by a Notary, though it was thought that there was another Piece of Subtilty in this extraordinary Management, which was, his not being left alone under the Obligation of paying for the Ships, but that the whole Army ſhould be equally bound to pay for them.

This done, he ordered *Juan de Eſculante*, the chief Alguazil, to repair to *Villa Rica*, and to bring aſhore from the Ships their Anchors, Iron Work, Sails, and all that might be of any Uſe, and then to ſink them all except the Boats; and that the Mariners who were aged or diſabled, and unfit for Service, ſhould ſtay in the Town. *Juan de Eſculante*, who was a very diligent Man, performed it with much Expedition, and returned to *Zempoalla* with the ableſt of the Seamen, many of whom proved very good Soldiers. The more we conſider and reflect upon this Stroke of our Hero's Policy, the more we muſt be perſuaded he deſerves that Title, ſince nothing could be greater in itſelf, or performed with more Spirit and Reſolution than this Scheme of burning his Ships, which he knew muſt fill his Soldiers with a determined Reſolution to conquer, ſince it abſolutely took away what had hitherto damped and qualified that Ardour, the Hopes of getting back to *Cuba*, and eſcaping perpetual Labours by a timely, though leſs honourable Retreat.

SECTION X.

The Hiſtory of the War of Tlaſcala, *from its breaking out to* CORTES'*s concluding a Peace with that Republic; and his taking them into the Confederacy againſt the* Indian *Emperor* MOTEZUMA.

1. *The Interruption* Cortes *met with in his intended March by the appearing of a* Spaniſh *Squadron on the Coaſt, and the Means he uſed to oblige them to retire.* 2. *He reſumes his March towards* Mexico, *advances as far as* Zocotlan, *and reſolves to move on notwithſtanding the Report of the vaſt Power of* Motezuma. 3. *Determines to take the Rout of* Tlaſcala, *though adviſed againſt it, and ſends ſome of the* Zempoallans, *as his Embaſſadors, who are very ill treated.* 4. *A War enſues notwithſtanding all the Care of* Cortes *to prevent it, in which ſeveral bloody Battles are fought, and a dreadful Slaughter made of the* Tlaſcalans. 5. *A great Battle fought, in which the Republic exert their whole Strength, but are nevertheleſs overcome, though with Difficulty.* 6. *The* Tlaſcalans *employ Spies, which are diſcovered and puniſhed: Another Battle enſues, in which they are again beat.* 7. *A Mutiny amongſt the* Spaniards, *on the Point of breaking out, is ſtopped by a Negotiation ſet on Foot for Peace.* 8. *The Peace is at length concluded, to the great Joy and Satisfaction of both Parties, notwithſtanding the Pains taken by* Motezuma's *Embaſſadors to delay or hinder it.* 9. *A ſuccinct Hiſtory of this celebrated Republic, including a Deſcription of the City of* Tlaſcala, *and the Manner in which* Cortes *was treated by its Inhabitants.* 10. *He perſiſts in his Reſolution of marching to* Mexico, *explains himſelf clearly upon that Subject to the* Tlaſcalans, *engages them to aſſiſt him in his Undertaking, and prepares for his March.* 11. *Obſervations on the moſt remarkable Events contained in the foregoing Section.*

1. THE Genius of *Cortes* diſtinguiſhed itſelf chiefly in delivering him ſuddenly, and as it were, without Difficulty, out of thoſe ſort of dangerous Conjunctures which ſeemed to threaten him with immediate and inevitable Deſtruction: Of this there occurred a very extraordinary Inſtance. Immediately after he had fixed a Reſolution of putting all to the Hazard, and marching directly with his Handful of Troops into the Empire of *Mexico*, we have ſeen him take one of the boldeſt and moſt romantic Steps that was perhaps ever put in Practice by a Perſon of ſo much Prudence and good Senſe, in the burning of his Fleet, purely to prevent thoſe who were under his Command from having it in their Power to fly from thoſe Difficulties which he meant they ſhould overcome; but no ſooner was this extraordinary Meaſure taken, than the whole Uſe of it ſeemed to be deſtroyed by an Accident he could not poſſibly foreſee, and which therefore it was impracticable for him to avoid.

This Accident was, the Arrival of a ſmall Squadron upon the Coaſt, of which his Governor at *Vera Cruz* immediately gave him Notice. This could not fail of making *Cortes* uneaſy; who, when he firſt received the Intelligence, apprehended that it muſt be fitted out by *James Velaſquez*, in Order to deprive him of his Command, under Pretence of ſending a Reinforcement for the more effectual Proſecution of the Expedition. He foreſaw in an Inſtant what the Conſequence of this might be, and therefore determined to march back with all the Forces under his Command to *Vera Cruz*, that he might be in a Condition to deal with his Enemies, either by Way of Perſuaſion or that of Arms, as Occaſion ſhould require. He did ſo; but upon his Arrival he was informed that thoſe Ships came from the Northward; that they had been fitted out by the Governor of *Jamaica*, upon Diſcovery; and, that they meant to ſet Bounds to his Conqueſts on that Side, under Pretence that they firſt found the Country of *Panuco*, and had traded with the Inhabitants for Gold, to the Amount of three thouſand Pieces of Eight or better. He grew eaſier upon this Advice, though there were ſtill two Points to be carried before he could think of proſecuting his firſt Enterprize: The firſt was, giving a Check to this Scheme of Diſcovery; that he might have no more Rivals to diſturb his Undertakings hereafter. The other, to oblige theſe Ships to quit the Coaſt inſtantly; that none of the Malcontents in his Army might have an Opportunity of deſerting to them.

In Order to effect this, he marched with a ſmall Party of ſuch as he could beſt truſt, to the Sea-ſhore; where he was hardly arrived before he met with three *Spaniards*, one of whom advancing towards him ſaid, He was a public Notary, and that he brought the other two as Witneſſes, to atteſt the Delivery to him of a Writing which he had in his Hand, containing the Governor of *Jamaica*'s Claim to a Part of this Country. *Cortes* declined taking the Paper, telling him very mildly, That it would be better if Captain *Pineda*, who he underſtood was the Commander, would come on Shore himſelf. The Notary anſwered, That neither he, nor any-body elſe, would quit the Ship. Upon this *Cortes* ſeized him and his Companions, and waited all Night behind a Sand-hill, to ſee if any-body would venture from the Ship; but finding that no-body came, he obliged his Priſoners to ſtrip themſelves, and having dreſſed three of his Men in their Clothes ſent them to make a Signal; upon which a Boat came off from the Ship with twelve Men well armed: *Cortes*'s Soldiers perceiving this retired under a Tree, and four Men landing from the Boat with an *Indian*, advanced towards them, not in the leaſt doubting that they were their own People. By this Stratagem he got theſe likewiſe into his Hands; and the Boat's Crew on ſeeing what had happened went of, to acquaint thoſe on Board therewith, and in a few Hours after the Ship bore away, and quitted that Coaſt.

By this Means he delivered himſelf at once out of this Perplexity; and the Men he had taken, being well uſed, gave him a faithful Account of all they had ſeen, and very readily enliſted in his Service, aſſuring him at the ſame Time, that the Diſcoveries they had made were of ſo little Conſequence, and the Produce of their Voyage ſo very inconſiderable, that he was not like to hear of any more Attempts of the like kind from *Jamaica*, which gave him ſingular Satisfaction, and encouraged him to reſume his Deſign for purſuing, which he found all under his Command, both Officers and private Men, more eager for than ever, which was chiefly owing to their ſeeing him always ſucceſsful in every Thing he took in Hand.

2. *Cortes* returned to *Zempoalla*, reſolving to loſe no Time before he ſet out for *Mexico*. The Men to carry Burthens being ready with the Baggage and Artillery, with the Auxiliaries of *Zempoalla*, and thoſe of the Mountain Towns, whom he took along with him as Hoſtages, leaving a Page of his own, of the Age of twelve Years, to learn the Language, he ſet forward on the 16th of *Auguſt*, ſeveral prime Perſons waiting on him, of whom he took Leave at a ſmall Diſtance from the Town. The *Indians* wept, conſidering the Danger into which they were going, though they relied on the Valour of the *Spaniards*, who were four hundred in Number, beſides fifteen or ſixteen Horſemen, and ſix ſmall Pieces of Cannon, with the Ammunition belonging to them. The March began in good Order; they arrived the firſt Day at *Xalapa*, and thence proceeded to another Town, which, being Confederate with *Zempoalla*, gave them good Reception. There *Cortes* told them he was ſent by the King of *Spain*, to admoniſh them to forbear ſacrificing of Men, and following the other wicked Courſes they were guilty of, and to live in Peace and Juſtice, and to chaſtize Tyrants.

He erected a Croſs in every Town, ordering them to reſpect it; for, as they ſhould be after better informed, through that holy Emblem they were to expect all Happineſs in this World and in the next; he proceeded to *Texutla*, where he ſpoke to the ſame Effect to the Heads of the People, and they entertained him affectionately. They then came into the deſart Country, where they met with much Hail and Rain, a ſharp Wind blowing from the ſnowy Mountains. The Men endured much, for there was alſo but few Eatables to be met with. They marched through another Paſs, where there were ſmall Places of Worſhip, with Idols and great Piles of Wood cut for the Service of the Temples. The Cold continued, and they were in great want of Proviſions, which the Men bore with wonderful Patience, though the Weather pinched them, becauſe they were thin clad, and uſed to the temperate Climate of *Cuba*, *Zempoalla*, and the Sea-coaſt. They next came into the Territories of *Zocotlan*, ſubject to the King of *Mexico*; *Cortes* ſent two *Zempoallans* before, to deſire thoſe People, in his Name, that they would be pleaſed to quarter his Forces, and, at the ſame Time, held them in Readineſs for all Events, becauſe this muſt be conſidered as an Enemy's Country; when they came in ſight of the Town, a *Portugueſe* Soldier ſaying that it was like *Caſtel Branco*, in *Portugal*, they gave it that Name.

The Lord was called *Olintel*, whom the *Spaniards* nick-named the *Squab*, becauſe he was very fat. He ordered the Men to have Proviſions given them, but not a very great Quantity, or with a very good Will. *Cortes* by Means of his Interpreters, who daily grew more expert, talked to him as to others, and he was pleaſed to hear thoſe Things which were ſo ſtrange to him. *Cortes* obſerving with what State he was ſerved, aſked him whether he was a Confederate, or a Subject to the King of *Mexico?* He anſwered that Queſtion, by ſaying, who is not a Slave to *Motezuma? Cortes* replied, that beyond the Sea there was a greater Sovereign, meaning the King of *Spain*, whom many Princes ſerved, that himſelf was one of the meaneſt Subjects he had, and that the Lord ought to ſubmit himſelf, and give ſome Demonſtration that he did ſo. He anſwered that he would do nothing but what *Motezuma* ſhould command him. *Cortes* did not carry on this Diſcourſe any farther, looking upon the Lord and his People to be Men of Reſolution, but deſired he would tell him ſomething of *Motezuma*'s Grandeur. This Lord ſaid he, was Sovereign over many Kings; that there was not the like of him in the World; that many Lords ſerved him in his Palace bare-footed, with their Eyes fixed on the Ground; that there were thirty Princes in his Empire, each of whom had one hundred thouſand fighting Men in his Dominions, and ſome Years *Motezuma* ſacrificed as Victims fifty thouſand; that he reſided in the largeſt, moſt beautiful, and ſtrongeſt City in the Univerſe, being in the Water, and having above fifty thouſand Acales for the Service of it; that his Court was very ſpacious, that many Princes of the Country round about continually reſorted thither to ſerve him; that his Revenues were incredible, becauſe none, even the greateſt, was exempt from paying Tribute, nor any ſo poor as not to give ſomething, though it were only Blood from his Arm; that his Expences were prodigious, becauſe, beſides thoſe of his Civil Liſt, he had continual Wars, which obliged him to maintain great Armies.

This Account ſtruck ſome of the People about *Cortes* with great Apprehenſions, from the mighty Strength of *Motezuma*, compared with their own ſlender Force; but he who had an admirable Faculty of turning every Thing to his own Advantage, uſually diſcourſed of the Greatneſs of the *Indian* Emperor, with Pleaſure; for, ſaid he, if we ſeek Wealth and Country from our Conqueſts, we ought to rejoice, that thoſe, againſt whom we fight, have great Riches and large Dominions. As for this *Indian* Chief, with whom he then lodged, he was Lord over twenty thouſand People, had thirty Wives in his Houſe, and above one hundred Women to wait on them, and two thouſand Servants. The Town was large, and contained thirteen Temples, with abundance of Idols made of Stone; they ſacrificed to them, Men, Women, Children, Turtles, and other Things, burning many Perfumes, with great Veneration. *Motezuma* had five thouſand Men in Garriſon in this Town and its Territory, and Men were ready two and two, at ſmall Diſtances, all the Way to *Mexico*, in the Nature of Poſts, to carry an Account of all Things that happened. *Cortes* was now thoroughly confirmed in the Notion he had of the Grandeur of *Motezuma*; and though ſome about him were always giving Hints of the Difficulty of the Undertaking, and the Danger, he never ſhewed the leaſt Irreſolution, but, on the contrary, with an undaunted Intrepidity, encouraged his People, aſſuring them of Succeſs, with as much Firmneſs as if he had it in his Power, as, indeed, he foreſaw all Exigencies with wonderful Sagacity and Diſcretion.

Olintel ſeemed to grow better affected, and made more plentiful Proviſion for the Men, upon the Diſcourſe he had with *Cortes*; though he ſaid he could not tell whether *Motezuma* would not be diſpleaſed at his having entertained them without his Leave. *Cortes*, finding him more courteous, began to talk of Religion, and would have had a Croſs erected, as had been done in other Towns, but *F. Olmedo* did not think it proper, for fear of ſome Irreverence. *Francis de Lugo*, a Man of Note, had with him a very large Greyhound that barked very much in the Night: The Gentlemen of that Town aſked thoſe of *Zempoalla* whether that was a Tyger, Lyon, or other Beaſt to kill Men? They anſwered, it was a Beaſt under good Command, and would bite and kill, when, and whoever his Maſter pleaſed. They told them the great Guns killed whom they would, with ſome Stones they threw into them, and that the Horſes ran like Stags, and overtook whom they pleaſed, none being able to eſcape them; that thoſe were the Men who conquered the People at *Tabaſco*, threw down their Idols, and made them Friends with their Neighbours. That *Motezuma* had ſent them Preſents, becauſe he looked upon them as Gods, and therefore they wondered why *Olintel* made them no Preſents. Moved by what they ſaid, he immediately ſent *Cortes* four Head-pieces, three Collars, and ſome Lizards, all of Gold, a Load of Cotton Cloth, and four Women Slaves to make Bread. In this Town there was a Charnel containing Abundance of Skulls and Bones of Men that had been ſacrificed, and in all other Towns in that Country, after the ſame Manner as at *Mexico*, which ſhall be deſcribed in its Place.

3. *Cortes* ſtaid nine Days with *Olintel*, to refreſh the

Men, and having given him a Preſent of his Toys, which was much valued, began to conſult which Way he ſhould travel to *Mexico*; *Olintel* ſaid, the beſt and plaineſt Way would be through a Town called *Colula*. The *Zempoallans* oppoſed it, alledging that thoſe People were very treacherous, and had always Garriſons; whereas the *Tlaſcalans* were his Enemies, and good People, for which Reaſon that would be the better Way. *Cortes* demanded of the Lord twenty Soldiers to be his Guides, as being well acquainted with the Country, which were given, and with them he ſet out toward *Tlaſcala*; as ſoon as he came to a Town called *Xacazingo*, he ſent four *Zempoallans* to *Tlaſcala*, with a Letter and a red Hat, and though he was ſenſible that they underſtood not the Letter, he thought they would, at leaſt, conclude it to be a Meſſage, that they might not do any harm to the Meſſengers; for it was known that the *Tlaſcalans* were informed that the *Spaniards* were marching towards them, and that they brought with them ſome *Indians* that were Tributaries to *Motezuma*, as the *Zempoallans* and thoſe of *Olintel* had taken up Arms. *Cortes* ordered the Meſſengers to tell the Gentlemen of *Tlaſcala*, that he had been informed, by the Lord of *Zempoalla*, and the neighbouring Towns, his Friends and Confederates, of the bloody Wars they had ſo juſtly waged with *Motezuma*, who had done them ſo many Wrongs; that he was ſent by a mighty Prince, in the firſt Place, to bring them to the Knowledge of the true God, and at the ſame time to deliver them from the Oppreſſion of the *Mexican Culuas*; that he ſent them that Hat, and with it a Sword and a Croſs-bow, that they might ſee with what powerful Weapons he deſigned to aſſiſt them.

This he did, becauſe he had heard how much a Croſs-bow and *Spaniſh* Weapons had been admired at *Mexico*. *Cortes* ſent this Embaſſy by the Advice of the *Zempoallans*, who ſaid the *Tlaſcalans* were numerous and warlike, Enemies to *Motezuma*, and would eaſily be brought into the Confederacy of the *Totanaques*. *Cortes* was more inclined to this Meſſage, ſince he hazarded nothing in ſo doing, and had always found the *Zempoallans* ſincere: And at this Place he began to be more fully informed of the Affairs of *Tlaſcala*. The Meſſengers coming, were received there, and conducted to the Town-Houſe, where Proviſions were given them. The Council met, the *Zempoallans* were called in, and delivered diſtinctly the Meſſage given them by *Cortes* in the beſt Terms they were able. On the other hand, the *Tlaſcalans* having received the Hat, the Letter, and Arms, *Maxiſcatzin*, one of the Lords of the Republic, bade them ſit down, ſaid they were welcome, that they thanked the *Totanaques* for their Advice, and were glad of their Liberty; that they were alſo thankful to the great Stranger for his Preſent, and that they might reſt themſelves, becauſe it required time for them to come to a Reſolution. Hereupon the *Zempoallans* withdrew, abundance of People flocking thither to enquire what they came about, and they recounting what they had ſeen of the Valour of the *Spaniards*, of their Behaviour, and their Weapons, deſcribing the Horſes, and all the reſt, and magnifying every Thing.

The Lords of the Commonwealth, being by themſelves, *Maxiſcatzin*, a Man of much Wiſdom and well beloved, made a Speech, adviſing them to receive the *Spaniards* in a friendly Manner, but *Xicotencatl*, who was General of the Army, was for oppoſing them. This Diverſity of Opinions occaſioned high Debates, the Traders and peaceable People being of *Maxiſcatzin*'s Mind, and the Soldiers ſiding with *Xicotencatl*. Whereupon *Temilotecatl*, another of the four principal Lords, was of Opinion, that Embaſſadors ſhould be ſent to the Commander of theſe new People, to tell him they ſhould be well received, and in the mean Time, *Xicotencatl* ſhould advance with the *Otomies*, and try what thoſe were whom ſome called Gods, and if he vanquiſhed them *Tlaſcala* would gain eternal Honour, but if not, the Blame might be thrown upon the *Otomies*, as a barbarous and raſh People: This Advice being approved, was put in Execution. The *Zempoallan* Meſſengers were then called in, and told, that they were reſolved to receive thoſe Strangers in a friendly Manner, but, at the ſame time, they retained them under Colour of a Feſtival, to gain Time for their General to march, and to anſwer finally according to the Event. Eight Days paſſed ſince *Cortes* ſent the *Zempoallans* to *Tlaſcala*, and they were not returned; he aſked thoſe that went with him what made them ſtay ſo long? They anſwered, it was likely they did not diſpatch them for Oſtentation; for which Reaſon, and becauſe they gave him great Aſſurances of the Friendſhip of the *Tlaſcalans*, he reſolved to advance with his Forces. At the End of the Valley, he found a great Wall of dry Stone, a Fathom and a half high, twenty Foot broad, with a Parapet. This Wall reached croſs the Valley, having only one Entrance, ten Paces wide, and there was a double Encloſure in the Nature of a Ravelin, about forty Paces in length, ſo ſtrong, that had there been any to defend it, the *Spaniards* would have had enough to do to force their Way through. *Cortes* halted to view it, and examine every Part, to ſee whether there were any Ambuſh.

By this *Cortes* was convinced there were good Grounds for the Notion conceived of the Valour of the *Tlaſcalans*, ſince ſo great a Work had been erected to oppoſe them. The Workmanſhip of this Wall was much admired, becauſe it was very artificially done, without any Mixture of Plaiſter. He entered the Encloſure towards *Tlaſcala*, his Men marching in good Order, and the Artillery ready, ſtill ſending Parties before to prevent Surprize. When they had advanced a League, they came to a thick Wood of Pine-trees, with Abundance of Thread and Papers tangled about the Trees, and, croſſing the Way, which the *Spaniards* laughed at, being informed that the Sorcerers had promiſed the *Tlaſcalans* that they would diſable them with thoſe Threads and Papers. When they had advanced three Leagues from the Wall, *Cortes* ſent Orders to his Men to haſten their March becauſe it was late; and going forward with the Horſe-men, as ſoon as they came to the Top of a Hill, two that went foremoſt, fell in with fifteen or ſixteen *Indians*, armed with Swords and Targets, who had been poſted there to give Intelligence; and as ſoon as they diſcovered the *Spaniards* run away, tho' the *Spaniards* endeavoured to treat with them; but finding that the Horſes would overtake them, they drew up altogether, and, defending themſelves, fought ſo deſperately, that they killed two Horſes, having almoſt cut off their Heads; their Swords being edged with Flints, ſo faſtened to the Wood, that they cut like Razors; the *Indians* retired brandiſhing their Swords, without ſhewing the leaſt Fear. But *Cortes* diſcovering above five thouſand in a Body, that were moving to relieve the others, ordered them to be ſtruck through with Spears, which he had forbid before, and ſent to the Infantry to haſten forward: Before the Infantry could come up, the Body of the *Indians*, before mentioned, had reached the Horſe-men, and, having ſhot their Arrows, began the Fight.

The Horſe-men killed many with their Spears, eſpecially thoſe that preſſed upon them. As ſoon as the *Indians* ſaw the *Spaniſh* Infantry, they retired, being much frighted at the Horſes, ſaying thoſe Stags were bigger than theirs, ſwifter, and, that it was by Inchantment, that the *Spaniards* rode on them. When the *Indians* were thus withdrawn, two of the Meſſengers that *Cortes* had ſent to *Tlaſcala*, returned, with ſome Preſents from the Republic, who ſaid there were ſorry for the Rudeneſs of thoſe barbarous People, who were ſome Towns of *Otomies*, that had committed ſuch a Diſorder without Leave, though they were glad they had been chaſtized as they deſerved; that the Republic was deſirous to ſee, know, and ſerve him in their Town; and if they would have them pay for the Horſes theſe *Otomies* had killed, they would immediately ſend Gold and Jewels; though *Cortes* was ſenſible of the Falſhood of the Meſſengers, he thanked them for their Offer, adding, he would ſoon be with them, and, ſuppreſſing his Concern that the *Indians* had found the Horſes to be mortal, ſaid he would take no Pay for them, becauſe he ſhould ſoon have many more brought him from the ſame Place where theſe had been bred. Thoſe *Otomies*, though Savages, were ſubject to the Republic of *Tlaſcala*, having their Towns in Bottoms, and their Scouts on the Hills; who, when they diſcovered any Strangers, made Fires to give Notice from one Place to another, and the People aſſembled to defend themſelves.

4. The *Tlaſcalans* Embaſſador returned Home, carrying off about ſeventy *Indians* killed in the Action, to bury them; and *Cortes* ordered the dead Horſes to be interred that the *Indians* might not be daily put in mind, by ſeeing them, that they could kill the reſt. The Army was then, as has been ſaid, within the Territories of *Tlaſcala*, and all that Province, from *Villa Rica* thither, was called *Cataſta*, which, though large, was not populous; becauſe *Motezuma* had, ſome Time before, deſtroyed it. The Country is like *Andaluzia*, rich, hot, and fruitful, having many freſh Waters, which produce much Fiſh, Foreſts of Wild Trees, and Oaks bearing large Leaves, but ſmaller Acorns than thoſe in *Spain*. At Sun-ſetting *Cortes* encamped near a Brook, on a convenient Spot of Ground; and they kept Guard, by an Hundred at a Time, having been undiſturbed that Night. The next Day they came to certain Houſes of *Otomies*, where they found ſome of them dead of the Wounds they had received: They burnt the Houſes, and, for Want of better Proviſions, fed upon Tunis, a Sort of Fruit that Country produces; becauſe they ſaw the *Indians* eat them.

The next Day *Cortes* proceeded, and being come to a troubleſome Paſs, commanded every Way by Hills; before they began to enter it a Dog barked: One *Lores*, a Smith, and an able Horſeman, made up to the Place, killed two *Indians* he met, and the reſt fled. Here the other two *Zempoallan* Meſſengers *Cortes* had ſent to *Tlaſcala*, came ſweating, lamenting, much abuſed, and in ſuch a Fright that they could ſcarce ſpeak: They proſtrated themſelves on the Ground, laid hold of *Cortes*'s Feet and ſaid, The wicked *Tlaſcalans*, breaking through the Immunities of Embaſſies, had bound them to be ſacrificed to the God of *Victory*; that they unbinding each other that Night, had made their Eſcape; and that they intended to ſacrifice all the *Spaniards* in the ſame manner. Soon after their Arrival, about a thouſand *Indians* well armed, appeared on a little Hill, who attacked the *Spaniards* with great Cries, and Vollies of Darts, Stones and Arrows, *Cortes*, by Means of the Interpreters deſired them to be quiet, becauſe he would willingly have Peace, ſignifying the ſame to them. He perceiving they did not forbear, fell on, and they artfully gave Way, retiring till they drew the *Spaniards* into an Ambuſh of thirty thouſand, that lay in little Hollows that were by the Paſs. The *Spaniards* were in a deſperate Condition, conſidering the Multitude of their Enemies who charged them where they had not Room to ſtir. But the Encouragement given by *Cortes*, telling them, They now fought for their Lives, and did no Wrong to thoſe that had attacked them, infuſed freſh Courage. Here *Tuch*, one of the Noblemen of *Zempoalla* told *Marina* he foreſaw the Death of them all; for it was impoſſible that one Man ſhould get off alive. *Marina* told him, the God of the Chriſtians, who was powerful, and loved them, would deliver them out of that Danger.

Not long after, the *Spaniards* and their confederate *Indians*, fighting manfully to avoid being ſacrificed, got out of that Streight, where the *Tlaſcalans* behaved themſelves in ſuch a furious Manner, that ſeveral of them came to cloſe with the *Spaniards*; and others laid hold of the Horſemens Spears as they rode before to make Way for the Foot; and the confederate *Indians* leaping into the Water, *Cortes*, every now and then turned to the Infantry, and bad them remember, That the planting the Faith of *Jeſus Chriſt* depended on the Preſervation of their Perſons. That they might expect very great Rewards beſides, that being *Spaniards* they ought not to deſpond, which their Nation never did. At length they extricated themſelves from among thoſe deep Roads and Brooks, and got into the plain Fields, where the Horſes having Room to run, and the Cannon to play, terrified the *Indians*, and killed many; ſo that, not able to endure it, they retired to a riſing Ground and there fortified themſelves. In this Fight ſome of the *Spaniards* were wounded, but not one killed, and many *Indians* died upon the Spot, as did others afterwards of their Wounds. The *Spaniards* rejoiced, and with loud Voices returned Thanks to God, for having delivered them out of that Danger; nor was there any Want of Joy among the *Indians* their Friends, who embracing the *Spaniards*, congratulated their Eſcape. The Gentlemen of *Zempoalla* commending *Marina*, related her Prediction, and ſhe declared ſhe had never been afraid.

Such was the Poſture of Affairs, when an *Indian* who commanded one Part of the Enemy's Army, making Signals of Peace, came down where *Cortes* was with ſome of his prime Men about him, and ſaid, That Experience had convinced him, that he and his were invincible and immortal Gods, therefore deſired him that the War might ceaſe, and he would prevail with the Commanders on his Side, that they ſhould be reconciled, and permit him to enter into *Tlaſcala*. *Cortes* chearfully anſwered, That he had already offered them his Friendſhip, and tho' he had ſufficient Cauſe to be otherwiſe, that he would ſtill be their Friend. The Commander went back to the *Tlaſcalans*, who beat him ſo unmercifully that he was near Death. He returned to *Cortes*, ſaying, Theſe wicked Men would deſtroy him. *Cortes* ordered him to be dreſſed, and bade him, ſince they were to be engaged with his Countrymen, ſtand apart, with a Token he gave him that he might not be hurt. In ſkirmiſhing before the Battle begun there were ſeveral notable Actions; among the reſt one of the four *Indians* whom *Cortes* had ſent on his Embaſſy to *Tlaſcala*, knowing a Captain who in that City had ſeized him, aſked Leave of *Cortes* to challenge him, who encouraged and allowed of the Challenge, directing a *Spaniard* to draw near when they were engaged, that if his *Indian* ſhould be in Danger he might not periſh.

The Fight was begun in the Sight of both the Armies, with their Swords and Targets, but at the Concluſion, the *Zempoallan* killed the *Tlaſcalan*, and cut off his Head. The confederate *Indians* celebrating the Victory with mighty Cries, and the *Spaniards* perceiving that *Cortes* rejoiced at it, and looking upon that as an happy Preſage of his future Victory, ſounded their Trumpets and beat their Drums. Between the two Armies was a very narrow and dangerous Paſs, which the *Tlaſcalans* defended, and the *Spaniards* were of Neceſſity to march that way. *James de Ordaz* boldly cloſed with the Eenmy, puſhing them, and gaining Ground, though Showers of Arrows fell on him and his Men: At length he gained the Paſs, and then the Horſes were led through. The *Tlaſcalans* having loſt that Paſs ſo proper to be defended, left the Field and marched clear off; and the *Spaniards* being very well pleaſed that they might be ſtill advancing, took up their Quarters in a little Tower that ſtood in an Eminence called *Tracozizinco* where there was a Temple with a little Town, which was afterwards called of *Victory*. They with extraordinary Diligence made Barracs of Boughs and Straw, the *Indians* working at them with much Alacrity, becauſe *Cortes* pleaſed them, and they were ready to ſerve upon all Occaſions upon that Account, and to avoid falling into the Hands of their Enemies. All that Night, being the firſt of *September*, ſtrict Watch was kept, and *Cortes* himſelf was upon tne Guard with the third Part of his Men at the Morning Watch, which was moſt apprehended, but no Enemy appeared; becauſe it was not their Cuſtom to fight in the Night.

The next Day *Cortes* thought fit to ſend Meſſengers to deſire the *Tlaſcalans* to permit him to proceed freely on his Way, ſince it was not his Deſign to do them any Harm, nor was he going to join the Confederacy againſt the King of *Mexico*; but only to perform what his Maſter the King of *Spain* had commanded him. In the mean Time leaving *Pedro de Alverado* with half of the Forces, he marched with the other half, and the Horſemen. He burnt four or five Towns, and returned with four hundred Priſoners and no Loſs, though the Enemy charged him all the Way to his Quarters, where he was told the *Tlaſcalan* Commander had anſwered his

Meſſage, and that they would, the next Day, tell him their Minds. This bold Anſwer, and the Advice *Cortes* had received, that One hundred and Fifty thouſand Men were aſſembled, made him put his Forces into ſuch a Poſture as he might not be ſurprized. *Cortes* reſolved to be informed by the moſt rational of the Priſoners about all Things that were convenient for him to knnw; and they anſwered, That ſince they were his Priſoners, and ſo well uſed, they would tell him the Truth: They declared, that the Army was compoſed of *Otomies* and *Tlaſcalans*, all Subjects of the Republic of *Tlaſcala*, though they did not care to have it known that their Commonwealth made the War, becauſe they would not have it thought, if they ſhould be vanquiſhed, that it had been by their Authority; that they hated him, becauſe they imagined he was going to be a Friend to their mortal Enemy *Motezuma*, and therefore they agreed never to give over till they had conquered the *Spaniards*, and ſacrificed them to their Gods, and made a ſolemn Banquet of them, which they called heavenly; that the War was carried on at the particular Inſtigation of *Xicotencatl*, the General of the Republic, who carried its Standard, which was a golden Eagle with its Wings diſplayed, and that he would ſee it the next Day in the Rear of the Army, becauſe they were to fight; for in Time of Peace it was before: That they were about One hundred and Fifty thouſand Men, moſt Archers, who were very much afraid of the Thunder, and of the great running Stags, and were amazed at the dreadful Wounds their Swords had made.

5. The *Tlaſcalans* Army appeared, the Standard was ſeen, and the Number of Men was ſo great that they covered the whole Plain, all painted, adorned with great Plumes of Feathers, armed after their Manner with Bows and Arrows, Slings and Javelins, which they caſt with ſuch Dexterity that they would pierce a Door, and was the Weapon the *Spaniards* moſt dreaded; long Spears, and Swords edged with Flint; Targets, Clubs, Head-pieces, wooden Gauntlets, and Greves covered with Deerſkins; gilt Cotton Armour for the Body Finger-thick, which they called *Eſcupiles*, worn afterwards by the *Spaniards*, who found them uſeful againſt the Arrows, and convenient in the Toils they underwent, not being able to endure Steel or Iron: They likewiſe made Uſe of the *Indian* Targets, their own being ſoon ſpoiled, and thoſe were made of Wood, Leather, and adorned with Feathers, and others of Reeds and Cotton, being the beſt, becauſe they did not ſplit.

The Army marched very orderly, divided in two Battallions, but crowded together, and every Battallion had Horns and Kettle-drums, which was an extraordinary Sight, for the *Spaniards* had never beheld ſo great an Army ſince they diſcovered the *Indies*. The Enemy halted very near the *Spaniards*, with a deep Trench between them. *Cortes* ſhewed himſelf highly pleaſed at the Sight of them, and told his Men, that God gave them that Opportunity for his Glory, and the Honour of the *Spaniſh* Nation, which would ſtrike a Terror not only into *Motezuma*, but into all that World. The *Tlaſcalans* being highly elevated with ſo mighty an Army, encouraged by the ſmall Number of the *Spaniards*, puffed up with their uſual Succeſs againſt their Enemies, ſent three hundred Turkeys, two hundred Baſkets of Cakes of Zentli, that is Fifty hundred weight of Bread, which was an extraordinary Supply for the *Spaniards*, conſidering the Diſtreſs they were in, and this, that they might be in better Caſe, and taſte more deliciouſly when ſacrificed.

When the *Tlaſcalans* thought the *Spaniards* had eaten, *Xicotencatl*, in a very haughty Manner, commanded two thouſand Men to go and take thoſe Creatures the Sea had ſpewed up, and if they defended themſelves to kill them. The Two thouſand Men paſſed the Trench, and with no leſs Intrepidity advanced to the Tower: The Horſemen went firſt to receive them, the Infantry followed, and the *Tlaſcalans*, at the firſt Encounter, were made ſenſible of what the *Spaniſh* Weapons could do. They retired a little, but returned with greater Fury; when they were fully convinced that thoſe few Men were not to be ſlighted. In their Retreat they were moſt of them killed. The Commander of the Army, having ſeen what had happened, fell on ſo boldly, that many of the *Indians* came up to the Camp, and ſome entered it, in ſpite of thoſe who were left upon Guard, fighting with the *Spaniards* Hand to Hand. This proved a Day of glorious Toil, for the Fight laſted above four Hours, within and without the Trenches, before they could make Room, the *Indians* charging and attacking ſo furiouſly; till ſeeing a great Number killed, they began to ſlacken, being amazed that they could not kill a *Spaniard*, looking upon that as wonderful, ſo that they ſtill fought as if they had been angry with themſelves; but as it grew late they retired.

The *Spaniards* reſted the better becauſe they knew the *Indians* would not fight in the Night, but kept a good Guard. The *Tlaſcalans* did not look upon themſelves as vanquiſhed, and how many were killed could not be known, becauſe as they fell they hid their Dead. The next Day *Cortes* marched out into the Country, burnt ſome Towns, and plundered one that had three thouſand Inhabitants, but few Soldiers, becauſe moſt of them were gone to the Army. The Town was fired, many Priſonners carried away, and the *Spaniards* returned to their Quarters, at a Time when a great Number of Men were coming to defend that Place, but retired immediately for Fear of the Guns, and being fatigued with Heat. The next Day the *Tlaſcalans* thinking they could gain more Advantage over the *Spaniards* in narrow Places, in a haughty Manner ſent them Proviſions again, as they had done before; challenging them to come into ſome ſtreigh Place, but finding they did not, they boldly began the Attack again. They fought five Hours very deſperately, without being able to kill one *Spaniard*, which was what they aimed at, but of them a prodigious Number was ſlain, becauſe as they thronged together, the Cannon, the Muſkets, and the Croſs-bows, did dreadful Execution. At length, tired and aſhamed that they had not executed their Malice, they retired in Confuſion.

The next Morning the Commanders ſent Meſſengers unto *Cortes*, who thus addreſſed him: Sir, if you are a fierce God, here are five Slaves for you to eat; if you are a good God, we offer you Incenſe and Feathers; and if you are a Man, take then Fowls, Bread, and Cherries, for you and your Men to eat. Their Deſign was to know whether the *Spaniards* were Men like themſelves, becauſe as they had not been able to vanquiſh them, or ſo much as kill one, they concluded they were immortal; and ſeeing, on the other Hand, that they did eat and do other Things like Mortals, they were confounded. *Cortes*, who never wanted Preſence of Mind on any Occaſion, ſaid they were all mortal Men like themſelves; but that, becauſe they belived in, and ſerved one only true God, he did, and would always, aſſiſt them; that they ſhould not deal treacherouſly with him, for all would turn to their Prejudice; and ſince he did not deſire to do them any Harm, but to be their Friend, he adviſed them not to be obſtinate; having delivered himſelf thus mildly, he diſmiſſed them, returning Thanks for the Preſent.

The next Day thirty thouſand *Tlaſcalans* advanced, being deſirous to ſignalize themſelves, and fought ſo bravely, that the Battle was more bloody than the former, but at length retired; and it is to be obſerved, that for the Space of ten Days the *Spaniards* continued in thoſe Quarters, the *Indians* generally ſupplied them with Fowl, Bread, and Cherries, only that they might have the Opportunity of viewing their Order and Situation, whether any dead Men were buried, wounded, or dreſſed, and obſerve how they looked, or whether they had more or fewer Forces; yet the *Spaniards*, at firſt, had no Jealouſy of their Deſign, and, on the contrary, commended the *Indians* for making War only with their Weapons, for had they cut off their Proviſions they muſt have been undone.

6. The *Tlaſcalans*, intent upon ſeeking Revenge, and finding how little they could do by Force, had recourſe to Policy; and, in Order the more to kill the *Spaniards* into Security, they ſent ſome Men of Note with Preſents of Gold and Feathers: They made many ſubmiſſive Bows to *Cortes*, and the eldeſt of them told him, That the Republic

public ſent that ſmall Preſent, which was not ſo inconſiderable, for Want of good Will, but by Reaſon of the Poverty of their Country; and that if he had any Commands, they would ſerve him very readily. *Cortes* thinking the Meſſengers had been ſincere, very pleaſantly told them, That though he valued the Preſents, he made more account of their Good-will, and coveted nothing more than making them his Friends. The next Day the *Tlaſcalans* ſent fifty Men, who brought Proviſions, aſked how the Men did, and what they meant to do? *Cortes* ſaid they were all very well, and gave Thanks for the Preſent; and theſe Men growing familiar, walked about the Camp, and obſerving every Thing therein, and particularly the Horſes Teeth; a *Zempoallan* Gentleman taking particular Notice of them, told *Cortes* he looked upon theſe Men as Spies, and that they had ſome private Talk with the *Indians* of *Yztaacłucbitlan*: Upon this, *Cortes* ordered one of them to be taken up, whom he examined by his Interpreters, uſing Threats if he did not confeſs the Truth He owned that they had been all ſent to diſcover which Way they might burn the Barracs, for which Purpoſe they deſigned to march with a great Army by Night, thinking that the Guns, Horſes, and Weapons, were leſs to be feared in the Dark.

Others having confirmed this Account, he cauſed the Hands of ſeven of thoſe Men, and the Thumbs of others, to be cut off, though much againſt his Inclination, but believing it might be of Uſe for the future; and bid them go tell their General *Xicotencatl*, that he would ſerve all the Spies, that fell into his Hands, after that Manner; and that he might advance with his Army, for that he would always find the *Spaniards* invincible by Night or by Day. Thoſe Men with their Hands cut off, ſtruck a general Conſternation among *Xicotencatl*'s Forces, begetting an Opinion, that the *Spaniards* had ſome Spirit that diſcovered their Thoughts to them, for which Reaſon they durſt ſend no more Spies or Proviſions. *Cortes*, after this Information, enlarged his Trenches, and fortified his Camp, providing every Thing till Sun-ſet, when he perceived that the Enemy's Army was advancing to put their Deſign in Execution; and judging it moſt convenient not to ſuffer them to come up to his Quarters, he boldly marched out to meet them, which he thought would terrify them the more, as ſuppoſing their Intention had not been known.

He accoutred all the Horſes with large Breaſt-plates, full of Hawks-bells, that the Noiſe might make them ſeem the more; directing they ſhould ſtrike the Enemies on their Faces, with their Spears, becauſe they were wont to lay hold of, and ſnatch them away. Then, having told the Soldiers that they muſt overcome that Multitude by dint of Valour, he fell on at the very Time when the Spies, whoſe Hands had been cut off, were relating what had befallen them, which much troubled the General and all that heard it, but they were much more aſtoniſhed to ſee themſelves ſo unexpectedly aſſaulted, ſo that they inſtantly diſperſed and fled, without making any Oppoſition; and though a great Slaughter was made, *Cortes* took Care to put a Stop to the Purſuit, for Fear they ſhould be drawn into ſome Place of Diſadvantage. The next Day *Cortes* ſeeing his Men chearful, ſaid to them, That ſince God had. till then, ſo viſibly aſſiſted them, they would be all very much to blame, if they did not proceed on what they had ſo well begun with Reſolution, and to that Purpoſe it was requiſite to preſs hard upon the *Tlaſcalans*, to the End, they might afterwards prove the ſurer Friends, for that nothing could be more advantageous to them in *New Spain*, than to be in Confederacy with that Commonwealth, which was to be compaſſed by proſecuting the Victories they had gained.

All the Commanders and Soldiers promiſed to follow and go wherever he would lead them; *Xicotencatl* being much out of Countenance at the Diſaſters he had met with, retired to *Tlaſcala*; *Maxiſcatzin*, and the other Lords, told him it had been better to have followed the firſt Advice, and ſaved the Lives of ſo many, and therefore it was in vain to perſiſt obſtinately to the Loſs of the Reputation of that Republic. *Cortes* ſeeing no Enemy appear in the open Country, went up to the Top of the Temple, where his Quarters were, whence he diſcovered ſeveral Towns, and abundance of Smokes towards the Mountains; then coming down, he told his Captains he believed that to be a large Place, and ſince no Enemy appeared, it was proper not to loſe Time, but to put in Execution what had been agreed on. As ſoon as it was Night, having before taken a View of the Country, he reſolved to try his Fortune, and entered upon a great Road, with half his Infantry, and all his Horſe, judging that Way would lead him to the Smokes he had ſeen. They had ſcarce gone a League, before a Horſe fell, which *Cortes* ordered to be ſent back to the Quarters, and preſently two more fell one after the other, and in this Manner there fell five.

The Soldiers begged of *Cortes* to turn back, and do what they deſigned by Day, becauſe they looked upon this as an ill Omen: He, with an undaunted Courage, prayed them for the Love of God, whoſe Cauſe they had in Hand, not to regard ſuperſtitious Obſervations, but to hold their Way, ſince he went himſelf foremoſt, and that the Horſes might return to the Place from whence they came. He had ſcarce ſpoke theſe Words, when his Horſe fell, which he wondered at, whereupon all his Men urging that it was a vain Thing to proceed, and ſome, that he would ruin all; he, in a ſevere Manner, told them they ought to conſider that great Undertakings were not to be carried on without Difficulties, that they ſhould try to march a-foot, leading the Horſes, to ſee what that Accident tended to: When they had marched far after this Manner, the Horſes were all well, and they could never find what occaſioned their paſt Diſtemper, tho' ſome fancied it might have been ſome Sorcery of the *Indians*, much practiſed among them, but *Cortes* ſaid it was the Cold of the Night which gave them the Gripes. They proceeded thus till they came into ſome ſtony Grounds, from which they extricated themſelves with Difficulty, and ſpying Fire, made towards it. They found two Men and two Women in a Houſe, who conducted them to the Mountains, where *Cortes* had ſeen the Smoke.

Before it was Day they came to ſome Villages, where the Fright was greater than the Hurt; and being informed that *Cintancingo*, a large Town, was by, they ſoon came to it, the Surprize occaſioned much Confuſion: Some Harm was done at firſt, but the People running away in the utmoſt Conſternation, *Cortes* ordered that no Perſon ſhould be killed, and nothing taken, ſo that the Diſorder ſoon ceaſed, and the Inhabitants returned to their Houſes. *Cortes* went up to a high Place, whence he diſcovered ſuch a Multitude of Houſes, that he was aſtoniſhed, and aſking what Places thoſe were, received an Anſwer that it was the City of *Tlaſcala*, and the Villages about it; he called all his Men, and ſaid, What would it have availed to have deſtroyed the People of *Cintancingo*, ſince there are ſo many yonder? Then turning to *Alonſo de Grando*, who was chief Alcade, he aſked him what he thought was fit to be done, conſidering the Multitude of People they had diſcovered? He anſwered, that they ſhould return to the Sea and write to *James Velaſquez* to ſend Supplies, becauſe if any croſs Accident or Sickneſs ſhould happen among them, it was certain they ſhould be all devoured by the *Indians*. *Cortes* was much concerned at this Anſwer, and eſpecially for its touching upon *James Velaſquez*: However, he replied, that he ought to conſider that if they muſt certainly die, it was better to periſh in the Proſecution of their Deſign than in running away.

7. He then went to reſt him by a Spring, without the Town, whither the Chiefs of the Country reſorted to him, with Abundance of unarmed Men, carrying a Quantity of Proviſions. They thanked him for having done no Hurt, as he might, offered to obey him, and intercede with the Lords of *Tlaſcala* for a Peace: He entertained them very kindly, promiſing his Friendſhip, provided they were ſincere, and ſo returned to his Quarters, adviſing the Soldiers not to ſpeak ill of the Day till it was paſt, for he hoped that the War with *Tlaſcala* was at an End, as they would find it, and if ſo, God had much Proſperity in Store for them. Thoſe he had left in his Quarters were very melancholy, fearing ſome Diſaſter, becauſe of

the Sickneſs of the Horſes; but when they ſaw him return with a pleaſant Countenance, and all Men ſafe, with ſome of the Natives of the Country, they crouded to welcome him; he told them all that had happened, but when they were informed of the Greatneſs of *Tlaſcala*, and the Multitude of thoſe martial People, reflecting how many Accidents might happen, how little Hopes there were of Supplies, when they had run themſelves into a Country they knew nothing of; they began to hold Cabals, reſolving to perſuade and to require *Cortes* not to carry them where they could not eaſily retreat, ſince the Danger was ſo evident, offering to follow him through greater Fatigues, provided it was with a ſuitable Power, that which they then had being too inconſiderable for ſo extenſive a Country.

His Friends adviſed him to take order about it before the Men mutinied; he anſwered, that the Danger was not ſo great, for he did not believe that *Spaniards* could be ſo faint hearted, eſpecially having till then met with ſo much Succeſs. One Night, going the Rounds, he heard loud talking, and ſome Soldiers ſaying, if our Commander is mad, let us be wiſe and tell him in plain Terms, that he muſt conſider what is fit to be done, or we will leave him by himſelf. He told ſome who were with him, that thoſe who durſt ſay ſo were likely enough to do it, and going on heard the like in other Places, which troubled him very much; he would willingly have puniſhed them, but thought it better to take no Notice, till hearing that the Mutiners increaſed, he cauſed all the Men to be drawn together, and ſpoke to them ſo effectually, that they all readily ſubmitted to follow and obey him.

Very ſoon afterwards ſix *Mexican* Noblemen arrived, attended by about two hundred Perſons; being brought before *Cortes*, they made him profound Obeiſance, and it appeared that they had Notice, at *Mexico*, of the Victories he had gained over the *Tlaſcalans*; before they ſpoke they delivered him a Preſent from their Monarch, *viz.* one thouſand Cotton Garments, various curious Pieces of Feather-work, and the Value of 1000 Caſtelanos in very fine Gold Duſt, as it is taken out of the Mines: Then the Eldeſt of them ſaid, That their Maſter, *Motezuma*, ſaluted him, ſent the Preſent by them, wiſhing him all Proſperity, much rejoiced at the News he had received of the Victories he had obtained over the *Tlaſcalans*, that, wiſhing him well, he deſired he would not go to *Mexico*, becauſe the Way was very bad and dangerous, and he ſhould be ſorry that any Miſchance ſhould befall Men of ſo much Valour, whom he ſo entirely loved; that he was willing to acknowledge the King of *Spain* his Friend and Sovereign, whom he would ſerve in all he ſhould command. *Cortes* by his Interpreters, anſwered they were welcome, and he would conſider of their Meſſage. *Cortes*'s Deſign was, that thoſe Embaſſadors ſhould ſee how he behaved towards the *Tlaſcalans* in caſe the War was carried on, and if Peace was concluded, that they ſhould hear how he reproved them for having begun it.

He then gave Orders that they ſhould be well treated; at that Time he was indiſpoſed, and therefore had not for ſome Days marched into the Country, ſo that nothing more was done than ſecuring the Quarters, and ſkirmiſhing with Parties of *Tlaſcalans*. The Enemy fancying this proceeded from a Weakneſs, or a Loſs they were not acquainted with, prepared to attack them. *Cortes*, notwithſtanding his having taken Phyſick, mounted on Horſeback, fought a long Time in Perſon, and omitted nothing that was to be done, till the Enemy were routed and fled; the *Mexicans* being preſent, and obſerving every Circumſtance of the Action. The *Tlaſcalans* admiring that all their Power had not been able to compaſs their Deſign, and moſt of them concluding that the *Spaniards* were aſſiſted by ſome Deity, which rendered them invincible, and being informed that the *Mexican* Embaſſadors were arrived at the *Spaniſh* Army; having ſeriouſly conſulted what was to be done, after many Debates and Conteſts, concluded that Peace ought to be made, and Endeavours uſed to divert them from entering into any Alliance with the *Mexicans*, becauſe that would be the greateſt Misfortune that could befal them. Young *Xicotencatl* was appointed to go on this Embaſſy, though he endeavoured to excuſe himſelf, but having received poſitive Command, he made ready with fifty of the principal Men in the City, and ſome Youths to be left as Hoſtages.

He carried a Preſent of Cotton Cloth, and Featherworks with ſome Gold, according to the Ability of that City, which had very little of thoſe Things. *Cortes*, being advertiſed of this Embaſſy, that was coming from the Republic of *Tlaſcala*, and that *Xicotencatl* was the Perſon employed, went out to receive and conduct him to his Quarters, with much Honour and vaſt Attendance. They two ſet down, all the reſt ſtanding, as well *Spaniards* as *Tlaſcalans*; the Preſent and the Hoſtages were brought in, and *Xicotencatl*, in a very courteous Manner, begged Pardon for what was paſt, for himſelf and his Republic, making many Excuſes, and offering to enter into a ſtrict Alliance with the *Spaniards*, and to ſerve them faithfully for the future.

Cortes, having conſidered the *Tlaſcalans*'s Speech, told him that notwithſtanding what was paſt, they might depend on his Friendſhip, and on his coming among them, immediately after the Departure of the *Mexican* Embaſſadors: Upon which *Xicotencatl* roſe up very well pleaſed. *Cortes* went with him out of his Tent, the other Commanders attended him out of the Quarters, all being well pleaſed, hoping that ſince the War was concluded with *Tlaſcala*, they ſhould reap great Advantages from the Alliance, for at that Time conſidering that ſome were dead, many wounded, and the reſt ſpent with Fatigues, their Number ſo ſmall, and the many Difficulties they had to ſurmount; they concluded that if the War had laſted, they muſt all have periſhed, and therefore they aſcribed the concluding of this Peace, at that Time, to be the eſpecial Goodneſs of God; and for confirming them in this Religious Opinion, *Cortes* ordered Maſs to be ſaid, and a ſolemn Thankſgiving; after which, *F. John Diaz* called the Tower of the Temple there, *The Tower of Victory*, in Memory of thoſe Battles which the Troops had gained whilſt they had their Quarters cloſe by it, during almoſt forty Days they continued in that Place.

8. On the Return of this great Man, who had acted as Embaſſador, the Senate aſſembled, and heard, at Leiſure, a full Report of the Manner in which this Negotiation had been managed, and judging from what he delivered, that it imported them highly to ſecure the Friendſhip of *Cortes*, in order to have his Protection againſt *Motezuma*; they reſolved to leave no Means untried to bring him into their City as ſoon as poſſible, to prevent his concluding an Alliance with their Enemy. The Peace was proclaimed, and they made a Mitole, that is, a public Dance of above twenty thouſand Men richly adorned.

They offered extraordinary Sacrifices to their Gods, burning abundance of Perfumes, and garniſhed the Doors of their Houſes, with Boughs and Variety of Flowers; the *Mexican* Embaſſadors were much concerned at that Alliance with the *Tlaſcalans*, and bid *Cortes* take care not to truſt theſe People who were ſo falſe that they would endeavour to compaſs, by Treachery, what they had not been able to perform by Force; and that he might be aſſured, if they once went into *Tlaſcala*, that they would murder them every Man. Though *Cortes*, who was a cautious Man, did not, as yet, repoſe much Confidence in the *Tlaſcalans*; he anſwered, that if they were ever ſo treacherous, he was reſolved to go into the City, for he feared them leſs there than in the Field. Having heard this Reſolution, they deſired he would give Leave for one of them to go firſt to *Mexico*; he was pleaſed with their Propoſal, becauſe it gave Time to ſee if the Friendſhip the *Tlaſcalans* offered was ſincere, and how it was taken at *Mexico*; whilſt theſe Things were in Agitation, many *Tlaſcalans* reſorted to the Army with Proviſions, others went out only to ſee and become acquainted with the *Spaniards*, entreating them to come to their City. They gave them good Words, till the Meſſenger, returning from *Mexico* the ſixth Day, brought ten coſtly Veſſels of the Gold, well wrought, and one thouſand five hundred Cotton Garments, and in *Motezuma*'s Name, intreated *Cortes* not to expoſe himſelf by going into *Tlaſcala*; for, he aſſured him, he would repent it, becauſe thoſe were a needy People, and invited him thither that they might rob him.

On the other Hand, the four great Lords had already ſent to importune him to repair to their City, offering him ſtill greater Security if he deſired it, and proteſting that their Friendſhip ſhould laſt for ever, for they would never violate the Faith of the Republic upon any Account. *Cortes* concluding that ſo much Courteſy muſt needs proceed from a ſincere Friendſhip, and being much courted to it by the *Zempoallans*, reſolved to go to *Tlaſcala*, and accordingly began his March, leaving ſeveral Croſſes and Heaps of Stones at his Quarters by the *Tower of Victory*, in Memory of thoſe glorious Advantages he had gained there.

The Accounts the *Zempoallans* and other *Indians* that followed the *Spaniards* gave were very advantageous; who, glorying to be in their Company, extolled their Valour, their Goodneſs, and their brave Actions; praiſing their God, by whoſe Aid they conquered. *Cortes* took Care to ſend Advice to *John de Eſculante*, and the reſt that had been left behind at *Vera Cruz*, of the Succeſs it had pleaſed God to give him, directing them to carry on the building of the Fort, and to keep a watchful Eye upon the Natives, and upon the Ships that ſhould come from *Cuba*, and ordering two Jars of Wine to be ſent him for ſaying Maſs, and for the Sick, having uſed all that he carried with him. When he arrived at *Tlaſcala* on the 18th of *September* 1519, the Lords of the four great Quarters of the City came out to meet him, attended by ſeveral others of the greateſt Perſons of the Commonwealth, and above an hundred thouſand Men. The Province complimented him at ſeveral Places, firſt at *Tezonpantzinco*, next at *Atliquetzan*, a very large Town, whither *Pilteculti* came with a very numerous Retinue; thence *Cortes* proceeded to *Tezatlia*, belonging to old *Xicotencatl*, who come not becauſe of his great Age. The other Lords being *Maxiſcatzin*, *Zitlacpopucatzin* and *Tlevexolotzin*, with all the prime Nobility, came up in good Order. Young *Xicotencatl* embraced *Cortes*, as did the other Lords, whom he received very courteouſly, and they all proceeded together to the Place where he and his Men were to be quartered, always expreſſing their Deſire to ſerve them; when the *Spaniards* had been put into their Quarters at the great Temple, and the *Indians*, their Friends, with them, they were generouſly treated and ſupplied with all Neceſſaries.

The more to aſſure *Cortes* of their Affection, they preſented him with above three hundred beautiful Women, all very well dreſſed, that had been condemned to be ſacrificed, which they gave the *Spaniards* as an Offering, and they lamented their Misfortune. *Cortes* would not accept of them, alledging, that their Religion would not permit any Man to have more than one Wife, and ſhe a Chriſtian: At laſt, in regard that the *Indians* take it very ill to have their Gifts refuſed; ſome of them were received under Colour of ſerving Donna *Marina*, who was preſent at all Conferences, and much reſpected; for it was the Cuſtom among the *Indians*, for a Woman of Quality to have a great Number to wait on her. And the *Indians* obſerving, that theſe and other Women Slaves they gave the *Spaniards* lived contentedly with them, the prime Men afterwards gave them their Daughters, that the Race of thoſe brave Men might continue among them. *Xicotencatl* gave a beautiful Daughter, he had, to *Peter de Alverado*, and ſhe was afterwards called Donna *Louiſa Techquiluaſin*; thoſe People having no Ceremony in Marriage more than the Conſent of their Parties. They gave *Cortes* the Name of *Calchichiutl*, ſignifying an Emerald, and Emeralds are highly valued among thoſe People. They called *Peter de Alverado* the Sun, becauſe he was very fair of Complexion, with an agreeable Red, and much beloved by the *Tlaſcalans*. *Cortes*, by Degrees, enquired very particularly into the Power and Condition of *Motezuma*'s Empire, and the Enmity between him and the Republic, and omitted nothing that might afford him Means of providing amply for the Accompliſhment of his Enterprize.

9. This bringing over of the Government and People of *Tlaſcala* to his Intereſt, uniting them in the Confederacy againſt *Motezuma*, and engaging them to furniſh an Army for that War, was one of the greateſt Strokes of Policy that was ſhewn by *Cortes*, in the Management of this whole Affair; and without taking which, it had been ſimply impoſſible for him to have ſucceded. It may not be amiſs therefore, before we proceed further, to give a more particular Account of this celebrated Republic, which makes ſo great a Figure in the Hiſtory of the New World. The Town of *Tlaſcala* is ſituated in Lat. 20° in a Climate extremely temperate, and in a Soil wonderful fruitful; the whole Diſtrict belonging to it was about 50 Leagues in extent, and yet within that narrow Compaſs, from the great Mildneſs of its Government, more eſpecially in Compariſon of that of the *Mexican* Monarchs, the Republic was able to raiſe thoſe prodigious Armies that have been before-mentioned.

The Place itſelf was built among the Rocks and white Cliffs, ſo as to provide rather for Strength and Security than for Neatneſs and Beauty, though, as far as the Ground would permit, the City was not deſtitute of either. It was from this Situation that it derived the Name of *Tlaſcala*, which ſignifies a Place of Rocks, tho' it was afterwards called *Tlaſcallan*, which ſome *Spaniſh* Writers call a Corruption; but, as they allow that in the *Indian* Tongue it implies, a Place well ſtored with Corn, and conſequently belonged as juſtly to this City as the other; I cannot ſee why we ſhould not rather ſuppoſe the City had two Names; the firſt perhaps impoſed by their Enemies, and the latter by themſelves. There was a fine River paſſed through their Territory, and waſhed a Part of the City, which commonly overflowed in the Winter, and thereby greatly enriched the Soil, but ſometimes over-ran its Banks with much Violence, as to do a great deal of Miſchief, and rendered Dykes neceſſary, which they, wanting Skill to raiſe, had recourſe to ſuperſtitious Ceremonies and bloody Sacrifices, which inſtead of curing increaſed the Miſchief. The Town was divided into Parcels at ſmall Diſtances, without any Order; many Houſes crowded together, and between them ſeveral narrow winding Lanes, the Houſes terraſſed at the Top on Beams, ſome on Mud-walls, ſome boarded, ſome on Brick, aud ſome of Lime and Stone, according to every Man's Ability, they had no upper Floors, but all on the Ground; having very large Rooms of irregular Shape, nor had they Doors or Window-Shutters, but only Matts, made of a Sort of Sedge, which they hung on and took down at Pleaſure, with Hauks-bells, of Gold, Copper, or other Metals, and Sea-Shells hanging on them to make a Noiſe, when they were taken down, opened or ſhut. Moſt of this Country was inhabited, for from the City there ſtretched out other Towns, like Suburbs, extending two or three Leagues beyond the Walls of it; every Houſe had Land about it, and there were eighteen Towns adjacent, belonging to *Tlaſcala*. The Inhabitants being above One hundred thouſand, and all the Country round this Province was encloſed by other Nations, Subjects to the *Mexicans*, who had maintained War againſt *Tlaſcala*, for ſixty Years paſt, and preſſed them on all Sides.

The *Tlaſcalans* had expelled the *Ulmecans* and *Zucatecans* out of their Country, and kept it to themſelves, calling themſelves at firſt *Chicimecans*. Having ſettled their Boundaries to be known by, aud refuſing to ſubmit to any King, or General, there enſued Civil Wars among them, by their conſpiring againſt their beſt Commanders. The prime Men were ſo hard preſſed that they craved Aid of *Teſcuco*, and other Towns, being much ſtreightened in *Tlaſcala*. With thoſe Succours they enlarged their Borders, and grew too hard for their Enemies, who ſought Aſſiſtance of *Matzaliutzin*, King of *Mexico*. He ſent Word to the *Tlaſcalans*, that though he had promiſed to aſſiſt their Enemies, it ſhould be only in Shew, for which he prayed them not to hurt his Subjects.

jects. When the War was over, thoſe *Chichimecans* of *Tlaſcala* ſtruck a great Terror into the Country, and all the *Culuas* and *Mexicans* joined in Alliance with them, and living long in Peace, had Leiſure to build their Towns and ſettle the Frontiers. *Tlaſcala* enjoying Peace, all the Province was inhabited, and *Kalliuacuth*, who was looked upon as the only Lord, divided what he had with his Brother *Teyohualminqui*, and went down to govern his People into the Vale of *Ocoteculco*.

Theſe Brothers left the Sovereignty to two Sons of theirs; and one of them, though very brave, grew ſo tyrannical in his old Age, that his Subjects, being uneaſy, conſpired, and ſlew him and all his Friends and Kindred; but two Nurſes hid two young Sons of his, from whom deſcended *Maxiſcatzin*, the moſt faithful Friend of the *Spaniards*; the other three Lords of *Tlaſcala* were of no leſs remarkable Deſcents. After the Death of *Culhuacutli*, the City and its Territory began to be governed as a Commonwealth. The *Mexican* Language was ſpoken at *Tlaſcala*, though there was another which they called *Otomitick*, from a Nation, which revolting from the Kings of *Mexico*, was received by the *Tlaſcalans* as their Subjects, and had Lands given them to till, on Condition that they ſhould guard the Frontiers againſt the *Mexicans* and *Culuas*. Theſe were the barbarous *Otomies*, on whom the *Tlaſcalans* at firſt laid the Blame, for having taken up Arms againſt *Cortes*. They are very hardy, excellent Huſbandmen, obſtinate Idolaters, leud, ſavage, and hard to be brought to Chriſtianity, Drunkards, and fond of living in remote Places, being the reverſe of thoſe that ſpeak the *Mexican* Tongue, who were docile and polite. Theſe *Otomies* were once poſſeſſed of all that Country, and there are of them ſcattered every where, but nothing is known of their Original; becauſe they are ſo barbarous, that they can give no Account of themſelves.

10. *Cortes* being come into *Tlaſcala*, to pleaſe *Maxiſcatzin*, removed into his Quarter of the Town called *Ocoteculco*, where a Market was kept every Week. The four Lords that governed the Commonwealth, and other great Men, went thither to diſcourſe *Cortes*, and intreat him to acquaint them with his Intentions, promiſing to concur ſincerely in whatſoever he ſhould propoſe. *Cortes* gave them to underſtand that he was come to inſtruct them in the Chriſtian Religion, to aboliſh Idolatry, and to aſſiſt them againſt all their Enemies; and particularly *Motezuma*. *Maxiſcatzin* replied, in Defence of their Gods, and *Cortes* rejoined, ſtill preſſing them to renounce their Idols; but, by the Advice of *F. Bartholomew de Olmedo*, and ſome of his Officers, he thought fit not to urge the Point of Religion any farther at that Time. They promiſing not to eat any more human Fleſh, yet they all returned to it as ſoon as he was out of the Way. Being now ſatisfied that his Friendſhip with the *Tlaſcalans* was eſtabliſhed, he propoſed his Journey to *Mexico*; and though they repreſented to him the Power of *Motezuma*, the Strength of the City, the Danger he was running into among the *Culuas*, who, they ſaid, were given to change; as alſo their Multitude; in Concluſion, to pleaſe him, they conſented to all he ſaid, and offered to aſſiſt him, if he would make War, or to bear him Company, if, as he ſaid, he only deſigned to viſit *Motezuma*: Accordingly they immediately began to appoint Commanders, raiſe Men, and lay up Proviſions.

The Fame of the Alliance between the *Spaniards* and the *Tlaſcalans* being ſpread abroad, put all the Country into a Conſternation, and eſpecially *Motezuma*, who was ſtill reſolved to obſtruct *Cortes*'s coming to *Mexico*; though, at the ſame Time, in order to draw him from *Tlaſcala*, he propoſed his removing to *Chulula*, where he might be better entertained. The *Tlaſcalans* earneſtly oppoſed it, and zealouſly offered fifty thouſand Men to attend him, becauſe the People of *Chulula*, after having been long at Peace with them, being corrupted by *Motezuma*, had, in a Battle they had with the *Mexicans*, and in which the *Tlaſcalans* led the Van, fallen in upon their Rear, and killed many of them, ſince which Time they had been Enemies. The *Tlaſcalans* adviſed *Cortes* to conſider that the *Chululans* ſaid they did not fear him, becauſe their God *Quetſalcoatl* was ſo powerful, that he would deſtroy his Men with Fire from Heaven, or drown them with Water: He ſmiled at this, and continued his Preparations. On the Part of the *Tlaſcalans* nine Sons of the Prime Men of the Quarter of *Ocoteculco* were appointed Commanders of the Troops that were to attend *Cortes* from thence, the other Quarters nominated thirteen Commanders. The ſeveral Commanders had alſo their peculiar Colours, and all very gay, with Plumes of Feathers, after their Manner. Certain it is, that the *Tlaſcalans* were very dubious of the Event of the Journey, being apprehenſive of the *Chululans*, and bearing much Reſpect to their City, as it was a Place of great Devotion and reputed Sanctity among them. *Cortes*, by the Advice of the four great Wards, ſent to call thoſe that governed at *Chulula* to him.

Eight Leagues from the City of *Tlaſcala* is the Mountain called *Popocatepod*, the Top whereof always ſmoaked; and whilſt the *Spaniards* were at *Tlaſcala* it caſt out more Fire than uſual, to the great Aſtoniſhment of the Natives. *James de Ordaz* took a Fancy to ſee that Wonder, for till then it was a ſtrange Thing to the *Spaniards*, and the *Indians* affirmed that no Mortal had ever been upon the Top of that Mountain. *Cortes* to ſhew the *Indians* that the *Spaniards* made ſmall Account of what they thought impracticable, was well pleaſed that *Ordaz* ſhould go and view it: He took with him ſome *Spaniards* and a few *Indians* for Guides, who ſtopped at a certain Diſtance; and *Ordaz* advancing, they heard the dreadful Noiſe that was within, felt the Earth quake, and arrived at the Place to which the Fire and Stones caſt out of the Mountain reached, the great Quantity of Aſhes choaking up the Way. Theſe Things making ſome uneaſy, and being very weary with going up, they would willingly have turned back; but *Ordaz* telling them, it was a Shame for *Spaniards*, who had undertaken any Thing not to go through, they advanced, making their Way through the Aſhes, and arriving at length at the Top, through a thick Smoak, they for ſome Time viewed the Mouth, which ſeemed to be round, and above a Quarter of a League in Compaſs, with a deep Cavity, within which the Fire raged as it does in a Glaſs-Houſe. From the Eminence appeared the great City of *Mexico*, ſeated in its Lake, and Towns about it: Not being able to make any longer Stay by reaſon of the exceſſive Heat, he returned the ſame Way he came for the Benefit of the Track. The *Indians*, being aſtoniſhed that mortal Men ſhould do ſuch an Action, kiſſed their Garments, believing that to be one of the Mouths of Hell; where ſuch Lords, as were Tyrants, ſuffered for their Sins, and afterwards went to Reſt.

11. The Events which we have reported in this Section are in themſelves ſo great and extraordinary, that if their Conſequences had not put them out of all Queſtion, they might very eaſily paſs for Things altogether incredible. If *Cortes* could have exhibited to the *Spaniſh* Miniſtry a Scheme of his Expedition, and had therein laid it down as a Thing practicable to have beat the Republic of *Tlaſcala*, though capable of bringing three or four hundred thouſand Men into the Field, into begging a Peace, and then making Uſe of their whole Power againſt *Motezuma*, it would certainly have been taken for the wildeſt, moſt romantic, and ridiculous Propoſition, that was ever ſeriouſly recommended to the Conſideration of Perſons intruſted with the Management of public Affairs; and yet it is very evident, that from the Time he firſt heard of this Republic, he actually formed ſuch a Scheme, foreſaw all the Difficulties that would attend it, provided for them, and by firmly perſiſting in the Execution of his own Plan brought it to bear. This plainly ſhews us, that there is ſcarce any Thing inſurmountable to a great Genius, or which may not be brought about if Men are obedient to a Commander, and awed with thoſe extraordinary Abilities which conſtitute what we call a Hero.

There ſeems to be no Queſtion made by the *Spaniſh* Hiſtorians, that the whole Succeſs of this amazing Enterprize was entirely due to the Wiſdom, Fortitude, and ſteady Reſolution of this great Captain, who yet, for any Thing that appears, was made ſo rather by the Strength of his natural Abilities, than from any Helps which he received from Diſcipline, or Experience; for it is certain that he had ſeen little of War before he undertook this Expedition, and had never acted as a Commander in chief, till ſuch Time as he put himſelf at the Head of it, which is another Circumſtance full of Wonder, or rather more ſurprizing than all the reſt taken together.

But it may be ſuggeſted, that ſuch as have written his Hiſtory, may be partial in this Reſpect, and attribute more to *Cortes*, and leſs to thoſe who attended him, than they deſerve; which, however, the very Circumſtances of the Hiſtory demonſtrate to be falſe, ſince it very plainly appears that there were always in his Army a conſiderable Number of Malecontents, who, if they durſt, would have declared againſt his Authority, and in favour of that of *James Velaſquez*, which muſt have ended in overturning the Expedition; ſo that from hence it very plainly appears, he was ſo far from having much Aſſiſtance from thoſe about him, that, in reality, a great Part of his Care was neceſſarily employed in preventing thoſe Seditions, which they were continually labouring to ſtir up, and which, as we ſhall ſee hereafter, no Succeſſes could induce them to leave off.

SECTION XI.

The March of the Spaniards *to* Mexico, *the Reception given to* CORTES *by* MOTEZUMA, *his Impriſonment and other Tranſactions to the Time of his ordering the* Spaniards *to quit his Dominions.*

1. *The Manner in which* Cortes *marched from* Tlaſcala *towards* Mexico, *and the Number of* Tlaſcalans *that accompanied him in his Way to* Chulula. 2. *His Reception in that City, the Methods uſed by* Motezuma *to bring the Inhabitants to conſpire againſt the* Spaniards, *and the Miſchiefs that enſued.* 3. *Upon Peace being reſtored at* Chulula, Cortes *continues his March towards* Mexico, *and is complimented on the Road by many of the* Mexican *Nobility.* 4. *His ſolemn Entry into* Mexico, *the Manner of his firſt Interview with* Motezuma, *the prodigious Splendor of that Monarch's Equipage, and his Civility to the* Spaniards. 5. *The Manner in which the* Spaniards *were diſpoſed of, and ſettled, in the Palace of* Motezuma's *Father, and the Proviſion made for them by the Orders of that Emperor.* 6. *The firſt Cauſes of* Qualpopoca's *Irruption into the Country of the confederate* Indians; John de Eſculante *aſſiſts them, and is killed, the News of which alarms* Cortes *exceſſively.* 7. *He reſolves to ſeize the Perſon of* Motezuma, *executes that Reſolution, and carries away the Emperor from his own Palace to the head Quarters of the* Spaniards. 8. Qualpopoca, *who occaſioned this Rupture between the* Spaniards *and* Mexicans, *is ſent for by* Motezuma, *and to ſatisfy the* Spaniards *is burned alive.* 9. *A Conſpiracy formed againſt the Strangers by* Cacamazin *the Emperor's Nephew, diſcovered and defeated by the Diligence and diſcreet Behaviour of* Motezuma. 10. *At the Perſuaſion of* Hernan Cortes *the Indian Monarch declares the King of* Spain *his Succeſſor, and does Homage to* Cortes *as his Repreſentative.* 11. *The true Motives of* Motezuma's *Conduct in this Affair, and his Demand that* Cortes *and his Soldiers ſhould quit his Dominions.*

1. THE Embaſſadors from *Motezuma*. taking great Pains to infuſe Jealouſies into the Mind of *Cortes*, of the People of *Tlaſcala*, and preſſing him daily to depart, at laſt, to content them, and being willing to eaſe the *Tlaſcalans* of the ſtrange Dread they had conceived of the Gods of *Chulula*, he reſolved to remove; after he had reſided twenty Days in *Tlaſcala*, and been informed of all that related to the City of *Mexico*, its Situation and the Power of *Motezuma*, and his Empire, and having concluded a Peace between *Guacozingo* and *Tlaſcala*, obliging both Parties to reſtore all that had been taken during the War. He was attended by a hundred thouſand Men; many were much concerned at his going upon that Enterprize, believing he would be loſt; but others concluded that his Valour would extricate him from all Difficulties. Merchants went along with them to trade for Cotton and Salt; the *Chululans*, to whom the Interpreter, *Aguilar*, had proteſted that *Cortes* would make War with them, unleſs they went to ſubmit themſelves to the King of *Spain*, being informed that he was upon his March, ſent ſeveral great Men, who ſaid they came not before, becauſe the *Tlaſcalans*, their mortal Enemies, were falſe, whereas they themſelves were ſincere, and then they, in a ſolemn Manner, declared themſelves Subjects of the Crown of *Spain*: They reached not the City that Day, to avoid entering by Night, though the Diſtance was but five or ſix Leagues, but encamped, where the *Chululans* prayed *Cortes* not to permit the *Tlaſcalans* to do them any Harm. He ſeeing no Sign of War, ordered them to return Home, taking his Leave of the Officers with much Courteſy and Affection, and preſenting them with ſuch Things as he had. He retained with him only three thouſand *Tlaſcalans*, or, as other Authors ſay, ſix thouſand, and would not take a greater Number to avoid putting himſelf into the Hands of a barbarous People, of whoſe Fidelity he hitherto had had but little Trial.

The *Tlaſcalans* ſaid, thoſe People where he was going were faithleſs, that he muſt be upon his Guard; and, as an Inſtance, mentioned how they had betrayed them. They offered to go to *Mexico* whenſoever they ſhould be called, and declared they would moſt willingly have proceeded with their whole Army, to ſee the Event of the Affair; but *Cortes* told them he was ſatisfied with thoſe he had, being for their Valour worth four times as many. The next Day above ten thouſand *Chululans* came out to meet him, bringing Roſes, Flowers, Bread, Fowl, and Muſic: One great Body came to welcome *Cortes*, and then drew off in good Order, to make Way for another; which was done, becauſe that City, being divided into ſix large Wards, three of them were for *Motezuma*, and three were not. When they came to the City, all the reſt of the People came out much ſurprized at the Shape, Mien, and Weapons of the *Spaniards*: Their Prieſts advancing in white Garments, like Surplices, their Arms naked, and Cotton Fringes about the Edges of their Robes: Some of them carried Idols in their Hands, and others burned Perfumes, others ſounded Horns, beat Kettle Drums, and played on ſeveral Sorts of Muſic, all of them ſinging, and ſome perfuming the *Spaniards*. In this pompous Manner they entered *Chulula*, and went where they lodged all together, and their *Indians* with them always upon their Guard, being plentifully ſupplied with all kinds of Proviſions.

A few Days after, *Cortes* obſerved very ſuſpicious Circumſtances; that ſome of the Streets were barricaded, and abundance of Stones laid on the Tops of Houſes, to throw down; the Supplies of Proviſions grew ſhorter, the great Men and Commanders of the City ſeldom viſited him, and *Motezuma*'s Embaſſadors ſtarted Objections againſt his going to *Mexico*, with more Boldneſs than before; nor was this all, for the *Chululans*, by order of the Embaſſadors, had preſumed to tell him that there were Alligators, Tygers, and other fierce Creatures, where *Motezuma* was, which, if he ordered them to be turned looſe, would devour the *Spaniards*; to which he anſwered, he could not believe he would put any Affront upon thoſe that came to viſit him, but that in caſe he ſhould do ſo, they were to underſtand that thoſe ſavage Animals did not hurt the *Spaniards*; theſe Things made him reſolve with himſelf how he ſhould ſubdue the People of *Chulula*, before he went farther.

2. *Motezuma* in the mean Time ſent freſh Agents, by whom he promiſed mighty Rewards to the Lords of the Quarters of *Chulula*, if they would cut off the *Spaniards*, giving the Commander a gold Drum, and promiſing to aſſiſt him with thirty thouſand Men. The Commander undertook to perform all, on Condition that the *Mexicans* ſhould not come into the City, becauſe he was afraid they would make themſelves Maſters of it. They agreed to barricade the Streets, and pelt the *Spaniards* from the Tops of their Houſes, that ſo they might take and deliver them bound. The thirty thouſand *Mexicans* being ſo poſted, that without coming into the City, they might take all the *Spaniards* that ſhould happen to eſcape out of it, they alſo began to convey away their Goods, and ſecure their Wives and Children, which afforded new Grounds for Suſpicion. Whilſt *Cortes* was thus uneaſy and diſſatisfied, *Marina* acquainted him that a Lady of Quality had told her, that having taken a Kindneſs for her, ſhe adviſed her, if ſhe would avoid being killed with the *Spaniards*, to ſtay with her, and ſhe would hide her in a Houſe where ſhe ſhould be ſafe, becauſe the *Mexicans* and the *Chululans* had agreed to deſtroy them.

Cortes, upon this, cauſed two Prieſts to be ſeized, who being examined aſunder, and threatened, confeſſed the ſame that *Marina* had declared: Whereupon he called the prime Men and Prieſts, and bid them not deal underhand, but if they had any Thing to ſay to him, to ſpeak plain like Men of Honour. They anſwered they were his Servants, that he might let them know when he deſigned to depart, and they would attend him armed, for Fear of any Difference between him and the *Mexicans*; he told them he would ſet out the next Day, and therefore ordered they ſhould find Men to carry their Baggage, and furniſh them with Proviſions.

The *Chululans*, thinking they had a ſure Game to play, carried the Men to be loaded with Proviſions, but as thoſe *Indians* never uſed to undertake any conſiderable Enterprize without conſulting their Gods, they ſacrificed ten Children of three Years old, four Boys, and ſix Girls, being the uſual Sacrifice upon commencing a War. Their Commanders poſted themſelves, with as many of their Men as they could, at the four Gates of the Quarters through which the *Spaniards* were to march out. *Cortes*, who omitted nothing conducive to his Safety, had ordered his Men to Arms, the Horſes to be ready, and the *Tlaſcalans* and *Zempoallans* to obſerve when the Signal was given, by firing a Muſket; when all Things were ready, he called the principal *Chululans*, pretending that he would take his Leave of them: Forty were admitted, and more would have come if they might, but the moſt conſiderable of them being wanting he was ſent for. *Cortes* then, in the Preſence of the *Mexican* Embaſſadors, ſaid he had loved them as Friends, and they had hated him as an Enemy, as appeared by their Uſage; though all his Men had been inoffenſive, that they had deſired the *Tlaſcalans* might not come into their Country, and he had conſented to it; and that though he had adviſed them to deal fairly, and challenge him like brave Men, if they had any Thing againſt him, yet they had agreed with the *Mexicans* to deſtroy his Forces by Treachery, for which heinous Offence he has reſolved to put them all to Death, and raize their City.

They were for a while ſtruck dumb, and beſide themſelves; but being a little recovered, ſaid, "This "Man is like our Gods, who know all Things, it is in "vain to deny any Thing." And accordingly they confeſſed all he had ſaid was true. Then taking four or five of them aſide, he aſked them for what Reaſon they would have done ſuch a wicked Deed? They anſwered, that *Motezuma* was ſo averſe from his going to *Mexico*, that the Embaſſadors, to obſtruct it, had put them upon it. *Cortes* told the Embaſſadors what the *Chululans* ſaid, but at the ſame Time pretended not to believe *Motezuma* could be guilty of ſo foul a Deſign, and they endeavoured to excuſe themſelves. The Signal of firing a Muſket being then given, the *Spaniards* ſallied out, and, meeting with little Oppoſition from the Inhabitants, though they were in Arms, killed almoſt ſix thouſand of them, without touching Women or Children, and ſet fire to all the Houſes and Towers where any Reſiſtance was made.

The Cries of the *Indians* on both Sides were prodigious, and the Confuſion not to be expreſſed. Many Gentlemen got up into the Tower of the great Temple, with the Prieſts, where they ſtood upon their Defence: Their Lives were offered them if they would ſurrender: Only one complied, and was well received, the reſt were all burnt. The Croſs-bow Men ſhot thoſe that were got up to the Tops of the Trees in the Court of the Temple, and it was obſerved that the Prieſts complained of their Gods for not defending them. A great Part of the City was plundered: The *Spaniards* took the Gold and Feather-work, though not much were found; and their *Indians* had the Cotton and the Salt, which was eſteemed a great Booty by them. The News of what had happened was immediately carried to *Tlaſcala*, where the Lords of the Republic ordered their General *Xicotencatl* to march with all Speed, to the Aſſiſtance of their Friends, which they did; and *Cortes* having returned Thanks, and beſtowed Preſents on the General and their Officers, ſent them back well pleaſed to *Tlaſcala*, where there Joys were incredible, for the Booty taken from the Enemies, and no leſs for being free from the Fire from Heaven, and the Tempeſts with which the *Chululans* threatened to deſtroy the *Spaniards*, and all their Adherents.

The Lords that were Priſoners entreated *Cortes* to put a Stop to his Reſentment, ſince they were not ſo much to blame as the King of *Mexico*, and to permit two of them to go and ſee what was become of the Multitude. He thereupon ordered the Slaughter to ceaſe, and many ſtood up who had lain on the Ground among the Dead: So great was the Authority of the two Lords of the Commonwealth, whom *Cortes* permitted to go about the City, that the next Day it was full of People, and as quiet as if nothing had happened. He ſet at Liberty the other Lords and Gentlemen he had taken Priſoners, at the Requeſt of *Maxiſcatzin* and *Guacozingo*, who had reſorted to him, telling them they might be thankful he did not entirely ſubvert the City, and put them all to the Sword, for ſo he was accuſtomed to puniſh Traitors. He then propoſed a Reconciliation between them and the *Tlaſcalans*. By the Advice of *Cortes* they alſo made Choice of a new General, the former being dead, and that City was a Republic as well as *Tlaſcala*. Next he ordered the *Tlaſcalans*, and his other confederate *Indians*, to clear the Court of the great Temple, and the Streets, of the dead Bodies, becauſe they began to ſtink.

Motezuma being informed of all that had paſſed, and that nothing could divert *Cortes* from the Proſecution of his Deſign of coming to *Mexico*, ſent freſh Embaſſadors with four large Diſhes of Gold, and a great Quantity of Proviſions, with Orders to aſſure him that he knew nothing of the Deſign that the Inhabitants of *Chulula* had to have murdered his Men, and that he might freely come to *Mexico* if he thought fit, becauſe he had oppoſed his Journey only to ſpare him the Fatigue of it. As this flattering Meſſage was falſe in itſelf, ſo the Conduct of the Emperor at Home was as mean-ſpirited and baſe. For when he heard that his Plot was diſcovered, and his Confederates deſtroyed, for having attempted to put in Execution, he ſhut himſelf up in the great Temple, faſted and prayed for a Week together, and in the mean Time ſacrificed a Multitude of poor innocent Men to his Gods, in Hopes of appeaſing them.

3. It was in Conſequence of theſe long Meditations on the preſent melancholy State of his Affairs, that he ſent a great Lord of his Court to *Cortes* under Pretence of a friendly Viſit; but in Reality, with a View to diſſuade him from proceeding further, by aſſuring him the Roads were dangerous, Proviſions ſcarce, and the Climate unwholeſome. The *Spaniſh* Commander anſwered chearfully, that too many of theſe Hardſhips they

were enured, and that he did not at all doubt they ſhould be able to overcome the reſt. *Motezuma* was informed of all by ſome of his People, though moſt of them ſtaid among the *Spaniards*; and it was ſuſpected that they were privately armed to fall upon them by Surprize. *Cortes* bid the *Mexican* Lords not ſtir into the Quarters of the *Spaniards* at Night, becauſe they never ſlept, and were wont to kill all that came among them. Notwithſtanding this Precaution, ſome Spies were employed to find whether that was true, and the Sentinels killed three or four of them, being forewarned, which proved ſo advantageous, that the *Mexicans* afterwards took up Quarters very far from the *Spaniards*.

The next Day they marched to a Town called *Amaſcameca* in the Province of *Chalco*; the Lord came out to meet *Cortes* with a great Retinue; gave him forty Women Slaves, the Value of three thouſand Pieces of Eight in Gold, and Proviſions for two Days; and told him in Secret afterwards, in what a tyrannical Manner *Motezuma* treated him, and all others; *Cortes* comforted, encouraged, and gave him ſome Toys, ſo that they parted very good Friends. The Army advanced from thence to a ſmall Town, half of which ſtood in the Lake, and the other half on the Foot of an uncouth ſtony Mountain. Many of the King's Servants kept with the Army, ſupplying it with all Neceſſaries, and that Night they deſigned to have murdered all the *Spaniards*; but *Cortes* was ſo watchful, that his Sentinels, and a ſmall extraordinary *Corps de Garde* he had appointed, killed twenty Men that were ſkulking in the Quarters; the next Morning before they ſet out abundance of People came from *Mexico*, and many Gentlemen attended on *Cacamazin*, Nephew to *Motezuma*, Lord of *Tezcuco*, a Youth about twenty five Years of Age, who was richly clad, and carried on a Sort of Sedan upon Mens Shoulders; and when he alighted, ſome went before ſweeping the Way; *Cortes* came out of his Tent to meet him, paying him much Reſpect, and treating the others very courteouſly; twelve Noblemen went with him into the Tent, and *Cacamazin*, with much State and Gravity, ſaid, that he and theſe Gentlemen were come to wait on him; adding to excuſe his Uncle, that he came not in Perſon, becauſe he was indiſpoſed. *Cortes* anſwered him fully, and yet *Cacamazin* inſiſted that it was not fit for him to go to *Mexico*, becauſe he ſuſpected there might be ſome Difficulty in his Admittance, or that it would be oppoſed. *Cortes* gave him a Preſent of ſuch Things as he had, treating him in a very courteous and loving Manner, but held on his Way; and it was wonderful to ſee what a Multitude of People came out from *Mexico*, and the other Towns on the Lake to ſee the *Spaniards*, admiring their Habit, Beards, Arms, Horſes, and the Strangeneſs that appeared in every particular, ſaying, theſe are truly Gods.

Cortes warned them not to croſs the Soldiers Ranks, nor to come near the Horſes, nor to touch their Garments, which would immediately coſt them their Lives, leſt growing familiar with his Soldiers they ſhould fear them the leſs. They came to *Tezcuco*, which was twice as big as *Seville*, the Streets were regular, the Houſes beautiful, and ſeated in a Plain on the Salt-Lake, and had freſh Water in Pipes brought from the Mountain to every Houſe, which made it a very agreeable Habitation; from thence they proceeded to *Lavaca*, which they called *Venezuela*, or *Little Venice*, containing about two thouſand Houſes, all in the Water, Pleaſant, and plentifully ſupplied with Fiſh; they entered it by a Cauſeway, twenty Foot broad, and above half a League in length, with good Houſes and Towers.

The Lord of the Place came out to meet *Cortes* with Neceſſaries; and at his Requeſt they ſtaid there that Night; he diſcourſed *Cortes* in private, declaring, how much he wiſhed to be diſcharged from his Subjection to *Motezuma*, made grievous Complaints, adding, that if he and his were Gods, as they ſeemed to be, he ought to ſet many great Men at Liberty, who would all be aſſiſting to him. He comforted and aſſured him that the Great Monarch *Motezuma* would do whatſoever he would aſk of him. As for the Way to *Mexico*, that Lord aſſured him it was all good, being a long Cauſway, and broader than that which had brought him thither.

4. After this Conference, from which he learned many Things that were of very great Uſe to him, *Cortes* ſet out better ſatisfied, having reſolved to make Boats to enter into *Mexico*, being afraid they ſhould break down the Cauſways; he marched with much Circumſpection, ſending ſome Horſemen before to diſcover what paſſed. At the Requeſt of *Cacamazin*, he went two Leagues farther, to *Yztacpalapa*, a Town belonging to another of *Motezuma*'s Nephews, who came out to meet him with another Prince of the Royal Family, and with them came an infinite Crowd of People. They preſented him with Women Slaves, Plumes of Feathers, Garments, and to the Value of four thouſand Pieces of Eight in Gold: The Lord of *Yztacpalapa* made a Speech, bidding *Cortes* welcome, in the King's Name; *Cortes* anſwered very diſcreetly, and preſented him ſome Toys, which were more acceptable for the Rarity than the Value.

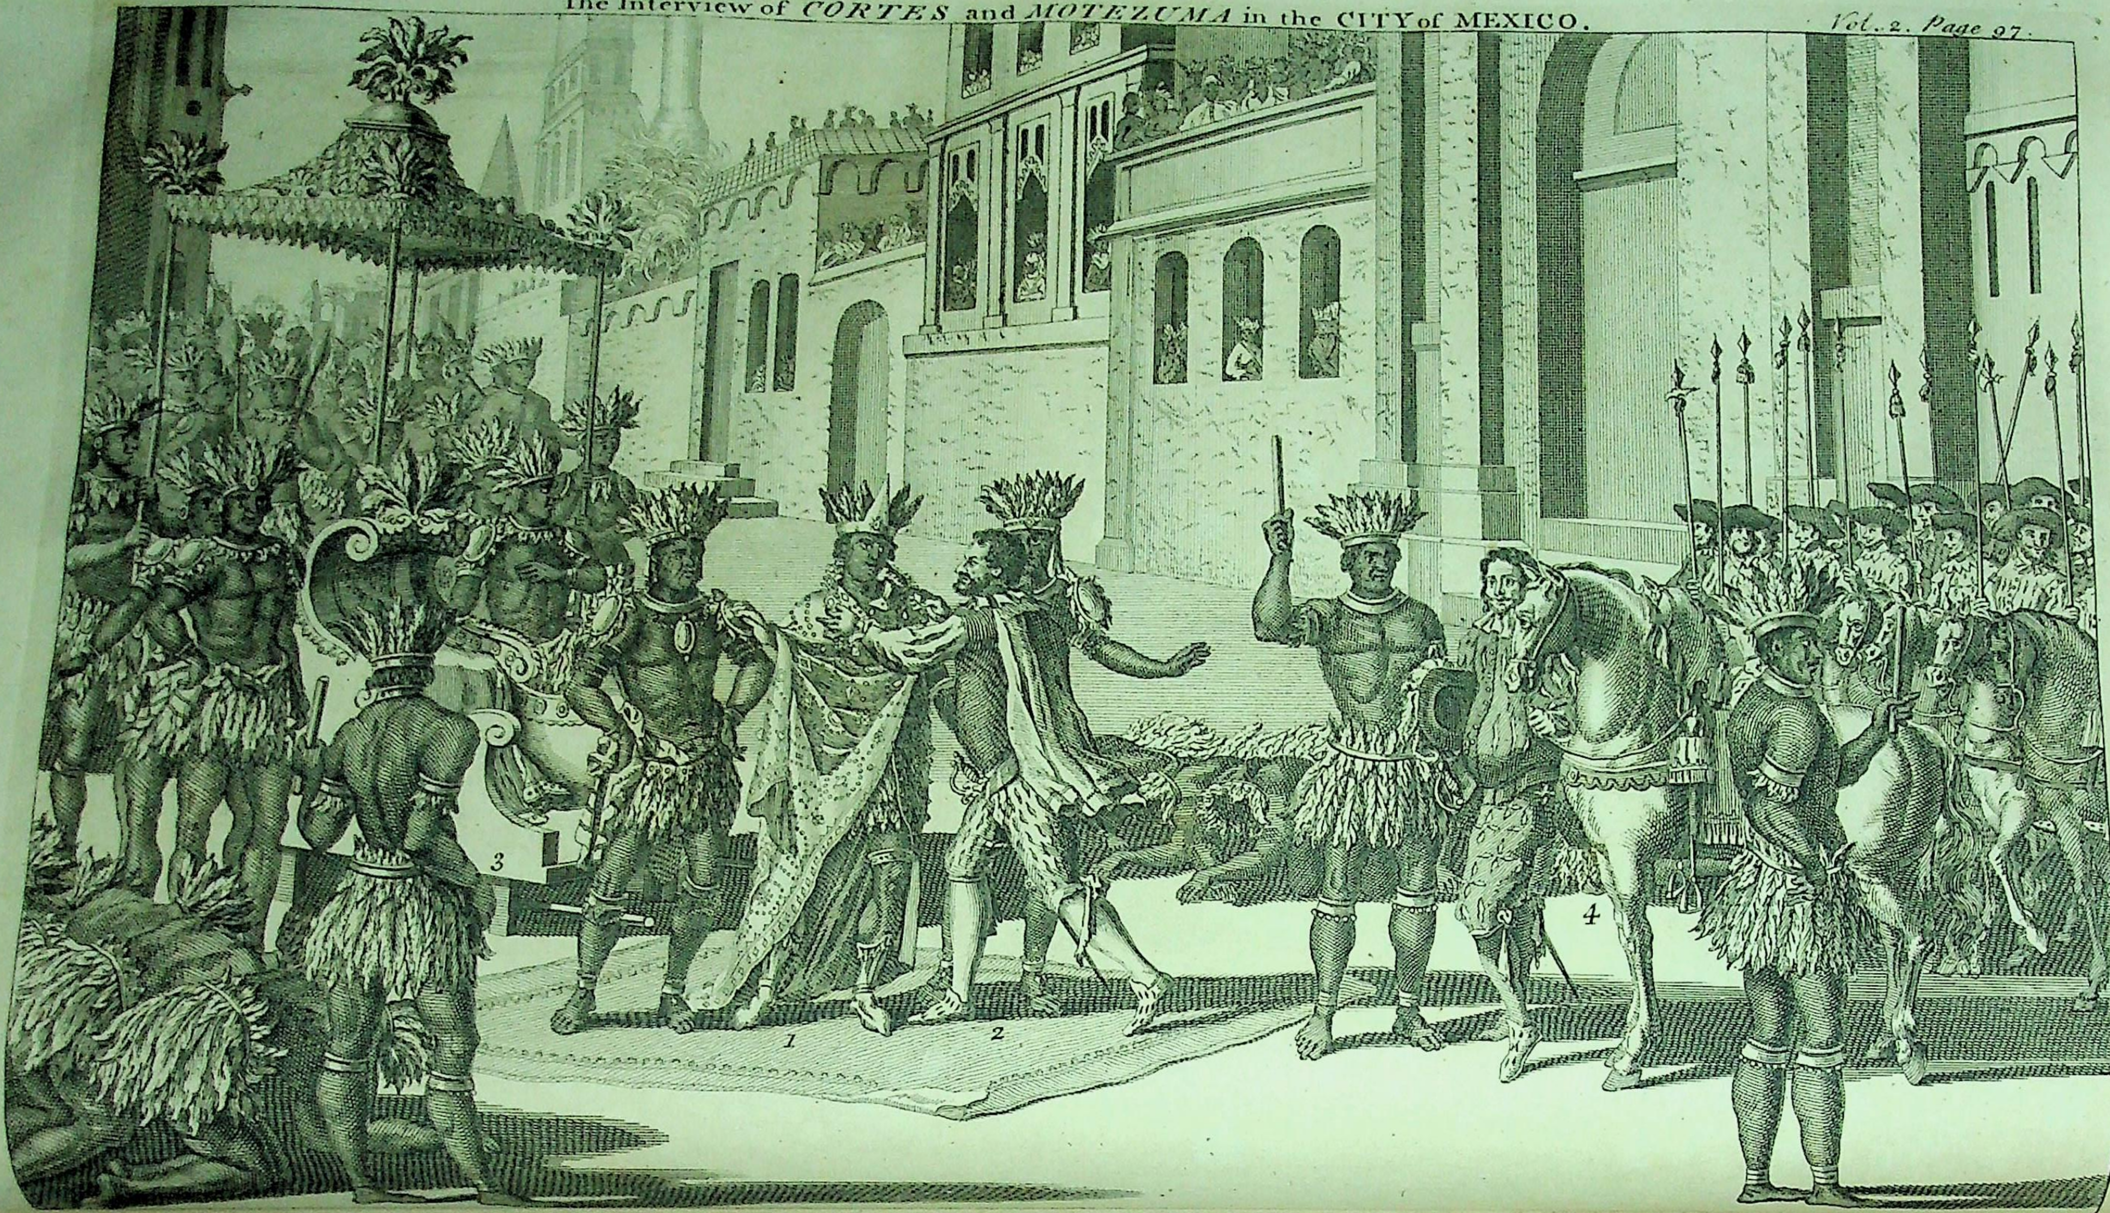
At *Yztacpalapa* he was well entertained in a Houſe that had large Courts, upper and lower Floors, and very delightful Gardens; the Walls were of Stone, the Timber-work well wrought, there were many and ſpacious Rooms hung with Cotton Hangings extraordinary rich in their Way; on one Side of it was an Orchard, with abundance of Fruit and Greens, the Walls were all incloſed with Reeds interwoven, covered with odoriferous Flowers. There were Ponds of freſh Water, with much Fiſh in them; one of them was four hundred Paces ſquare, with Steps to go down to the Water and to the Bottom; ſuch Numbers of ſmall Herons, Wild-Ducks, Gulls, and other Sorts of Fowls reſorted to the Lakes, that they were ſometimes covered. This City contained ten thouſand Houſes, one half in the Salt-Lake, and the other on the Continent; on the Way from it to *Mexico* was a Spring of good Water encompaſſed with tall Trees.

Cortes attentively obſerved all theſe Particulars, and having conſidered the Grandeur of *Mexico*, he is reported to have rejoiced very much, and to have bid ſome of his beſt Friends cheer up, for they ſhould ſoon receive the Reward of all their Labours. *Motezuma* who ſtill deſired nothing more than to obſtruct *Cortes* from coming to *Mexico*; when he was at *Yztacpalapa* ſent ſome Gentlemen to adviſe him to go back, repreſenting to him many Dangers, and offering to give him whatſoever he ſhould demand. *Tuch*, the Nobleman of *Zempoalla*, being informed of what they had ſaid, told *Cortes* he ſhould not give Credit to thoſe Difficulties and Dangers they talked of, for he had been himſelf in *Mexico*, and offered to conduct him to the King's Palace, over a very fine Cauſway. *Cortes* then advancing, ordered an *Indian* to go before, and make Proclamation as he went, in the *Mexican* Language, that no Man ſhould croſs the Way, for if any did, they ſhould be immediately killed, which proved of great Uſe, by giving them Room to march notwithſtanding the Crowd of the People.

Yztacpalapa is two Leagues from *Mexico*, joined to it by a Cauſway, ſo broad, that eight Horſemen can eaſily go abreaſt, and it is ſo ſtrait, that, were it not for one Angle it forms, the Gates of *Mexico* might be ſeen at the firſt ſetting out; on the Sides of it are *Mexicatzingo*, a Town of four thouſand Houſes, ſeated in the Water; *Cuyoacan* of ſix thouſand Houſes on the Land, very beautiful and pleaſant; and *Hiucilopucheo* of five thouſand Houſes. In theſe three Towns there were many Temples, and high Towers all plaiſtered over with white Lime, which, when the Sun ſhone upon them, at a Diſtance, looked like Silver, being a great Ornament to thoſe Places, and now are Monaſteries; there was in them a great Trade of Salt, but not white, nor agreeable to eat, eſpecially to the *Spaniards*, yet good for ſalting of Meat: It is made of the Surface of the Earth, that is near the Lake and full of Saltpetre: The Lumps of it are round and almoſt of Brick Colour, and they yielded *Motezuma* a very great Revenue. The Trade ſtill continues, and this Salt is carried into Provinces very far diſtant.

On the Cauſway there were Draw-bridges, at certain Diſtances over the Openings, through which the Water runs out of one Lake into the other. The Freſh-water

The Interview of *CORTES* and *MOTEZUMA* in the CITY of MEXICO. *Vol. 2. Page 97.*



Lake is higher than the Salt, and though it runs into the other, they do not mix much, becauſe of the Cauſways that part them. *Cortes* had three hundred *Spaniards*; and when they marched out of *Tlaſcala* their Number ſeemed ſo ſmall to him, that, fancying ſome ſtayed behind, he ſent *Peter de Alverado* to fetch them out, but he found none. The *Indian* Confederates that followed him were ſix thouſand; for ſome *Tlaſcalans*, *Chulalans*, and others, had joined him at *Chulula*: Being come near to *Mexico*, where another Cauſway joins the former, he found a Stone Bulwark two Fathoms high with two Towers at the Ends, and between them a Breaſtwork with two Gates: There *Cortes* halted, becauſe four thouſand Gentlemen of the Court, richly clad all in the ſame Livery, came out to meet him; every one of them, when he came to the Place where *Cortes* was, made Obeiſance, touching the Ground with his Right-hand, and kiſſing it, and paſſing along returned to the Place from whence he came.

To this Bridge the Emperor himſelf advanced, to meet *Cortes* under a Canopy of Green Feathers and Gold, carried on the Heads of four Lords: Before him walked three Lords one after another, each of them holding a Gold Rod upright, which was carried before *Motezuma* every time he went abroad, either by Land or Water, like a Standard or Token that the great Lord was there, to the End that all who were in the Way, though they did not ſee him might pay the due Reſpect. Two principal Lords, his Brother *Quequathuac*, and his Nephew *Cacamazin*, led him by the Arms; they were all richly clad after the ſame Manner, bating that the King had Golden Shoes, which they call *Zagles*, not unlike thoſe of the antient *Romans*, and on them many precious Stones of great Value, the Soles faſtened with Thongs. The two Lords that led him were barefoot, for the Reſpect they paid him was ſo great that no Man durſt come in his Preſence without taking off his Shoes, nor might they lift up their Eyes.

Motezuma kept along the Middle of the Street, and two hundred followed him, as cloſe to the Wall as they could, their Eyes fixed on the Ground, becauſe it was accounted Diſreſpect to look on his Face. As ſoon as *Cortes* ſaw him he alighted off his Horſe, at a ſmall Diſtance with ſome Gentlemen, and drawing near ſaluted him after the Manner of *Spain*. Thoſe that led *Motezuma* ſtopped *Cortes*, thinking it a grievous thing that any Man ſhould touch him, being held as ſome Deity; they ſaluted one another after their Manner: *Motezuma* touched the Ground with his Hand, kiſſing it, a Ceremony uſed among the *Indians*, and then bid him Welcome: *Cortes* returned him Thanks for having come out to meet him, and put about his Neck a Collar of fine Glaſs and precious Stones with ſome Enamel. *Motezuma* bowed a little, in token of accepting the Preſent. He went on a little before, with the Nephew that led him by the Arm, and ordered the other to ſtay and wait upon *Cortes*, leading him by the Hand along the Middle of the Street, not permitting any *Spaniards* or *Indians* to come near. This was the greateſt Honour *Motezuma* could have done *Cortes*. The two hundred Gentlemen in one Livery that went behind, as ſoon as they turned about, came one by one to welcome him; the Day would have been too ſhort if all the Nobility in the City were to have done the like; but the King going before, they all turned their Faces to the Wall, in token of Reſpect; ſo that the others, who were behind, could not come up.

The King was much pleaſed with the Collar *Cortes* gave him; becauſe, though it was not coſtly, it was gay, ſparkling, and very ſtrange to him. That he might not be thought to fall ſhort in any thing that became a great Prince, he called two Officers of his Bed-chamber, and bid them bring two Collars of large red Prawns as big as great Snails or Wallnuts, at every one of which hung eight Gold Prawns wrought to the Life, and about half a Foot long: When brought, the King ſtopped till *Cortes* came up, and with his own Hands threw them upon his Neck. The *Indians* were amazed that *Motezuma* ſhould do *Cortes* ſo ſingular a Favour, for he had never done the like to any other Man. The *Spaniards* were aſtoniſhed to ſee ſuch a Multitude of People, and after a long time paſſing through them came to a very large Court, which was the Wardrobe of the Idols, and had been the Houſe of *Axyacazin*, *Motezuma*'s Father.

5. At the Door of it, the Emperor taking *Cortes* by the Hand, led him into a ſpacious Room, placed him on a rich elevated Place, adorned with precious Stones, and ſaid to him, "You are in your own Houſe, eat, reſt, "and take your Pleaſure, I will ſoon return." *Cortes* made him profound Obeiſance, without anſwering one Word. Such was the Reception that mighty Prince gave *Cortes* in that vaſt City of *Mexico*, on the 8th of *November*, 1519. They were lodged in a Houſe that contained ſo many ſpacious Rooms, with Bed-chambers, that one hundred and fifty *Spaniards* could all lie ſingle. It was alſo worth obſerving that, though ſo big, every Part of it, to the leaſt Corner, was clean, neat, matted, and hung with Hangings of Cotton and Feather-work of ſeveral Colours, and had Beds of Matts with Pavilions over them, no Man of what Quality ſoever having any other: There was Fire with Perfumes in every Chamber, and ſo many Servants every where, as ſufficiently diſcovered the Grandeur of that Prince. When *Motezuma* was gone, *Cortes* aſſigned every Man his Apartment, placing the Artillery before the Door, and when he had ordered all that was requiſite, the prime Men ſerving him in ſuch a Quality as is uſual in the Houſes of the greateſt Perſons there, in Honour to him, and becauſe it was then convenient, ſtood in order about the Walls.

When they had all dined and reſted, *Motezuma* returned, and *Cortes* went to meet him; they both walked together to the raiſed part of the Room, and when they were ſeated in the Preſence of many *Mexican* Gentlemen and *Cortes*'s chief Commanders, *Motezuma* gave *Cortes* many coſtly Jewels of Gold, Silver, Feather-work, and ſix thouſand rich Cotton Garments. *Cortes* returned Thanks for the noble Preſent in ſuch a Manner as ſhewed good Breeding and Diſcretion. Soon after, the Emperor entred into a long Conference with the *Spaniſh* Commander, in which he ſhewed himſelf a very great Politician, and a deep Maſter in the Art of Diſſimulation: He ſet out with giving abundance of plauſible Reaſons why he was ſo very unwilling to admit them into his Capital: He next took notice of the ſtrange Reports that had been ſpread about them; and then told them, he believed, that as ſtrange as they appeared to one another, they were really Countrymen, ſince it was certain that the Anceſtors of the *Mexicans* came from a Land at a great Diſtance, and had not been ſettled there above a Century, that therefore he regarded them as Brothers; that they were free to take what they pleaſed, and that they ſhould ſtudy to amuſe and divert themſelves the beſt Way they could.

6. *Cortes* thanked *Motezuma* for theſe ſingular Marks of his Kindneſs and Affection, took a View of the City, and for ſome time paſſed his Days very agreeably; however, before he had formed in his own Mind any Scheme of fixing the *Spaniards* in that Country, Things began to change their Aſpect; and he ſaw great Cauſe to eſteem himſelf in more Danger than he had yet been expoſed to in the Proſecution of this Deſign. The Occaſion of his Apprehenſions was the Arrival of two *Tlaſcalans*, diſguiſed ſo as to paſs all *Motezuma*'s Guards, whoſe Buſineſs was to inform him, that the *Indians* allied to the *Spaniards*, finding their Lands ravaged by one of *Motezuma*'s Captains, whoſe Name was *Qualpopoca*, and apprehending that he had a Deſign upon *Zempoalla*, they applied themſelves, as he had directed, to *Eſculante*, whom he had left Governor of *Vera Cruz*, and deſired his Protection. The *Spaniſh* Governor ſent immediately to *Qualpopoca*, to deſire that he would forbear injuring the Friends of the King of *Spain*; but, notwithſtanding he repeated his Inſtances more than once, he found them ineffectual; and therefore, in purſuance of his Inſtructions, he marched to their Relief with all the Force he could ſpare, which conſiſted of no more than forty *Spaniards*, and thoſe but indifferently armed; having

with them only two ſmall Field-Pieces; but being joined by two thouſand of the Confederate *Indians*, he ventured to engage the *Mexicans*, though double his Number; that is to ſay, between four and five thouſand Men.

If the Confederate *Indians* had behaved as they ought, he would probably have obtained an eaſy Victory; but they fled as ſoon as the Battle began, having loſt a few Men: The *Spaniards*, being forſaken by their Allies, ſtood their Ground, and routed the *Mexicans*, who, having never felt them before, could not ſtand the Edges of the *Spaniſh* Swords. They purſued them as far as the Town, which was afterwards called *Almeria*, and burnt it. *John de Eſculante* was dangerouſly wounded in this Fight and his Horſe killed, and ſix of the Men were greatly hurt: *Eſculante* died of his Wounds as ſoon as he came to *Villa Rica*. The *Indians* carried off one Soldier alive, whoſe Name was *Arguillo*, a Native of *Leon*; a Man of a large Head, black Beard, very luſty and ſtrong, who being ſent to *Motezuma* (for this happened before *Cortes* entred *Mexico*) died by the Way of his Wounds; and becauſe he ſtunk, they carried the Head, which, being of a luſty Man, put him into a Conſternation: He would not have it offered at any of the Temples in *Mexico*, but in ſome one without; and ſaid, he wondered how it fell out that his Men, being ſo numerous, did not vanquiſh that ſmall Number; and, that he was convinced that thoſe Men were not immortal, though they appeared to be very brave. The Conſternation he was put into by the Sight of *Arguillo*'s Head, ſome ſay, proceeded from the Predictions he had, That ſuch Men ſhould conquer his Monarchy, and change the Religion of his People. It is to be obſerved, however, that this laſt Circumſtance was not known to *Cortes* at that Time; ſo that he was in doubt, whether this Action was performed by Order of the Emperor, or even whether he knew or approved it.

However, as the Situation he was in made him very uneaſy, he ſent privately to the moſt ſenſible and beſt affected *Indians* of his Army, of whom he demanded, "If they had obſerved any Alterations in the Minds of "the *Mexicans*, and in what Eſteem the *Spaniards* were "at that Time among them?" They anſwered, "That "the common People were taken up with their Feſtivals "made for the Diverſion of the *Spaniards*, whom they "reverenced becauſe they ſaw them honoured by their "Emperor: But that the Nobility ſeemed penſive and "myſterious: That they had ſecret Conferences, the "Reſult of which they kept very private. They ſaid, "they had obſerved ſome Expreſſions which admitted "a ſiniſter Interpretation, one of which was, that it "would be no difficult Matter to break down the Bridges "of the Cauſway, with others of the ſame kind; which "all together gave ſufficient Cauſe of Suſpicion." Two or three of thoſe *Indians* heard it whiſpered, That ſome few Days before a *Spaniard*'s Head was brought as a Preſent to *Motezuma*, and that he commanded it to be taken away and concealed, after he had viewed it with ſome Aſtoniſhment, it being of a very large Size, and the Face of a fierce Aſpect; Marks which agreed very well with that of *Juan de Arguillo*'s. This added to the Uneaſineſs of *Cortes*; for hence it appeared that *Motezuma* was privy to the Proceedings of his General.

7. As theſe Informations left him no longer any room to doubt, that notwithſtanding all the Kindneſs ſhewn him, *Motezuma* was actually contriving his Deſtruction, he ſaw it was neceſſary ſome quick Meaſures ſhould be taken to deliver himſelf and the *Spaniards* out of thoſe Dangers with which they were at preſent ſurrounded; but the Difficulty was, to fix upon that which might beſt anſwer the End, and, when fixed upon, to carry it into Execution. He meditated upon this Subject a whole Night by himſelf; and, having ſettled in his own Mind what was to be done, he then called a Council of War, in order to hear the Opinion of his Officers; in which they differed extremely, moſt of them, however, inclined to make a Retreat; and ſome of them ſuggeſted, that as *Motezuma* had made them ſuch large Offers to prevent their coming to *Mexico*, he would probably be willing to give them as much Gold as they could reaſonably aſk, in order to get them out of his Capital; but *Cortes* diſapproved this: And having in a ſet Speech ſhewed the Impoſſibility of their putting any ſuch thing in practice, concluded that the only Method they had left to ſecure themſelves, and put a ſpeedy Iſſue to this Buſineſs, was to ſeize the Perſon of the Emperor; and the Reaſons he gave for it were ſo ſtrong, and the Method he propoſed for executing it liable to ſo few Objections, that at laſt it was unanimouſly agreed upon, and a Reſolution taken to do it without Delay.

A moſt ſurpriſing Scheme ſurely, conſidering the Force that *Cortes* had, and the many thouſands that were in daily waiting about *Motezuma*'s Perſon. Yet this Deſign, as it was contrived with great Wiſdom, was executed with no leſs Spirit and Succeſs. The Hour which the *Spaniards* were accuſtomed to wait upon *Motezuma* was choſen for the Execution of their Deſign, that no Alarm might be given by their making him an unſeaſonable Viſit. *Cortes* gave Orders to his Men to arm themſelves in their Quarters, to ſaddle their Horſes and to hold themſelves in Readineſs without making any Noiſe, until they received freſh Inſtructions. He poſſeſſed himſelf of all the Avenues of the Streets leading to *Motezuma*'s Palace, with a ſmall ſcattered Detachment of Soldiers, and went to the Palace accompanied by the Captains *Pedro de Alverado*, *Gonzala de Sandoval*, *Juan Velaſques de Leon*, *Franciſco de Lugo*, and *Alonſo Davila*, having ordered thirty private Men to follow at a Diſtance.

It was no ſurprizing Sight to ſee them enter with their Arms, which they uſually carried as a military Ornament. *Motezuma*, as uſual, came out of his Apartment to receive the Viſit, and they all took their Seats: His Servants, as by his Order they were always accuſtomed to do, retired to another Part of the Palace, and when Donna *Marina* and *Geronimo Aguilar* were come up, *Cortes* began his Complaint with becoming Reſentment. Firſt, he laid before *Motezuma* the Action of his General who had the Inſolence to form an Army, and attack his Confederates, in Violation of the Peace, under which they thought themſelves ſecure. Then he urged as a Crime, for which he ought to make Satisfaction to God and Man, the ſpilling the Blood of a *Spaniard* by the *Mexicans*, after they had made him Priſoner, to revenge upon him in cold Blood the Ignominy of their own Defeat: And laſtly, he expoſed in proper Colours, as a Point of ſtill greater Conſideration, the Excuſe made by *Qualpopoca* and his Captains, who declared they had undertaken that unjuſtifiable War by the Emperor's expreſs Order; concluding, that he thought he owed ſo much to his Majeſty, as not to give Credit to any Action ſo unworthy of his Greatneſs, as that of favouring the *Spaniards* in one Place, while he was endeavouring to deſtroy them in another. But *Motezuma* denied it.

Cortes interpoſed upon this, telling him, he believed what he ſaid to be true, and that he could never entertain any Notion that ſo great a Man as he, could be guilty of ſo baſe an Act; but that what convinced him, did not ſeem to have the ſame Weight with his People, and that, for their Satisfaction, it would be very proper he ſhould remove from his own Palace, and go and live with the *Spaniards* in that he had aſſigned him, till ſuch time as *Qualpopoca*, whom he immediately ſent for, arrived. *Motezuma* was extremely ſurprized at ſo ſtrange a Propoſition, and for ſome time refuſed to hear it; neither could all the Eloquence of *Cortes* have brought him to conſent if Donna *Marina* had not interpoſed; who told him, ſhe was his Subject, and had therefore nothing ſo much as his Intereſt at Heart: That his Life was in the utmoſt Danger, and that nothing but his yielding to this Neceſſity could ſave him; and that it was in vain to diſpute where the only Queſtion was, Whether he would chuſe the Loſs of Life, or temporary Liberty? This determined *Motezuma*. Let us go, ſaid he, to your Quarters, ſince I find it can be no otherwiſe.

When he had ſaid this, he left the Palace, without any more Delay, taking with him all his uſual Attendants, the *Spaniards* marching on Foot cloſe by his Chair, ſurrounded it, under pretence of waiting on him. A Report was preſently ſpread about the City, that the Strangers had carried off the Emperor, and the Streets were crouded, ſome in Deſpair, and ſome diſcovered the Tenderneſs of their Concern by their Tears. But *Motezuma*, with an Air of Gaiety and Compoſure, appeaſed the Tumult, and ſatisfied them in ſome Meaſure. He commanded them to ceaſe their Cries, and at the firſt Motion of his Hand a profound Silence enſued: He then told them, "That "he was not going to Priſon, but for his own Diverſion "to paſs a few Days with his Friends, the Strangers." As ſoon as he was ſettled in his new Lodging, many Noblemen reſorted to *Motezuma*, expreſſing their Sorrow for that Innovation, and offered to do any Service that ſhould be enjoined them.

Cortes being ſenſible of the Boldneſs of his Enterprize, and the Danger he was in, to provide for the worſt, ordered two Brigantines to be built, that would carry two hundred Men, to come into, and go out, of the City, as there ſhould be Occaſion.

They were ſoon finiſhed, and he kept them under a ſtrong Guard near his Quarters, to the no ſmall Amazement of the *Indians*. *Motezuma* fearing leſt any Harm that might be done to the *Spaniards*, by his People, might affect him, put on a chearful Countenance to conceal the Griefs that perplexed him, telling the Men of Quality that ſerved and viſited him, there was no Occaſion to be ſo much concerned, ſince he was well, lived in that Apartment at his Eaſe, and no Injury or Affront was offered him; that he had choſen to go thither to convince the *Spaniards* that what had been ſaid of him, in relation to *Qualpopoca*, was not true; that he deſigned to puniſh him, that no other ſhould be guilty of the like; that he would ſtay there till *Cortes* was ſatisfied, and that ſince he might depart from thence whenſoever he ſhould think fit, they ought to ſet their Hearts at reſt, and as they had always loved him, they ſhould ſhew it at that Time.

As ſoon as he was brought into the Apartment, *Cortes* ſet a Guard over him, and gave the Command thereof to *John Velaſquez de Leon*; and if particular Care had not been taken, he would have been conveyed away; for Walls were broke through, and other Methods uſed; and one Day he attempted to throw himſelf off from the flat Roof of a Houſe, that was ten Fathoms high, for his People that were underneath to catch him, had not a *Spaniard* that was upon the Guard, and near his Perſon, held him. *Cortes* viſited him every Day, and for his Diverſion, ordered the Soldiers to exerciſe their Weapons, at which he was very much pleaſed, and generouſly rewarded them. His own Servants waited on him, as they were wont to do in his Palace, and ſo did the *Spaniards*, who, by *Cortes*'s Command, honoured and reſpected him as a King.

There he decided Law-ſuits, diſpatched all Buſineſs, and adminiſtred the Government of his Kingdoms, ſpeaking, either in private or public, to any Perſon whomſoever; and yet the *Indians* were ſo reſtleſs and uneaſy, that they never ceaſed by Day or Night to attempt reſcuing him: For this Reaſon *Cortes* ordered *Roderigo Alvarez Chico*, a brave and watchful Man, to guard the Backſide of the Houſe, with ſixty Men, twenty mounting at a time; and *Andrew de Monjarraz* to do the ſame before the Palace, with the ſame Number.

Motezuma was ſerved like a great Prince, the Diet that was brought him by four, and four Men holding up the Diſhes, with much Reſpect, made a long Train, and when he had done, all the Meat was divided among the Gentlemen that ſerved, and the *Spaniards* that guarded him. His Bed conſiſted in many coſtly Cotton Blankets, ſome of them very fine, ſome quilted, and covered with others of great Value, made of Feathers and Wool, of various and natural Colours. The Bed was laid on Matts, and a wooden Bedſtead, all ſuited either for the Heat or the Cold. It was this Confinement of the Emperor which afforded *Cortes* all the Opportunities he could wiſh, of enquiring narrowly into the Situation of his Affairs, and of penetrating into all the Secrets of his Government; he likewiſe found Ways and Means to draw out of the *Indian* Monarch, in this Confinement, very large Sums of Money, or, which was the ſame thing, Gold and Jewels to an immenſe Value.

8. In all outward Appearance *Motezuma* was very eaſy and well ſatisfied, the *Spaniſh* Soldiers behaved to him with the greateſt Civility and Reſpect imaginable, and as for the Officers, they were his conſtant Companions, with whom he converſed continually, and ſhewed a great deal of Pleaſure, as alſo in playing at certain *Spaniſh* Games, particularly at Skittles, in which he became, very ſoon, a great Proficient. In the midſt, however, of all theſe Condeſcenſions, he ſhewed himſelf a great Politician; for, obſerving how fond the *Spaniards* were of Gold, he took care to loſe, that he might have an Opportunity of giving, and of obtaining, by this Means, an Intereſt amongſt them.

Whilſt things were in this Situation, *Qualpopoca* arrived with his Son and fifteen Men of Quality, who had been concerned with him in killing the *Spaniards*, in twenty Days after the Confinement of *Motezuma*; he was conducted to *Mexico* by many great Men that went out to meet him, and he was brought in upon their Shoulders and thoſe of his Vaſſals: When come to the Place he alighted, put on Garments of leſs Value than he had before, and took off his Shoes, waited ſome Time 'till he had Leave to go in, drew near alone, all that went with him, ſtaying behind; and having made many Bows, and performed the uſual Ceremonies, with his Head hanging down, and his Eyes fixed on the Ground, he ſaid, "Moſt "high and mighty Sovereign, here is your Slave *Qualpopoca*, whom you have commanded to come; what "will you have done, for I am your Slave, and muſt of "Neceſſity obey you?" *Motezuma* ſternly anſwered, "He had done very ill in killing the *Spaniards* without "any Provocation, and ſaying he had done it by his Order, and therefore he ſhould be puniſhed as a Traitor "to the Strangers, and to his King." *Qualpopoca* going to excuſe himſelf, he would not hear him, ordering that he, his Son, and the reſt, ſhould be delivered up to *Cortes*, who, having fettered, cauſed them to be examined, and they confeſſed the killing of the *Spaniards*; being aſked whether he was *Motezuma*'s Subject, he anſwered, "Is there any other Lord that I could be ſubject to?" They were examined a ſecond time more ſtrictly, and threatened with the Rack, and unanimouſly averred that they had killed the two firſt *Spaniards* by *Motezuma*'s Order, as they had likewiſe thoſe in the Field.

When they had made this Confeſſion, and confirmed it, *Cortes* condemned *Qualpopoca* and the reſt to be burnt. The Sentence being made known to him, he ſaid, That though he was to ſuffer Death for having killed thoſe two *Spaniards*, his great Lord, *Motezuma*, had commanded him, and that he ſhould not have preſumed to have done it, unleſs he had thought it for his Service. He, with his Son, and the reſt, were conducted under a ſtrong Guard of *Spaniards*, to a large Square, and being ſet on a large Pile of broken Bows and Arrows that were dry, with their Hands and Feet bound, Fire was ſet to it, they again confeſſing the ſame as they had before: He prayed as the reſt did, and the Fire blazed, and they were ſoon burnt, without Diſturbance; the *Mexicans* admiring the Execution done by the *Spaniards* in ſuch a great City 'and Kingdom, and in the Preſence of their Monarch. Before and after this Execution, that the *Spaniards* might be always in readineſs, *Cortes* made Proclamation that none of them ſhould go naked to Bed, and that the Horſes ſhould ſtand all Night ſaddled, with their Bridles at the Pommels of their Saddles, becauſe it was ſuſpected there would be an Inſurrection, and that they would attack the *Spaniards* when aſleep; but the Vigilance of *Cortes* was thought to have diſappointed that Deſign; and he cauſed the firſt Soldier that was found to have lain in Bed naked, to be expoſed to public Shame, keeping him two Days in Fetters in the Air, enduring the Dew in the Night, and the Sun in the Day, and a Clog at his Foot; no Intreaties prevailing to relieve him, alledging that Severity was requiſite in ſuch Caſes.

After the Confeſſion was made, whilſt they were carrying *Qualpopoca* to Execution, *Cortes*, attended by his Commanders, went to *Motezuma*, and ſaid to him, "You

“ know you denied your having ordered *Qualpopoca* to kill my Companions, you have not done therein as became ſo great a Prince, and ſince you have occaſioned the Death of my Men, as alſo of *Qualpopoca*, his Son, and ſo many of his People, had I not Regard to the Affection you have ſhewn to my King, and in his Name to me, I ſhould think you ought to pay for it with your Life; for both the divine and human Law, appoints that a Murderer, as you are, ſhould die: However, that you may not go altogether unpuniſhed, and that you and your People may be ſenſible how advantageous it is to deal ſincerely, I will order you to be put in Irons.” *Motezuma* was very much ſurprized at this Reproof, and could ſcarce utter his Words for Confuſion, but only ſaid that he was innocent, and he might do what he would with him. *Cortes* went from him in a very angry Manner, and immediately after he was fettered.

It was thought that *Cortes* uſed this Policy to divert him from the Grief he might juſtly conceive at the Execution of *Qualpopoca* in his own Sight. It is impoſſible to expreſs how much *Motezuma* was concerned, when he ſaw himſelf in Irons; he affirmed he was innocent, and lamented his Condition; his Kindred and Nobility were aſtoniſhed, and in that Conſternation they wept, and kneeled down, bearing up his Fetters with their Hands, and thruſting fine Cloths through the Links, that they might not touch his Fleſh, nor could they think what to do; for if they had had recourſe to Arms, they concluded that their Lord would certainly be put to Death, which added to their Terror. When *Qualpopoca* was executed, *Cortes*, thinking he had gained his Point, went in the Afternoon to *Motezuma*, and, ſaluting him with an Air of Kindneſs, ordered his Fetters to be taken off, telling him, that though, according to the Confeſſion of the People executed, he deſerved to be more ſeverely puniſhed, yet for the Love he bore him, and becauſe he could not believe ſo great a Prince guilty of ſuch a foul Action, he had commanded him to be ſet free. *Motezuma* was as much rejoiced at thoſe Words, as he had been before dejected, upon being removed and put into Irons. He embraced *Cortes*, returned him Thanks, and beſtowed many Favours that Day, as well on the *Spaniards* as his own People.

By this Means both Parties were ſatisfied with each other, and *Motezuma* came by Degrees to have ſuch a Confidence in *Cortes*, that he repreſented to him the Expediency of granting him Leave to go to viſit ſome of his Temples, that his Subjects might not look upon him to be longer a Priſoner, which was granted, upon Condition that human Sacrifices were aboliſhed. As *Cortes* perceived that this Confidence in *Motezuma* had gained upon him extremely, he laid hold of this Opportunity to demand his Aſſiſtance, for the accompliſhing of various Things he had in view, which were very neceſſary to him, and which, however, he could not accompliſh, but by the Emperor's Aſſiſtance.

The firſt of theſe was, the Knowledge of the Gold Mines, where they were, to whom they belonged, how wrought, and what Quantities of that precious Metal were obtained from them. *Motezuma* gave him very clear and diſtinct Anſwers to all theſe Inquiries, and, for his farther Satisfaction, allowed ſuch of his People as he could truſt, to go to the Mines, both within and without his Dominions. In the next place, *Cortes* was willing to have a Map of the Sea-coaſts of the *Mexican* Empire, that he might be the better able to fix upon ſome Port, to which Succours and Supplies might be ſent him; he was, according to his Deſire, furniſhed with a very accurate and extenſive Deſcription of the maritime Provinces under *Motezuma*'s Dominion, finely painted after their Manner, which anſwered his Purpoſe perfectly. The laſt Thing that he aimed at was, the obtaining of a ſufficient Quantity of Gold to be ſent to *Spain*, in order to maintain his Credit there, and ſecure the King's Favour. In obtaining this, he met with no Difficulty, the Emperor and the great Men of his Court, readily yielding him their Aſſiſtance.

9. But in the Midſt of this Tranquility, there aroſe a new and very unlooked for Diſturbance, which neither *Motezuma* nor *Cortes* could foreſee or prevent. It was occaſioned by the Emperor's Nephew, *Cacamazin*, who mortally hated the *Spaniards*; and going to *Tezcuco*, told his chief Counſellors how much he loved them, deſiring they would reflect how they were kept under by a handful of Strangers, who dared to confine his Uncle *Motezuma*, to whom the greateſt Reſpect was due; that it was intolerable ſo ſmall a Number, and thoſe of another Religion, ſhould turn them out of their Houſes, and, what was ſtill worſe, ſet up their Gods in the Temples, inſtead of thoſe of the Country; that it was high time to ſtand up for Religion, Liberty, Honour, and their King, without delaying till the Strangers had Succours from their own Country, from *Tlaſcala*, and from other Parts; and therefore they ſhould make ready, for he was reſolved to fall upon the Intruders; yet if they differed from him in Opinion, they might tell him ſo, and he would be adviſed by them.

They approved of the Deſign, and offered to ſtand by him; but ſome ancient Men, who had no Mind to flatter him, ſaid, he ſhould conſider what he did, that *Cortes* was brave, had gained ſeveral Victories, and they believed there was very great Friendſhip between him and *Motezuma*, for if he would have drove him out of *Mexico* he might have done it; they adviſed him therefore not to be carried away by the Fire of Youth, or the Ambition of Rule, ſince there were other Heirs as near as he. However, War was agreed on, and Preparations were made with the greateſt Privacy, that nothing might be known by *Motezuma* or *Cortes*; but, notwithſtanding their Care, they ſoon had Notice of it.

Cortes perceiving the View of this turbulent Youth, and ſuſpecting that *Motezuma*'s want of Reſolution, or great Affection for the *Spaniards*, encouraged him to undertake the Deſign, ſent Word to the Emperor that he had much Cauſe to ſuſpect him, becauſe, ſince what had happened about *Qualpopoca*, his Nephew, *Cacamazin*, was conſpiring againſt him; and therefore he deſired him to put a Stop to thoſe Proceedings, otherwiſe all would light upon himſelf. *Motezuma* was much ſurprized at this Meſſage, and affirmed he knew nothing of what his Nephew was doing; that he was very well pleaſed there, and would ſend for his Nephew *Cacamazin*, and if he refuſed to come, would order him to be brought by Force, and delivered up into his Hands to be puniſhed, if convicted of that Crime. *Cacamazin* was then preparing for War, and the People readily came in to him, becauſe he gave out that he would reſcue the King.

This Affair put the *Spaniards* upon their Guard, and *Cortes* deſigned, for making an Example, and eſtabliſhing his own Reputation, to go himſelf to *Tezcuco*, and attack *Cacamazin* in his own Houſe; but *Motezuma* prevented it, alledging that the City was ſtrong, and the People of *Culua* at his Nephew's Command, and therefore it was better to take another Courſe. *Cortes* followed his Advice, and ſent to bid *Cacamazin* remember their Friendſhip, that he ſhould conſider it was an eaſy Matter to begin a War, but not ſo to put an End to it; and that it would be for his Advantage to keep on good Terms with the King of *Spain* and his Subjects. He anſwered plainly, He would entertain no Friendſhip with thoſe that oppreſſed the Country, and overthrew their Religion; that he knew not who the King of *Spain* was, nor did he deſire to be informed; and that if he would not have him make War, he ſhould immediately depart *Mexico*. *Cortes* again adviſed him to deſiſt, and deſired *Motezuma* to lay his Commands upon him.

The Emperor ſent for him, which he was ſo far from regarding, that he ſaid, If his Uncle were the Man he ought to be, he would not ſuffer himſelf to be confined; and ſince *Motezuma* was ſo mean-ſpirited, he was reſolved to reſtore the Monarchy to its former Splendor, which had been loſt through his Cowardice. *Cortes*, upon this, reſolved to march out to meet *Cacamazin*, though the Danger was great, conſidering the Multitude of Enemies within and without: But ſtill *Motezuma* hindered him, contriving with ſome of his Nephew's Commanders, that they ſhould deliver him into his Hands. Theſe being bribed, as they were with *Cacamazin*, conſulting about the Management of the War, ſecured him, and before it was known abroad, conveyed him, by Water, to *Mexico*, and had him carried on Mens Shoulders, richly clad, to *Motezuma*'s Apartment, who would not ſee him, but ordered he ſhould be delivered to *Cortes*, who, well pleaſed to have eſcaped that Danger, ordered him to be cloſe confined.

The next Day, by the Advice of *Motezuma*, *Quizquizcatl*, younger Brother to *Cacamazin*, was conſtituted Lord of *Culua*, being then at *Mexico* with his Uncle, having made his Eſcape from his Brother; and *Motezuma* conferred on him the Crown and the Title of King, with the uſual Solemnity; telling him he deſigned to look upon him, for the future, as his Son: *Quizquizcatl* kiſſed his Hand, promiſed Obedience, and then, turning to *Cortes*, gave him Thanks, proteſting he would ever be his Friend. *Cacamazin* was much concerned, when he heard that his Brother was made Lord of his Dominions, and *Cortes* had him ſtrictly obſerved, knowing that there were many that would willingly have conveyed him back to *Tezcuco*. *Motezuma* ſent two Embaſſadors to ſignify to that City the new Election, and cauſed the elected Monarch to be attended by many of his Courtiers, and *Cortes* ſent along with him ſeveral of his prime Men, both of them in Perſon bearing him Company to the Gates of *Mexico*; he was received at *Tezcuco* with all public Demonſtrations of Joy, being carried on Mens Shoulders.

At the Entrance into the City, the Magiſtrates took him up, and when come to the Palace, an ancient Gentleman ſet a Garland of Flowers on his Head, and, all the Company being ſilent, made a Speech to him; the Purport of which was, "That he was ſenſible, how, when " he was ſerving *Motezuma*, being fled from his Bro" ther, on Account of his Pride, the Gods had raiſed " him to that high Dignity, for which Reaſon he ought " to take care not to change his noble Diſpoſition; for " that the Thing Kings ſhould moſt endeavour to ac" quire, was the Love of their Subjects, *&c.*" Theſe Ceremonies performed, the People withdrew, and *Cortes* was delivered from the Dangers that had threatened him. This, in itſelf, and independent of its Conſequences, could not but be very agreeable to our Hero, who ſaw himſelf, by this Means, raiſed to the higheſt Authority, excluſive of the Sovereign Power in that Empire; for the People being well enough acquainted with *Motezuma*'s natural Diſpoſition, attributed this mild Way of puniſhing, entirely to *Cortes*; and on the other Hand, the firſt Prince of the Empire looked upon himſelf as his Creature, ſo that there appeared a Probability of his eſtabliſhing ſome kind of Intereſt in *Mexico*, and the bare Appearance of this, was enough to engage *Cortes* to do all that lay in his Power to cultivate and encreaſe it.

10. All things ſeemed at this time to concur in Favour of the *Spaniards*, and to render their Stay in the Empire of *Mexico* more ſafe and more agreeable than it had hitherto been. Yet, of a ſudden, this fine Proſpect was intirely over-caſt, and the Face of Affairs unexpectedly changed. It ſeems that *Motezuma*, though he had diſſembled his Reſentment, was far enough from being pleaſed with the long Stay which the Strangers made; and, indeed, if we conſider their Behaviour towards him, it was no Wonder; but he diſſembled ſo well, that neither *Cortes* nor any of his People ſuſpected him; and was ſo great a Politician, that when he actually propounded the Scheme he had framed to be rid of them, they were ſo far from conceiving it in that Light, that they took it for the higneſt Act of Favour he had ever done them.

In ſhort, *Motezuma* offered to call a general Aſſembly of his Nobles, and there acknowledge, in a moſt ſolemn Manner, the Sovereignty of the King of *Spain* over his Dominions, and his own, and his Subjects Duty toward him. There could be nothing more acceptable to the *Spaniſh* Captain than this unexpected Offer of the *Indian* Monarch's, and therefore he encouraged him to carry it into Execution as ſoon as poſſible, without ever ſuſpecting that the Emperor was as much inclined to this as himſelf, though from a very different View. The Aſſembly was accordingly called, and *Motezuma*, being ſeated on his Throne, made a very long, and a very extraordinary Speech: He ſaid they all knew well enough, that their firſt Emperor came from the Eaſt, and that he had left them a Propheſy, that his Deſcendants ſhould return to govern theſe Countries; that without doubt the King of *Spain* was the lawful Succeſſor to the Empire, that if he had come thither in Perſon, he would have laid down his Crown at his Feet; that as it was, he was reſolved to do him Homage, and ſend him a Preſent of the moſt valuable Things in his Dominions, and that he expected they would likewiſe contribute out of their own Poſſeſſions, that this Preſent might be the more worthy the Acceptance of ſo great a Prince.

In this Manner *Motezuma* concluded his Diſcourſe, though he did not utter it all without Interruption; for in ſpite of all the Efforts made upon himſelf in this Act of his, when he came to pronounce himſelf Vaſſal to another Prince, he found ſomething ſo ſhocking, and ſo repugnant to his Nature, in thoſe Expreſſions, that he pauſed a while as if he wanted Words to proceed, and he ſhewed his Concern ſo publicly, that ſome Tears were ſeen trickling down his Cheeks, which ſeemed as if they had eſcaped his Eyes, without their Conſent; and the *Mexicans*, ſenſible of his Diſturbance, and of the Cauſe from whence it proceeded, began likewiſe to ſhew their Concern, breaking forth into loud Sighs, deſiring in Appearance, not without ſomething that ſavoured of Flattery, that by the Noiſe they made, their Fidelity ſhould be taken Notice of; ſo that *Cortes* thought it neceſſary to deſire Liberty to ſpeak, in order to encourage *Motezuma*, and put him out of the Perturbation he was in. He ſaid, "That it was not the Intention of the " King his Sovereign, to diſpoſſeſs him of his Royal " Dignity, nor to make the leaſt Innovation in his Go" vernment; but, that all he deſired was, that they " would, at the preſent Aſſembly, ſettle his Right to " the Succeſſion, in Favour of his Deſcendants or Poſ" terity; by Reaſon of his being ſo far diſtant from " thoſe Regions, and ſo taken up in other Conqueſts, " that the Caſe mentioned in their Traditions and Pro" pheſies, might not happen in many Years." With which Explanation *Motezuma* recovered Heart, re-aſſumed an Air of Tranquility, and finiſhed his Diſcourſe, as has been obſerved.

The *Mexicans* remained aſtoniſhed, and utterly confounded to hear ſuch a Propoſal, wondering at it, as a Thing inconſiſtent with, and unbecoming, the Majeſty of ſo powerful a Monarch, and a Prince ſo extremely jealous of his Authority. They looked on each other without daring either to contradict, or to give any Sign of Conſent; as being apprehenſive, that by doing either, they ſhould but confirm him the more in his ſtrange Determination. This reſpectful Silence laſted till his prime Miniſter, as a Perſon who had a better Knowledge of his Prince's Diſpoſition than any other, took upon him to ſpeak for the reſt, and ſaid, "That all the Nobles who " compoſed that Aſſembly, reſpected him as their Lord " and natural Sovereign, and ſhould be ready to obey " whatever his Majeſty had been pleaſed to propoſe, and " to follow any Example he ſhould think fit to ſet them; " they not doubting but that he had well weighed every " thing, and had conſulted with Heaven; and they had " no Inſtrument more ſacred than that of his Voice, " whereby to be informed of the Will of their Gods." The whole Aſſembly agreed in the ſame Sentiment, and *Hernan Cortes*, when it came to his Turn to make his Acknowledgments, dictated to his Interpreters, a Speech, no leſs artful than the former; in which he gave Thanks to *Motezuma*, and all who were preſent, for this Demonſtration of their Reſpect, accepting their Service in the Name of his King, without ſeeming to think it ſtrange that they complied with their Obligations, but, rather as one who receives his Debt, and is pleaſed with his Debtor's punctual Payment.

The Emperor took immediate Care to collect in Gold and Jewels, particularly Emeralds, a Preſent ſuitable to his own Dignity; and his Nobility followed his

Example with the utmoſt Alacrity. All theſe rich Gifts were carried, by *Motezuma*'s Order, to the Apartment of *Cortes*, who named a Receiver and Treaſurer, that they might take an exact Account of what was delivered; and in a few Days they amaſſed ſuch a Quantity of Gold, that beſides the precious Jewels, and Pieces of curious Workmanſhip, after they had melted down the reſt, they found 600000 Peſos of Gold, in Bars of good Alloy; out of which the fifth Part was ſet aſide for the King, and of the remainder, a ſecond Fifth for *Hernan Cortes*, with the Approbation of his People, and to defray the Expence of providing for the public Neceſſities of the Army; he likewiſe ſet aſide the Sum for which he ſtood accountable to *Diego Velaſquez*, and that which his Friends, in the Iſland of *Cuba*, had lent him; the reſt was divided among the Officers and Soldiers, including thoſe that were at *Vera Cruz*.

Thoſe that had Employments had equal Shares, but amongſt the private Men there was ſome Difference made; for thoſe were diſtinguiſhed and beſt rewarded, who had done beſt Service, or had been leaſt troubleſome in the paſt Diſturbances. An Equity of a very dangerous Nature, where juſt Rewards are looked upon as Grievances, and Diſtinction of Merit occaſions Complaints: There were great Murmurings and bold Words uttered againſt *Hernan Cortes* and the Captains; for at the Sight of ſuch a Maſs of Wealth, thoſe whoſe Deſerts were leaſt, required an equal Recompence with the moſt Deſerving. Their Avarice could not poſſibly be ſatisfied, nor was it convenient to publiſh the Reaſons of that unequal Diſtribution; by Degrees, however, and by the Dexterity of his own Management, *Cortes* got the better, and reduced the whole Army, not only to a peaceable Deportment, but to a voluntary Submiſſion to his Method of managing.

In order to this he found it neceſſary, not only to part with ſome of his Share, but even to give conſiderable Sums in ready Money, to ſuch as were worſt dealt with, and complained loudeſt; amongſt whom, there was one Fellow that had but 300 Pieces of Eight for his Share, who ſaid, merrily, that he would take care not to engage himſelf again in a Contract with two Kings; alluding to the General's taking one fifth for his Catholic Majeſty, and another for himſelf, upon which *Cortes* gave him 200 Pieces of Eight more, with which the Soldier was very well content.

11. The General was perfectly well pleaſed with the Situation he was now in, for he thought that he had entirely got the better of the Factions in his own Army, and that he ſtood higher in the Favour of *Motezuma* than ever; but it was not long before he was convinced to the contrary; and found, when he leaſt ſuſpected it, that the *Indian* King was bent upon obliging him to quit his Country, a Thing he never apprehended would have come into the Emperor's Head, or if it had, that he would have had Spirit and Courage enough to avow it. But as wiſe and as penetrating a Man as he was, he found himſelf deceived in both.

The Manner in which this great Affair broke out, was thus: One Day as *Cortes* was diverting himſelf with the *Spaniſh* Commanders, *Motezuma* ſent *Orleguilla*, a young *Spaniard* who had learned the *Indian* Laaguage, and of whom he was very fond, to tell him that he wanted to ſpeak with him immediately, and at the ſame time that the young Man delivered this Meſſage, he informed *Cortes* that *Motezuma* had ſpent a great Part of the Night in cloſe Conſultation with his principal Miniſters, and ſome of his Prieſts. As ſoon as he had heard this, *Cortes* could not help ſaying that he did not like the Meſſage, but however, he reſolved to wait upon the Emperor immediately, taking with him about a Dozen of the *Spaniards* that were by when he received the Meſſage, and laboured to conceal, as well as he could, the Confuſion he was in. When he came into *Motezuma*'s Preſence, he ſaluted him with profound Reſpect, and then aſked him very courteouſly, what were his Commands?

The Emperor received him with more Gravity than uſual, and with an Air of Greatneſs that till then he had never put on; and being now ſomewhat acquainted with the Forms of *Spaniſh* Civility, called for Chairs, and all the reſt ſtanding, and two Interpreters on their Sides, he ſaid, "Captain *Cortes*, my Gods are angry with me for having permitted you to ſtay ſo long in my City, deſtroying our Religion; they ſay they will give me no Rain, will deſtroy my Corn, ſend the Plague, and ſubject my Empire to my Enemies. I intreat you to depart this Place immediately; aſk what you will have, for I love you entirely, and if I did not I ſhould not beg it of you, ſince I have it in my Power to do you Harm, and ſhall not tell you ſo again. Take what you will out of my Treaſures, and go away ſatisfied, for my Gods will not allow of what has been done; and ſince you ſee I can do no leſs for their Honour and my own, be not concerned." When he had uttered theſe Words, before the Interpreter began to ſpeak, *Cortes* turned to a *Spaniard*, and ſaid, "Run to our Comrades, and bid them be in Readineſs, for their Lives are at Stake." When the Interpreter had done, *Cortes* rouſing his Courage, very ſedately anſwered, "Experience had made him ſenſible of his Affection, and that it was not his Fault if he did not continue in his Company; but, that ſince his Gods and his People were of that Mind, he ſhould conſider when he would have him be gone."

The King was ſo well pleaſed with his Anſwer, that he ſaid, "He would not have him go till he thought fit himſelf, and he would then give him four Loads of Gold, every Horſeman two, and every Foot-Soldier one." *Cortes* replied, "That he could not return to his own Country without Ships, and ſince he had ſunk thoſe that brought him, it was his Requeſt, that he would cauſe Timber to be felled at *Vera Cruz*, which the *Indians* called the Coaſt of *Calchicoeca*, and he would find Men to build them." *Motezuma* approved, and ordered Timber to be felled. *Cortes* appointed Workmen to do what *Martin Lopez* ſhould direct them, and *Motezuma* believed it. *Cortes* acquainted his Men with *Motezuma*'s Will, encouraged them, and ſaid, "That God, whoſe Cauſe they had in hand, would in the mean Time, while the Ships were building, ſo diſpoſe their Affairs, that they ſhould not loſe that good Country." He directed *Martin Lopez* to make ſhew of carrying on the Work with Diligence, but to retard it as much as might be, and ſend him Advice of every thing that happened.

There were various Motives induced *Motezuma* to take this Reſolution, which might, in ſome Reſpects, be thought not ſo agreeable to his Temper and Conſtitution, that was, as various Inſtances we have given plainly ſhew, rather timorous than enterprizing. But after all, the great and true Spring of this ſudden and ſurprizing Reſolution, was his conſidering that if things went on in their preſent Channel, one or other of theſe Events muſt neceſſarily follow, *viz.* that either the *Spaniards* would abſolutely acquire the Poſſeſſion of his Dominions, by the Conſent of his Subjects, or elſe the Inhabitants of the *Mexican* Empire, to preſerve their ancient Government and Religion, would elect a new Emperor, under whoſe Conduct they might drive them out by Force; and in either Caſe he looked upon himſelf as undone. It was for this Reaſon that he determined to comply with all the Demands that *Cortes* had made, that he might have no Pretence for ſtaying longer; and that he might likewiſe furniſh his Prieſts with an Opportunity of telling the People, that their Emperor having now fulfilled the Will of the Gods in every Reſpect, had thereby regained their Favour, ſo that now they might depend upon the Aſſiſtance of Heaven, in expelling the Strangers.

On the other hand, the great Deſign of *Cortes* was to gain Time, in Hopes that he ſhould receive the King's Commiſſion, and a great Reinforcement from *Spain*, which might enable him to act with Vigour, and ſecure that extenſive Empire to his Catholic Majeſty; and of this he had the greater Hopes, becauſe he had now brought his Men to have an abſolute Confidence in him; and they no longer thought there was any thing impoſſible to be done that *Cortes* thought practicable. But alas! all theſe fine Notions were but Dreams, and this great Commander found, to his Coſt, that a Civil War amongſt the *Spaniards* muſt firſt be gone through, before all the Pains he had taken, and all the Arts he had practiſed, would open a Paſſage, for compleating what he apprehended was at hand, the entire Conqueſt of the Empire of *Mexico.*

SECTION XII.

The Hiſtory of CORTES's *Expedition continued to the Death of* MOTEZUMA, *and the* Spaniards *being forced to abandon the City of* Mexico.

1. *The firſt Intelligence of a conſiderable Squadron and a new Army of* Spaniards, *landing in the Dominions of* Motezuma, *communicated by him to* Cortes, *and the Conſequences of that ſurprizing Piece of Intelligence.* 2. *The Riſe and Occaſion of this ſecond Expedition formed by* James Velaſquez *for the Deſtruction of* Cortes, *and the gaining to himſelf the Province of* New Spain. 3. *The Pains taken by the* Royal Audience *at* Santo Domingo, *to prevent* Velaſquez *from executing ſo raſh a Deſign, and ſo prejudicial to the public Service.* 4. *The Fleet ſails under the Command of* Pamphilo de Narvaez, *arrives at* Vera Cruz, *and the bold Stand made in that Fortreſs by* Sandoval *in favour of* Cortes. 5. *The Meaſures taken by that great Commander for ſecuring* Mexico, *and for marching with the reſt of his Forces againſt* Narvaez. 6. *He executes this Deſign, and endeavours to come to Terms of Accommodation with the other Army, which are abſolutely rejected.* 7. *He attacks* Narvaez *in the Night, and after a ſhort Diſpute defeats his Forces entirely, and takes him Priſoner.* 8. *The Conſequences of this Victory, and the wiſe Meaſures taken by* Cortes *to improve it, till he is informed of the Troubles at* Mexico. 9. *A ſhort Account of the Occaſion of this Sedition at* Mexico, *and of the Methods taken by* Peter Alverado *to quell it, and to reduce the* Indians *to their Duty.* 10. *The Arrival of* Cortes, *and the ſeveral Engagements that afterwards happened between his Troops and the People of* Mexico, *who notwithſtanding his Arrival perſiſted in carrying on the War.* 11. Motezuma *endeavours to pacify his Subjects, and while he is ſpeaking to them receives a Wound on the Temples by a Stone, of which he dies.* 12. *The Conduct of* Cortes *after this unfortunate Accident, and the Pains he took to reconcile himſelf to the* Indians, *though to no Purpoſe.* 13. *The Reaſons which induced him to reſolve upon quitting* Mexico, *and to make the beſt Retreat from thence he could.* 14. *The manner in which he executed this Retreat, and the many Difficulties and Dangers with which it was attended.* 15. *Obſervations and Remarks upon the principal Occurrences mentioned in this Section.*

1. THE Satisfaction that the Emperor received from the Hopes he entertained of being ſhortly rid of the *Spaniards*, and the Expectations of *Cortes*, that he ſhould be for ſome time quiet, from the Meaſures he had taken, were entirely deſtroyed by a very unforeſeen Accident, equally inconſiſtent with both their Intentions. In ſhort, *Motezuma* had Intelligence brought him that eighteen Sail of Ships were ſeen off the Coaſt of *Ulua*; and his Officers, who commanded in that Part of the Country, had ſent the Figures of all theſe Ships painted upon Cloths, which ſerved inſtead of Letters, with a Deſcription of the People they had ſeen in them; and ſome Characters, which ſignified what they ſuſpected of their Intentions, being *Spaniards* in Appearance, and arriving at a time when he treated of diſpatching thoſe who were already at his Court. Whatever Impreſſion theſe Repreſentations had on the Mind of *Motezuma*, the Reſult was, that he immediately ſent for *Cortes*, laid the Picture before him; and told him, "That now the "Proviſion he was making for his Journey was unneceſ-"ſary, ſince ſome Ships of his Nation were arrived upon "the Coaſt, in which he might embark."

Cortes viewed the Painting with Attention rather than Surprize; and though he did not underſtand the Characters, which deſcribed them, he knew enough by the Habit of the People and the Make of the Veſſels, not to doubt their being *Spaniards*: The firſt Motion of his Heart inclined him to Joy, ſince he believed that his Commiſſaries were arrived, and flattered himſelf that they had brought him very conſiderable Supplies, in ſuch a Number of Veſſels. The Imagination is eaſily carried away to that which one deſires; and he could not ſuppoſe at that time, that ſo powerful an Armada was deſigned againſt him, for he formed his Judgment by his own ſincere and noble Manner of acting; and the Well-intentioned are with Difficulty brought to believe that which is againſt Juſtice and Reaſon.

His Anſwer to *Motezuma* was, "That he would de-"part immediately if theſe Ships were bound back for "any of the King of *Spain*'s Dominions." And, without being ſurprized that the Emperor ſhould have the firſt News of theſe Particulars, becauſe he was no Stranger to the indefatigable Diligence of his Couriers, he added, "That it would not be long before he ſhould "have an Account of this Accident from the *Spaniards* "who were at *Zempoalla*, and that then he ſhould know "with Certainty whither thoſe Ships were bound, and "the Deſigns of their Owners, and whether it would be "neceſſary to proceed in the building of thoſe Veſſels." *Motezuma* approved this Anſwer, being well pleaſed with his Readineſs. But in a ſhort time, a Letter came from *Vera Cruz*, in which *Gonſalo de Sandoval* ſent *Cortes* Word, "That thoſe Ships belonged to *James Velaſquez*, "and brought eight hundred *Spaniards* to oppoſe and "deprive him of his Conqueſt." This unexpected Stroke he received in the Preſence of *Motezuma*, and ſtood in Need of all his Courage and Reſolution to conceal his Perturbation of Mind; for he found himſelf in Danger from the very Quarter from whence he expected Succour.

In order to underſtand however this Point of Fact clearly, and to judge perfectly of the Danger in which *Cortes* ſtood from his Countrymen, it will be requiſite to caſt our Eyes over to *Cuba*, and conſider what paſſed there after the Departure of the Fleet under the Command of this great Man.

2. *James Velaſquez* was at firſt equally angry and uneaſy at the Steps which *Cortes* had taken; but after he had received Advice from his Agent in *Spain*, that he had obtained for him the Title of the King's Lieutenant, not only in *Cuba*, but alſo in all the Countries which ſhould be diſcovered by him, or by his Means, he became poſſeſſed with a kind of Fury, and conceiving this Diſreſpect to him, even before he became the King's Lieutenant, to be a kind of Treaſon, he reſolved to puniſh it as ſuch, and to exert the whole Strength of the Colony for that Purpoſe.

What contributed to heighten his Choler extremely, was the Subſtance of certain Letters he received from his Agent, in which he was told, that the Biſhop of *Burgos*, Preſident of the *Indies*, was his beſt Friend; but that the King was highly pleaſed with the Conduct of *Cortes*, and that all *Spain* rung of the great Things he had performed, and the mighty Diſcoveries he had made. The Applauſe given to *Cortes* made him impatient and outrageous, and notwithſtanding he was not ſorry to ſee the Conqueſt ſo far advanced, yet he could not bear that another ſhould receive the Thanks which, in his Opinion, were due to him alone, ſo vain was he, in the little Share he had in the firſt Diſpoſition of that Enterprize, that without any other Foundation he took to himſelf the Name of Conqueror. Upon thoſe Motives he immediately prepared to form a Fleet and Army for the Deſtruction of *Cortes*, and all who had followed his Fortune. He bought Ships, liſted Soldiers, and went in Perſon over the whole Iſland, viſiting the *Spaniards*, and encouraging them to the Undertaking.

He ſhared with them before-hand the immenſe Riches of that Conqueſt, which he ſaid was uſurped by ill-adviſed Rebels, who had baſely made their Eſcapes from *Cuba* by Flight. With thoſe Hopes, and ſome Expence, he got together a Body of Men, which in thoſe Parts of the World might be termed a formidable Army. It conſiſted of eight hundred *Spaniſh* Foot, eighty Horſe, and ten or twelve Pieces of Artillery, with abundance of Proviſions, Arms and Ammunition. He appointed for chief Commander of that Expedition *Pamphilo de Narvaez*, a Man of Capacity, and of the firſt Diſtinction in that Iſland, but highly opinionated, and obſtinately poſitive in his Reſolutions.

He gave him the Title of his Lieutenant, naming himſelf Governor of *New Spain*. He gave him likewiſe ſecret Inſtructions, in which he ordered him, "That he
" ſhould endeavour to the utmoſt of his Power to take
" *Cortes*, and ſend him Priſoner under a ſtrong Guard,
" that he might receive from his Hands the Puniſhment
" he had deſerved; that he ſhould do the ſame by the
" chief Officers who followed him, in caſe they refuſed
" to abandon his Intereſt, and that he ſhould take Poſ-
" ſeſſion in his Name of all that had been conquered,
" and adjudge it to be all within his Diſtrict, as the
" King's Lieutenant." He never ſo much as conſidered that it was poſſible his Deſign might not ſucceed, or that the new Officer he ſent might not have it in his Power to treat the old one in the Manner he directed.

3. But while he was thus employed in taking Meaſures to gratify his private Reſentment, under Colour of promoting the public Service, ſome wiſer People in the *Indies* were much better employed; for the *Royal Audience* at *St. Domingo*, as ſoon as they were informed of theſe Preparations, foreſeeing the Inconveniencies that might reſult from ſo public a Competition, ſent the Licenciate *Velaſquez de Ayllon*, Auditor of the ſame Audience, [to endeavour to bring *Velaſquez* to reaſon; and if he found gentle Means inſufficient, to acquaint him with the Orders he carried; commanding him upon great Penalties to diſarm his People and unrig his Fleet, and not diſturb or give any Impediment to the Conqueſt in which *Hernan Cortes* was employed, under the Colour of its belonging to him; and in caſe he had any Complain againſt *Cortes*, or any Claim of Right to the Country he was then gaining, to appear before the Royal Tribunal, where he ſhould be ſure of Juſtice in a regular Way.

The Licenciate, according to his Inſtructions, did all he could to reduce *Velaſquez* to reaſon, making uſe of what Arguments he thought moſt proper to perſuade him to deſiſt from his Enterprize; and ſeeing him incapable of Advice, he ſhewed his Orders, and cauſed them to be notified by an Eſcrivano he had brought with him for that Purpoſe, accompanying them with Requeſts and Proteſtations. But nothing was ſufficient to ſtop his Reſolution, for the Title of the King's Lieutenant had ſo raiſed him in his own Conceit, that it ſeemed he would acknowledge no Superior in his Government, and obſtinately perſiſted in his untractable Humour.

The Licenciate ſeeing that he endeavoured to haſten the Embarkation of his People, feigned a Deſire of beholding this Land, ſo much applauded and cried up, and under the Pretext of Curioſity offered to accompany them, to which Propoſal *Velaſquez* agreed, that the News of his Inſolence might come later to the Iſle of *Santo Domingo*. Whereupon he embarked with general Approbation. *Andres de Duero*, that Secretary of *Velaſquez*, who favoured *Cortes* ſo much, in the Beginning of his Fortune, likewiſe, made one in this Expedition; ſome ſay, he offered himſelf for this Voyage, purely to ſhare ſome of the Wealth *Cortes* had acquired, by putting him in Mind of the Services he had formerly done him; and others ſay, it was to pacify *Narvaez*, and prevent as much as he could the Ruin of his Friend.

4. The Fleet ſet ſail, and having a favourable Wind, in a few Days got Sight of the deſired Land. They came to an Anchor in the Port of *Ulua*, and *Pamphilo de Narvaez*, ſent ſome Soldiers aſhore to get Intelligence, and make what Diſcoveries they could in the neighbouring Villages. Theſe were not long before they ſurprized two or three *Spaniards* who were ſtraggling about that Place. They brought them before the Commander, and the Men either fearful, or inclinable to Novelty, informed him of all that had paſſed in *Mexico* and *Vera Cruz*, endeavouring to flatter him, by diſcrediting of *Cortes*: Upon this Intelligence, the firſt thing he reſolved on, was, to treat with *Gonſalo de Sandoval* about the Surrender of the Fortreſs under his Command, and to engage him either to maintain it for him, or to diſmantle it, and with his Garriſon to join the Army.

He intruſted this Negotiation with a Clergyman, named *Juan de Guevara*, a Man of a leſs gentle Temper than his Profeſſion required. There went with him three Soldiers, who ſerved as Witneſſes, and a public Notary. *Gonſalo de Sandoval* had his Sentinels in proper Places, to obſerve the Motions of the Fleet; and they gave Advice from one to another, by which Means he had an Account of their Approach a good while before they arrived, and being aſſured that there was no greater Number to follow, he ordered the Gates to be opened, and retired to wait their coming.

The Prieſt after the firſt Civilities were over, gave him an Account of the Forces with *Narvaez*, who were come to take Satisfaction for the Injury which *Cortes* had done *Velaſquez*, by withdrawing from his Obedience, the Conqueſt of that whole Country being intirely his Property, as having been begun by his Order, and at his Expence. *Sandoval* anſwered him with ſome Warmth, which he could not well conceal, "That *Pamphilo de*
" *Narvaez* was his Friend, and ſo loyal a Subject, that
" he would certainly deſire nothing but what ſhould
" be convenient for his Majeſty's Service. That the
" preſent Juncture of Affairs required that he ſhould
" join his Forces with thoſe of *Cortes*, and aſſiſt him to
" perfect that which was in ſuch Forwardneſs, for that
" the Quarrels of private Perſons were not, at the King's
" Expence, to be decided by a Civil War: But that if
" *Narvaez*, preferring private Revenge to public Inte-
" reſt, deſigned any Violence againſt *Cortes*, he might
" be aſſured not only himſelf, but all the Garriſon,
" would rather chuſe to die, than to agree to ſo diſho-
" nourable an Action."

The Prieſt received this Repulſe as an unexpected Stroke, and broke out into injurious Language and Threats againſt *Cortes*, calling him Traitor, and went ſo far as to ſay, that *Sandoval*, and all who eſpouſed that Traitor's Intereſt, deſerved no better Title. They all endeavoured to bring him to reaſon, putting him in Mind of his Profeſſion, that he might be ſenſible of the Conſideration upon which they bore with him: But he, raiſing his Voice, without changing his Stile, commanded the Notary he had brought with him to publiſh the Orders he had, "That all might know that they were to
" pay Obedience to *Narvaez* on Pain of Death." But this was what could not be put in Execution, for *Gonſalo de Sandoval* told him roundly, "That he would order
" him immediately to be hanged, if he preſumed to
" publiſh any Orders which did not come from the
" King."

At laſt Things roſe to ſuch a Height, that, to prevent a Mutiny, *Sandoval* found it requiſite to make theſe People Priſoners; and upon mature Conſideration, he likewiſe thought proper to ſend them Priſoners to *Mexico*, being carried by *Indians* in Chairs, or a kind of Litters, that are uſed in that Country, under a ſmall Guard, commanded by *Pedro de Solis*, of whom he had a very good Opinion, and who behaved in this Affair admirably well.

5. In the mean time *Cortes* was extremely at a loſs how to behave in this Conjuncture. He had many things to do, and many Points to carry; ſtood expoſed to a Multitude of Croſſes, and had little or nothing in his Favour; yet his Behaviour was perfectly ſober and diſcreet. He told *Motezuma*, that his King had ſent a conſiderable Army to proſecute his Rights to his Country; but, as he had already received his Homage, he would go to his Cuontrymen, perſuade them to return, and go back with them himſelf. He gave his Soldiers to underſtand, that, notwithſtanding *Narvaez* was ſent, with the whole Force of the Iſland of *Cuba*, for his Deſtruction; yet he did not doubt he ſhould be able to bring him, or at leaſt his Soldiers, to join with them; and, in that Caſe, he made no ſort of Queſtion of their being ſtrong enough to make a total Conqueſt of the Empire of *Mexico*. To his Officers he was very ſincere, and found in them the moſt perfect Obedience.

In the mean time, *Solis* arrived with the Priſoners, ſent by *Sandoval*; but *Cortes*, who had been before informed of their coming, went out to receive them with more than ordinary Attendance. He immediately ordered their Fetters to be taken off, embraced them with great Humanity, and *Guevara* more than once, with particular Civility, telling him, "That he would chaſtiſe *Sandoval* "for the little Regard he had ſhewn to his Perſon and "Dignity." He afterwards conducted him to his own Apartment, gave him his Table, and, with a ſeeming Satisfaction, intimated, "How much he eſteemed the "Happineſs of having *Narvaez* in that Country, on account of the paſt Friendſhip and Intimacy that had "been between them." He took care that the chief *Spaniards* ſhould all appear chearful before him. He made them Witneſſes of the Favours he received from *Motezuma*, and the great Reſpect with which he was treated by the *Mexican* Princes. He preſented them with ſome Jewels of Value, which greatly mollified their Tempers.

He did the ſame by their Companions; yet without letting them know he ſtood in need of their good Offices to induce *Narvaez* to Peace. He diſpatched them in four Days, fully perſuaded by his Reaſons, and engaged by his Liberality. After he had taken theſe Meaſures, he reſolved to ſend ſome Perſon of Account to make ſuch Propoſals to *Narvaez* as were reaſonable. He choſe Friar *Bartholomew de Olmedo*, a Perſon of known Wiſdom and Eloquence. He haſtened his Diſpatches, and gave him Letters for *Narvaez*, for the Licenciate, and for the Secretary *Duero*, with ſeveral Jewels to diſtribute as he ſhould think proper.

It is eaſy to apprehend, from the Account that has been already given, that, in the whole Progreſs of this Expedition, this great Commander had never met with ſo much Trouble and Perplexity, or apprehended himſelf in ſo great Danger as in this Conjuncture, when, with all the Forces of the *Mexican* Empire, he had likewiſe a ſuperior Army of *Spaniards* to deal with, and thoſe no leſs inclined to deſtroy him than his foreign Enemy. *Motezuma* ſaw his Trouble, notwithſtanding he took all the Pains he could to hide it; and, in a Converſation he had with him upon the Subject, told him plainly, That he perceived either he, or the new *Spaniſh* Commander, muſt be a Rebel; which mortified *Cortes* extremely. But he remained firm, notwithſtanding, in his firſt Reſolution, which was to march in Perſon againſt *Narvaez*, and to leave a ſufficient Body of *Spaniards* behind him in *Mexico* to ſecure the Perſon of *Motezuma*, and preſerve the City under their Obedience. The Number of Men that were to be employed for this Purpoſe was no more than fourſcore; but they were picked and choſen Men, to whom he aſſigned for their Commander, Capt. *Peter Alverado*, a Man of Fidelity and Reſolution, extremely beloved by the *Spaniards*, and very highly eſteemed by *Motezuma*. He ſent Orders likewiſe to *Sandoval* to quit the Fortreſs of *Vera Cruz*, and to leave it to the confederate *Indians*, that he might be able to march againſt *Narvaez* with the greateſt Force he could draw together.

He gave Directions alſo for raiſing conſiderable Bodies of well-affected *Indians*; but he abſolutely refuſed to accept of the Succours which *Motezuma* offered him, that he might not put either himſelf, or the *Spaniards* under the Command of his Rival, into the Power of thoſe who were naturally Enemies to both. Theſe were vaſt, and indeed almoſt incredible, things to be performed in ſo ſhort a ſpace of time; and yet ſuch was his Diligence, ſuch was his Dexterity, that they were performed, and every thing was ready for his Departure againſt the Day he had appointed. But what was ſtill ſtranger, and more extraordinary, he not only found his Soldiers perfectly well inclined to his Service, but all his *Indian* Confederates as chearful and hearty in his Intereſt as he could either wiſh or deſire; ſo that, difficult as his Enterprize was, he entered upon it with a fair Proſpect of Succeſs.

6. *Cortes*, being reſolved to loſe no time in marching againſt *Narvaez*, thought fit to acquaint *Motezuma*, and received a ſuitable Anſwer from that Monarch, who, at his Departure, bore him Company as far as the Cauſway of *Papalapan*, where he took his Leave very kindly. Many *Mexicans* went with him; ſome returned becauſe he deſired them ſo to do; and others becauſe they grew weary. Thoſe that followed went to bring the King word of every thing that happened, as they hourly did. He was very well received at *Chulula*, where the Men were refreſhed; and, half a League from thence, he met a great Number of *Tlaſcalans* coming to compliment him. The *Chinantlans* had Pikes, and *Cortes* ordered all the Men to wear Eſcaupiles, or Armour made of Cotton. *Sandoval* likelikewiſe came to the Place aſſigned him, where, upon a Muſter, there were found two hundred and ſixty-ſix Men, including the Commanders, five Horſemen, and the Friar.

Cortes's Friends that were with *Narvaez*, being informed that he drew near, adviſed to ſend *Andrew Duero*, who had an Influence over *Cortes*, to propoſe an Accommodation. *Duero* went, and diſcourſed *Cortes* in private, and the Reſult was, that they treated one another like Friends. When *Duero* was gone, *Cortes* ordered *John Velaſquez*, who was a Relation to *Narvaez*, to go to his Camp, and take with him his Gold Chains, and all he had, beſides much he gave him. *Velaſquez* excuſed himſelf; but *Cortes* would have him go, offered him his own grey Mare, and, having diſcourſed him in private, and given him ſome Jewels, he departed. *Velaſquez*, arriving at *Zempoalla*, alighted at the Cazique's Houſe, and from thence went to *Narvaez*'s Quarters, who, being informed that he was come, was going out to ſeek him, and, having received him very lovingly, ſaid, He ſhould be his Gueſt. He anſwered, He muſt return immediately; for that he only came to kiſs his Hands, and to try whether any Accommodation could be made. *Narvaez* flew into a great Paſſion, and ſaid, He wondered he ſhould chuſe to reconcile him to a Traitor, who had revolted from his Couſin *James Velaſquez*. *John Velaſquez* was much offended at it, and ſaid, That ſuch Words were not to be ſpoken in his Preſence of *Cortes*, who was a very worthy Gentleman. Capt. *Salvatierra*, and other Officers, thinking that *Velaſquez* took too much Liberty, adviſed *Narvaez* to ſecure him; but *Auguſtin Bermudez*, who was chief Alguazil, *Andrew de Duero*, and *John de Leon*, oppoſed it, and perſuaded *Narvaez* to make much of him, who did ſo, and deſired him to perſuade *Cortes* to ſurrender himſelf, and put an end to all Controverſies. *Narvaez* would have *Velaſquez* ſee his Army, which paſſed in review before him, and ſo they went to Dinner. Immediately after *Velaſquez* took his Leave, thinking he had done what he came for, which was to ſee the Forces, ſpeak to ſome particular Perſons, and render *Narvaez* ſecure. The Friends of that Commander were become abſolutely tired of the Company of *Velaſquez*, and were therefore glad to be rid of him, ſo that they prevailed upon his Friend not to importune him to ſtay; and indeed *Narvaez* himſelf was, by this time, of their Opinion.

After his Departure they held a Council of War; at which the Friends of *Narvaez* repreſented to him the Danger he was in from the Money that *Cortes* had taken care to diſtribute among his Soldiers; and, while they were diſcourſing on this Subject, the Cazique of *Zem-*

poalla came, and aſked him what he was about; adding, That, when he leaſt expected it, *Cortes* would be there and kill him; for that he had ſo many Spies that he knew every thing that was done. Tho' they made a Jeſt of him, the War againſt *Cortes* was proclaimed to be carried on with Fire and Sword, and all Plunder to belong to the Taker. *Narvaez* marched out, with his Forces and Artillery, about a Quarter of a League from *Zempoalla*, intending to wait for *Cortes* there; but, it happening to rain all that Day, and thoſe Men not being inured to Hardſhips, they murmured, ſaying, It was proper to return to their Quarters. Thoſe who were acquainted with *Cortes*'s Valour thought otherwiſe; and inſiſted that it was ill Advice to go back. *Andrew Duero* gave *Cortes* Notice of all thoſe Particulars, by a Soldier who deſerted.

Narvaez retiring, upon the Confidence that *Cortes* durſt not attack him, ordered Soldiers to be poſted on the River he was to paſs, forty Horſemen to ſtay all Night on the Road to *Zempoalla*, twenty more to be in the Courts of his Quarters, and the Artillery, conſiſting of eighteen ſmall Guns, to be planted before the Doors: And thus he thought himſelf ſecure. He then proclaimed he would give two thouſand Pieces of Eight to any Man that ſhould kill *Cortes*. *Sandoval* had ordered a conſiderable Number of Muſketeers, Croſs-bowmen, and other Soldiers, with Partiſans, to lie in his Apartment; and the Captains *Salvatierra*, *Gommera*, and others of his Confidants with them.

Cortes, coming to the River of *Canoes*, found much Difficulty in paſſing it, becauſe there was a great Flood, and two Soldiers were drowned ſeeking for the Ford. As ſoon as they got over they heard firing of Muſkets in *Narvaez*'s Army, which much frighted the *Indians*; who ſent *Motezuma* an Account of all, magnifying his Power, and looking upon *Cortes* as a loſt Man, which was no ſmall Satisfaction to the *Mexicans*. *Cortes*, in that Place, drew his Men together; and, in a long Speech, acquainted them with all the ill Practices of *Narvaez*, extolled their Valour, and told them, they were then to fight for their Lives, for their Honour, and for their Eſtates; the Deſign of their Enemies being to make them Priſoners, and ſeize all they had. *John Velaſquez*, *James de Ordaz*, and other Commanders, anſwered, He might be aſſured they would either conquer or die, and ſhould take heed not to be enſnared by any fallacious Terms. *Cortes* was over-joyed to find his Men in this Diſpoſition, and deſired them to keep their Order exactly, for many great Diſorders happened for want of it; and it was very remarkable that he never gave them the leaſt Intimation of the Intelligence he held in the Enemy's Army, that his Soldiers might believe that his whole Dependance was upon their Valour. He further ſaid, He deſigned to attack the Enemy at Midnight, or before break of Day, which was the beſt Method for a few to deal with a great Number. *Alonſo Davila* anſwered, That they did not deſire to live without him, ſo that he might go when he pleaſed, and do as he thought fit, for they would be ſatisfied to die with him at all Times.

As ſoon as *Narvaez* heard where *Cortes* was, he ſent *Gonſalo Carraſco*, a bold Man, and his Servant *Hurtado*, to approach as near *Cortes*'s Forces as he could, and bring him Advice of his Motions. *Cortes*'s Forerunners met with *Carraſco*, and took him; who ſpoke aloud that *Hurtado* might make his Eſcape; and ſo he did. *Hurtado* came among *Narvaez*'s Forces, ran thro' their Quarters crying, Arm, arm! telling them, That *Cortes* was at hand, and *Carraſco* taken; but could give no Account of the Men or their Number. Some ſaid *Cortes* could not come in ſuch a dark, rainy Night, and *Narvaez* bid *Hurtado* go to ſleep, for he had certainly fancied it. *Cortes*, to juſtify his Proceedings, gave *Sandoval*, who was his chief Alguazil, a Warrant to ſecure *Narvaez* for raiſing Commotions in the Country; and, in caſe he reſiſted, to kill him, requiring all his Officers and Soldiers to be aſſiſting. Then he divided his Men into three Parties; the Firſt under *Sandoval*, which was of ſixty Men; the Second under *Chriſtopher Olid*, a good Soldier, and a Man of extraordinary Strength. *Cortes* himſelf took the Third. They had, among them all, ſeventy Pikes made of Oak, with the Spears before-mentioned, being thirty-eight Spans in Length. The Word was *The Holy Ghoſt*. He appointed *Sandoval*'s Pikes to attack *Narvaez*'s Quarters, and the reſt the Cazique's Houſe, where he was kept under a ſtrong Guard that he might not run away; and fifty Men to fall upon the Alcalde *John Juſte*; and *Olid* was to attack *Narvaez*'s Artillery, and he to ſupport them.

The three Bodies advanced within a Stone's-throw of one another. *Cortes* halting, intreated *Carraſco* to tell him the Diſpoſition of *Narvaez*'s Forces, threatning to hang him if he lyed; and he, refuſing, was ſo near being hanged, that his Throat was ſore for ſome Days: And one of the Horſemen ſaved him. Being come to a Place where the Road divided itſelf into two, they prayed, put on their Eſcaupiles, or Cotton Armour, and marched towards the Town in good Order, obſerving ſtrict Silence. *John Velaſquez*, then ſeeing a Light on high, told *Cortes* that was *Narvaez*'s Quarters, and he anſwered, I am glad that the Light guides us. He commanded *Sandoval* to move directly to *Narvaez*, which was a good Choice, for he was a daring Commander, and the other Parties to guard his Flanks. *Sandoval* charged *Canillas* not to beat his Drum till he ordered him, and kept him before him. When they were cloſe by *Narvaez*'s Quarters, *Cortes*, who was giving Directions, ſaid to *Sandoval*'s Party, Gentlemen, ſtick cloſe to the Houſes on both Sides of the Streets, that the Cannon-balls may paſs along without doing any Execution. All this could not be done ſo ſilently but that there was Notice given of it. *Narvaez*, who was putting on a Breaſt-plate, ſaid to him that brought the Advice, Be not uneaſy, and ordered to beat the Alarm; but none came in from the other Towers, where the reſt of his Men were quartered, for they could not come, being hindered by *Cortes*'s Men. When *Sandoval* came to *Narvaez*'s Quarters, the firſt Sentinels, who ſtood at the Foot of the Stairs of the Court, cryed out. *Sandoval*, ſeeing he was diſcovered, ordered *Canillas* to beat his Drum. *Cortes* cryed, Fall on, fall on! *Holy Ghoſt*, *Holy Ghoſt!* Advance.

Sandoval going up the firſt Stairs, with his Men following, found in the firſt Court a Room full of Blacks; one of them came out with a Light in his Hand, and was killed with the Pikes. They paſſed on towards *Narvaez*'s Apartment, and going up four Steps ſaw the Artillery planted. One Gun was fired, which killed two of *Cortes*'s Men; but the reſt preſſed on ſo faſt that the other Pieces could not be fired. *Cortes* cauſed the Artillery to be thrown down the Steps, and went up five more to get into the Room where *Narvaez* was with about forty Soldiers. *Sandoval*, who was already come up with *Narvaez*, required him to yield, but he made a Jeſt of it, and ſtood upon his Defence till *Martin Lopez*, one of *Cortes*'s Men, ſet fire to the Thatch that was on the Tower, and the Smoke drove *Narvaez* and his Men out of the Place, and then he was run into the Eye with a Pike. *James de Rojas*, Enſign to *Narvaez*, fought bravely in Defence of his Colours, till two Pikes were thruſt into him, when falling he cried out, Lady help me! and *Cortes* anſwered, She ſhall ſave you, not permitting him to be killed.

When *Narvaez* was wounded, *Peter Sanchez* came up and cloſed with him, and then *Sandoval* ſaid, Yield yourſelf Priſoner; ſo they dragged him down the Steps till Fetters were put upon him, and carried him to *Cortes*; to whom he ſaid: My Lord *Cortes*, value your good Fortune in making me Priſoner this Day. He anſwered, That the leaſt Action he had performed in that Country was the taking of him; and therefore ordered he ſhould be well ſecured. He was not dreſſed that Night, by reaſon of the Confuſion all Men were in, but the next Day was ſent to *Villa Rica*. *Narvaez* being taken, and his Men making no further Oppoſition, *Cortes* ordered himſelf to be proclaimed Captain-General, and Chief Juſtice of both Armies, in the King's Name; commanding all Men to come in, and take an Oath to him as ſuch, upon Pain of Death.

They all did ſo, ſome voluntarily, others becauſe they did not know how to avoid it, except three hundred Soldiers, who fortified themſelves in their Quarters; to whom

Carraſco now releaſed, ſaid, It was a fit time to fall upon *Cortes*'s Men, becauſe thoſe who had taken an Oath to him were diſarmed, and his own Soldiers diſperſed, plundering. Tho' the Advice was not diſliked, thoſe Men having no Head, and many aſpiring to be ſo, they ſtaid till it was Day; when *Chriſtopher de Olid* came to offer them a good Reception, from *Cortes*. Moſt of them cried, *God bleſs the King and* James Velaſquez. When the Shout was over, *Olid* told them they would be compelled by Force to what they refuſed to do voluntarily. Whilſt he went to acquaint *Cortes*, *Carraſco* adviſed them to fall upon *Cortes*'s Baggage, and they ſhould be all rich; and might then embark, and carry *James Velaſquez* Treaſure enough to fit out another Fleet. Though they liked the Propoſal they could not agree, ſo that *Carraſco* went alone, and finding no Guard but *Marina* and *John de Oreoga*, Page to *Cortes*, he took a Horſe and a Spear, returned to thoſe Men who were ſtill together, and ſhewed them what an Opportunity they had loſt. *Cortes* then ordered his Artillery to advance againſt thoſe that would not ſubmit, and commanded the Gunner to fire one Piece in the Air: He did ſo. *Olid* ſpoke to them again, and they again anſwered, *God bleſs the King and* James Velaſquez. One Gun being then fired upon them killed two Men, and the next one. Whereupon ſome of them went over to *Cortes*, and the reſt held out till wanting Ammunition they ſurrendered.

All had taken the Oath to *Cortes* except *Carraſco*, and he appearing on the Horſe he had ſtolen, *Cortes* ſaid to him: Friend, that Horſe is mine; alight. He ſaid he would not unleſs his own was reſtored. *Cortes* replied, he ſhould quit him immediately, and Orders ſhould be given for returning his. As to the Oath, he refuſed it; for which he had a Clog faſtened to one of his Feet, which continued three Days, and then he took the Oath. He was not hanged, to avoid exaſperating thoſe People.

8. When all had been ſworn, he muſtered his own Men to ſee how many were miſſing; and *Narvaez*'s Party ſeeing they were only two hundred and ſixty without the great Army of the *Tlaſcalans*, that had been reported, and that they had but thoſe few Pikes without Armour or Horſes, and ſome Coats of Mail, Spears, and Croſs-bows, and their Swords in bad Condition, they were much aſhamed, that they, with their little Pannels, as they called the Cotton Armour, ſhould have defeated ſo many Men of Note, and, bluſhing, curſed *Narvaez* for his ill Conduct; which much troubled *Cortes*, till by Degrees he gained their Affections: Two only of his Men were killed and one wounded; and eleven of *Narvaez*'s Party ſlain.

Then came the Cazique of *Zempoalla* with his *Indians*, bringing Garlands of Roſes, and ſetting them on the Heads of *Cortes* and the other Commanders, congratulated their Victory, and deſired them to go to his Houſe; and in return *Cortes* gave him ſome *Spaniſh* Baubles; and having ordered all that had happened to be painted, *Narvaez* taken and put into Irons, his Men ſubmitting, and *Cortes* victorious, the Cazique ſent it to *Motezuma* by the Advice of *Cortes*, who alſo ſent a *Spaniard* to inform *Alverado*. When firſt *Cortes* came to *Zempoalla*, the Lord preſented him with a beautiful Woman of Quality, who took the Name of *Catherina*, and now he took up his Quarters in the Woman's Houſe, becauſe it was ſtrong. She treated him very kindly; but he was uneaſy in his Mind, ſeeing thoſe conquered People indiſpoſed. Whilſt he was thinking how to get over this Difficulty, Capt. *Bariantos* came to him with the *Chinantlans* well armed after their Manner, which was a great Satisfaction to him, that *Narvaez*'s Men might ſee how he was obeyed in *New Spain*.

He reſolved to ſend thoſe *Indians* back, and to divide the *Spaniards*; and accordingly ordered *James Ordaz* to march with three hundred Men to ſubdue the Province *Guacacoalco*, and *John Velaſquez* with another Detachment to the River of *Garray*; thus to employ them, and ſecure himſelf, which at the ſame time was acceptable to them. *Cortes* next commanded *Peter de Malvenda*, Steward to *Velaſquez*, to pick up what belonged to his Maſter and *Narvaez*, and ſecure it. A Black belonging to *Narvaez*, having the Small-Pox, infected the whole Town of *Zempoalla*, and the *Indians* frequently waſhing themſelves, Numbers of them died, and lying unburied occaſioned a peſtilential Diſtemper which ſpread through all *New Spain*, and there enſued a very great Mortality. Others affirm, that this Diſtemper was not brought over by the Black, but that they had it at certain Times in the *Weſt-Indies*, and this ſeems the more likely, becauſe it affected none of the *Spaniards*.

Whilſt *Cortes* was endeavouring to ſettle his Affairs at *Vera Cruz*, wherein he met with ſome Difficulty, and *James Ordaz* was gone upon the aforeſaid Commiſſions, the *Spaniard* he had ſent to *Mexico* with the News of his Victory returned, and ſaid the *Mexicans* were in Arms, and ſhewed ſome Wounds they had given him; ſaying he had eſcaped miraculouſly. He preſſed *Cortes* to march to the Relief of *Alverado*, telling him, that the *Indians* had burnt the four Brigantines he had built at *Mexico*, thrown down a Wall at the *Spaniſh* Quarters, which had been repaired with much Difficulty, undermined another, ſet Fire to the Ammunition, taken up the Draw-bridges, cut off the Proviſions, killed *Pena*, *Motezuma*'s Favourite; that the *Spaniards* had defended themſelves bravely, killing many *Indians*; and that, if *Motezuma* had not ſometimes commanded his People to give over the Attacks for fear *Alverado* might kill him, the *Spaniards* had been deſtroyed. Hereupon he ſettled the Government at *Villa Rica*, leaving *Narvaez* and his Men Priſoners there; commanded thoſe he had ſent abroad to halt till further Orders; made a Speech to the Men, ſaying, That thoſe who were willing to follow him ſhould have Arms given them; and the Occaſion being urgent, all unanimouſly offered their Service.

9. It now plainly appeared that *Cortes* was become entirely Maſter of all the *Spaniards* under his Command, the new obeying as well as the old Soldiers, and ſhewing as much Zeal for his Service. He had already given the neceſſary Orders for ſecuring the Fleet, and for putting a good Garriſon into *Vera Cruz*; ſo that it was more in his Power to execute the Deſign he had formed, and which indeed the Circumſtances of Affairs required, marching directly to *Mexico*, and forcing a Paſſage through the Rebels, to the Relief of his Countrymen. He directed his Rout accordingly from *Zempoalla* towards *Tlaſcala*, having with him One thouſand Foot, and One hundred Horſe; but they were ſoon obliged to take different Roads for the ſake of Subſiſtence, which, notwithſtanding the Care and Circumſpection *Cortes* could uſe, they found it ſometimes difficult to procure; inſomuch that in the Courſe of this Journey, they found themſelves more than once expoſed even to the higheſt Extremities of Hunger and Thirſt, and, which is very ſtrange, the new Troops that had ſhewn themſelves ſo uneaſy, and ſo impatient under much lighter and leſs grievous Hardſhips, behaved upon this Occaſion with all the Firmneſs and Conſtancy that could be deſired, either from the great Hopes they had formed to themſelves of being made rich and happy by this Expedition, or becauſe they were deſirous of ſhewing their new General, that whatever Opinion he might have formed of them from what was paſſed, he ſhould find them, in every Reſpect, as brave, as hardy, and as capable of enduring Fatigue as thoſe he had trained up himſelf.

In this March, but eſpecially at *Tlaſcala*, *Cortes* found Means to gain a very clear and diſtinct Account of the Cauſes of that Sedition which had happened in his Abſence, and of which it is neceſſary likewiſe that we ſhould ſay ſomewhat, that the ſubſequent Part of this Section may be the more perfectly underſtood. A very ſhort time after the Departure of *Cortes* from *Mexico*, *Peter Alverado* began to perceive viſible Marks, not only of Coldneſs and Diſlike, but of Hatred and Diſaffection in the People of *Mexico*; neither were his Conjectures unſupported by Proof, ſince he was quickly informed, that, at the Perſuaſion of their Prieſts, the *Mexicans* were providing Arms, and whatever elſe was requiſite, in order to attack the *Spaniſh* Troops. He was certainly very much to be commended for being conſtantly on his Guard, and neglecting nothing that might contribute to the defeating of their Deſign. In this, however, he was much to blame, that he did not either communicate his Suſpicions, or his Diſcoveries to *Motezuma*, or ſo much as confer with him on the preſent Poſture of his Affairs, ſince that Monarch teſtified great Affection to the *Spaniards*; and, if applied to in time, might have prevented things from coming to Extremities.

But *Alverado*, it ſeems, depended upon his own Foreſight, and the Courage of his Soldiers; and underſtanding that the *Indians* were actually preparing, under Colour of a ſolemn Dance, which was one of the principal Rites of their Religion, to ſurprize and cut off the *Spaniards*, he reſolved to be beforehand with them, and to put it out of their Power, by ſhutting them up in the great Temple where this Dance was to be performed by their principal Nobility, in which he ſucceeded; but when he had them in his Power, and ſaw that they were richly adorned with Gold and Jewels, he either commanded, or at leaſt permitted, his Soldiers to fall upon them, and cut them to Pieces, and ſtrip the dead Bodies of their valuable Ornaments, which afforded the *Indians* that eſcaped, a fair Pretence of carrying on an open and avowed War, which from that time they did, and almoſt every Day attacked the *Spaniards* in their Quarters; which, though they were not able to force, and notwithſtanding they killed but three or four, and loſt ſeveral hundreds, nay, ſome thouſands of their own People, yet they continued the War with the greateſt Obſtinacy, ſuppoſing, that in time the *Spaniards* would expend their Ammunition, and, that ſooner or later they ſhould deſtroy them all. The *Spaniards* themſelves apprehended this, and therefore preſſed *Cortes* to haſten his March, in order to relieve them.

10. He was very ſenſible of their Diſtreſs, and of the Neceſſity of extricating them from it; and therefore, with as little Delay as poſſible, he quitted *Tlaſcala*, taking with him ſome of the braveſt Troops of that Republic, with whom he continued his March towards *Mexico*; which City, without meeting many Difficulties on the Road, he entered upon the Feaſt of St. *John*, 1520. He met with no Oppoſition, for the *Indians* had quitted a great Part of the City, and had broke down ſeveral Bridges. However he advanced with great Caution, and at length arrived at the *Spaniſh* Quarters, where he was received with the utmoſt Joy by *Alverado*.

The *Spaniſh* Writers differ as to his Behaviour towards *Motezuma*; ſome ſay that he uſed him kindly, but others expreſly affirm, that he did not ſo much as pay him a Viſit, and that he afterwards repented of this, as of one of the greateſt Miſtakes he ever made. He added, however, another of a different Nature; for, in Hopes of pacifying the *Indians*, he releaſed *Motezuma*'s Brother, who proved his moſt dangerous Enemy, and therefore the *Indians* choſe him for their Captain. He aimed, at firſt, at an Accommodation, but he ſoon found that impracticable, and that *Motezuma* had entirely loſt his Authority, which proved of very ill Conſequence to the *Spaniards*, *Cortes* ſent *Antony del Rio* to *Zempoalla*, to give an Account of the Poſture of Affairs, and haſten the March of thoſe that ſtayed behind; and as he was paſſing a Horſeback, through *Tlatlelulco*, which is the Market-Place, the People howled, and began to purſue him; being thus followed, and ſeeing a Stop before, he thought it beſt to turn back, and breaking through the Crowd with his Horſe, Sword in Hand, returned to the Quarters. *Cortes* then ſent five Horſe-men to ſee how Matters ſtood, who found ſome Timber taken off the Bridges, under which the Cuts of Water ran, and turning another Way, found the like in other Streets, many People on the Tops of the Houſes pointing to them to paſs the Bridges.

The next Day *Hojeda* and *Marquez* went to ſeek Proviſions, and finding a Bridge broken, and the Waters in the Trench deep, they made a ſhift to get over, by throwing in Rubbiſh, Pieces of Matts, and other Things; then paſſing along a little Street, *Marquez* heard a great Cry, and returning to his Companion, they agreed to fly, and had it not been for a *Tlaſcalan* they had with them, who was their Guide, there were ſo many Windings of Streets, that they had been in great Danger: They met with an *Indian* Prieſt crying out, and behaving himſelf like a Mad-man; they purſued him, and he ran into an Houſe that was full of tame Cranes, which, when they ſaw him, began to ſet up their Cry, in ſuch a Manner, that *Hojeda* came out in a Conſternation; the Citizens flocked together on all Hands, great Cries were heard, and the Tops of the Houſes were full of Men. Six *Spaniards* that were at the Top of the Temple looking out, gave Notice of the Diſturbance, and *Hojeda* and *Marquez*, coming in, two hundred Men ſallied out of the Quarters, whilſt the reſt were arming. They fought with a great Number of *Indians*, who preſſed on furiouſly, without any Dread of the Swords; the Action laſted till Night, an infinite Number of *Mexicans* being ſlain, and not one *Spaniard*; thus was *Cortes* convinced that the War was unavoidable, and therefore he endeavoured to ſend privately for *Salcedo*, who had been left behind with the Wardrobe. He ordered Men to throw down ſome Trenches the *Indians* had caſt up, that the Horſes might paſs.

As ſoon as it was Day, the Shouting, Whiſtling, and Fighting, began again, and continued the whole Day, with the Deſtruction of many *Mexicans*; and ſome *Spaniards* were hurt, becauſe the *Indians* threw Stones from the Tops of Houſes; but the Fire-arms and Croſs-bows drove them. The next Day the *Indians* aſſaulted *Cortes* the third Time, in a moſt deſperate Manner, killing *Carezo* an Horſe-man; and *Cortes* finding that the greateſt Miſchief came from Tops of Houſes, he left the Horſemen, and with one hundred and forty Muſketeers and Croſs-bow Men, entered the Street of *Tabuca*, gained it entirely, and came to *Tabuca*, where they might have fortified and ſecured themſelves with all their Wealth; but, deſpiſing the *Indians*, they returned to their Quarters, and were ſet upon, in the Streets, by vaſt Numbers of *Indians*, where the Horſes having no room, were of little Uſe.

They took one *Spaniard* alive, and ſacrificed him in Sight of all the reſt; they alſo took two Pieces of Cannon, and threw them into the Trenches, ſo that the *Spaniards*, with much Difficulty, returned to their Quarters; and the *Indians* again cleared thoſe Places which the *Spaniards* had filled up for their Horſes to paſs; the next Day they engaged the fourth Time; the *Indians* being ſo numerous, that it was wonderful to behold; who attacked the Court of the great Temple, where, though it was large, no Uſe could be made of the Horſes, becauſe it was paved with broad Stones; many great Men were on the Top of the Temple, commanding where the Attack ſhould be made. *Cortes* ſent *Eſcobar*, his Chamberlain, againſt them, with one hundred Men; and by that time they were got up four Steps, there came down upon them ſuch a Shower of Stones, Pieces of Timber, Sticks, and Fire-brands, that they were forced to retire: Three times they were repulſed in this Manner. *Cortes*, being informed of it, tied a Target to his Arm, becauſe he was wounded in the Hand, went to that Place, ſaid it was a Shame there ſhould be any longer Delay in that Affair, advanced foremoſt, and was followed by many.

They got up the Steps, and though many *Spaniards* were knocked down, fell upon the three hundred Gentlemen that were there, and left not ſix of them alive, ſome being killed with the Sword, and others throwing themſelves headlong from the Parapet of the Temple; two laid hold of *Cortes* to caſt themſelves down with him, but he being a ſtrong Man, got looſe. The ſame happened to *Hojeda*, and he would have periſhed in that Manner, had not one near him relieved him. They went up to the Top of the Temple, where they found no Man, but much *Cacao* and Meat; and the *Tlaſcalans* and *Zempoallan Indians* had a good Day of it, for they fed upon the *Mexicans* that were killed. The *Mexicans* came on again the next Day in a greater Rage, and had new Ways of fighting, being aſſiſted by the neighbouring Towns. They threw their Javelins cloſe by the Ground, to wound the Feet and Legs, and in this Manner above two hundred *Spaniards* were hurt, till they provided Armour.

The Arrows flew ſo thick, that thoſe who were appointed to gather them up every Day, burnt forty Cart-Loads of them. Proviſion was become ſo ſcarce, that the *Indian* Allies had but a little Cake, every Day, each Man, for their Allowance, and every *Spaniard* fifty Grains of *Indian* Wheat; nor was there leſs Want of Water, ſo that they endured much Drought. They dug in their Quarters, and, though the Earth was full of Salt-petre, they found freſh Water, which was wonderful; a *Tlaſcalan* looking over ſome of their Works, to ſee what was doing, the *Mexicans* cried to him, " You Dog, you and thoſe " Chriſtian Dogs ſhall now periſh with Hunger and " Thirſt." He anſwered, " You infamous falſe Scoun- " drels, who know not how to fight but in Crowds, take " that Cake which I had to ſpare this Day, out of my Al- " lowance, for you ſhall all be deſtroyed by Degrees."

The next Morning the Battle revived, and the *Indians* ſet Fire to the Houſe; it was put out by throwing down a Wall, and that Breach made good with Cannon, and a Work raiſed; and becauſe ſome Miſchief was done from a Tower of *Motezuma*'s Houſe, *Cortes* reſolved to make himſelf Maſter of it. He attacked it with two hundred Men, and it was wonderful that long Pieces of Timber being rolled down the Stairs at Length, which might have overthrown ten or twelve Men, they all turned end Ways, and did no Harm. He gained the Tower; killed thoſe that defended it; advanced into the City; burnt above one thouſand Houſes; gained ſeven Bridges; killed a prodigious Number; and here a Horſeman came to tell him, that the great Men of *Mexico* would treat with him of Peace: He was glad of it, ſent *Alverado* and *Sandoval*, with ſixty Horſe, and ordered *John Velaſquez* to ſtay there with four hundred Foot, to ſecure the Bridges; then he went to the *Mexicans*, whom he ſaluted very courteouſly. They aſked him why he did not go away as he had promiſed, ſince he had Ships, and reſtore them their Lord *Motezuma?* Whilſt he was in Diſcourſe about this Affair, Advice was brought him that the Bridges were loſt; he haſtened away thither, and found *John de Soria*, and another Soldier, dead, and five Horſes fallen down; he recovered them, and fought ſo reſolutely, that his Preſence alone was the ſaving of many Lives.

11. *Cortes* returned to his Quarters, with two Contuſions on his Knee, made by Stones, where he found the Men in Confuſion, believing he had been killed, becauſe he ſtayed ſo long. They rejoiced at the Sight of him; the Battle continued; the *Indians* broke the Bridges, and fought from the Tops of their Houſes; *Cortes* ſeeing one of them very fine, and obeyed by all the reſt, ſent *Marina* to aſk *Motezuma*, whether he thought they had put the Government into his Hands. He anſwered, that they would not preſume to chuſe a King in *Mexico*, while he was living. He looked at them, and ſaid they were his Kindred, and that, among them, were the Lords of *Tezcuco* and *Yztapalapa*; the Engagement ſtill grew warmer; *Cortes* was in Confuſion, and *Motezuma* in no leſs, apprehending, as is likely, that they would kill him; he bid *Marina* acquaint the General that he would go up to a Parapet on the Houſe, to ſpeak to his Subjects, which might perhaps induce them to come to an Accommodation. *Cortes* was pleaſed with it, he went up with a Guard of two hundred *Spaniards*, in Royal Apparel, and *Marina* with them, to know what was ſaid.

The Noblemen that went up with him made a Sign, and he was preſently known, and raiſing his Voice ſaid, " He ſhould be pleaſed if they would behave themſelves " gratefully, for the Good he had done them: That he " had been informed they had choſen another King, " becauſe he was confined, and loved the Chriſtians, " but could not believe they would forſake their natural " Sovereign, for another which God would puniſh; " that if they had fought ſo long to ſet him at Liberty, " he thanked them, but they were miſtaken, for he was " there by his own Conſent; that being his own Houſe, " in order to entertain his Gueſts, and therefore he de- " ſired them to lay down their Arms; ſince every Man " they killed, coſt them above two thouſand; eſpecial- " ly conſidering that they offered Peace, and had not " taken their Goods, raviſhed their Wives or Daughters, " and were willing to be gone; that he could go out " from thence whenſoever it pleaſed him, having always " had the Liberty ſo to do; and therefore, if they loved " him, they ſhould give over, and lay aſide all Preju- " dice, which never permitted Men to act indiſcreetly." The *Mexicans* liſtened to him with much Attention: But, as ſoon as he had done, cried out, " Hold your Peace, " you effeminate Scoundrel, born to weave and ſpin; " thoſe Dogs keep you a Priſoner, you have no Heart, " you are a Coward." Then they fell on again, caſting abundance of Stones, and ſhooting their Arrows, and, though a *Spaniard* took care to cover *Motezuma* with a Target, yet, as ill Luck would have it, a Stone hit him on the Temple.

He went down to his Chamber, laid him on his Bed, and was ſo much aſhamed, and out of Countenance, that, though the Wound was not dangerous, he died in four Days with Grief, forbearing to eat, and refuſing to be dreſſed. The Fight continued, without Intermiſſion, all the while that *Motezuma* kept his Bed; who, finding his Strength fail him, ſent for *Cortes* in great haſte, and, ſitting up, leaning on the Pillows with Tears in his Eyes, taking hold of his Hand, ſaid, " That he knew not " where to begin, that he was the ſame *Motezuma*, " whom he had ſo poſitively inſiſted to viſit, whom the " World had ſo much reſpected, that he knew not what " ill Fate attended him; for he had not uſurped an- " other's Kingdom, had done Juſtice, conquered many " Nations, beſtowed many Favours, and yet thoſe, who " before durſt not look him in the Face, had inſulted " their King, giving him ſuch Language as was not fit " for a Slave, and throwing Stones at his Royal Perſon; " that his Heart was ready to burſt, and he died in great " Rage, wiſhing he could ſee thoſe Villains puniſhed; " but it was now too late, and his End was rather oc- " caſioned by Vexation, than by the Wound; he there- " fore begged, that ſince he died for his Sake, he would " take care of his Children, and puniſh thoſe that had " inſulted him, and the Perſon that had uſurped the " Crown." *Cortes* could not help being moved at theſe Words, and holding him by the Hands, begged that he would not caſt himſelf down, for he would perform all his Commands, as if they were the King his Maſter's; adding, that he had been in the Wrong in not ſuffering himſelf to be dreſſed; that he gave him his Word to take care of his Children, and revenge his Wrongs to the full; theſe and other Words, uttered by *Cortes*, very much comforted him; but *Cortes* was forced to take his Leave, to go and ſee what was doing Abroad.

The next Day, being told he was very ill, he came back to ſee him, found him in a great Agony, and ſaid, " That ſince he had agreed to be baptized, he ſhould " do it then to ſave his Soul, for *Francis Olmedo* was there " ready to do it." He anſwered, " That having but " half an Hour longer to live, he would not forſake the " Religion of his Anceſtors." And ſoon after he died, ſome of the great Men that were Priſoners with him being preſent, to whom he recommended his Children; and the Revenge he deſired to his laſt Gaſp. He never would ſuffer any Cloth or other thing on the Wound, but if any was laid on, he pulled it off, wiſhing for Death. Four Hours after he was dead, *Cortes* looked out at the Top of the Houſe, made a Signal for a Ceſſation, deſiring to ſpeak to the Commanders, and told them, " That they ill requited their Sovereign, having killed " him with a Stone; but, that he had died rather of " Vexation, than of the Wound: That he would deliver " them his Body, to be buried according to their Man- " ner; bidding them not contend any longer, for that " God, who was juſt, would deſtroy that City by his " Hands." They anſwered, " They had a Command- " er, and would have no more to do with *Motezuma*, " dead or alive," with other ſuch inſolent Expreſſions. *Cortes* turned his Back upon them, and ordered thoſe great Men that had attended him to carry out the Body, that they might ſee he died by the Blow of the Stone. As ſoon as it was out of the Houſe, an *Indian* richly clad, ran up to him, making ugly Faces, without ſpeaking, as if he had aſked whoſe Body that was, and being told it was *Motezuma*'s, he made Signs to have it carried back to the *Spaniards*, and then ran to his own Party. Thoſe that carried him vaniſhed on a ſudden, and the *Spaniards* heard no more of him, but ſuppoſed he had been buried in the Wood of *Chapultepeque*, becauſe great Lamentations were heard there.

It is conceived that theſe were the greater, becauſe they intended, by this Ceremony, not only to pay the Funeral Honours due to their deceaſed Sovereign, but in ſome Meaſure, alſo to expiate the Crime of which they had been guilty in taking away his Life; for the new World afforded no Nation ſo barbarous, as not to account it a moſt infamous Wickedneſs, for Men to embrue their Hands in the Blood of their lawful Prince. This *Motezuma* was the ſecond of his Name, and the eleventh in the Order of the *Mexican* Emperors; he was, before his Acceſſion to the Imperial Dignity, accounted one of the braveſt Men, as well as one of the beſt Officers in the Territories of *Mexico*, having fought nine Battles, and obtained in each the Victory; he was dreaded by his own People, but eſteemed and beloved by the *Spaniards*, for whom he had a ſingular and very extraordinary Affection.

He left ſeveral Children; two of his Sons who accompanied him in his Confinement were killed by the *Mexicans*. When *Cortes* made his Retreat, he had two others, with three Daughters, which Ladies were afterwards converted, and married to *Spaniards*. But the moſt illuſtrious of all his Children, was Don *Pedro de Motezuma*, who was alſo ſoon after converted to the Catholic Religion, and had that Name given him at his Baptiſm: He was next Heir to his Father, his Mother being Princeſs of the Province of *Tula*, and one of the Queens who reſided in the Imperial Palace, with Royal Dignity; which Princeſs likewiſe followed her Son's Example, and was baptized by the Name of Donna *Maria de Niagua Suchil*, keeping up in theſe Surnames the Nobility of her Anceſtors. His Majeſty beſtowed many Favours on Don *Pedro*, giving him an Eſtate, and conſiderable Rents in *New Spain*, with the Title of Count *de Motezuma*, whoſe legitimate Succeſſion is ſtill preſerved in the Counts of that Title, with the heroic Remembrance of their royal Original.

12. The *Mexicans*, as ſoon as they had finiſhed the Funeral of their Emperor *Motezuma*, reſolved to elect a Succeſſor, under whoſe Command they might carry on the War, againſt the *Spaniards*, with Effect; and, with this View it was, that they elected *Quetlavaca*, one of their greateſt Princes, and the Second Elector in virtue of his Principality. But he dying in a few Days, they made choice, in his room, of *Gatimozin*, a Man of great Reputation in War, and who ſeemed the moſt capable of anſwering their Purpoſe. It was under his Conduct that they attacked the *Spaniards* again, with greater Fury than ever; but not with greater Succeſs, but rather the contrary.

In one of their Engagements, however, they killed a conſiderable *Spaniard*, and wounded ſeveral others, tho' with great Loſs to themſelves; the Day following, therefore, they deſired a Conference, to which *Cortes* conſented, in hopes of coming to ſome Accommodation; he went to hear their Propoſals from the Wall, and ſome of the Nobles drawing near, on the Part of the new Emperor, propoſed, “ That he and his People ſhould prepare to ſet out and direct their March to the Sea-ſide, “ aſſuring him, There ſhould be a Ceſſation for as “ much Time as was neceſſary for him to make ready “ for his Departure; adding, that, if he did not de“termine to come to that Reſolution, he might depend “ upon it that both himſelf, and all who were with him, “ ſhould periſh: For that they were now convinced that “ the *Spaniards* were not immortal; and that, tho' the “ Death of every *Spaniard* ſhould coſt them the Lives “ of twenty thouſand Men, there would ſtill remain a “ Multitude to celebrate the concluſive Victory.” *Cortes* anſwered, “ That the *Spaniards* never pretended to be “ immortal, but valued themſelves upon being Men of “ Valour, and knew themſelves to be ſo far ſuperior, in “ every Reſpect, to the *Mexicans*, that, without any “ greater Force than what he then had with him, he had “ Courage enough to undertake the total Deſtruction, “ not only of their City, but of the whole Empire. But “ that, being moved at the Calamities they had ſuffered, “ he was determined to depart, ſince the Subject of his “ Embaſſy, and all the Buſineſs he had there, was at an “ End, by the Death of the great *Motezuma*, whoſe “ Friendſhip had detained him at *Mexico*; and that he “ would put his Deſign in execution, without the leaſt “ Delay, as ſoon as ſome Articles, which were neceſſary “ for his March, ſhould be mutually agreed on.” The Deputies gave Signs of being well ſatisfied; but theſe Overtures of Peace were made with perfidious Views.

This new Emperor had called a Council of his Miniſters and Grandees, in which it was reſolved, That, to avoid the Damage they received from the *Spaniſh* Arms, the Slaughter of their People, and the Ruin of their City, the beſt Method would be, to keep them cloſe blocked up, in order to diſtreſs them by Famine, and to weaken them, that when they were diſpirited and wanted Strength, they might attack them with more Advantage. Having invented this new Way of reducing an Enemy, till then utterly unknown amongſt their Stratagems of War, it was reſolved to make Overtures of Peace, in order to obtain the Suſpenſion of Arms they deſired; flattering themſelves that they might be able to protract the Treaty till the ſmall Reſerve of Proviſions, laid up in their Quarters, were conſumed; to which Purpoſe all poſſible Care ſhould be taken to hinder the Beſieged from Relief; to block up, with Works, and Bodies of Men poſted at a proper Diſtance, all the Ways by which they might attempt to make their Eſcape, and to break down the Bridge at the Entrance of the Cauſway which led to the Road of *Vera Cruz*; thinking it no longer convenient to ſuffer them to depart the City, left at this Juncture, when the Provinces were ill ſatisfied with the preſent Government, they might excite the Malcontents to a Rebellion, or reinforce themſelves by an Army of *Tlaſcalans*. Some of the Aſſembly called to mind ſeveral Perſons of great Diſtinction Priſoners in the *Spaniſh* Quarters; reflecting upon what they muſt ſuffer, ſince of neceſſity they muſt periſh with Hunger before the Calamity could affect the Enemy. But they were all ſo zealous for the public Cauſe that they unanimouſly voted, that thoſe Priſoners would be happy, and diſcharged their Duty if they ſacrificed their Lives for the Benefit of their Country; and it is not unlikely that they fared the worſe on account of *Motezuma*'s three Sons, who were with them, and whoſe Deaths would be no way unwelcome to the Aſſembly, the Eldeſt being a hopeful young Prince, capable of wearing the Crown, highly eſteemed by the People, and the only Perſon of whom the new Emperor had reaſon to be jealous. Their only Concern was for the chief of their idolatrous Prieſts, who was likewiſe in the ſame Priſon, for he was univerſally reverenced as the ſecond Perſon in the Empire; and to produce his Liberty they made uſe of a very notable Stroke of Policy.

The ſame Deputies returned that Evening and propoſed, on the Part of their Sovereign, “ That, in order “ to prevent any Miſunderſtandings which might retard “ the Treaty, it would be proper for the *Spaniards* to “ ſend ſome one of the *Mexican* Priſoners to the Em“peror, well inſtructed on the Subject of the Capitula“tion.” This Expedient ſeemed reaſonable; and the Deputies no ſooner found it admitted but they artfully let drop, by way of Advice, that none would be ſo proper as a certain ancient Prieſt, becauſe he was an intelligent Perſon, able to remove all Difficulties which might be ſtarted; which ſpecious and well managed Pretext ſufficed for the obtaining what they propoſed: Not that *Cortes* was ignorant of the Artifice of the Propoſal, but, conſidering of what Importance it was to ſound the Minds of thoſe People, he eſteemed it a ſmall Matter to part with a Priſoner who was troubleſome and deteſtable. Soon after the Prieſt was diſmiſſed, fully inſtructed by the General in ſome Demands relating to the March; intending afterwards, in caſe he returned, to employ him further in other Matters of greater Conſequence. But it was to no Purpoſe to wait for his Return, it being ſoon evident that there was no ſuch Deſign. The Sentinels diſcovered that the Enemy beſieged the Quarters at a greater Diſtance than they were wont, that they appeared more circumſpect than ordinary, caſting up Trenches, and other Works, to defend the Paſſage of the Canals, and that they had detached ſome Bodies of Men to the Lake, who were breaking down the Bridges of the principal Cauſway, and cutting off all Communication with the Road which leads to *Tlaſcala*, a Proceeding which fully diſcovered the Artifice of their Deſigns.

This Intelligence *Cortes* received with Concern; but, inured to overcome great Difficulties, he reaſſumed his natural Calmneſs, and, upon his firſt Reflections, which always pointed directly at the Remedy, he ordered a Bridge of Planks to be made, wherewith to cover the Opening of the Cauſway, capable of bearing the Weight of the Artillery, and ſo contrived that it might, without much Difficulty, be carried by forty Men: And, without loſing more Time than what was neceſſary for the compleating of this Work, he aſſembled his Captains to conſult with them, and to take their Opinion concerning the Retreat, whether it ſhould be made by Day or by Night. His Commanders differed in Opinion, but the Majority of them inclined rather to the Night, and *Cortes* yielded, or at leaſt ſeemed to yield to them, becauſe they were the Majority; but, as the greateſt Minds are not exempt from ſome Weakneſs, ſo it is ſaid that *Cortes* was in a great Meaſure influenced by the Advice of a private Man, whoſe Name was *Botello*, and who paſſed for a kind of Prophet; this Man had the Boldneſs to declare, that if they marched by Night, and without Delay, they ſhould certainly get off ſafe, but, that either himſelf or his Brother ſhould be killed. It was the Cuſtom of *Cortes* to deſpiſe his Predictions, while he liſtened to him, and to treat them as ridiculous, though he ſuffered them to make an Impreſſion upon him, in which, if Company could be any excuſe, *Cortes* might have pleaded the Examples of others, as great Heroes as himſelf.

13. This Reſolution of retiring being thus taken in the Morning, it was farther agreed, to execute it immediately, and to take the Opportunity of the ſucceeding Night. The very ſame Evening the General diſpatched another *Mexican*, as his Embaſſador, to the City, with Pretence of continuing the Treaty begun by the Prieſt, giving them to underſtand that all Things ſhould be got ready for their Departure, within eight Days, at fartheſt. *Cortes*, in the mean while, was diligently diſpoſing Matters to begin the March, the Shortneſs of the Time making every Moment precious. He diſtributed his Orders, and gave his Captains the neceſſary Inſtructions, providing againſt all Accidents which might happen upon the March, with all imaginable Precaution.

He formed his Van Guard of two hundred *Spaniſh* Soldiers, with the choiceſt of the *Tlaſcalans*, and about twenty Horſe, under the Conduct of the Captains *Sandoval*, *Azebedo*, *Ordaz*, *Lugo* and *Tapia*; he gave the Command of the Rear Guard, with a greater Number both of Horſe and Foot, to *Alverado*, *Juan Velaſquez de Leon*, and other Captains, of thoſe who came with *Narvaez*. In the main Body, or Centre, he placed the Priſoners, Artillery, and Baggage, with the reſt of his Army, reſolving himſelf to be employed as Neceſſity ſhould require, at the Head of on hundred choice Men, with the Captains *Davila*, *Olid*, and *Vaſquez de Tapia*. Things being thus diſpoſed, he made a ſhort Speech to his Soldiers, laying before them the Difficulties of the Undertaking, upon which he enlarged a little the more, becauſe it was a current Report among them, that the *Mexicans* never engaged by Night, and it was neceſſary to inſpire them with Diſtruſt, leſt they ſhould fall into over-great Security. He next cauſed all the Gold, Silver, and Jewels, which were in the Cuſtody of *Chriſtoval de Guzman*, Groom of his Chamber, to be brought into his Apartment, and out of it he ſeparated the Fifth, belonging to the King, in thoſe Things which were leaſt bulky, of which he made a formal Delivery to thoſe Officers, who had Care of the Accounts and Proviſions of the Army, giving a Mare of his own and ſome wounded Horſes for the Carriage thereof, in order to ſpare the *Indians*, who might be in other Reſpects ſerviceable upon that Occaſion.

The Remainder, according to the beſt Computation could be made, amounted to upwards of ſeven hundred thouſand Pieces of Eight, all which Wealth he left with little or no Reluctancy, proteſting publicly, "That it "was no Time to embarraſs themſelves with it, and that "would be a Shame to employ thoſe Hands ſo unwor-"thily, which ought to be left free for the Defence of "Life and Reputation." But finding the Soldiers not ſo well contented with this ineſtimable Loſs, he added, as he was going away, "That they ought not to look "upon their Retreat from thence as abandoning of that "acquired Treaſure, and their main Deſign, but as a "neceſſary and indiſpenſible Diſpoſition, in order to re-"turn with a greater Force. After the ſame Manner as "a Man draws back his Arm, in order to give the "greater Blow." And withal, gave them to underſtand, that he ſhould not think it a Crime in them to take away as much of that Wealth as they conveniently could; and though the greateſt Part of them took Care to go light, there were ſome, and particularly thoſe who came with *Narvaez*, who gave themſelves up to pillage, loading their Shoulders beyond what they were well able to bear; a Permiſſion, in which all the military Care and Circumſpection of *Cortes* ſeemed to be aſleep. It was very near Midnight when they marched out of their Quarters, without the Sentinels or Advance Guards finding any thing to give them the leaſt Suſpicion, and notwithſtanding both the Wetneſs of the Weather and the Darkneſs of the Night favoured their Intention of marching, and freed them from any Jealouſy of the Enemies continuing Abroad in their Works; they ſo punctually obſerved Silence, and Circumſpection, that Fear itſelf could not have wrought what Diſcipline did in thoſe Soldiers; the portable Bridge went with the Van Guard, and thoſe who had the Charge of it, laid it over the firſt Canal, but the Weight of the Horſes and the Artillery made it ſtick ſo faſt in the Stones which ſupported it, that they could, by no Means, remove it to the other Canals, as they deſigned, nor had they indeed an Opportunity to do it, for before the Army had paſſed the firſt Breach of the Cauſway, they were obliged to take to their Arms, with the greateſt Precipitation, finding themſelves aſſaulted on every Side, when they leaſt of all ſuſpected any ſuch Matter.

The Addreſs with which thoſe Barbarians diſpoſed their Enterprize was worthy Admiration. They obſerved with a ſtill and ſilent Vigilance the Motions of the *Spaniards*. They aſſembled and diſtributed, without Noiſe, the Multitude of their Troops. They took Advantage of the Silence and Darkneſs of the Night, to compaſs their Intention of drawing near without being diſcovered. They covered the whole Length of the Lake on each Side of the Cauſway, with armed Canoes, beginning the Attack with ſo little Confuſion, and ſuch excellent Order, that the *Spaniards* heard their Shouts, and the warlike Sound of their Shells, almoſt at the ſame Time that they felt their Arrows. The whole Army had undoubtedly been deſtroyed, if the *Indians* had obſerved the ſame good Order in the Heat of the Engagement, as in the Beginning of the Attack; but to them Diſcipline was a Reſtraint, and when once they began to be enraged, Cuſtom prevailed. They charged in Heaps where they perceived the Bulk of the Army, preſſing upon each other after ſuch a Manner that their Canoes were broke to Pieces by ſtriking on the Cauſway, and the Violence of thoſe who were furiouſly endeavouring to advance, proved a new Danger to thoſe who were foremoſt.

The *Spaniards* made terrible Deſtruction among the naked Multitude, but they had not Strength ſufficient to hold out ſuch inceſſant Exerciſe of their Swords and Spears, nor was it long before they found themſelves likewiſe attacked in Front, and were obliged to turn their Faces where the Danger grew moſt preſſing; for the *Indians*, who were at a Diſtance, or who could not bear the Tedìouſneſs of the Oars, flung themſelves into the Water, and by the Help of their Arms and natural Agility, climbed up the Cauſway, in ſuch Numbers, that they were not able to make uſe of their Weapons; and this new Aſſault proved a Relief to the *Spaniards*, for the *Mexicans* were eaſily routed, and all of them in a Manner being killed, their Bodies were ſufficient to fill up the Canal, with no other Trouble than the flinging them in, where they ſerved to ſupply the want of a Bridge, for the Army to paſs over. After this Manner, ſome Writers relate it, though others ſay, that they luckily found a Beam of ſufficient Breadth, which the Enemy had left whole in the ſecond Bridge, on which the Soldiers paſſed over in Files, guiding the Horſes through the Water by the Bridles.

14. *Cortes* paſſed with the firſt Body of his People, and, ordering *Juan de Xarmillo* to take Care to form the Men as faſt as they arrived, he returned, without Delay, to the Cauſway, with the Captains *Sandoval*, *Olid*, *Davila*, *de Morla* and *Dominguez*: He entered the Engagement, animating thoſe who fought as well by his Preſence as by his Example; he reinforced his Troop, with as many Soldiers as he thought neceſſary to ſtop the Enemy on both Sides of the Cauſway, and ordered the reſt to file off from the Centre, cauſing the Artillery to be thrown into the Water, to free the Paſſage, and facilitate the March. *Cortes* at laſt retired, with all he could pick up of the Rear-Guard, and as he was penetrating through the ſecond Space of the Cauſway, with little or no Oppoſition, he was joined by *Alverado*, who owed his Life to little leſs than a Miracle of Reſolution; for having found himſelf cloſely beſet on every Side, his Horſe killed under him, and one of the Canals ſtill before him in his Way, he fixed his Lance or Spear in the Bottom of the Lake, and, raiſing his Body by Force, and ſupporting his Weight in the Air, by the Strength of his Arm caſt himſelf on the other Side; a ſurprizing bold Action, which has ſince been looked upon as ſomething ſurpaſſing Nature; and *Alverado* himſelf, when he afterwards reflected upon the Diſtance, and the Succeſs he had met with in the Attempt, eaſily became ſenſible of the Diſproportion there was between the Fact itſelf, and the Feaſibility of it.

The Army gained the firm Land by the firſt Appearance of the Day, and halted near *Tabuca*, not without ſome Jealouſy of that Town, which was very populous, and in the Intereſt of the *Mexicans*, but they took Care not immediately to quit the Neighbourhood of the Lake, that they might give Time to thoſe who could eſcape from the Battle to ſave themſelves; nor was that Precaution unneceſſary; for ſeveral *Spaniards* and *Tlaſcalans* found the Advantage of that Stop, who, by their Valour and good Management, got off by ſwimming to the Shore, where they hid themſelves in the Fields of Maize in the Morning. Theſe gave the General an Account that the laſt Diviſion of the Rear-Guard was entirely cut off; and *Cortes* having drawn up his Troops, found that he had loſt about two hundred *Spaniards*, more than one thouſand *Tlaſcalans*, forty-ſix Horſes, and all the *Mexican* Priſoners, which laſt not being able to make themſelves known in the Confuſion and Obſcurity of the Night, were treated as Enemies by thoſe of their own Nation: The *Spaniards* were fatigued and diſcouraged, their Numbers diminiſhed, and the Artillery all loſt, expecting every Moment to be attacked, and the Place of their Retreat far off; and among ſo many Motives of Concern, their Misfortune received a great Addition, by the Loſs of ſome principal Captains, in which Number, thoſe of the greateſt Note were *Amador de Larez*, *Franciſco de Morla*, and *Franciſco de Salcedo*, who loſt their Lives, all diſcharging their Duties with extraordinary Valour. *Juan Velaſquez de Leon*, who retreated in the very laſt of the Rear-Guard, likewiſe loſt his Life, oppreſſed by Multitudes, after having endured incredible Fatigue, ſhewing an invincible Courage, even to the lateſt Gaſp; a Loſs which was generally lamented, for all Men reſpected him, as the ſecond Perſon in the Army.

Cortes ſat down upon a Stone to reſt himſelf a little, while his Officers were putting the Troops in order, and diſpoſing them, to proſecute their March. He found himſelf ſo oppreſſed with Concern, that he never more ſtood in Need of all his Magnanimity to temper his Grief. He ſummoned all his Conſtancy to his Aſſiſtance; and, at the ſame Time he gave his Orders, animated his People, and exerted himſelf with his wonted Alacrity. He enquired for the Aſtrologer, either in order to reprimand him for the Part he had in haſtening the March, or to divert his Melancholy, by rallying him upon his Science; but he was told, he was killed in the firſt Aſſault, off the Cauſway; that Wretch having met with the Fate common to thoſe of his Profeſſion. But, in the midſt of thoſe Misfortunes, it was no ſmall Conſolation to *Cortes*, and the whole Army, that Donna *Marina* and *Hieronimo de Aguilar* had found Means to eſcape from the Battle, in the terrible Confuſion of that Night: They being the principal Inſtruments of the Conqueſt, and no leſs neceſſary than they had been before; for without them it was altogether impoſſible to engage the Friendſhip of the Nations they were going to ſeek; nor was it leſs happy, that the *Mexicans* did not follow the Chace, for they gave Time for the *Spaniards* to breathe after their Fatigue, and to march in better Order, and with leſs Haſte, mounting the diſabled Men on the ſtrongeſt of their Horſes. This Stop of the *Mexicans* proceeded from an unexpected Accident, which may be attributed to the Providence of God. The Sons of *Motezuma* who had attended on their Father, during his Continuance in Quarters, together with all the *Mexican* Priſoners, who were laſt under Convoy, with the Baggage, were unfortunately killed by the Enemy; and in the Morning, the *Indians* allured by the Spoils of the Dead, beheld pierced through with their own Arrows the Bodies of thoſe unhappy Princes, whom they reverenced with that kind of Adoration they once did their deceaſed Father. They ſtood amazed, ſtupified, and confounded at the Sight, without daring to pronounce the Cauſe of their Aſtoniſhment. However, it was not long before the News was carried through the Troops, and they were all ſeized with Fear, and that kind of ſudden Terror, which the Antients called Panic.

The *Mexican* Chiefs reſolved to ſend an Account of this Accident to the new Emperor; and he, who was forced to affect a Concern, out of Compliance with thoſe whoſe Grief was unfeigned, commanded the Army to halt: Beginning the Ceremony of the Funeral with Outcries and Lamentations, which uſed to precede the Obſequies, whilſt the Prieſt, followed by all who had remained in the City, came to receive their Royal Bodies, in order to conduct them to the burying Place of their Anceſtors. It was to the Death of thoſe Princes, that the *Spaniards* were indebted for the firſt Recovery from their Confuſion, and that ſeaſonable Reſpite; but they lamented, notwithſtanding, their untimely Fate, and particularly *Cortes*, who loved thoſe Princes, reſpected in them the Memory of their Father, and had founded Part of his Hopes in the Right of the Elder. *Cortes*, in the mean while, directed his March towards *Tlaſcala*, with Guides of that Nation, his Army continually in Order of Battle, as not being without Suſpicion of ſome Deſign in the Enemies Delay; and upon ſuch Occaſions Diffidence is oftener attended with Succeſs than too confident Security. It was not long before ſome Corps of armed *Indians* appeared, who followed the Army, without approaching within Shot. Theſe were the Inhabitants of *Tabuca*, *Eſcapugaleo*, and *Tenecuga*, whom the *Mexicans* had ſummoned, to obſerve the Motions of the *Spaniards* on the March, till ſuch Time as they had diſcharged themſelves of their Duty towards the Sons of *Motezuma*. *Cortes* extended his Front, where he poſted his Fire-Arms and Croſs-Bows, being obliged to engage in the open Field, without having any Place of Security to retire to.

As many of the *Indians*, as had Courage enough to venture near, died without Diſcouragement to the reſt. The Horſe ſallied out to ſkirmiſh, and made a very great Slaughter; but the Number of the Enemy continually increaſed, and their Arrows and Slings did conſiderable Damage; the *Spaniards* were tired, and without Hopes of repulſing that enormous Multitude, and now their Valour began to ſlacken for want of Strength; when *Cortes*, who behaved himſelf in the Battle like a Soldier, without forgetting the Duty of a General, obſerved a Riſing ground at no great

Diſtance from thence, which commanded the whole Plain; upon the Top of that Eminence was a Building which appeared like a Fortreſs, or at leaſt the Exigence in which he found himſelf made him fancy it ſuch: He reſolved to poſſeſs himſelf of that Poſt, for the Advantage of its Situation, and, detaching a Party of Men to reconnoitre it, he moved with the Army to gain it, which he did not find could be effected without Difficulty, being obliged to face the Enemy all the while aſcending the Hill, and to place ſome Companies of Harquebuſſiers, to defend the Avenues; but he happily compaſſed his Deſign, poſſeſſing himſelf of the Tower without Reſiſtance, and in that found all the Convenience which at that time he could deſire. It was a Temple; but the Prieſts and Servants who attended the Worſhip of that Place had quitted it, flying from the Neighbourhood of War, as People of a different Profeſſion; the Court of this Temple was encompaſſed with a Wall after their Manner of building, which, together with the Towers wherewith it was flanked, rendered it tolerably defenſible; and under the Shelter of thoſe Works the *Spaniards* began to breathe.

The Enemy did not dare to ſcale the Hill, nor did they give any Signs of their intending an Aſſault, but they approached within Muſket-ſhot, ſurrounded the Eminence on all Parts, and made ſome Advances to ſhoot their Arrows. In the mean time nothing was to be heard but barbarous Shouts and Menaces, which ſerved only to diſcover their Weakneſs. They were kept off till Evening began to approach, at which time they all retired; whether to comply with the Obſervation of their Cuſtom, of retiring with the Sun, or that they found themſelves fatigued with having been in a manner continually engaged, is uncertain. *Cortes* diſpoſed every thing in his Quarters with all the Care and Circumſpection that a Poſt ſo threatened obliged him; he ordered the Guards and Sentinels to be ſooner relieved than ordinary; that all might have their equal Share of Reſt: They made ſome Fires, as well becauſe of the Coldneſs of the Seaſon, as to conſume the Arrows of the *Mexicans*, to deprive the Enemies of their Ammunition. He gave ſome Refreſhment to the People out of the Proviſions found in the Temple, and what the *Indians* had ſaved with the Baggage; particular Care was taken of the Wounded, which was attended with no ſmall Difficulty in a Place where all Neceſſaries were wanting.

Cortes attended in Perſon to all, but ſtill without forgetting the Danger to which he lay expoſed; and before he would retire to Repoſe he aſſembled his Officers, to conſult with them what was to be done in this Juncture: He had already formed his Reſolution, but he always declined poſitively deciding in ſuch Matters; and he was a great Maſter in bringing People over to what was reaſonable, without ſhewing his own Opinion, or making Uſe of his Authority: He propoſed different Methods which might be taken, with the ſeveral Inconveniencies attending each of them; leaving them to judge which Expedient was moſt adviſeable; but that which he judged beſt was, to continue the March ſo as to be out of Reach of the Enemy before they renewed the Attack: In ſupport of which Advice he advanced many Reaſons: He had ſcarce finiſhed his Diſcourſe when all the Captains agreed that no other Reſolution was practicable; and it was determined to begin their March at Midnight. *Cortes* conformed to what was really his own Opinion, though he treated it as the Opinion of others, a Policy which he was accuſtomed to make Uſe of, in order to prevent Diſputes when the Affair was urgent and admitted of no Delay, and which only thoſe can practiſe who underſtand the Art of deciding by aſking Advice, and of making a Propoſal in ſuch a manner as to leave no room for Objection. As we have now conducted *Cortes* and his Army out of *Mexico*, and have ſeen with how much Prudence and Diſcretion he managed every thing when Fortune ſeemed to deſert him, it ſeems but reaſonable to put an End here to this Section, and to reſerve the Reſtoration of his Fortunes, and the Recovery of his Conqueſts, to the next.

15. But, that we may not proceed too haſtily, let us pauſe a Moment, in order to conſider the great Events we have been reading, and from thence form a true Judgment of the Merit of this illuſtrious Conqueror. We have in the former Section ſhewn, that with a meer handful of Men, he undertook to conquer one of the moſt extenſive Empires the World ever ſaw; and to which no Power, now ſubſiſting, can be eſteemed equal. We have ſeen that this could not be called a raſh or improvident Action, though it was, certainly, one of the boldeſt and moſt daring, that ever entered the Breaſt of Man. As a Perſon ſkilled in Mechanics, may, with good Senſe and great Reaſon, undertake to perform, with an inconſiderable Force, what, to a Perſon unacquainted with that Science, would be eſteemed beyond the Reach of Nature; ſo the Vigour of this Man's Underſtanding, his incomparable Sagacity, and wonderful Penetration, enabled him to foreſee moſt of the Events that did fall out; and to contrive the proper Means for converting them to his Purpoſe, as his Fortitude, Preſence of Mind, and happy Equality of Temper, put it always in his Power to exert his ſuperior Abilities upon all Occaſions, and ſet him above the Reach of Accident or Danger, however great or unexpected. We have ſeen him in this Section, performing things almoſt incredible; and ſome of them alſo, particularly the ſeizing and impriſoning *Motezuma*, not altogether juſtifiable. But this is ſo far from being a new Thing in a Hero, that I believe it may be fairly ſaid, there is ſcarce a Character of this kind in ancient or modern Hiſtory, in which more immoral and more outrageous Actions do not frequently occur.

One Thing more I ſhall remark before I proceed in this Hiſtory, becauſe it ſeems to do more Honour to the Courage and Conduct of *Cortes*, than any thing elſe; and in few Words it is this: The only Shadow of an Objection that can be raiſed againſt the Praiſes that have been beſtowed upon this illuſtrious Perſon, ariſes from the Suggeſtion that he acted with regular and well diſciplined Troops, againſt a barbarous and uncivilized People, unſkilled in the Art or Policy of War: But the Meaſures taken by the *Indians*, to drive him out of *Mexico*, and the Manner in which they acted in the Execution of thoſe Meaſures, very plainly prove that this Suggeſtion was ill grounded. Since, from thence, we plainly ſee that they neither wanted Skill as Politicians, nor were deſtitute of Diſcipline as Soldiers. The Succeſs likewiſe that they met with in the Conduct of their Scheme, plainly demonſtrates, That if they had been to deal with a Man of leſs Abilities than *Cortes*, they would effectually have carried their Point, and have driven the *Spaniards*, not only out of *Mexico*, but out of all their Dominions, and have preſerved their Empire, perhaps, till this time; for, had they once acquired a thorough Knowledge of the Artillery and Powder, they were certainly ingenious enough to have acquired the Uſe of them; which if they had done, there is no Reaſon to doubt that they would have kept their Ground, and have preſerved, at leaſt, the interior Part of their Country; though, by dint of their Naval Power, the *Spaniards* had made themſelves Maſters of their Coaſts.

SECTION XIII.

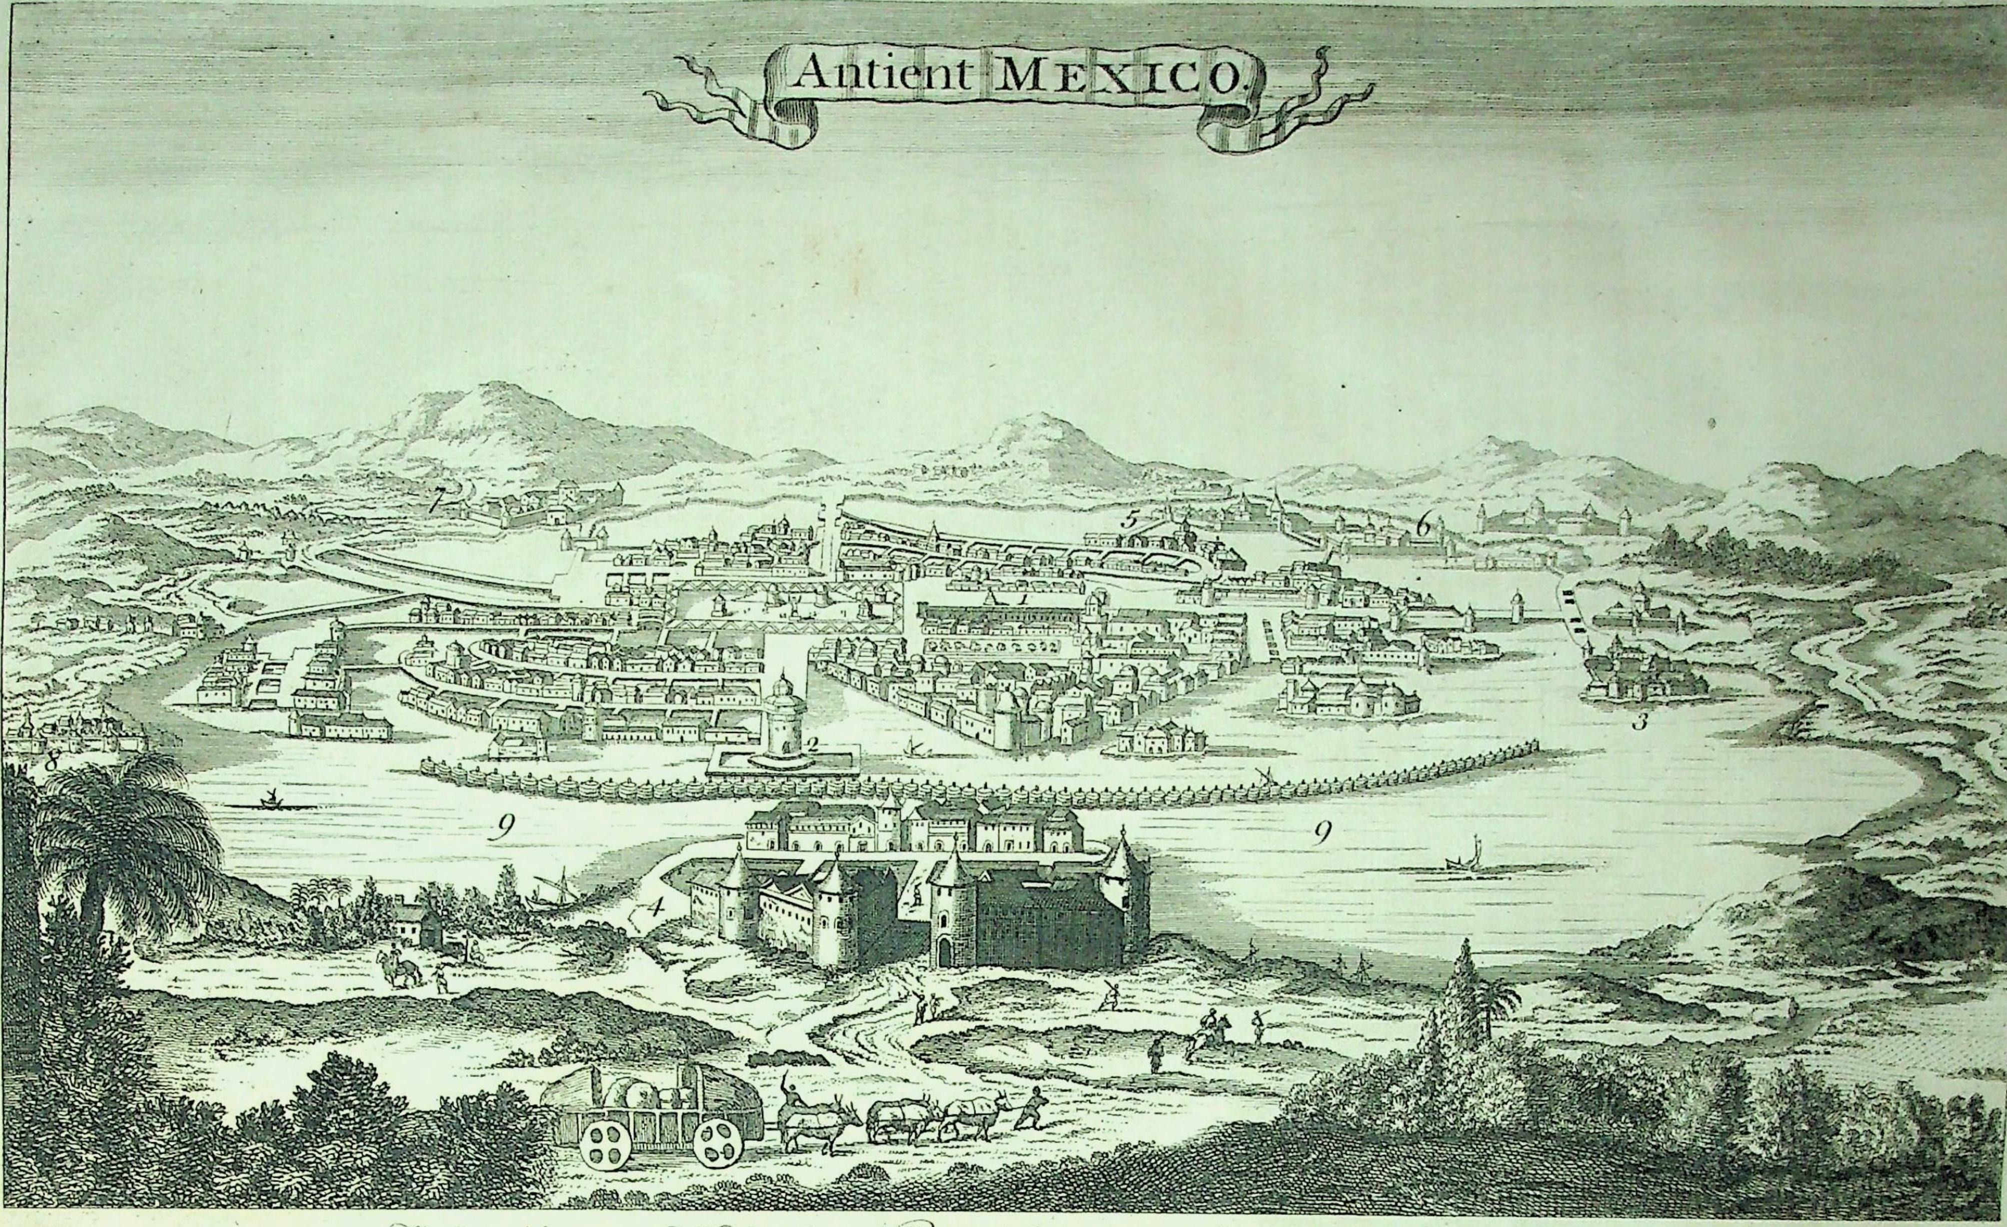
The Concluſion of HERNAN CORTES's *Expedition, including the Hiſtory of the remaining Part of the War, to the Reduction of the City and Empire of* Mexico; *by which the* Spaniards *acquired their extenſive Dominions on the Continent of* North America.

1. *The* Spaniards *continue their Rtreat under freſh Difficulties, while the* Indians *labour to intercept and bring them to a general Engagement.* 2. *The whole Force of the* Mexican *Empire defeated in the famous Battle of* Otumba, *and the Imperial Standard taken.* 3. *The Precautions taken by* Cortes *to improve this Victory, and to prevent the bad Effects of a Mutiny that had like to have broken out among his People.* 4. *The* Mexicans *ſend an Embaſſy to* Tlaſcala, *in hopes of gaining that Republic; in which they are diſappointed by the Interpoſition of ſuch Lords as were Friends to the* Spaniards. 5. *The War renewed with great Succeſs, and a new Colony founded by the* Spaniards *on the Frontiers.* 6. *The Meaſures taken by* Cortes *for the Proſecution of the War, the bad Diſpoſition of the Army, and the Difficulties which he found in keeping the Troops from running into a general Mutiny.* 7. *He receives, very unexpectedly, very conſiderable Succours from* Spain, *which encourages him to think of recovering* Mexico. 8. *He is ſo fortunate as to obtain ſtill larger Reinforcements, but is obliged to diſcharge Part of his Army, on Account of their ſeditious Behaviour.* 9. *While Preparations were making for a new Expedition,* Cortes *reſolves to ſend over freſh Agents to* Spain, *in order to procure a Commiſſion from the Emperor.* 10. *An Account of what happened at Court upon the former Application, by the Father of* Cortes *and his firſt Agents, and of the timely Arrival of the ſecond.* 11. *The Hiſtory of this Matter farther continued, to the obtaining a Declaration of Council in favour of* Cortes, *againſt* Velaſquez. 12. *An Account of his memorable Expedition into the Province of* Tezcuco, *which ſubmits without a Stroke.* 13. *The War with* Mexico *renewed by* Cortes, *with great Danger to his Army and to himſelf.* 14. *Upon a Foreſight of the Difficulties that might attend the War, he makes Propoſals of Peace to the* Mexican *Emperor, which are haughtily rejected.* 15. *The War breaks out afreſh, and* Cortes *gains ſeveral Victories over the* Mexicans. 16. *The* Indians *are defeated in a general Engagement, in which, however,* Cortes *runs a great Hazard of being killed or taken.* 17. *A Conſpiracy formed among the* Spaniards *to murder him, and a Sedition amongſt the Allies.* 18. Cortes *ventures to attack three Cauſways of the City of* Mexico *at once, and at the ſame Time carries on the War upon the Lake.* 19. *The Progreſs of the War, and the unexpected Difficulties the* Spaniards *met with therein.* 20. Cortes *makes a general Attack, in which, after an obſtinate Engagement, he is defeated.* 21. *The* Spaniſh *Priſoners are ſacrificed to the* Indian *Idols, and all their Affairs ſurprizingly decline.* 22. Cortes *renews the Attack, and forces the* Indian *Emperor to retire to the fartheſt Part of the City.* 23. *The Emperor,* Guatimozin, *Succeſſor to* Motezuma, *is taken Priſoner, after which the City immediately ſurrenders.* 24. *A ſuccinct Account of the Reduction of the whole* Mexican *Empire, and of Rewards beſtowed upon* Hernan Cortes. 25. *Obſervations and Remarks upon this and ſome of the foregoing Sections.*

1. A Little before the appointed Hour, the Troops were aſſembled: The Order to march, and the Reaſon for ſo doing, was given at the ſame time, upon which they prepared for ſetting out, applauding the Reſolution. *Cortes* ordered to conceal their Motion, that they ſhould leave all their Fires burning, and, giving to *Diego de Ordaz* the Charge of the Van-Guard, with ſome intelligent Guides, he placed his chief Strength in the Rear, where he remained, that he might be the nearer Danger, and be a Security to thoſe who paſſed before. They ſet forward with all neceſſary Caution; and, the Guides being ordered to keep at ſome convenient Diſtance from the high Road till the Morning, they marched, little more than half a League, without the Silence of the Night being interrupted by the leaſt Noiſe: But, upon their entering into a broken and hilly Ground, the Scouts fell into an Ambuſh; divers Troops of *Indians* came pouring down from the Eminences, and ruſhing from among the Buſhes, without Order, attacked the Flank; and though not ſo numerous as to oblige the Army to halt, yet the *Spaniards* were obliged to beat off ſuch of the Enemy as ventured neareſt, to break through ſeveral Ambuſcades, and to diſpute many narrow Paſſes.

The *Spaniards* were apprehenſive, at firſt, that it was the whole Army which they had left on the other Side of the Temple, and ſome report this Action as a Purſuit made by thoſe *Mexicans*; but they were the Militia of the neighbouring Towns; who, by Orders received from Court, endeavoured to diſturb the March, poſting themſelves in the broken Parts of the Road. With this kind of Oppoſition the Army advanced two Leagues, and before Day halted in another Temple, ſituate upon an Eminence, not altogether ſo high as the former, but of ſufficient Height to view the Country round about; that by the Number of Enemies they ſhould diſcover, they might judge what Meaſures were fitteſt to be taken for their Security. The *Indian* Peaſants continued their Shouts, following at a Diſtance, till, having advanced about two Leagues farther, they diſcovered a Village advantageouſly ſituated, and as they believed well peopled. *Cortes* pitched upon this Place for his Quarters, and gave Orders for his Troops to poſſeſs themſelves of it; and they found it wholly forſaken by the Inhabitants, together with ſome Proviſions, which they could not carry off; and which, at that Juncture, were very welcome. Here the Army ſtayed a Day or two; the Condition of the Wounded being ſuch, that they could not proceed. They made two Marches more, through a Country more rocky and barren, always out of the great Road, and ſomewhat doubtful whether their Guides were right. They had no Cover in the Night, nor did the Perſecution of thoſe *Indians* ceaſe, who continually kept in Sight; or, perhaps, they might be others who came out after the firſt, in order to follow them through their reſpective Diſtricts. But the greateſt of all Inconveniencies was, they ſuffered Hunger and Thirſt to that Degree, that they wanted little of being quite diſpirited. The Officers and Soldiers, however, animating each other to move on.

They were forced to have recourſe to the Herbs and Roots of the Field for Suſtenance, without examining whether they were venomous; though ſuch as were the moſt prudent governed themſelves by the Knowledge and Example of the *Tlaſcalans*. One of the wounded Horſes died, and the Want they had of that Creature's Service in the Army, was forgot with Joy; for it was divided as a Regale among thoſe who were in the greateſt Extremity, who celebrated the Feaſt by inviting their beſt Friends to partake of that dainty Food: A reliſhing Banquet at that time, at which all Scruples of Stomach gave way to Neceſſity. The laſt of theſe two Marches terminated



Antient MEXICO.

1 The Great Square. 2 The Temple. 3 Village of Iztapalapa. 4 Defence of the Royal Palace.
5. 6 The Pleasure House & Garden. 7 A Rivulet to supply y^e City. 8 Village of Tesqua or Tescuco, 9 The Great Lake.

terminated in a little Village, whoſe Inhabitants, without abandoning their Dwellings, like the others, gave them free Entrance, neither were they wanting in their Aſſiſtance to them, with a ſeeming Chearfulneſs in every thing they were ordered; which unexpected Entertainment was a new Stratagem of the *Mexicans*, that their Enemies might come leſs prepared to the Snare which they had provided for them.

Theſe People freely ſhewed their Stores of Proviſion, and, from other neighbouring Villages, procured what was ſufficient to make the fatigued *Spaniards* forget their paſt Sufferings. Early in the Morning the Army was diſpoſed to aſcend the Mountain, which on the other Side declined into the Valley of *Otumba*, through which they muſt of Neceſſity paſs to take the Road to *Tlaſcala*. They obſerved ſome Alteration in the *Indians* who followed their March; for their Shouts and Scoffs expreſs rather Satisfaction than Indignation; and Donna *Marina* took notice, that they frequently ſaid, Go on Tyrants, go on, for you will quickly arrive at the Place where you will all periſh. Theſe Expreſſions gave them Occaſion to reflect; ſome began to doubt that theſe *Indians*, confiding in the *Tlaſcalans*, rejoiced at the Dangers to which the *Spaniards* were marching, as having received ſome Notice that there had happened a Change in the Fidelity of that Nation. But *Cortes*, and thoſe of better Judgment and Penetration, looked upon this Novelty as a Token of ſome Ambuſh, that was nearer than *Tlaſcala*; for there wanted not Examples of the Simplicity and Eaſineſs with which the *Indians* were wont to publiſh the very thing which they endeavoured to conceal: An Error not peculiar to this People, and though a certain Indication of Levity, no direct Mark of Barbariſm.

2. They continued their March diſpoſed for freſh Action; when the advanced Guard, having reached the Mountain Top, came with an Account that the Enemy had poſſeſſed themſelves of all the Valley, barring up the Paſſage to the Road whither they were directing their Courſe with a formidable Multitude. It was the ſame Body of *Mexicans* which they had left at the firſt Temple, reinforced with new Troops, who had diſcovered, in the Morning, the ſudden Retreat of the *Spaniards*; and, notwithſtanding they did not doubt but that they ſhould be able to overtake them, yet they feared, by the Experience of the Night, that it would not be poſſible to deſtroy them before they reached the *Tlaſcalan* Territories, if they went on ſecuring Mountains; for which Reaſon they ſent Diſpatches to *Mexico* for Reinforcements, that an Affair of ſo much Importance might not miſcarry for want of neceſſary Force, which Propoſal was ſo well received in the City, that all the Nobility inſtantly ſet out, followed by the reſt of the Troops which they had aſſembled, to join the Army, and in the Space of three or four Days they divided themſelves into different Roads, marching under Shelter of the Mountains, with ſuch Expedition, that they got before the *Spaniards*, and filled the whole Valley of *Otumba*, which is a very ſpacious Plain, where they might undiſcovered wait for their Enemies, and attack them without embarraſſing each other for want of Room.

The Captain General of the Empire was diſtinguiſhed in the Centre of the Multitude, borne up upon Mens Shoulders in a Litter ſumptuouſly adorned, in ſuch a Manner, that being a Witneſs of every one's Behaviour, his Orders might be punctually executed. Upon this Chair, or Litter, ſtood erect the Royal Standard of *Mexico*, which was not intruſted into any other Hand but his, and could only be brought into the Field in Caſes of the greateſt Exigence. This Standard was a Net of maſſy Gold hanging on a Pike, and crowned with a Plume of Feathers of various Colours; both the one and the other myſteriouſly denoting a Superiority. The *Spaniſh* Army perceiving the freſh Danger for which they were to prepare, *Cortes* began to examine the Countenances of his People, with that natural Fire in his Look, which influenced their Hearts far better than Words; and finding them inſpired with a generous Reſentment, he thus addreſſed them: “Our Caſe is now ſuch, that “we muſt either die or conquer: The Cauſe of our “God fights for us;” nor had he time to ſay any more, for the Soldiers themſelves interrupted, crying out for the Word of Command; and he advanced with his Front extended, and united the Body of the Army with the Wings of the Horſe, who were appointed to defend the Flanks, and ſecure the Rear. The Fire-Arms and Croſs-Bows made their firſt Diſcharge ſo opportunely, that the Enemy had ſcarce time to make uſe of their miſſive Weapons. The Swords and Lances did ſtill greater Damage; the Horſe taking care, at the ſame time, to break, and to put to Flight thoſe Troops which endeavoured to incloſe the *Spaniſh* Army.

They gained ſome Ground by the firſt Charge. The *Spaniards* gave no Stroke without a Wound, nor any Wound which needed a ſecond Blow. The *Tlaſcalans* threw themſelves into the thickeſt of the Battle, with an infinite Thirſt after *Mexican* Blood, and all had ſuch Command of their Paſſions, that they killed firſt thoſe who appeared to be Leaders. But the *Mexicans* fought with great Obſtinacy, advancing, though not in the beſt Order, yet, with ſurprizing Reſolution, to ſupply the Places of thoſe who fell; and the *Spaniards* were fatigued with the Slaughter, for the Battle was continually renewing with freſh Men. Their whole Army ſeemed to give way whenever the Cavalry charged them, or the Fire-Arms advanced; but they returned with new Vigour to recover their loſt Ground, the Multitude moving ſo from Place to Place, that the whole Field appeared like a Sea of Men, the perpetual Flux and Reflux ſeeming to juſtify that Compariſon.

Cortes fought on Horſeback, carrying Death and Terror wherefoever he came. But the obſtinate Reſiſtance of the *Indians* gave him no ſmall Concern; for it was not to be hoped, but that the Strength of his Men muſt abate, with ſuch unintermitting Action; and reflecting upon the Meaſures he might take, to advantage himſelf, or to make his Way to the Road, he was relieved by one of thoſe Obſervations he was accuſtomed to lay up in his Mind. He remembered to have heard among the *Mexicans*, that the whole Fortune of their Battle depended upon the Standard Royal; the gaining or loſing of which decided the Fortune of the Day, on either Side; and being not inſenſible into what Confuſion the Enemy was always put by the Charge of the Cavalry, he took a Reſolution to make an Effort, for the gaining the Imperial Standard. To this Effect, he called for the Captains *Sandoval*, *Alverado*, *Olid*, and *Davila*, to follow and ſecure his Rear, together with the reſt of the Horſe which generally attended him; and having encouraged them with a ſhort Harangue, and given the neceſſary Inſtructions how they were to proceed, he advanced, and attacked on that Part which appeared weakeſt, and leaſt diſtant from the Centre.

The *Indians* gave back, dreading the Shock of the Cavalry, and before they could recover themſelves, the *Spaniards* threw themſelves upon the diſordered Multitude, treading under Foot whole Battallions, and, without much Oppoſition, arrived at the Place where the Imperial Standard was defended by the Nobles who were appointed for its Guard; and while the Captains were diſperſing that numerous Guard, *Cortes* cloſed with the Captain General of the *Mexicans*, who at the firſt Stroke of his Lance fell, being dangerouſly wounded, on the other Side of his Litter: He was ſoon forſaken by his Guard, and left alone; when *Juan de Salamanca*, a private Gentleman, leaped from his Horſe, and put an End to the little Life he had left; and ſeizing the Standard, gave it into the Hands of *Cortes*. This *Salamanca* was a Perſon of ſome Diſtinction in the Army; and, for having done his General ſuch a Piece of Service, the Emperor conferred ſome Favours upon him, giving him for the Creſt of his Arms the Plume of Feathers which crowned the *Mexican* Standard.

The *Mexicans* no ſooner ſaw their Imperial Standard in the Power of the *Spaniards*, than they ſtruck all the reſt of their Colours, and betook themſelves to a precipitate Flight, ſeeking Shelter in the Woods and Fields of Maize. The neighbouring Mountains were covered with the terrified Remnants of the Army, and in a few

Moments the Field of Battle remained to the *Spaniards*, who purſued their Victory with all the Rigour of War, and made a terrible Deſtruction of the Fugitives; it was ſo abſolutely neceſſary to ruin and diſperſe them, that they might not return. On the Side of the *Spaniards* ſome were wounded, of which Number two or three died at *Tlaſcala*; and *Cortes*, himſelf, received a Blow on his Head, with a Stone, ſo violent, that it battered his Head-Piece, and made a ſmall Fracture in his Skull. The Spoil was given to the Soldiers, which was very conſiderable, for the *Mexicans* came with coſtly Jewels and Ornaments, as to triumph. The *Spaniſh* Authors ſay, that twenty thouſand *Indians* loſt their Lives in this Battle. A round Computation indeed! and perhaps, what is not uncommon in ſuch Caſes, a certain Number put for an uncertain.

3. The ſame Spirit which *Cortes* ſhewed in his utmoſt Difficulties, appeared in the Precautions taken by him in making the moſt of this Victory, and taking an imdiate Care for ſecuring ſuch a Poſt, as might give them time to concert what was to be done next. There appeared on the Top of a Mountain, at ſome Diſtance, a large old *Indian* Palace, which he gained. There they ſtaid that Night, and as ſoon as it was Day advanced a conſiderable Way through the Plain; then going up a ſmall Hill they found a Spring of good Water, where they halted and refreſhed themſelves, for till then they had met with very little, and that not good; they came to *Gualipa*, a Town of two thouſand Houſes, belonging to the Republic of *Tlaſcala*: The People of that Place went out to receive them, ſhewing extraordinary Compaſſion for their Sufferings; the Women wept at the Sight of them; and they were ſupplied with Neceſſaries in a moſt affectionate Manner.

Cortes bleſſed God he found ſuch Entertainment among Infidels. Thoſe People aſked why they would not believe them, when they always told them they ſhould not truſt the *Mexicans*, who were treacherous. That Day, in the Afternoon, came to them *Maxiſcatzin*, and another Lord, who was Governor of *Guaxacingo*, and, when chriſtened, called Don *John Xuarez*, and many others, as did *Xicotencatl*; but this laſt only in a Compliment. They brought much Proviſion. *Cortes* received them with Joy; but they were amazed to ſee him and ſo many others wounded. *Maxiſcatzin*, in that Aſtoniſhment, delivered himſelf very elegantly, ſaying, that ſince his Valour was ſufficient to withſtand all the *Mexican* Empire, there had been ſome Treachery in the Caſe, comforting him, and bidding him be eaſy; for, ſince he was alive, he might revenge that Injury, being among the *Tlaſcalans*, his ſincere Friends, who he promiſed ſhould aſſiſt him with all their Power; all the other Lords gave him the ſame Aſſurances, and *Cortes* returning Thanks in a moſt courteous Manner, producing the *Mexican* General's Standard and Arms, delivered the ſame to him, and gave the reſt much of the Booty taken in the Battle of *Otumba*.

The other Commanders and Soldiers, following the ſame Example of *Cortes*, diſtributed abundance of the Booty they had gained in that Fight, which was very acceptable, as being *Mexican* Trophies. Here *Cortes* was informed, that about twelve Days before, *John Juſte* and *Morla*, with about thirty *Spaniards*, had ſet out from *Gualipa*, carrying *Cortes*'s Equipage to *Mexico*; and that tho' they fought well, they were all cut off by the *Mexican* Garriſons, together with one of *Maxiſcatzin*'s Sons, who he ſent along with them, This was afterwards verified, for they found cut on a Tree. *This Way paſſed the unfortunate* John Juſte, *and his unhappy Companions, being reduced to ſuch Want of Food, that they gave a Wedge of Gold, weighing eight hundred Pieces of Eight, for a few little Cakes of* Indian *Wheat*. Thence the *Spaniſh* Army proceeded to *Tlaſcala*, and the Country being populous, the Roads were crowded with the Inhabitants coming out to ſee them. The Magiſtrates met *Cortes*, with above two hundred thouſand Men in good Order. The Women and Children went foremoſt, and wept as ſoon as they ſaw the *Spaniards*, curſing the treacherous *Mexicans*; next came the Citizens, and received them in a moſt courteous Manner. The Lords of the four Quarters took *Cortes* into the Middle of them; there was much Muſic at the Entrance into the City; he was lodged in *Maxiſcatzin*'s Houſe, who made him a great Entertainment, and in this Court there was much dancing and rejoicing.

At *Tlaſcala Cortes* found Capt. *Paez*, whom he had left there, with eighty *Spaniards*, and was glad to hear that he had been well uſed; he aſſured him, that *Maxiſcatzin* was his real Friend, and that *Xicotencatl* hated him. When he underſtood that *Maxiſcatzin* had offered *Paez* an hundred thouſand Men to march with the *Spaniards*, to his Relief, and that *Paez* excuſed himſelf, alledging, that he had obſerved his Orders, conſidering how much Service the Succour might have done him, he gave him ſome hard Words, calling him Coward; for that brave Commanders, in ſuch Perils, are not to adhere literally to Orders, but to act as Exigencies may require. *Hojeda* was the Perſon that entertained the greateſt Friendſhip with the *Tlaſcalans*, and brought Proviſions from the Country Towns; ſome reproached him, ſaying, Why come you hither to devour our Subſtance; go your Way, you come in a wretched Condition from *Mexico*, being turned out like cowardly Women. He gave them good Words; but *Cortes* was much concerned at it, being informed that *Xicotencatl* was the Occaſion of it: He acquainted *Maxiſcatzin*, who ſaid, that whilſt he lived no Man ſhould preſume to affront him; however he kept himſelf upon his Guard.

A Numbneſs ſeized his Head, occaſioned by his Wound, and, it being followed by a violent Fever, he was in much Danger; but it pleaſed God, as he was well taken care of, he recovered. Whilſt his Diſtemper held him, thoſe few *Spaniards* he had, hearing ſome ſuſpicious Words from the *Indians*, muttered that they would return to the Sea Coaſt, alledging that *Cortes*'s Contrivances to return to *Mexico* would be their Ruin, and that they were now fattening to be ſacrificed and eaten, as the *Indians* deſigned; few being of a contrary Opinion, the greater Number, with a Notary, forcibly required *Cortes* to go away to *Vera Cruz*, to avoid the Danger that threatened. *Cortes* anſwered with much Gravity and Calmneſs: In the firſt place, he extolled their paſt Actions, put them in mind of the Victories they had obtained, and the Valour of the *Spaniſh* Nation, blamed their Faint-heartedneſs, for that having made the World ring with the Fame of their Exploits they ſhould ſhew Fear, which would turn to their Shame; he promiſed them much Wealth and Proſperity; diſpelled the Fears they had conceived of the *Tlaſcalans*; ſaid, he would try their Friendſhip by making War on the *Tepeacans*, who had lately ſlain ſeveral *Spaniards*; he put them in mind, that all he had ſaid to them had proved true; that he had performed all he had promiſed, and then, in caſe the Affair of *Tepeaca* did not ſucceed, he would find ſome Expedient for them to return with Honour to *Vera Cruz*.

This appeaſed them for the preſent, but he had ſeveral Conſultations with the chief Commanders, as to the Confidence that was due to the *Tlaſcalans*: Some affirmed, that there was no truſting of them, ſo that if they took a ſmall Number of them the War would not be carried on; and if they had many, it was dangerous: Others added, that the Enmity between theſe two Nations was well known, as were the Advantages the *Tlaſcalans* reaped by the War with the *Culuas*; for which Reaſon their Fidelity was not to be called in queſtion. *Cortes* having maturely weighed this Affair, and made ſome Enquiry into the Matter, adhered to this Advice, which made him believe that his good Fortune would not forſake him in this Enterprize.

4. The *Mexicans* having offered up their Sacrifices, returned Thanks to their Gods, repaired their City, and, underſtanding how well the *Spaniards* had been received in *Tlaſcala*, reſolved to ſend ſix Men of Note Embaſſadors thither with a Preſent of Cloth, Feather-works, and Salt, which were the Things thoſe People wanted moſt. Notice being given of their coming, they were met as uſual, and the Council being aſſembled to hear them, the Eldeſt delivered his Preſent and ſaid, That as they

were Relations, ſpoke the ſame Language, and obſerved the ſame Religion, it would be convenient to put an End to the long Wars that had been between them, and that they ſhould partake of thoſe Things wherein the *Mexican* Empire abounded. And they wanted beſides other Advantages that would accrue by Peace; and therefore in order to bring that to paſs, it was proper they ſhould ſacrifice thoſe few Chriſtians, with whom their Gods were offended for many Reaſons, and who would inſult them in the ſame Manner if they did not look to themſelves. The Preſent was received, and they ſaid they would conſider of it. When the Embaſſadors were withdrawn, their Propoſals were debated: *Xicotencatl* and others ſpoke for the Confederacy; *Maxiſcatzin*, defending the *Spaniards*, adviſed them to be Friends with them, alledging the Fidelity and Honour due to Gueſts.

He extolled their Valour, aſſuring them of the ſame Advantages the *Mexicans* propoſed, and particularly inſiſted, that the Friendſhip of the *Spaniards* ought not to be ſlighted, as it might contribute to enlarge the Dominions of their Commonwealth, which they could not expect from the *Mexicans*, whoſe Ambition and Perfidiouſneſs was well known; beſides, that if once the *Spaniards* was expelled, no queſtion was to be made but that they would be greater Enemies than before, though it were only for having entertained them in *Tlaſcala*. *Xicotencatl* ſtill obſtinately inſiſted, that the *Spaniards* were ill Men; and both Sides reflecting on each other, it came to ſuch a Height, that *Maxiſcatzin* gave *Xicotencatl* a Puſh from him, and threw him down ſome Steps, telling him he was a baſe Man, and a Traitor to his Country. The *Mexicans* returned home without any other Anſwer, and reported what had happened. *Cortes* being immediately informed of all theſe Particulars returned Thanks to *Maxiſcatzin*, promiſing he would endeavour to make good all he had in his Name promiſed to the Republic. *Xicotencatl*, being ſatisfied that *Cortes* would be acquainted with what had been done in the Council, went to him and ſaid, he had tried by all Means to acquire Honour, by oppoſing him; but that ſince the Gods had made him invincible, he begged he would take him into his Favour, offering his Perſon, and deſiring he would make Trial of him in carrying on the War againſt *Tepeaca*, *Chulula* and *Guaxacingo*, ſince they had offended him in breaking the Friendſhip and Faith contracted with him, going over to the *Culuas*, and killing the *Spaniards* that were marching through that Country; beſides, that to make the War on *Mexico*, as he intended, it was proper firſt to take off their Confederates, and begin with *Tepeaca*.

Cortes embraced him, returning Thanks for his good Will, and promiſing to take ſuch Meaſures for the Service of the Republic, that it ſhould be revenged on all its Enemies. Fifty Days were now paſſed ſince *Cortes*'s Arrival at *Tlaſcala*, after his Return from *Mexico*, and *Xicotencatl* preſſed him daily, ſaying the Men were ready whenſoever he ſhould think fit. Though *Cortes* had more need to have attended his Cure than to enter on freſh Fatigues ſo ſoon; yet, for fear of loſing ſo favourable an Opportunity, underſtanding that the *Tepeacans*, and the *Mexican* Forces with them, had ſecured all the Paſſes that led to the Sea, he ſent Meſſengers to the *Tepeacans*, and to the other Towns, deſiring them to quit the Friendſhip of the *Mexicans*, and to embrace that of the *Tlaſcalans*, and he would forgive them the Injury done him by breaking their Faith, which they had engaged to him when he marched to *Tlaſcala*. They made little Account of his Offer, but reſolved to adhere to the *Mexicans*. *Cortes* ſignified the ſame to the Council of *Tlaſcala*, and they, being Enemies to the *Tepeacans*, naturally inclined to War, deſirous to pleaſe *Cortes*, who had gained all the prime Men, having ſent them many Preſents from *Mexico*, and done them much Honour; and believing that the War would be very advantageous to the Republic, offered to ſupply him with fifty thouſand Soldiers.

5. As *Cortes* found all things ſucceeded to his Mind, and that it was not only juſt, but neceſſary to chaſtiſe the Injury done by the *Tepeacans*, he began to prepare for his March. And here he firſt thought to ſend the King an Account of all that had happened; becauſe he had not done it ſince he ſet out from *Villa Rica* for *Mexico*: He told his Majeſty all his Succeſſes, as alſo his Misfortunes at *Mexico*, with all the Particulars relating to it; ſhewing all his Diſappointments to have been occaſioned by *Pamphilo de Narvaez*, who could not be brought to an Accommodation, for which Reaſon he kept him Priſoner at *Vera Cruz*; he likewiſe demanded Men and Horſes, promiſed to ſubdue that vaſt Empire with little Aſſiſtance, without Expence to the Crown; for he offered to pay for the Horſes, Arms, and Ammunition that ſhould be ſent to him: He deſired ſome Reward might be beſtowed on *Jerom de Aguilar*, the Interpreter, who did extraordinary Service; and prepared to ſend *Mendoca* with this Account, and the Value of thirty thouſand Pieces of Eight in Gold: The Alcaldes and Regidores of *Villa Rica*, who were always with *Cortes*, wrote at the ſame time. *Tepeaca* being but eight Leagues from *Tlaſcala*, the Inhabitants knew what was coming upon them, and on their Side prepared for War; but we muſt here mention what occaſioned this War; *viz.* the Affair of the *Spaniards* thoſe People deſtroyed.

The News of the great Wealth of *New Spain* being ſpread throughout the Iſlands, ſeveral *Spaniards* tranſported themſelves to *Vera Cruz*; where, about fifty or ſixty of them, joining together, ſet out for *Mexico*, by the Way of *Tepeaca*, at the Time that *Cortes* was retired to *Tlaſcala*; and all the Country having been informed that the War was declared againſt the *Spaniards* at *Mexico*, the *Tepeacans* reſolved to kill them and their Captain, whoſe Name was *Corenado*, which they actually put in Execution, and the like was done in other Parts, concluding that the *Spaniards* at *Mexico*, would be all deſtroyed, as the *Mexicans* every where reported. *Cortes* marched out of *Tlaſcala* with his *Spaniards*, and ſix thouſand *Indian* Archers, till ſuch time as the fifty thouſand *Tlaſcalans* were raiſed, to be under the Command of *Xicotencatl*, aſſiſted by *Alonſo de Hojeda*, and *John Marquez*, who ſpoke the Language tolerably; he advanced three Leagues, and took up his Quarters at *Cinpancingo*, whither ſo great a Multitude reſorted from the Lordſhips of *Guaxacingo* and *Chulula*, that it was not doubted but that they amounted to an hundred and fifty thouſand fighting Men.

The People of *Zacatapeque*, and of *Acazingo*, having made it their Choice to join in this War with the Inhabitants of *Tepeaca* againſt the *Spaniards*; they, as lying neareſt *Tlaſcala*, were firſt entirely deſtroyed; and then *Tepeaca* was reduced to ſuch Extremities, that the Inhabitants ſubmitted, and took an Oath to be good Subjects to the King of *Spain*. This War happily over, *Cortes* divided the Profits between his own Forces, and the Republic of *Tlaſcala*, after deducting the Fifth for the King. The Republic of *Tlaſcala* was highly pleaſed to ſee *Cortes* ſhare the Booty ſo punctually with them, and beſides, their City was full of Slaves, Salt, Cotton, Feather-works, Jewels, and other things they had Occaſion for. The City of *Tepeaca* being perfectly reduced, *Marina* underſtood that the *Mexicans* were preparing to fall upon the *Spaniards* when they leaſt ſuſpected it. *Cortes* ſeized ſome that were neareſt about him, who, he was informed, knew of it; and, having examined into the Affair, puniſhed them ſeverely. The *Mexicans* having Advice that *Cortes* was marched to make War on *Tepeaca*, took care to ſend Armies to ſeveral Parts to ſecure their Frontiers, perſuaded their Allies to ſtand by them, and made all poſſible Preparations, not only to defend themſelves, for that they looked upon as a Matter of no Difficulty, but to offend the *Spaniards*; and like a ſubtle People, ſent the Heads of Horſes, and other things they had taken, to the ſeveral Provinces they ſuſpected might be inclinable to forſake their Intereſt, giving out that *Cortes* was dead, and encouraging the People with the Hopes, that having no Commander, they would eaſily make an End of all the reſt. This Notion ſo far prevailed with the *Indians*, who are naturally fickle, that moſt of them revolted, though they had ſworn Obedience to the King of *Spain*, and wherever any *Spaniards* were they ſlaughtered them.

When all things were ſettled at *Tepeaca*, and in the neighbouring Parts, *Cortes* ſent ſome Commanders to reduce thoſe that ſtill held out; enjoining them to try all gentle and fair Means; and gave out that he would return to *Tlaſcala*. The chief Men of *Tepeaca* entreated him, that ſince they were become the King of *Spain*'s Subjects, purſuant to the Oath they had taken, he would not forſake them; but, in caſe he could not avoid going, he would leave ſome *Spaniards* there, or elſe they ſhould be deſtroyed: *Cortes* anſwered, that he would endeavour to ſatisfy them, and that they need not fear the *Mexicans*, for he hoped in God they ſhould ſoon ſee them quite diſabled; and thinking the Situation of that City very convenient to ſecure the Way to *Villa Rica*, as commanding the Paſſes through which the *Spaniards* came into thoſe Parts; and that the Province was in the Midſt of the Country, near to the Republic of *Tlaſcala*, *Guaxacingo*, and *Chulula*, on which it bordered; and on another Side upon the *Culuas*, who, being ſo cloſe by, might occaſion new Commotions there: Upon all theſe Conſiderations, and to pleaſe the *Tepeacans*, who had deſired a Garriſon of him, he ſent for the Alcaldes and Regidores of the Council, who were with him, and told them it was convenient to ſettle a Colony there, for the Reaſons aforeſaid; who approving of it, he appointed the proper Officers, and *Jerom de Aguilar* to be Regidore, being always ready to requite thoſe that deſerved it. He called this Place *Segura de la Frontera*, i. e. the Security of the Frontier, becauſe founded upon the aforeſaid Motives, and becauſe it lay on the Frontiers of *Culua*.

6. It has been before obſerved, that for the better carrying on the War againſt the *Spaniards*, the *Mexicans* had thought fit to elect *Guatimozin* for their Emperor, the Nephew and Son-in-law to *Motezuma*: He was a young Man about twenty-five Years old, of ſo much Spirit and Vigilance, that, contrary to the Manner of his Predeceſſor, he entirely gave himſelf up to the Care of the Public; being deſirous, immediately, to ſhew the Advantages of Government when placed in proper Hands: He knew what the *Spaniards* were doing in the Province of *Tepeaca*, and, foreſeeing the Deſigns they might form, when aſſiſted by the united Forces of the *Tlaſcalans*, and other neighbouring Provinces; he began to have thoſe reaſonable Apprehenſions, which are neceſſary to prudent Meaſures.

Cortes received an Account that his Army was upon the Frontiers, which was confirmed by three or four Nobles, ſent by the Cazique of *Guacachula*, a populous City, ſituate on the Road to *Mexico*, and a Place which the new Emperor looked on as one of the Ramparts of his Empire. They came to requeſt Succour againſt the *Mexicans*, complaining of their Violences, and offering to take up Arms againſt them, ſo ſoon as the *Spaniards* ſhould come within Sight of their Town. They made the Undertaking appear eaſy and juſt; ſaying, that their Cazique ought to aſſiſt as a Vaſſal of the King of *Spain*. *Cortes* aſked them what Force the Enemy had in thoſe Parts? They told him twenty thouſand in the Diſtrict of their City, and ten thouſand more in another City, called *Yzucan*, four Leagues from them; but that, in *Guacachula*, and its Dependencies, they could raiſe a very conſiderable Number of Men, who would be glad of an Opportunity to take up Arms. *Cortes* examined them very carefully, that he might diſcover the Intentions of their Cazique; and they gave ſo good an Account of themſelves, as fully convinced him of their Sincerity; and, though he ſhould have had ſome remaining Suſpicion, he would, at that time, have diſſembled it; for, in caſe the Treaty could not have been depended on, it was nevertheleſs neceſſary to drive away the Enemy, and ſubject the Frontier Towns before the *Mexicans* came with a greater Force to defend them.

Cortes applied himſelf ſo earneſtly to this Enterprize, that the very ſame Day he formed an Army of three hundred *Spaniards*, twelve or thirteen Horſe, and above thirty thouſand *Tlaſcalans*, under the Command of *Chriſtopher de Olid*; and after he had made this Diſpoſition, he put his Deſign in Execution with ſo much Expedition, that the Army marched next Morning. *Olid* carried the Envoys, ſent from *Guacachula*, with him, and had Orders to advance with Circumſpection, till he came near the City; and in caſe he ſuſpected any Treachery, to engage the *Mexicans* in ſome advantageous Poſt, and break them before they attacked the Town. They all marched on very chearfully, till, at ſix Leagues from *Tepeaca*, and almoſt at the ſame Diſtance from *Guacachula*, they found it rumoured among the Peaſants of the Country, but without any good Foundation, that the Emperor of *Mexico* was on the March with his whole Force, to relieve thoſe Cities.

The Soldiers of *Narvaez* believed the Report, and ſo multiplied the Enemies Forces in their Imagination, that, without hearkening to Reaſon, or obeying Orders, they inſolently proteſted that they would march no farther: So that *Chriſtopher de Olid* grew angry, and in a contemptuous Manner bid them return, threatning them with the Diſpleaſure of *Cortes*, ſince they were not touched with the Diſhonour of their Retreat. But as he was preparing to proſecute his March without them, there happened a new Accident, which, if it did not altogether ſhake his Conſtancy, yet retarded the Succeſs of the Expedition. They ſaw ſeveral Bodies of Men deſcending from the neighbouring Mountains, and advancing with more than ordinary Diligence; and *Chriſtopher de Olid*, believing the *Mexicans* were coming to attack him, drew up his Men in Order, in which he acted rightly; for too much Care never did hurt in any Army. But ſome Horſe, whom he had ſent before to gain Intelligence, returned with an Account, that it was the Cazique of *Guaxicingo*, with his confederate Caziques, who were come to aſſiſt the *Spaniards* in their War againſt the *Mexicans*, who had ravaged their Frontiers, and threatened their Dominions. Upon this, *Olid* ordered their Troops to halt, and the Caziques to come before him, which was preſently done.

But that which ſhould have given them all entire Satiſfaction, occaſioned a ſecond Uneaſineſs in the Soldiers. It began amongſt the *Tlaſcalans*, and next infected the *Spaniards*; for they both declared, that thoſe People were not to be truſted; and that they were ſent by the *Mexicans* to ſerve them by falling on the *Spaniards* during the Engagement. *Chriſtopher de Olid* heard them, and, without enquiring ſufficiently into the Matter, entered into their Suſpicions preſently, ſeized thoſe Caziques, and ſent them away to *Tepeaca*, for *Cortes* to determine concerning them. An inconſiderate Action, by which he ran the riſque of raiſing a Diſturbance between his own People, and thoſe who really came as his Friends. The Priſoners were brought before *Cortes*, complaining with a good deal of Reaſon of *Olid*. *Cortes* heard them with great Kindneſs, and ordering their Irons to be taken off, endeavoured to regain their good Opinion. But upon further Conſideration he found it would be neceſſary to carry on this Enterprize in Perſon; the Diſtruſt which his *Indian* Allies had of each other, and the Uneaſineſs among the *Spaniards*, ſeeming to threaten ſome fatal Event. He preſently ſet out, and in a few Hours came up with the Army: There every body was pleaſed with his Preſence, Things looked in quite another Manner, and the Storm that was beginning to gather diſperſed; he reprimanded *Olid*, for not ſending him an Account of the Accident, ſince he was ſo near, and for diſcovering his Jealouſy by the Impriſonment of the Caziques; and, having joined all the Forces, without any farther Delay he marched on to *Guacachula*, ordering the Envoys from that City, to go and inform their Caziques where he was, and what Force he had brought along with him.

The *Mexicans* were poſted on the farther Side of the City, but on the firſt Notice from their Sentinels they advanced with ſo much Speed, that by the Time the *Spaniards* came within Muſket-ſhot they had formed their Army, and poſſeſſed themſelves of the Road, with an Intention to try their Strength under Co[illegible] of the Town. The Victory was very vigorouſly diſputed; the *Mexicans* not only defending themſelves, but advancing with all the Signs of Reſolution to maintain their Ground to the utmoſt; when the Cazique of *Guacachula* laid hold of this Occaſion to give a Proof of his Fidelity, falling on their Rear, and at the ſame time aſſaulting them from the Walls with ſuch Bravery as much facilitated the Victory; and in half an Hour the *Mexicans* were intirely defeated, there being but few who were not either killed or wounded. When *Cortes* had ſettled his new Conqueſts, he returned to *Tepeaca*, which he called *Segura de la Frontera*, and there he received the News, that his firm Friend *Maxiſcatzin* was at the point of Death, at *Tlaſcala*, which haſtened his Return thither, though not time enough to find him alive: He died a Chriſtian, and as much attached to the *Spaniſh* Intereſt as ever; ſo that *Cortes* was much concerned for the Loſs of him, but his Grief however was ſoon leſſened by the coming of a freſh Reinforcement of *Spaniards* in the following Manner.

7. A Ship of moderate Burden arrived at *Juan de Ulua* and brought thirty *Spaniſh* Soldiers, two Horſes, and ſome Proviſions and Ammunition, which *Velaſquez* ſent to *Narvaez*, taking it for granted that all the Conqueſts in that Country were his own, and the Troops of *Cortes* at his Devotion. Their Commander was *Pedro de Barba*, the ſame who was Governor of the *Havanna* when *Cortes* ſailed from the Iſle of *Cuba*, having by his Friendſhip eſcaped the laſt Snares that were laid to ſtop his Voyage. *Pedro Cavallero*, who commanded on the Coaſt, no ſooner diſcovered the Veſſel, but he went out in a Boat, ſaluted the new Comers with great Civility; and having found by the very reſpectful Manner with which *Pedro de Barba* inquired after *Narvaez* the Deſign of their coming, anſwered him, without the leaſt Heſitation, that he was not only in good Health, but in great Proſperity, all thoſe Countries having ſubmitted to him, and that *Cortes* and ſome of his People were fled to the Mountains, which induced them to land without the leaſt Diſtruſt, and go to *Vera Cruz*, where they diſcovered the Deceit, and found themſelves Priſoners to *Cortes*. *Barba* commended the Stratagem of *Cavallero*, for in reality he was not ſorry to find his Friend in ſo good a Condition.

They were carried up to *Segura de la Frontera*, and *Cortes* ſhewed a particular Satisfaction at the Arrival of more *Spaniards*, with the agreeable Circumſtance of receiving this Succour from the Hands of his Enemy. He treated *Barba* very kindly, and gave him a Company of Croſs-bows, upon the Confidence he had of his Friendſhip. He diſtributed Gifts among the Soldiers, upon which they agreed to ſerve under his Command. He afterwards read the Letter privately, which *Barba* brought for *Narvaez*; in which *Velaſquez*, ſuppoſing him Maſter of all thoſe Conqueſts, gave him Orders to maintain himſelf there at all Adventures; for which End he promiſed him very powerful Succours; and, laſtly, told him, that if *Cortes* was not dead, he ſhould immediately ſend him away with a ſufficient Guard, for that he had received expreſs Orders from the Biſhop of *Burgos* to ſend him Priſoner to Court. About eight Days after arrived a ſecond Veſſel with another Reinforcement for *Narvaez*, which *Pedro Cavallero* ſeized after the ſame manner. She brought eight Soldiers, and a Mare, with a conſiderable Quantity of Arms and Ammunition, under the Command of Capt. *de Lobera*. They all immediately went to *Segura* and liſted themſelves, as the others had done.

Theſe Succours came by a Way ſo unlooked for, that *Cortes* conſidered them as good Omens, and Forerunners of future Succeſs. He had already reſolved on the Conqueſt of *Mexico*, and the great Number of Allies by which he found himſelf ſupported in his laſt Expedition confirmed him in his Reſolution. But the Paſſage on the Lake was the grand and unavoidable Difficulty, and gave him great Concern; for, after the Enemy had once found out the Secret of breaking the Bridges of the Cauſways, there was no depending upon portable Bridges, which were only to be uſed when they were pinched in Time; wherefore he began to think of building twelve or thirteen Brigantines, which ſhould be able to reſiſt the *Indian* Canoes, and tranſport his Troops to the City; and these he propoſed to carry in Pieces on the Shoulders of the *Indian Tamenes* for fourteen or fifteen Leagues at leaſt of very bad Way, over the Mountains of *Tlaſcala*, to a River near the Lake. He had a vigorous Imagination, and was naturally an Enemy to ſuch lazy Spirits as fancy difficult Things to be impoſſible. He communicated his Thoughts to *Martin Lopez*, on whoſe Ingenuity and great Abilities he depended for the compaſſing this important Deſign; and found he did not only approve of it, but alſo undertook to execute it without Difficulty.

He ſent him before to *Tlaſcala*, with all the *Spaniſh* Soldiers who had any Skill in the Carpenters Trade, in order to begin the Work, with a ſufficient Number of *Indians* to cut Wood, or do any other Service for which there might be occaſion; at the ſame time he ordered the Iron-work and Rigging, and whatever had been preſerved out of the Ships that were ſunk, to be brought up from *Vera Cruz*; and, having obſerved that thoſe Mountains produced Trees which afford a kind of Roſin, he drew out ſuch a Quantity as was neceſſary for the careening of his Barks. He was in want of Powder, but ſoon found Means to make very good, ſending to ſearch for Sulphur in the Volcano diſcovered by *Diego Ordaz*; for he believed they could not fail of finding it there: And ſome *Spaniſh* Soldiers belonging to the Artillery offered their Service; and, in fine, returned with as much Sulphur as was wanted. When this Affair was over, he began to think of returning to *Tlaſcala*, to haſten as much as he could the Preparations for his Expedition; and before he went he left his Inſtructions with the new Council at *Segura*, and appointed Capt. *Franciſco de Orozco* Commander of the Garriſon, with about twenty *Spaniſh* Soldiers, and the Militia of the Country, at his Diſpoſal.

8. *Cortes* complained with ſome Warmth of *Franciſco Garay*, becauſe, knowing the Progreſs he had made in the Empire of *Mexico*, he did not, notwithſtanding, endeavour to make a Settlement in the Province of *Panuco*; but ſuch a happy Aſcendant had the Fortune of *Cortes*, over that of his Rivals, that as *Velaſquez* furniſhed him with Succours, the ſame Way by which he intended to deſtroy him, and ſupport *Narvaez*; ſo the Meaſures which *Garay* had taken to uſurp ſome Part of his Government, turned likewiſe to his Advantage. We have already related how *Garay* was repulſed, when *Cortes* was with his Troops at *Zempoalla*; notwithſtanding which, he prepared another Fleet, with a greater Number of Soldiers, commanded by his beſt Officers.

But the ſecond Expedition was as unfortunate as the firſt; for the *Spaniards* were no ſooner landed, than they met with ſuch Reſiſtance from the *Indians*, that they were glad to retreat to their Ships in the utmoſt Diſorder; and, being wholly intent how to avoid the preſent Danger, put to Sea without obſerving the ſame Courſe. They were ſeparated for ſome Days, and, without knowing any thing of each others Deſign, they arrived almoſt at the ſame time, on the Coaſt of *Vera Cruz*, where they agreed to ſerve under *Cortes*, without any other Motive than that of his great Reputation. This Succour was looked upon as ſent from Heaven; for tho' it be certain that the Confuſion of the Soldiers and Sailors might help to diſperſe theſe Veſſels, which forced them on the Coaſt, where they were ſo much wanted, yet their coming ſo opportunely, and after ſo many Miſfortunes, to augment the Troops of *Cortes*, is an Event worthy of particular Reflection.

The firſt Ship that arrived was commanded by Captain *Camargo*, and had on board ſixty *Spaniſh* Soldiers; a little after came another with fifty choice Soldiers, and ſeven Horſe, commanded by Captain *Miguel Diaz*, a Gentleman of *Arragon*, who had ſignalized himſelf on all Occaſions; and laſtly, though ſomewhat late, arrived the Veſſel commanded by Captain *Ramirez*, with forty Soldiers, ten Horſes, and great Abundance of Proviſions and Arms. They all landed, and the firſt, without ſtaying for the reſt, made the beſt of their Way to *Tlaſcala*, leaving an Example to the Followers to take the ſame Rout, which they all did with entire Satisfaction; for the great Advantages made by *Cortes*, in *New Spain*, had made ſuch a Noiſe over all the Iſlands, that the Soldiers were eaſily led whither they thought Proſperity invited them. This Succour augmented the Number of the *Spaniards*, and inſpired them with freſh Hopes. The Soldiers received the new Comers with Joy; they embraced each other as Friends of a long Acquaintance, without any other Tye than that of coming from the ſame Country.

Notwithſtanding this good Fortune, he could not quiet the Soldiers of *Narvaez*, who were importunate with him, for Leave to return to the Iſle of *Cuba*; they put him in Mind of his Promiſe, and he could not deny but that they went upon the Expedition to *Tepeaca* on that Condition; for which Reaſon he was not willing to enter into any new Diſputes with them, and the rather becauſe he found his Troops augmented with Soldiers, better diſciplined, and did not think it a proper time to march at the Head of unwilling Mutineers.

For theſe Reaſons therefore he ordered a Proclamation to be made: *That whoever had a Mind to return home, was free to go, and ſhould be furniſhed with Veſſels, and every thing elſe that was neceſſary.* The greateſt Part of the Soldiers of *Narvaez* made uſe of the Opportunity, but ſome ſtayed; and what deſerves to be remarked is, that *Andres de Duero*, who appeared on ſeveral Occaſions ſo much attached to the Intereſt of *Cortes*, was one of thoſe who retired; and although there be no Account of the Reaſon of this Separation, we may very well believe there was but little Sincerity in the Pretences with which he coloured his Retreat; ſince we find him, ſhortly after, making uſe of all his Intereſt at Court in favour of *Velaſquez*.

9. *Cortes* having now got rid of theſe Mutineers, whom *Alverado* had the Care of conducting to the Veſſels, began to conſider of the Time neceſſary to be employed in building the Brigantines. He diſpatched new Orders to the Confederates, to hold themſelves in readineſs to march upon the firſt Notice, directing the Quantity of Proviſions and Arms they were to provide: And at his Leiſure Hours he wrote an Account of all the Particulars of the Conqueſt, to be ſent to the Emperor; deſigning to equip a Veſſel, and ſend new Agents, who might haſten the Diſpatch of the former, or give him Notice of the Condition his Affairs were in at the Court of *Spain*; his Uncertainty therein being now one of his greateſt Diſquiets.

Cortes drew up this Account in Form of a Letter, and repeating every thing of Importance in the Diſpatches he ſent the Year before by the Captains *Portocarrero* and *Montexo*, he gave his Majeſty a faithful Relation of all his Adventures, from the Time he marched out of *Zempoalla*, and by his Courage and Conduct made his triumphant Entry into the capital City of the Empire, till he was afterwards forced to retreat to *Tlaſcala* with conſiderable Loſs. He alſo acquainted him with how much Security he was able to maintain himſelf in that Province, together with the Number of *Spaniards* that had augmented his Troops, and the great Confederacies he had made with divers *Indian* Nations, for renewing the War againſt the *Mexicans*. He expreſſed, with a noble and generous Confidence, the Hope he had of reducing to his Majeſty's Obedience all that new World, whoſe Bounds to the North were unknown even to the Natives. He enlarged upon the Riches of that Empire, the Fertility of the Soil, and the Wealth of the ſeveral Princes. He highly extolled the Valour and Conſtancy of the *Spaniards*, and the Affection and Fidelity of the *Tlaſcalans*; with Relation to himſelf, he left it to his Actions to ſpeak for him. He deſired ſpeedy Juſtice againſt the unfair Proceedings of *Velaſquez*, and *Franciſco Garay*; and made preſſing Inſtances of an immediate Succour of Soldiers, Horſes, Arms, and other warlike Proviſions. He repreſented, in yet ſtronger Terms, the Neceſſity of ſending ſome Eccleſiaſtics, and Regulars of approved Virtue, to aſſiſt Father *Olmedo* in the Converſion of the *Indians*; giving an Account that ſome of the Chief among them were already baptized, and that in the reſt there was ſuch a Diſpoſition to receive the Truth, as gave great Hopes of its making a conſiderable Progreſs.

The General ſent theſe Diſpatches by the Captains *Mendoca* and *Ordaz*. His private Inſtructions to them were, "That before they diſcovered their Commiſſion, " or made any Declaration of their being ſent by him, " they ſhould firſt find his Father, and the two Agents " who were ſent the Year before, and jointly carry on " their Negociation, according as the Condition of his " Affairs ſhould require." He remitted alſo a ſecond Preſent to the Emperor, conſiſting of Gold and other Curioſities which had been preſerved at *Tlaſcala*, to which the Soldiers alſo contributed, and were, upon this Occaſion, very liberal; adding the Booty acquired in the Expeditions of *Tepeaca* and *Guacachula*; a Preſent leſs in Value than the former, but more deſerving, as being amaſſed in the Midſt of their Diſgraces, after thoſe Loſſes whereof *Cortes* had given a faithful Account in his Letters.

10. It is now neceſſary, in order to the perfect underſtanding of what is to follow, that we ſhould look over into *Spain*, in order to ſee what Effects both theſe and the former Applications produced in his Favour had; ſince, at preſent, he was not in more Danger from the Arms of his Foes in the new World, than from the repeated Efforts of thoſe implacable Enemies which, in ſpite of all his glorious Succeſſes, laboured his Deſtruction in the old. That we may perform what we intend of this kind at once, we will take up things from the Beginning, reducing the whole of this Controverſy in the *Spaniſh* Court, into as narrow a Compaſs as is poſſible. It was a long time that *Martin Cortes*, with the two firſt Envoys of his Son, *Alonſo Portocarrero*, and *Franciſco de Montexo*, held the wretched Employment of waiting in the Antichambers of the Miniſters, ſo far from being admitted to Audience, that, not daring to importune them, they only preſented themſelves in the Throngs as they paſſed by, and were forced to content themſelves with receiving an accidental Glance of an Eye, the comfortleſs Notice taken of thoſe who are afraid to ruin their Pretenſions, by advancing them unſeaſonably. The Emperor, however, gave them a very favourable Hearing, and found ſufficient time to inform himſelf, exactly, of all that paſſed in *New Spain*, and to judge what might be expected from the Enterprize. And, in order to this, he made himſelf Maſter of the whole Affair, not diſdaining to aſk Queſtions upon many Points. By this Means the Emperor diſcovered the great Advantages which might be expected from ſuch wonderful Beginnings: And the Idea he at that time formed of the Merit of *Cortes* helped to recommend him to his Favour, as he was naturally inclined to value extraordinary Men.

The ſudden Departure of the Emperor did not permit him to come to any Reſolution, in a Matter wherein ſo many Difficulties were raiſed, as well by the Agents of *Velaſquez*, as by ſome Miniſters who ſupported them. But when the Day of his Embarkation came, which was the 20th of *May*, 1520, his Majeſty did, in a particular Manner, recommend the Affair of *Cortes* to Cardinal *Adriano*, Governor of the Kingdom in his Abſence. The Cardinal was very ſincerely deſirous to favour his Cauſe; but as the Informations, by which he was to govern himſelf, came from the Council of the *Indies* (where the Votes were influenced by the Authority and Prejudice of the Preſident the Biſhop of *Burgos*) he found himſelf at a Loſs how to come to any Reſolution; nor was it an eaſy Matter to aſſure himſelf of making a right Judgment, while the Repreſentations of *Velaſquez* came cloathed with the Appearance of Juſtice, and the noble Exploits of *Cortes* were diſcredited with the Name of Rebellion. Afterwards, when it was moſt neceſſary, there wanted Time to examine into the Truth of this Affair, the Cares of the Miniſters being employed in Matters of the laſt Importance. It was, indeed, a very improper Time to conſider of new Enterprizes, when the Miniſters were ſo wholly employed in finding Remedies for the Evils which afflicted the State within Doors, that thoſe without made no Sort of Impreſſion upon them: So that *Martin Cortes*, and his Friends, ſenſible of the ſmall Advantages they reaped by their Solicitations, and of the general Diſorders of Affairs, retired to *Medillin*, with a Reſolution to let the Storm blow over, and expect the Return of the Emperor, who was perfectly well apprized of the Affair, and had ſhewn a Diſpoſition to do Juſtice to their Pretenſions; and they plainly ſaw that his Authority was neceſſary to ſurmount the Oppoſition of the Biſhop of *Burgos*, and other Impediments which aroſe from the preſent Poſture of Affairs.

Some little Time after *Ordaz* and *Mendoça* arrived at *Seville* after a proſperous Voyage; and, without diſcovering themſelves, or their Commiſſion, they took Care to be informed about *Cortes*'s Affairs, a Precaution which imported no leſs than their Liberty; for they underſtood, to their great Surprize, that the Commiſſioners of Trade had expreſs Orders from the Biſhop of *Burgos*, to ſtop and impriſon any Perſon who ſhould be ſent from *New Spain*, and to ſeize on the Gold and other Merchandize that he ſhould bring, either on his own Account, or by way of Commiſſion. Upon which they only endeavoured to ſecure their Perſons, and thought themſelves very happy in preſerving their Letters and Diſpatches, leaving the Preſent for the King, with every thing elſe, in the Hands of thoſe Judges, and to be diſpoſed of at the Pleaſure of the Biſhop of *Burgos*. They parted from *Seville*, not without great Apprehenſion of being diſcovered; determining, if poſſible, to find out at the Court either *Martin Cortes*, or the two Agents, in order to get Light how to proceed; but hearing, on the Road, that they were retired to *Medellin*, they went on to that Town, where their Arrival was welcomed with all the Demonſtrations of Joy which ſuch wonderful and wiſhed for News could inſpire. It was debated among them, whether it would be proper to carry the Diſpatches of *Cortes* immediately to the Cardinal-Regent, without delaying to inform him of ſuch important News: But, conſidering the preſent Diſturbances of the Kingdom, they thought it would be to no Purpoſe to ſpeak of diſtant Advantages, upon which they reſolved to continue in their Retirement, till the Miniſters were more at Leiſure.

The Account which came ſoon after, of the Emperor's Return, contributed very much to reſtore the public Tranquility; he gave Aſſurance, in his Letters, that he would leave all other Affairs, to come where his Preſence was ſo neceſſary. This Aſſurance entirely ſettled every thing, and *Martin Cortes*, judging it a proper Time to renew his Solicitations, ſet out immediately for the Court, with the four Commiſſioners from his Son; where, after ſome ſmall Delays, they had a particular Audience of the Cardinal-Regent. They informed him, in general, how far Matters were advanced towards the Conqueſt of *Mexico*, and referred him to the Letters of *Cortes* for the Particulars. They gave him alſo an Account of the Orders they found at *Seville*, for impriſoning any one who ſhould come from *Cortes*, and of the Seizure of the Preſent they had brought for the King. Upon this Occaſion, they repreſented the Reaſons they had to diſtruſt the Biſhop of *Burgos*, and, laſtly, deſired Leave to except againſt him, in a legal Way, as a Judge, offering to make good the Reaſons of their Exception, or ſuffer the Penalty of their taking ſuch a Step. The Cardinal heard them with Attention; he ſeemed touched with their Misfortune, and comforted them with Promiſes of a ſpeedy Diſpatch: He was particularly diſpleaſed with the Orders given at *Seville*, and the Seizure of the Preſent, as being done without his Knowledge. And farther, the Cardinal anſwered them, with regard to their Requeſt concerning the Biſhop, That they might take their Remedy againſt him at Law.

With theſe Encouragements to hope for better Fortune they immediately entered their Exception againſt the Preſident of the Council of the *Indies*, in his own Court, delivering their Reaſons in Writing, with all the Temper and Moderation neceſſary to a due Reſpect. But their Reaſons were ſo ſtrong, and the Truth of what they alledged ſo well known to the other Judges, that they durſt not deny Juſtice in an Affair of that Importance, and more eſpecially on the Approach of the Emperor's Return. After a full Hearing, the Biſhop was abſolutely forbid to interfere in any Matter between *Cortes* and *Velaſquez*. His Orders were revoked, the Embargoes at *Seville* taken off, and the Importance of the Undertaking appeared in its true Light. The heroic Actions of *Cortes*, which were almoſt obſcured before by the Suſpicion of his Fidelity, were now celebrated as they deſerved, and the Cardinal, by ſeveral Decrees, recommended the Diſpatch of the Envoys, and was ſo ſincerely deſirous to forward the Affair, that, even after he had received the News of his Exaltation to St. *Peter*'s Chair, he diſpatched ſome Orders favourable to *Cortes*, as he was on the Road to embark.

11. In a ſhort Time after the Emperor's Arrival in his *Spaniſh* Dominions he gave Audience to the Envoys of *Cortes*, and notwithſtanding thoſe of *Velaſquez* at the ſame Time preſented their Requeſt; yet, as he had been well informed of the Caſe, on both Sides, by Letters from the Cardinal, now Pope, he, by a new Sentence, confirmed the Recuſation of the Biſhop of *Burgos*, and appointed Commiſſaries to determine this Affair. The firſt thing the Council did was, to look over the Memorials, drawn from Letters and Relations produced at the Trial; but there they were ſo embarraſſed by contradictory Accounts, that they thought it neceſſary to order the Agents, on both Sides, to explain themſelves *viva voce* at the next Meeting; for they were all deſirous to diſpatch this Affair, and examine ſtrictly into the Accuſations brought by the Parties againſt each other, and into the Strength of their reſpective Arguments, that ſo they might come to the Knowledge of the Truth.

The next Day the Agents appeared before the Council, with their Advocates, and, amongſt thoſe for *Velaſquez*, *Andres de Duero* ſignified himſelf. But People were the leſs ſurprized to ſee him unfaithful to his Friend, knowing he had been ſo firſt to his Maſter. The Memorials were read, and the Parties at the ſame Time were examined, in order to diſcover how they juſtified themſelves from their reſpective Accuſations. From their Anſwers the Judges drew what was ſufficient to decide the Affair; and, after ſome few Days Hearings, the Court unanimouſly agreed, "That it was not reaſonable for *Velaſquez* to appropriate to himſelf the Conqueſt of *New Spain*, without a better Title than that of having expended ſome Money in the Preparations for that Enterprize, and naming *Cortes* for Commander: That he could only have his Action for what he had laid out: That the Nomination of *Cortes* afforded him no Pretence; for beſides that he gave him the Commiſſion without the Authority of the Commiſſioners of the Royal Audience, whoſe Orders he ſhould have received, or ſo much as acquainting them with it, he loſt thoſe Prerogatives the Day that he revoked it, and could have no Right to ſay, that the Conqueſt was made by his Order; *Cortes* being, by that Revocation, left free to act as he ſhould judge moſt advantageous for the Service of the King, with the Troops and Veſſels, which for the moſt Part he had equipped at his own Expence, and that of his Friends: And laſtly, they cenſured *Velaſquez*, as a Perſon who had ſhewn a very ungovernable Ambition, in aſpiring to uſurp the Glory and Advantage of the Actions of another, and as having been guilty of a Raſhneſs, which deſerved a very ſevere Reprimand, in ſending an Army againſt *Hernan Cortes*, without conſidering the Conſequences which might have attended ſuch violent Proceedings, or regarding the Orders he had received to the contrary, from the Miniſters of the Royal Audience of *Santa Domingo*."

Theſe Concluſions were laid before the Emperor, which being approved by his Majeſty, Sentence was pronounced, declaring *Hernan Cortes* to be a good Miniſter and faithful Subject, honouring with the like Approbation the Officers and Soldiers under his Command; impoſing perpetual Silence on *Velaſquez*, on the Subject of having any Pretenſions to the Conqueſt of *New Spain*, and ſtrictly commanding him, on Pain of ſevere Puniſhment, not to raiſe the leaſt Obſtacle to that Affair, directly or indirectly, with a Reſervation to any Demand he might have, on account of Monies by him expended in the Armament of the Veſſels which he was to ſue for, in the ordinary Way of Juſtice. And thus ended this Affair; the Judges referring the Honours deſigned for *Cortes*, the reprimanding *Velaſquez*, and other Concluſions of the Council, to the Diſpatches that were to be ſent in the Name of the Emperor. The next thing taken into Conſideration was the Aſſiſtance to be given *Cortes*, the Care of which the Emperor referred to the ſame Council. He gave a very favourable Audience to his Agents, beſtowed ſeveral Marks of his Kindneſs upon *Martin Cortes*, on account of his Son's Merit, whom he promiſed to reward according to his Service.

Several Regulars were named for the Converſion of the *Indians:* He ordered a conſiderable Number of Arms and Horſes to be embarked in the firſt Fleet, and, conſidering how much the utmoſt Diſpatch imported to them, he commanded the Orders to be immediately drawn, and ſent; one was directed to the Royal Audience of *Santa Domingo*, another to *Velaſquez*, ſtrictly enjoining him to deſiſt from further interfering in that Enterprize, and ſeverely cenſuring his violent Proceedings; another to *Franciſco Garay*, blaming him for attempting any thing on *New Spain:* The laſt was directed to *Cortes*, and abounded in thoſe Marks of Honour and Favour, which Kings beſtow on thoſe from whom they have received extraordinary Services, when they do not diſdain to own the Obligation. Theſe Diſpatches were ſigned by the Emperor in *Valladolid* the 22d of *October* 1522, and ſent away with two of the Envoys of *Cortes*, the other two remaining to ſollicit Succours, and receive Inſtructions that were framing for the Government of the new conquered Country. But to return,

12. When our Hero reſolved to renew the War, it was towards the Year 1520, and he had no ſooner reſolved than ſo lucky an Accident happened, as gave both himſelf and his Soldiers freſh Spirits. A Ship arrived at *Vera Cruz* with Arms and Ammunition on the Account of private Merchants, but both the Captain and all his Men were ſo charmed with the Reports they heard of the Riches of *Mexico*, that they quitted their Ship, and joined the Army. The next Day there was a general Muſter, when it appeared, that there were five hundred and forty Foot, and forty Horſe, together with nine Pieces of Cannon. The *Tlaſcalans* furniſhed ten thouſand Men, and the Confederates in Proportion.

The Army marched that Day ſix Leagues, and took up their Quarters in a Place called *Tezmeluca*, which ſignifies a Grove of Oaks. It was a conſiderable Town, ſituate on the *Mexican* Confines, and in the Juriſdiction of *Guaxacingo*, whoſe Cazique took Care to provide ſufficiently for all the Troops. The Day following they continued their March with all neceſſary Precautions. They received Advice, that the *Mexicans* were aſſembled on the other Side of a Mountain, which rendered the Road of *Tezcuco* very difficult, and becauſe they came not to that Place till towards Evening, and it was not adviſeable to march through ſuch broken mountainous Ground when Night was approaching, the Army made a Halt. In the Morning they began to mount the Hill, and penetrate the Woods, but they had not marched much above a League, when the Van-guard returned, with an Account that the Enemy had ſtopt up the Way, with Trees laid a-croſs, and ſharp Stakes, which they had fixed in the looſe Sands, to wound the Horſes; upon which *Cortes* ſaid to the *Spaniards* aloud, Theſe valiant People don't ſeem very deſirous to meet us, ſince they take ſo much Pains to ſtop up our Way to them; and he ordered two thouſand *Tlaſcalans* to join the Van-guard, and clear the Road, which they executed with ſo much Expedition, that the Rear of the Army ſcarce ſeemed to ſtop.

From this Place they diſcovered the great Lake of *Mexico*, and upon this Occaſion *Cortes* put his Soldiers in Mind of the Riches they had enjoyed, as well as of what they had ſuffered in that City, mixing the good and bad, that he might animate them to Revenge. They likewiſe diſcovered ſeveral Fires in diſtant Towns, ſucceeding one another with ſome Intermiſſion; and, tho' there was no doubt but theſe were Signals made on the Diſcovery of the Army, they purſued their March with the ſame Precaution. They ſoon diſcovered, at a great Diſtance, the Enemy's Army, which took up all the Plain, without making any Motion, ſeeming reſolved to continue in a Poſt from whence they could eaſily make a Retreat. The *Spaniards* rejoiced at the Opportunity of coming ſo ſoon to an Action, and the *Tlaſcalans* did the ſame: But the Joy of the latter ſoon turned to Fury; ſo that *Cortes* was obliged to make uſe of his Authority, and the Diligence of ſome of his Captains, to prevent their running into Diſorder.

The *Mexicans* were on the farther Side of a great Baranco, or Chaſm in the Earth, which muſt of Neceſſity be paſſed. It was made deeper by a Brook, which, collecting all the Waters from the Mountains, ran through it, and was at that Time conſiderably ſwelled. The *Mexicans* had a little wooden Bridge over it for the Uſe of Paſſengers, which they could eaſily have broke down, but had left on Purpoſe, as was afterwards ſuppoſed, that they might deſtroy their Enemies in that narrow Paſs, thinking it impoſſible that they could ever form themſelves on the other Side, when ſo vigorouſly oppoſed. After this Manner they reaſoned, when at a Diſtance from Danger, but when they diſcovered the Army of *Cortes*, which they had believed to be ſo numerous, their Imaginations were ſtruck with other Notions: They wanted Courage to defend their Poſt, and therefore began to retire by little and little, without turning their Backs. *Cortes* advanced with Speed, and when he came up to the Baranco, he eſteemed it a Piece of good Fortune that the Enemy had quitted it; for, notwithſtanding the *Spaniards* found no Reſiſtance, they had ſome Difficulty in paſſing it. He detached twenty Horſe, and ſome Companies of *Tlaſcalans*, to keep the Enemy in play, without engaging farther, until ſuch Time as the reſt of his Troops were paſſed. But the *Mexicans* no ſooner ſaw them drawing up on the other Side of the Baranco, than they laid aſide all their Policy, diſperſing themſelves at once, ſome betaking themſelves to the moſt unfrequented Paths, and others ſeeking Refuge in the Mountains.

Cortes did not care to loſe Time, but marched to poſſeſs himſelf of *Tezcuco*. The Army in their March made ſome Slaughter of the *Mexicans*, who had abſconded in the Woods. The ſame Night the Troops quartered in a Place lately forſaken by the Inhabitants, within three Leagues of *Tezcuco*, where they doubled their Sentinels, and were in a Manner all Night under Arms. But the next Day, at a little Diſtance from the Town, they diſcovered about ten *Indians*, who were coming in Haſte along the Road, with the Appearance of a Meſſage, and who brought with them a Plate of Gold, in Form of a Flag, hanging to the Top of a Lance, which was looked upon as a Sign of Peace.

The Chief of them came as Embaſſador from the King of *Tezcuco*, deſiring *Cortes* to ſpare his People and Country; acquainting him, that he deſired to be his Confederate, for which End he had provided good Quarters for all the *Spaniards* in the City; and that the reſt of the Nations, under his Command, ſhould be ſupplied with every Thing that was neceſſary. *Cortes* put ſome Queſtions to him; and, as he came well inſtructed, he anſwered without Heſitation; adding, that his Maſter had juſt Reaſon to complain of the Emperor, who was about to execute his Revenge upon him by ſome Extortions, and other Oppreſſions not to be endured, for his having refuſed him his Vote in his Election, for which Reaſon he was reſolved to unite himſelf with the *Spaniards*, as one of the moſt intereſted in the Ruin of that Tyrant.

It does not appear from any of the *Spaniſh* Hiſtorians who this King of *Tezcuco* was; but they all agree, that he was both a Tyrant and a Uſurper, ſo that as ſoon as the *Spaniards* were in Poſſeſſion of the Place, the Nobility deſired *Cortes* to reſtore their lawful Prince; which, as it was an Act of Juſtice, and ſeemed to promiſe much in favour of the *Spaniſh* Intereſt, he readily performed, to the great Joy of the Inhabitants.

13. As they made ſome Stay in this City, *Olmedo* found Means to convert the King to the Chriſtian Religion; and he proved both a faithful, and an uſeful Ally; ſending ſix or ſeven thouſand of his Subjects to aſſiſt in widening the Canals, that they might the better receive the Brigantines, which had been prepared in order to ſail into the great Lake, againſt the armed Canoes, which the *Indians* employed thereon. *Cortes*, at the ſame time, deſiring to undertake ſomething to facilitate the Enterprize upon *Mexico*, reſolved to advance to the City of

Iztapalapa, ſix Leagues forward, that he might deprive the *Mexicans* of the Shelter for their Canoes, and partly to give the confederate *Indians* ſome Employment.

The City of *Iztapalapa* was ſituated upon the ſame Cauſway by which the *Spaniards* made their firſt Entry into *Mexico*; and diſpoſed after ſuch a Manner, that the greateſt Part of the Building was within the very Lake, whoſe Water was brought into that Part of the Town, which was built upon the Bank, by Trenches, to let it in as Occaſion required. *Cortes* charged himſelf with the Care of this Expedition, and took with him the Captains *Alverado* and *Olid*, with three hundred *Spaniards*, and ten thouſand *Tlaſcalans*; and though the young King of *Tezcuco* was deſirous to accompany him, he would not permit it, telling him his Preſence would be more uſeful in the City; the military Government of which he left to *Sandoval*, and, with both of them, ſuch Inſtructions as he thought neceſſary for the Security of their Quarters, and to keep things in order in his Abſence. They preſently began their March by the Cauſway, deſigning to poſſeſs themſelves firſt of that Part of the City which was built upon it, and diſlodge the Inhabitants from the other Part, with the Artillery and Fire-Arms: But the Enemy was informed of their Motions, and the Army was no ſooner come within Sight of the Place, than they diſcovered a Body of about eight thouſand Men, at a little Diſtance from the Walls, who came out to defend them with ſo much Reſolution, that, though they found themſelves inferior in Number, they ſtood the Engagement, and fought with Bravery enough to retire with Reputation, which they did in a little time to the City; where, without ſtaying to defend the Entrance, or ſhut up the Gates, they inſtantly diſappeared, throwing themſelves into the Lake in Diſorder.

Cortes was ſenſible that this kind of Retreat had the Appearance of a Stratagem to draw him into ſome greater Danger, and therefore marched his Army into the City with all poſſible Precaution, but he found the Houſes utterly abandoned; and, though the Noiſe and Cries of the Enemy continued in that Part, which ſtood in the Water, he reſolved, with the Advice of his Captains, to maintain himſelf in the Poſt where he was, and lodge within the Walls, without attempting any thing farther, the Day being far ſpent: But it ſcarce began to be dark, when they perceived the Canals every where to overflow, the Water running impetuouſly over the lower Grounds.

Cortes immediately underſtood that the Enemy's Deſign was to drown this Part of the City, which they might eaſily do by opening the Sluices of the great Lake; and, as the Danger was inevitable, he was obliged to give Orders, inſtantly to quit the Place; and, though they made all the haſte poſſible, the Water came above their Knees. *Cortes* was very much mortified, that he had not prevented this Stratagem of the *Indians*; as if it was poſſible, with the utmoſt Vigilance, to provide againſt all Accidents. He drew out his Army into the Road of *Tezcuco*, to which Place he thought to retire, deferring the Enterprize of *Iztapalapa* to a more favourable Opportunity; for it was impracticable, at this time, without a greater Force on the Lake-ſide, and ſome Veſſels, to drive the *Mexicans* from the Place. The Troops lodged that Night on a little Hill free from the Water, where, nevertheleſs, they ſuffered very much, being wet and without any Defence againſt the Cold; but in ſuch good Heart, that there was not the leaſt Murmuring among the Soldiers.

At the firſt Appearance of Day, he continued his Retreat, and haſtened the March of his Men. As ſoon as it was broad Day, they diſcovered a formidable Body of Enemies in purſuit of the Army, *Cortes*, notwithſtanding this, marched on, but more ſlowly, though the Soldiers moved but very unwillingly, being animated with a Spirit of Vengeance againſt their Enemies. When *Cortes* thought convenient, he ordered his Troops to halt and face about; and the Enemies began the Attack with the ſame Precipitation that they purſued; but the *Spaniſh* Croſs-bows, and the Bows of the *Tlaſcalans*, gave a Check to their firſt Fury; and at the ſame time the Horſe charged them, making Room for the confederate Troops, who entirely broke that diſorderly Multitude, and obliged them to leave the Field with conſiderable Loſs.

Cortes purſued his March without ſtopping, to reach his Quarters before Night. But the Enemy, no leſs diligent in rallying than retiring, advanced a ſecond and third time to the Attack, without being terrified with the great Slaughter they had ſuſtained; till ſuch time as, fearing to approach too near *Tezcuco*, where the whole Strength of the *Spaniards* lay, they marched back to *Iztapalapa*, ſufficiently chaſtized for their Boldneſs, having loſt, in the three Attacks, ſix thouſand Men: And tho' *Cortes* had ſome wounded, he loſt only two *Tlaſcalans* and one Horſe, who, covered with Arrows and Cuts, yet lived to bring off his Maſter. *Cortes*, and all his Army, a little before Night, entered the City of *Tezcuco*, with the Glory of three Victories obtained by the Way, which gave Reputation to the Expedition, and covered the Diſgrace of the Retreat.

While *Cortes* remained in *Tezcuco*, he received frequent Viſits from the neighbouring Caziques; among the reſt there came Meſſengers from the Provinces of *Chalco* and *Otumba*, with an Account that there was a powerful Army of *Mexicans* upon their Frontiers, who had Commiſſion to deſtroy them, for having made an Alliance with the *Spaniards*. They deſired Succour to aſſiſt them in their Defence: This Requeſt appeared neceſſary, for it imported *Cortes* very much, not to ſuffer the *Mexicans* to fix themſelves in a Place where they might cut off his Communication with *Tlaſcala*. He immediately diſpatched *Sandoval* and *Lugo*, with two hundred *Spaniards*, fifteen Horſe, and a ſufficient Number of *Tlaſcalans*; among whom, there were ſome who had obtained his Permiſſion to retire to their own Country, and ſecure the Spoils they had obtained in the War. Theſe Wretches marched with the Baggage of the Army, and, as Avarice regulated the Weight of their Burdens, they had ſo overloaded themſelves, that they could not keep up with the Troops, but were forced to ſtop frequently to take Breath.

The *Mexicans* being informed of this, fell upon them in one of their reſting Places. *Sandoval* and *Lugo* returned immediately to their Relief, and fell upon the Enemy ſo vigorouſly, with their whole Force, that they turned their Backs as ſoon as attacked: Five or ſix *Tlaſcalans*, who were diſarmed and embarraſſed with their Burdens, periſhed upon this Occaſion, but the *Spaniards* recovered all the Booty, with ſome Addition. They continued their March, till the Army, having paſſed the Province of *Chalco*, approached the Frontiers of *Tlaſcala*. The *Mexicans* had aſſembled all the Troops of the neighbouring Provinces, to chaſtize the Rebels of *Chalco* and *Otumba*; and, knowing that the *Spaniards* were coming to the Relief of thoſe two Nations, they reinforced themſelves with Part of the Troops quartered about the Lake; and having thus a very formidable Army, poſted themſelves on the Road the *Spaniards* were to paſs, to try their Strength in the Field. *Sandoval* and *Lugo*, having given what Orders they thought neceſſary, advanced in order of Battle, without altering their Pace: But, on Sight of the Enemy, the *Spaniards* and *Tlaſcalans* halted, to examine more narrowly the Intention of that Body of Troops.

14. The *Mexicans* had the Advantage in Numbers, and advanced in Crowds, and made the firſt Diſcharge, without any Effect. The two Captains taking Advantage of their Confuſion, ordered the Horſe to advance, whoſe Attack immediately made Room for the *Spaniards* and *Tlaſcalans*, breaking this diſorderly Multitude with great Slaughter. The Flight of the Enemy ſoon became univerſal; and the Troops of *Chalco* and *Otumba*, which had ſallied out on the Noiſe of the Battle, coming up at the ſame time, the Chace was ſo bloody, that the *Mexican* Army was entirely defeated, with little or no Loſs. Eight of the moſt conſiderable Priſoners were reſerved, in order to get ſome Information from them; and the Army paſſed that Night to the City of *Chalco*, whoſe Cazique went before to prepare Quarters with great

abundance

bundance of Refreſhments for all the Troops; nor did he forget to have the Victory celebrated with Rejoicing, after the uſual Manner of that People.

The Inhabitants of *Chalco*, as Subjects of the *Mexican* Empire, were Enemies to the *Tlaſcalans*, and had, beſides, perpetual Diſputes with them about their Frontiers: But this Night all their Quarrels were forgot, at the Deſire of the *Chalqueſes*. The *Spaniards* were Mediators at the Treaty, and, the Chiefs of both Nations being aſſembled, Peace was concluded: *Sandoval* and *Lugo* undertaking to get it confirmed by *Cortes*, and the *Tlaſcalans* to have it ratified by the Republic. This Affair thus finiſhed, they returned to *Cortes*, who highly commended both the *Spaniſh* Officers, the Soldiers under their Command, and all the *Indian* Auxiliaries. He ſet the eight *Mexican* Captains at Liberty, and ſent them with Propoſals of Peace to their Emperor; not that he hoped any thing from it, farther than ſhewing the Juſtice of the War to all the People in that Part of the World, by obliging the Enemy to draw it upon themſelves, by repeated Refuſals of all Terms of Accommodation.

15. About this time *Cortes* was informed that the Brigantines were finiſhed, by the Induſtry and Care of *Martin Lopez*, and the Republic of *Tlaſcala* granted him ten thouſand Men to carry theſe Veſſels from the Place where they were built to the Lake, which they accordingly performed; and, if we conſider it attentively, this will appear one of the wiſeſt Contrivances of this great Captain, and the happy Execution of it, one of the moſt ſurprizing things performed by the *Spaniards*, in the Courſe of this Expedition. He was no ſooner acquainted with this, than he again took the Field, and had ſeveral Engagements with the Enemy, in moſt of which he was ſucceſsful; but, at the Attack of a Place called *Tacuba*, he was compelled to retreat. A Veſſel arrived at this time at *Vera Cruz*, and in her, *Julian de Alderte*, a Native of *Tordeſillas*, with the Character of the King's Treaſurer, Father *Urrea*, of the Order of *St. Francis*, *Antonia de Caravaial*, *Geronimo Ruiz de la Moto*, *Alonſo Diaz*, *de la Reguera*, and ſeveral Soldiers of Diſtinction, with a very conſiderable Succour of Arms. They immediately marched to *Tlaſcala*, and there had an Eſcort to conduct them ſafe to *Tezcuco*, themſelves carrying the firſt News of their Arrival.

Soon after there arrived Meſſengers, diſpatched in haſte from the Caziques of *Chalco* and *Thamanalco*, to demand Succour; for the Emperor *Guatimozin*, as appeared by his Conduct, applied himſelf entirely to the Arts of War; and had conſidered that there was no better Way to compaſs his Deſign, than by ſeizing on that Frontier, whereby he might cut off their Communication with *Tlaſcala*, and prevent Succours from *Vera Cruz*; a Point of ſo much Conſequence, that *Cortes* found himſelf abſolutely obliged to protect thoſe Allies, to whoſe Fidelity he owed the Preſervation of this Paſs. He immediately diſpatched *Sandoval* to their Relief, with three hundred *Spaniards*, twenty Horſe, and ſome Companies of *Tlaſcala* and *Tezcuco*. *Sandoval* marched with ſuch Diligence, that his Succour arrived very opportunely. The Caziques had aſſembled all their Troops, which, joined to thoſe, made a very conſiderable Body. The Enemy was not far off their Army, having lodged the Night before at *Guaſtepeque*, and it was reſolved to attack them before they entered the Territories of *Chalco*. In the mean time the *Mexicans*, depending upon the Number of their Forces, poſſeſſed themſelves of ſome hollow Ways, in order to wait their coming in a Place where they might be ſecure againſt the Horſe.

The *Spaniards* ſaw the Difficulty when they came to the Charge, and *Sandoval* ſtood in need of all his Reſolution to diſlodge the Enemy from the Poſt; which, however, they did, Sword in Hand, but not without Loſs. The *Mexicans* loſt a great Number in this Conflict; however, they thought themſelves ſtrong enough to rally, and draw up upon the Plain: But *Sandoval*, having overcome the Difficulty of the Paſſage, attacked them ſo briſkly that they had not time to form. The Van-guard continued the Fight with deſperate Fury, but ſoon gave Way, and diſperſed; and the *Spaniards* followed with ſo much Vigour, that the *Mexicans* loſt the greateſt Part of their Troops. *Sandoval* remained Maſter of the Field, and choſe a Place for his Army to halt in, and take a little Reſt, reſolving to advance that Night to *Guaſtepeque*.

But ſcarce had the Troops began to enjoy the Repoſe they ſo much wanted, when the Scouts gave the Alarm ſo warmly, that it was neceſſary to form the Army with all Expedition. A Body of fourteen or fifteen thouſand *Mexicans* were advancing ſo near, that the *Spaniards* could hear their Drums and Horns. Theſe Troops were ſent as a Reinforcement to thoſe which had marched from *Mexico* before. The *Spaniards* advanced to receive thoſe new Comers, and attacked them ſo ſeaſonably, that they made Way for the Horſe to charge; who made ſuch a Slaughter of the Enemy, that they were ſoon obliged to retire to the Town of *Guaſtepeque*; but the *Spaniards* followed them ſo cloſe, that they entered the Place at the ſame time, and maintained the Entrance, till the reſt of the Troops coming up, they divided into the ſeveral Streets, and Sword in Hand drove the Enemy out of the Town. The *Mexicans* loſt great Numbers, and the reſt fled. This Town was ſo large, that *Sandoval* was reſolved to quarter there that Night, and the *Spaniards*, with the greateſt Part of their Allies, lay under Cover.

He was ſoon after obliged to take the Field again, the Enemy having rallied; and *Cortes* himſelf came quickly after into the ſame Country, where he had ſeveral Engagements with the *Mexicans*, not much to his Advantage; for, confiding in the Bravery of his Troops, and deſpiſing too much the Inexpertneſs of the *Indians*, he attacked them even in the moſt difficult Poſts, and thereby gave them ſuch Advantages, as he found it very difficult to ſtruggle with. Yet his old and new Allies remained firm and faithful, which induced him to accept the Invitation given him of going to *Guaſtepeque*, in order to refreſh himſelf and his Army; and, before he well arrived there, he found himſelf called to freſh Toils, by the News that the *Mexicans* had aſſembled a very powerful Army at *Quatlavaca*, ſo that it was abſolutely neceſſary for him to march thither.

16. This large and famous Capital of an *Indian* Principality, *Quatlavaca*, was a populous Town, ſtrong by Nature; ſituate between Baranco's, or Breakings of the Earth, above eight Fathoms deep, which ſerved as a Ditch to the Place, and Paſſage for the Water that deſcended from the Mountains. The Army arrived at this Place, after having ſubdued all the Towns which lay in their Way, without any Difficulty. The *Mexicans* covered the Banks with ſuch a Number of Soldiers, that the Paſſage ſeemed impoſſible: But *Cortes* drew up his Army at a convenient Diſtance; and, while the *Spaniards* and the Confederates endeavoured to divert the Army with their Fire-arms and Arrows, he went to view the Baranco, and, finding it at ſome Diſtance lower much narrower, he immediately ordered two or three Bridges to be made of Trees, cut at the Root, which reached from one Side to the other; and which, laid together as well as poſſible, made a Road for the Infantry to paſs.

The *Spaniards* of the Van-guard, leaving the *Tlaſcalans* to keep the Enemy in play, immediately paſſed over, and formed a Battallion on the other Side of the Ditch, which was continually augmented by the Allies. But the *Mexicans*, who were quickly ſenſible of their Negligence, poured down upon thoſe that had paſſed with ſo much Reſolution, that they had much to do to keep their Ground; and the Succeſs had been very doubtful, if *Cortes* had not opportunely arrived; who, whilſt the Foot were getting over, had found out a Paſſage for the Horſe; which, though very difficult and dangerous, was of great Uſe in the extreme Danger to which the *Spaniards* were reduced. The Horſe wheeled in order to charge the *Mexicans* in the Rear, which they did; aſſiſted by ſome Foot, who had paſſed the Ditch by the Means of two or three Trees, which were fallen down by their own Weight, and lay acroſs the Baranco. But the *Mexicans*, who now ſaw the Danger that threatened them in the Midſt of their Fortifications, gave themſelves for loſt; and, diſperſing, ſought only to eſcape in the beſt Manner they could to the Mountains. They loſt great Numbers both in the Defence of the Ditch and in their Flight, nevertheleſs the greateſt Part of them ſaved themſelves among the Rocks and Precipices. The Town was found entirely abandoned, with great Store of Proviſions, and ſome Spoil; which was given to the Soldiers.

A little after, the Cazique, and ſome of the chief Inhabitants who were willing to ſubmit, called to the *Spaniards* from the further Side of the Ditch, deſiring Leave to return to the Town, and prepare Quarters for the Troops; which was granted, and they were of Uſe afterwards, by the Intelligence they gave of the Enemy's Motions, and by the Knowledge they had of the Country. Early the next Morning, the Army took the Road of *Suchimilco*, a Place which deſerved the Name of a City, ſeated on the Edge of a freſh Water Lake which had a Communication with the great Lake; the Buildings were partly on the Land and partly in the Waters, where a great Number of Canoes ſerved them to paſs from Place to Place. It was of great Importance to take a View of this Town, which was within four Leagues of *Mexico*, but the March was very troubleſome; for after they had paſſed a Defile three Leagues long, they came into a dry barren Country, where the Soldiers ſuffered much for Want of Water.

The Fatigue of the March, and the Heat of the Summer, increaſed their Thirſt to ſuch a Degree, that; at their Entrance into a Foreſt of Pines, they were inſenſible of any Relief from its Shade. Near the Road they found ſome Farm-houſes: Here the Army lodged, and enjoyed that Night the Reſt and Refreſhment they wanted. The Enemy had purpoſely quitted them, to wait for the *Spaniards* in a ſtronger Poſt. *Cortes* drew up his Army in Order of Battle at break of Day, and began his March, expecting to meet with a good deal of Difficulty in his preſent Enterprize, it not being likely that the *Mexicans* would leave a Poſt of ſo great Importance, and ſo near *Mexico*, without a ſtrong Garriſon, eſpecially ſince all who had eſcaped from their paſt Engagements went to that Place. His Conjectures proved right, for the Enemy had drawn up their Battalions in a Plain at ſome Diſtance from the City, having a great and rapid River in their Front, which diſcharged itſelf into the Lake. They had double lined the Banks of this River, and diſpoſed their main Body for the Defence of a wooden Bridge, which they would not cut down, having barricadoed it with Planks and Faſcines; and ſuppoſing, that though this Fortification ſhould be forced, they ſhould have a ſufficient Advantage in the Narrowneſs of the Paſs, and be able to deſtroy their Enemies as faſt as they came over the Bridge: *Cortes* perceived the Difficulty, but, without appearing concerned, extended the Troops of the Allies along the Bank of the River, and, whilſt both Sides made ſome Diſcharges at each other with little Effect, he commanded the *Spaniards* to advance, and go and take the Bridge. They met with ſuch an obſtinate Reſiſtance, that they were twice repulſed; but, returning a third time with greater Valour, and making Uſe of the Enemy's Trenches againſt them, they ſoon gained the Paſs; which ſo diſcouraged the *Mexicans*, that they began every where to fly; their Commanders ordering the Signal for a Retreat.

The *Spaniards* made haſte to ſeize upon the Ground the *Mexicans* had quitted, and at the ſame time ſeveral Companies of *Tlaſcala* and *Tezcuco* threw themſelves into the River and ſwam to the other Side, and joined the Army. The Enemy was drawing up in Order of Battle, under the Walls of the Town, but upon the firſt Advance of the *Spaniards* they began to retire, provoking them ſtill by ſome Diſcharges of Arrows, which did no Execution, to ſignify that they retreated out of Choice: However, *Cortes* fell upon them with Vigour, as they continued retiring into the City; in the Entrance of which they loſt great Numbers; but, ſheltering themſelves within the Barricadoes, with which they had blocked up the Streets, they began again to uſe their Arms, and defy their Enemies.

Cortes left Part of his Troops without the Town, to ſecure his Retreat, and to oppoſe any Attacks that might be made from abroad, and entered with the reſt: For which Purpoſe, ordering ſome Companies to force the Barricadoes in the Streets on the Right and Left, he advanced to the principal, where the Enemy had their greateſt Force. With ſome Difficulty he broke through their Blockade, and, carried away by his Courage, forgot the Care he ought to have taken of his Perſon; for throwing himſelf, with more Bravery than Prudence, into the midſt of a Multitude of Enemies, he found himſelf ſurrounded by them, when he would have retired to the Aſſiſtance of his Foot. He ſupported himſelf for ſome time with the utmoſt Courage, until his Horſe, being tired, fell under him, and put him in extreme Danger of his Life. Thoſe who were neareſt, immediately advanced, and before he was in a Condition to make uſe of his Arms he was in a manner taken; the only thing that defended him, being the great Deſire the *Mexicans* had to ſieze him alive, for a Preſent to their Emperor. At this Inſtant *Chriſtoval de Olea*, a Native of *Medina del Campo*, a Soldier of diſtinguiſhed Valour, who was not far off, ſaw the Diſtreſs of his General, and calling to ſome *Tlaſcalans* who were fighting near him, forced his Way to the Place with ſo much Reſolution, and was ſo well ſeconded by thoſe that followed him, that, after having killed with his own Hand thoſe who preſſed moſt upon his General, he had the good Fortune to reſtore him to his Liberty.

Cortes immediately made uſe of it to puniſh the Enemy, who, upon eſcaping to that Part of the City which ſtood in the Water, left the *Spaniards* Maſters of all the Streets upon the firm Land. *Cortes* came off with two ſlight Wounds, and *Olea* with three dangerous Cuts with a Sword. *Herrera* informs us, that *Cortes* owed his Liberty to a *Tlaſcalan* unknown, both before and after; and relates the Action as a kind of Miracle; but *Bernal Diaz*, who was one of the firſt that came to the Relief of the General, attributes the whole Honour to *Olea*; and the Deſcendants of this valiant Man may very well be excuſed if they rather believe an Author who relates what he ſaw, than one who goes upon Conjectures. Whilſt this Engagement laſted in the Town, the Troops that were without were not idle: The Nobles of *Mexico* made an extraordinary Effort to reinforce the Garriſon of *Suchimilco*, the Preſervation of which their Emperor *Guatimozin* had very much at Heart. They embarked with ten thouſand choſen Men, and landed at ſome Diſtance from the Town, knowing the *Spaniards* were engaged in the Streets, deſigning to fall upon their Rear; but they were diſcovered, and charged with ſo much Reſolution, that they were glad to reimbark, leaving a good Number of their Men behind them, dead in the Field.

This happy Succeſs made *Cortes* Maſter of the Place, and of all the Streets and Buildings upon the firm Land, and, having placed ſufficient Guards by the Water-ſide, he lodged his Troops near the principal Temple, which, having a ſort of a Wall capable of reſiſting the Arms of the *Mexicans*, ſeemed commodious for the Repoſe of the Soldiers, and the Cure of their Wounds; at the ſame time he ordered ſome Companies to mount, and view the Top of the Temple; which being forſaken, he poſted an Officer and twenty or thirty *Spaniards* in the upper Court, with Inſtructions to relieve the Sentinels often, that they might obſerve every thing that paſſed, as well by Land as by Water. A very neceſſary Precaution, and of which the Uſefulneſs was ſoon experienced; for at Cloſe of Evening they gave Notice, that they diſcovered on the Side of *Mexico*, above two thouſand armed Canoes that advanced with all Speed; by which timely Advice the *Spaniards* were enabled to prevent the Dangers of the Night, by doubling their Guards at the landing Places; and in the Morning they ſaw the Enemy diſembark, at a great Diſtance from the City, in Appearance about fourteen or fifteen thouſand Men. *Cortes* went out to receive them, chooſing advantageous Ground for his Horſe, and leaving behind him a good Part of his Troops for the Defence of his Quarters.

The two Armies quickly drew near, and the *Mexicans* began the Charge; but upon receiving the firſt Fire they gave Ground, and the reſt of the Troops coming up

Sword in Hand, and charging them briſkly, they ſoon turned their Backs and fled, and the whole Action was rather a Chace than a Victory. The Day appointed for the Retreat came, which was executed as had been reſolved, the Enemy ſtill advancing to ſeize the difficult Paſſes, in order to diſturb their March; but this Oppoſition was eaſily overcome, and with conſiderable Advantage, and *Cortes* returned to *Tezcuco* with the Satisfaction of having obtained the Ends he propoſed by this Sally; the Knowledge of *Suchimilco*, and breaking the Force of the Enemy, in order to weaken their Defence of *Mexico*. However, he was inwardly diſſatisfied and melancholy, having loſt nine or ten *Spaniards* in this Expedition; for beſides thoſe that were killed at the firſt Aſſault of the Mountains, the *Mexicans* took three or four of them alive at *Suchimilco*, as they were pillaging, and two of his Servants who fell into an Ambuſcade by ſeparating from the Army: What mightily increaſed his Concern was, the Circumſtance of their being taken alive in order to be ſacrificed upon the Altars of the *Indian* Idols, and their Misfortune recalled to his Mind his own paſt Danger, when in the Enemies Power, of dying after the ſame abominable Manner.

17. The Brigantines were now in a Condition to be launched, and the Canal had Depth and Capacity to receive them. The Day was appointed for the confederate Caziques to appear with their Troops, and particular Care was taken to bring Proviſions. The General looked into the moſt minute Matters that related to the carrying on the War, wherein great Dangers are often occaſioned by ſmall Faults, and therefore a very extenſive Prudence is required. But while *Cortes* had his Thoughts employed in theſe Affairs, a new Accident happened which gave him much Trouble, put his Valour to the Teſt, and was a convincing Proof of his Judgment: A *Spaniard*, who had been long in the Service, came to him full of Concern, and deſired to ſpeak with him in private: When that was granted, he informed him, That during his Abſence a Conſpiracy had been forming againſt his Life, and all his Friends; the Author of it, as he ſaid, was a private Soldier, his Name was *Antonio de Villaſana*; and his firſt Intention was to get clear off from that Enterprize, the Difficulties of which to him appeared inſuperable: He ſhewed his Uneaſineſs at firſt, by murmuring, and ſoon proceeded to dangerous Reſolutions: He, and thoſe of his Faction, blamed the General for his Purſuit of that Conqueſt, declaring, That they would not deſtroy themſelves to gratify his Raſhneſs, talking of returning to the Iſland of *Cuba* as if it was a thing very eaſy to be performed.

They met to conſult about this Point with much Secrecy, and though they found no great Difficulty in quitting the Camp, and paſſing as far as *Tlaſcala*, by Virtue of a ſuppoſed Order from the General, the Inconvenience of going to *Vera Cruz* immediately occurred; for there they could not pretend a Commiſſion, or Leave from *Cortes*, without a Paſs from under his Hand, or the Danger of being ſeverely puniſhed. This put them to a Nonplus, and yet they perſiſted in their Reſolution of withdrawing themſelves, without fixing on the Way how to compaſs it. *Antonio de Villaſana*, at whoſe Lodgings they held their Aſſembly, at laſt propoſed to bring all to paſs by killing *Cortes* and his chief Counſellors, and electing another General, who, having not ſet his Heart ſo much upon the Conqueſt of *Mexico*, would be more tractable, and under whom they might treat without incurring the Name of Fugitives; and they might give it the Turn of a Piece of Service to *Velaſquez*, by whoſe Repreſentation of it to the Court of *Spain*, it might be eſteemed a Service done to the King. They all approved of the Project, and began by applauding the Scheme, and drawing up a Writing ſigned by all that were preſent, whereby they obliged themſelves to follow *Villaſana*, in the Execution of this horrible Attempt. And this Affair was managed with ſo much Dexterity, that the Numbers of thoſe who ſigned increaſed conſiderably; and it was to be feared that this ſecret Contagion might break out into ſuch an Evil as would admit of no Remedy.

They had agreed to feign a Packet from *Vera Cruz*, with Letters from *Spain*, and to give it to the General, when he was at Table, all of them going in together, under Colour of hearing the News; and that, whilſt *Cortes* was reading the firſt Letter, they ſhould make uſe of that Opportunity to murder him, and all his Friends, with their Daggers, after which they were to go out and proclaim Liberty in the Streets, which they thought ſufficient to make the Army declare for them. The Perſons they had marked out for Deſtruction were *Olid*, *Sandoval*, *Alverado*, and his Brothers, *Tapia*, the two Alcaldes, *Martin Irico*, *Caſtillo*, and ſome other Soldiers, Favourites of the General. They had alſo agreed to chooſe *Franciſco Verdugo* for their Captain-General, becauſe he had married a Siſter of *Velaſquez*, and therefore they thought he might be eaſily brought over, and was the moſt proper Perſon to ſupport their Party, but they durſt not acquaint him with their Deſign till the Crime was committed, when they concluded he would be obliged to take upon himſelf the Employment, to prevent greater Evils. Such was the Account given by the Soldier, who begged his Life, for he was concerned in the Conſpiracy. *Cortes* reſolved to aſſiſt in Perſon at the ſeizing of *Villaſana*, and, as the firſt Meaſures that were to be taken, to convict him, becauſe he foreſaw that the clearing up the Truth depended on the firſt Steps.

The Importance of the Affair required Precaution, and, as it was no Time to preſerve the ſlow Proceedings of Juſtice, he went immediately to ſecure *Villaſana*, attended by two Alcaldes, and ſome of his Captains, and found him in his Quarters, with three or four of his Accomplices. The Trouble he was in at the Sight of his General, was a plain Proof of Guilt. And *Cortes*, after he had cauſed him to be put in Irons, ordered all to retire, pretending to examine him, when, making Advantage of the Account that had been given him, he took out of his Boſom the Paper ſigned by all the Conſpirators: He read it, and found the Names of ſome Perſons, whoſe Treachery much increaſed his Concern; but, concealing it from his Friends, he directed the Soldiers who were found with *Villaſana* to be put into another Priſon, and then withdrew, leaving Inſtructions with the Officers of Juſtice, to proceed in his Trial with all poſſible Speed, without taking any Notice of his Accomplices. There was not much to do in it; for *Villaſana*, being convicted by the ſeizing of his Paper, and believing that his Friends had betrayed him, immediately confeſſed his Crime: Whereupon, according to military Juſtice, he was condemded to die, which Sentence was put in Execution that very Night, and the next Morning he was ſeen hanging at the Window of his own Lodging; ſo that the Puniſhment was executed at the ſame Time that the Cauſe was publiſhed, the Guilty being ſtruck with Fear, and the reſt with juſt Abhorrence of the Crime.

Cortes was equally afflicted and provoked, to ſee the Number of thoſe concerned in the Conſpiracy; but it was no proper Time to be ſtrict in doing Juſtice at the Beginning of his Enterprize; and therefore, to avoid puniſhing the Guilty, and the Inconveniencies of Impunity, he gave out, that *Villaſana* had ſwallowed a Paper, which he believed contained the Names of the Conſpirators. Soon after he aſſembled his Captains and Soldiers, and gave them an Account of the horrid Deſign and Conſpiracy of *Villaſana*, againſt his Life, and the Lives of many preſent; adding, "That he thought himſelf very happy, in not knowing whether he had any Accomplices, though the great Care *Villaſana* took to deſtroy the Paper he carried in his Boſom, made him ſuſpect he had ſome: But that he did not deſire to know them, and only intreated his Friends to enquire whether the *Spaniards* had any Complaint to make againſt his Proceedings; becauſe he was deſirous, above all Things, to give entire Satisfaction to his Soldiers, and was ready to correct his own Faults, as he knew how to uſe the Rigour of Juſtice, when Lenity appeared of no uſe." At the ſame Time, he ordered the Soldiers that had been taken with *Villaſana* to be ſet at Liberty; and this, confirmed by the Care he took to ſhew no Change in his Behaviour to thoſe who had offended, fully perſuaded them that he was ignorant of their Crime, and they ever after ſerved with extraordinary Care, to remove any Suſpicions of their Fidelity: However, not thinking ſuch an exceſſive Security which lays Care aſleep, and ſeems to invite Danger, at all conſiſtent with Diſcretion, he ordered twelve Men for the Guard of his Perſon, commanded by an Officer; and 'tis likely he made choice of this Opportunity, that the People might without Surprize ſee this new Addition to his Authority.

Soon after he was perplexed with another Affair, though of a different Sort, which had yet ſome Circumſtances of Sedition; for *Xicotencatl*, who commanded the firſt Troops that came from *Tlaſcala*, either upon ſome Diſguſt, which may eaſily be ſuppoſed, conſidering his haughty Temper, or that he ſtill preſerved in his Mind ſome Remains of his former Enmity, reſolved to leave the Army. Aſſembling ſome Companies, which, upon his earneſt Intreaty, engaged to ſtand by him, he took the Advantage of the Night for his Retreat; and *Cortes*, who was preſently informed of it by the *Tlaſcalans* themſelves, was much concerned at a Behaviour of ſuch dangerous Conſequence, in ſo conſiderable a Commander among thoſe Nations, at a Time when he was juſt ready to put his Deſigns in Execution. He ſent ſome noble *Indians* of *Tezcuco* after him, to perſuade him to return, or at leaſt to ſtay till he heard what he had to offer; but the Anſwer of *Xicotencatl* ſo provoked *Cortes*, that he immediately ſent three Companies of *Spaniards*, with an additional Force of *Indians*, with Orders to take him Priſoner, or kill him, in caſe of Reſiſtance. The latter was put in Execution, for he made an obſtinate Defence to the laſt; but the *Tlaſcalans*, who followed him, contrary to their own Inclination, ſhewed but little Reſolution upon this Occaſion, and returned with the *Spaniards* to the Army, leaving their Commander hanging upon a Tree.

Some ſay that the *Spaniards*, ſent after him by *Cortes*, had private Orders to kill him, which ſeems the ſafeſt Reſolution that could have been taken; but which Way ſoever it was done, the extraordinary Foreſight and Prudence of the General in managing this Affair cannot be denied, ſince neither the *Tlaſcalans* of the Army, nor the Republic, nor even his own Father, made the leaſt Complaint for his Death; for, having been informed ſome Days before, that the young Man ſo far forgot himſelf, as to ſpeak ill of his Conduct, and endeavoured to diſcredit, among thoſe of his Nation, the Enterprize upon *Mexico*, *Cortes* ſent an Account of it to *Tlaſcala*; and the Senate, in which his Father was preſent, anſwered, That, according to the Laws of the Republic, whoever was guilty of Mutiny in the Army deſerved Death; and that he might proceed againſt him with the utmoſt Rigour, if he found it neceſſary; as they would do, both againſt *Xicotencatl*, and all that followed him, if they returned to *Tlaſcala*.

18. Theſe Tranſactions did not hinder his attending to the neceſſary Preparations for his great Deſign. The Brigantines were launched by Degrees, a Work happily brought to a Concluſion, by the Induſtry of *Martin Lopez*; and, whilſt they were carrying on Board the Sails, Rigging, and every thing elſe wanting, *Cortes* reviewed his *Spaniards* under Arms: They conſiſted of nine hundred Men, of which, a hundred fourſcore and fourteen were Fire-arms and Croſs-bows, the reſt were armed with Sword and Buckler, and Launces; eighty-ſix Horſe, and eighteen Pieces of Cannon; the three largeſt of Iron, and the other fifteen Braſs, with ſufficient Stores of Powder and Ball. *Cortes* put five and twenty *Spaniards* on board each Veſſel, under the Command of a Captain, with twelve Rowers, ſix on each Side, and one Piece of Artillery, who immediately embarked; and each prepared to defend his own Veſſel, and ſuccour the reſt. Things being thus diſpoſed for the Entry by the Lake, *Cortes* reſolved, by the Advice of his Captains, to poſſeſs himſelf, at the ſame time, of the three principal Cauſways, *viz.* *Tacuba*, *Iztapalapa*, and *Cuyoacan*, without regarding that of *Suchimilco*.

But, that he might avoid ſeparating his Troops, he divided his Army only into three Bodies, and committed the Execution of *Tacuba* to *Alverado*; with the Title of Governor and Commander in chief of that Avenue. He had under his Command one hundred and fifty *Spaniſh* Foot, and thirty Horſe, in three Bodies, with thirty thouſand *Tlaſcalans*, and two Pieces of Artillery. The Attack of *Cuyoacan* was committed to Colonel *Olid*, with one hundred and ſixty *Spaniſh* Foot, in three Companies, with thirty Horſe, two Pieces of Artillery, and thirty thouſand confederate *Indians*. Laſtly, he gave the Charge of the Attack of *Iztapalapa* to Col. *Sandoval*, with one hundred and fifty *Spaniards*, commanded by two Captains, with two Pieces of Cannon, twenty-four Horſe, with all the Troops of *Chalco*, *Guaxacingo*, and *Chulula*, amounting to above forty thouſand Men.

Olid and *Alverado* marched together as far as *Tacuba*, where they were to ſeparate, and took their Quarters in that City, without any Oppoſition, the ſame being abandoned, as were all the Towns upon the Lake; the Inhabitants that were able to bear Arms being gone to *Mexico* to defend their Capital, and the reſt retired to the Mountains, with their Effects. There they had Intelligence, that the *Mexicans* had formed a conſiderable Body, within half a League of the Town, to cover the Aqueducts, which came from the Mountains of *Chapultepeque*. *Guatimozin* took this ſeaſonable Precaution as ſoon as he received News of the Motions of the *Spaniards*, which preſerved thoſe Conveyances that ſupplied all the Fountains in the City with freſh Water. There appeared on that Side two or three Rows of Pipes, made of Trees hollowed, ſupported by an Aqueduct of Lime and Stone; and the Enemy had caſt up ſome Trenches to cover it. But the two Captains marched out of *Tacuba* with moſt of their Troops; and though they met with a very obſtinate Reſiſtance, they drove the Enemy from their Poſt, and broke the Pipes and Aqueduct in two or three Places, and the Water took its natural Courſe into the Lake. Thus *Olid* and *Alverado* began the Siege by cutting off their Water, obliging the *Mexicans* to ſeek it, at a Diſtance, in the Brooks that ran from the Mountains, and to employ their People and Canoes in Carriage and Convoys.

Olid marched on with his Party, and took Poſt at *Cuyoacan*; and *Cortes*, allowing what Time he thought ſufficient for *Sandoval* to reach *Iztapalapa*, took upon himſelf the Command on the Lake, that he might carry Relief where it ſhould be neceſſary: He had with him Don *Fernando*, Lord of *Tezcuco*, and his Brother *Suchel*, a young Man of brave Spirit, who was baptized ſoon after, and took the Name of *Carlos*. *Cortes* left a ſufficient Number of Troops in that City, to cover his Place of Arms, and make Excurſions to ſecure the Communication of his Quarters. Having diſpoſed all Things after he embarked, drawing up his thirteen Brigantines in a Line; his Deſign was to draw near to *Mexico*, and ſhew himſelf, and afterwards to fall upon *Iztapalapa*, being under ſome Concern for *Sandoval*, who had no Veſſels to diſlodge the *Mexicans* from that Part of the City, which ſtood in the Water, and ſerved as a Retreat for their Canoes: But, in his Return, he diſcovered at a ſmall Diſtance from the City, a little Iſland, a conſiderable Height above the Water; on the Top of which ſtood a pretty large Caſtle, which the Enemy had poſſeſſed themſelves of, to no other End, but to provoke the *Spaniards* with ill Language and Threats, from a Poſt where they thought themſelves out of Danger of the Brigantines.

Cortes did not leave unpuniſhed that Inſolence, in View of the City, the Terraces and Balconies of which were filled with innumerable People, who came to ſee the firſt Action of the Fleet: He drew near to the Shore of the Iſland, and landed with one hundred and fifty of the *Spaniards*, who took two or three different Paths, that led to the Top: They mounted, with ſome Difficulty, by reaſon that the Enemy were numerous, and made a brave Defence, till deſpairing of being able to preſerve the Eminence, they retired to the Caſtle, where they were ſo crowded, that they had not room to manage their Arms: Many periſhed, though moſt were ſaved. Having, by this Enterprize, chaſtiſed the *Mexicans*, the *Spaniards* returned to their Brigantines; but when they were diſpoſing themſelves to make for *Iztapalapa*, they were obliged to take other Meaſures; for the ſame Canoes came out of *Mexico*, which advanced, encreaſing continually in Numbers. The firſt that drew near, rowing gently, were about five hundred, waiting for the reſt to come up; and, in a ſhort Time, thoſe that came out of the City, and other neighbouring Places, made ſo great Number, that it was judged they were four thouſand, which, with the Motion of their Feathers and Arms, afforded a Sight both beautiful and terrible, and ſeemed to cover the Lake.

Cortes drew up his Fleet in Form of a Half-Moon, that he might extend his Front: He confided in the Valour of his Soldiers, and the Advantage of his Brigantines, every one of which was able to make Head againſt a great Part of the Enemy's Fleet. With this Aſſurance he advanced towards the *Mexicans*, to let them ſee he did not decline Battle; and then ordered his Men to lie upon their Oars, and reſt; that they being refreſhed, he might break in upon the Enemy with the greater Force; for the Calmneſs of the Day left the whole to the Labour of the *Mexicans*, who did the ſame, and perhaps, for the ſame Reaſon; but of a ſudden there came a Land-Breeze, which taking the Brigantines aſtern, gave them all the Force that was neceſſary to fall upon the *Mexicans*.

They began the Attack with the Artillery, and then the Brigantines made up with Sails and Oars, overſetting all that ſtood in the Way; the Fire-arms and Croſs-bows made their Diſcharges without loſing a Shot; the Wind too was favourable, driving the Smoke upon the Enemy, blinding them, ſo that they were obliged to retire to avoid it; the Brigantines themſelves ſtaving the ſmaller Veſſels. The Nobles of *Mexico*, who were in the firſt 500 Canoes, made ſome Oppoſition; but the reſt were all Diſorder and Confuſion, the Canoes running foul upon, and overſetting, one another. The Enemy loſt moſt of their Men, and their Fleet was entirely broke and defeated; the Brigantines purſuing the miſerable Remains with their Cannon-Shot, till they forced them into the Canals of the City of *Mexico*. This Victory was of great Moment, on account of the Reputation the Brigantines gained of being invincible; and becauſe it was a great Diſcouragement to the *Mexicans*, to ſee themſelves deprived of that Part of their Power, which conſiſted in the Management and Swiftneſs of their Canoes, not for the Number of them that they then loſt, which was inconſiderable, in regard of what they had ſtill left; but becauſe they were convinced that they were incapable of ſuſtaining the Shocks of the Brigantines.

19. The Night was paſſed but indifferently; and in the Morning, when the Brigantines were preparing to ſail for *Iztapalapa*, they diſcovered a conſiderable Number of Canoes, that were making the beſt of their Way towards *Cuyoacan*; whereupon he reſolved to ſuccour that Place firſt where it was immediately wanted. It was not poſſible to come up with the Enemy's Fleet. But he arrived ſoon after them, at the Time when *Olid* was engaged on the Cauſway, and obliged to make a Front againſt the Enemy that defended it, and to the Canoes on each Side, and was on the Point of retiring, and loſing the Ground he had gained. Neceſſity taught the *Mexicans* as much as the Art of War could have done for the Defence of their Cauſways: They had drawn up towards the City the Bridges that were over the Paſſages, by which the Waters of the great Lake diſcharged themſelves into the other, and fixed Timber and Planks behind them, in ſuch a Manner, that they might mount in Ranks, to charge from the Top; they left Trenches at proper Diſtances, with Water running before them, which obſtructed the Acceſs. After this Manner they had fortified the three Cauſways attacked by the *Spaniards*, who, in each, were obliged to take almoſt the ſame Meaſures to overcome the ſame Difficulties.

The Fire-arms and Croſs-bows played upon thoſe who appeared above the Trench, whilſt others handed Faſcines to fill the Ditch, after which they brought up a Piece of Artillery, and in a few Diſcharges cleared the Paſſage, filling up the next Ditch with the Ruins of its own Fortification. *Olid* had juſt made himſelf Maſter of the firſt Ditch, when the *Mexican* Canoes arrived. But, on Sight of the Brigantines, all thoſe on that Side fled with the utmoſt Diligence, and none ſuffered but thoſe who could not get out of the Reach of the Cannon. But becauſe the *Mexicans*, on the other Side, who thought themſelves ſecure, continued the Engagement, *Cortes* ordered the Ditch in the Rear of *Olid* to be widened, to make a Paſſage for three or four Brigantines; at the firſt Sight of which all the Canoes fled, and the Enemy who defended the next Bridge, finding themſelves expoſed to the great Shot from both the Land and the Water, retired in Diſorder to the laſt Rampart next the City.

That Night the Troops took Reſt, without abandoning the Ground they had gained upon the Cauſway, and the next Morning continued their March, with little or no Oppoſition, 'till coming to the laſt Bridge, which was at the Entrance into *Mexico*, they found it fortified with ſtronger Works, Trenches cut in the Streets, and defended by ſuch a Multitude of People, that the Enterprize ſeemed hazardous, but the Difficulty did not fully appear 'till they were engaged. The Artillery from the Brigantines made a miſerable Slaughter of the People, who were in Crowds, in the Openings of the Streets, whilſt *Olid* was employed in filling up the Ditch, and ruining the Fortifications of the Cauſway, which, when he had done, he charged the *Mexicans*, who defended them, making room for the confederate Troops, under his Command, to come up. The Enemy, at the ſame Time, were ſupported by Troops from the City, and made an obſtinate Reſiſtance on all Sides, but they ſoon loſt ſome Ground; and then *Cortes*, who could not bear the Slowneſs with which they retreated, landed with thirty *Spaniards*, and gave ſo much Life to the Attack, that the Enemy quickly turned their Backs, and the chief Street of *Mexico* was gained.

Another Difficulty occurred; for the *Mexicans* that fled had poſſeſſed themſelves of a Temple near the Entrance of the City, covering all the Outſide with ſuch Numbers of Men, that the whole Building appeared like a Hill of Arms and Feathers. They defied the *Spaniards* with as much Boldneſs as if they had been always Conquerors. *Cortes*, provoked at their Pride, when they had juſt before ſhewn ſo much Cowardice, ordered three or four Pieces of Artillery to be landed; the firſt Diſcharge whereof made them ſenſible of their Danger, and the *Spaniards* were ſoon obliged to point their Cannon lower, againſt thoſe that fled to the inner Part of the City. Thus all that Part of the City was forſaken; for thoſe who fought from Windows and the Tops of the Houſes went off with the reſt, ſo that the Army advanced, and the Temple was gained without Oppoſition. That Day the *Mexicans* ſuſtained a very great Loſs of Men. The Idols were caſt into the Fire, and ſerved to make Illuminations for the Victory.

Cortes was ſatisfied that he had gained Footing in the City; and, finding the Temple capable of more than ordinary Defence, he not only reſolved to lodge his Troops there that Night, but had Thoughts of maintaining that Poſt, to ſtreighten the Enemy, and of removing his Quarters from *Cuyoacan* thither. He communicated his Deſign to his Captains, but they oppoſed it with ſuch Arguments that *Cortes* was convinced, and accordingly, the next Day, he retired to *Cuyoacan*, protected on each Side by his Brigantines; ſo that the Enemy durſt not diſturb his March. The ſame Day he proceeded to *Iztapalapa*, where he was put to the laſt Extremity: He had poſſeſſed himſelf of the Buildings on the Land, and lodged his Army there, fortifying himſelf the beſt he could; but the Enemy, who retired to that Part in the Water, endeavoured from their Canoes to do him all the Damage they could. *Sandoval* had made great Havock among thoſe that approached, ruined ſome Houſes, and had overthrown two or three Succours from *Mexico*, that came to attack him by Land: And that Day the Enemy forſaking a large Houſe, which was but a little from the Land, he reſolved to ſeize it, in order to enlarge his Quarters. He made a Paſſage with Faſcines, and got into the Houſe with ſome of his People; but he had ſcarce entered, when a great Number of Canoes, which had lain in ambuſh, advanced with a Multitude of People, who threw themſelves into the Water, and, taking away the Faſcines, cut off *Sandoval*'s Retreat, by which Means they beſieged him on all Sides, ſhooting from the Terraces and Windows of the neighbouring Houſes. He was in this Diſtreſs when *Cortes* arrived, who, diſcovering that vaſt Number of Canoes in the Water-ſtreets that looked towards *Mexico*, made his Brigantines advance with all poſſible Speed, and played his Artillery with ſuch Effect, that, terrified by the Deſtruction the Balls made, they all fled at once through the moſt retired Streets in the Town, with a Deſign to get through into the Lake; and ſuch was their Diſorder, that the People who were upon the Terraces, crowding into the Canoes, ſunk many of them, and the reſt in their Flight fell in among the Brigantines.

The *Mexicans* ſuſtained ſuch a Loſs that Day, as diminiſhed their Forces conſiderably; and the *Spaniards*, afterwards taking a View of that Part of the City they poſſeſſed themſelves of, made ſome Priſoners, and found a ſufficient Booty to pleaſe the Soldiers. *Cortes* perceived by the Difficulties which *Sandoval* had met with at *Iztapalapa*, that it was impoſſible to make Uſe of the Cauſway without firſt ruining that Half of the City which was the Retreat of the *Mexican* Canoes; and becauſe this would occaſion a Delay which might be of dangerous Conſequence to the other Attacks, reſolved to quit that Poſt, and diſpatch *Sandoval* to poſſeſs himſelf of *Tapeaquilla*, where there was another narrow Cauſway, leſs commodious for attacking, but more advantageous for cutting off the Enemies Proviſions, which they began to want, and which were brought that Way. This Deſign was immediately put in Execution, and *Sandoval* marched by Land, eſcorted by the Brigantines, till he had got Poſſeſſion of the new Quarters; the Place was forſaken, and he lodged himſelf there without Reſiſtance. Afterwards *Cortes* ſailed to *Tacuba*; *Alverado* found this City deſerted, and in his further Progreſs he met with various Succeſſes; he beat down the Works, and filled up the Ditches in the ſame manner *Olid* did; but though he did the Enemy conſiderable Damage, and had once advanced ſo far as to fire ſome Houſes in *Mexico*, he had loſt eight *Spaniards* when *Cortes* arrived, who found the Meaſures he had taken did not anſwer his Deſigns; for this Way of attacking and retreating conſumed his Time, and expoſed his Men, without any Advantage, and was rather doing Acts of Hoſtility than making any Progreſs.

To proceed by the Cauſways was very difficult, by reaſon of the Ditches, which the *Mexicans* were fortifying every Day, and the continual Perſecutions of the Canoes, which always charged in great Numbers where-ever the Brigantines quitted; for which Reaſon he was obliged to think of other Meaſures for the facilitating of his Enterprize. He then commanded all Attacks to ceaſe till farther Orders, and applied himſelf to the providing ſuch a Number of Canoes as might ſecure him the Dominion of the Lake; to which End he ſent ſuch Perſons as he could confide in, to bring all the Canoes that remained in the Towns of his Allies; with which, and thoſe that came from *Tezcuco* and *Chalco*, he made up ſuch a Number as gave freſh Terror to the Enemy: He divided them into three Squadrons, all managed by *Indians*, who knew how to conduct them, under the Command of Captains of their own Nation; and, having diſtributed this Reinforcement among the Brigantines, he ſent four of them to *Sandoval*, four to *Alverado*, and himſelf with the other five joined Colonel *Olid*.

20. Upon this Occaſion the *Mexicans* not only ſhewed Valour, but added military Skill; for they ſtood in need of new Inventions, againſt an Invaſion by a People whoſe Weapons, and Conduct in War, were unknown in their Country; and they gained ſome Advantages, by which they raiſed the Reputation of their good Service: They ſent, by round-about Ways, Canoes full of Pioneers, to clear the Ditches which the *Spaniards* had been filling up, that they might fall upon them with their whole Force, when they ſhould be obliged to retire, a Stratagem which occaſioned the Loſs of ſome Soldiers in the firſt Attacks. By degrees they brought out another Stratagem ſtill more remarkable, for they acted contrary to their Cuſtom, and made ſome Sallies by Night, only to alarm the Enemies, and fatigue them by want of Sleep, that they might afterwards attack them with the Advantage of freſh Troops; but nothing ſhewed their Ingenuity more than what they contrived againſt the Brigantines, by engaging them ſeparate; for which End they built thirty great Veſſels of that ſort which they called Piraguas, but of a larger Size, and ſtrengthened with great Planks, to receive the Shot, and engage under better Shelter. They ſallied in the Night with this Fleet, to poſt themſelves behind the Reeds in the Lake, which grew ſo high and thick, that they formed as it were ſeveral Groves impenetrable to the Sight.

Their Deſign was to draw thither the Brigantines, which cruized, about two at a time, to prevent any Relief getting into the City; and to entice them into that Wood of Reeds they had provided three or four Canoes laden with Proviſions, having likewiſe fixed a good Number of large Stakes in the Water, in hopes to deſtroy the Brigantines, or to make it eaſier to board them. Theſe Contrivances ſufficiently ſhewed, that they knew how to defend themſelves and offend their Enemies, and that they wanted not thoſe Subtilties. The next Day, four of the Brigantines that attended *Sandoval* were to cruize about that Part, under the Command of the Captains *Barba* and *Portilla*. As ſoon as the *Mexicans* ſpied them, they ſent out their Canoes another Way, that, being ſeen at a Diſtance, they might fly among the Reeds; which was ſo well executed, that the two Brigantines purſued the Prize with the utmoſt Force of their Oars, and ſoon fell in among the hidden Stakes, where they were ſo embarraſſed, that they could neither go forward nor backward. At the ſame time the Enemies Piraguas came out, and attacked them on all Sides with ſuch deſperate Fury, that the *Spaniards* were very near being loſt.

But, exerting the utmoſt Efforts of their Courage, they maintained the Fight until ſuch as were expert Swimmers, with Hatchets and other Tools, removed thoſe Stakes amongſt which the Brigantines were faſtened; and, being thus at liberty to work their Veſſels, and play the Artillery, they ſunk moſt of the Piraguas, and followed the reſt as far as Cannon-ball would reach. The *Mexicans* ſuffered exceedingly, but the Brigantines were much damaged, ſeveral *Spaniards* wounded, and all much fatigued: Capt. *Portilla* was killed, to whoſe indefatigable Bravery the Succeſs was chiefly owing, and Capt. *Barba* received ſeveral Wounds, of which he died three Days after: Both theſe Loſſes *Cortes* greatly lamented, and particularly that of *Barba*, for in him he loſt a Friend ever ſteady, and a brave Soldier. It was not long before this Diſaſter was revenged; for the *Mexicans*, having repaired their Piraguas, and reinforced them with new Veſſels of the ſame Kind, concealed themſelves a ſecond time among the Reeds, fortifying the Avenue with a great Number of Stakes, believing the *Spaniards* would again fall into the ſame Snare, without their giving a different Colour to the Deceit. *Cortes*, having Intelligence of this Motion of the Enemy, and being deſirous of revenging the Loſs he had ſuſtained, as ſoon as he could, ordered ſix Brigantines, in the Night, amongſt another Parcel of Reeds, not far from the Place where the Enemy had hid themſelves; and, making Uſe of their own Stratagem, one of them was to ſally early in the Morning, as if in ſearch for the Canoes laden with Proviſions, and afterwards draw as near the concealed Piraguas as was neceſſary, to let them ſee they were diſcovered; which done, ſhe was to tack, and by a haſty Flight to draw them to the Place of the Counter-ambuſcade: Every thing ſucceeded as could have been wiſhed: The Enemy ſallied with their Piraguas in Purſuit of the Brigantine which they looked upon as their own, till, being come within a convenient Diſtance, the other Brigantines ruſhed out, and, before they could ſtop or turn, gave them ſuch a terrible Salute with all their Artillery, that the very firſt Diſcharge overſet beſt part of them, and put the *Mexicans* who were on board the reſt, into ſuch a Conſternation, that before they could recover themſelves, almoſt all the Piraguas were ſunk by the next Vollies, and moſt of the Men periſhed; ſo that the Enemies Fleet was entirely ruined; and *Cortes* had the ſingular Satisfaction of having given them a Defeat by their own Stratagem.

The *Spaniards* had Intelligence of what paſſed in the City, by the Priſoners they took; and finding that Hunger and Thirſt, and Want of all Neceſſaries, began to occaſion Murmuring among the People, and Difference among the Soldiers, *Cortes* applied himſelf with the greateſt Diligence to cut off all Relief from the City; and, to juſtify his own Proceedings, he ſent two or three Noblemen, who were Priſoners, to *Guatimozin*, with Overtures of Peace, on very advantageous Conditions; offering to leave him in full Poſſeſſion of his Empire, provided he would only acknowledge the ſovereign Dominion of the King of *Spain*, whoſe Right was already owned among the *Mexicans*, from the Tradition of their Anceſtors, and the Conſent of ſeveral Ages. This was the Subſtance of his Propoſal, which he repeated, becauſe it grieved him to deſtroy ſo beautiful and ſo wealthy a City, which he looked upon as a rich Jewel in his Sovereign's Diadem.

Guatimozin received the Propoſal with ſomewhat leſs Pride than he was wont, and, as ſeveral Priſoners reported, he called a Council of his chief Officers and Miniſters, with the Prieſts, whoſe Opinions were principally conſidered in all public Affairs, in which he laid before them "the miſerable Condition to which the City was "reduced, the Numbers they had loſt, the Complaints "of the People upon their beginning to want, the De-"ſtruction of their Habitations, and deſired their Ad-"vice, expreſſing as much Inclination to Peace as was "ſufficient to give room for their Flattery or Reſpect to "ſecond him."

This ſo far ſucceeded, that all his Officers and Miniſters concluded immediately to receive the Overtures towards an Accommodation, leaving it till afterwards to conſider of ſuch particular Conditions of Peace as would be moſt for the Intereſt of the State: But the Prieſts poſitively oppoſed all Treaty, feigning to have received ſome Anſwers from their Idols, which gave them freſh Aſſurance of Victory. The Opinion of the Prieſts ſo far prevailed, that all who had Votes concurred with them; and *Guatimozin*, not without much Regret, becauſe he had already began to preſage his own Ruin, reſolved to carry on the War, and ſaid to his Miniſters, "That he would put to Death the firſt Man who ſhould "preſume again to mention Peace, to whatever Diſtreſs "the City ſhould be reduced, without excepting the "Prieſts themſelves, who were moſt obliged to ſupport "the Oracles of their Gods." *Cortes*, being informed of this Determination, reſolved to puſh his Attacks by all the three Cauſways at the ſame time, and carry Fire and Sword into the very Heart of the City, and ſending his Orders to the Commanders of the two Attacks of *Tacuba* and *Tapeaquilla*, he, at the Time appointed, marched himſelf by the Cauſway of *Cuyacan*, at the Head of the Troops commanded by Colonel *Olid*. The Enemy had cleared the Ditches, and caſt up Works; but the five Brigantines which were ſtationed upon that Attack eaſily overthrew their Fortifications at the Time the Ditches were filling up, and the Army advanced without any conſiderable Oppoſition, till coming to the laſt Bridge, which opened upon the Quay, they met with another ſort of Difficulty.

The *Indians* had broke down ſome Part of the Cauſway to enlarge the Ditch, which was ſixty Feet long, and turned into it the Water of the Canals, that it might be the deeper. On the oppoſite Bank they had raiſed a Fortification covered with Planks, in which were Rows of Loopholes with ſome ſort of Traverſes; and they had provided a Multitude of Men to defend that Poſt: But the firſt Diſcharges of the Artillery deſtroyed all that Fortification, and the Enemies, having ſuffered much by the Fall thereof, and finding themſelves expoſed to the Balls, retired into the City, without turning their Backs or abating their Threats. Thus they left the Shore free, and *Cortes*, unwilling to loſe a Moment, immediately ordered the *Spaniards* to poſſeſs themſelves of it, making Uſe of his Brigantines and Canoes to land his Men, and the Horſe paſſed the ſame Way with three Pieces of Artillery, which he thought ſufficient for that Service.

Before they advanced againſt the Enemy, who were ſtill poſted behind the Trenches made acroſs the Streets, he ordered the Treaſurer, *Julian de Alderete*, to ſtay there and fill up and ſecure that Ditch, and the Brigantines to draw near to the Place where the Action was, and do what Damage they could to the Enemy. The firſt Engagement preſently began, and *Julian de Alderete*, hearing the Noiſe of the Battle, and ſeeing the Advances of the *Spaniards*, looked upon the Employment of filling up a Ditch to be unworthy of him when his Companions were fighting, and inconſiderately advanced to join the reſt, leaving that Charge to another of his Company, who either did not know how to perform it, or elſe would not take upon him a Piece of Work which was thought diſhonourable to him who committed the Care of it to him; ſo that all the Men under his Command followed him to the Engagement; and that Ditch which at the Time of the Attack had been thought impracticable, remained intirely abandoned.

The *Mexicans* reſolutely ſtood the firſt Charge. It coſt the *Spaniards* no ſmall Trouble and ſome Blood, to make themſelves Maſters of their Trenches; and the Hazard was ſtill greater when they had paſſed the ruined Buildings, and were obliged to defend themſelves from the Arrows and Darts of the Enemy, which came pouring on them from the Tops of the Houſes and the Windows; but in the Heat of the Engagement there appeared a ſudden Slackneſs in the Enemy, which ſeemed to be the Effect of ſome new Order, for they haſtily quitted the Ground they had defended. This Change was then ſuppoſed, and afterwards appeared, to ſpring from *Guatimozin*'s being informed that the great Ditch was abandoned; whereupon he ordered his Commanders to preſerve their Troops, and to fall upon the *Spaniards* in their Retreat.

Cortes ſuſpected this Motion of the Enemy, and, in regard that he had but barely time enough to return to his Quarters before Night, he began his Retreat, ordering firſt ſome Houſes to be ſet on Fire, in order to prevent their receiving any Damage from them on the next Attack; but they had ſcarce began to march, when their Ears were ſtunned with the melancholy Sound of the Sacred Trumpet, ſo called by the *Mexicans*, becauſe it was not permitted to any but the Prieſts to ſound it, and that only when they animated the People on the Part of their Gods: The Sound was vehemently loud and ſtrong, and the Tune compoſed of diſmal Notes, which inſpired thoſe *Barbarians* with a new kind of Rage, ſuch as made them deſpiſe Life, through a Motive of Religion. Next followed the intolerable Noiſe of their hideous Outcries; and, when the Army marched out of the City, they fell upon the Rear, which was brought up by the *Spaniards*, an incredible Multitude of their reſolute Warriors being picked out of the whole Army for this Action.

The Fire-arms and Croſs-bows faced about, and made Head; and *Cortes*, with the Cavalry, endeavoured to put a Stop to the Enemy; but, being informed of the Difficulty of the Ditch, which hindered the Retreat, he would have formed his Battalions, and could not; becauſe the Confederates, who had received Orders to retire, being the firſt that came to the Ditch, haſtily threw themſelves into it, in the greateſt Confuſion; ſo that his Orders were not heard, or not obeyed. Many got to the Cauſway in the Brigantines and Canoes, but more threw themſelves into the Water, where they found whole Troops of *Mexicans*, who either wounded or drowned them. *Cortes* was left with ſome of his own People to maintain the Fight, his Horſe was killed under him, and Captain *Guzman*, alighting to give him his, was taken Priſoner, without Poſſibility of being reſcued. *Cortes*, at laſt, got to the Brigantines, and returned to his Quarters, wounded and defeated: Above forty *Spaniards* were taken alive, to ſerve as Sacrifices to their Idols; one Piece of Cannon was loſt; above a thouſand *Tlaſcalans* were killed; and there was ſcarce any one *Spaniard* that was not hurt. This was, in reality, a very terrible Blow, of the Conſequence of which *Cortes* was very ſenſible; but he would not ſuffer his Countenance to ſpeak the Grief of his Heart: On the contrary, he appeared, if not chearful, ſerene; and tho' not gay, yet tolerably compoſed.

While *Cortes* was employed in this Attack, *Sandoval* and *Alverado* entered at the ſame time, and met with the ſame Oppoſition, with very little Difference in the Succeſs of their Attacks : But they did not meet with the Misfortune of the Ditch, and therefore their Loſs was leſs ; though in both Attacks they loſt above twenty *Spaniards*, which makes up the Account of about ſixty of his own People, in the Action of *Cuyoacan*. The Treaſurer *Alderete*, conſidering the Damage which his Breach of Orders had occaſioned, was ſenſible of his Offence, and haſtened to the General's Preſence with much Sorrow, offering his Head to atone for his Crime. *Cortes* gave him a ſevere Reprimand, without any farther Puniſhment ; not thinking it proper, at that Juncture, to diſcourage the Soldiers, by inflicting upon that Officer, the Chaſtiſement which he merited. Upon this Occaſion they were very ſenſible, ſays a *Spaniſh* Author, of the ſingular Gift of a private Soldier, *Juan Gatalan*, who, without any other Medicine than a little Oil, and certain Benedictions, cured their Wounds in ſo ſhort a time, that it did not look like the Work of Nature.

21. The *Mexicans* celebrated their Victory with great Rejoicings, and that Night the *Spaniards* ſaw, from their Quarters, all the Temples of the City crowded with innumerable Lights, and Veſſels of Perfumes ; and in the principal Temple, dedicated to the God of War, they heard the Sound of military Inſtruments in ſeveral Concerts, which were not altogether diſagreeable. With theſe pompous Preparations they celebrated the Sacrifice of thoſe miſerable *Spaniards* who were taken alive ; the Blood of whoſe leaping Hearts, ſtill warm, was ſprinkled upon their Idol ; while theſe wretched Victims, with their laſt Breath, were calling upon the God of Truth. This was ſuppoſed to be the Occaſion of that extraordinary Solemnity ; and the Fires gave ſo great a Light, that the Motion of the People was perceived. The Advantage they had gained, joined to the Satisfaction of having appeaſed their God of War, by the Sacrifice of ſo many *Spaniards*, ſo far raiſed the Pride of the *Mexicans*, that the very ſame Night, a little before Break of Day, they advanced by the three Cauſways, to beat up the Quarters, with a Deſign to ſet fire to the Brigantines, and to compleat the Deſtruction of thoſe People ; whom they, with good Reaſon, concluded to be either wounded or ſpent with Fatigue ; but they knew not how to conceal their Motion ; for the infernal Trumpet, which inſpired them with ſo much Fury, turning their Deſpair into religious Worſhip, gave Notice of their Approach, and the *Spaniards* were ſo well prepared to receive them, that they were repulſed by the Artillery of the Brigantines, and ſome Pieces which were mounted at their Lodgment ; which, playing upon the Cauſway, upon thoſe Throngs of People, ſufficiently chaſtiſed their Preſumption.

The next Day *Guatimozin* employed ſeveral Artifices to intimidate the *Indian* Allies ; he gave out that *Cortes* had been killed in his Retreat on the Cauſway, thereby giving the People Hopes that they ſhould ſhortly be delivered from their Oppreſſions : He ſent the Heads of the ſacrificed *Spaniards* to all the neighbouring Towns, that thoſe Tokens of his Victory might bring ſuch as had fallen off from him, back to their Obedience : And laſtly, he reported that their ſupreme Deity, the God of War, being appeaſed by the Blood of theſe their Enemies, had informed him by an intelligible Voice, that the War ſhould be at an End in eight Days, and, that all ſhould infallibly periſh who neglected this Advice. This he invented, concluding that he ſhould quickly make an End of all the *Spaniards* ; and he found Means to ſend ſeveral Perſons unknown, into the Enemies Quarters, who ſpread theſe Threatenings among the *Indian* Nations which ſerved againſt him.

The Oracles of that Idol had ſuch Reputation among the moſt diſtant Nations, that the *Indians* were perſuaded of the Infallibility of theſe Threats : The Notion of eight Days ſo preciſely limited for the fatal Period of their Lives, had ſuch an Effect, that they reſolved immediately to quit the Army ; and, during the two or three firſt Nights, the greateſt Part of the confederate Troops deſerted, even the *Tlaſcalans* and *Tezcucans* diſbanded with the ſame Diſorder, either becauſe they really feared the Oracle, or that they were led away by the Example of thoſe who did. This was a freſh Affliction unto *Cortes*, almoſt cauſing him to deſpair of the Succeſs of his Enterprize. But the Moment that he was informed of the Occaſion of that ſudden Change, he ſent their own Commanders after the Fugitives to ſtop them ; delaying till the eight Days aſſigned by the Oracle being paſt, they might be ſenſible of the Impoſture of the Prediction, and better diſpoſed to return to the Army.

22. This notable Contrivance of *Cortes* had the deſired Effect ; for when the eight Days were expired, the *Indians*, having fully recovered from their Fright, returned to their Quarters with freſh Vigour and Reſolution. Don *Hernando*, Prince of *Tezcuco*, ſent his Brother to bring back thoſe of his Nation, who returned with him, and ſome new Levies that were coming to join the Army. The *Tlaſcalan* Deſerters did not dare to proceed on their Journey, for fear of expoſing themſelves to Puniſhment, but waited to ſee the Event of the Prediction, with a Deſign to join ſuch of their Nation as ſhould have the good Fortune to eſcape after the imaginary Defeat ; but at the time they were undeceived of their Credulity, they had an Opportunity of incorporating themſelves with a Reinforcement that was coming from *Tlaſcala*, and were better received in the Army upon their Return. The Noiſe this Increaſe of Forces, and the Diſtreſs of the capital City, made in the neighbouring Countries, prevailed with ſeveral Nations who had been Enemies or Neuters, to declare in Favour of the *Spaniards*. One of the moſt conſiderable, was the Nation of *Otomies*, a fierce unnatural People ; who, after the Example of Beaſts, preſerved their Liberty amongſt Mountains, and had hitherto kept themſelves free from the *Mexican* Empire, without any other Fortification than the Sterility of their Country, which afforded no Temptation to a Conqueror.

Thus *Cortes* once more found himſelf at the Head of an Army, of upwards of two hundred thouſand Men, paſſing in a few Days from a terrible Storm to an agreeable Calm. The *Mexicans* were not idle during this Suſpenſion of Arms, to which the *Spaniards* were reduced. They made frequent Sallies, beating up the *Spaniſh* Quarters both by Night and Day, and were always repulſed with Loſs. By ſome of the laſt Priſoners, *Cortes* was informed of the great Diſtreſs the City was in ; that the Soldiers were diſſatisfied, and the People reduced to Extremity for want of Bread and Water ; that Abundance of People died by drinking the brackiſh Water of their Pits, and that the Proviſions they got by Canoes, were equally divided among the Nobles, and became the Subject of Impatience and Diſcontent to the Populace, whoſe Clamours began to give ſome Suſpicion of their Fidelity. Upon which Intelligence *Cortes* aſſembled his Captains to conſult what was proper to be done. He repreſented the ſmall Hopes he had that Want would oblige the Beſieged to ſurrender, becauſe of the implacable Hatred they bore the *Spaniards*, and of thoſe pretended Anſwers of their Idols. He gave his own Opinion to proceed immediately to Action, for the Reaſons he had alledged, and for fear the Allies ſhould again deſert him. And it was alſo reſolved not to retire as before, but that each of the *Spaniſh* Corps ſhould endeavour to make their Quarters good in that Part of the City, into which they ſhould be able to penetrate.

The General, after this Reſolution was taken, and having made Proviſion neceſſary for the Subſiſtance of his Troops, in a City where all things were wanting, cauſed the Forces, at the Dawning of the appointed Day, to march out of their reſpective Quarters ; *Alverado* from *Tacuba*, *Sandoval* from *Tapeaquilla*, and the General, with the Body of Troops, commanded by *Olid*, from *Cuyoacan* ; each having his Brigantines and Canoes to ſupport him. They found all three Cauſways in a Poſture of Defence, the Bridges drawn up, and the Ditches all cleared and guarded. All theſe Difficulties they ſurmounted with the ſame Induſtry they had done others, and, after ſome ſmall Delay, the three Bodies arrived in the City ; and ſoon gained the ruined Streets. All the *Spaniards* attempted the firſt Day was, only to lodge themſelves, each

Body fortifying their Quarters with the Ruins of the Houſes, in the beſt Manner they could.

This cauſed great Confuſion among the *Mexicans*, and entirely broke all the Meaſures they had taken to charge the *Spaniards* in their Retreat. The Rumour of it was ſoon ſpread, the Danger greatly magnified, and every one's Thoughts was employed about providing ſome ſpeedy Remedy. The Miniſters inſtantly repaired to *Guatimozin*'s Palace, and, by their preſſing Intreaties, prevailed with him to retire that very Night to a more diſtant Part of the City. Councils were continually held, and the Opinions were different, being either bold and reſolute, or timorous and dejected, according as the Underſtanding followed the Dictates of their Hearts; ſome voted that the King, for the Security of his Royal Perſon, ſhould be immediately conveyed to ſome Place leſs expoſed; others for fortifying that Part of the City where the Court then was, and others preſſed hard to diſlodge the Enemy from the Poſts they poſſeſſed. *Guatimozin* inclined to the Advice of thoſe who expreſſed the greateſt Reſolution; ſo that he declared he was fully determined to ſhare his Fate with his People; and that Moment gave Orders that Preparations ſhould be made to attack the Enemy at Day-break, with the Remainder of his Forces. To this Purpoſe the Chiefs, with all poſſible Expedition, aſſembled all the Troops, which were divided into three Battalions, with a Deſign of exerting their laſt Strength in this Effort, to the total Deſtruction of the *Spaniards*.

Soon after Dawning, the Enemy preſented themſelves within Sight of the three Lodgments; but the Artillery which played upon the Avenues, made ſuch a terrible Slaughter in their Van-guard, that they durſt not advance to put their Orders in execution, and were ſoon convinced that their Attempt was wholly impracticable; ſo that without venturing nearer they began to give back, endeavouring to make what was in reality a Flight, looked upon as an orderly Retreat. But the Motion, as it was ſlow, gave the *Spaniards* an Opportunity to rout and diſperſe the Enemy, and bettered their Quarters for the enſuing Night. All was ſo happily and ſo expeditiouſly effected, that in leſs than four Days the three Leaders came in Sight of *Tlateleuco*, whither they had all directed their Courſe. *Alverado* was the firſt that came to that ſpacious Square, where he found the Enemy endeavouring to draw up in Order of Battle: But he gave them not time, neither was it an eaſy Matter for *Indians*, when once in Diſorder, to return to a Charge; ſo that, at the very firſt Onſet they abandoned the Ground, and in great Confuſion retired to the Streets on the oppoſite Side. *Alverado* obſerved that there was at a ſmall Diſtance a very large Temple, the Towers whereof were poſſeſſed by the Enemy; and thereupon he immediately detached ſome Companies to drive them from thence, in order to ſecure his Rear; which Orders they ſoon performed. Soon after came up, by a different Avenue, the Detachment belonging to *Olid*, but then under the Command of *Cortes* himſelf; and the confuſed Throng of *Mexicans* that fled before him into the Square, fell in upon the Battalion which *Alverado* had drawn up in Order of Battle; where theſe Wretches being attacked on every Side, moſt of them periſhed, and the like Fate attended thoſe who were driven by *Sandoval*, who preſently after arrived.

Thoſe of the Enemy who had retired to the Streets which led to the other Parts of the City marched with the utmoſt Precipitation, to defend the Perſon of their Prince, whereby the *Spaniſh* General had an Opportunity to lodge himſelf to the beſt Advantage, without any Interruption, ordering the Brigantines and Canoes to ply about the three Cauſways, and to give him Notice of what ſhould occur. The next Morning all the Streets were filled with armed *Indians*, but they were poſted there only to cover thoſe who were working upon the Fortifications, which were making for their Retreat; and *Cortes*, perceiving that they did not attempt by any Hoſtilities to provoke him, ſuſpended the Attack which he had at firſt determined, being inclined to offer them Peace, as ſuppoſing they might be now diſpoſed to an Accommodation. The Meſſage was carried by three or four principal Priſoners, and *Cortes* was impatiently waiting for an Anſwer, as not doubting but the Propoſal would be gladly received; becauſe it was obſerved that thoſe Multitudes of the Populace who were wont to be always ready to defend the Streets, were entirely withdrawn. The Quarter to which *Guatimozin*, with his Miniſters and Soldiers was retired, was a very ſpacious Angle of the City, the greateſt Part whereof was defended by the Lake, and the reſt was at no great Diſtance from the great Square of *Tlateleuco*; and it was fortifyed by a ſtrong Wall made of huge Planks and Faſcines, which reached the Buildings on each Side of thoſe Streets, before each of which was a broad and deep Ditch, full of Water, which they had dug acroſs the Streets, to give a Current to the Waters of the Canals.

The enſuing Morning *Cortes*, followed by the greateſt Part of the *Spaniards*, marched to view the Ground which the Enemy had forſaken, and advanced till he came within Sight of theſe Fortifications, which he found covered with an incredible Multitude of Men in Arms; but who ſeemed to be diſpoſed to Peace, for they neither ſounded their warlike Inſtruments, nor made any Outcries. The General drew back, and returned ſeveral times with the *Spaniards* without offering to moleſt them: And it appeared that the *Mexicans* had Orders to do the like. During the three Days Suſpenſion of Arms, *Guatimozin* held ſeveral Councils to deliberate on the Overtures of Peace, and the Majority voted the admitting the Treaty, ſenſible of the miſerable Condition to which they were reduced, while others, conforming their Sufferings to the Inclination of their Sovereign, ſhewed themſelves willing to continue the War; but the deteſtable Prieſts ſupported the leſſer Number, aſſuring Victory with dark and myſterious Menaces, and inſpired the whole Aſſembly with the ſame diabolical Fury which poſſeſſed their own Breaſts. Upon this it was reſolved to proſecute the War, and to renew their Hoſtilities, while *Guatimozin*, before he broke up the Council, gave Orders that all the Piraguas and Canoes ſhould retire to a Bay which the Lake made in that Part of the City, in order to ſecure a Retreat, in Caſe they ſhould be driven to Extremity.

This Order was inſtantly put in Execution, and an incredible Number of theſe Veſſels made to that Bay, of which Motion immediate Notice was ſent from the *Spaniards* who were upon the Lake, to *Cortes*; who, without Heſitation, preſently concluded, That the *Mexicans* were uſing theſe Precautions with no other View than to ſecure their Prince's Perſon. Hereupon he appointed *Sandoval* for Commander in chief of all the Brigantines, with Orders to ſurround the Bay at a Diſtance, and to have a watchful Eye upon whatever Motion the Enemy ſhould happen to make. Soon after he advanced with his Troops, but the Enemy had already received Orders to defend themſelves; and before the *Spaniards* came up, the *Indians* declared the Breach of the Treaty by their hoſtile Cries; and with a ſteady and reſolute Countenance, prepared for the Encounter; but it preſently appeared that their Courage began to fail them, for they no ſooner perceived the terrible Havock which the firſt Diſcharge of the Cannon made in their wooden Fortification, which they fooliſhly imagined to be impenetrable; but they ſent Notice thereof to *Guatimozin*, for it was not long before they made Signs of demanding a Parley, by hanging out white Cloths, and frequently repeating the Word *Peace*.

They were given to underſtand, that whoever had any Propoſal to offer from their Prince, might approach; upon which, four *Mexicans*, who ſeemed to be Perſons of ſome Note, appeared on the further Side of the Ditch: Theſe Deputies, upon a Motion made by *Cortes*, promiſed, in the Emperor's Name, that he ſhould confer with him the next Day; and then brought an Excuſe; which Method they purſued for four Days together, while *Guatimozin*, who never intended any ſuch thing, was preparing to make his Eſcape by the Lake.

23. The Day being come, which *Cortes* had appointed as the utmoſt Period he would allow, *Sandoval* diſcovered at the Dawn of the Morning, Multitudes of

Mexicans, with all imaginable Diligence, embarking on board the Canoes which were in the Bay, upon which he approached them ſlowly, and then the Canoes of the Enemy, on board of which were the Nobility and all the principal Perſons of the City, began to move, having unanimouſly reſolved to make their laſt Efforts, and at all Hazards to maintain the Fight, till their Prince had made his Retreat, after which they were to follow him by ſeveral Ways. Accordingly they put this Deſign in Execution, attacking the Brigantines with Vigour: But, at the ſame Time that the *Mexicans* were engaging with ſuch extraordinary Fury, *Sandoval* obſerved, that from the fartheſt Part of the Bay ſix or ſeven Piraguas, with the utmoſt Force of Oars, were making the beſt of their Way, upon which he ordered Capt. *Garcias de Holguin* to chaſe them with his Brigantine, and endeavour to take them.

That Captain, without loſing a Moment's Time, uſed ſuch Diligence that he ſoon overtook them; when turning the Head of his Brigantine, he fell in upon the foremoſt Piragua, which ſeemed to command the reſt. They all at once ceaſed rowing, and lay upon their Oars, when they found themſelves attacked, and ſome of thoſe who were in the firſt Piragua called out to the Brigantine not to fire, ſaying, his *Mexican* Majeſty was on board that Veſſel, which Words were interpreted by ſome *Spaniſh* Soldiers, who began to have a Smattering of the *Mexican* Language. Upon this the Brigantines boarded the Piragua, into which *Holguin*, with ſome *Spaniards*, immediately leaped in order to ſecure their Prize. *Guatimozin* inſtantly advanced, and diſtinguiſhing the Captain, by the Reſpect paid him by the reſt, ſaid, "I am your Priſoner, and ready to go whither "you think fit to conduct me: All I have to deſire is, "that ſome Regard may be had to the Honour of my "Conſort, and to that of the Women who accompany "her."

He then paſſed into the Brigantine, and gave his Hand to that Princeſs to help her up, and was ſo much Maſter of himſelf, and ſo far from being in any Conſternation, that, perceiving *Holguin* to be in ſome Concern about the other Piraguas, he with great Sedateneſs of Countenance added, You have no Occaſion, Sir, to give yourſelf any Trouble concerning thoſe, for they will all come to die at the Feet of their Prince; and upon the firſt Signal he made them, they let their Weapons drop out of their Hands, and followed the Brigantine as Priſoners. *Sandoval* was all that time hotly engaged with the Canoes, and by the Reſiſtance he met with, he became ſenſible of the Quality of thoſe who defended them, and of the Courage and Fidelity of the *Mexican* Nobility, who, at the Hazard of their Lives, had undertaken to ſecure their Prince's Liberty. But they ſoon had Notice of his being taken, and then their loud military Cries were converted into leſs noiſy Lamentations. *Holguin* came up at the ſame Time, having firſt diſpatched a Canoe with the News to *Cortes*, and, without bearing down too near upon *Sandoval*'s Brigantine, he gave him as he paſſed by a brief Account of what had happened, but perceiving he was deſirous of taking care of that important Priſoner, he made the beſt of his Way, leſt *Sandoval* ſhould ſend him an Order to that Purpoſe.

As ſoon as this News was brought him, *Cortes*, lifting up his Eyes towards Heaven, as acknowledging the ſupreme Author of all his Succeſs, ordered two Companies of *Spaniards* to the Landing-place, to guard the Royal Priſoner, and then went himſelf to receive him not far from the Quarters, which he did with great Reſpect, Signs and Geſtures ſerving inſtead of Words, to which *Guatimozin* made a Return in the ſame Manner, endeavouring to conceal the Agitations of his Breaſt by a forced Complaiſance.

Guatimozin was about twenty-four or twenty-five Years of Age; ſo brave, that he had, by his Exploits and Victories in the Field, riſen to thoſe Honours which qualified the Nobles to aſcend the Throne. He was as to his Perſon well proportioned, tall, robuſt, and ſtrong built, and of ſo fair a Complexion, that among thoſe of his own Nation he looked like one of a different Climate. The Empreſs, who was about the ſame Age, by the Gracefulneſs of her Carriage attracted the Eyes of all, but her Beauty was rather majeſtic than delicate; ſhe was Niece to *Motezuma*, or, as ſome ſay, his Daughter; which when *Cortes* underſtood, he renewed the Offers of his beſt Service, profeſſing himſelf obliged to pay to the Perſon of that Princeſs the Veneration he owed to the Memory of that Monarch. This great Event happened on the 13th of *Auguſt* 1521, and therefore we may from thence date the Dominion of the *Spaniards* over this Empire. The Captive Emperor ſent his Orders to his Subjects to lay down their Arms, and to ſubmit to him who had their Monarch in his Power, which they accordingly did, and thereby put an End to the War for the preſent.

The kind Uſage given at firſt to the Emperor *Guatimozin* did not laſt long, but the Change made in his Treatment did not properly ariſe from *Cortes* himſelf, but from the Soldiers, who, remembering what vaſt Quantities of Gold they had formerly ſeen in the Poſſeſſion of *Motezuma*, demanded an Account of what was become of them; and when *Cortes* very truly proteſted that he knew as little of them as they did, they grew ſo furious and inſolent, as to ſuggeſt that he had ſecretly ſecured them for his own Uſe. They were ſo much the bolder in this Matter, becauſe they found themſelves ſupported therein by the King's Treaſurer *Julian de Alderete*, who had great Authority, and who, as he was Nephew to the Biſhop of *Burgos*, hated *Cortes* heartily, and inclined to do him all the Miſchief he could. This Man, finding that no Account could be obtained of theſe Treaſures, demanded that the unfortunate *Guatimozin*, and his firſt Miniſter, ſhould be put into his Hands in order to be examined about them, which in his preſent Ciacumſtances *Cortes* durſt not refuſe. The Method this Gentleman took to make them diſcover what he ſought was pretty ſingular.

He put them upon the Rack, as ſome Writers ſay; but as others more truly affirm, cauſed them to be extended upon burning Coals. The Miniſter looking upon the Emperor cried out violently, upon which *Guatimozin* ſaid, *Do you think I lie here upon Roſes?* Which Reproof ſtruck the poor Creature ſilent, ſo that he expired without any farther Complaints. But *Cortes*, hearing his firſt Cries, broke into the Apartment, and releaſed the Emperor, and the Soldiers themſelves approved his Conduct, and blamed the Treaſurer's Barbarity. This Cruelty had not the deſigned Effect; for there was no Diſcovery made of the Treaſure for which they ſought, which made them almoſt diſtracted. They ſearched all Parts of the Lake to no Purpoſe, ranſacked the Temples without finding much, and tore to Pieces the Tombs, in which indeed they found ſome little Gold, which *Cortes*, to pacify them, divided amongſt them.

24. The Provinces of the *Mexican* Empire that were neareſt that Capital immediately ſubmitted to the Conqueror, and *Cortes*, having received Intelligence of the Kingdom of *Mechoacan*, which lies to the Weſtward of *Mexico*, he firſt ſent *Montano*, with three other *Spaniards* as Embaſſadors, to viſit the King, who at firſt received them indifferently, though afterwards he treated them magnificently; and went himſelf to ſee *Cortes*, who ſoon after diſpatched *Chriſtopher Olid* to take Poſſeſſion of that Country with an Army, which he accordingly did, and forced the King, who ſhewed himſelf diſpleaſed with his Proceedings, to fly for Shelter into the Mountains. This great Flow of Succeſs altered the Temper of the *Spaniſh* General, who began now to diſcover ſuch Haughtineſs and Cruelty in his Diſpoſition, as nothing could juſtify. *Cortes*, having through this Country penetrated to the South Sea, erected Forts and built Ships there, for farther Diſcoveries on that Side, and ſent alſo *Gonzalo de Sandoval* to ſubdue the Countries near *Tabaſco* and *Tecountepec* on the North-Sea; and *Pedro de Alverado*, another Commander, was detached with a Body of *Spaniards* and confederate *Indians* to take Poſſeſſion of the Countries bordering upon the Vale of *Guaxaca*, to the Eaſtward of *Mexico*, who all ſubmitted to the Conqueror.

While *Cortes* was thus employed in reducing this Country to his Obedience in the Name of the Emperor *Charles* V. *Chriſtopher de Tapia* arrived at *Vera Cruz*, with a Commiſſion from that Prince, to command all the new Conqueſts: But the Garriſon *Cortes* had left at *Vera Cruz* ſo threatened and terrified *Tapia*, that he was glad to make his Eſcape, and leave the General in Poſſeſſion of *Mexico*. Having got rid of this Rival, *Cortes* marched in Perſon to the Province of *Panuco*, which he obliged to ſubmit to him, whereupon he divided the Country and all the *Indian* Inhabitants among the Officers and Soldiers, who treated them as Slaves; and this was his Practice in every Province, where the People voluntarily ſubmitted to him, or were compelled to it by Force. But notwithſtanding this bad Behaviour to the Natives, and his refuſing to reſign his Government to thoſe who were ſent to ſucceed him in his Command, ſo powerful were the rich Preſents he from Time to Time ſent to the Emperor, and ſuch were the Repreſentations made to that Prince in his Favour, that *Cortes* was declared Captain-General and Governor of *New Spain* by the Emperor.

The Governor of *Hiſpaniola* and *Cuba* were commanded to reinforce that General, and give him all poſſible Aſſiſtance: Whereupon, finding himſelf now eſtabliſhed in his Command, he ſet about rebuilding the City of *Mexico*, which he had burnt and demoliſhed. He aſſigned Places for building Churches and other public Edifices, laid out Market-Places, divided the beſt Part of the Ground among the *Spaniards*, and the reſt among the Natives, giving them Encouragement to build and people the Place again: He aſſigned one quarter Part particularly to *Motezuma*, a Son of the late Emperor, and another to one of the moſt popular *Indian* Generals, and they ſoon erected a much finer Town than that which had been deſtroyed, having now the Advantage of Iron Tools, Carriages and Engines, which they wanted before. But nothing could be more magnificent than the Palace *Cortes* erected for himſelf upon the Ground where *Motezuma*'s Palace formerly ſtood, about which 'tis ſaid he uſed ſeven thouſand Beams of Cedar, ſome of them 120 Foot in Length; he alſo provided himſelf with a numerous Train of Artillery, conſiſting of thirty-five Pieces of Braſs Cannon, and ſeventy of Iron, which gave the *Indians* a vaſt Opinion of his Power; but that which was his real Strength, and did him moſt Service, both in *Mexico* and *Europe*, was the prodigious Wealth he acquired by the Plunder of all the Provinces he became Maſter of, and the rich Mines of Gold and Silver he every Day diſcovered, or took from the Owners.

All his great Conqueſts, however, could not procure him Reſt, and a peaceable Eſtabliſhment; for ſometimes he was in Danger from the Intrigues of the *Indians*, who were very deſirous of recovering their Country, and driving out or deſtroying the *Spaniards*: And to put an End to theſe Contrivances, he, in 1527, found himſelf obliged to hang *Guatimozin*, and two other *Indian* Princes, whom he had detected in a Conſpiracy againſt him. Sometimes he found no leſs Uneaſineſs from the Ambition, Avarice and Malice of ſome of his own Countrymen. Thus, for Inſtance, *Chriſtopher Olid*, who had behaved ſo gallantly in the War againſt the *Mexicans*, revolted from him, but was ſoon taken off by a violent Death. *Julian de Alderete*, whom we have ſo often mentioned, contrived the Murder of *Cortes* while upon his Knees at Maſs, which he afterwards confeſſed to him, and aſked his Pardon. At another Time, a Prieſt, whoſe Name was *Leon*, formed a Deſign of blowing him into the Air by ſetting Fire to a Barrel of Gun-powder, which either by Contrivance or by Chance was placed immediately under his Lodgings. Theſe Accidents ſhew how fortunate a Man *Hernan Cortes* was.

But how great ſoever his Courage, his Conduct, or his Succeſs, yet he wanted not many Enemies envious alike of his Merit and his Fortune, and who therefore took Abundance of Pains to prejudice the Emperor *Charles* V. againſt him.

In the Year 1528 *Cortes* found it convenient to return into *Spain*, in order to juſtify his Conduct againſt his Enemies. The Emperor *Charles* V. received him with great Reſpect, gave him the whole Vale of *Atriſco*, with the Towns and Villages therein; conferred on him the Title of Marquis of the Vale of *Guaxaca*, and, to compleat his Favours, procured him a very honourable Marriage. The next Year he returned to *Mexico* with his Lady, but with a very limited Commiſſion, which turned more to the Diſadvantage of the *Spaniſh* Government, than to the private Loſs of the Marquis, who was ſo much beloved and eſteemed in that Part of the World, as to ſtand in no Need of Authority to procure him Reſpect. He was ſome time afterwards Captain-General, *Mendoca* being Viceroy of the Province, at which Time there happened many private Grudges between them; but yet they joined together for the finding out a Paſſage from thoſe Seas to ours, which we properly call the North-Weſt Paſſage, as alſo the Conqueſt of *Ciboa* and *Quivira*, where they were perſuaded by certain Friars that the People worſhipped the Croſs, and had other Tokens of Chriſtianity: But all proved falſe; and few *Spaniards* returned Home, their Miſery was ſo great, and the Country ſo cold and barren, the People cruel, and five hundred Leagues from *Mexico*. *Cortes*, after his taking *Mexico*, ſent to diſcover the Northern Parts, and his People arrived in a Country where *Ticoantipe Cician Pipe* was King, who received them kindly, and ſent an Embaſſador to *Cortes*, thinking he was come out of the Clouds, and that their Veſſels were great Whales. They wondered at their Horſes, and accepted a friendly Peace, offering *Cortes* fifty thouſand Men to aſſiſt in conquering *Tutepac*, who was his Enemy, for uſing the Chriſtians well.

Some new Troubles that he met with in relation to his Diſcoveries, wherein the Viceroy interfered, inclined him in the Year 1542 to make a ſecond Voyage into *Spain*, where he was received with as much Honour, and yet obtained as little Satisfaction as before. To ſpeak impartially, the Emperor had conceived a kind of Jealouſy, that if *Cortes* was rewarded according to his Merits, he would become too formidable for a Subject. The Marquis was a Man of too much Senſe and Penetration not to diſcern the Judgment that was formed of him at Court, when he had reſided there but a little while: He was however too wiſe, and too much a Man of Honour, to think that any Miſtakes made by his Prince could cancel any Part of the Duty he owed him. For this Reaſon he applied himſelf more aſſiduouſly than ever to merit the Emperor's Affections. He attended him in his dangerous and diſaſtrous Expedition againſt the *Algerines*, and notwithſtanding all his former Services, and ſo low a Commiſſion, as to be without a Voice in the Council of War, being unhorſed in a Charge he made againſt the Infidels, he is ſaid to have loſt in the Field two Emeralds of immenſe Value. After his return to *Spain* from that Expedition, he affected to lead a quiet and retired Life, employing moſt of his Time in the Inſtruction of his Children, of whom he had many both legitimate and illegitimate. His ſecond Wife was the Daughter of the Count of *Aguila*, by whom he had a Son who ſucceeded him in his Titles, and ſome of whoſe Deſcendants are ſtill remaining. As for the great *Cortes* himſelf he died at a Village near *Seville*, called *Caſtilleja de la Cueſta*, on the 2d of *December* 1554, in the 63d Year of his Age: But his Corpſe, by his own Direction, was carried into *New Spain*.

25. In relating the Hiſtory of this great Event, we have taken in every thing that is material in the beſt *Spaniſh* Writers, ſo that the Reader ſees at one View, and in the Compaſs of a few Sheets, what has filled many large Volumes. When he comes ſeriouſly to reflect upon all the Paſſages herein related, and to conſider the Conduct of *Cortes* from firſt to laſt, he will certainly be convinced, that this great Man merited the Praiſes that have been given him, and that he was very much ſuperior to many, if not to moſt, of the Heroes of Antiquity. It muſt not however be diſſembled, that notwithſtanding his great Abilities and many Virtues, he was far enough from having a Character altogether blameleſs, or from behaving in ſuch a Manner as that no Imputation could be fixed upon his Conduct.

If this had been the Caſe, it is highly probable, he would not have been attacked by *F. Bartholomew de Caſas*, Biſhop of *Chiapa*, who went over to *Spain* on Purpoſe to complain of him, and indeed with good Reaſon, if what he ſays be true, that in the Space of twelve Years he deſtroyed upwards of 4,000,000 of People; but though, without doubt, the Deſign of this Prelate was very laudable, and he was in himſelf a Perſon of a true Chriſtian Spirit; yet there want not many Objections capable of deſtroying, or at leaſt of weakening, to a very great Degree, the Accuſations he has brought againſt this noble Perſon. In the firſt Place, we ought to conſider the wide Difference there was between theſe Peoples Characters; and that a Monk is not, by any Means, a fit Perſon to decide on the Behaviour of a Stateſman and a General. The Principles he maintains are not more deſtructive of the Character of *Cortes*, than the Characters of all the great Men, who have attempted Diſcoveries or made Conqueſts in theſe Parts of the World; and therefore if we admit his Judgment in its full Extent, we muſt not only give up the Cauſe of this great Captain, but of almoſt all the great Captains in every Age and Country; which will perhaps be thought too great a Sacrifice. In the next Place, we ought to remember that from the very Beginning of his Expedition, our Conqueror was oppoſed and perſecuted by the Biſhop of *Burgos* and his Party, not from any Chriſtian Spirit of Moderation and Charity towards the *Indians*, but becauſe he had embraced the Party of *Velaſquez*, who certainly meant to do all that *Cortes* did, by Means not at all milder than thoſe which *Cortes* employed; and the Biſhop of *Chiapa*, who was of the ſame Party, may be, in ſome Meaſure, ſuſpected of condemning in a Perſon he diſliked, what perhaps he would have excuſed in one for whom he had a greater Eſteem.

We may farther obſerve, that though this Prelate takes a great deal of Pains to juſtify the *Indians*, and to lay a heavy Load upon his Countrymen, by alledging, that for one Man ſacrificed by the former to their falſe Gods, the latter offered a thouſand Victims to their Goddeſs *Avarice*; yet, inaſmuch as he allows that they did offer human Sacrifices, he, in ſome Meaſure, allows the Truth of this General's Relations, and indeed it cannot well be ſuppoſed, that a Perſon of the Spirit and Temper of *Cortes* would write long Letters full only of Lies to the Emperor his Maſter; and therefore we ought to make ſome Allowances for the Provocations he received, and for the Circumſtances he was in at a Time he cut off ſo many *Indians*. What ſeems to juſtify our Suſpicion that this good Biſhop exaggerated, either wilfully or by Miſtake, the Cruelty of *Cortes*, is his charging him expreſly with maſſacring in cold Blood all the Inhabitants of the City of *Chulula*, notwithſtanding they had given him a very kind Reception.

The Reader has already ſeen an Account of that whole Tranſaction, as it is related by the beſt Hiſtorians; and from thence it appears, that *Cortes* inflicted upon that City no greater Cruelties than they meant to have exerciſed upon him and his Soldiers, and that by a moſt treacherous Contrivance; and, if this had not been the Truth, one can hardly conceive that the *Indians* that were Confederates with *Cortes*, would have adhered to him ſo cloſely as they did, on that and all other Occaſions. If he had been really ſo baſe and bloody a Perſon, he could ſcarce have gained the Affections of ſo many Nations, or granting that by his artificial Behaviour he might have done this, it would have been impoſſible for him to have preſerved their Affections, as it is evident he did from the very Commencement to the End of the War: Beſides, if the Ambition and Barbarity of *Cortes* deſerved, in the Biſhop's Opinion, no Sort of Favour or Excuſe, why ſhould we have more Indulgence for the Pride and Tyranny of *Motezuma*, who certainly had no better Title than he to trample upon the Rights of Mankind, and to make ſo many Millions miſerable as he did.

Theſe are Things that deſerve to be very particularly conſidered, becauſe they enable us to judge truly and deciſively of the Subject under our Conſideration, without heſitating in our Opinion, or being doubtful whether when delivered it can be ſuſtained. To launch out in the Praiſes of *Cortes*, as a Man in whoſe Character there was nothing amiſs, and all whoſe Actions may be reconciled to the ſtricteſt Rules of Religion and Morality, would be undoubtedly carrying the Thing too far, and ſhewing ſuch a Prepoſſeſſion in his Favour, as neither Facts nor Reaſon could ſupport. But we are not to conſider him in that Light; we are to look upon him as an Officer ſent to extend the Power of the King, his Maſter, in that Part of the World; and though *Velaſquez* deprived him of his Commiſſion, yet, as he acted upon Principles of Honour, and took all due Care of the Royal Intereſt, as far as he underſtood it, we cannot refuſe him that Applauſe which is due to his Wiſdom and Courage, without acting againſt Reaſon. As to Religion he ſeems to have been as zealous for it as the Prieſts themſelves; and if that Zeal was intemperate, or ill placed, it was not ſo much his Fault as theirs, who taught him no better. He ſeems, as a Chriſtian, to have had a great Abhorrence of Idolatry; and as an honeſt Man a hearty Deteſtation of human Sacrifices; ſo that if his Actions were in any Degree wrong, yet the Motives to them, ſo far as we can perceive, might be very right. As to his Ambition and Avarice they are not to be excuſed, ſuppoſing them to have been his Vices. But then we ought to reflect how difficult a Thing it is to diſtinguiſh between a laudable Deſire to ſerve one's Prince and Country, and what is called Ambition; as well as between a criminal Love for Money, and complying with the Neceſſities of Times, by ſending over to *Spain* what he knew was requiſite to maintain his Credit, and to ſupport him againſt his Enemies. Taking therefore all things together, and making the ſame Allowances for *Cortes*, that are uſually made for Men in his Station, we may venture to affirm, that he behaved as well, and performed as great Things, if not greater, than any of the *Spaniſh* Captains that bore Command in this Part of the World; ſo that if we meaſure his Merit by the Importance of the Conqueſts he made; by the ſmall Forces he made them with; and the Difficulties he met with and ſurmounted, which are the uſual Meaſures of ſuch Actions, there is no reaſon to apprehend, that we err in the Commendations we beſtow upon him.

At the ſame Time, however, we muſt allow that he ſhed a great deal of Blood; that he introduced a new Government to this Part of the World; and did many other Things, that, however great they may appear, yet, in the Judgment of ſuch as are Friends to a rigid Morality, ſubject him to Cenſure. But as every Man has Faults, and every Man's Faults, who moves in a ſuperior Sphere, have very extenſive Conſequences; ſo even in this Reſpect, we ought not to have a worſe Opinion of *Cortes*, than of his Maſter, the Emperor *Charles* V. or any other great Captain, that purſues a Syſtem which, for any Thing we know, may be more agreeable to the Views and Deſigns of Providence, than ſuch a Conduct as might have pleaſed us better. I have inſiſted the longer upon this, that I might not be under the Neceſſity of making Reflections of the ſame Kind in other Places; for what I have ſaid upon this Occaſion will ſerve to ſhew my Sentiments upon all other like Occaſions; and therefore there will be no Need of repeating them.

I am very ſenſible that Writers frequently value themſelves upon deſtroying great Characters, by ſetting them in this diſadvantageous Light; and arrogate to themſelves a Power of judging in the laſt Reſort of Mens Actions and Motives. But this I think is very unfair, and I can ſee no Reaſon, why the having this Opportunity of raiſing or ſinking the Reputation of ſo illuſtrious a Perſon, ſhould tempt me to endeavour raiſing in the Reader an high Idea of my Penetration or Probity, at the Expence of one who is already in Poſſeſſion of Fame, from the Approbation of his Behaviour by thoſe who ought to be, and as far as I can judge from their Writings really were, better Judges of it than I am. All the Merit I pretend to is, the having ſtated his Actions fairly from the beſt Authorities, and ſaid of them freely what I thought, which, whether it be right or not, I moſt readily ſubmit to the judicious Reader, and ſo return to my Taſk of purſuing the Conqueſts made by the *Spaniards* in *America*.

SECTION

SECTION XIV.

The Diſcoveries made by the Spaniards *in the Province called* Golden Caſtile; *their firſt Knowledge of the* South-Sea, *and their Eſtabliſhment of* Panama, *by which a Paſſage was opened to the Diſcovery and Conqueſt of the great Empire of* Peru.

1. *The Manner in which* Vaſquez Nunez de Balboa *eſtabliſhed himſelf in the Government of* Santa Maria, *in the Province of* Caſtilla del Oro. 2. *He ſends two Agents to ſollicit Succours; one to the Admiral* James Columbus, *and the other to the Court of* Spain. 3. *The firſt Expedition of* Balboa *againſt the* Indians, *in which he ſubdued the Cazique* Careta, *and entered afterwards into a cloſer Friendſhip with him.* 4. *He goes, at the Requeſt of that* Indian *Prince, to viſit another Cazique, whoſe Name was* Comagre. 5. *He obtains there the firſt certain Intelligence of the* South-Seas, *and of the Empire of* Peru, *and its vaſt Riches.* 6. *He returns to* Santa Maria, *and, receiving ill News from* Spain, *reſolves to attempt a Diſcovery of the* South-Seas, *in hopes of pacifying King* Ferdinand *and his Miniſters.* 7. *The Manner in which he executed this Reſolution, and the wonderful Succeſs of his Expedition.* 8. *Beſtows the Name of St.* Michael *on a Bay in the* South-Seas, *and carries from thence a vaſt Treaſure in Gold and Pearls.* 9. *Sends another Agent to the Court of* Spain, *with a full Account of the Importance of theſe new Diſcoveries.* 10. *Don* Pedro Arias d'Avila, *by the Intereſt of the Biſhop of* Burgos, *is ſent from* Spain *to take the Government of* Caſtilla del Oro. 11. *This new Governor firſt cruelly perſecutes* Nunez de Balboa, *and afterwards moſt unjuſtly cauſes him to be beheaded.* 12. Arias *lays the Foundation of the City of* Panama, *which by reaſon of its unwholſome Situation proves very deſtructive to its firſt Inhabitants.* 13. *He fails in moſt of his Attempts for making Conqueſts and Diſcoveries in* America, *and finds it difficult to maintain his Power in the Midſt of ſo many Diſappointments.* 14. *He barbarouſly murders, under a Form of Juſtice,* Francis Hernandez, *Governor of* Nicaragua, *and ſeizes that Province.* 15. *Obſervations on the foregoing Section, and on the great Difference between Genius and Cunning.*

1. IT is a Rule that I think ought to be obſerved in all Works of this Nature, to explain one Subject thoroughly before we proceed to another; and to dwell more or leſs upon a Subject, according to its Weight and Importance: We have hitherto obſerved this Rule ſtrictly in both its Branches, which was the Reaſon of dwelling ſo long upon the Expedition of *Cortes*: Since this alone, in reſpect to its Conſequences, was more than equal to all we had mentioned before taken together. In this Section, the Matters we propoſe to handle, though neceſſary to underſtand the Diſovery and Conqueſt of *America*, and more eſpecially the Manner in which *Peru* came firſt to the Knowledge, and then fell into the Hands of the *Spaniards*; yet being in themſelves of far leſs Conſequence, we ſhall ſpeak of them more conciſely, in order to keep within due Bounds, and inform the Reader fully without tiring him.

We have already ſhewn how the Province of *Caſtilla del Oro* was diſcovered, and ſettled by the Induſtry and Pains of *Vaſquez Nunez de Balboa*, a Man no leſs remarkable for the Succeſs of his firſt Beginnings, than for the Miſeries that befel him at the Concluſion of his Adventures. We have likewiſe ſhewn how he arrived by his perſonal Merit, at the extraordinary Authority he exerciſed in the new Colony, on the Banks of the River *Darien*, where he deprived *Enciſo* of his Command; and, upon his endeavouring to recover it, ſeized and impriſoned him, under Pretence that he had uſurped an Office which the King only could beſtow; and for which he confiſcated all his Effects: A very harſh and ſevere Sentence, which was certainly founded, rather in perſonal Reſentment, for the ill Uſage he had met with from him, than from any real Concern for the Intereſt of the Colony, which was far enough from requiring ſuch a violent Proceeding, though that was the Pretence. But when Men have acquired Power, it is not at all ſtrange that they ſhould loſe Moderation in the Uſe of it; however, there were ſome in the Colony better inclined than himſelf; who, with ſome Difficuity, prevailed upon him to ſet *Enciſo* at Liberty; but it was upon this expreſs Condition, that he ſhould tranſport himſelf, either to *Spain*, or to *Hiſpaniola*, on board the firſt Ship that ſhould come to *Santa Maria*, which was the Name of this Settlement.

The next Care of *Nunez de Balboa*, was to ſecure thoſe Supplies, of which the Colony ſtood in need, and with this View it was that he made choice of his old Friend *Valdivia* to go to *Hiſpaniola*, in order to engage the Governor and Council there, to furniſh him and his People with all they wanted; of which he had the greater Hopes becauſe the Admiral, *James Columbus*, was then there, and he very well knew that no body could have a greater Inclination than he had, to contribute all that lay in his Power to promote the King's Service.

2. This Point being ſettled, he perſuaded the Colony that it was highly for their Service to ſend a Perſon they could confide in directly to *Spain*, that the Court might be informed of the Situation they were in, and of the great Probability there was of their making very advantageous Diſcoveries and Conqueſts. The Perſon he choſe for this important Employment, was his Collegue in the Magiſtracy, whoſe Name was *Zamudio*, to which no body had any Objection. By propoſing him *Balboa* gained two great Ends; for, in the firſt Place, he ſecured the ſole Authority to himſelf, which was always what he affected; and in the next Place, he committed the Care of his Concerns to one whoſe Intereſts were the ſame with his own: Since he had been as deeply engaged in the before mentioned Revolution as himſelf. There was a ſmall Ship belonging to the Colony in Port, and this he cauſed to be fitted up as well as it was poſſible, in order to carry the two Deputies, and his old Antagoniſt *Enciſco*.

Before their Departure, however it was ſuggeſted to *Balboa*, that he departed not a little from his uſual Wiſdom in ſending the laſt mentioned Perſon, whom he had uſed ſo very ill, to a Place where he might repreſent his Proceedings in Lights far enough from being to his Advantage. But this did not induce him to alter his Reſolution, though it put him upon taking a Precaution, which anſwered his Purpoſe very effectually. He remembred that one *Paſſemonte*, who was the King's Treaſurer General at *Santo Domingo*, had a great Intereſt with the Miniſters in *Spain*, and therefore he gave *Valdivia* a conſiderable Quantity of Gold, which he deſired him to preſent the Treaſurer, in his Name, ſuppoſing that this would attach him cloſely to his Intereſt, and therein he was not at all miſtaken; for the Poſſeſſion of this Gold, and the Hopes of more, induced him to eſpouſe the Cauſe of *Nunez de Balboa* ever after. Theſe Meaſures thus taken, he ſent the two Deputies, together with *Enciſo*, on board the Ship, which preſently after ſailed for *Santo Domingo*.

After their Departure, *Nunez de Balboa* began to contrive, in his own Mind, how to make the beſt Uſe poſſible of the great Power he had obtained, in order to make further Diſcoveries, and to acquire more Gold, which he foreſaw would prove the moſt effectual Means for ſecuring to him this Government, at which he had ſo ſtrangely arrived, and of which he had conceived ſuch Advantages might be made to the Crown of *Spain*, as would perhaps have entered into no Head but his own, conſidering the Circumſtances the Colony was then in: He was, indeed, a Perſon every way fit for undertaking vaſt things; for he had a deep Cunning, ſtuck at nothing, and had a Courage ſuperior to every kind of Danger, ſo that nothing could fright him from his Purpoſe, or put him out of any Road which he thought likely to attain it.

3. It was not long before ſuch an Opportunity offered as he expected, and he made the Uſe of it which it might be ſuppoſed a Perſon of his Abilities would make in a Matter that ſo nearly concerned him. At this time many *Indians* reſorted to *Darien*, to ſee whether the *Spaniards* were going away, or what they deſigned; and, to cover their Intention, carried *Indian* Wheat and other Proviſions to exchange for Beads, Knives, and other *Spaniſh* Baubles; and, to perſuade them to be gone, ſaid there was much Gold, and plenty of all Eatables, in the Province of *Coyaba*, which was thirty Leagues from thence. *Nunez de Balboa* ſent *Francis Pizarro*, with ſix Men, to diſcover the Country; who, having travelled three Leagues up the River, was attacked by four hundred *Indians*, under the Command of the Cazique *Zemaco*, and hard preſſed: But they cloſing, ripped up the Bellies of one hundred of them with their Swords, and wounded many more, whereupon the reſt fled.

The *Spaniards* then returned to *Darien* in a bad Plight, leaving one *Francis Hernandez* behind them, lying on the Ground; at which *Nunez* was ſo much offended, that he commanded *Pizarro* to go back, with ſome Men, for him, as he did, and brought him to the Colony; *Balboa* thinking it a Diſcredit to leave any one behind him alive. *Nunez* then marched himſelf, with one hundred Men, and advanced ſome Leagues towards the Province of *Coyba*, the Cazique of which was *Careta*: But, meeting the *Indians* by the Way, he ſoon returned to his Colony, and ſent two Brigantines for the *Spaniards* that had been left at *Nombre de Dios*.

As they were ſailing along the Coaſt, when they came to a Port belonging to the Cazique of *Coyba*, two *Spaniards* ſtark naked, painted red, came out to meet them: They, and one more, had a Year and an half before made their Eſcape out of *Nicueſſa*'s Ship, when he was in queſt of the Province of *Veragua*, to avoid the Puniſhment due to ſome Crime they had committed, and put themſelves into the Hands of this Cazique *Careta*, who always treated them very well; but, not agreeing among themſelves, though in Captivity, they one Day drew their Swords, and one of them, whoſe Name was *John Alonſo*, wounded the other dangerouſly, whereupon the Cazique made him a Commander in the War he had againſt ſome of his Enemies, looking upon him as the braver Man, and did nothing without his Advice. Theſe two Men were very acceptable to thoſe in the Brigantines, and gave an Account that the Country abounded ſo much in Gold, that if *Nunez* would invade it, they ſhould be all rich. Hereupon it was agreed that one of them ſhould go and acquaint *Nunez* of the State of the Country, and the other ſhould ſtay to be ſerviceable, as Occaſion ſhould offer. When the Brigantines returned to *Darien*, *Nunez* was well pleaſed with the Intelligence they brought of the great Wealth, and at having Interpreters to deal with the Natives; and, being thoroughly informed of the Nature of that Country, ſent back the Brigantines to bring away from *Nombre de Dios* thoſe they could not fetch off at firſt.

In the mean time he provided one hundred and thirty of the ableſt Men, with Arms, Proviſions, and other Neceſſaries they were to carry; and, as ſoon as the Brigantines arrived, he ſet out to ſeek *Careta* at his Dwelling, which was thirty Leagues off. The Cazique hearing of it, waited for him in his Houſe, where *Nunez* aſked him for Proviſions for his Men, and to carry to *Darien*. *Careta* anſwered, that when any Chriſtians had paſſed that Way, he freely gave them Part of his Proviſions; but that at preſent he had none, being at War with a neigbouring Cazique, whoſe Name was *Ponca*, for which Reaſon his People had not ſowed, and were then in great Want. Having received this Anſwer, *Nunez*, by the Advice of *John Alonſo*, pretended to go back the ſame Way he came; and *Careta* thinking himſelf very ſafe, *Nunez* returned at Midnight, and attacked the Town in three Places, killing and wounding many, and taking the Cazique, his two Wives and Children, and ſeveral others; all of whom he ſent away to *Darien*, loading the Brigantines with Proviſions. At *Darien*, *Careta* intreated *Nunez* not to keep him in Captivity, promiſing to do all that was in his Power to furniſh the Chriſtians with Proviſions, and to be his Friend: As a Pledge of which he would give him one of his Daughters, who was very beautiful; and, that his People might have leiſure to till and ſow the Ground, he ſhould aſſiſt him againſt his Enemy *Ponca*. *Nunez* accepted of the Offer, and took his Daughter, whom he kept as his Miſtreſs, though *Careta* thought he had taken her for his Wife; but he always loved and uſed her kindly, which highly pleaſed the *Indians*.

4. This *Indian* Cazique, *Careta*, not only kept his Word, but treated *Nunez*, and eighty Men who accompanied him, ſo well, that they willingly agreed to aſſiſt him in his Wars; which, when the other Cazique, whoſe Name was *Ponca*, heard, he fled to the Mountains; and the *Spaniards*, entering his Country, found ſome Proviſions there, and a conſiderable Quantity of Gold. It was not long before *Careta* informed his Gueſts, that he had another Neighbour more powerful, and of a better Diſpoſition, than *Ponca*; whoſe Name, as well as that of his Country, was *Comagre*; that he had ſeveral Wives, and a great many Children, and lived in greater Splendor than any other Cazique. He likewiſe told them that this *Indian* Prince had a great Inclination to be acquainted with the *Spaniards*; and, as his Dominions were larger and more fruitful than his own, *Careta* adviſed them to go thither, and offered to accompany them, as he did; and the *Spaniards* found every thing agreeable to the Account he had given them.

For the Palace of *Comagre* was a large wooden Building, one hundred and fifty Yards in Length, and eighty in Breadth; ſurrounded with a good Stone Wall, and well furniſhed within, after the Manner of thoſe People. They likewiſe found there good Store of Proviſions: They had ſeveral Sorts of Drinks of ſeveral Colours, not much inferior, either in Strength or Flavour, to Wine. The Reception they met with, was equally kind and hoſpitable; *Comagre* and his Sons taking all the Pains imaginable to make them welcome and eaſy, and diſcovering in their Converſation a Knowledge and Politeneſs much ſuperior to any of the *Indians* they had hitherto met with, they made them Preſents alſo of Gold and Pearls, to a very conſiderable Value; ſo that they had no Reaſon to repent of their Journey, or diſtruſt *Careta*, who had brought them thither; and who ſeemed to be likewiſe highly pleaſed with the courteous Entertainment that his Friend had given them, hoping it would make the *Spaniards* ſtill more willing to oblige him.

Nunez and his Men being thus joyfully received and entertained, *Comagre*'s eldeſt Son, who was a diſcreet Youth, being deſirous to oblige his Gueſts, cauſed ſeveral Pieces of Gold, valuable both for their Workmanſhip and Fineneſs, weighing about four thouſand Pieces of Eight, and ſeventy Slaves, to be brought, all which he gave to *Nunez* and *Colmenares*. They immediately ſet apart a fifth of the Gold for the King, dividing the reſt among themſelves; about which ſome quarrelled, ſtruggling and making a Noiſe for the beſt and fineſt of thoſe Pieces.

Comagre's eldeſt Son, who was preſent, ran to the Scales, and, ſtriking them with his double Fiſt, threw all the Gold upon the Ground; ſaying, "That Chriſtians need not fall out about ſuch a Trifle; but, if they were ſo fond of it as to diſturb peaceable Nations, and leave their own Native Country for the ſake of it, he would ſhew them a Province where they might have as much as their Hearts could wiſh, but that there muſt be a greater Number of them, becauſe they were to encounter a Monarch who defended his Dominions with much Bravery: That they firſt would meet with a Cazique, who had a vaſt Quantity of what they looked upon as Wealth, who was ſix Suns, that is ſix Days

“ Journey from thence, pointing with his Finger towards the *South-Sea*; which he told them they would ſee as ſoon as they were paſt certain Lands; and that there were other Nations had Veſſels little inferior to thoſe of the *Spaniards*, with Sails and Oars; and that beyond that Sea, they would find immenſe Store of Gold, out of which thoſe People eat and drank.” And having underſtood from the *Spaniards* that there was great Plenty of Iron in *Spain*, he ſignified that there was more Gold in thoſe Parts than Iron in *Biſcay*.

This was the firſt Intimation given of that large Country; and, becauſe the Youth was acquainted with the great Extent of that Kingdom, and the Number of its Inhabitants, he added, that there ought to be one thouſand Chriſtians, at leaſt, to invade it; and he offered to go with them, to aſſiſt them with his Father's Men. This Diſcourſe was interpreted by the two *Spaniards* who had fled from *Nicueſſa*, and lived with *Careta*. *Nunez* and his Followers, having heard of all this Golden Country, were ſo overjoyed, that they thought they could never make Haſte enough to diſcover it.

6. After a ſhort Stay in the Dominions of this *Indian* Prince, *Nunez de Balboa* retired to his own Government of *Santa Maria*, in order there to conſider at his Leiſure of the propereſt Means for making the Diſcoveries, upon which himſelf and his People were ſo much bent. A very little before *Valdivia* was returned from *Hiſpaniola*, and brought from thence, on the Part of *James Columbus*, the ſtrongeſt Aſſurances of Support, which induced *Balboa* to ſend him over a ſecond time with the ſame Views and the ſame Inſtructions, but with freſh Proofs of the Services he had rendered to the Crown, and freſh Preſents for thoſe he thought might do him Kindneſſes with the Miniſters. But the Veſſel that carried *Valdivia*, and ſuch as attended him, was very unfortunate, being ſhipwrecked in her Paſſage on the Coaſt of *Jucatan*; the Men with great Difficulty got on Shore, which proved a new Misfortune; for it had been much better they had periſhed at Sea, ſince they were quickly ſurrounded and made Priſoners by the Natives; who, with all the cruel Circumſtances imaginable, ſacrificed them to their Idols.

Such was the End of *Valdivia* and his Companions, two only eſcaping, one of whom was *Aguilar*, who was of ſo great Uſe to *Cortes*, and with whoſe Hiſtory the Reader is already acquainted. The News greatly afflicted *Balboa*, inſomuch that to prevent the ill Conſequences that might follow from it, he had ſome Thoughts of going himſelf to *Spain*; but the Colony would not ſuffer him, looking upon his Preſence as abſolutely neceſſary to their own Preſervation. He had very ſoon ſufficient Reaſons to believe that they had judged right; for, by the Diſpatches he received from his Agent *Zamudio*, he was informed that *Enciſo* had incenſed the Court againſt him to ſuch a Degree, that there was no pacifying the Miniſters, or perſuading them that he was not the very worſt of Men, and one who had in the higheſt Degree contemned and trampled upon the Royal Authority.

When *Nunez de Balboa* had conſidered the Contents of theſe Letters, and the melancholy Situation he was in, he ſaw plainly that there was nothing could deliver him, or reſtore his Character in *Spain*, but making an immediate Uſe of the Informations he had received, by proceeding in, and perfecting his Diſcoveries of, larger and richer Countries, than hitherto the *Spaniards* had been acquainted with. This he very rightly judged would cover all paſt Faults, and atone for every Irregularity he had committed; and therefore, without communicating to the Colony any of the Particulars contained in his Diſpatches, he applied himſelf ſolely to perſuade them to ſuch an Expedition, as the moſt likely Means to make them all rich and happy; and his Labours in this Reſpect proved ſo effectual, that all Hands were immediately employed in making the neceſſary Preparations for going in ſearch of thoſe Golden Regions; and this, with a full Confidence, that if once they could be found, they might, without Difficulty, be ſubdued. Such were his and their Deſigns: Let us now ſee how they were executed.

7. *Nunez de Balboa*, having reſolved to march over to the *South-Seas*, and provided all things for the Expedition, ſet out from *Darien* about the Middle of *September*, 1513; going by Sea as far as the Territories of the Cazique *Careta*, who received him in a very friendly Manner. He there left the Brigantine and Canoe, and advanced towards the Mountains, and the Country of *Ponca*, *Crreta* aſſigning ſome of his Subjects to attend him. The Cazique *Ponca*, who had Spies abroad, being informed that the *Spaniards* were coming up his Mountains, hid himſelf. *Nunez* ſent ſome of *Careta*'s *Indians* to aſſure him, that he would do him no Harm, but would be his Friend; and he thought fit to come to him, carrying as a Preſent the Value of one hundred and ten Peſos of Gold, which was all he had.

Nunez received him with much Joy, that he might have no Enemy behind. He gave him Abundance of Beads, Looking-glaſſes, and Hawk's-bells, and that which the *Indians* moſt valued, *viz.* ſome Iron Axes. He demanded of him Guides, and Men to carry Burdens, whilſt he went up the Hills, and advanced farther. The Cazique granted all he deſired, and gave him Plenty of Proviſions, and then the *Spaniards* marched on into the Dominions of a great Lord, whoſe Name was *Quarequa*, whom he found ready to oppoſe him with a great Number of Men, armed with Bows and Arrows, and a ſort of Slings, with which they threw Pieces of Wood hardened in the Fire like Darts. They had alſo Macanas, made of Palm-tree Wood, as hard as Iron, which they uſed, like Clubs, with both Hands. In this manner the *Indians* met the *Spaniards*, aſking what they would have, or what they came for? requiring them, at the ſame time, to proceed no farther. Obſerving that they valued not what was ſaid, their Lord came forward, cloathed in Cotton, with ſome of the prime Men; all the reſt ſtark naked.

They attacked the *Spaniards* with dreadful Cries and extraordinary Fury. *Nunez*, ſeeing ſuch a Multitude, ordered his Soldiers to diſcharge ſome Croſs-bows and ſome Firelocks, whereupon ſome dropped down dead. The *Indians*, ſeeing the Fire, and hearing the Report, believing they had been Flaſhes of Lightning, and that the *Spaniards* had Power to deſtroy them, fled, to a Man, in ſuch Conſternation, that they thought the *Spaniards* were Devils. The Dogs were ſet on them, whilſt their Maſters cut off the Limbs of ſome with their Swords, the Dogs tearing others in Pieces. The Cazique was there killed, and about ſix hundred more; ſome were taken, and their Town plundered, where the Conquerors found a conſiderable Quantity of Gold. Among the Priſoners were a Brother of the Cazique, and ſome others, cloathed like Women; and *Nunez*, judging that they were guilty of Sodomy, ſet the Dogs at them, and they were in a Moment torn to Pieces; which was all the Proof there was in this Caſe, though *Gomera* poſitively affirms it.

Some *Spaniards* were grown ſickly with Hunger and Wearineſs, for which Reaſon *Nunez* left them in *Quarequa*'s Town, where he took freſh Guides, and Men to carry Burdens, to diſmiſs thoſe that belonged to *Careta*; thus proceeding to the Top of the Mountains, whence they ſaid the other Sea might be ſeen. From *Ponca*'s Lands to this Mountain's Top was about ſix Days Journey; but they ſpent twenty-five, through the Uncouthneſs of Lands, and becauſe they were ſcarce of Proviſions, and had little Reſt. At length they arrived, on the 25th of *September*, 1513, whence the Sea could be ſeen.

Nunez, having notice given him, a little before they came to the Top, that they were very near, commanded all to halt, went up alone, and, ſeeing the *South-Sea*, on his Knees returned Thanks to Heaven for being the firſt that had ſeen it. Having performed this, he called his Men, and repeated the ſame; they followed his Example, whilſt the *Indians* ſtood amazed to ſee them ſo overjoyed. He then extolled the Intelligence given him by *Comagre*'s Son, promiſing all his Men much Wealth and Happineſs; and they believed him: For he was very much beloved, becauſe he made no Difference between himſelf and every Soldier. Beſides, he was familiar, and ſhewed much Compaſſion for the Sick and

Wounded, every one of whom he viſited, and was himſelf undaunted in Dangers, never ſhewing the leaſt Concern in the greateſt Perils. He then cauſed a Certificate to be drawn of his taking Poſſeſſion of that Sea, and all in it, for the Crown of *Caſtile*; in Teſtimony whereof, he cut down Trees, erected Croſſes, raiſed Heaps of Stones, and cut the King of *Spain*'s Name on ſome Trees. He then reſolved to go down the Mountains, to obſerve what there was on them, and on the Sea-coaſt.

Being informed that, near this Place, there was another Town, belonging to a Lord whoſe Name was *Chiapes*, he advanced very cautiouſly; and *Chiapes* went out to meet him with a great Number of Men, in which he confided, for the *Indians*, ſeeing ſo few *Spaniards*, generally made little account of them till they had felt their Swords. When they drew near, the *Spaniards* ſaluted them with their Fire-arms firſt, and then with their Croſs-bows, after which they let go the Dogs; the *Indians*, ſeeing the Fire of the Muſkets, hearing the Report, ſmelling the Gunpowder, obſerving how many dropt down dead, and that the Dogs tore all they came at, turned their Backs, and fled with the utmoſt Precipitation: The *Spaniards* purſued, with their Dogs, killing ſome, but chuſing rather to take Priſoners, in order, by their Means, to make Peace with *Chiapes*, that he might not retard their Paſſage. They diſmiſſed ſome of thoſe they had taken as Meſſengers to their Lord, with ſome of *Quarequa*'s Men to aſſure him they would do him no Harm if he would be their Friend. He thought it ſafeſt to put himſelf into the Hands of theſe dreadful Enemies, and carried the Value of four hundred Pieces of Eight in Gold. *Nunez* received him very graciouſly, and gave him Beads, Looking-glaſſes, and ſome Hatchets; and here he diſmiſſed *Quarequa*'s *Indians*, giving them Trifles, with which they went away well pleaſed.

From thence he ſent Captain *Francis Pizarro* to view the Sea Coaſt, and what there was about the Country; as alſo *John Eſcarray* and *Alonſo Martin*, with twelve Men each, to find out the ſhorteſt Ways to the Sea. *Alonſo Martin* hit upon the readieſt Road, and, in two Days, came to a Place where he found two Canoes upon dry Land; yet ſaw no Sea; but whilſt he was conſidering which Way theſe Canoes were come up the Land, the Sea-water came in and lifted them up about a Fathom in Height: For, upon that Coaſt, the Sea ebbs and flows every ſix Hours, two or three Fathoms, ſo that great Ships are left dry, and no Sea-water appears for two or three Leagues at leaſt. *Alonſo Martin*, ſeeing the Canoes ſwim, went into one of them, and bid his Companions bear Witneſs that he was the Firſt who entered the *South-Seas*; another, whoſe Name was *Blaez de Atienza*, did the like, and bid them bear Witneſs he was the Second. They returned to *Nunez* with the News, at which all rejoiced very much.

8. The ſick and wounded *Spaniards* that were left behind being come up, *Nunez* reſolved to proceed himſelf to the Sea ſide, and to try what farther Diſcoveries could be made, taking the *Indian* Chief with him. When they came to the Shore, the *Spaniſh* Commander marched on, armed as he was, till the Water took him up to the Middle; cauſing a Notary to draw and ſubſcribe a public Inſtrument, importing, That he had taken Poſſeſſion of that Sea, its Coaſts, and the Iſlands in it, on Behalf of the Crown of *Caſtile*; at which Ceremony the *Indians* were very much amazed.

He proceeded next to paſs the Mouth of a great River, and landed on the oppoſite Side, in the Territories of another *Indian* Prince, whoſe Name was *Coura*, and who, at firſt, endeavoured to make ſome Reſiſtance; but, finding that it was in vain, he ſuffered his Son to go and treat with them, and himſelf was ſoon after reconciled, and carried them a conſiderable Preſent. *Balboa* obſerving a large Bay of the Sea, reſolved to navigate it; and, to that Purpoſe, deſired the *Indians* to furniſh him with Canoes, which they did, and offered to accompany him, though, at the ſame Time, they adviſed him to ſuſpend his Diſcovery, becauſe the Winter was coming on. But he, being obſtinate, embarked with fourſcore *Spaniards*, together with *Chiapes*, and ſome of his *Indians*, on board nine Canoes.

They weighed Anohor upon the twenty-ninth of *September*, 1513, which was the Reaſon he called it *St. Michael's Bay*. When they were at ſome Diſtance from Land the Waves began to ſwell ſo high, that *Nunez* repented he had not taken *Chiapes*'s Advice. It was a wonderful Providence that they did not all periſh; and the *Indians*, who ſwim like Fiſh, made the Danger more evident, as being better acquainted with the Place, which rendered the *Spaniards* more apprehenſive. The Roughneſs of this Bay is occaſioned by the many little Iſlands, Rocks, and Sholes, that are in it. The *Indians*, being beſt ſkilled in thoſe Affairs, had recourſe to their uſual Remedy, faſtening two Canoes together with Cords, for then they do not ſo eaſily overturn. They made the beſt of their Way next towards an Iſland, where they landed, and laſhed the Canoes to the Rocks or Trees. There they continued all the Night, with as much Uneaſineſs as if they had been looking Death in the Face; for upon the Flood the whole Iſland was covered with Water, and they ſtood in it up to their Waiſts, or very near it: When Day appeared, and the Water ebbed, they went to look for their Canoes, and found ſome beaten in Pieces, and others ſplit, all of them full of Water and Sand; and nothing remained of all their Goods and Proviſions; which was a very diſmal Sight. In this Diſtreſs, they pulled off the tender Bark of the young Trees, and, bruiſing it with Graſs and other Herbs, caulked the Crannies of the Canoes that were not quite ſtaved, and thus embarked again half famiſhed.

They immediately ſteered to the Land of an *Indian* Lord, whoſe Name was *Tumaco*, in the Creek of the Bay, where they found him ready to oppoſe them. *Nunez* ſeeing his Men weak and hungry, picked out a few of the ableſt, whom he placed in the Front, and engaged: In a very ſhort Space the Dogs and the Swords made ſad Havock among the *Indians*, the Cazique himſelf being wounded. *Chiapes* ſent ſome of his Men to acquaint *Tumaco* with the Power of the *Spaniards*, and how kind they were to their Friends, as himſelf and other Lords they had met in their Way, very well knew by Experience. *Tumaco* would not be perſuaded the firſt Time, but the ſecond Meſſenger prevailed ſo far, that he ſent his Son, whom *Nunez* entertained very courteouſly, giving him a Shirt, and ſome Toys, and bidding him adviſe his Father to come himſelf and be his Friend. *Tumaco* ſeeing his Son had been well uſed, went the third Day with a great Attendance of his Subjects, but carried no Preſents; however *Nunez* paid him much Reſpect.

Chiapes told him, that the *Spaniards* were good, and it was but reaſonable to aſſiſt them, ſince they were Strangers in their Country: Being pacified, and out of Fear, he ſent ſome Servants home, who brought Gold, to the Value of ſix hundred and fourteen Pieces of Eight, and, what was much more, two hundred and forty large Pearls, very fine, and many more that were bright but ſmall. The Joy *Nunez* and his Men conceived at the Sight of them is inexpreſſible, believing the immenſe Treaſures *Comagre*'s Son had told them of were now at hand, and thinking all their Sufferings well repaid. The large Pearls were of a great Value, and would have been of greater, but that the *Indians* uſing Fire to open the Oyſters, they grew damp, and were not ſo white as they naturally are: The *Spaniards* afterwards taught the *Indians* how to open them without Fire. *Tumaco*, obſerving that the Pearls occaſioned ſuch Joy among them, to ſhew that he valued them but little, ſent ſome *Indians* to fiſh, and within four Days they brought as many as weighed no leſs than ninety-ſix Ounces. Both *Spaniards* and *Indians* were well pleaſed, the former concluding they ſhould be poſſeſſed of all that Wealth, and the latter, eſpecially Caziques, for the Friendſhip of the *Spaniards*, ſeeing them fond of Gold and Pearls, which they valued but little; but *Chiapes* rejoiced moſt becauſe he had been inſtrumental in gaining *Tumaco*'s Friendſhip.

Thoſe two Caziques aſſured *Nunez*, that there was an Iſland about five Leagues from thence, in that Bay, governed by a powerful Cazique; where there were abundance of large Oyſters, which had Pearls in them as big as Beans. *Nunez* ordered the Canoes to be immediately made ready to go over to it. The Caziques intreated him not to think of it at that time, but to ſtay till Summer, when the Sea was calm, and he might then go with Eaſe, and they would bear him Company, and he approved of their Advice. The Cazique *Tumaco* alſo informed *Balboa*, that the Coaſt extended prodigiouſly, pointing towards *Peru*; that there was an immenſe Quantity of Gold, and that the Natives uſed certain Beaſts to carry their Burdens, being the Sheep of that Country, and made a Figure of them with Earth to repreſent them the better. The *Spaniards* were amazed; ſome ſaid they were Camels, others that they were Stags or Fallow Deer, of which there are many on the Continent, about as big as ſmall Calves, but their Legs ſo ſhort, that they are not above a Span in Length, and their Horns ſmall. This was the ſecond Intimation *Nunez* had of *Peru*, and its Wealth.

9. It was about the Middle of *January* that *Nunez de Balboa* returned back to *Santa Maria*, carrying with him Gold to a very great Value, and Pearls to a much greater; of which he made a very fair Diviſion, reſerving the fifth Part for the King, and diſtributing the reſt among the Soldiers in ſuch a Manner, that they were perfectly ſatisfied with his Conduct. He judged now, and not without great Appearance of Reaſon, that he had performed ſo ſignal a Service, that it was impoſſible for the Miniſters to deny that it made Amends for any Indiſcretions into which he had fallen. He reſolved therefore to ſend another Agent to *Spain* with the King's Money, and with more conſiderable Preſents than it was in his Power to ſend by the former. The Perſon he made choice of for this Negociation was *Peter Arbolanchos*, a Man of Capacity, and, which was of greater Conſequence to him, a Perſon of great Integrity and unſhaken Fidelity.

He applied himſelf when he came to Court, to the famous Biſhop of *Burgos*; who received his Letters with Civility, which changed into the greateſt Kindneſs and Friendſhip upon the Sight of the Gold and Pearls that *Balboa* had ſent him; for theſe fully convinced him that he was innocent, and a good Officer, and therefore he took Pains to ſet him right in the Opinion of King *Ferdinand*, who was then living, and who had hitherto a great Averſion to *Nunez de Balboa*; but the Favours of this Prelate came too late, for he had already done this unhappy Man ſuch an Injury as he was not able to repair. It was a Maxim with this Biſhop, that there was nothing ſo dangerous as to ſuffer the great Men who made Diſcoveries in the *Indies* to perfect them; and therefore as ſoon as they had opened the Road to new Countries, and had overcame the firſt, which are always the greateſt, Difficulties, it was his conſtant Method to ſend ſome of his own Creatures to reap the Fruits of their Labours.

The Perſon he had fixed upon, before the Arrival of *Balboa*'s Agent, to go Governor of *Caſtilla del Oro*, was one Don *Pedro Arias d'Avila*, whom the *Spaniſh* Writers, by joining his two firſt Names, commonly call *Pedrarias*, a Man of Birth, of a Court Education, which had furniſhed him with ſeveral Qualities very ſuitable to the Climate of *Spain*, but not at all calculated for the King's Service in the *Indies*: He was haughty and proud to the laſt Degree, naturally inſincere, and a very artificial Diſſembler, barbarouſly unjuſt, and cruel beyond Expreſſion, one who thought the only Compenſation that could be made for leaving his native Country, was to raiſe a vaſt Fortune, which, as he wanted Talents to do in an honeſt Way, he reſolved to bring about by the Methods he underſtood, which were Violence, Fraud, and Oppreſſion; in all of which he was a complete Maſter.

We have his Character drawn to the Life by the Hand of the Biſhop of *Chiapa*, who repreſents him as the wickedeſt Monſter that was ever ſent into thoſe Parts; but out of Reſpect to his Patron the Biſhop of *Burgos*, after giving ſo true a Character of him, he does not name him. Such was the Perſon that was ſent over to take Poſſeſſion of that Country which *Balboa* had diſcovered.

10. This new Governor, *Pedrarias*, ſailed from *Spain* the 12th of *April*, 1514, with a Fleet of fifteen Sail, with two thouſand Soldiers on board, and a Fryar, one *John de Quevedo*, who had been conſecrated, before his Departure, Biſhop of *Darien*, and many other Perſons, in other great Offices; and among the reſt *Enciſo*, the mortal Enemy of *Balboa*, was his Provoſt-Marſhal. He arrived in the latter End of the Month of *July*, in the Gulph of *Uraba*, and from thence proceeded to *Santa Maria*, where he was received with all imaginable Reſpect, by the famous *Nunez de Balboa*, of whom he had heard ſo much, and for whom he cared ſo little.

He was very much ſurprized at his Appearance, and at the State in which he found the Colony. There was indeed a very ſtrong Fort, and four hundred and fifty brave Fellows to defend it; but the Governor's Houſe, or if you will, his Palace, conſiſted but of three Rooms, and his Dreſs correſponded with his Dwelling: He had a Pair of Canvas Drawers, and a Cotton Waiſtcoat over his Shirt, and that was all. His Diet was of a piece with the reſt; a Joint of roaſt Pork, ſome Greens and Fruit, was all his Table afforded; at which no other Liquor was drank but good Spring-water. Such were the Manners of this Conqueror, who fared nothing better than the meaneſt of his Soldiers; but there was no Murmuring, no Complaints; he maintained his Authority by the Means which had acquired it, his Merit; and his Soldiers loved him, and feared him as a Father. His ſole Fault was his Ambition, that had led him to do ſome unwarrantable things to obtain Power; but when obtained, none uſed it better.

His Accounts were clear; he made good every Point he had written to *Spain*, and opened a Paſſage to the *South-Seas*, and ſubdued all the Country between them and his Colony; in return for which good Services *Pedrarias* committed him cloſe Priſoner to the Cuſtody of *Enciſo*, and did not ſet him at Liberty till he had fined him in above half his Fortune. In order to juſtify this Proceeding, he ſent over a very falſe Report to the Court of *Spain*, and expected that this ſhould have procured him a Power of going greater Lengths; but in this he was miſtaken. He had brought over ſome honeſt Men with him, who ventured (which was ſtrange) to ſend the naked Truth to Court; and, which was ſtranger ſtill, it met with all the Credit that it deſerved.

When the King's Letters came to be opened, his Majeſty declared in them, that he was perfectly ſatisfied with the Conduct of *Nunez de Balboa*, that therefore he had created him Lord-Lieutenant of the Countries on the *South-Seas*; that he expected the Governor ſhould take his Advice; and that the Meaſure of his Obedience to his Orders would appear from the Reſpect he ſhewed to *Balboa*. *Pedrarias*, equally diſpleaſed and diſappointed, took care to conceal both, and, like a true Courtier, reſolved to conform, in Appearance, to his Maſter's Orders, but to diſobey them in Effect, and to leave no Means untried, to work the Deſtruction of the Man he hated, in which, as we ſhall ſee, he ſucceeded to the full.

In order to leſſen the Character of his Predeceſſor, and raiſe his own, the new Governor ſent ſeveral of his Officers to make Excurſions into the Country, which he thought might produce new Diſcoveries, as indeed they did, but not to the Advantage of the Colony or of the Crown of *Spain*, ſince they contributed only to ſhew the Avarice and Cruelty of the *Spaniards* in the moſt glaring Lights: His Officers knew the only Method too btain his Favour and Protection was to make him large Preſents, and to plunder all the Caziques without Mercy; ſo that in a few Months time, that Reputation for Honeſty and kind Uſage which *Nunez de Balboa* had been at ſo much Pains to eſtabliſh, was entirely loſt, and War between them and the Natives broke out afreſh with greater Fury than ever, ſo that there were no great Hopes of his making any Progreſs; which when he came ſeriouſly to conſider, he entered upon a new Scheme, and, by the Aſſiſtance of his Biſhop *Quevedo*, reconciled himſelf to *Balboa*, who very ſincerely applied himſelf, as he had done formerly, to the public Service, and that too with his uſual Succeſs, which revived, as might be naturally expected, the Envy of *Pedrarias*, notwithſtanding that *Nunez* had promiſed to marry his Daughter, and he had thereupon called and in publick treated him as his Son.

The Buſineſs in which he had employed him was the building a Town, eſtabliſhing a Port, and from thence fitting out Ships upon the *South Seas*; all which, with incredible Labour and Fatigue, he at length accompliſhed, which added to the great Reputation he had before acquired. *Pedrarias* ſeeing this, and that moſt People in his Government were inclined to remove, and to ſettle in the Town built by *Nunez de Balboa*, as ſoon as it was finiſhed, reſolved no longer to delay the removing out of his way a Man, whoſe Superiority became more and more conſpicuous: He ſent for him therefore to *Santa Maria*; and *Nunez de Balboa* made no Difficulty of obeying his Order, either becauſe he did not ſuſpect his ill Intentions towards him, or that relying upon his own Innocence, he thought it out of the Governor's Power to hurt him.

Upon his Arrival, however, *Pedrarias* commenced a freſh Proſecution againſt him, on the ſame Pretences for which he had fined him before; and to theſe he added another very extraordinary Accuſation, which was a treaſonable Intention to uſurp the King's Domain, founded upon nothing more than his having cut down, without the Governor's Licence, ſome Timber for erecting public Edifices; and upon this Charge he condemned him to ſuffer Death, to the Amazement of the Colony and the Terror of all the Inhabitants. He perſiſted however in his Deſign, and cauſed this unfortunate Gentleman to be publickly beheaded. Such was the Fate of *Vaſquez Nunez de Balboa*, who, in the forty-ſecond Year of his Age, ſuffered as a Traytor, for having ſerved his Prince with too much Zeal and Fidelity. The Royal Audience at *Santo Domingo* condemned this Action of *Pedrarias* as a downright Murder; but it does not appear that he was ever called to any Account for it; but, on the contrary, was permitted to go on in the ſame baſe and barbarous Track for many Years together. This happened in the Year 1517, and in the third of *Pedrarias*'s Government.

12. When he had thus, at the Expence of Law and Juſtice, freed himſelf from a Man whom he both hated and feared, *Pedrarias* reſolved to ſettle a new Colony at *Panama*; notwithſtanding that, from the Heat and Moiſture of the Country about it, it was very unwholſome; but as it ſtood commodious for Trade, and was a Place very convenient for the Diſcoveries then making, the Governor remained fixed in his Reſolution, built a Palace there, and made it the Seat of his Government. Upon this others came thither to dwell, ſo that by degrees it grew a tolerable Place, and increaſed in its Inhabitants very faſt, becauſe it was pretty well fortified, and becauſe the Harbour is very ſpacious, where the Ships upon the Ebb are left dry. The Circumference of the City is ſmall, by reaſon of a Moraſs that incloſes it on one Side, and the Damps that riſe from it render the Place very unhealthy: It ſtretches out from Eaſt to Weſt, ſo that when the Sun riſes there is no going along the Streets, becauſe there is no Shade; and the Heat is ſo offenſive, that it occaſions many Diſtempers. Though it has been ſeveral times propoſed to remove it to ſome better Place, it has not been done, on account of the great Price the Houſes bear, and that the ancient Inhabitants are dead; and ſuch as live there now are generally Traders, and ſtay there no longer than they can acquire enough to go ſomewhere elſe.

There is a River runs near the City, and the Diſtrict is large, in which there are many Farms, and ſtore of black Cattle, the Soil being proper for them; ſeveral Sorts of *Spaniſh* Fruit have been planted, and there are of the Country very good, as Pine-Apples, Plantain, Guayabas, beſides others about the Fields. The Rivers afford Gold, which was found in Plenty upon the firſt building of the City. It is well ſupplied with Proviſions, being furniſhed from both Seas. Neither Wheat nor Barley grow within its Diſtrict, but there is much Maize or *Indian* Corn carried from *Spain* and *Peru*. There are good Fiſh in the Rivers, and in the Sea, though different from what are found in *Spain*: Near the Houſes along the Coaſt there are vaſt Quantities of Cockles, by the Natives called *Chucha*; and it is thought, that for the Sake of them the *Spaniards* at firſt built the City there, as being ſome Supply in time of Want. In the Rivers of this Province, there are vaſt Numbers of Alligators, ſo large, that they are hideous to look at; and one has been found in the River of *St. George*, that was twenty-five Foot long: The Fleſh of them, which the *Spaniards* were wont to eat for want of better, when they were upon their Diſcoveries, is bad and ill-ſcented: The Creatures themſelves are fierce and frightful, and have devoured many *Spaniards* and *Indians*, and even Horſes, while croſſing Rivers. There are few of the Natives in the Territories of this City, having been deſtroyed in the Wars: The Trade there is extraordinary, rich Ships coming in continually from *Peru*, laden with Gold and Silver.

The Commodities carried from *Spain*, on board the Fleets, are conveyed thither on numerous Teams, kept for that Purpoſe; a conſiderable Part being ſent up the River *Chagre*, within five Leagues of *Panama*, which lies in between eight and nine Degrees N. Latitude. This Place being conſiderable, the King ordered many religious Men to be ſent over to convert the *Indians*, and made it a Biſhopric. Yet it is ſaid, that during the firſt twenty-eight Years after the Conqueſt of *Peru*, above forty thouſand Men were computed to have died there, of violent Diſtempers. Soon after, *James Albetez* founded another Town at *Nombre de Dios*, which was alſo famous for many Years, theſe two being noted for the Trade between the North and South Seas; and here, as well as at *Panama*, many thouſand *Spaniards* periſhed by the bad Air.

In the Reign of King *Philip* II. to avoid the ſaid Mortality, *Nombre de Dios* was quite abandoned, and the Inhabitants removed to *Porto Bello*, where the Trade now continues. As ſoon as theſe two Towns were founded, Orders were taken for making a Road between them, being the neareſt between the two Seas; though the Mountains were very uncooth, on which there were then infinite Numbers of Lyons, Tygers, and other wild Beaſts, and ſuch a Multitude of Monkies of ſeveral Sizes as deafened their Ears with their Cries; which, running up the Trees when any People paſſed by, were wont to throw Stones at them, but the *Spaniards* kept them in Awe with their Croſs-bows.

13. It muſt be allowed, that this *Pedrarias* did not want Talents ſuitable to his Office; for he had Courage, Diligence, and a ſtrong Deſire to do great Things; and yet, notwithſtanding all this, in the Compaſs of eight or nine Years, he did little or nothing, which the *Spaniards* attributed to the juſt Judgment of God, for his cruel Uſage to *Nunez de Balboa*. There is no doubt that God is always juſt; but perhaps we are not wiſe enough to diſtinguiſh his Judgments, and, therefore, it may be as well to refer the want of Succeſs in this Governor's Adminiſtration to Cauſes more manifeſt, without excluding, however, the divine Juſtice, which has certainly connected Miſery and Vice, and plagues the Neglect of moral Duties by a continual Train of Misfortunes. The Truth of the Matter is, that his Vices defeated all his Schemes, and rendered all his Undertakings abortive. Inſtead of treating the *Indian* Caziques as his Predeceſſor *Nunez* had done, with Civility and Juſtice, he behaved towards them like an imperious Maſter, and yet he was not able to extort half the Quantity of Gold that had been freely beſtowed on *Balboa* in Preſents. He granted Licences to various Perſons to undertake Diſcoveries; but on ſuch hard Terms, and with ſo many Reſtrictions, that they had no better Succeſs than himſelf; and all their Endeavours had no other Effect than to waſte great Numbers of Men, and to bring an Odium upon Expeditions into the *South Seas*.

But what chiefly employed the Care of this Governor, was reducing *Urraca*, Cazique of the Mountains, whoſe Country was very rich in Gold; and who, after the Deceaſe of *Nunez*, would have nothing to do with the *Spaniards*, preſuming, as he ſaid, that they could mean no Good to others, who perſecuted and murdered each other.

verned by a powerful Cazique; where there were abundance of large Oyſters, which had Pearls in them as big as Beans. *Nunez* ordered the Canoes to be immediately made ready to go over to it. The Caziques intreated him not to think of it at that time, but to ſtay till Summer, when the Sea was calm, and he might then go with Eaſe, and they would bear him Company, and he approved of their Advice. The Cazique *Tumaco* alſo informed *Balboa*, that the Coaſt extended prodigiouſly, pointing towards *Peru*; that there was an immenſe Quantity of Gold, and that the Natives uſed certain Beaſts to carry their Burdens, being the Sheep of that Country, and made a Figure of them with Earth to repreſent them the better. The *Spaniards* were amazed; ſome ſaid they were Camels, others that they were Stags or Fallow Deer, of which there are many on the Continent, about as big as ſmall Calves, but their Legs ſo ſhort, that they are not above a Span in Length, and their Horns ſmall. This was the ſecond Intimation *Nunez* had of *Peru*, and its Wealth.

9. It was about the Middle of *January* that *Nunez de Balboa* returned back to *Santa Maria*, carrying with him Gold to a very great Value, and Pearls to a much greater; of which he made a very fair Diviſion, reſerving the fifth Part for the King, and diſtributing the reſt among the Soldiers in ſuch a Manner, that they were perfectly ſatisfied with his Conduct. He judged now, and not without great Appearance of Reaſon, that he had performed ſo ſignal a Service, that it was impoſſible for the Miniſters to deny that it made Amends for any Indiſcretions into which he had fallen. He reſolved therefore to ſend another Agent to *Spain* with the King's Money, and with more conſiderable Preſents than it was in his Power to ſend by the former. The Perſon he made choice of for this Negociation was *Peter Arbolanchos*, a Man of Capacity, and, which was of greater Conſequence to him, a Perſon of great Integrity and unſhaken Fidelity.

He applied himſelf when he came to Court, to the famous Biſhop of *Burgos*; who received his Letters with Civility, which changed into the greateſt Kindneſs and Friendſhip upon the Sight of the Gold and Pearls that *Balboa* had ſent him; for theſe fully convinced him that he was innocent, and a good Officer, and therefore he took Pains to ſet him right in the Opinion of King *Ferdinand*, who was then living, and who had hitherto a great Averſion to *Nunez de Balboa*; but the Favours of this Prelate came too late, for he had already done this unhappy Man ſuch an Injury as he was not able to repair. It was a Maxim with this Biſhop, that there was nothing ſo dangerous as to ſuffer the great Men who made Diſcoveries in the *Indies* to perfect them; and therefore as ſoon as they had opened the Road to new Countries, and had overcame the firſt, which are always the greateſt, Difficulties, it was his conſtant Method to ſend ſome of his own Creatures to reap the Fruits of their Labours.

The Perſon he had fixed upon, before the Arrival of *Balboa*'s Agent, to go Governor of *Caſtilla del Oro*, was one Don *Pedro Arias d'Avila*, whom the *Spaniſh* Writers, by joining his two firſt Names, commonly call *Pedrarias*, a Man of Birth, of a Court Education, which had furniſhed him with ſeveral Qualities very ſuitable to the Climate of *Spain*, but not at all calculated for the King's Service in the *Indies*: He was haughty and proud to the laſt Degree, naturally inſincere, and a very artificial Diſſembler, barbarouſly unjuſt, and cruel beyond Expreſſion, one who thought the only Compenſation that could be made for leaving his native Country, was to raiſe a vaſt Fortune, which, as he wanted Talents to do in an honeſt Way, he reſolved to bring about by the Methods he underſtood, which were Violence, Fraud, and Oppreſſion; in all of which he was a complete Maſter.

We have his Character drawn to the Life by the Hand of the Biſhop of *Chiapa*, who repreſents him as the wickedeſt Monſter that was ever ſent into thoſe Parts; but out of Reſpect to his Patron the Biſhop of *Burgos*, after giving ſo true a Character of him, he does not name him. Such was the Perſon that was ſent over to take Poſſeſſion of that Country which *Balboa* had diſcovered.

10. This new Governor, *Pedrarias*, ſailed from *Spain* the 12th of *April*, 1514, with a Fleet of fifteen Sail, with two thouſand Soldiers on board, and a Fryar, one *John de Quevedo*, who had been conſecrated, before his Departure, Biſhop of *Darien*, and many other Perſons, in other great Offices; and among the reſt *Enciſo*, the mortal Enemy of *Balboa*, was his Provoſt-Marſhal. He arrived in the latter End of the Month of *July*, in the Gulph of *Uraba*, and from thence proceeded to *Santa Maria*, where he was received with all imaginable Reſpect, by the famous *Nunez de Balboa*, of whom he had heard ſo much, and for whom he cared ſo little.

He was very much ſurprized at his Appearance, and at the State in which he found the Colony. There was indeed a very ſtrong Fort, and four hundred and fifty brave Fellows to defend it; but the Governor's Houſe, or if you will, his Palace, conſiſted but of three Rooms, and his Dreſs correſponded with his Dwelling: He had a Pair of Canvas Drawers, and a Cotton Waiſtcoat over his Shirt, and that was all. His Diet was of a piece with the reſt; a Joint of roaſt Pork, ſome Greens and Fruit, was all his Table afforded; at which no other Liquor was drank but good Spring-water. Such were the Manners of this Conqueror, who fared nothing better than the meaneſt of his Soldiers; but there was no Murmuring, no Complaints; he maintained his Authority by the Means which had acquired it, his Merit; and his Soldiers loved him, and feared him as a Father. His ſole Fault was his Ambition, that had led him to do ſome unwarrantable things to obtain Power; but when obtained, none uſed it better.

His Accounts were clear; he made good every Point he had written to *Spain*, and opened a Paſſage to the *South-Seas*, and ſubdued all the Country between them and his Colony; in return for which good Services *Pedrarias* committed him cloſe Priſoner to the Cuſtody of *Enciſo*, and did not ſet him at Liberty till he had fined him in above half his Fortune. In order to juſtify this Proceeding, he ſent over a very falſe Report to the Court of *Spain*, and expected that this ſhould have procured him a Power of going greater Lengths; but in this he was miſtaken. He had brought over ſome honeſt Men with him, who ventured (which was ſtrange) to ſend the naked Truth to Court; and, which was ſtranger ſtill, it met with all the Credit that it deſerved.

When the King's Letters came to be opened, his Majeſty declared in them, that he was perfectly ſatisfied with the Conduct of *Nunez de Balboa*, that therefore he had created him Lord-Lieutenant of the Countries on the *South-Seas*; that he expected the Governor ſhould take his Advice; and that the Meaſure of his Obedience to his Orders would appear from the Reſpect he ſhewed to *Balboa*. *Pedrarias*, equally diſpleaſed and diſappointed, took care to conceal both, and, like a true Courtier, reſolved to conform, in Appearance, to his Maſter's Orders, but to diſobey them in Effect, and to leave no Means untried, to work the Deſtruction of the Man he hated, in which, as we ſhall ſee, he ſucceeded to the full.

In order to leſſen the Character of his Predeceſſor, and raiſe his own, the new Governor ſent ſeveral of his Officers to make Excurſions into the Country, which he thought might produce new Diſcoveries, as indeed they did, but not to the Advantage of the Colony or of the Crown of *Spain*, ſince they contributed only to ſhew the Avarice and Cruelty of the *Spaniards* in the moſt glaring Lights: His Officers knew the only Method too btain his Favour and Protection was to make him large Preſents, and to plunder all the Caziques without Mercy; ſo that in a few Months time, that Reputation for Honeſty and kind Uſage which *Nunez de Balboa* had been at ſo much Pains to eſtabliſh, was entirely loſt, and War between them and the Natives broke out afreſh with greater Fury than ever, ſo that there were no great Hopes of his making any Progreſs; which when he came ſeriouſly to conſider, he entered upon a new Scheme, and, by the Aſſiſtance of his Biſhop *Quevedo*, reconciled himſelf to *Balboa*, who very ſincerely applied himſelf, as he had done formerly, to the public Service, and that too with his uſual Succeſs, which revived, as might be naturally expected, the Envy of *Pedrarias*, notwithſtanding that *Nunez* had promiſed to marry his Daughter, and he had thereupon called and in publick treated him as his Son.

The Buſineſs in which he had employed him was the building a Town, eſtabliſhing a Port, and from thence fitting out Ships upon the *South Seas*; all which, with incredible Labour and Fatigue, he at length accompliſhed, which added to the great Reputation he had before acquired. *Pedrarias* ſeeing this, and that moſt People in his Government were inclined to remove, and to ſettle in the Town built by *Nunez de Balboa*, as ſoon as it was finiſhed, reſolved no longer to delay the removing out of his way a Man, whoſe Superiority became more and more conſpicuous: He ſent for him therefore to *Santa Maria*; and *Nunez de Balboa* made no Difficulty of obeying his Order, either becauſe he did not ſuſpect his ill Intentions towards him, or that relying upon his own Innocence, he thought it out of the Governor's Power to hurt him.

Upon his Arrival, however, *Pedrarias* commenced a freſh Proſecution againſt him, on the ſame Pretences for which he had fined him before; and to theſe he added another very extraordinary Accuſation, which was a treaſonable Intention to uſurp the King's Domain, founded upon nothing more than his having cut down, without the Governor's Licence, ſome Timber for erecting public Edifices; and upon this Charge he condemned him to ſuffer Death, to the Amazement of the Colony and the Terror of all the Inhabitants. He perſiſted however in his Deſign, and cauſed this unfortunate Gentleman to be publickly beheaded. Such was the Fate of *Vaſquez Nunez de Balboa*, who, in the forty-ſecond Year of his Age, ſuffered as a Traytor, for having ſerved his Prince with too much Zeal and Fidelity. The Royal Audience at *Santo Domingo* condemned this Action of *Pedrarias* as a downright Murder; but it does not appear that he was ever called to any Account for it; but, on the contrary, was permitted to go on in the ſame baſe and barbarous Track for many Years together. This happened in the Year 1517, and in the third of *Pedrarias*'s Government.

12. When he had thus, at the Expence of Law and Juſtice, freed himſelf from a Man whom he both hated and feared, *Pedrarias* reſolved to ſettle a new Colony at *Panama*; notwithſtanding that, from the Heat and Moiſture of the Country about it, it was very unwholſome; but as it ſtood commodious for Trade, and was a Place very convenient for the Diſcoveries then making, the Governor remained fixed in his Reſolution, built a Palace there, and made it the Seat of his Government. Upon this others came thither to dwell, ſo that by degrees it grew a tolerable Place, and increaſed in its Inhabitants very faſt, becauſe it was pretty well fortified, and becauſe the Harbour is very ſpacious, where the Ships upon the Ebb are left dry. The Circumference of the City is ſmall, by reaſon of a Moraſs that incloſes it on one Side, and the Damps that riſe from it render the Place very unhealthy: It ſtretches out from Eaſt to Weſt, ſo that when the Sun riſes there is no going along the Streets, becauſe there is no Shade; and the Heat is ſo offenſive, that it occaſions many Diſtempers. Though it has been ſeveral times propoſed to remove it to ſome better Place, it has not been done, on account of the great Price the Houſes bear, and that the ancient Inhabitants are dead; and ſuch as live there now are generally Traders, and ſtay there no longer than they can acquire enough to go ſomewhere elſe.

There is a River runs near the City, and the Diſtrict is large, in which there are many Farms, and ſtore of black Cattle, the Soil being proper for them; ſeveral Sorts of *Spaniſh* Fruit have been planted, and there are of the Country very good, as Pine-Apples, Plantain, Guayabas, beſides others about the Fields. The Rivers afford Gold, which was found in Plenty upon the firſt building of the City. It is well ſupplied with Proviſions, being furniſhed from both Seas. Neither Wheat nor Barley grow within its Diſtrict, but there is much Maize or *Indian* Corn carried from *Spain* and *Peru*. There are good Fiſh in the Rivers, and in the Sea, though different from what are found in *Spain*: Near the Houſes along the Coaſt there are vaſt Quantities of Cockles, by the Natives called *Chucha*; and it is thought, that for the Sake of them the *Spaniards* at firſt built the City there, as being ſome Supply in time of Want. In the Rivers of this Province, there are vaſt Numbers of Alligators, ſo large, that they are hideous to look at; and one has been found in the River of *St. George*, that was twenty-five Foot long: The Fleſh of them, which the *Spaniards* were wont to eat for want of better, when they were upon their Diſcoveries, is bad and ill-ſcented: The Creatures themſelves are fierce and frightful, and have devoured many *Spaniards* and *Indians*, and even Horſes, while croſſing Rivers. There are few of the Natives in the Territories of this City, having been deſtroyed in the Wars: The Trade there is extraordinary, rich Ships coming in continually from *Peru*, laden with Gold and Silver.

The Commodities carried from *Spain*, on board the Fleets, are conveyed thither on numerous Teams, kept for that Purpoſe; a conſiderable Part being ſent up the River *Chagre*, within five Leagues of *Panama*, which lies in between eight and nine Degrees N. Latitude. This Place being conſiderable, the King ordered many religious Men to be ſent over to convert the *Indians*, and made it a Biſhopric. Yet it is ſaid, that during the firſt twenty-eight Years after the Conqueſt of *Peru*, above forty thouſand Men were computed to have died there, of violent Diſtempers. Soon after, *James Albetez* founded another Town at *Nombre de Dios*, which was alſo famous for many Years, theſe two being noted for the Trade between the North and South Seas; and here, as well as at *Panama*, many thouſand *Spaniards* periſhed by the bad Air.

In the Reign of King *Philip* II. to avoid the ſaid Mortality, *Nombre de Dios* was quite abandoned, and the Inhabitants removed to *Porto Bello*, where the Trade now continues. As ſoon as theſe two Towns were founded, Orders were taken for making a Road between them, being the neareſt between the two Seas; though the Mountains were very uncooth, on which there were then infinite Numbers of Lyons, Tygers, and other wild Beaſts, and ſuch a Multitude of Monkies of ſeveral Sizes as deafened their Ears with their Cries; which, running up the Trees when any People paſſed by, were wont to throw Stones at them, but the *Spaniards* kept them in Awe with their Croſs-bows.

13. It muſt be allowed, that this *Pedrarias* did not want Talents ſuitable to his Office; for he had Courage, Diligence, and a ſtrong Deſire to do great Things; and yet, notwithſtanding all this, in the Compaſs of eight or nine Years, he did little or nothing, which the *Spaniards* attributed to the juſt Judgment of God, for his cruel Uſage to *Nunez de Balboa*. There is no doubt that God is always juſt; but perhaps we are not wiſe enough to diſtinguiſh his Judgments, and, therefore, it may be as well to refer the want of Succeſs in this Governor's Adminiſtration to Cauſes more manifeſt, without excluding, however, the divine Juſtice, which has certainly connected Miſery and Vice, and plagues the Neglect of moral Duties by a continual Train of Misfortunes. The Truth of the Matter is, that his Vices defeated all his Schemes, and rendered all his Undertakings abortive. Inſtead of treating the *Indian* Caziques as his Predeceſſor *Nunez* had done, with Civility and Juſtice, he behaved towards them like an imperious Maſter, and yet he was not able to extort half the Quantity of Gold that had been freely beſtowed on *Balboa* in Preſents. He granted Licences to various Perſons to undertake Diſcoveries; but on ſuch hard Terms, and with ſo many Reſtrictions, that they had no better Succeſs than himſelf; and all their Endeavours had no other Effect than to waſte great Numbers of Men, and to bring an Odium upon Expeditions into the *South Seas*.

But what chiefly employed the Care of this Governor, was reducing *Urraca*, Cazique of the Mountains, whoſe Country was very rich in Gold; and who, after the Deceaſe of *Nunez*, would have nothing to do with the *Spaniards*, preſuming, as he ſaid, that they could mean no Good to others, who perſecuted and murdered each other.

Pedrarias made War upon him for five Years together, and in that Space of Time deſtroyed a great Number of his Subjects, yet was never able to ſubdue or render him tributary. On the contrary, this *Indian* Prince was frequently too hard for the *Spaniards:* His Subjects were ſtout and warlike, the Situation of his Dominions gave him great Advantages; for the *Spaniards* could never act againſt him with Horſe; and with all this, he was himſelf a Prince of great good Senſe, extreamly brave and enterpriſing, one who foreſaw Advantages as ſoon as any Man, and there were very few who could manage them better. This the Reader will eaſily believe, when he is told that *Pedrarias* loſt more Men in the Courſe of this War, than *Cortes* in the Conqueſt of *Mexico*, without getting a Foot of Land, or an Ounce of Gold by the Bargain. But he made himſelf ſome Amends by his grievous Extortions upon ſuch of the Caziques as had ſubmitted to the *Spaniards*; and, with the Gold he forced from them, maintained ſo great an Intereſt at Court, that notwithſtanding every Enterprize of his was attended with Loſs, yet every new Project he ſent over was approved and applauded.

This will appear the more extraordinary, when it is conſidered that never any Man met with more Oppoſition than he did; for, on the one hand, he was hated to the laſt degree by the *Indians*, for whoſe Sake the Biſhop of *Chiapa* went in Perſon to *Madrid*, to ſollicit Relief. The *Spaniſh* Officers were likewiſe uneaſy, and wrote home a true Repreſentation of his Conduct, which was ſuch as would have ruined the Fortune of any other Man. Beſides all this, he was upon very bad Terms with the Royal Audience at *St. Domingo*, which was then, what it ſtill is, the ſupreme Tribunal in the *Weſt-Indies*; and the chief Reaſon for his removing the Seat of his Government from *Santa Maria* to *Panama* was, that he might be farther out of their Reach. Thus it plainly appears, that this Man's ſelfiſh, haughty, and overbearing Temper, was very near as fatal to himſelf and his Dependents, as to others that he had to deal with; and that he might have been infinitely more happy, as well as made others ſo, if he had behaved better; which might prove an uſeful Leſſon to other Governors, if they were a Sort of People capable of learning any Good from the Examples of their Predeceſſors, or of liſtening to ſuch Truths as they might always learn from the Voice of the People.

14. We ſhall have occaſion to mention this Man ſometimes in the following Pages; but as we ſhall have no Opportunity of continuing the Hiſtory of his Adminiſtration to its Cloſe, we will take Leave of him here, by relating another extraordinary Exploit of his, while he continued in full Poſſeſſion of Power. He was informed, about the Beginning of the Year 1526, that the Court of *Spain*, wearied with continual Complaints againſt him, was at length reſolved to ſend him a Succeſſor. As he knew no Means of avoiding this, and yet had no mind to part with his Power, he began to caſt about in his own Mind where to find another Eſtabliſhment. There was only one Expedition which had met with any kind of Succeſs under any of his Creatures, and that was the Conqueſt of *Nicaragua* by *Francis Hernandez*, who acted under his Licence, and he had alſo been at ſome Expence in fitting him out.

He reſolved therefore to retire into this Country, for two Reaſons: Firſt, that he might ſecure it for himſelf, though of right it belonged to him who had ſubdued it; and next, that he might avoid delivering up his Province to his Succeſſor in Perſon, for fear he ſhould treat him as he had done *Balboa*. One would have imagined, that when his Affairs were in ſuch a Situation, he ſhould have abated ſomewhat of his Pride, or at leaſt of his Cruelty; but whether it was that he had no Power over his Temper, or that he knew he had ſtill Intereſt enough with the Miniſters to prevent his being called to an Account for ſo ſmall a Matter as a Murder, ſo it was, that he committed one more baſe and barbarous, if poſſible, than that of *Nunez de Balboa*.

The thing happened thus: He pretended, as ſoon as he came into the new Province, that he had Information his Deputy had a mind to revolt; he therefore ſent for him to anſwer to this Charge. *Francis Hernandez*, who knew there was not a Word of Truth in it, came with that Boldneſs that is natural to Innocence; and *Pedrarias* had him no ſooner in his Power, than he cauſed his Head to be ſtruck off, alledging, that there was no other way for a Government to be ſafe againſt Perſons in Power, when their Fidelity was once ſuſpected. As black and heinous as this Fact was, he eſcaped being queſtioned for it; and was confirmed in his Government of *Nicaragua*, as if the gratifying his own unjuſt Reſentments had been an indiſputable Proof of his Attachment to the Crown of *Spain*, and Zeal for its Service.

15. I ſhall cloſe this Section with remarking, that there never was an Obſervation more true than that which was laid before the Reader when we opened this Hiſtory of the *Spaniſh* Conqueſts in *America*, which was, that they were intirely owing to the Abilities of particular and private Perſons, called forth by Accidents, and never to the Wiſdom or Foreſight of the *Spaniſh* Miniſters; who, on the contrary, were ſo ready to cramp ſuch as they ought to have encouraged, that they really made the Diſobedience neceſſary which they pretended to correct, and gave Birth by their ill Management to thoſe Inconveniencies they endeavoured to avoid.

I am not at all afraid of owning, that I firſt made, and now repeat, this Obſervation with a View of ſhewing how weak and fooliſh a thing it is for Men who want Genius to think of limiting and circumſcribing ſuch as are endowed with it. It is a Sort of Policy not much unlike erecting Banks to ſtop a Torrent, which is the ſureſt way to increaſe the Miſchief. That natural Fire, which a warmer Writer perhaps would have ſtiled Divine, and we call Genius, is a noble and generous Flame, that, like the Rays of the Sun, cheriſhes and enlivens all within their Reach, and which becomes dangerous only when artificially contracted. We have ſeen what *Cortes* did, and how he was treated. In the next Section, which is the laſt that regards the *Spaniards*, we ſhall ſee ſeveral Inſtances of the ſame kind, all which prove, that it is infinitely more adviſeable for Stateſmen to uſe fair and gentle Methods with Perſons of ſuch extraordinary Abilities, and rather lead them, by propoſing the juſt Rewards of Glory, than pretend to compel them by little Arts which are equally vain and fatal, either to thoſe by whom they are uſed, or the Nation in whoſe Service ſuch Talents are exerted. Had *Velaſquez* and the Biſhop of *Burgos* been able to circumvent *Cortes*, the *Mexican* Empire had ſtood, and the *Spaniards* had loſt thoſe Treaſures which it has ſince yielded. Had *Nunez de Balboa* eſcaped the Snares that were laid for him, *Peru* had been ſooner ſubdued; and if *Francis Pizarro* had not been wiſe enough to take Warning by his Example, it had very probably never been ſubdued at all.

Heroes, like other Men, have their Faults; but, perhaps, their Faults merit more Indulgence: Thoſe who have none of their Excellencies, have frequently more Faults and blacker Vices. Envy is not the Produce of a rank but of a barren Soil; and Malice is a Weed that ſprings in dirty Minds, as the moſt poiſonous Plants are found in Marſhes. Whoever reflects on the pitiful Creatures that extinguiſhed ſo great a Genius as our Sir *Walter Raleigh*, will pardon this Digreſſion, and forgive a Man for indulging his Deſire of ſecuring future Merit from thoſe Miſchances which have been fatal to it in former Times. It is all that lies in the Power of one who is immerſed in Books; it is the utmoſt Service his Pen can render to thoſe whom his Mind adores; and if by celebrating the Memory of great Men, who are gone, he can contribute to excite others to an Imitation of their Actions, and recommend Virtue to the Practice, as well as the Praiſe, of Poſterity, it is the utmoſt Extent of his Wiſh, and it is the only Way he knows to be uſeful to Mankind and his Country.

SECTION XV.

The Hiſtory of the Diſcovery and Conqueſt of the Empire of Peru *by* FRANCIS PIZARRO, *together with the Diſcovery of* Chili, *and the Conqueſt of that Country alſo.*

1. *An Account of the firſt Notice which the* Spaniards *had of* Peru, *and of the Copartnerſhip of* Pizarro, Almagro, *and* Luquez, *for the Conqueſt of that Country.* 2. *The Terms upon which that Agreement was made, and the Shares of the reſpective Parties.* 3. Francis Pizarro *undertakes the Diſcovery with the Aſſiſtance of* Almagro, *and meets with many Hardſhips.* 4. *They reſolve to proſecute their Deſigns, notwithſtanding theſe Diſcouragements.* 5. *They proceed to the Port of* Tumbez. *and the Riches of this Country engages them to ſend* Pizarro *into* Spain, *for which Purpoſe they return to* Panama. 6. *The Voyage of* Francis Pizarro *to* Europe, *his Commiſſion from the Emperor, and Return to* America. 7. *The Difficulties he found in reſuming the Diſcovery, and what followed on his ſailing for the Coaſt of* Peru. 8. *His ſurprizing Succeſs, which ſpread the Terror of the* Spaniſh *Arms throughout all that Empire.* 9. *The State of the* Incas *of* Peru *at this Time, and the Hiſtory of the Brothers* Hueſcar *and* Atahuallpa. 10. *This Subject continued, to the Time of their Application to* Pizarro. 11. *The Interview between* Atahuallpa *and the* Spaniſh *Embaſſadors.* 12. Atahuallpa *goes to viſit* Pizarro *in Perſon, and the Conſequences of that Viſit.* 13. *The* Spaniards *ſeize on the Perſon of* Atahuallpa, *and demand a moſt extravagant Ranſom.* 14. *While a Priſoner, he plots and executes the Murder of his Brother* Hueſcar. 15. *A Conſpiracy charg'd upon* Atahuallpa, *for which he is barbarouſly and unjuſtly put to death.* 16. *The Confuſions into which the Empire of* Peru *fell for want of a Chief.* 17. *Diſcords and Diviſions among the* Spaniards. 18. *The noble Diſpoſitions of* Mango Inca, *with other Particulars.* 19. *The Diſcovery of* Chili *by* Diego de Almagro, *and the Return of* Ferdinand Pizarro *from* Spain. 20. *A civil War breaks out between the Marquis* Francis Pizarro *and his Collegue* Almagro, *in which the latter is at firſt ſucceſsful.* 21. *The Marquis* Francis Pizarro *obtains a ſignal Victory, and thereupon puts his old Collegue* Almagro *to death, which is followed by new Troubles.* 22. *A Baſtard Son of* Almagro *ſets up for himſelf, and cauſes the Marquis* Pizarro *to be aſſaſſinated.* 23. Vaca de Caſtro *is ſent by the Emperor* Charles V. *into* Peru, *who defeats the young* Almagro, *and puts him to death.* 24. *The Wiſdom and Firmneſs of this new Governor extinguiſhes all the Troubles in this Province.* 25. *A ſuccinct Account of the ſubſequent Diſcoveries of the* Spaniards *in* America. 26. *This Subject continued and concluded.* 27. *Obſervations and Remarks upon this Section, and upon the State of the* Spaniſh *Empire in the* Weſt-Indies.

1. THE Deſigns formed by Men of ſuperior Abilities do not periſh with them; for Envy, being ſatisfied when they are no more, cheriſhes their Memory, and preſerves their Schemes, in order to depreſs and keep under ſucceeding Pretenders to Merit. This was the Caſe of *Vaſquez Nunez de Balbao*, who firſt formed the Project of extending the naval Power of *Spain* on the *South Seas*, and at the ſame time enlarging her Conqueſts by Land into the Empire of *Peru*, of which he had procured ſome tolerable Accounts before he died. It was the Deſire that *Pedrarias* had of wrenching this Project out of the Hands of its Author, that put him upon treating *Balboa* as he did; but, as we have ſhewn before, all his Expeditions failed, and ſo did thoſe of ſeveral Perſons, to whom he granted Licences, for proſecuting their Diſcoveries. At laſt, in the Year 1524, three Gentlemen, all Inhabitants of the new City of *Panama*, rich, far in Years, and of great Reputation, offered to venture upon this Undertaking at their own Riſque and Expence, provided they might be allowed fair and reaſonable Terms; ſuggeſting, at the ſame Time, that it was more honourable for the Governor to grant them ſuch Conditions, than to look for new Adventurers, out of the Bounds of his own Juriſdiction. *Pedrarias* liſtened very readily to this Propoſal, nor did he at all ſcruple granting them as eaſy Terms as they could deſire, believing that he ran no Hazard in ſo doing, ſince, if they miſcarried, as every body thought they would, he was to loſe nothing; and, on the other hand, if they ſucceeded, he flattered himſelf that he ſhould always have Force ſufficient to maintain his Authority, and ſecure to himſelf the Fruits of their Enterprize.

In order to conceive rightly on this Affair, it will be requiſite to give ſome Account of theſe Undertakers. The firſt of them was *Francis Pizarro*, whom we have mentioned more than once before: He was a Native of the Town of *Truxillo*; and moſt of the *Spaniſh* Writers agree, that he was a Man of Quality. But how noble ſoever he might be by Birth, moſt certain it is, that he quitted his Country, and went into the *Weſt-Indies*, in order to repair his broken Fortune. He ſerved firſt in the Wars of *Hiſpaniola* and *Cuba*, and failed afterwards with *Hojeda* to the Gulph of *Darien*, and was left by him as his Lieutenant, in the Colony which he ſettled there. He ſerved afterwards under *Vaſquez Nunez de Balboa*, and in the Courſe of ſeveral Years, that he bore Command in theſe Parts, he had juſtly gained the Character of a bold, enterprizing, and experienced Officer: He had likewiſe attained to a very conſiderable Fortune; and on the firſt building of *Panama*, ſettled there, and ſeemed diſpoſed to have paſſed the Remainder of his Days in quiet. The ſecond of theſe Adventurers was *Diego de Almagro*, who took his Name from the Town in which he was born in *Spain*, and thereby did it honour; for as to his Family, it was ſo obſcure, that even the Glory of his Exploits could not afford Hiſtorians Light enough to find out who was his Father; but he was a Man of Genius and Experience, and, at the Time he entered upon this Affair, of Fortune likewiſe. The third was a Prieſt, one *Ferdinand de Luques*, or, as ſome Writers call him, *Lugne*, a Man likewiſe in Years, of great Parts, and a much larger Fortune than either of the former; for he was Proprietor of the Iſland of *Tabago* in the Bay of *Panama*, had a good Eſtate beſides, and a very large Sum in ready Money. This Partnerſhip made a great Noiſe, as it was indeed a very ſingular thing in its kind, for three private Men to undertake raiſing a joint Stock, for conquering a great Empire; and, like other Projects above the Reach of common Minds, it was treated as a wild and viſionary Scheme, which would certainly end in the Ruin of the Projectors.

2. Theſe three great Men did not however give themſelves much Pain about what other People ſaid; in which they ſhewed themſelves wiſe and firm. The Manner in which they ſealed and ratified their Agreement, was no leſs ſingular than the Agreement itſelf; for they repaired ſolemnly to high Maſs, which was celebrated by the Prieſt *Ferdinand de Luques*, who having broke the Wafer into three Pieces, took the firſt himſelf, and gave the others to his Companions, in token that they ſhould purſue this Deſign with the ſame Zeal and Steadineſs, as they did that of their Salvation. It is now proper to ſee what the Nature was of this Agreement;

of which the beſt Authurs report, that they entered into Articles never to abandon each other, for any Hazards or Diſappointments they might meet with in the Enterprize, till they had made a Conqueſt of *Peru*, and ſolemnly took their Oaths in public, for the Confirmation of theſe Articles; each of them being aſſigned a particular Part, in conducting and executing the Scheme: *Francis Pizarro* was to command the firſt Party that went upon the Diſcovery; *Almagro* was to carry him Recruits, and reinforce him from Time to Time; and *Ferdinand de Lugne* was to remain at *Panama*, and lay in Ammunition and Proviſions to ſupport the Enterprize; and whatever Gold, Silver, precious Stones, or other Effects ſhould be acquired, after the Charges, and the Emperor's Fifths, paid, were to be divided equally amongſt them.

They took care to make the beſt Enquiries they could into the Cauſes of the Miſcarriages which had formerly happened, that they might the better avoid them; they were likewiſe very aſſiduous in finding out Perſons who had been employed in former Undertakings, that they might have the Benefit of their Experience; and they bought for the Service of this Expedition a fine new Ship, that had been built by the Direction of *Vaſquez Nunez de Balboa*, and which was juſt finiſhed as he died. Their Pilot was *Francis Penate*; *Nicholas de Ribera* was Treaſurer; *John Carillo* had the Charge of keeping an Account of the King's Fifths; and one *Salzedo* was next in Command under *Pizarro*. The whole Number of Men employed were no more than one hundred and fourteen; and, excluſive of Officers, they had but fourſcore, the moſt inconſiderable Body ſurely that ever had the Boldneſs to undertake ſuch an Enterprize.

3. About the Middle of the Month of *November*, 1524, all Things being ready, *Pizarro* embarked, and proceeded to the Iſland of *Tabago*, diſtant from *Panama* about five Leagues, from whence he ſailed to the *Pearl Iſlands*, in the Middle of that Bay, where he took in Wood, Water, and Hay for his Horſes, and ſailed to Port *Pinas*, or *Prineaple*, upon the Continent, on the South Side of the Bay of *Panama*. Here *Pizarro* went on Shore with his Soldiers, and endeavoured to penetrate into the Country; but meeting with nothing but Bogs or Mountains, over-run with Wood and Deluges of Rain, as they approached the Equator; and the People having fled from their Habitations, ſo that no Proviſions were to be had, *Pizarro* ran farther down the Coaſt to the Southward, and then landing again, found the Country no better; and loſt a great many of his Men by Sickneſs, want of Proviſions, or the Hardſhips they ſuffered in their Marches and Counter-Marches. Whereupon he ſent the Ship to the *Iſle of Pearls* for Proviſions; and, in the mean time, was followed by *Almagro*, with two other Ships, and a Recruit of ſixty Men and upwards. Theſe two Captains meeting upon this wretched rainy and unwholſome Coaſt, and landing their united Forces, had ſome Skirmiſhes with the Natives, in which *Almagro* loſt an Eye; but happening, in ſome of their Excurſions, to meet with a Parcel of Gold, of the Value of fourteen or fifteen thouſand Crowns, they reſolved, notwithſtanding all the Difficulties and Hazards they underwent, to proceed in the Enterprize, in which they were the more encouraged by the Pilot *de Ruyz*, who (while *Pizarro* marched with the Soldiers on Shore) ran down as far as *Cape Paſſaro*, under the Equator; and taking ſome Priſoners, was aſſured by them, that the Treaſures of *Peru* were much beyond any thing that had hitherto been reported of them, whereupon he returned to *Pizarro* with the agreeable News. In the mean time, that General ſuffered incredible Hardſhips in the Abſence of *Almagro*, who was gone to *Panama* with the Gold they had got, to procure another Reinforcement of Troops and Proviſions, without which it was very evident that nothing could be done.

4. At the Time of his returning to *Panama*, *Almagro* found *Pedrarias* removed from his Government, and ſucceeded by *Peter los Rios*, who permitted him to raiſe what Men he could to reinforce *Pizarro*; whereupon he embarked again with forty Soldiers more, ſome Horſes and Arms, Cloaths, Shoes, Proviſions, and Medicines, and returned to *Pizarro*, whom he found in a very miſerable Condition, great Part of his Men being ſick or dead: They removed therefore from that unhealthy Part of the Continent, and put their Men on Shore in the Iſland of *Gallo*; here they remained fifteen Days, and then returned towards the Continent again, running along the Coaſt further to the Southward; however, they ſtill met with ſuch a drowned Country, and bad Weather, that it was once propoſed to return back to *Panama*. Even *Pizarro*'s Heart failed him, and the two Commanders, it ſeems, were upon the Point of drawing their Swords, ſo hot was the Conteſt for and againſt the proceeding in the Enterprize; but at length it was agreed, that they ſhould go to the Iſland of *Gallo* again, where *Pizarro* ſhould remain with the Men till *Almagro* went to *Panama* for Recruits; and great Care was taken that none of the Men ſhould write home, and diſcover their wretched Condition; for moſt of them had ſhewn an Inclination to deſert the Service whenever they ſhould have an Opportunity, and threatened to apply to the Governor of *Panama* to be recalled from an Expedition which had conſumed ſuch Numbers of them, and, if proſecuted, would probably deſtroy the reſt; and, notwithſtanding all the Care their Commanders took, one of them found means to ſend a Paper ſubſcribed by moſt of them, deſiring to be recalled, which was encloſed in a Bottom of Cotton Yarn, and thereby concealed from the Knowledge of their Officers.

This Paper coming to the Hands of the Governor of *Panama*, he was ſo far from ſuffering *Almagro* to levy any more Recruits, that he ſent a Ship with a Commiſſary on board to the Iſland of *Gallo*, on purpoſe to bring back all the Men that ſurvived: The Commiſſary arriving, *Pizarro* begged of him that he would, however, ſuffer as many of them to ſtay with him, as were willing to remain in the Enterprize; which the Commiſſary conſenting to, *Pizarro* drew a Line with the Point of his Sword, and haranguing his Men, told them, they were at liberty to return to *Panama* if they thought fit; but it grieved him, that they ſhould now abandon the Enterprize, when they were upon the Point of reaping the Reward of all their Sufferings: As for his Part, he would periſh in the glorious Undertaking, rather than deſert it; and thoſe that voluntarily remained with him, ſhould ſhare with him the Treaſures of which they had ſo near a Proſpect, deſiring thoſe that were willing to proceed in the Enterprize, to come over the Line he had drawn. But ſuch were the Sufferings of theſe poor Wretches, that much the greateſt Part of them forſook him; only thirteen Men and a Mulatto came over the Line he had drawn, the reſt embarked, and returned to *Panama* with the Commiſſary.

5. The Affairs of *Pizarro* never ſeemed in a worſe Situation than at this Time; for he was not only deprived of all Hopes of performing any thing remarkable for the preſent, but had alſo a very indifferent Proſpect for the future. In this Diſtreſs, he removed to the Iſland of *Gorgona*, in order to ſupply himſelf with freſh Water: There he remained till he was joined by *Almagro* and his Pilot, with ſome few Recruits, which they, with ſome Difficulty, had prevailed upon to enter into this Expedition. With theſe Men they embarked, and ſailed ſtill along the Coaſt, till they had paſſed the Equator, and found themſelves in the Latitude of 30° South; having ſpent about two Years in making a Voyage, which may very well be performed, now the Currents, Trade-Winds, and their Seaſons, are known, in as many Weeks. In this Paſſage, however, they took ſeveral *Indian* Floats, with Cargoes of conſiderable Value; and gained ſuch Intelligence of the Situation of Things upon the Coaſt, that *Pizarro* reſolved to ſend one *Peter de Candia*, ſo called, becauſe he was born in that Iſland, to *Tumbez*, in order to learn whether the Informations they had hitherto received might be depended upon or not; which was a very well contrived Expedient.

This Man had a great deal of good Senſe, a very fair Character, and was ſo expert in his Conduct, that he found Ways and Means to render himſelf ſo agreeable to the *Indians*, that he executed his Commiſſion as effectually as could be deſired, and returned ſafely to *Pizarro*, with a full Account of all that he had ſeen. By which it plainly appeared, that the Riches of this Country very far exceeded even the Reports they had received concerning them. For he declared, that he had ſeen their public Edifices erected with wonderful Art and Skill, and ſo exceſſively rich, that the very Walls of them were covered with Gold and Silver, with many other Things of the like Nature.

After hearing this Man's Relation, they held a kind of Council amongſt themſelves upon the preſent State of their Affairs, and unanimouſly agreed, that the wiſeſt Courſe they could take would be to return all together to *Panama*, where they made no Queſtion that the News of ſuch important Diſcoveries would effectually reſtore their Affairs, and procure them ſuch Supplies, as would enable them to proſecute their Deſign with all the Succeſs imaginable. This Reſolution once taken, they proceeded to put it into Execution; being thoroughly ſatisfied that in the Situation they were in, they could undertake nothing; and that by remaining upon this Coaſt, they ſhould loſe all their Men by degrees, and thereby bring an irretrievable Diſgrace upon the Project, which would not only ruin themſelves, but diſcourage all future Attempts of this Nature.

6. Upon the Return of *Francis Pizarro* to *Panama*, with many indubitable Proofs of his Diſcoveries, it occaſioned a vaſt Stir in that Colony; for thoſe who had before derided this Project as abſurd and impracticable were now convinced of their Error, and that it was likely to prove a much more conſiderable Diſcovery than any hitherto made by the *Spaniards*; yet the Oppoſition made by the new Governor to his levying Men for the carrying on his Deſign, and ſome other Accidents, made it evident, that it would be impoſſible for him or his Aſſociates to proceed farther, without the Aſſiſtance of a ſuperior Authority. It was therefore agreed by them all that *Pizarro* ſhould go in Perſon to *Spain*, in order to obtain the neceſſary Powers from the Crown, for removing all thoſe Difficulties; and it was likewiſe agreed, that he ſhould ſolicit for himſelf the Title of Governor; for *Almagro* that of Adelantado, or the King's Lieutenant; and for *Lugne*, the Protectorſhip of the *Peruvians*, and the firſt Biſhopric of that Country. *Pizarro* accordingly ſet ſail, and, arriving in *Spain*, proceeded to the Court of the Emperor *Charles* V. which was then at *Toledo*; here he met with a very gracious Reception, on his preſenting his Imperial Majeſty with ſome *Peruvians* in their proper Habits, two or three *Peruvian* Sheep, and ſeveral Gold and Silver Veſſels and Utenſils of the Faſhion of the Country.

The Emperor was pleaſed to hear him relate the Difficulties he had met with in theſe three Years Voyage; and in the End referred the Overtures he made to the Council of the *Indies*; who having framed their Report, *Pizarro* was ordered to proceed in the Conqueſt of *Peru* for the Space of two hundred Leagues to the Southward of *Tumbez*, which lies at the Bottom of the Bay of *Guiaquil*: He procured alſo the Title of Governor and Captain-General to be conferred on him for Life, with the Offices of Adelantado, or Lord-Lieutenant; and of Alguazil-Major; he was alſo empowered to erect four Caſtles in *Peru*, where he thought proper, and retain the Government and Inheritance of them to him and his Poſterity. He obtained for *Ferdinando de Lugne*, that he ſhould be recommended to the Pope to be made Biſhop of *Tumbez*; and, in the mean Time, conſtituted Protector-General of the *Peruvians*. *Almagro* was conſtituted Governor of *Tumbez*, and a twentieth Part of all the Profits and Revenues of the Country, when conquered, were to go to *Pizarro* and *Almagro*; two Thirds thereof to the former, and one third to the latter; *Almagro* was made a Gentleman, and his Baſtard Son legitimate: The thirteen Men that remained with *Pizarro* in his Diſtreſs on the Iſland of *Gallo* were made Gentlemen, if they were not ſo before; and thoſe that were Gentlemen then were ordered to be knighted.

Theſe Commiſſions and Powers were executed at *Toledo* on the 26th of *July* 1528, and ſix Dominican Friars were ordered to go over with *Pizarro* as Miſſionaries, to aſſiſt in the Converſion of the *Peruvians*; and thus this great Affair was finiſhed much to the Satisfaction of our Adventurer, who found himſelf veſted with a legal Authority to purſue his Conqueſts, which was all he wanted, and no leſs to the Satisfaction of the Court, which gained thereby a Proſpect of annexing another Empire to their Dominions in *America*, without being at any Expence. It may not be amiſs to remark here that the *Spaniards* had a Felicity in making their Conqueſts, which never attended any other Nation; ſince neither *Columbus*, *Cortes*, *Balboa*, or *Pizarro*, who brought ſo many Millions of Piſtoles into the royal Coffers, ever received ſo much as a Marvedy from thence towards the Charge of their reſpective Expeditions.

7. When *Francis Pizarro* had received his Commiſſions of the Tenor before-mentioned, he repaired to his native Town of *Truxillo* in *Eſtramadura*, in order to raiſe Forces, and to viſit his Family, of which it may not be amiſs to ſay ſomething farther in this Place. His Father *Gonzalo Pizarro*, ſirnamed *The Long*, becauſe he was very tall, was a Man of Family, and had ſerved as a Captain of Foot; he married a Woman of Family likewiſe, by whom he had two Sons, *John* and *Ferdinand*, but as for *Francis* he was illegitimate, and the Son of a Country Girl, who was afterwards married to an honeſt Farmer, by whom ſhe had *Francis Martin de Alcantara*. Old *Gonzalo Pizarro* had alſo another natural Son, of his own Name; and the whole Family being well beloved in their Neighbourhood, they made great Diſpatch in providing all that the new Governor wanted, which having effected, he embarked at *Seville*, with his four Brothers, *viz.* *Ferdinand*, *John*, *Gonzalo*, and *Francis*, in the Month of *January* 1530, and arrived at *Nombre de Dios* on the Coaſt of *Terra Firma*, from whence he marched with his People to the City of *Panama*.

But his ingroſſing all the Honours Commands to himſelf, ſo diſguſted *Almagro*, that e refuſed to aſſiſt in the intended Expedition, 'till *Piza o* promiſed to relinquiſh the Title of Adelantado, and to give him an equal Share in whatever they ſhould acquire; and upon theſe Conceſſions, *Almagro* promiſed to aſſiſt him as formerly, and ſmothered his Reſentment for the preſent, that the Service might not ſuffer; but they were never thoroughly reconciled, as will appear hereafter. At length *Pizarro* embarked at *Panama* in three Ships, taking with him one hundred and eighty-five Soldiers, thirty-ſeven Horſes, and ſuch a Quantity of Arms, Ammunition, and Stores, as might enable him to fix Colonies on the *Peruvian* Coaſt; but meeting with the like contrary Winds as he had done in the firſt Voyage, and finding it very inconvenient, and indeed impracticable to keep his Horſes longer on board, he was obliged to land above an hundred Leagues to the Northward of *Tumbez*; and now, thinking himſelf ſtrong enough to drive the naked *Indians* before him, he fell upon them, plundered their Towns, and made many of them Priſoners without any manner of Provocation, whereupon the reſt fled from the Sea Coaſts up into the Country; and *Pizarro* was afterwards ſo diſtreſſed for Proviſions, and loſt ſo many Men by Sickneſs and Hardſhips, and the fatiguing Marches through Bogs and Thickets of *Mangroves* in this extraordinary hot Climate, that his Forces were exceedingly diminiſhed; and he now too late perceived his Error, in not courting the Natives, being in no Condition to make a Conqueſt of *Peru* with the Forces he had left.

He took therefore moſt of the Treaſure he had plundered the *Indians* of, and ſent his Ships back with it to *Panama*, to raiſe more Recruits; inviting, at the ſame Time, ſome Adventurers from *Nicaragua*, and other Parts of *North America*, to come and join him, promiſing them a Share of the vaſt Treaſures he was now aſſured of finding in *Peru*; which had a very good Effect, and procured him ſoon after a very conſiderable Reinforcement. In this Expedition he had already gained ſo much that he was able to ſend thirty thouſand Pezoes in Gold to *Panama*, beſides a conſiderable Quantity of fine Emeralds; and might have ſent many more, if it had not been for the Folly of ſome of his People, who took it into their Heads that theſe precious Stones were as hard as Diamonds, or at leaſt ought to be ſo, ſo that in trying them with Hammers they broke abundance of them in Pieces.

8. *Francis Pizarro* reſolved to continue in Action till his Recruits arrived; and, having in ſome meaſure informed himſelf of the State of the Country, he judged it very poſſible to make ſome Advantage of the Diſputes that reigned at this time, between the Inhabitants of *Tumbez* and thoſe of the Iſland of *Puna*. He endeavoured to gain the good Will firſt of the Iſlanders; but finding them to be a very falſe and perfidious People, he attacked and routed them, which he hoped would have opened a Means of contracting a cloſe Alliance with the *Tumbezenes*; becauſe he found ſix hundred of them, together with one of the moſt conſiderable Perſons of the City, Priſoners amongſt theſe People, whom he ſet at Liberty, and ſent home, together with three of his own People; who, if the *Spaniſh* Writers are to be believed, this barbarous Nation ſacrificed to their Idols, which however was not known immediately to *Pizarro*, who continued to reckon the *Tumbezenes* as his Allies, upon whoſe Aſſiſtance he might depend at all Times.

In the mean time *Almagro* having ſent *Pizarro* a conſiderable Reinforcement from *Panama*, and *Ferdinand de Soto*, and other Adventurers, arriving with their Troops from *Nicaragua*; he thought himſelf in a Condition to carry on the War upon the Continent, eſpecially as he had ſome Reaſon to expect to be ſupported by the *Tumbezenes*: Accordingly, having provided a ſufficient Number of Floats or Barklogs, he tranſported his Troops to *Tumbez*, in which he loſt ſome Men on going a-ſhore by the Roughneſs of the Sea, which runs very high on that Coaſt; and ſome of his People were attacked and cut off by the Natives, which was a Surprize to him as he took them to be his Friends. The *Spaniſh* Writers give various Reaſons for this Alteration in the Conduct of the Natives of *Tumbez*; who, but a very little before profeſſed themſelves their very good Allies and Confederates. Some relate, that, obſerving the *Spaniards* had enſlaved the Natives of the Iſland of *Puna*, and perfectly ſubverted their Religion and Government, demoliſhed their Temples, and every thing they held ſacred, they expected to be treated in the ſame Manner by the *Spaniards*, and therefore thought fit to oppoſe their landing in their Country.

Others inform us, that while the *Spaniards* were engaged in the Reduction of *Puna*, a very great Alteration in the Face of Affairs happened upon the Continent. *Atabuallpa* had defeated the Forces of his Brother *Hueſcar* the Emperor; cut in Pieces moſt of the Inhabitants of *Tumbez* and the neighbouring Provinces for adhering to him; and the Troops that oppoſed *Pizarro*'s landing in *Tumbez*, were thoſe detached by *Atabuallpa* to that Province, on purpoſe to repel the Invaſion of the *Spaniards*. But whatever was the Reaſon of the *Peruvians* oppoſing the Deſcent of theſe Strangers, it is evident that they were put in ſuch Confuſion by the *Spaniſh* Horſe and Artillery, that they fled as the *Spaniards* advanced; and, after the Slaughter of ſome thouſands of them, were forced to abandon the Town and Caſtle, and even the whole Valley of *Tumbez*; leaving behind them all the Gold and Silver Plate, Emeralds, Pearls, and other rich Spoils which lay heaped up in the Temple of the Sun, and the Inca's Palace, being ſo vaſt a Treaſure, that the *Spaniards* could ſcarce believe their Eyes, when they found themſelves ſo ſuddenly poſſeſſed of it; and ſuch was the Conſternation of *Atabuallpa* and his whole Court, when the Fugitives related what Slaughter the Thunderer's Ordnance had made among them, and how impoſſible it was to eſcape the *Spaniſh* Horſes, to which Animals their Fears had added Wings; that they concluded, if the *Spaniards* were not Gods, as they at firſt conjectured, they were certainly Devils, and that it was not poſſible for any human Force to defend their Country againſt them; of which *Pizarro* receiving Intelligence, reſolved to take Advantage of the Terror they were in, and march immediately to find out *Atabuallpa*, while he remained under that Deluſion.

But he found it neceſſary to defer his March, till he had erected a ſlight Fortreſs upon the Sea Coaſt (to which he gave the Name of *St. Michael*) for receiving the Recruits that he expected, and to ſerve him for a Place of Retreat and Security, in caſe any unforeſeen Accident ſhould happen. This was the firſt *Spaniſh* Colony planted in *Peru*, and here the firſt Church was erected, in the Year 1531, and *F. Reginald de Pedraga* was conſtituted Protector of the *Indians*, *Ferdinand de Lugne* being unable to execute that Employment, on Account of his Indiſpoſition. This Meaſure was certainly the wiſeſt that he could take; for he not only wanted ſuch a Settlement for the Reception of his Recruits, but ſhewed likewiſe his Judgment in the Choice he made, ſince there was no Place ſo proper for his Purpoſe upon the whole Coaſt.

He took another Step that was equally judicious; he divided all the Gold and Silver in his Poſſeſſion fairly amongſt the Soldiers; and to ſuch as were to remain in the Colony, he delivered their Shares without Abatement, that they might have wherewithal to ſubſiſt, and to carry on their Trades; but for ſuch as continued to march with him, he gave them only Acknowledgments of his having ſo much in his Hands, with a Promiſe to pay it when they came to *Panama*. By this Eſtabliſhment, he ſhewed plainly his Intention to remain in the Country, which it was evident he could not do but by Force; and therefore the very News of his erecting a Town, fortifying that Town, and compelling the *Indians* who lived near it, to obey not him only, but the meaneſt of his *Spaniards*, as Lord, ſoon filled the whole Empire with the Noiſe of this Enterprize, and engaged the two Brothers, who were contending for the Empire, to turn their Eyes upon thoſe who might very ſoon have that Empire to give, ſince the Terror of their Arms was already ſpread among Nations of whom the *Spaniards* had not the leaſt Knowledge.

9. As the Differences between theſe two Brothers proved their Ruin, and the chief Cauſe that this great Empire fell into the Hands of the *Spaniards*, it is abſolutely neceſſary that we ſhould give ſome Account of them, in order to render this Hiſtory perfectly intelligible; and this ſhall be done in as few Words as the Subject will admit. *Huana Capac*, or as ſome of the *Spaniſh* Writers call him, *Guana Cava*, was the Sovereign of *Cuzco*, and had annexed to his Empire many Provinces, ſo that his Dominions were five hundred Leagues in Extent from his capital City. The Country of *Quito*, which was ſtill governed by its natural Princes, grew next the Object of his Ambition; he reſolved to make himſelf Maſter of it, which, conſidering the Superiority of his Force, was no hard Matter for him to do: He did it accordingly, and, having viſited it as a new Conqueſt, he was ſo much charmed therewith, that he reſolved to make it the Place of his Reſidence; and accordingly, leaving his eldeſt Son *Hueſcar*, *Mango Inca*, and other Children at *Cuzco*, under proper Guardians, he transferred the imperial Reſidence to *Quito*, where he married the Daughter of the deceaſed Prince, and thereby gained a legal Title to a Country, the Poſſeſſion of which he had acquired by Force. In Proceſs of Time, however, finding that great Inconveniencies enſued from his quitting his ancient Reſidence, he returned thither for a Time, and left his Son *Atabuallpa*, whom he had by the Princeſs of *Quito*, and for whom he had the greateſt Tenderneſs, under the Care of the moſt eminent Perſons in that Principality, and whither he propoſed ſhortly after to return, as he did, and then to ſettle the Affairs of that Principality, and paſs the Remainder of his Days at *Cuzco*; but Providence otherwiſe diſpoſed of him, and he died at *Quito*, having left the beſt Part of his Treaſures, and the old imperial Army, at *Cuzco*; declaring by his Will, that as *Quito* never made a Part of the Empire of the Incas, there was no Reaſon that it ſhould deſcend, together with the Empire, to his legal Succeſſor, and therefore he beſtowed it upon his youngeſt Son *Atabuallpa*, whom the *Spaniſh* Writers generally call *Atabaliba*, who was, indeed the Heir of it by his Mother.

After his Death, the young Prince ſecured the Army and the Treaſures of his Father, and then ſent an Embaſſy to *Hueſcar*, to ſignify the Nature of his Father's Will,

to

3

to render Homage to him in his Name, and to deſire from him the Confirmation of the Kingdom of *Quito*, which he was willing to hold from the Incas. *Hueſcar* was by no means pleaſed with this Embaſſy, and therefore ſent his Brother Word that he ſhould ſuffer the Troops to return to their Duty; that he ſhould quit the Sovereignty of *Quito*, which being a frontier Province of his Empire, he could by no means leave in his Hands; and, that after doing this, if he repaired to *Cuzco*, he would give him a Share in his Father's Treaſures, and aſſign him Lands for his Subſiſtance. He added, that in caſe he did not accept theſe Propoſals, he would certainly make War upon him, and recover the Poſſeſſion of *Quito* by the ſame Method his Father acquired his firſt right to it. Upon receiving ſo unkind a Meſſage from his elder Brother, *Atahuallpa* called the principal Perſons his Father had intruſted with his Education, to Council; who adviſed him, ſince Peace could no longer be preſerved, to take the Field firſt; ſince that was a Meaſure by which he might gain much, and could loſe nothing at all.

10. *Atahuallpa*, or *Atabaliba*, embraced this Propoſal, as indeed it was the wiſeſt that could be offered, and the moſt ſuitable to his Circumſtances; and with the Army his Father had left, immediately entered the Dominions of his Brother. *Hueſcar*, on his Part, brought a more numerous Army into the Field, and it was not long before a general Engagement enſued, which laſted for three Days, and was as bloody as it was obſtinate. It ended however in the the Defeat, and which was ſtill worſe, in the Impriſonment of *Atahuallpa*, who was taken upon the Bridge of the River *Tumibamba*, and ſhut up in a Palace which bore the ſame Name. But obſerving that the Soldiers, elevated with their late Victory, were entirely given to Feaſts and Sports, he took his Opportunity; and, having provided himſelf with the neceſſary Inſtruments, pierced a Hole through one of his Apartments, and thereby made his Eſcape. He returned to his own Subjects, whom he found broken and diſpirited by their laſt Defeat; but he revived their Courage in an Inſtant, by aſſuring them, that his Father had appeared to him in his Priſon, changed him into a Serpent, and thereby gave him an Opportunity of ſliding through the Wall. What to a ſenſible People would be ridiculous, is to a ſuperſtitious and credulous Multitude, a Miracle. The News was ſpread throughout the whole Principality; the People in general quitted their Habitations to take up Arms in his Service, and he had, in a very ſhort Space of Time, a much greater Body of Troops than before. He defeated with theſe, two or three Armies that oppoſed him; took, and levelled with the Ground, the Place where he had been impriſoned; and having by his Victory vaſtly augmented his Conqueſts, he drew from the Provinces he ſubdued prodigious Numbers of Troops. When he arrived at *Tumbez*, he purpoſed to have made himſelf Maſter of the Iſland of *Puna*, in which however he failed. This did not at all diſcourage him; but leaving that War to be renewed at ſome happier Juncture, he marched with all his Forces to give *Hueſcar* battle, who, he was informed, was coming againſt him with a prodigious Army.

When *Atahuallpa* was come to *Caxamalca*, he ſent two of his beſt Officers with three or four thouſand light-armed Troops, to reconnoitre his Brother's Army; theſe drawing very near to the Camp of *Hueſcar*, found it neceſſary to quit the high Road, to prevent being diſcovered. It happened very unluckily for *Hueſcar*, that, to march more at his leiſure, and without being diſturbed by the Noiſe of the Army, he had taken the ſame Bye-road with about ſeven hundred of his principal Officers, and who formed at once his Court and his Guard. The Officers of *Atahuallpa* knew the Imperial Standard, and ſoon ſaw how Matters ſtood: They laid hold therefore of this Opportunity of making a ſhort End of the War, and attacked *Hueſcar* and thoſe about him with ſo much Fury, that after a ſhort Diſpute the Inca was made Priſoner. The Victors were ſoon in as much Danger as the Vanquiſhed, for the Army of *Hueſcar* being informed of what had happened, ſurrounded this Handful of Men, and threatened to cut them to Pieces immediately. In this Diſtreſs they were obliged to have Recourſe to a very natural Expedient; they told *Hueſcar*, that if he did not order his Troops to retire, they muſt be obliged to ſecure themſelves from Shame at leaſt, if not from Death, by cutting off his Head, and then fighting it out to the laſt Man. The Officer who delivered this Meſſage, obſerving that it had a great Effect on the Mind of *Hueſcar*, added, That as it was a neceſſary, ſo he would find it both a juſt and profitable, Meaſure; for that as his Brother pretended to nothing more than his own little Sovereignty of *Quito*, ſo if he could reſolve to gratify him in that Particular, there was no doubt of his reſtoring him to Liberty, and even acknowledging him as his Sovereign; but that he muſt reſolve ſpeedily, ſince there was not a Moment's Time to be ſpared. *Hueſcar*, finding himſelf in this Diſtreſs, and ſeeing no other way to eſcape, ſubmitted to the Terms preſcribed, and, making a Signal to his Forces to forbear charging, directed the principal Officers to come to him, and ordered them to march with the Army back to *Cuzco*. They implicitly obeyed the Commands of their Sovereign. And this was the Situation things were in, when both the Brothers had recourſe to *Francis Pizarro*, and claimed his Aſſiſtance.

It is evident enough from what has been already ſaid, that ſcarce any People could be more ſuperſtitious than the Inhabitants of *Peru*, and certain it is, that the Fables upon which their Religion was founded, proved of greater Conſequence than any other thing to *Pizarro* and his Aſſociates, who otherwiſe would never have reduced them. One Inſtance of this ſhall ſuffice, and indeed that is ſo extraordinary that there is no need of adding another: They were thoroughly perſuaded that their Incas deſcended from the Sun, and they very ſoon came to believe that the *Spaniards* were the Children of the Sun likewiſe, in which the Story I am going to tell fully confirmed them. The eldeſt Son of the Inca *Yahuarhuacac* beheld in antient Times, as their Tradition taught them, a very ſtrange Phantom, different in Aſpect and Dreſs in the higheſt Degree from the *Peruvians*; for whereas they have no Beard, and the Cloaths they wear come no lower than their Knees, this Spirit, who called himſelf *Virachoca*, had a long Beard, and his Robe reached down to his Feet; and he likewiſe led in his Hand an Animal abſolutely unknown to the young Prince. This Fable, univerſally ſpread, and generally received, operated ſo ſtrongly upon the Minds of the People, that they no ſooner ſaw a *Spaniard* with a long Beard, his Legs covered, and his Horſe in his Hand, than they cried out: *Look, look, there is the Inca* Virachoca, *the Son of the Sun.*

11. It was immediately after the ſettling of the new Colony by the *Spaniards*, that the Embaſſadors from *Atahuallpa* arrived, and ſignified to *Francis Pizarro*, the great Deſire their Maſter had to cultivate a good Correſpondence with him; upon which he immediately took a Reſolution to advance towards *Caxamalca*, where he underſtood the Inca was, in order to viſit him. It ſo fell out, that the Rout between theſe two Places lay through a burning Deſart of about twenty Leagues over; in paſſing through which the *Spaniſh* Soldiers ſuffered exceſſively; but however, when they came to *Motapa* they met with rich Vallies, and a plentiful Country; wherein they refreſhed themſelves, and then continued their Journey. They met ſoon after with certain Embaſſadors, that had been diſpatched by *Atahuallpa* to compliment *Pizarro*, who preſented him, on the Part of the Inca, with a Pair of Gold Buſkins very finely wrought, and Bracelets of the ſame Metal ſet with Emeralds; which they deſired him to put on when he had Audience of the Emperor, that by the Sight of his own Preſents he might know him. The Chief of this Embaſſy was himſelf of the Race of the Incas, and ſhewed much Ceremony and Politeneſs in his Behaviour. He brought, beſides theſe Preſents for the General, Proviſions and Gifts for the Army, the former in great plenty, and very acceptable; the latter rich, and therefore no leſs ſatisfactory; which raiſed the Minds of the *Spaniards* prodigiouſly, inaſmuch as they attributed it wholly to the Fear of that Monarch and his Subjects, in which without doubt they were right,

and yet not in the Senſe in which they underſtood it; for it was not ſo much the Fear of their Arms, as the Dread the People had of them on a religious Score, as ſuppoſing them the Offspring of the Sun.

It fell out unluckily for theſe Embaſſadors, that the *Spaniards* had no Interpreter but an *Indian* of *Puna*, baptized by the Name of *Philip*, and on the Score of his Youth called *Philipillo*, i. e. *Little Philip*, a mean, villanous Raſcal, born of the Scum of the People, and whoſe Mind was yet more dirty than his Original: He had not Senſe enough to comprehend the Compliment of the Inca; and therefore, inſtead of the true Meaning of it, delivered *Pizarro* ſome Nonſenſe of his own. After the Embaſſador was departed, the *Spaniards* deliberated upon his Meſſage; ſome ſuſpected, that the Inca had bad Deſigns; others ſwore, that as his Gold was good, they had no Reaſon to doubt of his Intention: In the End, they reſolved to continue their March, and they did ſo, meeting every where with a kind Reception; and being extremely well entertained at the public Expence. In the mean time, *Atabuallpa* employed his Time very indifferently, endeavouring to ſecure the Poſſeſſion of the Empire, by murdering moſt of the royal Family, and ſuch as were moſt attached to the Prince his Brother. When they came to *Caxamalca*, they found the Inca gone, but to a Place not far diſtant, whither the General ſent, as his Embaſſadors, his Brother *Ferdinand Pizarro*, and *Ferdinand Soto*.

They were received with great Ceremony, and immediately introduced to the royal Preſence; which ſtruck the *Spaniards* at once with Reverence and Joy; for not only the Inca himſelf, but all who were near him, glittered with Gold and Jewels, and the Embaſſadors were ſerved with perfumed Liquors, by two beautiful Princeſſes, in Veſſels of Gold ſet with Emeralds. *Ferdinand Pizarro* made the Inca a long Compliment; in which he told him, or rather would have told him, of the great Kindneſs done him by the Pope and the King of *Spain*, who had ſent them expreſly, to deliver him and his Subjects from the Tyranny of the Devil; but the Interpreter, who underſtood nothing of this, delivered ſuch ſtrange Stuff of his own, that the Inca could comprehend little or nothing of his Meaning. He ſhaped however the beſt Anſwer to this Speech that he could; in which he recommended his Subjects to their Favour and Protection, beſeeching them, as they were the Children of the Sun, to be gracious and beneficent as their Father; but the Interpreter murdered this Speech too, in ſuch a manner, that though the Tenderneſs of it drew Tears from the Officers attending upon the Inca, yet neither of the *Spaniſh* Captains were able to make any thing of it; and therefore all they could ſay at their Return to *Pizarro*, was, that they had been very kindly entertained, and that the Inca's Court was ſplendid beyond Deſcription, and almoſt beyond Imagination; which raiſed the Hopes, and ſharpened the Deſires of the *Spaniards* exceedingly; and they likewiſe told him, that the very next Day, the Inca intended to come in Perſon, and pay him a Viſit in his Camp, attended by his Guards and his Nobility.

12. *Francis Pizarro* divided his Cavalry, which amounted to no more than ſixty Men, into three Troops of twenty each, commanded by *Ferdinand Pizarro*, *Ferdinand Soto*, and *Sebaſtian Belalcazar*, whom he ordered to draw his Men up under the Cover of an old Wall, that they might not be ſeen at firſt; and that, diſcovering themſelves ſuddenly, the *Indians* might be the more ſurprized. He put himſelf at the Head of the Foot, which conſiſted but of one hundred Men, and ſo waited for the Inca in order of Battle. *Atabuallpa*, on his Side, advanced in as regular Order with his Army, which was divided into four Battalions, conſiſting of eight thouſand Men each; and, as ſoon as they drew near, the Inca ſaid to his Officers, theſe People are Meſſengers of the Gods, let us be ſure to do nothing that may offend them; but, on the contrary, uſe our utmoſt Endeavours to gain them by repeated Civilities. The Perſon who advanced to harangue him from the *Spaniards*, was Father *Vincent de Valverda*, who carried in one Hand a Croſs, and in the other his Breviary.

The Figure of this Man ſurprized the Emperor very much; however, he ordered him a Chair, and then the reverend Father began a long wretched Diſcourſe, which was to be delivered again by a more wretched Interpreter. This Harangue of his was divided into two Parts; the firſt conſiſted of an Account of all the Myſteries of the Chriſtian Faith, the Miſſion of *Jeſus Chriſt*, and his Miſſion of the Apoſtles, of whom he told him St. *Peter* was the firſt and Head. In the ſecond Part of his Diſcourſe he held forth the Power of the Pope as the Succeſſor of St. *Peter*, and talked likewiſe much of the univerſal Monarchy of the Emperor *Charles*, to which it was neceſſary that the Inca ſhould ſubmit; for otherwiſe God would harden his Heart as he did *Pharaoh*'s, and then the *Spaniards* were to inflict upon him all the Plagues of *Egypt*. We may eaſily gueſs what ſtrange Stuff this muſt be, when paſſing through the Canal of ſuch a Fellow as *Philipillo*, who delivered it ſo ſadly, that the Inca himſelf perceived his Ignorance, and therefore delivered his Anſwer not in the Court Language as he would otherwiſe have done, but in the vulgar Tongue; which, however, did not hinder *Philipillo* from murdering it ſo effectually, that the Prieſt knew no more of the Emperor's Meaning, than the Emperor did of his.

Thus the whole was a ſtrange Scene of Confuſion, which, however, ended much worſe than it began; for the *Spaniards* obſerving an *Indian* Idol upon a Tower exceſſively adorned with Silver, Gold, and precious Stones, their Avarice would not ſuffer them to wait any longer, ſo that they fell to pillaging it as faſt as they could; in which the *Indians* were going to oppoſe them, but the Inca commanded them not to reſiſt, let the *Spaniards* do what they would. Father *Vincent* hearing this Noiſe, turned about, roſe from his Chair, and running to appeaſe the *Spaniards*, threw aſide his Croſs, and dropped his Breviary, which greatly increaſed the Confuſion; the *Spaniards* pretending that they apprehended the *Indian* Monarch had inſulted the Croſs; but without doubt the Inſult was on their Side, who thus ſcandalouſly betrayed and prophaned their Religion, and made the Goſpel of Peace a Pretence for perpetrating the moſt barbarous, the moſt perfidious, and moſt inhuman Cruelties, by ſlaughtering thouſands of poor Creatures, ſo obedient to their Prince, that they did not move a Hand in their own Defence.

13. There is ſome Doubt whether *Pizarro* engaged himſelf at the Beginning, but it is certain that when this Confuſion roſe to ſuch an Height, he cauſed his Horſe to pour in, and advanced in Perſon to ſeize *Atabuallpa*, of whoſe Robe he laid hold; and, falling down himſelf, dragged the Inca after him from his Chair, at which time one of the *Spaniards* ſtriking at him with his Sword, wounded *Pizarro*, who was the only *Spaniard* that loſt any Blood in this diſhonourable Fray; for certainly it could not be called a Battle, ſince the *Indians* fell like Sheep, without offering the leaſt Reſiſtance. The *Spaniſh* Writers differ widely from each other in their Accounts of this Tranſaction, at which we need not wonder; for, being naturally proud, and unwilling to injure the Reputation of their Countrymen, they endeavour all they can to diſguiſe the Truth, and to hinder their Readers from ſeeing a Series of Facts utterly inexcuſable. The Deſire of impoſing Falſhoods will always beget Confuſion; for let the Parts or Abilities of Men be what they will, there is no giving Conſiſtence or Connection to a Bundle of Lies.

Herrera informs us, that *Pizarro*, before *Atabuallpa* and his *Indians* entered the Square, commanded his Muſketeers to take Poſt, and that, upon a Signal given them, the Captains *Ferdinand Pizarro*, *Ferdinand de Soto*, *Sebaſtian de Belalcazar*, and *Chriſtopher de Mena*, who commanded the Cavalry, ſhould fall upon the *Indians*, and the Foot ſhould do the like; and directed them before the Execution began, that they ſhould permit a certain Number of the Enemy to enter the Gates, which they ſhould afterwards take ſpecial Care to ſhut and ſecure: That Father *Vincent* having made his Speech to the Inca, told *Pizarro* he was treated with Contempt, and that the Tyrant demanded Reſtitution of the Gold and Silver the

Spaniards had plundered his Subjects of; whereupon, ſays *Herrera*, *Pizarro* did not think fit to loſe more Time, for he had before reſolved what to do, being a Man that had ſerved twenty years in the *Weſt-Indies*; and, knowing the Victory depended on ſeizing the Perſons of the Sovereigns, he lifted up the white Cloth, which was the appointed ſignal for executing the Orders he had given; and thereupon *Peter Candia* fired the great Guns, and the Muſketeers their Pieces, to the Amazement of the *Indians*; and the more ſo, becauſe it was unexpected: Then the Drums beat, the Trumpets ſounded, the Horſe fell in three ſeveral Ways among the *Indians*, while the Infantry made a Slaughter of them with their croſs Bows, Pikes, and Swords; and *Pizarro*, in Perſon, with fifteen choſen Men, marched up to the Chair on which *Atahuallpa* was carried, and, killing thoſe that ſupported it, with many more that crowded to ſupply their Places, after a yery great Slaughter of the *Indians*, ſeized the Inca, and pulled him down from his Chair; after which the *Peruvians* fled, and were purſued by the *Spaniards*, who did not leave off killing them till the Fugitives broke down part of the Wall of the Square, by which means ſome of them eſcaped.

De la Vega, who was himſelf an Inca, or a Deſcendant from the Family of thoſe princes, whoſe Hiſtory he writes, obſerves, that the *Spaniſh* Generals pretended the *Indians* were treacherous, that *Atahuallpa* had formed a Deſign to ſurprize the *Spaniards*, and put them all to the Sword; and that *F. Vincent* complained to the General, they refuſed his Invitation to become Chriſtians, and treated him and the Croſs with Contempt, and thereupon incited the General to fall upon them. But in theſe Accounts, ſays *de la Vega*, the General and Captains were not ſincere; they endeavoured to put the beſt Gloſs upon their Actions, leaving out of the Narrative they ſent to the Court of *Spain* all their cruel and unjuſtifiable Proceedings, and adding whatever had a fair Appearance; it being confirmed, ſays that Hiſtorian, by ſeveral other Writers, that *Atahuallpa* commanded his Subjects not to reſiſt the *Spaniards*; for if the Inca had not commanded them not to fight, certainly, ſaid he, they would never have endured to ſee their Prince overthrown and taken, having Weapons in their Hands; they would all rather have died in his Defence, as many of them did in endeavouring to ſupport his Chair, and not have ſuffered an hundred and ſixty *Spaniards*, whom they were able to have ſubdued with Stones, to commit ſuch Outrages; whereas there was not one *Spaniard* ether killed or wounded, unleſs *Francis Pizarro*, the General; who received, as has been ſaid, a little Hurt in his Hand by one of his own men, as he went to ſeize on *Atahuallpa*.

The Truth is, the *Indians* did not fight, becauſe they held every Command of the Inca to be a Part of their Religion, and of the Divine Law, though it was to loſe their Lives and Eſtates. Such are the Variations with which this Story is told, by the moſt conſiderable Writers; and indeed, take it in what Light we will, or can, it admits of very little Excuſe, and ought to be conſidered as an inſtance, that the Thirſt of Wealth corrupts even the nobleſt Minds. But we have not Room to expatiate upon the Subject; our Buſineſs is to purſue the Hiſtory, and to ſhew the Reader what the Conſequences were of this barbarous and bloody Action.

13. When all was over, *Pizarro*, having ſeized the Inca, and conveyed him to his own Quarters, directed the Spoils of the Field to be brought to him, which were great; conſiſting of large Gold and Silver Veſſels, Utenſils, fine Garments, Jewels and Ornaments, belonging to the Inca, the Royal Family, and great Officers: there were taken alſo ſeveral Ladies, Wives of the Caziques and Orejons, and ſome of the Mamaconds, or conſecrated Virgins; and *Pizarro* directed Thankſgiving to God to be obſerved that very Day, being the 3d of *May* 1533, and in that very field where the Ground was covered with the dead Bodies of the miſerable *Indians* they had thus murthered and plundered. Next Day he ſent out a Detachment of his Forces to plunder the Inca's Camp, where he met with another rich Booty; though, it is ſaid, the *Peruvian* Generals had carried off three thouſand Loads of Gold and Silver before the *Spaniards* arrived there; therefore, in order to induce the *Indians* not to carry off or conceal any more of their Treaſures, he cauſed it to be proclaimed that their Inca was alive, and that they were at liberty to come and attend him, and perform their uſual Services; whereupon ſeveral of the *Indian* Generals and great Officers returned to *Caxamalca* to attend their Captive Sovereign. He alſo cauſed the Inca's Women to be brought to him, and ſuffered him to be ſerved in the ſame Manner he uſed to be before this Misfortune: Though he ſtill kept him in Fetters, which made the Inca apprehenſive they would take away his Life in the End, unleſs he could find ſome way to obtain his Liberty.

Having obſerved therefore the inſatiable Thirſt of the *Spaniards* after Gold and Silver, he promiſed to give them as much of thoſe Metals as a great Room in the Caſtle of *Caxamalca* would hold for his Freedom; and, that the *Spaniards* might not doubt the Performance of what he offered, he propoſed ſending ſome *Spaniſh* Officers, with his People, to *Cuzco*, to the Temple of *Pacha Chamac*, and other Places, to bring the Treaſures repoſited there to *Caxamalca*; and, at the ſame Time, iſſued his Orders, that the *Spaniards* who were diſpatched to thoſe Places ſhould be hoſpitably entertained, in the Countries through which they paſſed, and receive all the Aſſiſtance his Subjects could give them.

In the mean time, *Almagro* having liſted an hundred and fifty Men in his Service at *Panama*, embarked with them for *Peru* to reinforce *Pizarro*; but was obliged, by contrary Winds, to land at *Cape Franciſco*, to the Northward of the Equator, where he was joined by another ſtrong Party of *Spaniards*, that were going to ſhare *Pizarro*'s Fortunes, making together a Body of between two and three hundred Men; but being obliged to paſs ſo many Moraſſes and Mouths of Rivers, and march through continual Rains under the Equator, he loſt thirty or forty of his Men, and fell ſick himſelf: However, ſurmounting all theſe Diſtreſſes and Difficulties, he arrived at length at the *Spaniſh* Colony of *St. Michael's*, near the Bay of *Guiaquil*, and there he underſtood that *Pizarro* had made the Emperor *Atahuallpa* Priſoner, and poſſeſſed himſelf of a vaſt Treaſure; whereupon, it is ſaid, *Almagro* conſulted with his Officers, whether they ſhould join *Pizarro* or go upon ſome further Diſcoveries, independent of him, if he refuſed to let them ſhare the Treaſure he had got; and *Almagro*'s Secretary, it ſeems, ſent *Pizarro* Intelligence, that his Maſter had no good Intentions towards him.

But *Pizarro*, either believing he ſhould not be able to keep ſo large an Empire as *Peru* in Subjection, with the few Troops that were with him, or that *Almagro*, having more Forces than he commanded, might join a Party of the *Indians*, and take his Booty from him, and ſet up for himſelf, ſent very obliging Meſſages to *Almagro*, inviting him to advance and join him; and, at the ſame time, acquainted him with the Arts that were uſed to ſet them at Variance, and thereby ruin their Enterprize on *Peru*, which was not to be carried on but by their united Forces and Endeavours; and particularly, he acquainted *Almagro* with the Treachery of his Secretary, who thereupon ordered him to be hanged up, and immediately began his March towards *Caxamalca*. There was certainly a great deal of Policy in this Conduct, and *Pizarro* ſhewed himſelf therein a Perſon of deep Penetration, and great Parts; but, at the ſame time, there was ſomething in it of Ingratitude; ſo that we ought to place it among the Number of thoſe Actions of his, which inſtead of deſerving Praiſe ſtand in need of Excuſe.

14. The coming of *Almagro* made a very great Noiſe, and the Inca *Atahuallpa*, receiving Advice that another Body of *Spaniards* was arrived upon the Coaſt, began to reflect that this would not be to his Advantage: for *Pizarro* would now no longer be under a Neceſſity of carrying Matters fair with him; being enabled, by this Reinforcement, to maintain his Conqueſts by Force. He haſtened therefore the bringing in the Treaſure he had offered for his Ranſom, that he might obtain his Liberty before

Pizarro was joined by *Almagro*; but another Accident happened about the ſame Time, which he apprehended might be ſtill more fatal to him.

The three *Spaniſh* Officers that were ſent with his People to *Cuzco*, happening to paſs through the Town where *Hueſcar*, his Brother, was Priſoner, went to ſee him; and acquainting *Hueſcar* with what *Atabuallpa* had offered for his Ranſom, that Prince informed them how unjuſtly he had been depoſed by *Atabuallpa*, his Brother, who had no Right to the Empire or the Treaſures he had promiſed; and as he underſtood one principal Deſign of the Expedition of the *Spaniards* was to relieve the Diſtreſſed, and to do Juſtice to thoſe that were oppreſſed, he did not doubt but they would releaſe him from his Captivity, and reſtore him to his Throne; which he ſhould not only gratefully acknowledge, but would furniſh them with much more Treaſure than the Uſurper could poſſibly do; for his loyal Subjects had buried moſt of their Gold and Silver Plate after the Battle, wherein he was made Priſoner, to conceal it from the Rebels, but would readily produce it again, and pay it to the *Spaniards* for his Ranſom, if they required it.

Pizarro's Meſſengers ſeemed to liſten to his Overtures, and promiſed the Inca that Juſtice ſhould be done him; but left that Prince, however, in Priſon, and continued their Journey to *Cuzco*; and Advice being immediately carried *Atabuallpa*, of the Conferences between the *Spaniſh* Officers and his Brother, he ſoon ſaw that he ſhould be undone, unleſs *Hueſcar* was immediately diſpatched out of the way, knowing that the greateſt Part of the Subjects of the Empire were little in his Intereſt; and, as they would infallibly be ſupported by the *Spaniards*, to whom his Brother had diſcovered his Treachery, and promiſed ſuch Mountains of Gold and Silver, they would certainly ſacrifice him to their Avarice, if they had no Regard to the Juſtice of his Brother's Cauſe; but reflecting, if he ſhould order his Brother to be put to death, the *Spaniards* might make this a Pretence for taking away his own Life, he was forced to act with Caution.

He reſolved, in the firſt Place, to ſound how *Pizarro* ſtood affected towards *Hueſcar*, which he did by feigning he had Intelligence, that the Officers who had his Brother in Cuſtody, had put him to death without his Knowledge, for which the Uſurper expreſſed a very great Concern. But finding *Pizarro* was not moved at the Relation, and that he only ſaid, *This was the Fortune of War, and the Lives of Captives were at the Conqueror's Diſpoſal*; *Atabuallpa* diſpatched an Expreſs for putting *Hueſcar* to Death, and his Orders were immediately executed, though it remains uncertain what Death he died; for ſome Writers affirm he was burnt, others, that he was drowned, and ſome, that his body was cut in ſmall Pieces, that his Subjects might not pay thoſe Honours to the Corpſe of their deceaſed Inca as were uſual. However he ſuffered, there is one Thing worthy of Remark, which is, That when the Murtherers came into his Preſence, and *Hueſcar* underſtood their Buſineſs, he expreſſed himſelf in theſe Words: “My Reign is indeed but ſhort; but the Perſon by whoſe Orders I am put to Death, who was born, and ought to have continued my Subject, will not live to enjoy long that Power which he endeavours to purchaſe at the Expence of the Blood of his Brother and his lawful Prince.”

The *Peruvians*, however, made great Lamentations for him as ſoon as his Death was known, crying to Heaven for Vengeance on his Murtherers: Some alſo deſired the *Spaniards* to revenge it on the Uſurper *Atabuallpa*. In the mean time, the three Officers that were ſent to *Cuzco* being arrived there, were adored by that People as the true Deſcendants of the Sun: But the *Spaniards* lamented that they were Men of mean Parts and Education, who knew not how to preſerve that Reſpect and Veneration the *Peruvians* had conceived of them, which was then ſo neceſſary to facilitate their future Attempts. The *Indians*, we are told, ſoon perceived they muſt deduce the Original of the *Spaniards* from ſome baſer Fountain than the Sun, and the Eſteem and Affection they at firſt entertained for the Chriſtians, on the mighty Profeſſions they made of their Juſtice and Honour, was on a ſudden converted into Dread and Averſion.

They were afflicted to find ſo vicious and profligate a Race of Men, who trampled on every thing that was ſacred, and whoſe Avarice ſeemed to exceed all Bounds, ſhould become Maſters of their Country; and from that time meditated how they might throw off that intolerable Yoke which they found the *Spaniards* were about to impoſe upon them. However, they durſt not diſobey the Commands of their Inca *Atabuallpa*; but having amaſſed a conſiderable Quantity of Treaſure, they loaded it on the Backs of their Tamenes or Porters, and conveyed it to *Caxamalca*, with a View, poſſibly, of aſſerting their Liberties to greater Advantage, when they ſhould have procured the Releaſe of their Inca: But the moſt valuable Treaſure, conſiſting of Gold, Silver, and Emeralds, being lodged in the temple of *Pacha Camac*, the inviſible God, as *Pizarro* was informed, he diſpatched his three Brothers thither, with the *Peruvian* Officers *Atabuallpa* deputed, to fetch it to *Caxamalca*.

But the Prieſts of *Pacha Camac* receiving Advice how the Temple of *Cuſa* had been ruined by the *Spaniards* that went thither, to prevent the like Misfortune ſent away four hundred Loads of Gold, Silver, and Jewels, before the *Spaniards* arrived, which were buried in the Earth, or carried to ſuch a Diſtance that the *Spaniards* could never diſcover them; however, *Ferdinand Pizarro* found as much Plate in this Temple as amounted to ninety thouſand Crowns beſides what the Soldiers embezzled, and returned with it to *Caxamalca*.

The Marſhal *Almagro* being advanced by this time into the Neighbourhood of that Place, *Pizarro*, the General, went out to meet him, and congratulated his Arrival, receiving him with all the Marks of Affection and Eſteem imaginable, and offered him ſuch a Share in the Spoils as made him perfectly eaſy; but his Soldiers, who expected to divide the Booty with thoſe that ſerved under *Pizarro*, were told, they were entitled to no Part of it, as not having been preſent in the Action when the Inca *Atabuallpa* was made Priſoner, which was near creating a Mutiny amongſt them; but they were pretty well appeaſed when *Pizarro* agreed to diſtribute an hundred thouſand Ducats among the Men which came with *Almagro*. The reſt of the Plunder after the Emperor's Fifth was deducted, was divided by *Pizarro* among his Officers and Soldiers, in ſuch a Proportion as he ſaw fit, in which he pretended to have a great Regard to the Merit of the reſpective Adventurers. And it is ſaid, after he had reſerved the Inca's golden Chair to himſelf, he diſtributed as much Gold and Silver Plate amongſt the Soldiers, as amounted to 1,500,000 Crowns and upwards; which, conſidering the Value of Gold and Silver at that Time, was more than fifteen Millions at this Day. But as large as this Sum appears in round Numbers, it will be yet found more extraordinary and ſurpriſing, if we conſider amongſt how ſmall a Number of Men it was divided.

We cannot exactly ſay what every private Man's Share came to, but we learn from good Memoirs, that each Horſeman had near two thouſand Ounces of Gold for his Share, and the Foot in Proportion; ſo that I ſee no Reaſon to doubt of the Truth of what I once ſaw in a M.S. of Sir *John Hawkins*: That the meaneſt of *Pizarro*'s Soldiers had two thouſand Pounds for his Share, and ſome of them, that is, of the Foot, twice that Sum; and yet it is agreed, that the whole Money then divided did not exceed a Fifth Part of *Atabuallpa*'s Ranſom, which, at this Rate muſt have amounted to more than one Million and an half of our Money. After this Diviſion was made, about ſixty of the private Men inſiſted upon their Diſcharge, that they might go home and live in Peace upon what they had got. *Almagro* oppoſed this vehemently, alledging, That it would greatly weaken their ſmall Army; and moſt of the Council were of his Opinion. *Francis Pizarro*, who had more Senſe than *Almagro* and all the Council put together, agreed to the Demand, and gave this wiſe Reaſon for it, That when once it appeared that private Men could get ſo much in ſo little a time, there was no doubt to be made, if one

Man went away they ſhould have ten come in his Place; and having given this Reaſon there was no farther Diſpute about it.

As *Ferdinand Pizarro* was the Perſon made choice of to go over to *Spain* with theſe Men, and this vaſt Maſs of Treaſure, he went to take his Leave of *Atahuallpa*, with whom he was in much greater Eſteem than any of the *Spaniſh* Officers. The Emperor received the News with great Sorrow and Concern, and could not help ſpeaking his Sentiments freely. My Lord, ſaid he, you are going home, which is certainly matter of Joy to you, though 'tis matter of Grief to me; for I already apprehend, that before your Return, that Fellow with one Eye, meaning *Almagro*, and that other Fellow with the great Belly, which was the King's Treaſurer, will ſend me to my long home, and therefore let us take our laſt Farewel.

He made a very right Judgment in this; for when the *Spaniards*, who had been ſent for the reſt of *Atahuallpa*'s Ranſom, made a Report of the prodigious Quantities of Gold they had ſeen, and the Reaſons they had to believe that much greater Quantities were concealed, *Almagro* gave it as his Opinion, that they ſhould wait no longer, but get rid of the Inca as ſoon as they could; and then make as much Haſte as poſſible to get Poſſeſſion of all the Gold in *Peru*. A baſe and bloody Reſolution, which, though *Francis Pizarro* at this Time rejected with Horror, yet it was not long before he approved and agreed to it.

15. The Fate of *Atahuallpa* is undoubtedly one of the moſt memorable Things that fall within the Compaſs of this Section, and therefore it is requiſite that we ſhould give a clear and diſtinct Account of the Fact, tho' in as few Words as poſſible; and this is what we ſhall labour to perform with the ſtricteſt Impartiality, and the greateſt Regard to Truth. There were various Reaſons why *Francis Pizarro*, though a very brave and gallant Man, had not that Tenderneſs for this *Indian* Monarch, that *Cortez* had for *Motezuma*; but that which governed him principally was, a ſort of Contempt with which *Atahuallpa* treated him, and the viſible Preference he gave in point of Eſteem and Regard to other Officers in the *Spaniſh* Army. The Cauſe of this Behaviour is one of the moſt ſingular Paſſages that occurs in all the *Spaniſh* Hiſtories of the Conqueſt of *Peru*, and cannot fail of giving great Pleaſure to the judicious Reader.

Atahuallpa, however cruel to his own Family, appeared to be a Prince of great Wiſdom and Penetration; and one who laboured to inform himſelf as thoroughly as it was poſſible, with reſpect to the Manners, Cuſtoms, ſuperior and inferior Qualities of the *Spaniards*, that he might be the better able to deal with them, if upon the Payment of the Sum propoſed for his Ranſom they ſhould actually reſtore him to his Liberty. That which moſt of all perplexed his Enquiries and diſturbed his Meditations, was their Art of Writing and Reading, as to which he could not comprehend whether it was a natural Endowment, or whether it was acquired by Labour and Application. In order to ſatisfy himſelf in this Point, he aſked one of the *Spaniſh* Soldiers whether he could expreſs the Name of God upon his Thumb-nail. The Man readily ſaid he could, and did accordingly; after this the Inca went about to ſeveral of the Captains and Soldiers, and ſhewing them his Thumb-nail, aſked them if they knew what that Mark ſignified; and from their Anſwers, he began to entertain an Opinion that Reading and Writing were natural to this Nation, which he thought a very great Advantage: But unfortunately he aſked the ſame Queſtion of the General, who, not being able to read it, was put greatly to the Bluſh, which not only changed *Atahuallpa*'s Opinion, with reſpect to Reading and Writing, which he now ſaw plainly were the Fruits of Education, but gave him likewiſe a very low Opinion of the General, ſuppoſing that he muſt have been of a very mean Original, ſince he was leſs knowing in this Reſpect than many of his Soldiers.

This Contempt that he ſhewed for *Pizarro*, begat a Prejudice in him, which very ſoon turned to the Diſadvantage, and in the End proved the Ruin, of the Inca. It fell out that *Philipillo*, or *Philip* the Interpreter, fell in Love with one of *Atahuallpa*'s Wives, which incenſed that Monarch ſo much, that he ſignified to *Pizarro*, that he ought not only to puniſh ſuch a Fellow, but even to put him to Death; which the General was ſo far from doing, that he only made a Jeſt of the whole Affair; in which without doubt he ſhewed as little Regard to his own Character, as to that of the Emperor. *Philipillo* took the Jealouſy of *Atahuallpa* much to Heart; and as all ſuch low Fellows ſuffer Hate and Fear to compound their Reſentments, ſo he determined in himſelf to deſtroy that Monarch immediately out of the way, as the ſole Means of providing for his own Safety. It was with this View that the Villain inſinuated to *Pizzarro* that he ought to be very watchful of the Inca's Motions, becauſe he was actually contriving the Deſtruction of the *Spaniards*. This wild and ridiculous Story was digeſted into a formal Accuſation, by the Direction of the General and his Favourites, who appointed Commiſſioners to try *Atahuallpa*; directing *Sancho de Cuellar* to take upon him the Office of Attorney-General, to exhibit a Charge againſt the Inca, which he did; and it conſiſted of the following Particulars, *viz.* That *Hueſcar*, Inca, being his eldeſt Brother and lawful Sovereign, and himſelf a Baſtard, he had cauſed *Hueſcar* to be depoſed and impriſoned, and afterwards uſurped his Throne: That he had cauſed his ſaid Brother to be murdered, ſince he became a Priſoner to the *Spaniards*: That *Atahuallpa* was an Idolater: That he cauſed his Subjects to ſacrifice Men and Children: That he had raiſed unjuſt Wars, and been guilty of the Blood of many People: That he kept a great many Concubines: That he expected Taxes and Tribute of the *Peruvians*, ſince the *Spaniards* poſſeſſed his Country, and conſumed and embezzled the public Treaſure: That he had incited the *Indians* to rebel and make War againſt the *Spaniards*, ſince he had been their Priſoner.

The very reading theſe Articles ſufficiently proves that they were not calculated to bring a bad Man to Juſtice, but to give the Colour of Law, and the Form of a fair Trial, to one of the wickedeſt and vileſt Contrivances that ever entered the Heart of Man. Yet black and villainous as this Affair was, it is very doubtful to ſay whether it reflects more Honour or more Infamy upon the *Spaniſh* Nation. For no ſooner was this dark Deſign ſet on foot, than almoſt all the Perſons of Family and Diſtinction that ſerved in the Army, declared againſt it; and declared in Terms that ſpoke them equally Men of Senſe and Men of Honour: They declared that they knew no Right the *Spaniſh* Nation had to make themſelves Judges of an *Indian* Prince, or of his Title to his Dominions; that with regard to the *Spaniards*, he had behaved ſo well, and done them ſo many Kindneſſes, that to treat him in this Manner, was not only the higheſt Barbarity, but the moſt flagrant Ingratitude; that if after all they were reſolved to be rid of him, the beſt thing they could do was, to ſend him into *Spain*, together with their Charge, and leave the Cauſe to be decided by the Emperor. But *Pizarro* and his Council were determined to go on, and though the other Party delivered a Proteſt in Writing againſt all their Proceedings, and appoineed one *John de Herreda* Protector of the Emperor's Perſon, yet they perſiſted in trying him, and aſſigned him one of their Party for an Advocate; who to be ſure made ſuch a Defence as did no great Service to his Client.

The Iſſue of this Buſineſs was, that after a mock Shew of Juſtice, they condemned the Inca to ſuffer Death, which at firſt they reſolved ſhould be by Burning; and to this Sentence, to give it a fairer Appearance in *Spain*, where it might very well be expected that it would be reviewed, they procured the Approbation of Father *Vincent*, who proſtituted his Character as an Eccleſiaſtic in this bloody Affair; and. which was much worſe, proſtituted, as far as in him lay, the Chriſtian Faith, and the Credit of the Goſpel; for which his Memory ought to be infamous in every Country where the People call themſelves Chriſtians. Yet this cruel and blood-thirſty Fryar, after being ſo great an Inſtrument in his Sufferings, undertook the Converſion of *Atabualpa*, and the Argument he uſed to induce him to be baptized, was worthy of ſuch a Preacher. He told him that if he would conſent to die a Chriſtian, he ſhould not be burnt, but ſtrangled only, which had the deſired Effect, and he was accordingly baptized in the Evening, and ſtrangled the next Morning, to the eternal Diſhonour of all who were concerned in ſo iniquitous and ſcandalous a Proceeding.

There are ſome who pretend that this Murder of the Inca was chiefly owing to the *Indians* themſelves, who were for revenging the Death of their lawful Emperor *Hueſcar*; and thereby fulfilling the prophetic Threatning of that Prince at his Death, which has been already mentioned, and this has been very gravely inſiſted upon as an Apology, if not a Defence, for the Conduct of *Pizarro* and his Officers. A little Conſideration, however, will ſhew us that there could be no Truth in this: Firſt it appears, that notwithſtanding his Brother's Death, *Atabuallpa* was univerſally acknowledged and obeyed as the lawful Inca throughout the whole Empire, which does by no means agree with this Story of the *Indians* deſiring to have him put to death. It may indeed be ſaid that Things may be true, though they are not probable, but then we cannot know them to be true without Proof, of which none of the Hiſtorians who report this bring us any, either good or bad.

Secondly, if it had been ſo, the *Spaniards* would certainly have made the *Indians* his Proſecutors, or rather have ſet up the Inca his Brother, who had a fair Title to the Crown, and have left them to have taken Vengeance for that Crime, which, if they could have done it, would have anſwered their Purpoſe, and ſaved their Credit; and as they did not do it, we may very fairly preſume that no ſuch thing was in their Power. It muſt indeed be allowed that theſe are only negative Arguments, but yet Arguments they are, whereas what is ſaid on the other Side is mere Suggeſtion.

But thirdly, there is the cleareſt Proof of the contrary; for as ſoon as *Atabuallpa* was murdered, the *Indians* began every where to act offenſively againſt the *Spaniards*, which they had never done before; and this ſhews that the former Conduct was the Effect of Duty to that Prince whom the *Spaniards* would have us believe they diſowned; and the latter is as clear a Mark of their univerſally deteſting that Crime, which it is pretended was done at their Perſuaſion. If therefore we take theſe Conſiderations together, there can be no longer any Doubt but what the *Spaniards* have advanced is a pure Fiction, contrived to give ſome ſort of Colour to an Action too foul to be avowed, even by thoſe who committed it.

16. The Events that followed upon the Death of the Inca *Atabuallpa*, very plainly ſhewed that human Nature is the ſame in all Countries and Climates; that ſome Men from Principles of Honour, Fidelity, and Love to their Country, adhere to what is right, whatever ſeeming Advantages may invite them to purſue a contrary Conduct, while others, after gaining to themſelves Character, Credit, and Employments, by putting on a ſpecious Appearance of Virtue, ſhew their natural Diſpoſitions at once, when tempted by the Hopes of Gain, and releaſed from the Fear of any other Puniſhment than what reſults from the Conſciouſneſs of having done Evil.

Rumnavi, one of *Atabualipa*'s Generals, who retired from the fatal Slaughter of *Caxamalca*, with the Rearguard of his Army, made himſelf Maſter of *Quito*; and, as ſoon as he heard of his Maſter's Death, cut to-pieces ſuch of his Officers as he believed loyal to the deceaſed Prince, and endeavoured to keep what he could for himſelf. *Quiſquis*, another of theſe Generals, acted much the ſame Part: but, having a better Army under his Command, ſecured a greater Part of the Country, and yet ſhewed himſelf far from being valiant, by flying before a Handful of *Spaniards* who were ſent in Purſuit of him, and gave a farther Proof of his Cruelty, which is a Quality inſeparable from Cowardice, by murdering a few *Spaniards*, who, by their Temerity in puſhing on too far, had fallen into his Hands.

This Man, juſtly apprehending that it would be impoſſible for him to maintain himſelf againſt the other *Indian* Commanders, as well as againſt the *Spaniards*, while his Power had no other Authority than what it derived from Force, contrived to get into his Hands a younger Brother of the Inca's, whoſe Name was *Paullu*, whom he would have perſuaded to have taken the Title of Emperor, hoping under the Shadow of his Title to have preſerved the Power he had obtained. But this Prince, though very young, diſcovered a Greatneſs of Soul truly admirable, and worthy of the higheſt Praiſe; for diſdaining a Crown, which he knew could not be worn but at the joint Expence of his Family and his Country; he generouſly refuſed it, telling *Quiſquis* that he ſcorned to derive from the Miſery of the Empire, that Authority which he could not hope for in better Times; and, that he eſteemed it far more honourable to be thought a worthy Man, than a bad Monarch; which had ſuch an Effect even on *Quiſquis*, that, though he had him in his Power, he did not attempt to ſeize his Perſon, but allowed him to retire, as he did, to *Francis Pizarro*, towards whom he behaved with the ſame Dignity and Firmneſs. He told the General that the true Heir of the Empire was his elder Brother *Manco Capac*; and that if he had any ſuch Purpoſes as he pretended, of doing Juſtice, and protecting ſuch as had Right on their Side, he ought to ſhew it by declaring in favour of that Prince, who had already a good Army about him; and who, with the Aſſiſtance of the *Spaniards*, would infallibly reſtore the Luſtre of the imperial Diadem; which, as we ſhall ſee hereafter, had the deſired Effect. I mention this, though it carry me a little beyond that Period of Time of which I was ſpeaking, that I might not omit altogether ſo ſingular an Example of Virtue and good Senſe.

As for *Quiſquis* he ſtill went on in his old Way, and having had Information that the *Spaniſh* General had left but a ſmall Body of Men to guard *Requelma*, the Royal Treaſurer, with all the Riches he had taken in his Hands, he made a very bold Puſh in hopes of ſurprizing him, but met with ſo brave a Reſiſtance, that he was obliged to retire without carrying his Point; and this ſhews us another Thing, that there are in all Nations Men of ſuch low and profligate Diſpoſitions, as not to be aſhamed of increaſing the Calamities of their Country, by attending ſolely to their private Intereſt in Times of public Confuſion: when a little Reflection would ſhew them that acquiring Wealth is only expoſing themſelves to greater Dangers than ſuch are in who have leſs, and conſequently is acting as much againſt their Intereſt as againſt their Duty and the Public. All Paſſions indeed obſcure Foreſight, but Avarice makes Men ſtone-blind.

It is impoſſible to conceive a Country in a worſe Condition than *Peru* was now in, or a Nation in greater Diſtraction than its Inhabitants. On the one hand they were diſpirited with ſuperſtitious Fears of the *Spaniards*, which hindered them from conſidering, in a proper Light, their Force, and the Strength they were able to bring againſt them; on the other, they were no leſs confounded with reſpect to their own Government, ſome following one of the Incas, and ſome another; and thus, when Union alone could afford them any Chance for Safety, they ſplit themſelves into Factions and Parties, and thereby drew on their own Ruin. This is a Leſſon worthy of Attention; for what was then the Condition of *Peru*, may be that of any other Country upon the Globe, and conſequently the Behaviour of its Inhabitants may ſerve to inſtruct all other Nations. But it is now Time to return to the Progreſs of the *Spaniards*, and the Effects of their Arms; from which we digreſſed only with a View to ſtate ſome Points to the Reader, as agreeable to the Subject, and no leſs worthy of his Attention; which Taſk having thus fulfilled, we will reſume the Thread of our Narrative.

17. *Pizarro*, however, did not carry his Reſentment ſo far, but that, after he had taken and killed, he thought fit to treat the Corpſe of the Inca with the Reſpect due to a ſovereign Prince; he celebrated the Inca's Funeral with great Solemnity, and went into Mourning for him; but he ſoon diſcovered how deteſtable this Murder rendered him among the Natives. The two Factions immediately

united againſt him, under *Manco Capac*, the Brother and Heir of *Hueſcar*, whom they proclaimed Emperor of *Cuzco*. Whereupon *Pizarro* proclaimed *Toparpa*, a Son of *Atabuallpa*, Emperor; cauſed him to wear the Imperial Coronet, and to be treated with the ſame Honours his Father had been, iſſuing ſuch Orders in his Name as might beſt ſerve the Intereſt of the *Spaniards*; but this Inca died ſoon after; and ſo *Pizarro* conjecturing that nothing could tend to eſtabliſh the *Spaniſh* Dominion in *Peru*, more than his poſſeſſing himſelf of the capital City of *Cuzco*, he began his March thither with all his Forces, conſiſting of near four hundred Men, beſides ſuch as were ſtiled confederate *Indians*.

In the mean time *Atauchi*, Brother to the late Emperor *Atabuallpa*, having collected a great Quantity of Treaſure, to purchaſe his Brother's Ranſom, brought it to *Caxamalca*; but finding *Atabuallpa* murdered, and the *Spaniards* marched from thence, determined to be revenged on them, and joining his Forces with ſome *Peruvian* Generals, ſurpriſed the *Spaniards* upon their March to *Cuzco*, killed ſome of them, and made ſeveral Priſoners; and amongſt the reſt *Sancho de Cuellar*, who had drawn up the Proceſs againſt the late Inca *Atabuallpa*, and attended his Execution. With theſe Priſoners the *Indian* Generals retired again to *Caxamalca*, where they ſtrangled *Sancho* the *Spaniard*, at the very ſame Poſt where their Emperor was put to Death; but underſtanding that *Francis de Chaves*, *Ferdinando de Haro*, and ſome of the reſt of their Priſoners, had proteſted againſt the Inca's Death, they reſolved to give them their Lives and Liberties, entering into the following Articles of Peace and Friendſhip with the captive *Spaniards* before they diſmiſſed them, *viz.* That neither Party ſhould, for the future, offer any Violence to the other; and particularly, That the *Spaniards* ſhould not attempt to depoſe *Manco Capac*, who had been proclaimed at *Cuzco*, and was the lawful Heir of the Inca *Atabuallpa*; That both Sides ſhould releaſe their Priſoners; and, That the *Spaniards* ſhould not treat the *Indians* as Slaves, but Freemen: That the Laws of their Country ſhould be obſerved inviolably, when not repugnant to thoſe of Chriſtianity; and that this Treaty ſhould be ratified by the *Spaniſh* General, and his Sovereign the Emperor of the *Romans*.

The *Spaniards* inſiſted, on their Part, That the *Indians* ſhould profeſs the Chriſtian Religion: That a Part of the Country ſhould be aſſigned them for their Subſiſtance; and, That they might retain the *Indians* as hired Servants, though not as Slaves; which the *Indians* agreed to, and diſmiſſed their Priſoners with rich Preſents. But *Pizarro* and *Almagro*, at firſt, poſitively refuſed to ratify the Articles, and would hear of nothing but an abſolute Submiſſion, and an intire Surrender of their Country and their Perſons, to the Will of the Chriſtians; which occaſioned long and bloody Wars afterwards. Whereas the *Spaniſh* Hiſtorians admit they might have eſtabliſhed Chriſtianity in *Peru* without ſpilling a Drop of Blood, if the Ambition and Avarice of the Adventurers had not prevented it. The General *Pizarro*, continuing his March towards *Cuzco*, was again attacked by ſeveral Parties of the *Indians* at ſome difficult Paſſes in the Mountains; but, finding themſelves unable to reſiſt the Fire-arms and Horſes of the Chriſtians, they fled, after a faint Reſiſtance, to the capital City, declaring it was in vain for any human Force to oppoſe the *Spaniards*, who were armed with Thunder and Lightning, and could kill their Enemies at ſo many hundred Yards diſtance. Whereupon the People of *Cuzco*, without offering to defend the Walls, or that impregnable Caſtle already mentioned, fled with their Wives and Children, and what was moſt valuable to them, to the Woods and Mountains; and *Pizarro* entered the City without Oppoſition, in the Month of *October*, 1532, where he met with a prodigious Booty, notwithſtanding the Citizens had ſo much Time to carry off their Goods and Treaſures.

We have not room here to enter into a long Account, either of the Particulars, or of the Amount, of the immenſe Wealth, which the *Spaniards* ſay was found in this City; but ſhall content ourſelves with obſerving, that as it was the Cuſtom in this Country to bury with their great Men the beſt Part of the Riches of which they died poſſeſſed, ſo their Conquerors, who made no ſort of Difficulty of rifling Sepulchres as well as Temples, found not only as much Wealth in the Dwellings of the Dead, but rather more, than in the Habitations of the Living; ſo that ſuch as rate the Plunder of this City at the loweſt, compute it at the full Value of *Atabuallpa*'s Ranſom. When the General *Francis Pizarro* had thus got into his Hands the Capital of *Peru*, from whence the Inca *Manco Capac*, and the greateſt Part of the Inhabitants were fled, he thought fit to invite them to return to their Dwellings, apprehending, if they were made deſperate, that the whole Power of the Empire might aſſemble againſt him, and reduce him to great Straits by cutting off his Proviſions, though they durſt not meet him fairly in the Field.

The *Indians*, accepting *Pizarro*'s Invitation, returned to their Houſes in *Cuzco*, and even the Inca made ſome Overtures to him, intimating, that he ſhould be content to embrace the Chriſtian Religion, and hold his Dominions of the Emperor of the *Romans*, provided, that neither he nor his Subjects ſhould be moleſted for the future, in their Perſons or Eſtates: And, being encouraged by *Pizarro* to believe he ſhould have the Terms he demanded, the Inca came in Perſon to *Cuzco*, and had an Interview with the *Spaniſh* General, who cauſed him to be crowned, and inveſted in the Empire, by binding the royal Wreath or Coronet about his Head, and proclaiming him Inca in the ſame manner his Predeceſſors uſed to be inaugurated into that Dignity; and aſſured the Inca he would ſtrictly obſerve the Capitulation made by *Francis de Chaves*. Theſe pacific Meaſures the *Spaniards* found themſelves under a Neceſſity of taking at this time, not only becauſe they ſaw all the ſouthern Provinces of *Peru* aſſembling againſt them under the Inca *Manco Capac*, but becauſe *Rumnavi*, *Quiſquis*, and other *Peruvian* Generals, had collected a very great Army in the ſouthern Provinces, and poſſeſſed themſelves of *Quito*, which obliged him to ſend out a conſiderable Detachment of his Forces, under the Command of *Sebaſtian Belalcazar*, to reinforce the new Colony at *St. Michael*'s, and to make Head againſt the *Peruvian* Generals in *Quito*.

This Meaſure was taken with great Wiſdom and Prudence; and the Commander laſt mentioned, upon his Arrival at *St. Michael*'s, found there a great Reinforcement of Volunteers, who came from different Parts of the *Spaniſh* Settlements, in order to obtain a Share in the Riches of *Peru*. Out of theſe he choſe one hundred and twenty Foot, and fourſcore Horſe; which having incorporated into his own Army, he marched directly to *Quito*, in order to make himſelf Maſter of the Riches of the deceaſed *Atabuallpa*, moſt of which he knew remained there. The *Indian* General, who commanded in that Province, did all that lay in his Power to harraſs and fatigue the *Spaniſh* Army, and to prevent their coming to a deciſive Action; but this turning to no Account, and finding that *Belalcazar* continued to advance directly to the Capital, he cauſed all the Riches of the late Emperor to be brought into the Hall of the Palace, to which he ſet fire; and then, abandoning the City, marched off with his Troops, and left the *Spaniards* in Poſſeſſion of the Place: But while *Francis Pizarro* and his Officers were thus employed in the Reduction of the ſeveral Provinces of the Empire, they were ſuddenly interrupted by an unexpected Invaſion from their Countrymen in *Mexico*, who, on the Report of the vaſt Wealth obtained by theſe Adventurers, reſolved to come in for a Part. The Story is too remarkable, and too cloſely connected with our Subject, to be intirely neglected, and therefore we ſhall endeavour to give the Subſtance of it in the conciſeſt manner poſſible.

The famous *Peter de Alverado*, of whom we have ſaid ſo much in the foregoing Section, was the Perſon who formed this Project, and the Condition he was in at that time gave him a fair Opportunity of putting it in Execution: He was poſſeſſed of the Province of *Guatimala*, where he fitted out ſeveral Ships, and, to increaſe his Force, he ſeized upon two Veſſels more that were actually fitting out in one of the Ports of *Nicaragua*, for the Service of *Pizarro*; and on board theſe Ships he embarked five hundred Horſe and Foot, as good Troops as any that were at that time in *America*; and with theſe, in the Year 1535, he landed at *Puerto Vejo*, after having endured very great Hardſhips in his Voyage. He found himſelf next obliged to traverſe a rough mountainous Country near the Equator, in which March, if all the *Spaniſh* Writers may be believed, he ſuffered ſtill greater Calamities, and loſt no leſs than ſixty of his Men, by the unexpected Severity of the cold Weather.

However, as he had been very long in the Service, and was accuſtomed to all Sorts of Difficulties and Dangers, he continued to proſecute his Deſign; and arriving in the Neighbourhood of the *Spaniſh* Colony of *St. Michael*, he there refreſhed his Forces, and diſpoſed every thing for continuing his Progreſs into the Heart of that Country; but, in the mean time, *Pizarro* had ſent *Almagro* to reinforce *Belalcazar*, and they had together a conſiderable Body of Troops, with whom they had performed ſome great Exploits againſt the *Indians*; but were now reſolved to act againſt *Alverado*, in caſe he continued obſtinately bent on the Proſecution of his Deſign, and would not return into his own Government. The two *Spaniſh* Armies advanced 'till they came in Sight of each other in the Valley of *Riobamba*, where it was expected a Battle would have enſued; but *Alverado* foreſeeing the Conſequences that muſt attend an Action, let Victory remain on which Side it would, willingly liſtened to a Negotiation, which very ſoon ended in an Agreement between him and *Almagro*, in the Management of which they ſhewed themſelves to be both very able Perſons; for they agreed, that two Treaties ſhould be drawn, one of which only was to be made publick, whereby it was ſtipulated, that both Parties ſhould be at Liberty to proſecute the War againſt the *Indians*, and the Diſcovery of diſtant Countries, with like Freedom, by which *Alverado* ſeemed to carry his Point; and by which he really carried thus much, that he provided for ſuch of his People as deſired to remain in *Peru*, who were put upon the ſame Footing with the Forces of *Pizarro*.

But by the ſecret Treaty he agreed to return into his own Government, and to accept the Sum of one hundred thouſand Peſos in Gold, in conſideration of the Expences he had been at in fitting out his Fleet and Forces; and at the ſame Time he promiſed never to return to *Peru* ſo long as either *Pizarro* or *Almagro* lived: Theſe Treaties thus ſettled, they marched together towards *Cuzco*, the Capital of *Peru*, in order to confirm them with *Pizarro*, and to receive the Money from him. But when *Pizarro* was informed of this Tranſaction, he took a Reſolution of preventing *Alverado*'s Viſit, by going to meet him, becauſe he was a little doubtful whether the Sight of *Cuzco*, and the rich Country about it, might not revive the Ambition of his Competitor, and render him leſs willing to execute his Agreement, of which he very well knew the Value, and therefore highly approved it: But before he could accompliſh his Intention, there happened ſome other Events, which had like to have changed the Face of Affairs, and renewed both the general and civil War, which, however, by his Prudence and Generoſity he prevented.

18. We have before mentioned the generous Manner, in which one of the *Indian* Princes of the Royal Family refuſed to aſſume the ſovereign Dignity, becauſe of Right it belonged to Inca *Manco*; which Prince, notwithſtanding what had befallen *Atabuallpa*, reſolved to go to *Pizarro* to obtain the Ratification of that Treaty, which had been made with his Subjects by the *Spaniſh* Priſoners in the Manner before mentioned; in which he ſucceeded, and lived upon very good Terms with the General. *Quiſquis*, the *Indian* Commander, remained all this Time at the Head of a great Body of Forces, yet declared he was ready to lay down his Arms, and ſubmit, as ſoon as he knew of the Ratification of the Treaty before mentioned. While he waited for this, *Alverado* and *Almagro* came into his Neighbourhood with their Forces, and, knowing nothing of this Negotiation, prepared to attack him; the *Indian* General retired for ſome Time, in hopes they would receive contrary Orders; but when he perceived they continued to advance, he reſolved to venture upon a Battle, in which he was defeated, with great Loſs; which might have renewed the *Indian* War, if the reſt of the Chiefs of that Nation had not been partly ſo frighted by his loſing an Engagement, in which he was greatly ſuperior in Number, that they durſt undertake nothing, and partly ſatisfied from the Aſſurances given them by *Pizarro*, that this Accident ſhould not hinder their having the ſame Terms they were promiſed before.

The rich Booty obtained by this Victory might alſo have renewed the Diſputes amongſt the *Spaniſh* Generals, if *Francis Pizarro* had not reſolved to perform all that *Almagro* had promiſed immediately; and accordingly, leaving *Cuzco* to the Care of the Inca and his Brothers, he ſet out with a Party of Horſe and a Detachment of *Indians*, and arrived at the Valley of *Pacha Camac*, where he met with *Alverado* and *Almagro*; and to ingratiate himſelf with the former, gave him the Command of all the Troops while he remained there, commanding all the Officers to obey Don *Alverado*'s Orders, and acknowledge no other General while he continued in *Peru*; and was ſo much better than his Word, that he paid *Alverado* twenty thouſand Peſos more than he had ſtipulated for the Expences of his Journey, beſides a great Number of Turquoiſes, Emeralds, and Veſſels of Gold, for the General's particular Uſe; whereupon *Alverado* returned to *Mexico*, intirely ſatisfied with his Reception, and the Treaſures he had acquired, eſpecially when he ſaw all the Gentlemen that had accompanied him in his Enterprize well provided for.

This Matter being thus ſettled, *Pizarro*, leaving the Care of the Frontiers to *Almagro*, employed himſelf in building Towns and ſettling Colonies on the Sea Coaſts, particularly *Lima*, which is now the Capital of *Peru*, though this City was originally called the City of the Kings, becauſe the firſt Stone of it was laid upon the Feaſt of the Epiphany in the Year 1534, and was inhabited by *Spaniſh* Gentlemen, who had the *Indians* of the Neighbourhood aſſigned them to do their Drudgery, which they looked upon as a very great Hardſhip, and which was directly contrary to the Inſtructions ſent to the Governors of all the Provinces of the *Weſt-Indies*; though I do not believe, that this was agreeable to the Deſigns of the *Spaniſh* Court. After the General had built the City of *Lima* he advanced a little farther, in order to diſcover the Country effectually, while he laboured to do ſomething of the like kind nearer home. Then he marched ſouthward, and founded another fair City, which from the Place of his Birth he called *Truxillo*, aſſigning his *Spaniards* Lands and People, according to their ſeveral Conditions, as he had done before at *Lima*.

While *Pizarro* remained at his new City of *Truxillo*, Advice came from *Spain* that his Brother *Ferdinand* had, in a great meaſure, ſucceeded in his Negotiation at that Court; for whereas Don *Francis Pizarro* had petitioned his Imperial Majeſty to extend his Government 200 Leagues farther Southward, to grant him the Province of *Atabillios* in *Peru*, with the Revenus thereof, the perpetual Vaſſalage of 20,000 *Indians*, and the Title of Marquis; his Brother wrote Word, that the Emperor had conferred the Title of Marquis of that Province, and enlarged his Government conſiderably to the Southward; but as to the Command he deſired over the *Indians*, he would inform himſelf of the Cuſtoms of that Country, and of what Damage or Prejudice ſuch a Conceſſion might prove, and then he would ſhew him all the Grace and Favour in that Particular that was conſiſtent with Juſtice. And as to *Almagro*, the Title of Marſhal of *Peru* was confirmed to him, and a Government of two hundred Leagues Extent of Country conferred on him, to the Southward of the Country aſſigned to the Marquis *Pizarro*.

Almagro reſiding at the City of *Cuzco* at this Time, and receiving Advice that the Government of the Country which lay South of the Marquis's Government was conferred on him; and obſerving that *Cuzco* was not within the Limits aſſigned to Don *Pizarro*, he immediately took upon him the Title of Governor of *Cuzco*, and the Diſtrict belonging to it, in his own Name, and no more acted in Subordination to the Marquis.

John and *Gonzalo Pizarro*, Brothers to the Marquis, oppoſed this Uſurpation, as they called it; and their Differences roſe to that Height, that they entered into War with *Almagro* at *Cuzco*, and ſeveral were killed on both Sides; of which the Marquis receiving Intelligence, cauſed himſelf to be carried in a Hammock on the Shoulders of *Indians*, who, relieving one another at proper Stages, carried him thither with ſuch Expedition, that he arrived at *Cuzco* before he was expected by either Side; and repreſenting to both Parties, that theſe Feuds would probably end in the Deſtruction of themſelves and their Enterprize, if they were not ſpeedily accommodated, he entered into a Treaty with *Almagro*, for adjuſting all their Differences; and firſt, he obſerved, that *Almagro* was miſtaken in his Opinion, that *Cuzco* was without the Limits of his Juriſdiction, for the Emperor had made him a new Grant of the Country which lay South of that conferred on him by the firſt Grant.

The Marquis alſo ſuggeſted to *Almagro*, that the Country which lay to the Southward of the Diſtrict of *Cuzco*, was richer in Gold and Silver than any that had been yet diſcovered, of which he was contented Don *Almagro* ſhould take the Government upon him, and that he ſhould march at the Head of the beſt Part of their united Forces, and poſſeſs himſelf of it; and, in the mean time, he would apply to the Emperor, to get him confirmed in the Government, to which they gave the Name of *New Toledo*, extending it from the Diſtrict of *Cuzco* to the Country of *Chili*, which lies South of *Peru*. The Marquis alſo ſtipulated, that if the Emperor did not think fit to confer that Government on *Almagro*, he would divide that of *Peru* with him, with which Overture Don *Almagro* and his Party were then well ſatisfied, and immediately made Preparations for an Expedition to the Southward.

About the ſame time another Detachment of *Spaniards* and *Indians* were ſent to reinforce Don *Belalcazar* in *Quito*, to enable him to finiſh the Conqueſt of that Province; and a third Body marched to the North-Eaſt, to reduce ſome Provinces bordering on the Ridge of Mountains called the *Andes*; thus the *Spaniards* ſhewed very plainly what their Deſigns were, and how far it was from their Intentions to perform the Agreement they had made with the *Indians*; yet they endeavoured ſtill to keep fair with theſe People, and to amuſe them with Promiſes, that they might make uſe of their Aſſiſtance in the Performance of ſuch Enterprizes, as very far ſurpaſſed the Strength which they had in this Country.

13. It was in the Year 1535, that *Almagro* reſolved to carry into Execution the Project formed in concert with *Francis Pizarro* for penetrating into *Chili*; and for the facilitating ſo arduous an Enterprize, he demanded the Aſſiſtance of Inca *Manco*, who ſtill confiding in the *Spaniards*, notwithſtanding the Manner in which he had been treated, offered to do for him all that was in his Power: As a Proof of this, he appointed his Brother *Paullu*, with whoſe Character we have before acquainted the Reader, to accompany him in this Expedition, and joined with him the High Prieſt of the *Indians*, called in their Language *Villachumu*, from whence the *Spaniards* found the Word *Villahoma*, which is the Name we find him mentioned by in their Hiſtories. He added, under the Command of theſe Chiefs, 15,000 Men, in hopes, that by rendering them ſo notable a Service, he ſhould prevail upon the *Spaniards*, from Principles of Honour and Gratitude, to fulfil their Treaty towards him. *Almagro*, with this Body of Men, began his March Southwards, and marched as far as the Province called *Charcas*, which he found a very barren and inhoſpitable Country, and therefore ſlighted it, as not worth keeping; but it has ſince proved the moſt valuable of the *Spaniſh* Acquiſitions, ſince therein lies the famous Mountain of *Potoſi*, from whence more Silver has been brought into *Europe*, than from all the other Places in which Mines of that rich Metal had been before diſcovered.

In this Province the Adelantado *Almagro* was informed that there were two Paſſages into *Chili*, both of them attended with Difficulties, though directly oppoſite in their Nature; the one long and tedious, through a ſandy Deſert, where his People would be ſure to feel great Inconveniencies from Heat and Thirſt; the other much ſhorter, but expoſed to ſtill greater Inconveniencies in the Judgments of his Guides, ſince it lay through the Mountains, which were not only exceſſively ſteep and rugged, but covered likewiſe with Snow, which rendered them exceſſively cold and impaſſable, except at one Seaſon of the Year. *Almagro*, conſidering that this was the ſhorter Way, and the Cold, however ſharp, more ſupportable to *European* Conſtitutions than exceſſive Heat, reſolved to take this Route, notwithſtanding all that the *Indians* could ſay to diſſuade him from it. In their Paſſage they found the Cold ſo exceſſive, that it coſt the Lives of ten thouſand *Indians*, and one hundred and fifty *Spaniards*, excluſive of ſuch as eſcaped with the Loſs of their Fingers and Toes.

They likewiſe loſt all, or the greateſt Part of their Baggage, but at length they came down into the Plains, where ſuch of the Inhabitants as had formerly obeyed the Incas, ſubmitted to the *Spaniards*, out of reſpect to *Paullu* and the High Prieſt, but thoſe who had hitherto remained free, determined to continue ſo; and it was not till long after, and in conſequence of many bloody Wars, that they were reduced under the *Spaniſh* Yoke. But while *Almagro* was thus employed, all Things fell again into Confuſion in *Peru*.

Francis Pizarro, finding the Inca *Manco* a little impatient under the bad Uſage he had received, thought proper to deliver himſelf from his Remonſtrances, by ſhutting him up in Priſon, which was ſo far from frighting him into a tame Submiſſion, that it induced him to undertake what he was ſuſpected of before he was impriſoned. But as it was impoſſible for him to execute his Deſign of raiſing the whole *Indian* Nation, unleſs he was at liberty, he contrived a Method to get out of Priſon, which was ſingular enough. He applied himſelf to *Ferdinand Pizarro*, now returned from *Spain*, a Perſon of great Generoſity, and who bore much Affection to the *Indians*, deſiring his Leave to go to a ſolemn Feaſt, and promiſing to bring him, at his Return, his Father's Statue, which was all of ſolid Gold.

In the mean time, the *Indians* that were with *Almagro* grew diſcontented at the ill Uſage they ſuffered, and complained to one another of the Barbarity of the *Spaniards*; and in theſe Conferences, none had a greater Share than the Interpreter *Philippillo*, who at laſt engaged in a Plot againſt *Almagro*'s Life; but, being no leſs a Coward than a Villain, when he reflected on the Danger to which he was expoſed, he endeavoured to ſecure himſelf by Flight. He was ſoon retaken, and then he attempted to inform againſt the Inca *Paullu*; but, being put to the Torture, he confeſſed that to be a Lie, and owned likewiſe, that by falſe Suggeſtions he had procured the Death of *Atahuallpa*, for all which he ſuffered a moſt cruel Death, as he well deſerved. In order, however, to underſtand this Matter clearly, it is very requiſite the Reader ſhould know the Nature of this Plot or Conſpiracy againſt the *Spaniards*, which, in Fact, was this: The Inca *Manco* had now not only loſt all Confidence in the *Spaniards*, but was likewiſe ſo ſenſible of the Injuries he received, and of the little Hopes there were of ever being better treated by theſe haughty People, that he determined to try what could be done by Force; and as he was ſatisfied that his Subjects were as brave and as faithful as the *Spaniards*, he judged it better to rely upon the Juſtice of his Cauſe, and the Aſſiſtance of his People, than upon the Promiſes of thoſe who had ſo baſely broke their Words to his Brother, and had never kept the Conditions they made with him.

His Feaſt, to which he went with the Leave of *Ferdinand Pizarro*, was in reality a kind of Aſſembly of the States of *Peru*, in which it was debated how the Strength of the whole Empire might be the ſooneſt raiſed, and the moſt effectually employed; this Queſtion was ſoon reſolved, for every one of the *Indian* Chiefs undertook to raiſe their Troops in an Inſtant, and indeed they were very ſoon as good as their Words, ſo that the Inca was able to take the Field at once, with three conſiderable Armies. He took the Caſtle of *Cuzco*, and cloſely blocked up the City with the firſt; the ſecond marched againſt the General *Francis Pizarro*, who lay in the

City of *Lima* with a good Body of Troops; and the third was intended to act againſt *Almagro*, of which Notice was ſent to the High Prieſt, who took Meaſures for making his Eſcape, in which he was ſo lucky as to ſucceed; and for his Concern in theſe, the *Spaniſh* Interpreter was put to Death.

The Inca *Paullu* had alſo Notice given him of the Situation his Brother's Affairs were in, and what was expected from him towards putting them in a better Condition; but he rejected theſe Propoſitions totally, and declared, that he would never break his Faith to the *Spaniards*; which Secret the Interpreter having diſcloſed with his laſt Breath, *Almagro* declared *Paullu* Emperor; and though he refuſed that Title before, yet, for the Sake of Safety, and that his Nation might not want a Protector, he now ſuffered it to be given him. Theſe Misfortunes engaged *Almagro* to haſten out of *Chili* with the *Spaniards* under his Command, notwithſtanding that he had received ſome Reinforcements; and this March was not performed without conſiderable Loſs, notwithſtanding he took the other Road, to avoid the Inconveniencies he had met with in entering this Country: But as in his firſt March he ſuffered by Cold, ſo in the ſecond his Army endured all the Miſeries of exceſſive Heat and Thirſt, notwithſtanding all the Pains and Precautions that could be taken to avoid them; but, however, their Loſs was not ſo great as before, and he returned into *Peru* with a better Army than was left in it.

20. The Affairs of that Country were now in a dreadful Situation, and grew daily worſe and worſe, a double Civil War breaking out in its Bowels. The Inca *Manco* ſtill continued to beſiege *Cuzco* with an Army of two hundred thouſand Men; the *Spaniards* in the Place were but ſeventy, yet having ſome Horſe, and a good Train of Artillery, they vigorouſly defended the Place, and, which is ſtill more wonderful, they made ſeveral Sallies, with great Succeſs, in one of which *John Pizarro* loſt his Life: As for the General, he ſent from *Lima* four ſeveral Detachments, amounting in the whole to near three hundred Horſe, under the Command of four experienced Generals, who were notwithſtanding ſo unlucky as to loſe themſelves, and their reſpective Parties, under their Orders. This not only troubled but weakened the Governor at *Lima* to ſuch a Degree, that he was obliged to call in all his Garriſons; and even then had been too weak to have done any thing conſiderable, if he had not declared all the *Indian* Vaſſals and Slaves free, who would ſerve the *Spadiards* againſt their Maſters and Countrymen, which had a very good Effect, and put him very ſoon in a Condition to raiſe both the Sieges of *Cuzco* and *Lima*; and this was the firſt Civil War wherein the Natives of *Peru* ſerved againſt each other.

It was followed by another between the *Spaniards*, who one would have thought ſhould have choſe any other Time rather than this to have quarrelled amongſt themſelves. But *Almagro* finding himſelf at the Head of ſo powerful a Body of Troops, reſolved to renew his old Claim to *Cuzco*; and, in caſe he could make himſelf Maſter of that City, determined to make it the Seat of his Government, and in this Diſpoſition marched directly towards it. The Inca *Manco*, about this Time, took a very ſurpriſing Step; for he reſolved to diſband his Army, and return to the Mountains. All his chief Officers endeavoured to diſſuade him, by repreſenting, that, as the *Spaniards* were quarrelling amongſt themſelves, he had now the faireſt Opportunity of recovering his Dominions; to which he anſwered, that while he kept the Field, the *Spaniards* would undoubtedly endeavour to compromiſe their Differences; but if he withdrew, as he deſigned and intended, what they ſuggeſted might very well come to paſs, and that then it would be time enough to think of proper Meaſures for renewing the War, to which they aſſented, and the *Indian* Armies accordingly diſperſed.

Almagro being arrived before the Walls of *Cuzco*, and finding the *Indians* drawn off, ſent a Summons to Don *Ferdinand Pizarro*, the *Spaniſh* Governor, to deliver up that Capital to him; but he anſwered, he held that City by a Commiſſion from the Marquis, and ſhould not deliver it up without his Orders, eſpecially as he knew it to be within the Limits of his Brother's Government, and immediately proceeded to put the Place in a Poſture of Defence; but Part of the Garriſon being Friends to *Almagro*, and holding a Correſpondence with him, introduced his Forces into the Town at Midnight; and *Ferdinand* and *Gonzalo Pizarro* were ſurprized in their Beds, and made Priſoners, by which *Almagro* became poſſeſſed of *Cuzco*, with little or no Bloodſhed, and moſt of the Troops which had ſerved the *Pizarro's* entered into his Pay. In the mean time, the Marquis *Pizarro*, hearing no News from his Brothers at *Cuzco*, and concluding all the Parties he had ſent thither to reinforce them had been cut off by the *Indians*, determined to ſend ſuch a Body of Troops thither as ſhould be able to force their Way againſt all the Oppoſition the *Indians* could make; and having aſſembled five hundred *Spaniſh* Horſe and Foot, gave the Command of them to Don *Alonſo de Alverado*, with Orders to march with all Expedition. *Peter de Lerma* was alſo ordered to march with his Detachment, as Captain of a Troop of Horſe, though he was an older Officer than *Alverado*, and had done great Service in thoſe Wars, which ſo diſguſted *de Lerma*, that from this Time he meditated the Ruin of the Enterprize.

Alverado continuing his March with the utmoſt Diligence, moſt of the *Indians* that were preſſed to carry his Baggage amounting to upwards of five Thouſand, periſhed in the firſt Part of the Journey by the intolerable Fatigue, being loaden and driven beyond their Strength, inſomuch that he was forced to halt till he could preſs ſome Thouſands more of the *Indians*, to ſupply the Places of thoſe he had loſt. *Almagro* receiving Intelligence at *Cuzco*, that Don *Alonſo Alverado* was advancing, ſent ſome *Spaniards* of Quality to him, to repreſent that *Cuzco* belonged to his Government, according to the Diviſion the Emperor had made of *Peru*, between him and the Marquis *Pizarro*; and therefore adviſed him to retire to *Lima* again, till he and the Marquis ſhould adjuſt the Limits of their Governments; but *Alverado*, not entertaining any ſuch Thoughts, made all the Gentlemen Priſoners who were ſent to treat with him; whereupon *Almagro* took the Field, conſtituting *Orgonez* his Lieutenant-General, and having made a Party of *Alverado*'s Horſe Priſoners, underſtood by them, that great Part of his Troops were better affected to him than they were to the *Pizarro's*, particularly *Peter de Lerma*, who, with a great many of his Friends, would deſert *Alverado* the firſt Opportunity.

He advanced therefore as far as the Bridge of *Abancay*, on the other Side whereof *Alverado* lay encamped; ſo that there was nothing but a ſmall River that parted their Forces: They remained quiet, however, without endeavouring to attack each other all Day; but in the Night *Orgonez*, fording the River at the Head of *Almagro*'s Horſe, put *Alverado*'s Forces into great Confuſion, and giving *Peter Lerma*, and the reſt of their Friends, by this means, an Opportunity to join them, *Almagro* gained an eaſy Victory, with very little Bloodſhed, making Don *Alonſo* his Priſoner, with whom he returned in Triumph to *Cuzco*, on the 20th of *July*, 1537. Some of the principal Commanders adviſed the Conqueror to ſecure his Peace for the future, by putting the *Pizarro's* to Death, and then march with his victorious Army againſt *Lima*, which, however, he refuſed to do; alledging, that it was a Shame for a Gentleman and a Soldier to put People to Death in cold Blood, and that by attacking *Francis Pizarro* in the City of *Lima*, he ſhould plainly become a Rebel to the Emperor; ſince he neither had, nor pretended to have, any Claim upon that Part of the Country: He held, however, that nothing could be more juſt or reaſonable, than that he ſhould march towards the Sea-ſide, to eſtabliſh there a Colony, that might maintain his Correſpondence with the other *Spaniſh* Settlements, that from them he might from time to time draw Recruits.

He began to move very ſoon from *Cuzco* towards the Coaſt, that he might execute his Deſign of ſecuring a Port before the Marquis could have any Intelligence, or, at leaſt, be able to collect a Force ſufficient to withſtand him. In this, however, he failed, though by an unforeſeen Accident; for the Marquis, not hearing from *Alonſo Alverado*, began to apprehend that the *Indians* had blocked him up in the Mountains; and, therefore, collecting his whole Force, which did not much exceed four hundred Men, he marched with them towards *Cuzco*; but on the Road he received full Intelligence of all that had happened, and that *Almagro* was in the Field, carrying with him his Brother *Ferdinand Pizarro* as his Priſoner, but that his other Brother, *Gonzalo*, was left with *Alverado* Priſoner at *Cuzco*.

This gave the Marquis great Uneaſineſs, becauſe of the ſmall Force he had with him; ſo that he plainly ſaw himſelf at the Mercy of his Enemy, who, by advancing to *Lima*, might have carried all before him: However, he behaved himſelf with great Prudence and Dexterity in this Time of Diſtreſs; for marching directly back to *Lima*, he began there to recruit his Forces; and in the mean time ſent Commiſſioners to amuſe *Almagro* with a Treaty, offering to compromiſe Matters with him, upon ſuch Terms as he ſhould think reaſonable; tho' this was done only to prevent his attacking him before he was prepared. In the mean time, *Gonzalo Pizarro* and *Alverado* made their Eſcape from *Cuzco*, with about one hundred *Spaniards* of their Party; and not long after a new Treaty was ſet on foot, in Appearance, for ſettling the Differences between theſe two great Generals; but, in reality, with a View to engage *Almagro* to ſet *Ferdinand Pizarro* at Liberty, which was become the more neceſſary, becauſe *Almagro*'s chief Officers preſſed him daily to put that Man to death. The Method taken by the Marquis to procure his Liberty was as ſingular as it was ſucceſsful.

He ſent to *Almagro*, to let him know that if he perſiſted in carrying Arms in that Country, which plainly belonged to him by the Emperor's Grant, he would find the other *Spaniſh* Settlements would conſider him as a Rebel; but that, if he meant no more than to obtain Juſtice to himſelf, and pay due Obedience to the Laws, he was content that Things ſhould remain as they were, till ſuch time as the Emperor ſhould decide them, and would likewiſe provide *Almagro* with a Ship, to carry his Agents wherever he thought fit, provided his Brother Don *Ferdinand* was immediately ſet at Liberty. *Almagro* readily accepted this Propoſal, and, to his own great Prejudice, reſtored Freedom to *Ferdinand Pizarro*; after which the Marquis did not ſhew himſelf very ready to comply with this Treaty; but, on the contrary, put his Brother at the Head of all his own Forces, joined to a great Succour he had a little before received from *Panama*, and the other *Spaniſh* Settlements.

21. *Almagro* ſaw too late the Error that he had committed, and how difficult a thing it would be to repair it: He gave Orders, however, for fortifying *Cuzco*, and taking all poſſible Precautions to cover himſelf from the ambitious Deſigns of the Marquis. In this he ſucceeded in ſome meaſure; for he got back to *Cuzco* before *Ferdinand* and *Gonzalo*, the Marquis's Brothers, could reach that City, with the Forces the Marquis intended ſhould beſiege it. But here again, the Cautions of *Almagro* proved fatal to him; for tho' he had it in his Power to have ſtarved and deſtroyed his Enemies in the Mountains, yet he neglected it, either from an Unwillingneſs to hurt his Countrymen, or from a Confidence in his own Force; neither was he leſs to blame, when thoſe Commanders, at the Head of ſeven hundred Horſe and Foot, inveſted the City of *Cuzco*; for, as the Place was ſtrong, and the Garriſon very numerous, he muſt have deſtroyed the Enemy, if he had contented himſelf with acting upon the defenſive; but this he ſcorned to do, as looking upon it beneath his former Actions, and therefore he marched out with all his Troops to the *Salinas*, or Salt Mines, with a full Reſolution to give the Enemy Battle, ſuppoſing that their Army had been new raiſed Men, and conſequently much inferior to his own, in point both of Courage and Diſcipline; but here once more he was miſtaken, the Enemy proving ſuperior to his Troops in all reſpects; for, firſt, they had the Advantage in Numbers; in the next place, they were better armed, being for the moſt part Muſketeers; whereas *Almagro*'s Men had only Croſs-bows and Swords; and laſtly, inſtead of being raw, new raiſed Soldiers, they were regular Troops that had ſerved in *Flanders*.

The Battle, however, was extremely bloody and obſtinate; but, in the End, *Almagro* was totally defeated, moſt of his Captains killed, and himſelf, who was ſo weak that he was carried into the Field in a Litter, obliged to take Shelter with a Handful of Men he had left in the Caſtle of *Cuzco*; which he could not keep long, but was obliged to ſurrender at Diſcretion, which he did the rather, becauſe he hoped that *Ferdinand Pizarro* would return the Kindneſs he had ſhewed him when ſo long a Priſoner in his Hands. In this too he was greatly miſtaken; for tho' he was upwards of ſeventy Years of Age, and withal very infirm, yet *Ferdinand Pizarro*, knowing his great Courage, and the many Friends he had in the Army, was exceſſively afraid of him, and therefore confined him cloſely, and ſuffered none of the Officers to viſit him.

He likewiſe took care to ſend away moſt of the other Priſoners to *Lima*, and diſpatched on different Expeditions ſuch of his own Officers as expreſſed any kind of Tenderneſs or Concern for *Almagro*. After he had remained Priſoner ſome Months in *Cuzco*, the Lawyers were employed to draw up Articles againſt the old General; the principal whereof were, That he had ſeized on *Cuzco* by Force; that he had entered into a ſecret Treaty with the Inca; that he had encroached on the Government granted to the Marquis, and fought two Battles with the Emperor's Forces under the Command of the Marquis, the one at the Bridge of *Aboncay*, and the other at the *Salinas*: And, his Enemies ſitting in Judgment on him, he was capitally convicted, and condemned to die, though he appealed to the Emperor, and applied in very moving Terms to *Ferdinand Pizarro* to ſave his Life: He bid him remember that he had ſpared his Life, and even refuſed to put to death any of his Relations, on account of the Friendſhip he bore him and the Marquis; that he would do well alſo to remember how inſtrumental he had been in enabling his Brother to make thoſe Conqueſts, and raiſing him to the Honours he poſſeſſed; deſired the *Pizarros* would conſider he was an old gouty Man, who could not live many Years, and ſuffer him therefore, after the innumerable Hardſhips he had ſuſtained, to die a natural Death. But they, looking upon their old Companion and Fellow-Soldier as the only Obſtacle to their Glory and Ambition, and believing by his Death they ſhould obtain the ſole Dominion of *Peru* without a Rival, were deaf to his Intreaties; and having ordered him to be ſtrangled privately in Priſon, they afterwards ordered his Head to be cut off on a Scaffold in the great Square of *Cuzco*.

His Body lay all Day expoſed, almoſt naked, on the Scaffold, his Friends not daring to bury him, leſt they ſhould incur the Diſpleaſure of the mercileſs *Ferdinand Pizarro*, and his Enemies not thinking it worth while to give themſelves any Trouble about his Funeral: But towards the Evening a poor Negro, who had been a Slave to the Deceaſed, brought a coarſe Sheet, and with the Help he had of ſome *Indians*, who had been Servants likewiſe to that General, wrapped up the Corpſe, and carried it to a Church, where the Friars buried it under the high Altar.

As the Deſign of this Work is to give the *Engliſh* Reader a full and fair View of the Tranſactions of theſe Conquerors in *America*, together with juſt Characters of thoſe Heroes who were at the Head of their Armies, it is requiſite to ſubjoin to this Account a true Picture of this unfortunate Commander: *James Almagro* was of low Stature, but well ſet and ſtrong; his Enemies ſaid he was of mean Parentage, which might be Matter of Fact, and yet it was more than they knew, or could know, ſince he was found in the Streets, and, being never owned by any body, went by the Name of the Town in which he was found. His Education was of a piece with his Birth; that is to ſay, we find it very uncertain what it was, or where he received it: He became a Soldier almoſt as ſoon as he became a Man, and his Behaviour was ſuch that he forced a Paſſage even to ſuperior Commands: He was truly brave, without valuing himſelf much upon it: He had a wonderful Preſence of Mind, ſo that no Danger could diſconcert him; he had ſo much Fortitude, that no Difficulties could diſcourage him. He was very kind to his Soldiers, liberal in Rewards, ſlow, and not ſevere, in Puniſhments; yet he maintained a very ſtrict Diſcipline, merely from the Force of his Example; for he was very exact in doing his own Duty; and, though he kept a good Table for his Officers, he fared himſelf as hard as any private Man in the Army; and when ſome ſpake of this as an Affectation, he ſaid Monks were preſcribed to by their Rules, ſick Men by their Phyſicians, and that his was the Diet of a Soldier. He was very loyal to his Prince, merciful to the *Spaniards*, generous in the higheſt Degree, and knew not what it was to frame a baſe Deſign; but, with all this, he was haughty and ambitious, very cruel at firſt to the *Indians*; but living ſome time with an *Indian* Woman, by whom he had his Son *James*, he grew firſt mild, and at laſt ſo kind to them, that they loved him better than any other *Spaniard*.

Ferdinand Pizarro, after his Death, went over to *Spain*, to juſtify it; but, though he corrupted moſt of the Miniſters, he had much ado to avoid paying for it with his Life; for *James Alverado*, who was Guardian to the young *Almagro*, proſecuted him ſo ſteadily, that it is thought he took him off by Poiſon, notwithſtanding which he ſuffered an Impriſonment of three and twenty Years, which afforded him Time for true Repentance.

22. The Death of *Almagro*, though covered with all the Appearances of Juſtice, was extremely reſented by the *Spaniards*; and, inſtead of extinguiſhing, as was expected, increaſed his Faction; which ſhews, that Cruelty, or even Severity, is far from being the beſt Remedy for civil Diſſentions, which it often irritates, and ſeldom cures: But this was not the only Miſchief that followed this Action. The Loſs of ſo able a Commander proved a great Prejudice to their Affairs, retarded their Diſcoveries, and gave a Check to their Conqueſts; and this, not only by hindering their Proceedings, and diverting them from compleating what he had begun, but by raiſing them up new Enemies. For thereupon the *Indians*, obſerving the Diviſions among the *Spaniſh* Generals, had recourſe to Arms again; and though the *Spaniards* in *Peru* amounted to two thouſand and upwards, they found it more difficult to maintain their Ground at this time, than at firſt, when not four hundred Men; for the Terror the *Indians* were under from the Fire-Arms and Horſes, which they had never ſeen before, was in a great meaſure worn off, and they had learned of the *Spaniards* how to ride and handle their Arms; and, having taken ſome Horſes, were not afraid to fight the *Spaniards* at their own Weapons, nor did there want Inſtances of ſome Parties being defeated by them; and had not the *Indian* Slaves and Vaſſals ſtuck cloſe to the *Spaniards*, diſcovered the Paſſes and Places of Strength, and from time to time brought them both Proviſions and Intelligence, probably *Pizarro* had been obliged to have abandoned his Conqueſts at laſt.

The moſt conſiderrble Acquiſition made after the Death of *Almagro*, was the Conqueſt of the *Charcas*, in which lay the invaluable Mines of *Potoſi*; whoſe Treaſures drew ſuch Multitudes of Adventurers thither, that the *Indians* of that Province were compelled at length to ſubmit, and become Slaves to the *Spaniards*. But they were not ſo ſucceſsful in *Chili*; that brave People diſputed the Ground with the *Spaniards* by Inches, nor could they ever make themſelves entirely Maſters of it. And even in the Province of *Los Charcas*, *Gonzalo Pizarro*, and his Forces, were ſo ſurrounded and diſtreſſed by the *Indians*, that the Marquis was forced to march in Perſon, with the Garriſon of *Cuzco*, to his Relief. The Conqueſt of *Los Charcas* being finiſhed, the Marquis founded the Town of *La Plata*, ſo named from the Silver Mines, and divided the City and the Country about it, with the *Indians* that inhabited it, amongſt the Conquerors: To his Brother *Ferdinand Pizarro*, who was then in *Spain*, he allotted a very large Share; and to his Brother *Gonzalo* another Part of the Country, in which, ſome time after, the Silver Mines of *Potoſi* were diſcovered. *Ferdinand Pizarro* alſo had a Share in theſe Mines, as a Citizen of *La Plata*. And a particular Part of it being aſſigned to his Officers, they diſcovered ſo rich a Vein, that 'tis ſaid they digged from it the fineſt Silver, without any Alloy.

This Diviſion of the Country was made in the Year 1538, and 1539; and now the Marquis found himſelf poſſeſſed of a Territory ſeven or eight hundred Leagues in Length, *viz.* from the Equinoctial to the South Part of *Los Charcas*, in which were more rich Mines than in all the World beſides; and yet was not his Ambition or Avarice ſatisfied, but in an extreme old Age he employed his Brother *Gonzalo* in the Conqueſt of other Nations. This Gentleman, who had all the Qualities of a great Commander, was at this time Governor of *Quito*; and the Method he took for Diſcovery, was to ſtrike off to the Eaſtward, that they might know ſomething of the Breadth of *America*; but his Endeavours were obſtructed by very great Difficulties, under which he had like to have periſhed; but one of his Captains, whoſe Name was *Oreallana*, by his Direction ſailed down the great River of the *Amazons*, quite to the Mouth of it, and from thence returned to the *Spaniſh* Settlements on the other Side of the Continent of *America*; which, conſidering the Time at which it was performed, muſt be acknowledged as great and ſurpriſing as any of the *Spaniſh* Enterprizes in the new World, and opened a Way to the Diſcovery of Countries as rich and valuable as any that had been yet found.

As for the Marquis *Pizarro*, after he had diſpatched his Brother *Ferdinand* to *Spain*, and employed his Brother *Gonzalo* in the manner before mentioned, he applied himſelf ſolely to ſecuring and eſtabliſhing his Authority; in order to which he thought it neceſſary to continue thoſe Severities which had been uſed againſt the Party of *Almagro*, and even to increaſe them; for he not only diſcharged many, and diſcouraged all the Officers that had been attached to the old Marſhal, but likewiſe reſtrained them from going home to *Spain* on any Pretence whatever; and at laſt, ſeeing them reduced to live upon the Alms of ſuch of their Countrymen as were more in his Favour, he reſolved to deprive them even of this pitiful Subſiſtance; and with this View he publiſhed an Edict, forbiding any to relieve them; which threw thoſe unhappy Perſons into Deſpair, and him into greater Danger from their Diſtreſs, than he could ever reaſonably have feared from their Power.

For after the Publication of this Edict they grew wild and deſperate; and ſeeing no End to their Miſeries, but by diſpatching themſelves or the Marquis, or by a general Inſurrection, they reſolved upon this laſt, and attempted it in this Manner:

The braveſt of the *Almagrians*, ſingly, or two or three at a time, reſorted privately to the capital City of *Lima*, where they did not want Friends, who concealed them in their Houſes, till they found they amounted to two or three hundred Men, all hardy Veterans, and ſeveral experienced Officers amongſt them, who reſolved to attack the Marquis as he went to the great Church on Midſummer-day, 1541; but he, having ſome Intelligence of the Deſign, did not go out of his Palace that Day; and the Conſpirators, upon this Diſappointment, had reſolved to wait for the Arrival of *Vaca de Caſtro*, whom they underſtood the Emperor had ſent over. But being informed that their Plot was diſcovered, and they were in Danger of being ſacrificed to the Fury of the Marquis, if they did not prevent it by ſome bold Attempt, twelve of them met at the Houſe of young *Almagro*, which ſtood on the Side of the great Square in *Lima*, on *Sunday* the 26th of *June*, at Noon, and, with their Swords drawn, marched croſs the Market-Place to the Palace of the Marquis, crying out "Long live the King, but let the Tyrant die." Nor were they oppoſed by any, though there were not leſs than a thouſand People aſſembled in the Square; nay, not a Man ſtirred to give the Marquis Intelligence of it; inſomuch that the Conſpirators found the Gates of the Palace, and all the Doors, open; and the firſt Notice the Marquis had of their Approach was by one of his Pages, after they had entered the Houſe;

whereupon he ordered ſome Doors to be ſhut, imagining he ſhould be able to defend himſelf till Aſſiſtance came in.

But *Francis de Chaves*, who was then with the Marquis, neglecting to faſten the Door, and believing it had been ſome ordinary Tumult, that would have been eaſily ſuppreſſed by his Preſence, went out, and, meeting the Conſpirators upon the great Stair-caſe, demanded the Reaſon of that Inſolence, which they anſwered only by ſeveral mortal Wounds they gave him; and ruſhing forward, the Servants, and all the Company that were with the Marquis, fled, except his Brother-in-law, *Don Francis de Alcantara*, and two of his Pages, who defended the Doorway of the Drawing-room, whither the Marquis was retired for ſome time. But at length, the Conſpirators broke through, and killed the Marquis and his Brother, and the two Pages, who behaved themſelves, however, very bravely, and deſperately wounded four of the *Almagrians* before they fell.

Then the Conſpirators went into the Market-place again, declared the Tyrant was dead, and proclaimed the young *Almagro* Governor of *Peru*; for all the *Almagrians* immediately aſſembled, when the twelve attacked the Marquis in his Palace, ſecuring his Guards, and preventing any Aſſiſtance coming to him. They alſo ſecured all the Horſes and Arms in the City, and commanded all the Inhabitants that refuſed to join, not to ſtir out of their Houſes without leave. They alſo plundered the Houſes of the Marquis, of his Brother *Francis de Alcantara*, of his Secretary *Pizarro*, and ſome other of the principal *Pizarriſts*, wherein they found an immenſe Treaſure. In the Marquis's Palace alone, 'tis ſaid they found to the Value of one Million of Crowns in Gold and Silver, but did not meddle with the Furniture, leaving it ſtanding, for the uſe of the young *Almagro*, whom they had carried thither, after they had proclaimed him their Governor. Thus fell Don *Francis Pizarro*, in the capital City of *Lima*, which he had founded ten or eleven Years before, and was privately buried by his Servants, by the young *Almagro*'s Permiſſion; no Perſon of any Figure daring at this Juncture to attend his Funeral, leſt it ſhould give Offence to the prevailing Party.

His Fate was very like that of his unfortunate Aſſociate, *Almagro*. He died a violent Death like him; like him was a Victim to Ambition; and like him went to the Grave in Obſcurity, after a Life of Splendor! The Marquis *Pizarro* was never married, but had ſeveral *Indian* Concubines, ſome of them Daughters and Siſters of the Incas. He was undoubtedly brave, prudent, endowed with public Spirit, and had almoſt all the Qualities that are thought neceſſary in a great Man, together with that eſſential Ingredient, a blind and boundleſs Ambition; which alone rendered him dangerous to others, and thereby made the Reſentment of others fatal to him: For few fall by the Sword who know how to forgive.

23. As ſoon as it was publicly known that the Marquis *Pizarro* was dead, *Lima*, *Cuzco*, and moſt of the principal Towns, declared for Don *Diego de Almagro*, the natural Son of old *Almagro*. Some Places, however, refuſed to acknowledge *Almagro*'s Authority, but expected the coming of *Vaca de Caſtro*, with the Emperor's Commiſſion, in which they were encouraged by *Pedro Holguin*, and ſeveral other Generals and Officers; who aſſembled a good Body of Troops, and took Poſſeſſion of *Cuzco* again, which they gave out they would hold for the Emperor, and declared War againſt *Almagro*. *Alonſo de Alverado* aſſembled another Body of Troops, between *Lima* and *Quito*, and declared alſo for the Emperor; and theſe two Generals preparing to unite their Forces, *Almagro* marched out of *Lima*, at the Head of ſix Hundred Horſe and Foot, towards *Cuzco*, with an Intent to retake the Place, or give Battle to *Pedro Holguin*, before he ſhould be joined by *Alonſo de Alverado*.

This new Governor *de Caſtro* was, in all Reſpects, a very ſingular Perſon. He was a Gentleman by Birth, and by Profeſſion a Laywer; but it is ſaid he made no great Figure in that Profeſſion, on account of the great Strictneſs of his Notions as to Juſtice, which would not allow him him to undertake any thing that was not perfectly right, or to take any Steps in favour even of a good Cauſe, which were not ſtrictly juſt, as well as legal. The Emperor, being informed of this Man's Abilities, reſolved, without conſulting his Miniſters, to make uſe of them in a Manner much ſuperior to their Owner's Expectations. I will free, ſaid he, the Bar from this ſtrange Fellow, and ſee what his Probity will be able to do in the *Indies*. He came without Money or Forces, but, by the Accident before-mentioned, found two Armies ready to receive him; upon which he went directly to *Lima*, where he cauſed himſelf to be proclaimed Governor of *Peru*; but ſuch a Governor *America* had never ſeen before. He ſhewed himſelf an abſolute Stoic; he threatened no body, he flattered no body; he acted like a Governor, but he lived like a private Perſon: He ſhewed no Reſpect to Perſons, nor made any Diſtinction between *Indians* and *Spaniards*.

The People were amazed at firſt, but in a few Weeks he was obeyed with that Submiſſion no Tyrant ever exacted, merely becauſe the People ſaw he meant nothing but their Good. He marched againſt young *Almagro*, in *September*, 1542, with a very powerful Army; upon which that young Gentleman ſent two Deputies, to treat of a Peace, and to propoſe various Things in his Name; ſeveral of his Officers writing to the Governor on his Behalf and their own, repreſenting that they had been always good Subjects, and were deſirous of continuing ſo; that they were driven into their preſent Condition by the Cruelties of the Marquis, and that they were willing to ſubmit upon reaſonable Conditions. The Governor would never talk upon the Subject; he ſaid he had all the Authority from the Emperor that Prince could give, that he had done no body any Hurt by virtue of that Authority; but had done, and would do, all the Good he could. He ſaid farther, that ſuch as obeyed him were the Emperor's good Subjects, to whom he would behave as their Governor; that for ſuch as acted otherwiſe, they were Rebels, who, in time, would find a Judge that would never depart from the Letter of the Law, but would puniſh as that directed him to do; for, though as a Man he was compaſſionate, yet, as an Officer of Juſtice, he knew not what Pity was.

The Report of the Governor's Conduct was far enough from giving Satisfaction to young *Almagro*, and thoſe about him; therefore Orders were ſent to his Deputies to make ſtill greater Offers, in caſe *Almagro* might be ſuffered to reſide at *Cuzco*, and to enjoy his Father's Government without Moleſtation, till the Emperor ſhould decide this great Controverſy, having already all the neceſſary Lights given him by the Agents on both Sides, by *James Alverado* and *Ferdinand Pizarro*, from whom News was ſuddenly expected, which might prevent the Effuſion of *Spaniſh* and Chriſtian Blood: But *Vaca de Caſtro*, inſtead of treating with *Almagro*, endeavoured to gain his Officers, and induce them to deſert him; which *Almagro* diſcovering, both Parties prepared for Battle, and drew up their Troops in the Vale of *Chupas*. Theſe little Armies were both compoſed of Veteran Officers and Soldiers. The Governor had the Advantage in point of Numbers, his Troops conſiſting of ſeven hundred *Spaniards*, beſides *Indians*, and *Almagro*'s of five hundred *Spaniards*; but then the latter had the Advantage of a Train of Artillery, and of good Ground, and would probably have gained the Victory, if all his Officers had been true to him; for his Artillery was ſo pointed, that the Enemy could not approach his Camp on any Side, without conſiderable Loſs. However, to his Amazement, when the Cannon were fired, they did no manner of Execution, and the Enemy advanced as if they had nothing to fear from the Artillery: Whereupon *Almagro* made up to *Pedro de Candia*, who commanded the great Guns, and, ſuſpecting Treachery, killed him with his own Hands, and levelling one of the Cannon himſelf, cut off a whole Rank of the Governor's Troops, putting the Army in Diſorder.

But the Enemy were now advanced too near his Train of Artillery to ſuffer from them, and his Men had quitted the Ground, where they were ſo advantageouſly drawn up to meet the Enemy, which occaſioned the Loſs of the Battle, though it was fought with great Obſtinacy, till two Hours within dark, when *Almagro*, finding his Troops overpowered, retired out of the Field with *Manco* Inca, and three or four *Spaniſh* Officers, intending to have taken Refuge in the Mountains with the Inca and his *Indians*, till he ſhould meet with a favourable Opportunity of recovering his Government; but taking *Cuzco* in his Way, with a Deſign of carrying off his Treaſure, and ſuch of his Effects as would have been moſt uſeful to him in his Exile, the very Men in whoſe Hands *Almagro* had put the Government of the City, hearing he had loſt the Battle, apprehended him, and delivered him up to the victorious Governor, to make their own Peace with him; and young *Almagro*, who was not much above twenty Years of Age, was formally tried, condemned, and executed in the ſame Place, and much in the ſame Manner, as his Father had been, and was afterwards buried by ſome Friars of the Convent of *Merced*, in the ſame Grave with his Father, having obtained a much greater Fame for his Humanity, Parts, and Education, tho' his Conduct and Experience in War could not be ſuppoſed equal to his Father's; and indeed it was unfortunate he was ſo young and unexperienced, and conſequently had ſo little Influence and Command of his Troops, every Officer almoſt imagining he merited the chief Command in the Army, and that *Almagro* was infinitely obliged to him for taking his Part, while others were contriving to purchaſe their own Peace by betraying their General. They had but very indifferent Succeſs, however, from the Practice of theſe baſe Meaſures; for the Governor proved as inexorable as he profeſſed himſelf; and as he gave no Quarter in the Field of Battle, ſo he did not think the taking off *Almagro*'s Head a ſufficient Atonement for his Rebellion and its Conſequences; but, on the contrary, cauſed ſuch as had been his principal Counſellors to be apprehended, tried, and put to death without Mercy, by which Means he totally extinguiſhed not only the Rebellion, but the Faction that had raiſed it.

Yet there was no Suſpicion that he mingled any thing of private Malice, or particular Reſentment, with his Zeal for the public Service; for he behaved very kindly to ſuch as had in due time returned to their Obedience; and tho' no Governor ever had a fairer Opportunity of raiſing his Fortune, by the vaſt Confiſcations made in his Time; yet ſuch was his Contempt for Money, that he took nothing; but contented himſelf with his own Appointments, and employed the Wealth he ſaved out of them, which was very great, for the Service of the Crown and the Good of the People. This had ſuch an Effect, that though Multitudes deplored the Fate of thoſe unhappy Men who died by his Sentences, yet they bore no Diſlike to him; but acknowledged, that what he did was the Effect of an honeſt Zeal, and not of any Cruelty in his Nature, and many of the Criminals profeſſed this to be their own Sentiments in their very laſt Moments: The only People who ſhewed any Diſcontent, were the Officers and Soldiers of *Pizarro*'s Party, who thought they were not enough conſidered, and told him as much; but he told them in return, That he did not come there to ſupport or reward any, but to extinguiſh all Parties; and that they ought to think themſelves happy, that, in Conſideration of their late good Behaviour, he forgot what was paſt, ſince they muſt be ſenſible, that he puniſhed in *Almagro*'s Partizans no other Crimes than thoſe of which themſelves had been guilty.

24. The Peace of the Province being reſtored by this ſtrict Diſtribution of Juſtice, the Governor *de Caſtro* diſbanded the beſt Part of his Troops, laid aſide all his Severity, and began to cultivate with the utmoſt Diligence the Arts of Peace: He cauſed the old Colonies to be better ſettled, and was mindful to have new ones planted: He took care to have the old Mines improved, and ſuch as were daily diſcovered, to be wrought, for the Benefit of his Maſter and the lawful Proprietors: He was very attentive to the Adminiſtration of Juſtice: He erected Colleges and Schools in all the Cities and great Towns. He obliged the Clergy to labour diligently in converting the *Indians*, relieved moſt of their Grievances, and in the Space of little more than a Year made ſuch Alterations as could ſcarce have been expected in fifty. He would have done ſtill more, but that the *Spaniſh* Miniſters, whom he neither courted nor bribed, prevailed upon the King to erect a kind of Royal Audience in *Peru*, and to give very great Powers to Commiſſioners who compoſed the Audience, who made it their Buſineſs to croſs the Governor in every thing; which begat new Diſturbances, both among the *Spaniards* and the *Indians*, and freſh Complaints to the Court of *Spain*, with which perhaps the Miniſters were not diſpleaſed, becauſe whenever they came, the Money came along with them. Whereas in the Governor *de Caſtro*'s Time, though the Emperor received large Sums from *Peru*, yet the Miniſters got nothing; and when Things went once wrong, they quickly grew worſe and worſe, and Matters were in Danger of falling once more into Confuſion.

The Emperor being informed of the Revolts in *Peru*, and the ill Uſage of the *Indians*, he diſplaced his Commiſſioners there, and choſe others, giving them an Oath to deal juſtly, and to order Things uprightly. He made forty Laws, and ſigned them at *Barcelona*, the 20th of *November*, 1542; but thoſe Laws were ill taken in *Peru*. They were certainly well intended, and very agreeable to the Rules of natural Juſtice and Equity; but in the Situation Things were in, by no means expedient to be publiſhed in *Peru*, where Things grew daily more perplexed: Beſides, *Blaſco Nunez Vela*, who was appointed Viceroy in 1544, and who had Directions to ſee theſe Orders put in Execution, was a Man no way qualified for his Employment. On his Arrival he cauſed his Predeceſſor, who was a much wiſer Man than himſelf, to be impriſoned, and behaved in every reſpect ſo ſeverely that he gained no Friends, though he provoked many to become his Enemies. Three of the Judges, who ſhould have ſupported him, conſpired againſt him, and cauſed him to be impriſoned; while, in the mean time, *Gonzalo Pizarro* drew together Troops, and diſpoſed all Things for a Rebellion.

The Diſputes between the Judges and the Viceroy facilitated his Deſign; for tho' the latter quickly recovered his Liberty, and drew one of the Judges to his Party, yet the reſt of the Judges continued to act by their own Authority, and behaved ſo cruelly, and ſo tyrannically, that at length, perceiving they had no other Remedy, they were glad to admit *Gonzalo Pizarro* Governor of *Peru*, to ſend him a Commiſſion in the King's Name, and to receive him with all Demonſtrations of Reſpect into the City of *Lima*. The Viceroy returned into the Province of *Quito*, where he diſcovered, in his Adverſity, much greater Abilities, and many more Virtues, than in his Proſperity; and though his Forces were conſiderably inferior to thoſe of the Rebels, yet his own Intrepidity, joined to that loyal Diſpoſition which is natural to the *Spaniards*, enabled him to make a long Diſpute. At length, however, a deciſive Battle was fought between him and *Gonzalo Pizarro*, on the 19th of *January*, 1546; in which the Viceroy, being wounded and taken Priſoner, had his Head ſtruck off; for whoſe Death, though done by his own Command, *Pizarro* hypocritically wore Mourning. Henceforwards this Man behaved himſelf rather as a ſovereign Prince than a Governor, buſying himſelf in amaſſing Wealth, and in taking all the Precautions he could think of for ſecuring himſelf and his Aſſociates from the Effects of the Royal Reſentment, which without queſtion they had Reaſon to dread. In the mean time, the Emperor, juſtly alarmed at the Conſequences of thoſe Seditions, which threatened the Loſs of ſo conſiderable a Territory as that of *Peru*, came at length to a Reſolution of truſting rather to the Wiſdom of one Man, than to the Force of many.

This Man was the Licentiate *Peter de la Gaſca*, who had the Title of Preſident of the Royal Court of *Peru*, and a Commiſſion ſo ample, that, had it not been ſome way limited by his Inſtructions, he would, in Effect, have had Royal Authority: But to balance this, he had neither Men nor Money, the Court truſting altogether, though ſurely not very prudently, to his great Capacity. He was, in few Words, a Man of unſhaken Courage, deep Prudence, mild Behaviour, unblemiſhed Probity, and abſolutely diſintereſted; he was not afraid to go in a manner naked, againſt inſolent and victorious Rebels; and all the Reward he demanded for the Services he ſhould perform, was, that, having ſettled the Province in Peace, he might be at Liberty to depart into *Spain*. *Gaſca* arrived at *Nombre de Dios*, and carried himſelf mildly, ſaying, he came not to make War; but, according to his Profeſſion, to make Peace, and rebate the Rigour of the Laws that cauſed the War. From *Panama* he ſent the Emperor's Letters, and wrote himſelf to *Pizarro*, telling him, he was come to pardon all Offences, to draw him to Obedience, to give Satisfaction to his People, and if he refuſed this Grace, but not till then, to make War.

Pizarro was enraged at the Receipt of theſe Letters, and would not ſuffer the Perſon who brought them to ſit down, which the Gentleman took for a great Affront. *Pizarro* called for his Friends, to know what Anſwer to give to the Preſident's Letter. *Carvajal*, the chief Incendiary, was abſent, and therefore it was hoped he would accept of Grace; yet every Man delivering his Opinion, ſome adviſed to take and raze *Panama* and *Nombre de Dios*, that the Preſident might have no Places to receive his Men and Shipping; and they having all the Ships in the *South-Sea*, might keep *Peru* to themſelves, and then they doubted not but to make *New Spain* revolt too, or at leaſt they would rob all the Towns on the Sea Coaſt, and live by Spoil and Rapine; which indeed they might have done, having the General of the Sea true to them. At laſt *Pizarro* cunningly anſwered *Gaſca*'s Letter, by conſent of thirty of his Men, under their Hands, That they underſtood of his coming by *Hinojoſa*, General of the Sea, and the fair Shew of Good he pretended; but it was too late, after ſo many Murders, occaſioned by the Viceroy's Cruelty; perſuading him to return, to inform the Emperor that they would receive no Governor but *Pizarro*, and offering to ſend ſome Men of Quality into *Spain*, to make their Caſe known to the Emperor.

Carvajal returning, diverted *Pizarro* from all good Intentions, and would not ſuffer him to make any Acknowledgments to *Spain*; they ſent theſe Letters to *Gaſca*, and offered to give him a great Quantity of Money to return Home, and if he refuſed it, they wrote to the Admiral *Hinojoſa*, to apprehend him. Theſe Letters being brought to *Panama*, put *Gaſca* in Fear that he ſhould be killed, for they abſolutely refuſed to receive him in *Peru*. But *Gaſca* dealt ſo cunningly with *Hinojoſa*, that he brought him to ſubmit himſelf and Fleet, and become a true Servant to the Emperor. This was the Overthrow of *Pizarro*, and *Hinojoſa* was continued General, and none of his Captains diſplaced. *Gaſca* now prepared again for War, and furniſhed himſelf for his Journey to *Peru*; and before his Arrival ſent a Pardon to all the common Sort. In his Expedition he carried himſelf courteouſly and friendly. *Gaſca*'s Carriage, and the Submiſſion of the Ships, made a great Change among the Rebels, for happy was he that could appear for the Emperor. *Pizarro* was much grieved to hear of theſe Alterations; but like a courageous Captain ſent to all his Friends to come to him with their Forces, but moſt Part of them forſook him; and the Towns of *Lima*, *Cuzco*, and the reſt, took Part with the Emperor.

When *John de Caſta* came to *Pizarro* to *Arequipa*, they conſulted what to do, having four hundred and fifty Men and the whole Country againſt them: He reſolved to go to *Chili*, where never *Spaniard* had been; but he was followed by one *Centeno*, with a loyal Party for the Emperor, between whom was fought a cruel Battle *Pizarro*, gaining the Victory, loſt two hundred and twenty Men, and *Centeno* many more. *Centeno* fled, but the others, having ſo great a Loſs, did not follow him. *Pizarro*, upon the Victory, divided his Forces into ſeveral Parts. *Cepeda*, a principal Man on his Side, perſuaded him to make Conditions with *Gaſca*, which he would not do, but was angry at the Motion, and grew ſuſpicious of him; who out of pure Kindneſs had propoſed it. *Gaſca* came into *Peru* with two thouſand Men, where he heard of the Overthrow *Pizarro* had given *Centeno*; and his Men being ſickly, and finding the Corn green, and not to be eaten, they were much diſcouraged; but *Centeno* coming with the Remainder of his Forces put them in Heart, whereupon he went in Purſuit of *Pizarro*; but had great Trouble in paſſing the River *Apurrima*; but *Pizarro* being apprized of it, departed from *Cuzco* with one thouſand Soldiers. A little before this Donna *Maria Calderon* ſpeaking againſt the Tyranny of *Pizarro*, *Francis Calderon* entered her Chamber one Morning, and ſtrangled her in her Bed.

Now came their Armies in View of one another, every one taking Advantage of the Place. *Gaſca* delayed giving Battle, in hopes that moſt of *Pizarro*'s Men would leave him, but they did not; and he being forced by Snow, Cold, and Hunger, engaged in a general and bloody Action. *Cepeda*, who, as I ſaid, before adviſed to accept of Conditions, fled to *Gaſca*, which much diſheartened *Pizarro*'s Side; this Example, and others, that did the like, made moſt of them yield. *Pizarro* ſeeing it, choſe rather to ſubmit than fly, and yielded himſelf to *Villa Vicentia*, Serjeant-Major, who carried him to *Gaſca*. Never was ſuch a Battle fought, in which the Heads and chief Commanders were Doctors and Scholars. *Gaſca* ſent Forces to cut off thoſe that eſcaped in their Way to *Cuzco*, and to ſecure the Town. The Day following, being the 9th of *April* 1548, *Gaſca* committed the Cauſe of *Pizarro* and other Offenders to Judges, who condemned him and thirteen more to Death; whereof *Francis Carvajal* was one, and indeed the chief Promoter of all the Miſchief in theſe Parts; he was 84 Years of Age, and had been an Enſign in the Battle of *Ravenna*, had ſerved under the great Captain *Gonzalo Fernandez*, and was the moſt noted Soldier in the *Indies*, yet never eſteemed valiant or ſkilful; it was a Bye-word, as cruel as *Carvajal*, becauſe he had been the Executioner of four hundred *Spaniards*, *Pizarro* cauſed tò be put to Death after *Blaſco Nunez* came into *Peru*, carrying Blacks with him continually for that Purpoſe. *Pizarro* was never overthrown but in this Battle, though he had fought many. *Gaſca*'s Soldiers looked for a better Reward than was given them, though indeed they were well dealt with; yet they mutinied upon it, but were ſoon quieted again. *Gaſca* took a Courſe for the pacifying of the *Indians*, and reducing them to the Chriſtian Religion, as alſo for the peaceable Government of the Kingdom.

When *Gaſca* arrived at *Nombre de Dios* out of *Spain*, he brought not an hundred Men with him, nor had he any Money, but procured Credit; and at his going away paid all Debts, and carried with him to the Emperor almoſt two Millions, but for himſelf not a Penny; being the firſt Man, in Authority, that ever did the like; for Covetouſneſs was the Bane of all the *Spaniſh* Affairs till this Time. Indeed any Nation muſt be quickly ruined where the great Men aſpire to Authority, with no other View than to make themſelves rich. As for this celebrated Governor, when he had thoroughly ſettled Things in *Peru*, he prepared for his Return into *Spain*, and came to *Panama*, having much Wealth there, which he could not carry; but it happened that two Sons of *Rodrigo Conheras*, Governor of *Nicaragua*, with two hundred Soldiers, entered the Town and took that Treaſure, and as much more as they could get. One of the two Brothers put himſelf with his Wealth on board two or three Ships, the other followed *Gaſca*, thinking to rob and kill him, murdered many, and ſlew a Biſhop; becauſe he ſent to their Father in *Spain* an Account of their Villainies. They drew to them all factious and diſcontented People, that favoured the Party of *Pizarro*. *Gaſca* hearing of thoſe Diſorders returned with Speed, fought with and overcame them; one of the Brothers was drowned in paſſing a River; and he diſpatched Ships after the other, and took him and all his Wealth.

This proved a fortunate Affair to *Gaſca*, and got him great Honour: He embarked at *Nombre de Dios* for *Spain* in 1550, with much Wealth for others and Reputation to himſelf. His going, coming, and ſtaying, was little more than four Years. This Man compleated what *Vaca de Caſtro* had only begun, and left every thing in tolerable good Order; for which, upon his Return the Emperor gave him the rich Biſhoprick of *Placentia*, and ſent for him into *Germany*, that he might receive a clear and diſtinct Account of the State of his

Affairs in *America*. It is very remarkable, that theſe Governors, who did ſuch wonderful Things; and inſtead of enriching themſelves promoted the Welfare of the Crown, and provided for the Revenues of the People, were not Courtiers but Lawyers, not Men of great Nobility, not yet mere Adventurers, not the Creatures of any Miniſtry, or ſupported by any Miniſter, but owing their Preferment entirely to their Reputation, which made them known to the Emperor, their Maſter, and ſecured his Choice.

We ſhall here end our Account of the Diſcovery and Conqueſt of *Peru*, which has been ſo fully treated; that the Reader cannot but have a very clear Idea, as well of the Maxims, upon which the *Spaniſh* Court proceeded, as of the Characters of theſe great Men, by whom theſe Diſcoveries and Conqueſts were atchieved, and of the Troubles that were afterwards occaſioned by their exceſſive Ambition. But, as the Purſuit of this Method, with reſpect to the other Provinces of the *Spaniſh* Empire, in the new World, would ſwell this Work to too great an Extent; we ſhall content ourſelves with giving as conciſe an Account as is poſſible of the Times when, and the Perſons by whom, the reſt of the moſt conſiderable Diſcoveries and Conqueſts were made, without entering into any farther Particulars, that we may have the more Room to ſpeak of what other Nations have performed in thoſe Parts, and thereby render this Part of our Work as compleat as poſſible.

25. While *Hernan Cortes* was employed in reducing, under his Obedience, all the Provinces of the *Mexican* Empire, and while *Francis Pizarro* was occupied in *Peru*, there were other great Captains and experienced Seamen employed in the Diſcovery of ſeveral other Parts of *America*: As for Inſtance, *Sebaſtian Cabot*, a *Venetian* born, and who had been long in the Service of the Crown of *England*, entered about the Year 1526 into that of *Spain*; and the ſame Year ſailed up the great River of *Plate*, and diſcovered Part of the Country of *Paraguay*. The Year following *Francis de Montejo* ſettled and ſubdued the Country of *Jucatan*; and about the ſame Time, *John Bermudez* firſt ſaw one of thoſe Iſlands, which have ſince borne his Name, and make at preſent a Part of our Poſſeſſions in the *Weſt-Indies*. From the Year 1528 to 1533, various Diſcoveries were made by the Captains of *Francis Pizarro*, both on the Eaſt and Weſt Coaſts of *South America*; and within this Space it was, that *Peter Heredia* cauſed the Foundation to be laid of the City of *Carthagena*, to which he gave that Name from the Reſemblance it bore in its Situation to the City of *Carthagena* in *Old Spain*.

In 1535, *Peter de Mendoza* founded the Town of *Buenos Ayres*, on the River *Plata*, which City was twice abandoned, and twice rebuilt. At this time the famous *Hernan Cortes* made, in Perſon, an Expedition by Sea, to diſcover the Northern Coaſts of the Kingdom of *Mexico*, and was himſelf the firſt that took a View of *California*, which then, and long after, was eſteemed to be an Iſland. In 1537, the Province of new *New Granada* was entirely diſcovered: And in 1539, as if the Diſcoveries Northwards were to keep exact Pace with thoſe of the South, the great Kingdom of *Cibola* was firſt made known to the *Spaniards* by a *Franciſcan* Friar; which Diſcovery at firſt was very little regarded, but has been ſince found to be of as great Conſequence, or rather of greater, than any of the Diſcoveries on the Northern Continent in *America*. In 1540, one *Peter de Baldivia* made his Expedition into *Chili*, and reduced a great Part of that rich Country.

The very next Year, *John Cabrillo* a Native of *Portugal*, in the Service of *Spain*, diſcovered the moſt Northern Parts of *California*, and gave to a great Cape or Headland, in the Latitude of 44 Degrees, the Name of *Cape Mendocina*, in Honour of Don *Antonio de Mendoca*, at that time Viceroy of *New Spain*. In 1543, *Lewis de Alverado* diſcovered the great River of *Miſſiſſippi*, which he clearly deſcribed, though he did not give it any Name. In the Year 1545, the Mines of *Potoſi* were firſt opened; and in 1554, the *Spaniards* diſcovered thoſe of *St. Barbe* and *St. John*. In the Year 1574, *Juan Fernandez* diſcovered, in the *South-Sea*, the two Iſlands that have been ſince known by his Name, though in the old *Spaniſh* Maps there are four laid down, the other two being called the Iſlands of *St. Felix* and *St. Ambroſe*, lying ſomewhat more to the North than thoſe to which we generally give the Name of *Juan Fernandez*. In 1582, the *Spaniards* completed the Diſcovery of that great Country to which they have ſince given the Name of the Kingdom of *New Mexico*. In 1589, Don *Pedro Sermiento* made that famous Settlement in the Straits of *Magellan*, of which we have given ſo large an Account in our firſt Volume. In the Years 1638 and 1639, ſome *Spaniſh* Miſſionaries travelled through, and deſcribed moſt of the Countries that lie upon the great River of the *Amazons*; and conſidering the Report they made of the Fertility and Riches of thoſe Countries, it is ſurpriſing that the *Spaniards* did not make this Diſcovery turn to greater Account; but perhaps this may be aſcribed to their Want of People, at leaſt in proportion to ſuch a vaſt Extent of Country.

In 1675, ſome Miſſionaries diſcovered, in the Heart of *South America*, the Country of the *Moxas*, of which to this Day we have no farther Account than what thoſe Miſſionaries have given us. This Country lies in the Torrid Zone, from 10 to 15 Degrees of South Latitude; and it is believed that there are Mines of great Value therein, though hitherto it has been viſited only by the Prieſts, who have erected the ſame ſort of Sovereignty there which they poſſeſs in *Paraguay*.

26. In the Year 1701, *F. Euſebius Kino*, a Jeſuit, diſcovered that the Country of *California* was not an Iſland, as till that Time it had been ſuppoſed, but was ſeparated from the Continent of new *Mexico* only by a River, over which he paſſed without much Trouble. And thus we have given the Reader a ſhort Account of the *Spaniſh* Diſcoveries, in the Order of Time in which they were made, from their firſt Entry into the new World, down to our own Days; and if it appears that ſince their having eſtabliſhed ſo great and powerful an Empire in this Part of the Globe, they have diſcovered much leſs in proportion than when they firſt came thither, we muſt not attribute it either to their having abſolutely ſurveyed all Parts of thoſe two vaſt Continents, of which they are reputed Maſters, or that they have loſt that Thirſt after Gold and Silver with which they were ſo ſtrongly poſſeſſed in paſt Times: For the Truth is, that both in North and in South *America*, there are vaſt Tracts of Country of which they know very little; but then the Provinces of which they are at preſent in Poſſeſſion afford them ſuch certain Supplies of Gold and Silver, and at the ſame Time they find that the Preſervation of theſe Countries requires ſuch a Strength of People, that they are cautious of extending their Settlements for fear of leſſening their Security; and therefore the great Maxim of their Policy is to conceal the Notices they from time to time receive of new Mines, that they may not come to the Knowledge of Strangers, whoſe Neighbourhood they dread, and not without Reaſon; ſince if any hardy and induſtrious Nation ſhould ever fix themſelves effectually in any Part of either of theſe Continents, the *Spaniards* would ſoon feel what they ſo much fear, the Impoſſibility of keeping the Countries they poſſeſs at preſent. But it may not be amiſs before we conclude this Section, and part with the Subject, to give the Reader a general Notion of the Advantages derived to *Spain*, from the Conqueſts made by her Subjects in the two *America's*.

The common Opinion is, that his Catholic Majeſty poſſeſſes larger Dominions than any Prince in the World, and without doubt it is very well founded; for, with regard to *America*, the whole Coaſt from thirty-ſeven Degrees of North Latitude, to fifty-three Degrees of South, is on one Side entirely theirs; and on the other there are only the *Portugueze* Colonies in *Brazil*, with a few inconſiderable *French* and *Dutch* Settlements, but what belongs to them or to the Natives. In a Word, the *Spaniards* command in the South Seas the moſt extended Coaſt in the new World, that is, from Cape *St. Sebaſtian*, the moſt Northern Point of *California*, to the Straits of *Magellan*, at leaſt two thouſand Leagues, or between ſix and ſeven thouſand Miles: They likewiſe poſſeſs the largeſt and moſt valuable Iſlands, *viz. Cuba*, Part of *Hiſpaniola*, and *Porto Rico*.

It is an Opinion commonly received amongſt us, that the *Spaniſh Weſt Indies* are very unwholſome, but, like many other general Propoſitions, this may be ſaid to be true and falſe at the ſame time; a very conſiderable Part of *Mexico* and *Peru* are in the Torrid Zone, and yet, where they have the Advantage of a favourable Situation, are both healthy and pleaſant; but beſides theſe there are many fair Provinces in both the temperate Zones: Neither can the habitable World boaſt of more delightful Regions than there are in the Kingdom of *New Mexico* in the North, and about *Buenos Ayres* in the South, as the Reader will be told more particularly hereafter; the Truth is, that the Country about *Porto Bello* is extremely aguiſh and unwholſome, and ſo is part of the Sea Coaſt of *Chili*, by reaſon of the great Rains which fall there, and the want of Inhabitants. And from hence we form an Idea of the reſt, though very unjuſtly. Perhaps too, the Luxury of the *Spaniards*, and the Inactivity of their Lives, may contribute to ſhorten their Days, and thereby diſcredit the Places they inhabit; but as it is certain that the *Indians*, before their Arrival, lived to a good old Age, and many who are temperate do ſo ſtill, I ſay, all this conſidered, we may conclude, that if any active and induſtrious People were to ſettle in theſe Countries, they would not be very much incommoded by the Climate.

As to the Soil of the Countries in general, it is wonderfully rich and fruitful, producing Corn in abundance, and ſuch Paſtures as are no where elſe to be ſeen; Trees for Fruit, Beauty, and Uſe; Shrubs odoriferous, and of phyſical Virtues; Herbs and Roots, in plenty; and, in ſhort, every Thing that can be ſought for, either grows naturally or may with very little Pains be produced here. In the Boſom of the Earth all Sorts of Metals are found, eſpecially thoſe which Men value moſt, Silver and Gold; Springs and Rivulets are every where to be ſeen: And then, for the Conveniency of Navigation, there are the nobleſt Rivers which the World can boaſt; ſuch as the River of *Plate*, the *Amazons* River, and many others. If the *Spaniſh* Councils were turned for the Encouragement of Trade, there are in theſe Countries ſuch a vaſt Variety of valuable Commodities as might furniſh the People poſſeſſed of them with inexhauſtible Treaſures; for beſides Gold and Silver, of which prodigious Quantities are annually exported, both from *Mexico* and *Peru*, here are Emeralds, Pearls, and various other ſorts of Stones; not to ſpeak of Copper and other baſer Metals: Rich Drugs of all Kinds, Logwood, Santal, Redwood, and many other ſorts of Materials for dying: Tobacco, Ginger, Sweet-meats of all Kinds, with a vaſt Variety of luxurious Articles: And then, as to Things of more neceſſary Uſe, *Vigonia* Wool, the Hides from *Buenos Ayres*, Tortoiſe-ſhell, Indigo, and many more, might be enumerated. Neither is the Country deficient in Seaports, eſpecially in the *North-Seas*, where there are ſeveral ſafe and ſpacious Harbours, beſides good Roads, Bays, and Creeks. Yet theſe in the *South-Seas* are, in a great meaſure, wanting, and the *Spaniards*, not without Reaſon, eſteem it an Advantage, becauſe it makes it the eaſier for them to defend the Coaſt againſt Strangers; and in reſpect of one part of the Country trading with the other, this is no great Hindrance; becauſe they have a good Port for the carrying on of their *Eaſt-India* Trade, which is what they chiefly value on this Side. And if ever they ſhould increaſe their Shipping ſo as to make new Ports requiſite, Engineers would ſoon put them in a Way to improve the imperfect Efforts of Nature: But while they continue to act on the Maxims which they have hitherto purſued, they are not likely to think their Havens on the *South-Sea* too few. We ought now to ſpeak of the Number of Inhabitants, becauſe therein conſiſts the true Wealth and Strength of a Government: But we muſt ingenuouſly confeſs, that with any tolerable Accuracy it is not eaſy to ſettle it. The *Spaniſh* Writers are remarkably ſilent on this Head, and as to what others report on this Subject, it deſerves leſs Credit than any other Part of their Relations, becauſe it is impoſſible that what they aſſert ſhould conſiſt with their own Knowledge.

This however is certain, that the *Spaniſh America* is but thinly peopled if we conſider its Extent; and, on the other hand, it ſeems to be as certain, that it is much better peopled than we commonly imagine, of which I will give ſeveral apparent Proofs: Sir *Francis Drake* made his firſt Expedition in 1578, and with a very ſlender Force; acquired immenſe Riches, and did prodigious Damage to the *Spaniards*. In 1587, *Candiſh* did the like, in a Veſſel of One hundred and twenty Tons, though he had not in her above thirty Men; landing in ſeveral Places, and bringing away as much Riches as he could carry. Theſe Succeſſes eſtabliſhed an Opinion, that the *Spaniards* were very weak in theſe Parts, yet all the following Expeditions, which were undertaken with much greater Force, miſerably miſcarried; which induced that wiſe Princeſs, Queen *Elizabeth*, to reſtrain her Subjects from ſuch Attempts. This, however, did not diſcourage the *Dutch*, who in 1623, fitted out a grand Fleet for the *South-Seas*; it conſiſted of fifteen ſtout Ships, and there were three thouſand picked Men on board. They came happily into theſe Parts of the World, and made ſeveral Deſcents, but to no Purpoſe, being conſtantly repulſed, ſo that they returned with great Loſs and Shame. Our Countryman, *Gage*, perſuaded *Cromwell*, and indeed the *Engliſh* Nation, that the Conqueſt of the *Weſt-Indies* was a very practicable Deſign, but it did not prove ſo in the Event; for though we made ourſelves Maſters of *Jamaica*, yet whoever conſiders the mighty Force that *Penn* and *Venables* had, will rather wonder that much more was not done, than admire what they did; ſo that it ſeems to be a Thing out of diſpute, that it is not ſo much the Weakneſs of the *Spaniards* as the Weakneſs of their Councils, which has occaſioned their Loſſes in thoſe Parts. And, to ſay the Truth, we can ſcarce doubt of this, if we reflect that they have found a Way to make their *American* Colonies contribute to the Deſtruction of their Power at Sea. Though the ſame Cauſe is the great Source of ours, and is the only one that can create a naval Force to *France*.

But to returnt to the Point; *viz.* the Number of People in the *Spaniſh* Settlements: A certain Author has gueſſed, that there may be in the whole three Millions of *Spaniards*, Mulattoes, and Negroes; beſides which, there are certainly a much larger Number of *Indians*; for tho' it may be, and without doubt it is true, that the *Spaniards* practiſed intolerable Cruelties when they firſt arrived in theſe Parts, yet we are aſſured that this was done contrary to the expreſs Direction of their Catholic Majeſties, and that they have long ſince altered their Policy in this Reſpect, though many *Indian* Nations are ſtill their implacable Enemies, and ſo are likely to continue. When theſe Countries were firſt reduced, the ſettling many Eccleſiaſtics might be a very proper Meaſure, ſince it is certain they were, in thoſe Days, very zealous not only in converting, but in protecting the *Indians*; interpoſing on all Occaſions in their Favour; but as Times are altered ſince, they and their Meaſures ſhould have altered accordingly. Monaſteries and Nunneries, if they are not contrary to the Spirit of Chriſtianity, are at leaſt incompatible with that of ſettling Colonies, and ſo they have been found: Prieſts, generally ſpeaking, proceed upon narrow and ſelfiſh Views, and ſo do all religious Orders, particularly the *Jeſuits*, who therefore are the leaſt qualified for Miſſionaries, though deficient in no other Reſpect, as fully appears from their Conduct in *Paraguay*, where the Fathers have eſtabliſhed a much more regular Government than ſubſiſts any where elſe in *America*, and are able to raiſe a greater Number of regular Troops in a Week, than could be aſſembled by the Viceroy at *Peru* in a Year,

The Corruption and Tyranny which reigns among all the Officers who derive their Authority from the Crown, ſenſibly affects the State, ſince it not only ruins the Revenue, but diſcourages Induſtry, and extirpates Public Spirit. An unaccountable Fondneſs for Gold and Silver is another Prejudice to the *Spaniſh* Settlements; has pre-

vented

a

vented the Government from encouraging new Diſcoveries, and ſpread ſuch a ſordid Spirit through all its Subjects, as is viſibly productive of the worſt Effects; for tho' Mines may be moſt beneficial to the Sovereign, and to the Mother Country in the firſt Inſtance, yet, taking all Things together, they are leaſt ſo; of which the preſent State of *Spaniſh America* is the ſtrongeſt Proof.

27. We have now treated this Subject ſo fully and ſo clearly, that we hope the Reader has nothing farther to expect. We might indeed have confined ourſelves within narrower Limits, and have run through the Story of theſe great Events in fewer Pages; but then the Account muſt have been very ſuperficial, and inſtead of ſatisfying, it would only have raiſed the Curioſity of the ingenious Peruſer; whereas now we dare aſſure him that with reſpect to the Diſcovery and Conqueſt of *Mexico* and *Peru*, he has ſeen as good an Account as we were able to give him, after peruſing and comparing the beſt *Spaniſh* Writers; and we have always thought that it was our Duty to execute Things to the full, and not leave People under the Neceſſity of conſulting many other Books, in order to come at what they might juſtly expect from its Title to have found in this.

There are ſome ſpeculative People that have taken Pains to depreciate the Character of the Conquerors of the new World, by pretending that the Advantages derived to *Spain* by the Countries added by them to her Dominions, are ſcarce an Equivalent for the Miſchiefs ſhe has ſuſtained by the draining away ſuch incredible Multitudes as have tranſported themſelves to *America*, ſince thoſe Conqueſts were made; but, with their Leave, this does not ſo much concern the Conduct of thoſe Conquerors, as that of the *Spaniſh* Miniſtry, which we never took upon us to vindicate, and in which we ſhould moſt certainly have failed if we had: But the great Point which deſerves Notice, and which can alone enable our Readers to form a true Judgment of this Matter, is the Profits that might accrue to the Crown of *Spain* from theſe prodigious Acquiſitions, if ſhe had known how to have managed them with Skill and Prudence proportionable to that Wiſdom and Spirit which theſe brave and active Officers diſcovered in bringing ſuch extenſive, and ſuch valuable, Provinces under her Dominion.

In order to give them ſome Opportunity of doing this, it may not be amiſs to enquire, as far as it is in our Power to do, what theſe two great Empires of *Mexico* and *Peru* really produce; for when this is once known, we may very well judge who is in the Fault, and whether, in reſpect to the *Spaniſh* Nation, the boundleſs Ambition of thoſe Conquerors, or the ill Management of thoſe who have received the Benefits that have ariſen from theſe Conqueſts, deſerves the Blame.

To begin then with *Mexico*: The Eccleſiaſtical State of the Country at preſent conſiſts of an Archbiſhop, and eleven Suffragan Biſhops, whoſe Revenues, computed according to their own Returns of their Tenths, which we may be ſure do not exceed the Value of them, amount to one Million and a Half Sterling *per Annum*. It is farther computed, that their Revenues make about a Fourth of thoſe belonging to the Clergy, and that the Eſtates of the Eccleſiaſtics may be reckoned a Fourth of the Whole Province or Viceroyalty; according to which Computation the Total Revenues of *Mexico* may be taken at twenty-four Millions of our Money. But there is another Way of calculating the Wealth of *Mexico*, which I will preſent to the Reader, becauſe I am pretty confident he will find it nowhere elſe: There was brought into the King's Exchequer at *Mexico*, in the Year 1730, ſomewhat better than a Million of Marks of Silver. This was the King's Duty from the Mines, which ought to be one Fifth of the Metal taken out of them. It is true, moſt People think the King is pretty roundly cheated; but becauſe this does not appear to us, we will ſuppoſe he is honeſtly paid, and that this is a Fifth Part of what is dug out of the Mines; the Whole therefore muſt amount to five Millions of Marks (a Mark is equivalent to eight of our Ounces;) ſo that if we compute this Silver at five Shillings *per* Ounce, then the Inhabitants of *Mexico* receive annually from their Mines ten Millions in Money.

With reſpect to the Riches of *Peru*, we cannot give quite ſo diſtinct an Account; but, however, we will give the Reader the beſt Account we can; and firſt, as to the Mines of *Potoſi*, we have a clear Relation of them for fifty Years, that is, from their firſt Diſcovery, to the Year 1595: Within which Space they had produced forty-four Millions of our Money; but it is allowed, that ſince that time, they have ſunk very much in their Value, and it is no leſs certain that other very rich Mines have been ſince diſcovered. The Gold and precious Stones, brought from this Country and *Chili*, are of incredible Value; and, if we may truſt to the Accounts that are given us of the City of *St. Jago*, in the laſt mentioned Country, the Wealth of the Inhabitants is ſo great, or rather they have ſuch a Plenty of Gold, that almoſt all their Utenſils for common Kitchen Service, are made of that rich Metal. After all, if we had the cleareſt Accounts of the Produce of their ſeveral Mines, they would not go a great Way towards ſatisfying us as to the Advantages that *Spain* reaps from theſe Countries, inaſmuch as the *Spaniards* ſettled in *America* are known to have vaſt Hoards of Plate; ſend annually prodigious Sums in Silver to the *Eaſt-Indies*; and employ much larger Quantities in a Contraband Trade with the *Engliſh*, *French*, and *Dutch*. But we have a tolerable Account, after all theſe Deductions are made, of what is annually returned to Spain in Time of Peace; and therefore, upon this, we ſhall chiefly inſiſt: The Galleons bring home about three Millions in Gold, and the Flota one: In Silver, the ordinary Cargo of the Galleons is twenty Millions, and of the Flota ten: In precious Stones, ſuch as Pearls, Emeralds, Torquoiſes, &c. they export about half a Million; in other rich Commodities, ſuch as Cochineal, Indigo, Logwood, &c. about three Millions and an half; ſo that taking all theſe together, they bring home thirty-eight Millions, without reckoning what comes by regiſter Ships, and in a clandeſtine Way; which thoſe who are beſt acquainted with it, have eſtimated at twelve Millions more: Upon the whole therefore, keeping ourſelves within the ſtricteſt Bounds of Moderation, we may venture to aſſert that *Spain* draws now from ſeven to ten Millions Sterling from theſe Countries every Year, and muſt formerly have drawn much more.

If ſhe is able to keep very little of this, which is very poſitively ſaid, and I believe may be very true, it does not at all leſſen the Value of theſe Acquiſitions: She might keep every Penny of it if ſhe would, by ſetting up and encouraging proper Manufactures in her Dominions. As ſhe does not, it is become the common Intereſt of all the trading Countries in *Europe*, that ſhe ſhould be maintained in theſe rich Poſſeſſions, not for her Sake, but for their own; and indeed, as Things are now managed, ſhe waſtes her unhappy Subjects the *Indians*, and her ſtill more unhappy Negro Slaves, in digging Gold and Silver for other People. Such, according to the wiſe Diſpoſitions of Providence, are the Rewards of Induſtry, and the Puniſhments of Idleneſs, Luxury, and a People's want of Attention to their own Concerns.

But if a few wiſe and good Princes were to rule in *Spain*, the Caſe would very ſoon be altered; they would firſt make uſe of their Treaſures to erect Manufactures in their *European* Dominions, and next lay open this rich Trade to all their Subjects in thoſe Dominions. Such a Conduct would, in the Space of a few Years, change the Face of their Affairs entirely; and nothing could hinder their becoming again what they once were, the moſt formidable maritime Power in this Part of the World.

It would then appear what vaſt Advantages accrued from the Diſcoveries and Conqueſts of *Columbus*, *Velaſquez*, *Balboa*, *Cortez*, *Pizarro*, *Almagro*, *Baldivia*, and all the other Heroes, that ſtand recorded in *Spaniſh* Hiſtories; Heroes, who, without doubt, merit all the Praiſes that have been beſtowed upon them; and who, with prodigious Labours, with infinite Hazards, and at the Expence of the Lives of many thouſands of brave Men, purchaſed thoſe Treaſures which have been waſted away in gratifying the Pride of Princes, the Luſts of Prieſts, and the innumerable Vices of a long Train of weak and wicked Miniſters. Happy would it be for all other Nations, if *Spain* alone was infamous for this kind of Extravagance and Madneſs! Happy for them, if, after following, they would grow wiſer by her Example! Happy for them, that ſhe is not yet ſenſible of her Faults!

The Miſtakes that have been made by the *Spaniards*, however ſtrange, however amazing, they may appear, when thus examined and pointed out upon Paper, are ſuch as any other Nation may be very eaſily betrayed into, when her Circumſtances become like thoſe of the *Spaniards*. All Colonies are a kind of political Children, and, as ſuch, contribute to the Honour, Safety, and Riches of their Parents, if thoſe Parents are not wanting to themſelves; it is, however, very common for Governments, as well as private Perſons, to fall into many great Errors upon this Head; ſuch as treating young Colonies with vaſt Tenderneſs and Indulgence, forming from thence very ſanguine, and ſometimes very unreaſonable Expectations; and, becauſe theſe are not anſwered as ſoon as expected, falling out with, and diſregarding, thoſe Colonies, at the very time when, if they had been attended to, they might have more than anſwered their Expectations. It is likewiſe common with them, as well as Parents, to grow unreaſonably, I was going to ſay ridiculouſly, jealous of their Off-ſpring; by this fooliſh Conduct, actually producing thoſe Miſchiefs they endeavoured to avoid, and which could have been produced only by ſuch Endeavours.

They are apt to fancy, that, becauſe theſe Children are ſettled at a Diſtance, they forget that they are Children; and, full of this idle Fancy, they ſoon forget that they are Parents, and begin to treat them with an arbitrary Authority; becauſe they live at a Diſtance, and ſupport themſelves by their own Labours, they make it their Study to draw from them wherewith to maintain the Luxury and Prodigality of thoſe Children who live at home with them, and are thereby become the Objects of an irregular Affection, which very ſoon degenerates into an exceſſive Indulgence. Hence ariſe all thoſe Miſchiefs that are ſo warmly deplored by thoſe, who, if they would act with proper Care and Spirit, might eaſily amend them; for it is with Colonies as it is with Children, nine times in ten their Errors ſpring from the Uſage they have met with; and they are blamed for their Miſcarriages by thoſe who are in reality the Authors of thoſe Miſcarriages, and ought therefore to blame themſelves.

An ancient and almoſt incurable Miſtake this has been; but it is nevertheleſs a Miſtake for all that, and a Miſtake which it imports every great and wiſe People to amend. A Nation that has great Colonies abroad can never want Trade, Riches, or maritime Power, unleſs ſhe is wanting to herſelf. A familiar Example will illuſtrate this, and that in ſuch a manner as muſt convince every Perſon of the Truth of this Remark. A Man who has a large Eſtate and no Children, muſt of neceſſity employ many Servants, of whoſe Fidelity he cannot be altogether, or at leaſt always, certain; and, with reſpect to a Nation, Subjects obtained by the Sword, that is, by Conqueſt, or Slaves purchaſed by Money, are in the Nature of Servants; but the natural Subjects of a State, by which I mean ſuch as have been born or bred up under its Laws, are, to all political Purpoſes, Children, let them live where they will; and, if due Care be taken of them, will diſcharge the Duties of Children. But if Parents, who are in this Condition, inſtead of ſeeking the Advantages they might attain from it, employ their Cares another way, and divert their Thoughts and their Affections from their Children to Servants and Strangers, it is no wonder that their Affairs go wrong.

Now this was preciſely the Caſe of the *Spaniards*: The Emperor *Charles* V. happened not to be born in *Spain*, and, which was ſtill more fatal to that Country, was choſen Emperor of *Germany*, which quite turned his Thoughts from *Spaniſh* Affairs; ſo that though he was as great a Captain, as able a Stateſman, and as wiſe a Monarch as ever ſat upon that Throne, yet, with all his Virtues and all his Abilities, he laid the Foundation of their Misfortunes, at the very Time when he thought he was laying the Ground-work of an uniwerſal Monarchy; and at a Time too, when, by attending cloſely to the Affairs of *Spain*, he might have made it a greater, happier, and more potent Nation, than ever the *Perſians*, *Greeks*, or *Romans* had been. His Son *Philip* heightened all theſe Misfortunes, though he purſued quite a different Conduct; but then he purſued it to the ſame End, that is to ſay, by affecting univerſal Monarchy he ruined his own.

He was generally, and very juſtly, reputed a Prince as well verſed in Politics as any of his Age, or perhaps of any other; yet he was ſo much taken up in endeavouring to reduce the *Netherlands*, enſlave *Italy*, conquer *England*, over-run *France*, and in annexing *Portugal* to his Dominions, that he never conſidered his Subjects in the *Spaniſh America*, farther than as they enabled him, by conſtant Supplies of Money, to carry on theſe his vaſt Deſigns. From what has been ſaid it is evident, that however wiſe, however penetrating, theſe Princes might be, they certainly over-ſhot themſelves in their Schemes concerning the *Weſtern Indies*. Inſtead of looking upon it as an Eſtate, they ſeemed to think it only a Farm, of which they were to make preſently what they could. In doing this, it muſt be owned they acted with Skill and Vigour; for they drew immenſe Sums from thence, which they waſted in *Europe*, to diſturb others, and, in the End, to deſtroy their own State. Mr. *Lewis Roberts*, Author of the *Map of Commerce*, an excellent Book for the Time in which it was written, tells, that it appeared by the Records in the Cuſtom-houſe of *Seville*, that in the Space of ſeventy-four Years, computing backwards from the Time in which he wrote, the Kings of *Spain* had drawn into that Country, from *America*, two hundred and fifty Millions of Gold, which make about ninety-one Millions Sterling. He alſo obſerves, that this very Prince, *Philip* II. of whom we have been ſpeaking, ſpent more in his Reign than all his Predeceſſors in the whole of their reſpective Reigns, tho' no leſs than ſixty-two Kings had reigned before him. Yet this cunning, this ambitious Monarch left his Subjects in a manner quite exhauſted; and, by eſtabliſhing a moſt pernicious Syſtem of Politics, left the total ruining of his Dominions, by way of Legacy, to his Succeſſors; a Point which, with wonderful Obſtinacy, they have ſteadily purſued ever ſince.

All who are in any degree acquainted with the Hiſtory of *Europe* know, that, for a long Courſe of Years, *Spain* maintained at once Wars in *Flanders*, *Germany*, *Italy*, and ſometimes in *Ireland*, which created a prodigious Expence of Treaſure and of Troops, neither of which, from the Death of *Charles* V. they were in any Condition to ſpare. As Families were reduced by the Expence of ſerving in the Army, they were induced to ſeek new Fortunes in the *Weſt-Indies*; and thus Numbers went over thither, not to cultivate the Country, or to improve Trade, but to ſtrip and plunder thoſe who went before them. Other great Families again concurred with the Meaſures of the Crown, in hopes of Vice-royalties, and other valuable Offices in its Conqueſts; but, if ever their Schemes were beneficial to their Families, which may admit of Doubt, certain it is, that they contributed more and more to the Ruin of the *Spaniſh* Nation. For though his Catholic Majeſty once poſſeſſed *Naples*, *Sicily*, *Sardinia*, *Milan*, with other Territories in *Italy*, beſides the *Low Countries*, and ſome other Provinces, which are now loſt; yet, for want of attending to Commerce, and by having no ſort of Oeconomy, all this turned to his Prejudice; and it plainly appeared, towards the Cloſe of the laſt Century, that, with all their boaſted Sagacity and Firmneſs, the *Spaniards* had ruined themſelves, by acquiring too great Power; and rendered themſelves Beggars, by abuſing their immenſe Riches: With ſwelling Titles, and wide Dominions, they were deſpicably weak, and ſcarce any but Copper Money was to be ſeen, in a Country which received above twenty Millions annually from its Plantations.

Before I quit this Topic I muſt take notice of another Thing, which is certainly very extraordinary. This wrong Turn in the *Spaniſh* Policy had a wonderful Effect: It made all the Enemies of that Nation rich, and all its

Friends poor. Every body knows that the *United Provinces* not only made themſelves free and independent, but rich and powerful alſo, by their long War with *Spain.* Our Maritime Power was owing to the ſame Cauſe. If *Philip* the IId. had not diſturbed Queen *Elizabeth*, our Fleet might have been as inconſiderable at the Cloſe of her Reign as it was at the Beginning, when we were peſtered with Pirates, even in the narrow Seas. Our Plantations abroad were chiefly owing to Expeditions againſt the *Spaniards.* Our Manufactures at home were the Conſequence of affording Refuge to the King of *Spain*'s Proteſtant Subjects. When Queen *Elizabeth*'s Succeſſor cloſed with *Spain*, he ſuffered by it; while *France*, the only Country then at War with *Spain*, was a Gainer. I ſay nothing of *Cromwell*'s Breach with *Spain*, and the Advantages he drew from it; becauſe the World ſeems well enough apprized of all I could ſay on that Subject already.

But I cannot help obſerving, that both the *Dutch* and we were at vaſt Expences after the Reſtoration, to preſerve the *Spaniſh Flanders*; while the *Spaniards* themſelves were inactive, and left all to be done by their Allies. As ſoon as the Tables were turned by the Acceſſion of King *Philip* V. the *French* became great Loſers by ſiding with this Nation, though they had always got by fighting againſt them; inſomuch, that all the true Patriots in *France* complained, that while *Lewis* XIV. ſhewed himſelf an excellent Parent, in his Family, he diſcharged but indifferently his Truſt, as the Father of his People; but to what End ſhould I look abroad, when it is plain, for our own Situation, that we were never Friends with her, but at our Coſt; and never Foes, but at her's. By ſo long a Series of Miſmanagement the *Spaniards* have brought their Affairs into ſo wretched a Situation, that they neither have, nor can have, any very great Benefit from their vaſt Dominions in *America.* They are ſaid to be Stewards for the reſt of *Europe*; their Galleons bring the Silver into *Spain*, but neither Wiſdom or Power can keep it there. It runs out as faſt as it comes in; nay, and faſter; inſomuch, that the little Canton of *Bern* is really richer, and has more Credit, than the King of *Spain*, notwithſtanding his *Indies.*

At firſt Sight this ſeems to be ſtrange and incredible; but, when we come to examine it, the Myſtery is by no means impenetrable. The Silver, and rich Commodities, which come from the *Indies*, come not for nothing (the King's Duties excepted); and very little of the Goods and Manufactures, for which they come, belong to the Subjects of the Crown of *Spain.* This ſhews how the Wealth of the *Spaniſh Indies* becomes the Property of other Nations; and how the Preſervation of their Dominions becomes as much the Concern of their Neighbours, as it is their own. It likewiſe ſhews how terribly they are hurt by the ambitious Schemes of their Court in *Europe*; and how every freſh War in *Italy* ſerves to weaken *Spain*, and exhauſt her Colonies; ſo that, in the End, ſome great Revolution will happen there, but of what Kind, it is not eaſy to foreſee; but certain it is, that the *Spaniſh* Power gradually declines, and many of their beſt Settlements are already ſunk to nothing.

As, for Inſtance, *Florida* is become a Burthen to them; they having nothing there of Conſequence but Fort *St. Auguſtine*, which they keep to cover the Paſſage of their Plate Fleets; the Iſland of *St. Domingo* is impoveriſhed to the laſt degree, and the City of that Name had been long enough ago left deſolate, if it was not for the general Tribunal of Juſtice held therein, which is its ſole Support: Yet the *French* have a large and flouriſhing Colony on the ſame Iſland; and if ever they ſhould, as 'tis more than probable they will, elbow out the *Spaniards* from thence, it will change the Face of Affairs in the *Weſt-Indies* extreamly. The Iſland of *Cuba* is no longer what it was; and, in ſhort, their Affairs decline ſo faſt, under their preſent Management, that, unleſs ſome timely Remedies are applied, the Ruin of their Colonies muſt follow very ſoon.

This is a Leſſon fit to be conſidered by other Nations; and it was for that Reaſon I have inſiſted upon it ſo much. It would, however, be no difficult Taſk to proceed ſtill farther, and to examine the Conſequences that may follow, in caſe the *Spaniards* ſhould either be deprived of their Iſlands in *America*, or ſhould abandon them, which I look upon as the more likely Event of the two: But I have already beſtowed too much Time upon this Subject, and I am ſenſible, that ſuch a Diſcourſe might appear too grave to ſome, and too chimerical to others; and therefore I ſhall not inſiſt upon it here: However, as I have Reaſon to hope, this Work will long outlive its Author, I flatter myſelf that, whenever the Event happens, Poſterity will take notice of my Conjecture; and it will be very happy for the *Britiſh* Nation, if right Meaſures are taken in Time to ſecure thoſe Advantages that may be derived from ſuch an Event; or, at leaſt, to avert thoſe Dangers to which our Colonies muſt be expoſed, if, whenever it happens, our Strength in the *Weſt-Indies* ſhould not be great enough to enable us to ſeize a conſiderable Share of what they forſake.

SECTION XVI.

A conciſe Hiſtory of the Diſcovery, Settlement, and Cultivation of Brazil *by the* Portugueze; *the Conqueſt of the greateſt Part of that Country by the* Dutch; *the Recovery thereof by the* Portugueze, *and the vaſt Advantages that have accrued to them of late Years from this noble Colony.*

1. *A ſhort Introduction, ſhewing the Nature, Neceſſity, and Importance of this Section.* 2. *The Diſcovery of this Country,* A. D. 1500, *by Don* Pedro Alvarez Cabral. 3. *The ſmall Advantages expected from* Brazil, *when firſt viſited by the* Portugueze. 4. *Some Account of its antient Inhabitants, and their Manners and Cuſtoms, from* Dutch *and* Portugueze *Writers.* 5. *The Methods taken to ſettle it firſt by* Europeans. 6. *The Eſtabliſhment of a regular Colony under a Governor General from the Crown of* Portugal. 7. *The Attempts made by the* French *to eſtabliſh themſelves in this Country, and the Manner in which they miſcarried.* 8. *Another Attempt of the ſame Nature, by the ſame Nation, attended with no better Succeſs.* 9. *The* Dutch *undertake, under Colour of their War againſt* Spain, *to make themſelves Maſters of* Brazil. 10. *Their wonderful Succeſs and the ſurpriſing Progreſs of their Arms in that Country.* 11. *The Endeavours uſed by the* Portugueze *to repel theſe Invaders, and to maintain themſelves in the Poſſeſſion of* Brazil. 12. *Count* Maurice *of* Naſſau *is ſent over by the States General and the* Dutch Weſt-India *Company, to take upon him the Government of their new Conqueſt.* 13. *His wiſe and prudent Adminiſtration, by which the beſt Part of that noble Country was ſecured for and ſettled on the Behalf of the* Dutch. 14. *Their Treaty with the* Portugueze; *they recal Count* Maurice, *and begin to act tyrannically in that Country.* 15. *The* Portugueze *again take up Arms, fall upon the* Dutch *in their Settlements, and after a long War drive them*

them entirely out of Brazil. 16. *The Hiſtory of this Colony continued from thence down to the preſent Times, with ſome curious Remarks on the Gold and Diamond Mines diſcover'd there.* 17. *Obſervations and Reflections upon the principal Events in the foregoing Section.*

1. IF we conſider the admirable Situation of this Country, its great Extent, and other Advantages derived from Nature, we might readily pronounce, that a Settlement there muſt be attended with almoſt all the Benefits that Men uſually ſeek or deſire in ſuch Eſtabliſhments; and though it be very true, that this Country was not only diſcovered and ſettled by the *Europeans*, near two hundred Years before any important Diſcovery was made of the rich Gold Mines which it contains, yet this only ſhews, that Judgments built upon Reaſon, and the natural Structure of this terraqueous Globe, are not only as ſound and certain, but even more ſo than ſuch as are grounded on Experience. If towards the Middle of the laſt Age, a Man of the greateſt Reading, and ſoundeſt Underſtanding, had declared, that there were Gold Mines in this Country, he would have been looked upon as an Enthuſiaſt, one of thoſe whom too much Learning had made almoſt mad; for it would have been ſaid, That after inhabiting this Country for near two Centuries, the *Europeans* would certainly have diſcovered ſuch Mines, if they had been there; but the Fact comes out quite otherwiſe: Thoſe Mines were there, and yet they were not diſcovered; and it ſeems to be a very high Reflection upon the boaſted Knowledge of Mankind, that, with reſpect to *Européans* as well as *Indians*, moſt of theſe valuable Diſcoveries have been made by Chance.

If thoſe Relations which are printed under the Name of *Americus Veſpucius* were really his, we muſt be obliged to own, that he pretended, amongſt other Things that he never performed, to the Diſcovery of this Country: but the Matter of Fact is, that all the Dates in theſe Pieces ſo manifeſtly give the Lye to the Matters contained in them, that the only way to ſave the Honour of this famous Man is, to deny that they are his: Some alledge, that the old Admiral, *Columbus*, gained ſome Knowledge of this Coaſt in the Year 1499, in his third Voyage; but, not to dwell upon Uncertainties, we will fix the Diſcovery to the ſucceeding Year, wherein we have the concurrent Authority of both *Spaniſh* and *Portugueze* Writers to ſupport us; and we ſhall next enter into a regular and ſuccinct Hiſtory of this Colony from that time to this, which is certainly a Thing not to be met with in our Language, or perhaps in any other.

2. Don *Pedro Alvarez Cabral*, a Man of Quality as well as of great Abilities, ſailed in the Month of *March*, 1500, with a Fleet of thirteen Veſſels of various Sizes, for *Sofala*; from whence he was to have continued his Courſe to the Coaſt of *Malabar*; but, after paſſing the *Cape de Verd* Iſlands, he ſtood ſo far out to Sea, in order to avoid the Calms, ſo common on the Coaſt of *Africa*, that on the 24th of *April*, he fell in with an unknown Coaſt on the Weſt, and as the Sea ran very high he was obliged to ſail along that Coaſt as far as the Latitude of 15 Degrees South, where he found a good Haven, to which he gave the Name of *Porto Seguro*, or the *Safe Port*, and the Country itſelf he called, *the Land of the Holy Ghoſt*, which Name was afterwards changed for that of *Brazil*, on account of its abounding with a kind of Wood of that Name, which had been ſo called in *Europe* about three Hundred Years before this Country was diſcovered. Don *Pedro* having ſent People on Shore, to examine this new Land, and they reporting that it was extreamly well watered, very fertile, full of Fruit-Trees, and inhabited by a mild and gentle People, he reſolved to land his Men there, in order to refreſh them.

He did ſo accordingly, and found it exactly agreeable to what his People had reported; and that the Savages were ſo far from offering any Inſult to the *Portugueſe*, that they received them with more Kindneſs and Goodwill than they had Reaſon to expect. It ſo fell out, that Don *Pedro* had with him ſome condemned Criminals, whoſe Sentence, by the Clemency of the King of *Portugal*, had been changed from Death to Tranſportation; of theſe he thought fit to leave two in the Country, to learn the Language, to make farther Diſcoveries, and to acquire the beſt Knowledge they could of the Land, and its Inhabitants; but believing, as he very well might, from the very firſt View of this Country, that the Diſcovery he had made was of very great Importance, he reſolved to loſe no Time in giving an Account thereof to his Maſter, and therefore diſpatched immediately one of his Veſſels back to *Liſbon* for this Purpoſe, with ſome Perſons on board upon whoſe Fidelity he could depend, together with one of the Savages of that Country, to be inſtructed in the *Portugueze* Language, to facilitate the perfect Knowledge of this new found Land. He likewiſe ſet up a Stone Croſs, as a Monument of his having been there, and of his having take Poſſeſſion of that Country in the Name, and on the Behalf, of his Majeſty the King of *Portugal*, a Thing at that Time the more neceſſary, becauſe of the Diſputes that were then ſubſiſting between the *Spaniards* and *Portugueze*, about their Diſcoveries.

It was in conſequence of this Account, that the King of *Portugal* ſent ſeveral Perſons to diſcover upon theſe Coaſts; who very ſoon found that this was Part of the Continent of *America*; upon which, as might have been very eaſily foreſeen, there aroſe great Diſputes between the two Crowns, about the Extent and Boundaries of this Country; but at laſt it was ſettled, that from the River of *Maranon* to the River of *Plate*, ſhould be yielded to the King of *Portugal*.

3. It cannot be ſuppoſed that theſe firſt Diſcoverers could form any diſtinct or juſt Notion of the Nature and Importance of ſo vaſt a Country, which, according to its preſent Boundaries, may be fairly reckoned two thouſand four hundred Miles from North to South: and two thouſand from Eaſt to Weſt; though the *Portugueze* have ſcarce penetrated five hundred Miles, any where, even to this Time. The Northern Parts of the Country lie near the Equator, are ſubject to great Rains and variable Winds, more eſpecially about the Months of *March* and *September*, when they are frequently diſturbed with moſt dreadful Hurricanes and Tempeſts, by which the Country is frequently under Water, and muſt conſequently be very unwholſome. Here, therefore, the *Portugueze* content themſelves with the bare Edge or Sea-coaſt, without endeavouring to penetrate deeper into the Country, deſiring only to maintain their preſent Poſſeſſions and thereby keep out Foreigners.

In the middle Part of *Brazil*, from the Latitude of five Degrees South to the Tropic, it is obſerved that the Winds and Seaſons are the Reverſe of thoſe in other Parts of the World within the ſame Latitudes; for whereas in them a dry Seaſon comes on when the Sun goes Northward, and the wet Seaſon begins when the Sun returns to the Southward; here the wet Seaſon begins in *April*, when the South-Eaſt Winds ſet in with violent Tornadoes, Thunder and Lightning; and in *September*, when the Wind ſhifts to Eaſt-north-eaſt it brings with it a clear Sky and fair Weather; and this is the Time of their Sugar Harveſt. There are but two Winds blow upon this Coaſt; *viz.* the South eaſt from *April* to *September*, and the North-eaſt from *September* to *April* again; but thirty or forty Leagues at Sea they meet with the conſtant Trade-wind, which blows in the *Atlantic* Ocean all the Year round, from the Eaſtward, with very little Variation. There is no Country, between the Tropics, where the Heats are more tolerable, or the Air more healthful than this, being conſtantly refreſhed with Breezes from the Sea, and abounding with Lakes and Rivers, which annually overflow their Banks; and in the inland Part of the Country, the Winds from the Mountains are ſtill cooler than thoſe that blow from the Ocean.

That Part of *Brazil* which lies ſtill more to the South, and without the Tropic of Capricorn, is one of the fineſt in the known World, in all Reſpects; but the *Portugueſe* Dominions are but narrow here, confining on the *Spaniſh* Territories on the River *la Plata*. We have taken this Opportunity of deſcribing the whole Country as it lies; but the Reader will eaſily conceive that it was ſubdued and planted by degrees, and that the Accounts tranſmitted from Time to Time to *Liſbon* were agreeable to the Alterations in the State of the Colony. It was from the Nature of theſe Reports, that Things at the beginning went on ſlowly. The firſt *Portugueſe* Inhabitants were ſenſible enough, that the Soil was fertile, the Air temperate, and the Country well watered; but alas! they could report no more. *Brazil* appeared to them no otherwiſe than as a pleaſant, fruitful, and well ſituated Country, capable indeed of furniſhing Abundance—but not of Gold and Silver—very fit for any Sort of Improvement; but deſtitute, as they ſuppoſed, of Mines.

Upon theſe Reports the Miniſtry did not indeed order it to be deſerted; but they tranſported wicked People thither, according, as from Time to Time their Crimes brought them under the Cenſure of the Law, which had two very bad Effects; for firſt it diſcredited the Colony in the Eyes of the *Portugueze* Nation; and next, it proved the means of corrupting the poor *Indians*, who were much more apt to catch the *Portugueze* Vices, from their Example, than to receive the Chriſtian Religion by their Teaching; and indeed in all Colonies, I am afraid the Lives of Chriſtians are ſuch as may be juſtly eſteemed the Source of untractable Infidelity among the *Indians*.

4. But, to apprehend this more thoroughly, we muſt have ſome Acquaintance with the Natives of *Brazil*, and their State and Condition at the Time of which we are ſpeaking. Theſe Savages differed very little in Stature or Complexion from the *Portugueze* themſelves, but they much exceeded them in the Strength, Robuſtneſs, and Vigour of their Bodies. The Manner of their Living, however, was barbarous enough; for they lived in the wide Plains, ſome in Villages, and others moving about, according to their Humours. Their Villages conſiſted only of three or four very large Houſes, not unlike our Barns, in which a whole Family or Tribe lived together, under the eldeſt Parent, in the State of Nature; but, however, we can ſay nothing as to the Extent of their Authority.

They made uſe of Fowling and Fiſhing for their Subſiſtence, aad made up the reſt of their Diet with the Fruits of the Earth; ſo that though they had not any luxurious Plenty, yet, in ſo fertile a Country, they could not ſuffer any great Degree of Want. But, what ſeems ſomewhat extraordinary, they were, notwithſtanding this ſeemingly frugal and temperate Way of Living, continually at war with each other; but for what Cauſes it is not eaſy to imagine; unleſs we ſhould admit what ſome old Writers affirm, that they made theſe Wars chiefly, that they might kill and eat each other, eſteeming human Fleſh the greateſt of Dainties. But perhaps the Teſtimonies of thoſe who own themſelves guilty of extirpating thouſands of theſe poor Creatures, to whom they could have no Quarrel worthy of rational Beings, ought not to be received, or at leaſt not received in its full Extent; for there is a certain Kind of Malignity in human Nature, which leads us to calumniate and miſrepreſent thoſe that we injure; as if by aggravating their Vices we could juſtify, or at leaſt excuſe, our own.

But, at the Bottom, this will be found a Doctrine equally falſe and abſurd, for we ought to reclaim bad Men, and not to murder them; and Experience ſhews us, that with regard to other *Indians*, who have been painted in as black Colours as the People of *Brazil*, they derived their Characters rather from the heated Imaginations of *European* Writers, than from any bad or brutal Conduct in them all. But let us deſcend a little into Particulars from ſuch Authorities as we have. The *Portugueze* and *Dutch* Writers give the Name of *Tapuyers* to the Natives which inhabit the North Part of *Brazil*, and the Name of *Tupinambies* or *Tupinamboys*, to thoſe who dwell in the South of *Brazil*; but divide theſe again into ſeveral petty Nations, differing in Language, but not much in Manners and Cuſtoms; and therefore, I ſhall only treat of them under the two firſt grand Diviſions of *Tapuyers* and *Tupinambies*.

The *Tapuyers* are Men of good Stature, and as they inhabit a hot Climate, almoſt under the Equator, are of a dark Copper Colour, their Hair black, and hanging over their Shoulders; but they ſuffer no Hair on their Bodies or Faces, and go almoſt naked; the Men only incloſing the Penis in a Caſe, as ſome other *Americans* do, and the Women concealing their Nudities with Leaves. The Men have alſo a Cap or Coronet of Feathers, but I don't perceive the Women have any Covering on their Heads. Their Ornaments are glittering Stones, hung upon their Lips or Noſtrils, and Bracelets of Feathers hung about their Arms; ſome of them paint their Bodies of all manner of Colours; whereas, others, rubbing their Bodies with Gums, ſtick beautiful Feathers upon them, which makes them look more like Fowls than human Creatures, at a Diſtance. The *Tupinambies*, who inhabit the South of *Brazil* are of a moderate Stature, and not of ſo dark a Complexion as their northern Neighbours, who lie nearer the Line; but neither the one or the other are ſo dark as the *Africans* are, who lie in the ſame Latitude, it having been more than once obſerved, that there were no Negroes in *America*, till they were tranſported thither by the *Spaniards* and *Portugueſe*.

The *Tupinambies*, however, reſemble the *Africans* in their flat Noſes, which are not natural, but made ſo in their Infancy; a flat Noſe being eſteemed a Beauty among them. They have alſo black curled Hair on their Heads, but ſuffer no Hair to grow on their Bodies and Faces, any more than the *Tapuyers*, and paint themſelves like the northern *Brazilians*. The general Food of the *Brazilians* was the Caſſavi or Mandioka Root dried to Powder, of which they make Cakes like our Sea Biſket. They carried this Flour with them alſo on Journies, and it ſerved them infuſed in Water both as Meat and Drink; but I don't find they had any Sort of Corn till the *Europeans* carried it thither. They uſed alſo to feed on other Roots, Fruits, and Herbs, and ſuch Veniſon as they could take in Hunting, as alſo on Fiſh and Fowl, if they lived near the Water; and with every Thing eat a great deal of Pepper. Some have added, that they were Cannibals, and eat human Fleſh from one End of *Brazil* to the other, but late Travellers obſerving no ſuch thing, little Credit can be allowed to this, for Reaſons already given.

The general Liquor the Natives drink is Spring-Water, of which 'tis ſaid they have the beſt and the greateſt Variety in the World; but there are other kind of Liquors, which have a very good Body, made of their Fruits, preſſed and infuſed; or of Honey; with which they ſometimes get very drunk, ſitting whole Days and Nights over their Cups. They are charged alſo with being a very lazy Generation, that will never work or hunt, but when Neceſſity compels them. And as to Arts and Sciences, they were ſcarce Maſters of any, unleſs the Art of Spinning and Weaving, and forming their Arms (which conſiſted of Bows, Arrows, Lances, and Darts) and the Art of Building, which was but mean; for their Houſes did not need any great Contrivance. As for Letters, Characters, and Arithmetic, they were perfectly ignorant of them. They had ſome Knowledge of the Virtues of ſeveral Herbs and Drugs, which they frequently adminiſtered with Succeſs to the Sick; but, a certain Writer relates, that when they deſpaired of recovering the Patient, all his Relations agreed to knock him on the Head, which they thought much better than a lingering Death, and this probably may be juſt as true as their devouring human Fleſh.

Hunting, Fiſhing, and Fowling, were rather their Buſineſs than Amuſements, being abſolutely neceſſary for the Support of their Families, in a Country where they had no tame Cattle or Corn. Drinking, Singing, and Dancing, were more properly their Diverſions; theſe they practiſed on their rejoicing Days, for a Victory, or the Birth of their Children. They are great Smoakers, and take the ſtrongeſt Tobacco. Their Pipes are a hollow Reed or Cane, the Bowl a large Nut-ſhell, that holds almoſt a Handful of Tobacco. They are a tractable and ingenious People, ready to learn any Art or Science the *Portugueze* will teach them; and take nothing ſo kindly of the Fathers as the inſtructing their Children, which has given the *Jeſuits* an Opportunity of making abundance of Converts; and thoſe who live under the *Portugueze* generally conform themſelves to their Cuſtoms in Eating, Drinking, Cloathing, *&c.* few of theſe go naked.

Such were, and ſuch are, the Natives of this famous Country, little addicted to Labour, becauſe not at all infected with Avarice; their Deſires but few, and thoſe eaſily gratified; their greateſt Vice, the Deſire of Revenge, and that eaſily raiſed. But let us now return to our Hiſtory, and the Steps by which the *Portugueze* Settlements in *Brazil* became ſo conſiderable as we now find them, in ſpite of the many Difficulties they had to ſtruggle with, particularly one, of which, though far from being the leaſt, I do not find any Notice has been taken; by which I mean the vaſt Diſproportion between the Mother Country and the Colony, the Country of *Brazil* being three hundred times as big as that of *Portugal*; I do not, however, intend by this, the Country ſhe has ſettled in *America*, but that whole Tract of Land to which ſhe lays claim, and which paſſes therefore in the Maps under the Name of *Brazil*.

5. To facilitate the new Eſtabliſhments made here, the Crown had firſt of all Recourſe to the making very extenſive Grants to ſuch as were inclined to go and ſettle there, or who had a Power of ſending others thither. Upon this Plan it was, that ſome of the richeſt and moſt powerful of the Nobility had Diſtricts given them equal in Extent to *Portugal* itſelf. This was for ſome time attended with little Inconveniency; for the Crown might very well give to others what was uſeleſs to herſelf, and what was to be improved and made uſeful, without her being at any Expence. In ſhort, there was little more reſerved than Quit-rents, and theſe too of no great Value; the State being content with the Sovereignty, and leaving the Property in a manner wholly to the Subject.

Theſe Methods were extremely neceſſary at that Time, when the *Eaſt-Indies* took up the whole Attention, not only of the Miniſters, but of the Nobility; who found means to repair their ſhattered Fortunes, by obtaining Governments in that Part of the World, where they ſoon acquired to themſelves vaſt Eſtates. Thoſe who were content to try their Fortune in this new Colony, found many Obſtacles in their way: The Natives had not, indeed, any Notions of Liberty; but, upon their firſt feeling of Slavery, they grew deſperate, and, if any Credit be due to the *Portugueze* Hiſtorians, killed and eat without Mercy every Chriſtian that fell in their Way.

But the Fertility of their Country made ſome Amends for theſe Inconveniences, and drew abundance of People from other Parts of *America* to ſettle there; where they erected a new kind of Government among themſelves, which, perhaps, ſprang, like moſt other Governments, from downright Neceſſity, the very Nature of which Neceſſity preſcribed the Form of their Conſtitution; in ſhort, every Maſter of a Family was a Planter and a Soldier. In the former of theſe Capacities he laid out as much Land as himſelf and his Family could cultivate; in the latter Profeſſion he was no leſs aſſiduous, performing his Functions duly and vigorouſly, becauſe in Defence of his own Property; and hence it was that every Diſtrict in the new Colony had the Title of a Captainſhip, which Title they ſtill retain, though the State of Things is abſolutely changed; and from being the braveſt and moſt martial, they are now become the moſt lazy, moſt luxurious, and moſt effeminate People in the World.

But in thoſe early Times, when Honeſty and hard Labour were the only ways of thriving, they grew apace; and in the Space of fifty Years they ſpread over a very large Space of Country, and erected abundance of good Towns, amongſt which the five principal were theſe, *Tamacara*, *Fernambuca*, *Ilheos*, *Porto Seguro*, and *St. Vincent*, each of which had a well peopled and a well cultivated Territory about it. The flouriſhing State of *Brazil* ſoon awakened the Attention of the Court, and the Crown began to repent of having been ſo liberal in its Grants, when it appeared that thoſe Grants were become ſo profitable: A thing common enough in all Countries as well as *Portugal*, though there are very few Countries in which Governments have acted with the ſame Spirit as that of *Portugal* did upon this Occaſion.

6. It was in the Reign of King *John* III. that theſe great Improvements were made, or, at leaſt, that the Crown became ſo ſenſible of them; and therefore the firſt Step that Monarch took, was to revoke all the Grants made to the original Proprietors, which he did in the Year 1549. The ſame Year he ſent over *Thomas de Souſa*, with the Title of Governor-General of *Brazil*; he carried with him abundance of Officers, Civil and Military, with a conſiderable Body of Soldiers, on board a Fleet of ſix Sail of Men of War: He carried over likewiſe ſix Fathers of the new Order of *Jeſuits*, to convert the *Indians*, and an intire new Plan of Power, adjuſted according to the Will and Views of the Court. He was alſo inſtructed to build a new Town in the Bay of *All Saints*, and to take the neceſſary Meaſures for ſecuring the Colony againſt its Enemies, and to do every thing that might increaſe either its Trade or its Reputation.

He arrived in the Month of *April* that Year, and began very ſoon to enter upon the Execution of what he was directed to perform, making War upon the Savages, building the Town of *St. Salvador*, and Monaſteries for his *Jeſuits*. What he could not finiſh, his Succeſſor *Edward Acoſta* ſaw compleated; ſo that in his Time the Number of Towns was doubled, together with the Inhabitants. He was obliged to think likewiſe of ſtrengthening theſe Towns, by raiſing better Fortifications than thoſe with which they had been till then ſurrounded; and this, becauſe other Nations began to think of ſettling in *America*, and ſharing with the *Spaniards* and *Portugueze* thoſe Advantages they ſaw derived to them from their Colonies.

He executed this Deſign with all the Precaution neceſſary, demoliſhing the old Fortifications of Earth as faſt as he was able, to raiſe ſtronger of Brick and Stone, and to furniſh them with Artillery, which, however requiſite for his Purpoſe, were furniſhed him but very ſlowly from *Portugal*. It was not long before the Expediency of this new Method of fortifying, which Reaſon had ſuggeſted, was juſtified by Experience, the *French* making more than one bold Attempt to diſturb the *Portugueze* in their Poſſeſſion of this Country.

7. It is a Piece of Hiſtory of which the bare reminding our Readers is ſufficient, that in the Reign of *Henry* the IId. of *France*, the Affairs of that Kingdom were in great Confuſion; the Diſputes between the *Catholics* and *Hugonots* being then at the greateſt Height, which threw the Natives of the Kingdom into Parties, and made Numbers of active and induſtrious People willing to leave their native Soil, and ſeek an eaſier and more contented State in diſtant Climates. Amongſt theſe there was one *Nicholas Durant*, Lord of *Villegagnon*, a Man of good Family, ſome Fortune, a Knight of *Malta*, and who had ſerved at Sea with very great Reputation, which ſo far entitled him to the Favour of the Government, that he was made Vice-Admiral of *Bretagne*. But though this Preferment was rather honourable than lucrative, yet it created him ſo much Envy, and he was ſo ill treated at *Nantes*, that he took a ſudden Reſolution to quit the Kingdom at all Events, and carry a Colony into ſome diſtant Part of the World. He had by Chance received ſome tolerable Accounts of *Brazil*, and, having weighed them attentively, he drew up a Scheme for fixing a Settlement in that Country, and a View of the Advantages that might be expected from it; both which he preſented to *Gaſpar de Colligny*, then Admiral of *France*; and demanded his Aſſiſtance, towards the fitting out a Squadron capable of making ſuch a Settlement as he intended.

The Admiral was a Man of great Abilities, and great Virtues; he was zealous for the Proteſtant Religion, and knew that the Sieur *de Villegagnon* was no very warm Catholic; he therefore very readily accepted of his Propoſal, and promiſed to give him all the Encouragement in his

Power. The more the Admiral converſed with this Gentleman, the better he was pleaſed with him; he found him brave and enterpriſing; a Man of ſound Senſe, eloquent, and a good Scholar; therefore he opened to him freely the Cauſe of his taking this Affair ſo much to heart; which was, the ſettling in a good Soil, and wholſome Air, a Proteſtant Colony: That, in caſe the Affairs of his Friends ſhould ever come to be totally ruined in *France*, they might have ſome Place to which they might repair, out of the Reach of their Enemies. The Sieur *de Villegagnon* very readily approved what his Patron deſired, and undertook the Execution of it. Upon which the Admiral repreſented Things ſo to the King, that three Veſſels of convenient Size were fitted out in the moſt effectual Manner, with a ſufficient Number of Seamen, as well as Adventurers, on board: And in the Month of *May*, 1555, this ſmall Squadron ſailed from *Havre de Grace* for *Brazil*, where, after a tedious and troubleſome Voyage, they arrived in *November*. At firſt they landed upon a Rock, which they found to be uninhabitable; and therefore, marching farther within Land, they fixed upon a very commodious Spot of Ground almoſt under the Tropic of *Capricorn*, where they erected a convenient Fortreſs for their Security, both againſt the Natives and the *Portugueze*, which they called *Fort Colligny*. When they were there fixed, the Sieur *de Villegagnon* ſent the Admiral a large Account of his Proceedings and Situation; he deſcribed to him both the Country and the Inhabitants; obſerved to him, that it was extremely practicable to maintain themſelves there, and to make it both an uſeful and a thriving Colony; but at the ſame time he remarked, that ſuch as were ſent over to him, muſt not expect the Delicacies of *Europe*; that they had no other Bread there but what was made of a certain Root ground to Powder, no Wine, much Fiſh, and ſome Veniſon; and that People who could live contentedly upon ſuch Proviſions would be welcome to him, and find a ſecure Retreat at his Fort in *Brazil*.

The Admiral, as ſoon as he had received this Letter, communicated it to the famous *John Calvin* of *Geneva*, who prevailed upon a Dozen of zealous Proteſtants of that City to engage in the Deſign of improving this new Settlement. One *Du Pont*, a Man of good Senſe and Character, was put at the Head of this Affair; and with him were joined two Miniſters, *Peter Richer*, who had been formerly a *Carmelite*, and *William Chartier*; very good Men, but withal great Zealots: They ſet out all together, from *Geneva*, in the Month of *September*, 1556; and went firſt of all to *Chatillon*, where they were very kindly received by the Admiral; and by his Aſſiſtance, joined to their own Intereſt, ſoon got together three hundred Men, who embarked at *Honfleur* on board three Veſſels well provided, about the Middle of *November* following. They arrived at *Fort Colligny* on the 7th of *March*, 1557, and were received with great Joy and Satisfaction; but it was not long that Things continued in this State; for the Sieur *de Villegagnon* and the Miniſter *Richer* fell out about Religion, and their Diſputes roſe ſo high, that the former drove the latter and all his Adherents out of the Colony; upon which they ſailed up the *Rio Janeiro*, and eſtabliſhed themſelves upon the Continent, where they continued about eight Months; and then, either through the Difficulty they found in ſubſiſting, or from their being weary of a Country which ſo little anſwered their Expectations, they returned home to *France*; where they did not fail to repreſent the Sieur *de Villegagnon* in the blackeſt Colours, as a Traitor and Apoſtate. This did his Buſineſs effectually with the Admiral, who, as he had no other View than ſerving the Proteſtant Cauſe by protecting this Eſtabliſhment, ſo when he found it would not anſwer that End, he gave himſelf no farther Concern about it.

The Sieur *de Villegagnon*, finding himſelf thus abandoned, loſt all Patience; and, taking the beſt Meaſures he could for the Security of the Colony in his Abſence, returned to *France*, where he publiſhed an Apology for his own Conduct, in which he painted out the Miniſters in a Light as bad as that in which they had placed him; and, finding this produced no Good, he retired to a Commandery of his own Order, and ſpent the Remainder of his Days in writing againſt the Proteſtants. The *Portugueze*, in the mean time, laid hold of this Opportunity to rid themſelves of their new Neighbours; and the very next Year, 1558, *Emanuel Sa*, then Governor of *Brazil*, cut off the *French* that were left behind, and demoliſhed their Fort. I have dwelt the longer upon this Story becauſe it is very inſtructive, and ſhews the Folly of attempting to raiſe Colonies upon any other than a national Intereſt. Before I quit this Point, there is one curious Circumſtance which I muſt relate, for the Information of the Reader: The *French*, during the ſhort time they were poſſeſſed of this Settlement, made a greater Progreſs in Trade, and eſtabliſhed a more friendly Correſpondence with the Natives, than the *Portugueze* had been able to do in about fifty Years; ſo that the Loſs of this Colony was a very great Diſadvantage to that Nation.

We muſt not, however, attribute this to better Conduct, or Superiority of Genius; for it was owing to neither, but the Effect of a very odd Accident: About twenty Years before, a Ship from *Normandy* had been loſt upon that Coaſt; ſome of the Men got aſhore, were well received by the Natives, married amongſt them, grew as much Savages as themſelves; and having perfectly learned their Language, without abſolutely forgetting their own, did the new Colony, in Quality of Interpreters, great Service; yet I do not find that they joined it, or laid hold of this Opportunity to return to *France*; which I the leſs wonder at, becauſe I have always obſerved that the *French* have a greater Propenſity to theſe ſort of Meaſures than any other Nation, and it is this that ſecures them ſo great an Intereſt with all the Savages bordering upon their Settlements in *North America*. But to return.

8. The *Portugueze*, after this, continued to enjoy their Settlements quietly, till the Year 1612, when they were again diſturbed by the *French*. It is true, that in this Space of Time there happened ſome Diſputes between them and the *Spaniards*, but thoſe were about Limits only, had no extraordinary Conſequences, and were quickly adjuſted; but in regard to the *French*, it fell out quite otherwiſe: One Capt. *Riffaut*, who had been cruizing on the *Spaniards*, happened to touch at the Iſland of *Maragnan*, on the Coaſt of *Brazil*, and there contracted ſo great an Intimacy with the *Indian* Chief of the Iſland, that he invited him to bring a ſufficient Number of his Countrymen to fix a Settlement there, aſſuring him, in the firſt place, that it would turn to a very good Account; and, in the next, that he would give him all the Aſſiſtance in his Power in Support of ſuch a Deſign. Which Offer the *French* Captain readily embraced, and promiſed to make uſe of all the Intereſt and Credit he had to carry this Scheme into Execution.

Accordingly, in the Year 1594, he found means to equip three Ships, and thoſe too ſo effectually, that there might have been juſt Grounds to have hoped ſome extraordinary Succeſs from the Expedition; but whether it be really an eaſier Matter to deal with Savages, than with thoſe who take themſelves to be the moſt civilized People in the World, ſo it was, that Captain *Riffaut* had three or four Mutinies to quell before he could reach his intended Iſland; upon the Coaſt of which, either by Accident, or by the Quarrels among his own People, the biggeſt of his three Ships ran aſhore and was loſt, which obliged him to return to *France* without doing any thing; but, however, ſome few of his People, and amongſt them one Mr. *de Vaux*, choſe to ſtay with the Savages, who made them very welcome. This young Gentleman was very briſk and active, liked the Climate, and continued there ſome time very well pleaſed. His Behaviour to the *Brazilians* was ſo engaging, and he proved uſeful to them in ſo many Reſpects, that they made the ſame Applications to him as the *Indian* Chief had formerly done to Captain *Riffaut*, which at laſt engaged him to think ſeriouſly upon the Subject; the Conſequence of which was, that he took the firſt Opportunity of going home, in order to bring about what his Friends ſeemed to deſire ſo earneſtly.

On his Arrival in *France*, he applied himſelf to King *Henry* IV. and endeavoured to perſuade him that vaſt Advantages would flow from ſuch an Eſtabliſhment. That Monarch, who had the Good of his Subjects at Heart, as much or more than any Prince that ever ſat upon his Throne, was very far from rejecting the Propoſal; but, not caring to riſk much on the Faith of a young Adventurer, he directed a ſmall Veſſel to be equipped; and gave Orders to a Perſon of great Merit and good Senſe, upon whoſe Report he could perfectly depend, whoſe Name was Monſieur *la Rivardier*, to go over with Mr. *Vaux*, which he accordingly did in the Spring of the Year 1604, and remained ſix Months in *Brazil*; where having informed himſelf of all Things neceſſary, he returned to *France*; from whence he made ſeveral Voyages back to *Brazil*, before the Government could come to any Reſolution on the Head of a Colony, becauſe the Propoſitions he made were ſuch as required conſiderable Expence; and he declared, if leſs were done, it would be thrown away.

At length, however, the Thing was reſolved upon, and Preparations were actually making for ſending a ſtrong Squadron thither, when the Murder of *Henry* IV. put a Stop to it, and all Things of the like Nature; however, Mr. *Rivardier* was ſo fond of the Place, and ſo much perſuaded that a Settlement there would turn to Account immediately, that he imbarked his whole private Fortune, and drew ſeveral of his Friends to do the like, in order to carry this Scheme into Execution. By this means he found a way to equip three ſtout Veſſels, and to engage about three hundred Men to go to *Brazil*; having obtained from the Queen Regent the neceſſary Powers for that Purpoſe; and, on the 19th of *March*, 1612, he embarked with them at *Cancale*, on the Coaſt of *Bretagne*.

A Storm, however, forced them into *Plymouth*, from which Port they ſailed again in *April*, and arrived, in *July* following, at the Iſland of *Maragnan*. There he began to erect a Fortreſs, on the Summit of a Hill, near the beſt Port in the Iſland, and between two fine Rivers which waſhed both Sides of the Mountain, and ran from thence into the Sea. Upon the Baſtions of this Fort they mounted twenty two pieces of Cannon; and every thing ſeemed to promiſe them all the Succeſs they could deſire; when, about two Years after their firſt Arrival, a ſtrong Squadron preſented itſelf before the Bay, ſent by Don *Jerom de Albuquerque*, the *Portugueſe* Governor of *Brazil*, who ſoon forced them to ſurrender; and, according to his Orders, the Place was inſtantly, and abſolutely, demoliſhed; which cured the *French* of all farther Thoughts of ſettling in that Country, or diſturbing its Inhabitants for the future.

9. The Crown of *Portugal* devolving on the Head of *Philip* II. King of *Spain*, in the Year 1581, he became thereby Poſſeſſor of *Brazil*; which he left to his Succeſſors, together with the War againſt the Inhabitants of the Seven United Provinces in the Low Countries, who had formed themſelves into a Republick, and ſhaken off their Dependance on the Crown of *Spain*. The Progreſs of this new Republic was ſo rapid, that, after forming an *Eaſt India* Company, which in a very ſhort Space of Time brought prodigious Advantages to its Proprietors, they, in 1624, proceeded to ſet up a *Weſt India* Company likewiſe, which proved fatal to the *Portugueſe* from its firſt Inſtitution. *James Willikens*, and the famous Sea Captain *L'Hermite*, were ſent to cruize upon the Coaſt of *Portugal*, where they took abundance of rich Prizes; and, upon their Return, it was determined to equip a new Squadron the very next Spring, in order to attack *Brazil*.

The *Dutch* were very well apprized of the State of that Country, and of the Small Reſiſtance they were likely to meet with in it. The Coaſts, which were no leſs than twelve hundred Leagues in Extent, were not like to be every where well fortified; the People, who had for ſo long a Tract of Years enjoyed a profound Peace, thoſe Attempts of the *French*, before-mentioned, only excepted, could ſcarce be thought martial; and almoſt all the great Families in *Portugal* having ſome of their younger Branches ſettled in that Country, they might very well hope to meet with vaſt Riches. And, beſides all this, the *Dutch* had taken great Care to carry on a kind of Smuggling Trade there, for ſeveral Years, by which they had many fair Opportunities of penetrating into the Secrets of the Country; and, having been ſo often received as Friends, the coming of their Veſſels upon the Coaſts was not like to create immediate Apprehenſions of an Enemy.

Such was the Situation of things when *James Willikens* entered the Bay of *All Saints*, with a Squadron under his Command; and began to ſhew, very clearly, what his Intentions were; which ſo frighted the *Portugueze*, that they immediately uſed all poſſible Methods to carry off, and ſecure, their Effects, inſtead of providing for their Defence. The *Dutch*, taking Advantage of their Conſternation, landed immediately; and their Admiral, without much Difficulty, made himſelf Maſter of the great City of *St. Salvador*, which was the Capital of *Brazil*. The *Portugueze* Governor, Don *Diego de Mendoca*, had neither the Courage to defend the Place, nor the Prudence to withdraw himſelf in Time; and his Behaviour, though very bad in itſelf, appeared ſo much the worſe, from the Conduct of another Perſon; who, though in like Circumſtances, ſhewed himſelf of a quite different Temper: This was the Archbiſhop *Michael Texeira*, of one of the beſt Families in *Portugal*, and in Years; who ſummoned all the Clergy and Monks about him; and, having repreſented to them the Neceſſity there was of laying aſide their clerical Capacities at ſuch a Juncture, prevailed upon them to take up Arms; and, though deſerted by the Governor, his Soldiers, and the Inhabitants, they made for ſome Time a very gallant Defence, and at laſt made a good Retreat to a neighbouring Town; where, after acting the Part of Soldiers ſo well, they turned Pioneers; and, under the Conduct of their Archbiſhop, fortified the Place, and gave the Enemy as much Trouble as if they had been the moſt regular Troops in the World; which Inſtance ſhews, at once, the Danger of having a Coward, and the Advantage of having any Man of Spirit, at the Head of a Colony, let the Force he commands be what it will.

But the *Dutch*, by the taking this Town, beſides acquiring an immenſe Booty, became Maſters of the largeſt and beſt peopled Diſtrict in the whole Country; ſo that it looked as if they were in a fair Way of making a compleat Conqueſt, in a very ſhort Space of Time, of the whole Colony; which it is very probable they would have done, if it had not been for the heroic Archbiſhop, who took upon himſelf the Quality of Captain General; which he ſaid came to him from Heaven, in the legible Characters of public Neceſſity; and every Man of Spirit in *Brazil* thought this Authority ſufficient.

As ſoon as the News of this Misfortune reached *Portugal*, it threw, not only the City of *Liſbon*, but the whole Kingdom, into Confuſion; and ſo much the greater, becauſe moſt of the Nobility ſuſpected that the *Spaniſh* Miniſtry were not diſpleaſed at an Event which might leſſen the Wealth and Power of their great Families, and abate ſomewhat of that high Spirit which they had hitherto ſhewn, ever ſince they fell under the Dominion of the *Spaniſh* Monarchs. This was, indeed, probable enough, for at that Time two thirds of the *Portugueze* Nobility had their Eſtates, or at leaſt the beſt Part of them, in *Brazil*; ſo that, by the Loſs of that Country, they muſt have been brought very low.

But, however, it very ſoon appeared, that this refined Notion had nothing in it of Truth; for King *Philip* IV. in whoſe Reign this fatal Affair happened, ſhewed himſelf as much concerned as any *Portugueze* Prince could have been, when he was informed of this Deſcent of the *Dutch*. He immediately ſent his Orders to *Portugal* for equipping a Fleet for the Recovery of *St. Salvador*; and, at the ſame Time, wrote a Letter, with his own Hand, to the Nobility, deſiring their Aſſiſtance on this Occaſion, and promiſing to ſend a ſtrong *Spaniſh* Squadron to join whatever Fleet they could fit out. This revived the Spirits of the Nation, and the *Portugueze* Lords exerted themſelves ſo effectually, that in three Months time they had a Fleet of twenty-ſix Sail, well equipped, and thoroughly manned, ready to put to Sea.

The *Spaniards* were not quite ſo haſty in their Preparations; but, however, in 1626, ſo early as the Month of *February*, their Fleet joined that of *Portugal*. The whole was commanded by Don *Frederic de Toledo Oſorio*, Marquis of *Valdueſa*, and there were on board it fifteen thouſand Men.

But it is now Time for us to look over to *Brazil*, where the *Dutch* being in Poſſeſſion of *St. Salvador*, and the Country about it, began to extend themſelves very raſhly on every Side, either from Contempt of the *Portugueze*, who had behaved ſo ill, or from an extravagant Thirſt of Plunder. The brave Archbiſhop ſoon convinced them of their Miſtake; he had now got together fifteen hundred Men, and with theſe he not only cut off moſt of their Parties, but at laſt fairly drove them into the Town, cut off their Proviſions, blocked them up, and reduced them to great Diſtreſs. As ſoon as he had done this, however, he put the Army under the Command firſt of *Nunez Marino*, and then of Don *Francis de Mauro*; for he declared, that his own Commiſſion expired with the Neceſſity that beſtowed it.

In theſe Circumſtances were Things in this Country, when the *Spaniſh* and *Portugueze* Fleet arrived in the Bay of *All Saints*. Don *Emanuel de Meneſſez* landed immediately four thouſand Men, and with theſe joined the Army before the Place, which, as we may eaſily apprehend, did not hold out long; though, to do the *Dutch* Governor Juſtice, he was inclined to defend it to the laſt Extremity; but the Garriſon, differing from him in Opinion, mutinied, and forced him to ſurrender on the 20th of *April*, upon which the *Spaniſh* and *Portugueze* Fleet returned triumphant, ſuppoſing the War to be an End; and that the *Dutch* like the *French* would have a care how they made Attempts again upon *Brazil*.

10. In this, however, they were greatly miſtaken, for the rich Plunder of *St. Salvador* being brought by Admiral *Willikens* into *Holland*, the People were continually enquiring whether there were not other great Cities in *Brazil*, and when they ſhould go and take them. This Spirit, which at that Time of Day did not at all diſpleaſe the Government, encouraged the *Weſt-India* Company to think of making another Expedition. Accordingly in 1629 they began to equip a very ſtrong Squadron for this Purpoſe, which was to be commanded by Admiral *Lonk*, and was to take a conſiderable Body of Land Troops on board under General *Wardenbourg*. This Fleet, which conſiſted of no leſs than forty-ſix Sail of Men of War, arrived in Sight of *Fernambuca* on the 3d of *February*, 1630; and on the 15th of the ſame Month General *Wardenbourg* landed with near three thouſand Men, and marched directly towards the City of *Olinda*. He found it covered by three good Forts, in each of which there was a numerous Garriſon. He attacked, however, and carried them all, but not without a vigorous Reſiſtance; but this Succeſs in taking theſe Forts, ſo effectually frighted the Inhabitants of the City, that they immediately ſubmitted, though the Natives ſhewed a great deal of Spirit, and behaved on this and every other Occaſion with great Courage and Fidelity.

I cannot loſe this Opportunity of making one Remark, which, however, has been made before by the ingenious Mr. *Salmon*; which is, that the *Poztugueze* have loſt nothing by the great Pains they have taken in converting the *Brazilians*, ſince by making them Chriſtians of their own Communion, they have made them good Subjects; and thereby added great Strength to their Colony, which has proved a means of ſecuring it againſt all Enemies; and one would think much might be done by ſome other Nations, if they would follow the ſame Method, inſtead of extirpating the *Indians* in the Countries where they are ſettled, or which is much the ſame thing, leaving them in a State of Infidelity, and allowing them to extirpate each other, which if they were Chriſtians they would not do, but join the *Europeans*, as they did here.

While the *Dutch* General was thus employed on Shore, the *Dutch* Admiral was no leſs active by Sea; and as the *Portugueze* had no naval Force to reſiſt him, or at leaſt none in Compariſon of that employed againſt them; it is no great Wonder, that they reduced all the Sea-coaſt to the South of *Olinda*, which they did in a very ſhort Space of Time, and likewiſe took care to ſecure and fortify every Place that fell into their Hands, being reſolved not to fall into the ſame Error which had been fatal to them before; but to obtain ſuch a Footing in the Country, as might enable them to keep their Ground againſt the whole Force of the *Portugueze*, and lay a ſolid Foundation for the Execution of the great Deſign they had formed, of making themſelves Maſters of the beſt Part of *Brazil*; which, it muſt be confeſſed was a very bold Undertaking, conſidering the *Portugueze* had been ſo long in Poſſeſſion of this Colony, and were become ſo numerous. It was with this View that Admiral *Lonk* reſolved to make himſelf Maſter, at all Events, of a very ſtrong Poſt, which ſeemed the fitteſt for his Purpoſe; and of which, therefore, it is neceſſary, that we ſhould give the Reader ſome Account. The whole Coaſt of *Brazil* is as it were guarded, or defended, by a long thick flat Ridge of Rocks, in ſome Places twenty, in others thirty Yards, broad: If it were not for Breaks and Paſſages here and there in this rocky Intrenchment, it would be impoſſible to approach the Shore. There is a very large Paſſage two Leagues to the North of *Olinda*; but almoſt before this City this Ridge of Rocks appears again, and the Inhabitants paſs to it in Boats at High-water, for at low the Rocks even in the Paſſage are viſible enough.

This Part of the Ridge the *Portugueze* call *Reciffo*, and the *Dutch Receif*. On the North Point was an open Paſſage for the Ships to approach the Shore, very narrow, and at Spring-Tide not above twenty-two Foot deep. Between this Ridge of Rocks and the Continent lay a ſandy Iſland, about a League in Length, which was called the *Sandy Receif*, to diſtinguiſh it from the ſtony. It lay in the Latitude of 8°. 20′. South, and had a good Caſtle, called *Fort St. George*, well furniſhed with Artillery, and eſteemed impregnable; this was the Place the *Dutch* Admiral ſought to make himſelf Maſter of, which he did; and it was in a great Meaſure the Cauſe of the City being taken. After the *Dutch* were poſſeſſed of it they made the Receif very ſtrong, and the chief Seat of their Commerce; ſo that it became one of the moſt conſiderable Places in *Brazil*, eſpecially after they had demoliſhed the City of *Olinda*, that they might not divide their Forces too much, as they muſt have done, if they had long endeavoured to keep it.

11. The News of this ſecond Attempt upon *Brazil* by the *Dutch*, and their having actually conquered the Captainſhip of *Fernambuca*, alarmed the *Portugueze* and *Spaniards* exceſſively, and obliged them to think of ſending thither immediately, ſuch a Force as might be able to drive out the Enemy, and ſecure the Country effectually for the future. It happened at a very bad Time for them, as the Diſaffection of the *Portugueze* to the *Spaniſh* Government was, at this Juncture, greater than ever; but the Neceſſity was ſo ſtrong, and ſo apparent, that, notwithſtanding the many Difficulties they had to ſtruggle with, and the Weakneſs of their Government, a Fleet and Army was ordered for this Service. But the equipping of the one, and the raiſing the other, took up a great deal of Time, which the *Dutch* employed in fortifying themſelves, in extending their Conqueſts, and taking all the neceſſary Precautions for the Defence of them, in which they proceeded with all that Induſtry and Vigilance, for which, in thoſe Days, their Nation was famous.

Before we proceed farther, it will be proper to take notice of thoſe Cauſes, which induced the *Dutch Weſt-India* Company to become ſo extremely ſanguine in their Endeavours to make themſelves Maſters of this Country; which I am the better able to aſſign, having ſeen a Copy of a Memorial, preſented by that Company to the States in the Year 1643, containing the very Reaſons in ſupport of their Conduct in this Particular. In the Beginning of this Memorial it is ſaid, that the Cauſes which can beſt juſtify launching into an extraordinary Expence, for acquiring any Place whatever, are reaſonable Views of immediate Profit, which ought to be very conſiderable; or future Proſpects of Gain, that ought to be ſtill more ſo; and both theſe they affirm, induced them to proſecute with ſo great Zeal the Conqueſt of *Brazil*. As to the former, they alledged three Things: Firſt, the Wholeſomeneſs of the Climate, the Pleaſantneſs and Fertility of the Country, which rendered it, of all others yet known, the fitteſt for receiving and maintaining a conſiderable Colony; they next take notice of its convenient Situation for Trade, as being in a manner at an equal Diſtance, or at leaſt in a more equal Diſtance than any other Country, from *Europe* and the *Indies*: And thirdly, they mention the rich Product of this Country in Sugars, as alone deſerving all the Expence they had been at about it, ſince they were better in Quality, made with much leſs Expence, and tranſported with far greater Eaſe from hence, to all Markets where this valuable Commodity could be ſold, than from any other Place. As to the ſecond Point, what might be hereafter expected from their being in Poſſeſſion of this Country, they likewiſe took notice of three ſeveral Heads: Firſt, they laid it down as a Thing evident, that the Poſſeſſion of *Brazil* was of equal Conſequence, in time of Peace and in time of War: In regard to the former, it would afford the Means of raiſing very large and very convenient Magazines, for the Supply of ſuch Ships as might either touch there in long Voyages, or be driven into their Ports, as very often happened from Diſtreſs of Weather. And as to the latter, it would afford greater Advantages in equipping, refitting, and ſheltering, either whole Squadrons of Men of War, or Privateers, than any other Place in the known World. They next alledged, that it was ſo placed as that not only their *Eaſt* and *Weſt India* Fleets might touch there very conveniently for Refreſhments; but that they muſt be obliged to put in there, and could not eaſily, or at leaſt not ſafely, proceed in ſuch diſtant Voyages without having ſuch Aſſiſtance. And laſtly, they ſuggeſted, that no Place in the World was ſo happily ſeated for commanding, at once, both the *Eaſt* and *Weſt India* Trades, and conſequently the whole Commerce of the Globe. It is true, that theſe Reaſons were given to the States ten Years after the Time of which we are now writing; but without doubt they had occurred to, and been conſidered by, the Directors of the *Weſt India* Company long before, which induced us to place them as we have done.

It is very probable, that either theſe Reaſons, or ſome of a like Nature, were laid before the States by the *Weſt India* Company about this time, ſince we find the utmoſt Readineſs expreſſed to aſſiſt and ſupport them. It was with this View, that, as ſoon as their Fleet returned from *Brazil*, Admiral *Pater* was ſent thither with a much ſtronger Force, in order to put the *Dutch* in a Condition to conquer that whole Country. He arrived in Sight of the Coaſt of *Fernambuca* on the firſt of *May*, 1631, where he found the City of *Olinda* in the Poſſeſſion of his Countrymen, but cloſely blocked up by the famous *Portugueze* General *Albuquerque*, with a numerous Army. The Admiral thought fit, thereupon, to land four hundred Men, under the Command of an experienced Officer, to take a View of the Enemy's Works, that he might be the better able to judge how to attack them. But the *Dutch* Garriſon in the City no ſooner ſaw his Fleet come to an Anchor, and theſe Troops debarked, than they made ſuch a vigorous Sally upon the Beſiegers, as forced them to retire from before the City with conſiderable Loſs. After this, Admiral *Pater* landed two thouſand Men; and, at the ſame time, acting upon the Sea Coaſt with his Fleet, enabled his Countrymen to extend their Conqueſts very conſiderably, eſpecially towards the South, having an Intention to enter the Bay of *All Saints*, and attack the City of *St. Salvador* by Land and Sea; but while he was thus executing great Things, and projecting greater, he had Intelligence that the *Spaniſh* and *Portugueze* Fleet was actually at Sea, and of a Strength ſufficient to undertake the Relief of *Brazil*.

This Fleet, which was commanded by Admiral *D'Oquendo*, had ſailed from *Spain* in a very indifferent Condition, though it conſiſted of about thirty Sail. At the *Canaries* it was joined by fifteen more, and in the Height of the *Cape de Verd* Iſlands met with ſuch an Acceſſion of Force, as rendered it fifty-four Sail of large Ships. The *Dutch* Admiral had but ſixteen, but he was jealous of the Honour of his Country, and therefore reſolved to fight at any rate. It was with this View, that he might render his Countrymen the greater Service, that he reſolved not to wait for, but to meet, the Enemy, which he accordingly did in the Latitude of ſix Degrees South. As ſoon as they appeared in Sight, and the *Dutch* Fleet ſaw how unequal the Diſpute was like to prove, ten of their Captains bore away, and left the Admiral with ſix Ships only, to fight an Enemy almoſt ten times his Strength. Admiral *Pater* had two Flags under him, who, to their immortal Honour, were two of thoſe who joined him; ſo that there were three Admirals to ſix Ships.

The Battle was long and bloody; abundance of the *Portugueze* were ſunk; and it plainly appeared, that if the other ten Ships had ſtaid, Victory would have declared for the ſmaller Number; but, at laſt, Admiral *Thys*, in the *Prince William*, was ſunk; and not long after, a *Portugueze* Man of War diſcharging a Broad-ſide at the *Dutch* Admiral, a Ball unluckily fell in the Powder-room, by which the Ship was blown up, and that brave Man loſt. The four *Dutch* Ships that remained, retired upon this, and did it with ſo much Courage and Addreſs, that they not only arrived ſafely at *Olinda*, but likewiſe carried off a *Portugueze* Man of War that they had taken; ſo that, upon the whole, it may be ſafely affirmed there never was a more glorious Action than this, ſince the *Dutch* became a maritime Power. When Admiral *D'Oquendo* arrived, he contented himſelf with ſending Refreſhments and Reinforcements to the Army of *Albuquerque*, but attempted nothing againſt the City of *Olinda*, and conſequently left Things in very little better State than he found them; which he excuſed from the great Loſs he had ſuffered in the Battle, amounting, in the whole, to no leſs than thirteen Sail taken and ſunk.

In the Month of *October* he ſet ſail for *Liſbon*; but had the Misfortune to meet in his Paſſage with four *Dutch* Men of War well manned, who made no ſcruple of attacking him, though he had ſtill forty Sail, and moſt of them large Ships. He loſt in this Engagement the Captain of his own Ship, twenty-two Captains more, his Vice-Admiral, three Men of War, two Frigates, and about ſeven hundred private Men; ſo that he brought home the wretched Remains of a Fleet unfortunate from the Beginning, and yet without any Impeachment of his own Character; the Blame falling intirely upon the Miniſters, who had obliged him, in ſpite of his Remonſtrances, to ſail with Ships half equipped and half manned.
